MAGDALEY ISLANDS a group of 11 islands, British N. America, Gulf of St. Lawrence, lat. 47° 30' to 47° 33' N., lon. 61° to 62° W. *Coffin's Island* (which see) is the largest of the group, and is 25 m. long, and, in some places 3 m. wide. The other larger islands are *Amherst*, *Wolfe*, and *Saunders*. None of these contain minerals of any consequence although in some places plaster of Paris and coals of various colours are met with. *Junkies*, berries, strawberries, and raspberries are abundant as are, likewise, silver or grey-coloured foxes. The fishing chiefly for seal, herring and cod, the last the most valuable and important, forms the sole means of subsistence. Pop. about 1000.

MAGDALENA.—1 A dep. New Granada, comprehending the countries lying between the W. boundaries of Venezuela and the Gulf of Darien, and between lat. 8° N. and the Caribbean Sea, including the four provs. of Rio de la Hacha, Santa Marta, Cartagena, and Mompoz, area, 50,800 sq. m. It is very thinly inhabited excepting along the coast and the banks of the Magdalena. Principal rivers the Magdalena, Cauca, Jorge, Nechi, and Fuma. There are also several lakes, mostly however, extensions of the rivers. The soil is singularly fertile, the climate extremely hot, during the day the sky is cloudy and rain frequent but the nights are beautifully clear and delightful. None of the rivers contain gold dust, but it is not collected. The principal products are cotton, cacao, tobacco, spicacuzina, anelova, balsam and dye-woods. Principal towns—Cartagena, Barranca Nueva, Santa Marta, Mompoz, and Ocaña.—2 A large river New Granada. It rises in the central Cordillera of the Andes 35 m. S.E. Payson, lat. 1° 33' N., lon. 76° 25' W. flows generally N. and falls into the Caribbean Sea by several mouths, lat. 11° 8' N. lon. 74° 50' W. Its basin comprises an area of 72,000 sq. m. and its whole length is 500 geo. m. direct distance, or 926 geo. m. including windings. Principal affluents, the Cauca and Gualenao; the former is nearly as large as the Magdalena, has its source in nearly the same latitude and holds a parallel course till it joins it at lat. 8° 25' N. about 25 m. N.W. Mompoz. The Magdalena is navigable as far as Honda, lat. 5° 14' N. 436 m. from its embouchure. Its banks are inhabited by numerous mosquito oas, and by vast numbers of caymans and crocodiles. Its waters are muddy and enter the sea with such impetus as to preserve their freshness for a considerable distance from its mouth.—3, A large river Bolivia, called also the Uchaby Branch, and San Miguel. In its earlier course it is called the Chiquitos. It issues from Lake Uchaby, lat. 18° 20' S., and flows N.W. to about lat. 10° S., when it assumes one or other of the names above quoted, and ultimately falls into the Itenez or Guapore, in lat. 12° 20' S. lon. 66° 5' W. Its course from the point at which it assumes the name of the Magdalena, till it joins the Guapore, is 225 m. Its entire length, including the Chiquitos, is upwards of 400 m.—4, A small lake Bolivia, a few miles W. from the Magdalena, lat. 14° 8' S. lon. 64° 25' W., about 12 m. long and 5 m. broad.—5, A small river Bolivia, 1 bank Magdalena lat. 13° 51' S. lon. 64° 31' W.—6, A river Texas, N. America, falls into the Bay of Matagorda, about lat. 28° 50' N. lon. 96° 23' W.—7, A bay, W. coast, peninsula of Old California, formed by the island of Santa Margarita lat. 24° 32' S. lon. 112° 5' W. sometimes called Magdalena.—8, An isl. S. Pacific Ocean, Marquesas group, about 33 m. in circumference lat. 10° 31' S. lon. 159° 45' W. It is mountainous, the highest summit 7700 ft. high, and is densely peopled. The coast has a bold and picturesque appearance. It is known by the name, also, of *Ottobach*.—9, A small isl. Mediterranean off N.E. coast Sicily, lat. 41° 18' 4' N., lon. 8° 24' E. (s.).

MAGDEBURG, a gov. Prussia, prov. Saxony, bounded N. by Mecklenburg and Hanover W. Hanover and Brunswick, S. Anhalt and gov. Kitzburg, and E. gov. Prussia, area, 2868 geo. sq. m. The surface consists

generally of an extensive plain, only occasionally broken by low undulating hills. In the S. and S.W., however, the Harz mountains occupy a considerable area, and even attain their highest elevation in the Brocken. The principal river is the Elbe, which traverses the gov. cursorily in a N.W. direction, and receives within it its most important tributary, the Saale. A small portion of the W. belongs to the basin of the Weser. The largest lake is the Arrensee, which has an area of 24 geo. sq. m. The minerals include iron, a little coal, considerable seams of lignite, copper, alum, schist, and gypsum. Sandstone, limestone and potter's clay are found in many quarters. In respect of soil the government is one of the most fertile in the kingdom. The principal crops, most of which leave a considerable surplus for export, are wheat, rye, barley, oats, buckwheat, rape-seed, flax, hops, tobacco, and clover. Manufactures have made considerable progress, and include, among numerous other articles of less importance, woolen, linen and silk goods, leather, gloves, iron oil, brandy, vinegar, porcelain and earthenware. There are also numerous wrought mills and beet-root sugar factories. Among the inhabitants, Protestants constitute an immense majority. Not one in fifty is R. Catholic. The gov. is divided into 14 circles. Pop. 1849 691,674.

MAGDEBURG a tin. Prussia, prov. Saxony, on the Elbe, 76 m. W.S.W. Berlin. It ranks as a fortress of the first class, and in consequence of the additions and improvements which its fortifications have received since the last great war, is regarded as one of the strongest places in Europe. So extensive are its works that an army of 100,000 men would be required to invest them completely. The Elbe here forms several branches, and divides the town into three parts—the town proper which on the land side, is regularly fortified and towards the river defended by Forts Sternschloss and Schanzhorst; the Warden with its citadel and Frederikstadt, likewise strongly fortified. These different parts communicate with each other by several bridges. The houses are, for the most part, large and handsome—but in many places, particularly in the neighbourhood of the citadel, are very much crowded together and a great number of the streets are narrow. The principal squares are the New Market or Domplatz, and the

THE MARKET PLACE, MAGDEBURG.—From *Forster's Der Rheinische Reichs*.

Old Market, which is decorated with an equestrian statue of the Emperor Otto erected in 978, and is the site of some of the most important public edifices. A fine walk is furnished by the Filleswall, a well-planted terrace or parade ground, along the margin of the Elbe. The buildings most deserving of notice are the Dom or cathedral, one of the noblest Gothic structures of N. Germany erected in the 13th and 14th centuries, and recently repaired at immense expense, flanked by two towers, and remarkable within for the height of its ceiling, the beauty of its chancel and baptistery and a number of curious monuments. St. Sebastian's church, in which is the grave of Otto Guericke, the inventor of the air-pump, the Marien, or R. Catholic church, older even than the cathedral,

several other churches, townhouse, and theatre. As the capital of the province Magdeburg is the seat of a number of important courts and public offices. It also possesses numerous benevolent institutions and educational establishments. Among the former five hospitals, and three orphan asylums, among the latter a cathedral gymnasium, polytechnic, normal school, nary medical, industrial, and at several other schools, institution for the deaf and dumb, &c. The manufactures consist principally of woollen, linen, and cotton cloth, silk and cotton ribbons, leather gloves, soap, and candles. There are also, several important cotton and wheat mills, beet sugar, and slivory fuel trees, breweries, distilleries, oil, and vinegar works. The train, which derives great facilities from the position of the town on the Elbe, the canal connecting this river with the Havel and the railroads communicating with Leipzig, Halle, Berlin, and Hamburg is of great importance. The principal articles are corn wood and other products of the soil, coal, wine, and colonial produce. The trade and manufactures thus carried on are not confined to the town, properly so called but several of the most important establishments have their locality in two suburbs which are sometimes described as separate towns—Nuremberg immediately to the N and Siedenburg to the S.W. Magdeburg is a place of great antiquity and is mentioned in records in the eighth century. It early distinguished itself in the Reformation, and long exerted a powerful influence in its favour. The hostility thus excited was the cause of its greatest disaster. In 1631 after a siege, in which it valiantly defended itself it was taken by storm, and given up to indiscriminate massacre by the brutal Tilly. The most horrible atrocities were committed. A church in which hundreds of women and children had taken refuge was nailed up, to prevent escape and then burned. Above 20,000 people were murdered and the greater part of the town was laid in ashes. Otto von Guericke, Immermann and Zeelohke, were born here Pop. (1816) 34,504 (1849) 56,161

MAGDE, a tin and par Switzerland, can Aargau 15 m. E.S.E. Basel with a church and paragon. An excellent red wine is produced in the district. Pop. 1038

MAGE, a tin in Brazil, prov and 35 m. N.E. Rio de Janeiro on a river of same name. It has a neat church, a number of well-furnished shops, and a considerable trade in sundries: four of excellent quality coffee, sugar, rice, legumes, and wood. Owing to extensive swamps in the neighbourhood intermittent fevers are very prevalent. The river rises in the north the Opipio prov Rio de Janeiro passes the town of its own name up to which small boats can come with the tide and after a course of about 24 m. falls into the bay of Rio de Janeiro

MAGFAN, a vil Java, esp. prov Kadoc 40 m. S.W. Semarang 1717 ft. above sea-level. It has several good stone buildings, including the governor's house, a native mosque, and a respectable-looking prison. The Chinese quarter is neat. Magelang is partially fortified

MAGILLAN (MAGILLAN) See MAGILLAN.

MAGENTA a tin and paron Italy Lombardy prov Iaviz, 16 m. W Milan. It has a parish and three auxiliary churches, and manufactures of wax tandles, soap and whetstones. The wine of the district, and also its oil provisions, bear a high name. Pop. 5176

MAGFROE, an isl Norway off V coast of Finmark containing the North Cape lat. 71 11 30" N lon 30° 0' 45" E. It is of level, the form and deeply indented all round with bays and inlets. Its greatest length is about 30 m., breadth 10 to 12 m. It is rocky and mountainous and destitute of trees but in the interior are some verdant spots on which cattle and sheep feed. There are some remains on the island, and a considerable number of inhabitants. See NORTH CAPE.

MAGGORA a vil and com Italy Piedmont, div Novara, near Borgo Muroto, r bank (vicinity) with a number of well-built houses, two churches, an elementary school three charitable endowments, and manufactures of soap, fuselina, and mits of experience iron. Pop. 3074

MAGGORE, or MAGGORA a lake in the N of Italy common to the Swiss can. Tesan Piedmont, and Lombardy and consisting of a long and comparatively narrow expanse, stretching irregularly N.E. to S.W., for 40 m., with a maximum breadth of 5½ m. and a mean breadth of not more than 2 m., perimeter 91 m., area, 24 sq m., maximum

depth 2025 ft or nearly 438 fathoms; height above sea level, 698 ft. Its basin is of large extent, the lake receiving all the waters which descend from the lofty Alps, commencing near Mount Rosa, and thence circling round to a point between the Lakes of Como and Lugano. Its chief feeders are the latter lake, which discharges itself into it by the Fren, on the E. the N. Ticino, which falls into it on the N.E., and the Tice on the W. A considerable traffic is carried on in timber cut on the mountain sides, and by sailing vessels and steamers the latter plying regularly upon it between Magdeburg and Como/Lugano. Numerous travellers avail themselves of this last means of conveyance, to view the splendid scenery for which the lake is celebrated. The lake has no islands of any importance, except the beautiful Borromean Isles, forming the entrance of the small gulf into which the Tice falls. It is well supplied with fish particularly trout, which some times weigh 50 lbs. On its shores are quarries of fine white marble

MAGHERA —J A market to and par Ireland co. and 28 m. S.E. Londonderry. are besides a number of curious and elaborate excavations in the living rock and a great variety of carved representations of animals and non-descript monsters. The town is said to have extended many miles to the E. on ground now covered by the sea.

MAHAH PSHWUR HILLS, a convoluted station Hindoostan in the Ghats of the Deccan lat. 17 05' N lon 73 30' W 4500 ft. above sea-level. The hills, which is built mostly of stone, contains a sun-dial, a church, prison, and subscription library.

MAHADEO a temple, Hindoostan presd Bengal S W district, in the Mahadeo hills. It is a famous object of Hindoo pilgrimages, and has 60 m S E Humeinabad, on the Ner ludda lat. 22 27' N lon 85 5 L.

MAHANADA a river Hindoostan presd Bengal It is formed in prov Bengal 20 m E Purneah, by the junction of the Kinnia and another stream, both proceeding N from Sikkim. From the junction the Mahanada flows S E and, after uniting with some other streams joins the Ganga 80 m N N. Mounesahat. Total course from source of the Kinnia 250 m and from the junction 100 m direct distance.

MAHANUDDY PIVER a Hindoostan It rises in prov Gundwah near Kyrangpur lat. 21 20' N lon 80 50' E. flows S E and then E. through prov Orissa, past Bumbur and Cuttack and falls into the Bay of Bengal by two mouths the most N in lat. 20 18' N lon 86 40' E after a course of about 480 m. During the rains, it is navigable 300 m up from its estuary but a large portion of its channel is dry during five or six months of the year, when it is fordable even at Cuttack on the higher part of its course it is rendered difficult by rocks and rapids. Diamonds of the finest quality and of various sizes are found in the stream and in several of its tributaries more especially at the mouths of the Masand, Khelion and Hele.

MAHARAJGUNCE, a tn Hindoostan presd Bengal near 1 bank Mahanada 250 m N W Calcutta.

MAHAVILLY GUNGA a large river Ceylon, rises nearly in the centre of the S part of the island lat. 6 47' N lon. 80 54' E 34 m S Kandy. It has generally a N N E course, though with many and great deviations, nearly on circles Kandy and falls into the Bay of Bengal at Trincomalee whole length about 160 m. It has magnificent falls between Kandy and Burumy, near the latter of which towns it attains its greatest breadth, 540 ft. It is so obstructed by mud-banks as to be impracticable for boats.

city consumed and the annual supply imported chiefly from the Persian Gulf, has been estimated at 25 000 tons. — (Capt Haines *Jour Roy Soc* vol x Wallsted's Travels.)

MAHARATTA or **MAHARATTA STRATA**, an extensive territory Hindoostan, which originally included Candahar, Bagiana, and part of Bazar extending N W as far as Ghorat and the Nerbada, and W along the narrow mountainous tract which forms the E frontier of the Concan and stretches N from Surat to Canara. The Maharatta language is still more widely diffused, and, though not the vernacular dialect, is spoken in provinces far beyond the original boundaries of the Maharatta country. All these states are now subject or tributary to the British.

MAHREN a prov Austria. See **MORAVIA**
MAHRISCH several places Austria Moravia. — 1 *Neustadt* a town in N W Olmitz, on the Oskawa, and the railway to Prague, with considerable woollen manufactures. Pop 3600. — 2 *Ostrow* a town, on the Oskawa, consisting chiefly of wooden houses. Pop 2000. — 3 *Zyben* a town, on the Oskawa, and 29 m N W Olmitz, in a fertile district on the Trbítz river, with a castle, 1 great college, gymnasium, high school, and manufactures of woollens and linen. Pop 3000.

MAIA, a river, Sabara, which rises in the W slope of the mountains of Stanovoy, S W of the town of Okhotsk, flows first N W then N, and, after a very meandering course of nearly 600 m, joins the bank of the Amur, opposite to the town of Lst. Mandana. Its principal affluent is the Judoma.

MAIDA a town in Naples, prov Calabria Litta II, dist. and 8 m N. Nicotro on a height. It is well built, and has four churches, near it there is a salt spring. In July 1806 the British here defeated the French. Pop 2700.
MAIDEN, 2 pars England. — 1 *Reading* Somerset and Wilt 4548 ac. P 794. — 2 *Wilt*, 1000 ac. P 871.

MAIDENHEAD a municipal corp and market in England, co. Berks, 12 m E of Reading, near the bank of the Thames, here crossed by a fine stone bridge and on the Great Western Railway. It consists principally of one long street lighted with gas, and paved, and in which the houses are tolerably well built and has a handsome and commodious chapel, and places of worship for Wesleyans, Independents, Catholics of the Augustinian Connection, and the Society of Friends a town hall and market house, a national school, several endowed charities, trade chiefly in malt, corn, meal and timber. Pop (1861), 3807.

MAIDENS, a cluster of rocks, in the bay off E coast, Ireland, co. Antrim, 6 m N by E Larne light-house. They are surrounded by dangerous reefs, and on each of the two highest rocks is a light-house, with fixed white light, at an elevation of 84 ft and 94 ft respectively lat (N light) 54° 56' N long 5° 44' 15' W.

MAIDSTON a parl bor market in par England, co. Kent, in a pleasant and fertile valley 52 m S. E. of London 1 bank Medway here crossed by a bridge of five arches and on a branch of the S E. railway. It consists chiefly of four principal streets which cross each other at the market place with smaller ones branching off at right angles, well paved, and lighted with gas. It has a neat town hall, commercial room and theatre and an extensive county jail, occupying an area of 13 or 14 acres, a fine old church one of the largest parochial buildings in the kingdom supposed to be of the fourteenth century, a new church place of worship for Wesleyans, Baptists, Independents, Unitarians, and a Society of Friends meeting house, a free grammar-school, a proprietary and several charity schools, and an excellent infirmary dispensary and six almshouses. The only manufacture worth mentioning is paper for which there are several large mills. An extensive trade is carried on in fruit and hops. The Medway is navigable for large boats up to the town. The bor sends two members to Parliament. Registered electors (1851), 1751. Pop bor (1851), 80 801.

MAIDWORTH, a parl bor Northampton, 1660 ac. 1 280.

MAILAND a town Italy See **MILAN**.

MAILCOOTA a town Hindoostan, prov Madras, in Mysore, 18 m N Seringapatam, lat 13° 59' N lon. 79° 42' E, on a rocky hill. It is open, well built, and paved, and is one of the most celebrated places of Hindoo worship in India. It contains several pagodas, a large temple, surrounded by a

colonnade and a very large tank, on the banks of which are numerous buildings for the accommodation of pilgrims.

MAILI FRAYE (La) [*Latin Moschellus*] a hamlet, France dep. Seine Inférieure r. bank Seine, near the forest of Brotonne, and not far from Paris. It is chiefly deserving of notice for its plateau a vast expanse of irregular vegetation facing the river. The park has been laid-out at considerable expense, though not in very good taste and is a frequent summer resort. There is a building-yard in the neighbourhood.

MAILMAKIPIN or **MAILMA** (Cau) [Saying and selling mail] a town China Mongolia, on the frontiers of Siberia, forming, with Kachia, an entrepot for trade between Russia and China. See **KIACHTA**.

MAILMUND a town W Afghanistan about 34 m W of Kandahar and near the route between it and Herat. It stands at the opening of a rich cultivated valley, enclosed by hills of moderate height.

MAIN, a river Asiatic Russia, which rises in a branch of the Stavropol mountains, on the N frontiers of Kaimachka, flows N W and joins the bank of the Anzot after a course of nearly 180 m.

MAIN or **MAIN** [*anc. Maina*] a river Germany which is formed in the N of Bavaria, by the junction of the White and the Red Main about 13 m N W Rureuth. It flows N W to the confines of Hesse, and then makes a succession of remarkable zigzags, generally E. and N. but directly W till it reaches the confines of Hesse-Darmstadt, which it enters. It then flows circuitously W forming the boundary between Hesse-Darmstadt and Hesse-Cassel, crosses it a territory of Hesse-Kassel, turns S W, forming the boundary between Hesse-Darmstadt and Nassau, and joins the bank of the Rhine, a little above the town of Mainz, after a course of 230 m. Its principal affluents are on the right the Rodahn, the Rannach, Franconian Saale, Kinzig, and the Nidda, and on the left, the Regnitz, Tauber, and Gerabach. The principal towns which it passes are Würzburg, Aschaffenburg, and Frankfurt. It is navigable for about 200 m, commencing at the confluence of the Regnitz and by means of King Ludwig's canal it affords through navigation to the Danube.

MAINA a mountainous district of Greece, in the S part of the Morea, comprising the narrow peninsula between the gulfs of Koron and Kalamata, a portion of the ancient province of Laconia. It is the most fertile part of the peninsula consisting chiefly of the extensive ridge of mountains known by the name of Taygetos. — The town of Maina an insignificant place, is situated near the extremity of the peninsula on the Gulf of Kalamata.

MAINBERNIBIM a town Bavaria Lower Franconia with a church a normal school a parsonage a trade in corn and wine and four mills. Pop 1033.

MAINBURG a market in Lower Bavaria 27 m S S W Ratibon with three churches two mills, and a trade in corn, fruit, horses, and cattle. Pop 1023.

MAINL, one of the E. and maritime U States of N America, bounded E and N by New Brunswick, N and N W by Lower Canada, W by the State of New Hampshire, and S E by the Atlantic Ocean lat. 43° 0' to 47° 20' N lon. 66° 50' to 70° 55' W area, 52,028 sq m. It is an elevated country, but hilly rather than mountainous. From the W side of the state, E of the White Mountains in New Hampshire an irregular chain of highlands extends E. to the N of the sources of Kennebec and 1 embouchure and passing E. of the sources of the Arrowsicut terminates on the E boundary of the U States. Katahdin mountain, about 70 m N of Bangor between the F and W branches of the Penobscot the most elevated summit of the chain, is 5385 ft high. Another chain of highlands extends in a N W direction from near the N W sources of the Connecticut dividing the waters which flow N into the St. Lawrence from those which flow S into the Atlantic Ocean and the Bay of Fundy, probably nowhere less than 1400 ft high. The state, however, is almost completely traversed by navigable rivers; the principal of which are the Penobscot and Kennebec; and in the interior are numerous lakes of which Moosehead is 60 m long, by 10 to 10 m broad and Umbagog partly in New Hampshire, is 18 m long and 10 m broad. The number of the smaller lakes is so great that one-tenth of the surface of the state is computed to be covered with water. The coast abounds with islands, the largest of which is Mount Desert, 15 m long and 12 m broad,

MAIXENT (Sr.) [*Latin. Maixentopolis Pictorum*] a tn. France, dep. Deux Sèvres, 13 m. E N E. Niort, on the slope of a gentle hill, at the foot of which flows the Sèvre Niortaise. It is an irregular, ill-built place, surrounded with old walls. It possesses a consulting chamber of commerce and a communal college has considerable manufactures of serge, woollen hosiery, and other commodities, chiefly a renowned mill and a trade in mules, horses, corn, wool, &c. Pop. 4095.

MAJAKHO, a bay N W coast Madagascar, lat. 16° 12' S. lon. 46° 59' E.; and is about 5 m wide, narrowing gradually to 2 m. where, at the distance of 9 m from the entrance, it opens into a capacious basin or inner harbour. The soundings vary from 4 to 68 fathoms. Several rivers fall into it. At the head of the bay is a small town of some name, which was formerly inhabited by Arabs.

MAJDAN a vil Hungary Thierus on Krassova, 4 m from Győr, with a Greek church, and a trade in damson plums. Pop. 1810.

MAJINDA, a to Soudie, r bank Indus, 85 m. N W Hyderabad lat. 25° 51' N lon. 68° 19' E, on an alluvial but indifferently cultivated plain. It has an extensive bazaar and has been frequently swept away by inundations of the Indus but, on these occasions, the inhabitants merely retire a few hundred yards and again erect their habitations. P. 2000.

MAJOLCA [*Spanish Mallorca, French Majorque, Latin Meliora-majore*], an isl. Mediterranean, belonging to Spain, and forming the largest of the Balearic group, about 115 m S. Barcelona. lat. 39° 14' to 39° 27' N lon. 2° 18' to 3° 27' E (n.) greatest length W to E 68 m. greatest breadth 45 m. current, 144 m. and area, 1420 sq m. It is very irregular in shape, and deeply indented, particularly in the N E. by the bays of Alendia and Pollensa, and on the S W by that of Palma. The most prominent headlands are Cape Formentor in the N. Pinar and Fornells in the N E, Pura in the E. Balans in the E. Calaguera in the S W, and Trancas in the W close to the small island of Dragonera. The coast on the W and N facing Spain, are very lofty and steep, in other directions, and particularly on the E, they are low and shelving. A great number of good natural harbours are scattered over the coast, and more especially in the larger bays. The interior is finely diversified by mountains, hills, valleys, and plains. A mountain chain stretching N E. to S W, naturally divides it into two different parts—the one on the E. and S W generally level and the other on the N and E covered for the most part with lofty heights. These heights form two distinct groups. One of them commences at Cape Calaguera, and extends to Cape Formentor and the other extends from Cape Formentor to Cape Roca or Borjeto. The salient point of the island, Punta de Toralla, belonging to the W chain, has a height of about 4900 ft. Almost all the rocks consist of limestones, belonging to the upper part of the secondary formation and overlaid by tertiary strata. The climate is temperate, the mountains in the N affording protection against the winter cold, and refreshing breezes from the sea mitigating the summer heat; violent winds however are not unfrequent and the air is often overcharged with moisture, which hangs in clouds or descends in mists. Some of the plains are of a thin, hungry soil, where the want of irrigating streams makes cultivation almost impossible; but the island generally both in the hills and plains, is well watered and fertile, producing in considerable abundance, wheat, barley, oats, legumes, oil, and wine; maize, hemp, flax, silk and saffron are produced in less abundance; fruits abound everywhere, and include figs, oranges, lemons, citrons, dates, and pomegranates. The pastures feed large numbers of swine, sheep, goats, horned cattle and horses, the smaller kinds of game, and particularly birds, are everywhere seen, and the fisheries, on the coasts, are valuable. The manufactures, which are very insignificant, include a few linen, woollen, and silk goods, simple or mixed hats and cabinet-work and the trade is chiefly in oil, wine, brandy and fruit, particularly figs and oranges. The inhabitants are brave, hardy and industrious, tolerably strict in their morals, religious, and submissive to the laws. They make good soldiers, and were suddenly celebrated for their skill in the use of the sling. Pop. 179,763.

MAJORI a to Naples, prov. Principato-Citra dist. and 6 m W S Salerno, on the Gulf of Salerno. It contains seven churches. Pop. 2700.

MAJSE, or MAYAK, a vil Hungary, Thierus Danube, co. Baranya, 6 m from Mohacs with a R. Catholic and Greek non-united church. Pop. 1217.

MAJSA, a vil Hungary dist. Itelle Kumanu, 18 m from Tolygha. It has a R. Catholic church, and, near it, are freestone and limestone quarries. Inhabitants chiefly employed in fishing etc. Pop. 4398.

MAJTHNY [*Nagari*] a market town Hungary Thierus Thassa, co. Szekes, 1 bank Krasna, 50 m E by N Debrecen with a R. Catholic church. Pop. 1961.

MAJUAGA or **MARUJA** a tn in the N W of Isl. Madagascar near the entrance to the Bay of Bombatoka, lat. 15° 44' S. lon. 45° 13' E. It is large and straggling and nearly 1 m in extent. The style of buildings in the town varies like the inhabitants one-half being Arab the other Madagasy. Numerous ancient tombs would indicate that the place had been more populous in former times than at present. An extensive trade is carried on here, chiefly with the Americans in packed beef, horses, tallow and hides.

MAKAD a vil Hungary Thierus Danube co. and about 27 m from Pesth on Rakovec an island of the Danube with a Protestant church. Pop. 1088.

MAKADISHU [*written by the Portuguese Magadeno*] and in maps frequently *Magadeno* is an important town once considered as the capital of a kingdom on the coast of Africa lat. 2° 2' N lon. 4° 20' E. This is the first town which occurs on the coast S. from Ras Hafin in a distance of 700 m.; the intervening shore being desert and hardly accessible, owing to the violent surf. From this S. the coast still retains its sterile aspect, though well peopled, and has been rarely visited, as the natives have, till recently always manifested a treacherous and inhospitable disposition. Since about 1838, however they have welcomed English visitors who have been enabled to clear up the mystery of a numerous population and great abundance of food and fuel on a bare strand backed by barren sand hills, and have revealed to our view that Nile of Makadishu so much celebrated by Arab writers. A reef of rocks here runs parallel to the shore for some distance, and shelters the inner channel which, with two fathoms water forms an excellent boat harbour. To this circumstance, doubtless, the town owes its origin. Makadishu has a fine appearance from the sea. Its stone towers, two or three stories high, with numerous turrets or minarets rising above them, offer the outline of a well built city but a near approach, and close inspection of its narrow streets its dilapidated and squalid dwellings, remove this impression. With respect to the turreted or domed buildings we learn nothing from recent sources beyond a hint that they are of a royal character. It was stated by a sailor who lived 16 years a captive in Makadishu, having been thrown on shore from the wreck of the *Alfonso* East Indiaman in 1790 that the buildings in question are tombs and of coloured marble. The king's Mosak, for so he calls it, is 110 ft sq built of black and white marbles, with a green cupola. Lamps are kept burning in it night and day. Pots or vases, containing the ashes of the king's hearth, are ranged round the walls he reckoned 87 of them. Makadishu consists of two towns close together—*Ilamarrin* to the S. and *Shanghal*. The former with a Somali or perhaps ancient Arabic name, is obviously the town of the superior and ruling caste, the latter with a Sawahili appellation contains the slaves and lower orders. *Shanghal* is a collection of huts, built round the tombs or temples already mentioned. *Ilamarrin* displays about 150 stone houses all in a state of decay, but well constructed and often handsome, and manifestly the work of a people much superior in arts to the present inhabitants of the place. The population of Makadishu is from 8000 to 4000 S. for 200 m of the coast is well lined with towns and villages, the chief of which are *Makhal* and *Beravah*. *Makhal* in lat. 1° 43' S. lon. 44° 58' E. is partly built of coral and contains about 8000 inhabitants. The adjacent strand and hills behind the town have the usual bare and arid aspect of this coast. This place has lost its importance, and chief source of gain, by the suppression of the slave-trade. The inhabitants of this village have been exaggerated, in some maps, into a great nation under the name of *Mareotia*. *Berava* or *Beravah* lat. 1° 5' N. lon. 44° 2' E. resembles the preceding towns in most respects, but is probably larger its population being estimated at 2000 or 6000. The people

are of a tribe called Bayda, governed by a chief, who professes allegiance to the Sultan of Makat. A stone pillar on the sea-side, about 1 m. S. of the town, shows the entrance of the harbour or anchorage, which is sheltered by two small islands. Hence, as indeed on all the coast from the Juba N to Ras Hafsa, 800 m. there is nothing visible but a barren strand and naked reddish, undulating hills, 1½ or 2 m. distant, and from 150 to 250 ft. in height. Only a few pumpkins and water melons are grown in gardens near the town. Arabians sometimes show themselves in the neighbourhood and the hyenas feed in the town at night.

A chain of populous towns and villages, extending along 200 m. of a desert and utterly unproductive coast, is a remarkable phenomenon, and would doubtless have awakened the curiosity of geographers, but for the darkness which continued to hang over a region the well-known inhospitality of which repelled Europeans. The account given by Arab writers of the Nile at Makaddia were repeated as fabulous. The Obelisk of the Barrow was thought to be the Nile and later allusion to the same river under the name of Dakko, failed, from their obscurity to fix attention. The first European who ventured to intrust himself to the guidance of these people on an excursion into the interior was Mr J. Steady Leigh, who in Nov 1836, went from Brava to the river a distance of 8 m. He found the sand hills torn by new volcanic terrors, so as to resemble the crater of a volcano.

On the summit the level extended for some distance with only a few short sharp ridges over it. At length the low plain ended and to the view a perfect level extended to the horizon, and covered with trees distributed as in a park, among which the Bombax was conspicuous for gigantic size and rich foliage. The river was found to be 60 yards wide and 3 fathoms deep. The approach to it was difficult for 2 m. owing to the softness of the irrigated ground. Again in March and April 1843, Lieut W. Christopher E. L. C. crossed to the river from Brava, from Makat and from Makaddia respectively, distant from it 8 1/2 and 22 m. and thus ascertained the character of this very remarkable stream through a course of 120 m. It irrigates the land to a distance of at least 2 m. on both sides (probably much farther at the height of the flood) and percolates also through the sand wherever it reaches the hills and being thus wasted diminishes in its course downwards. At Girra N. W. of Makaddia it was in the driest season, 250 ft. wide. Near Brava, 120 m. lower down its width varied from 70 to 150 ft. and further on it was said to turn N. W. and to be whilly spent before it reaches the river Juba, though there is reason to believe that its ancient channel occasionally filled perhaps in the flood is still recognizable in a wide creek (Khal) in Arabia, the Collee of Pigeatla 80 or 100 m. up that river.

The country irrigated by the Webb or Nile of Makaddia fits newly imposed name Hamar River seems needless at the home of plenty. No other spot on the earth perhaps equals it in growing abundance. It is the granary of S. Arabia, producing rice, millet and maize the latter two ripening at all seasons of the year. Lieut Christopher found that he could purchase for a dollar 1900 lbs. of good grain. Fruits are not wanting the fig tree is allowed to overhang the banks of the river and to all this it is added great natural wealth due to the broad-felled sheep and camels. The population chiefly of the Somali race inhabiting the banks of the river and adjacent coast from Makaddia to has been estimated at 150,000. It will probably be found that the sources of the Webb lie much further W. than has been hitherto supposed, and that it runs a long way N.E. towards Harar before it turns S. across the desert to Makaddia. The river of Juba lat. 6° 10' 35" S. (the Gornid of the Somali the N. limbs of the Sawdillo) is under the authority of the sheikha of Brava. Within the bar, which is shallow, it is navigable a long way but is fordable, in the dry season at 1 fathom about 20 m. up, to which place the trade of the coast extends. (Owen's *Travels*. Lieut Christopher On the E. Coast of Africa, *Journal Roy. Geog. Soc.* vol. xiv.)

MAKALLAH or MACALLAN, a S. coast Arab in Hadramaut and the chief commercial depot of that country. It is built on a narrow rocky point, projecting southwards into the sea, behind it lies cliffs of reddish limestone, 500 ft. high, on which are erected six square towers, for the defence of the town. The Governor's house, a large square building, is in lat.

10° 30' N. lon 49° 11' E. On either side of the point on which the town stands, is a small bay. That on the W. sheltered on the same side by a reef, is much frequented by coasting vessels. Ras (Capo) Makallah, distant about 4 m. affords shelter on the E. Immediately above the reef cliffs Jebel Gharrah a flat-topped mountain of beautiful white limestone, rises 1800 ft. above the sea. The rocks contain two megaliths and some stone houses, a few of which are three stories high but most of the dwellings are walled ruins. The population of Makallah, estimated at 4500 or at 7000, and said to be increasing, is of a very multifarious, and perhaps, fluctuating character. Besides the Arab inhabitants there are Banyans, Karachies from the Persian Gulf, Sawdillo from the E. coast of Africa and Somali from the coast opposite to Aden. These strangers are equal in number to the indigenous population. The commerce with India is chiefly in the hands of the Banyans but the coasting trade is also very active and a good deal of business is done in the slave-market. Makallah is on the whole a prosperous seaport and though it is said to have first started up on the ruin of Aden, yet now the restoration of the latter place does not seem to depress it on the contrary the security arising from the presence of British cruisers, and the example which Aden sets, of large enterprise and liberal dealing, evidently tends to nourish among the Arabs the spirit of peaceful industry. (Haines, in *Journal Roy. Geog. Soc.* vol. ix.)

MAKARITWY twotus Russa. — 1 to, gov and 105 m from Kozmoma cap dist on the Juba. It is regularly built with straight and well laid-out streets, and has a handsome market-house, three churches, a convent, several banyans and a vitrol work. A considerable number of barges are built here, and an active trade carried on particularly in corn. P. 3112. — The district is of a cold ungenial soil, but produces a good deal of flax and hemp. A great many horses are reared, and the forests which are extensive, furnish excellent timber. — 2 A to gov and 50 m E.E. Nijm Norgard cap dist 1 bank 1/2 m, near the confluence of the Kozmoma. It is a wretched old built place, but contains a large monastery having the aspect of a fortress. A celebrated fair is held here which lasts the whole month of July and is frequented by numerous dealers from distant countries — Bucharians, Persian Greeks, &c. Pop. 2176. — The district produces much excellent flax. Pop. 8000.

MAKAR par. P. 11 on 3204. Pop. 9822. MAKEI-FOV par. No. R church 982. ac. 1 345. MAKIAN MAKIAH or MATIAK a small volcanic island in the Archipelago Moluccas W coast of Gilolo lat. 0° 40' N. lon 127° 20' E. In 1746 an eruption of the volcano accompanied by an earthquake destroyed numerous villages, and a great many lives. The island is exceedingly fertile and for a time fortified by the Dutch but is now in a very decayed state and its population has decreased from 9000 to 2000.

MAKKUM a maritime N. Holland prov. Friesland 18 m S.W. Ierswarden on the Zuider Zee with well made streets a rooey butter-market, an elegant weigh-house, a Calvinistic a Baptist, and a R. Catholic church two schools and as many poorhouses an active shipping trade a building yard and limited manufacture of cordwainery, leather and paper with some oil mustard and corn mills. Pop. 1943. MAKMOWA or MACHINOWKA a to Russa gov and 93 m S.W. Kuw r bank Gullupet an affluent of the Dnau. It has a R. Catholic and two Greek churches, a Greek convent and manufactures of ironware and leather. P. 4001.

MAK or MAKIVA a market in Hungary, county Thutser Thoms co. Gecaz r bank Maros, 22 m E by S. Seregheim. It is the residence of a bishop, and contains a R. Catholic, a Greek united, and a Protestant church, a Protestant gymnasium a court house and county buildings and handsome barracks recently constructed. The district around is very fertile producing grain and cattle and rearing great numbers of cattle. In all these, and also in wood, the trade is considerable. The fishing in the Maros, which is very productive, supplies a considerable number of the inhabitants and there are also numerous mills and a yearly market. Pop. (1848) 21,000, of whom rather more than one-half are Protestants.

MAKOW a to Russian Island, 63 m E.N.F. Ploek r bank Orak. Pop. 1448.

MAKOWIEC a tn. Russian Poland, 88 m E E W. In a battle fought here in 1794, between the Poles and Russians Kosciuszko was wounded and taken prisoner.

MAKRI MACRI, or **MAKRI** a to, port and gulf or bay. Adette Turkey pass Anatolia, S.W. coast. The town, lat. 36° 37' N. lon. 28° 9' E (a.) consists of about fifty houses or magazines, where much trade is carried on in across galleys, and treasured. It occupies the site of the ancient Tilmessos, renowned in antiquity for the art of divination. The principal remains are a large theatre, of extremely plain archaic masonry, in tolerable preservation, a number of caves partly built, and partly cut in the rock, extending along the coast, and an interesting series of tombs of several kinds and dates. The harbour is excellent, and the navigation of the gulf safe, with a sufficient depth of water.

MAKTAN a small Is. Indian Archipelago one of the Philippines, and lying to the E. of the island and S.E. of the town of Zebu from which it is separated by a channel about 3 m wide. The channel affords good anchorage and shelter but requires to be very carefully navigated. The celebrated navigator, Magellan, was killed here in 1521.

MALA a decayed vil. Peru dep. and 48 m S E Lima about 4 m. from the Pacific, in a valley of same name. Here Pizarro met Almagro to settle their differences. Pop. 800. — The valley produces a great quantity of grain and fruits extensively employed in the fattening of pigs, which form the staple of its trade. Pop. abt 1 000 000.

MALABAR, maritime dist. British India, presid. Madras, on the W coast, between lat. 10° 20' and 12° N., having N. Cochin, E. Mysore Coorg, and Combaratore, S. Cochin and W. the Indian Ocean. It is about 140 m long N to S and about 80 m in breadth from the Western Ghats to the coast. Area 6060 sq m. A great portion of the district is comparatively low but it is intersected by narrow ravines covered with forests and jungle and watered by innumerable streams but all of them having necessarily very short courses. It consists of small low hills, with steep sides formed into terraces for cultivation. The interjacent valleys are extremely fertile and support a numerous population. In some places a sandy plain 8 m wide runs along where rising into downs covered with coral soil, the cultivation of which is carefully pursued and yields good returns. The coast is indented with numerous inlets. Cold as found in some of the mountain streams but in comparatively small quantities. The climate is on the whole healthy. The hot season is from February to May the wet from May to October and the cool during the remaining months. The principal vegetable products are black and white pepper, coconuts, coconuts oil, cow rope, betel-nuts, tank wood and dal wood, cardamoms, ginger, turmeric, pepper, wood, arrow root, yams, lamp, and copperas. The chief exports consist of the produce of the coconut tree to the value of £20 500, pepper from 5,000 000 to 7 500 000 lbs., betel nuts to the value of £25,000, cloth the produce of the E. district is exported annually to the value of from £170 000 to £220 000. The total exports by sea amount to about £200 000 and the imports to £120 000. Coarse cloths are manufactured at a few places in the interior from the cotton the produce of Malabar coconuts, coconuts and oil and arrow, from 8 to coconuts, turmeric, ginger and coconuts, brown sugar.

Neither the soil nor the climate of Malabar are suited to the cultivation of cotton. What is grown is small in quantity and inferior in quality. The principal towns are Cannanore, Tellicherry, Malé, Ponnany, Calicut, and Palghat. Pop. (1845), estimated at 1 200 000. In 1802 it was only 450 000. — The former provinces of Malabar extended from Cape Comorin to the river Chandery, lat. 12° 30' N. but the name is often erroneously applied to the whole extent of coast country as far as Bombay.

MALACCA AND **MAJINGA**, a British colony, W coast Malay Peninsula, in the Strait of Malacca, intersected by the parallel of lat. 2° 30' N. It extends about 40 m. along the shore of the strait, and about 55 m. inland, including Nanning bounded, N by Selangor, S by Johore, at the river Moors E. the Nanyang country and W the sea, area, about 1000 sq m. The sea-coast is rocky, and the interior in some parts

mountainous, with picturesque valleys intervening. The principal rivers are the Lingga, the Malacca, the Cassing, the Mungie Baru and the Dayong, having their sources in the interior and falling into the Strait of Malacca. Their mouths are more or less obstructed by bars and sandbanks, and their margins generally low in many places swampy and covered with forest. The Lingga is navigable for small vessels 10 or 12 m from the mouth. The climate is said to be one of the best in India, the thermometer ranging from 72 to 85° throughout the year, seldom exceeding the latter, or falling much below the former. The soil is remarkably fertile, and, in several places, capable of producing excellent nutmegs and cloves. Rice is grown in abundance. Agriculture is on the increase and the forests are being rapidly cleared away. Vegetation is remarkably luxuriant and nutmeg, sugar-cane, cotton, indigo, chocolate pepper and spices, have all been tried and found to thrive well. The spontaneous productions of the soil consist of a great variety of the fruits including the mangoes which is said to attain a higher perfection here than probably anywhere else. There is no lack in the district, but abundance of fine durable lumber well adapted for ship and house building. It contains rich deposits of gold and tin, the latter chiefly in Nanning. This settlement is included in the presidency of Bengal and is governed by a resident, with an assistant resident at Malacca. Pop. estimated at 55 000 of whom about 3000 are Europeans.

MALACCA, a tn. Malay Peninsula, cap. of above dist. at the head of a small bay, on both sides, but mostly on the right of the Malacca river, near its mouth, lat. 2° 10' 30" N. lon. 102° 14' 10" E. (a.) The town which has a pretty appearance from the sea, is built in the old-fashioned Dutch style, each house, with its out offices, forming a square, with a yard in the centre. Many of the houses are of stone, and well built and several of the streets are spacious and hand some. But the place, according to Mr Davidson, is rapidly going to decay—poverty-stricken and with little or no trade being no longer the seat of the slightest importance either as a military port or a trading mart. The European population is composed almost entirely of the civil servants of the Government, and the military men who reside principally in the vicinity. The principal edifices are the town house, jail, court-house, barracks and civil and military hos-

THE TOWN HOUSE, MALACCA.—From Vallart's 'Voyageur et Monde'.

itals. The literary institutions are an Anglo-Chinese college founded, in 1818, by Dr Morrison chiefly for the purpose of promoting the cultivation of Chinese literature by Europeans, and of European literature by the Chinese. Malay and surrounding nations several Chinese, Hindoo and Malay schools, the latter established by the Malays themselves, for their own instruction in English. Malacca has still some export trade in gold dust, tin, iron implements, fire-arms, opium, ebony, ivory, nutmeg, lac, aloes wood, lutes, hops, fowls, jaguery, pepper &c. Principal imports—carthenware, rice, sugar, opium, British and Indian manufactured goods, woollens, paper provisions, and liquors, for the European and Chinese inhabitants salt, sugar, tea, tobacco &c. Malacca is convenient for ships requiring water and refreshments and fish, yams, sugar, and a variety of excellent fruits, may be procured at moderate prices. Buffaloes, a few hogs, and some poultry

may also be obtained and grain imported from Java, Borneo, or Bengal. Diameter of caulkings in an article of trade here, and soon spurs for mats brought over from the Siam river on the opposite coast of Sumatra. Malacca is said to have been founded, in 1257, by a chief from Singapore. It subsequently fell into the possession of the Portuguese and Dutch alternately but was finally exchanged with us by the latter in 1826, for some settlements on the coast of Sumatra. The inhabitants are composed of Malays, Hindus, descendants of Dutch and Portuguese and Chinese. Almost all the artefacts being of the last-named nation. Pop. 12,180.—(Hartnburg *Scott's Oriental Interpreter*, Davidson & Far East).

MALACCA (Strait 09) the channel between the Malay peninsula and the Isl. of Sumatra, extending from lat. 1 to about 6° N. Length, about 500 m. breadth varying from 25 m. to 200 m. the former at its S.E. extremity the latter at its N.W. The navigation of the strait appears intricate and dangerous but with ordinary prudence, is not so in reality the channels being mostly spacious, and the anchorage good. The current, where it leads, not prevail sets often to the N.

MALACOU I. of MALACOU, a m. W. Africa, between 60 and 70 m. E. N. E. of Sierra Leone, on the route from Kambia to Faleba. lat. 8 12 N. lon. 12 45 W. L. bank Malagosa and strongly fortified.

MALACZKA or MALATYA a market in Hungary, circled by the Danube, and 41 m. N. by W. Pressburg on the Malna, with few churches, a castle and palace with numerous gardens, tile works, and several flour and saw mills. Pop. 2253.

MALAGA a maritime prov. Spain, Andalusia, bounded N. by Cordova, E. Granada, S. the Mediterranean and W. Cadiz and Seville. Area 4°02 sq. m. It is very rugged and mountainous being traversed in all directions, by objects of the MONTA Nevada mostly of limestone formation, and containing numerous remarkable caverns. Lead, iron, graphite and copper are found to a greater or less extent and beautiful marble, Jasper and quartz, abundant. The mountain sides are, for the most part, clothed with forests of pine, oak, holly, poplar, cork, and various other trees. Vineyards and olive plantations are numerous. The valleys, which, in general are carefully cultivated and well irrigated, yield abundantly cereals, fruits sugar-cane, and vegetables. The luxuriant vegetation of the valleys and plains of Malaga is due, in a great measure, to the numerous streams that water the province the chief of these are the Guadalquivir, Genil, Guadale, Verde, and Icky, most of them in the dry season unrecognizable, but during the rains succeeded by torrents frequently destructive to the crops on their banks. Lumber, woad, silk, and various fabrics, silk, ropes, hats, paper, soap, Malaga, earthenware, hardware, cigars, brandy wine, and oil, are manufactured and a considerable export trade, chiefly in wine, brandy, raisins, figs, melons, lemons, and other fruits, anshovers, sardines and other fish, iron lead &c. is carried on. Education is still much neglected here, though great improvement has been made of late years. The stain of morals is very loose, smuggling, vagrancy and theft, prevail to a lamentable extent, and the cowardly use of the cuchillo is even yet not infrequent. Pop. 488,000.—(Madox, *Dict. de España*).

MALAGA (anc. Malaca) a seaport in Spain, Andalusia, cap. above prov. advantageously situated on the N. shore of the Mediterranean, near the centre of a semicircular bay 96 m. S.E. Seville lat. (mole light) 36 43 30° N., lon. 4 26° W. Its actual site is somewhat low but the ground rises finely behind, and on both sides of it, while the distance is terminated by lofty mountains. It is built chiefly along the shore, and is nearly of an oval form. In early times when occupying much less space than at present, it was surrounded by fortifications. Most of them have disappeared as the town extended, but considerable portions still remain, and though useless for defence, add greatly to the imposing appearance which the town presents when viewed from the sea. Taken as a whole, it is by no means well built. The streets are generally long narrow and winding and the houses, though usually of two, three, and even four stories, have an uninteresting and often even a disagreeable appearance. An exception, however, must be made of a number of modern houses, and also of those facing the public walks many

of which are truly magnificent. The only squares at all deserving of notice are the Plaza Mayor or De la Constitucion, which is situated near the centre of the town, consists of a large quadrangle, lined by buildings of imposing magnitude, and, owing to its position forms the chief mart for business the Plaza de Riego, a fountain in its centre and the Plaza de la Merced del Mar situated in a narrow place close to the sea and not more than two centuries ago actually covered by it. The public edifices are within numerous not splendid and usually suffer in appearance from the proximity of inferior buildings which have been allowed to crowd upon them. Among the most important are the cathedral a large structure, originally of great architectural merit but much dilapidated

THE CATHEDRAL AND PORT OF MALAGA.
From Deane's Tourist in Spain

by incongruous modern alterations, with a principal front adorned by a fine marble colonnade, and flanked by two round towers and an interior composed of three large naves, and decorated with numerous sculptures and paintings. Its parish churches, remarkable chiefly for the richness of their interior decorations the episcopal palace a well-proportioned building overladen with marble sculptures, the municipal buildings and court houses, presenting a magnificent front along one side of the Plaza Mayor the new custom house, built in the Italian style of the last century, and so massive as to have the appearance of a prison or castle, the *Consulado* or *Monte Pio* a large pile with a handsome colonnade of black marble the old Moorish castle of Alcazaba, the castle of Gibralfaro and the Alcazarras both also Moorish the latter surmounted by numerous towers the diocesan seminary, college of San Telmo and normal school, the theatre, and building the forwarding, civil and military hospitals, and various charitable institutions. The manufactures consist chiefly of iron, the ore of which is obtained from rich mines in the vicinity, soap, and leather. The trade is of much more importance, and derives great facilities from the harbour, which is large, commodious, well sheltered easy of access, and has from 20 to 24 feet of water. The principal exports are wine fruit, particularly muscat, oranges and figs, oil, silk, and leather. The principal imports are slaves, rice, woollens, ironmongery, deals, copper sheet-iron, colonial produce, hides, and coal. The fisheries are productive and employ a great number of the inhabitants. Malaga is the see of a bishop, the residence of a civil and military governor and the seat of several important courts and public offices. Its foundation is attributed to the Carthaginians. From them it passed to the Romans, under whom it became a great and flourishing city. It afterwards fell into the hands of the Moors who possessed it so long, and built so much of it, that few cities in Spain pre-

sent, in their general form and structure, an appearance so decidedly Moorish as that of Malaga. Pop. 8,577.

MALAGON, a co. Spain, New Castle, prov. and 16 m. N N W Ciudad-Real, on the Cambrés. It consists chiefly of archen houses; has a parish church, townhouse, with prison, ancient castle two girls schools, and several oil and flour mills. Pop. 3710.

MALAHIDE, a sea-bathing vii and par. Ireland, co. and 8½ m. N. E. Dublin. The village, on the Broadmeadow Water estuary, is well built, and contains the parish church, a R. Catholic chapel, and a small silk factory; the castle of Malahide is about 1½ m. distant. Area of par. 1,128 ac. P. 1841.

MALAMOCDO [ana *Malamoc*], a town Italy Venetia gov. and 4 m. S Venice, on an isle of same name, with a church. It forms part of the military gordon in the lagoons. Pop. 1800.

MALANG a town Java, prov. Passaroesan, 48 m. S. by W Boenbaya, cap. dist. in the vale of Malang, a rich upland territory, about 1000 ft. to 1400 ft. above sea-level, surrounded by a noble amphitheatre of mountains, among which are Kawi, Tengger and the volcano of Semoro the last the loftiest mountain in Java 19,549 ft. high. The town is a considerable place, the residence of a deputy governor, near its centre is a spacious square surrounded by handsome houses with pleasure-grounds about them, and many of the inhabitants are Chinese. Coffee is cultivated in the vicinity.

MALANG, a town and par. Switzerland, can. Grisons 5 m. S. E. Murghell, on the Landquart. Pop. 1050.

MALAPAR, a lake, Sweden, forming the boundary between the M. Wadern, and of Upsala on the N. and Nyköping on the S., and extending considerably E. into the M. of Stockholm intersected by lat 59° 30' N. and lon 17° E. It is very irregular in shape, and throws out arms which penetrate into the land in all directions, and gives its contour a very ragged appearance. Another remarkable feature is the vast number of islands which, in a manner, crowd its surface. About 1800 have been counted. Its greatest length, F. to W. is 75 m., and its breadth, which varies exceedingly may average about 12 m., area estimated at 854 sq. m. or 95,000 sq. m. of which are occupied by islands. The direct distance between the opposite extremities of the lake gives no idea of the space which must be passed over in making an excursion in the steamers which now regularly ply upon it. Owing to the number of islands, the direct course is continually changing, and looks as if it were carried not across a lake, but along the windings of a beautiful river now narrowing so as to be almost enclosed by rocky precipices, now widening out and pursuing a majestic course between distant but fertile and richly-wooded slopes. The lake, also, is of great commercial importance, giving to the populous towns which line its banks not only a free communication with the capital and each other, but also with the Baltic, more especially by the canal which has its mouth in the Bay of Rödervalle.

MALASPINA one of the Columbreas Iles. (which see)

MALATYEH, or **MALATIA** a town Asiatic Turkey path and 105 m. N. E. Marash, near the bank of the Euphrates, on a plain.

It is a small and desolate-looking place, streets overgrown with grass, massive walls in ruins, and in many places fallen down houses of a noble appearance, and the shops in the bazaars near and stable. There are, however, two well built mosques and two caravanserais, all in the Persian style of architecture. One of the gates also is a very handsome structure. Malatya is very unhealthy in autumn. It occupies the site of the ancient Melitene, once the capital of Armenia Minor but now in ruins.

MALACENE, a co. France, dep. Vendue, 28 m. N. E. Arignon. It has old ruins, ramparts, a handsome church, an ancient chapel, considerable manufactures of woollens, silks, linen, cordage cutlery and various kinds of iron and copper ware, numerous paper mills, woaded and silk mills, oil-mills, dye-works, brick and tile works, potteries, and plaster-kilns and a trade in corn and wine wool, silk, and madder. Pop. 2214.

MALAY ARCHIPELAGO See **INDIAN ARCHIPELAGO**.

MALAY PENINSULA, in its most extended sense, the vast peninsula which separates the Gulf of Siam and the China Sea, on the E. from the Bay of Bengal and the Strait of Malacca, on the W and S. W., and forming the most

S. portion of continental Asia. It extends from lat. 1° 20' to about 15° N., lon. 90° to 104° E. The N. portion of this peninsula, as far S. as lat. 7° N., belongs chiefly to Siam, but has part of the British Tenasserim provinces on its N. W. shore. From lat. 7° N. to the Strait of Singapore, is Malacca proper, or the Malay Peninsula in the more restricted sense. It contains various native states more or less dependent on Siam, the chief of which are Kedah or Quedah, Perak, Selangor, Calantan, Brumbo, Tringganu, Pahang, Johore, and also the British settlements of Province Wellesley and Malacca. Area, about 50,000 sq. m. A range of mountains traverses it N. W. to S. E., rising gradually towards the former to the height of about 6000 ft. It is well watered, numerous rivers descending from either side of the central range of mountains, and flowing towards the E. and W. coasts, they are necessarily small, their courses being but short. Amongst the most considerable are the Muda, Carian, Perak, Birna, Seppan, Moro, Seole and Johore, on the W and S coasts, and the Calantan, Tringganu and numerous smaller streams on the E. In some parts it is highly mountainous, its top being especially rugged for ascension. A large portion of this region is still occupied by primeval forests. The principal vegetable productions are gambour, rice, sugar, coconuts, and an abundance of valuable gums, drugs, with nutmegs, cloves, cinnamon, tobacco coffee sugar cotton, and indigo. Rice and other grains are also raised, but not in sufficient quantities for the home demand, the difference being imported from Bengal and Sumatra. Among the wild animals are the elephant, rhinoceros, a variety of tigers, leopards, bears, monkeys, alligators, gauras and sometimes the banyan, there are one or two species of deer which are exceedingly small in size, and of delicate proportions. Of birds there are a vast variety including the argus pheasant, horn-bill, peacock large vulture-bat, hummingbird and snake. Snakes abound, many of which are venomous. The domestic animals are the same as those of India, with exception of sheep and horses, which are not natural to the country. The neighbouring seas afford a great variety of shells and corals. The inhabitants of the peninsula consist of two classes—the original natives and the Malays. The former are of the class usually denominated Oriental negroes, and inhabit the mountainous interior. They are of a diminutive stature, but in other respects resemble the negroes of Africa. They are in a perfectly savage state. By the Malays they are called *Bayan*. As a people, the Malays are noted for their ferocity, cunning, and treachery, never forgiving an affront, but always taking a cruel revenge. They are addicted to gambling of all kinds and to the use of opium and are notorious thieves. Their religion is Mahometanism of the Soomra sect. Their language, which is termed the Malay is a compound of various others including Sumatri and Arabic, and is considered very soft and simple. It is written from right to left in the Arabic character, with a few slight alterations, and is general to all the adjacent islands. Pop. estimated at 875,000.—(*Oriental Interpreter Journal of the Indian Archipelago* Wilkes U. States Exploring Expedition).

MALAYIA, an Isl. S. Pacific Ocean, lat. (S point) 9° 45' S. lon. 151° 52' E. Inundated with high mangroves, clothed with wood, shores low and covered with mangroves, coasts seem to be nearly uninhabited.

MALBERG or **MALINBERG** a market town Lower Austria, about 12 m. from Tezelsdorf with a church a castle with gardens, and a trade in wine. Pop. 1101.

MALBOROUGH, par. Eng. Devon; 5310 ac. P. 2854.

MALBURGETH or **MALBORGETH** a town Austria, Illyria, circle and 21 m. S. W. Villach, in a narrow pass, on the Fella. It was defended by a strong fort called Thalerwall, which after a valiant defence, was captured and razed by the French in 1809. It has a church, and steel and iron works.

MALCHIN a town Germany Mecklenburg-Schwerin, 33 m. S. E. Rostock. It is walled has a Gothic church, manufactures of linen, copper-ware, and soap, several distilleries and some general trade. Pop. 8802.

MALCHOW, a town Germany Mecklenburg-Schwerin, circle and 40 m. S. E. Mecklenburg-Schwerin, on an island close to the W. shore of Lake Malchow. It is a place of considerable antiquity was once the residence of the prince, and has an old monastery some linen manufactures, a considerable trade, and an active fishery in the lake. Pop. 2837.

MALDA or **MALDIBA** a tn Hindoostan, presid. and prov Bengal, 1 bnak Mahabada, 60 m. N. N. Mooredahad, lat. 26° N lon 88° 10' E. It is a miserable place, and, during the rainy season, is nearly insulated. In the earlier part of the present century it consisted of 8000 houses, nearly all of which were built with stone and brick from the ruins of Gaur. There were here formerly extensive factories belonging to the Dutch and French established for the purchase of silk and cotton goods, for which the place was celebrated, but the improvements made in European manufactures of this kind, and in the art of dyeing, entirely ruined its trade. The only reputation now left it rests on its mangos, which grow on the opposite banks of the Mahabada.

MALDEREM a vil and com. Belgium, prov E. Flanders, 17 m. N. W. Ghent. Beer, dyeing, calico-printing and tanning are carried on. There are also cigar-works, flour and oil mills, and a considerable trade in agricultural produce and timber. Pop. 6009.

MALDEN, a par. Tas. Bay 1272 or Pop. 268. **MALDEN** a vil Holland, prov Gelderland 4 m. S. Nijmegen with a R. Catholic church and a brewery. Pop. (agricultural) 680.

MALDEN ISLAND an isl. Pacific Ocean, lat. (S. point) 8 56' 20" S lon. 165° W of local coral formation about 12 or 14 m. in extent discovered by Captain Lord George Byron of H. M. S. *Blossie*, July 30, 1823. It is uninhabited, being entirely desolate, apparently of means of subsistence for human beings. It is also without fresh water excepting what rain has deposited in the hollows and crevices of the rocks. Sea-fowl are numerous. Rats are the only land animals which have been met on the island. In the centre is a large lagoon, communicating with the sea on the N. side. On this side also occurs a very singular and interesting series of buildings, supported by blocks of wrought coral, and having the whole length of the island, about 8 or 10 m. When or by whom these structures were erected can scarcely be given conjecture.

MALDERH a vil and com. Belgium, prov Brabant, on the Steenheffels-Beek, 16 m. N. N. W. Brussels. It has a brewery, distillery, several mills, and a trade in agricultural produce. Pop. 1,650.

MALDIVA or **MALINVA** (Thomson Isles) a remarkable chain of isls. Indian Ocean, at the entrance to the Arabian Sea, extending from lat. 0° 40' S. to 7° 5' N. nearly on the meridian of 73° 40' E. with a breadth of about 50 m. The chain is composed of 15 atolls, that is, circular or oval groups of islets, all formed of coral, and fringed with reefs sometimes extending to the distance of 2 or 3 m. beyond which there are no soundings at enormous depths but in the centre of each atoll there is a lagoon from 15 to 40 fathoms deep. All the Maldiva islands of any extent are richly clothed with wood chiefly palm and are fertile in fruit, and in various kinds of edible roots they also produce millet, and abound in coconuts, figs and all descriptions of fish. The inhabitants are a civilized race of people, and carry on a considerable trade with the British possessions in India; more particularly, Bengal, Ceylon, and the Malabar coast, as also to the Red Sea and to Sumatra exchanging coir, which are plentiful in the Maldiva coir mats, oil, fish tortoise-shell &c. for rice, sugar, tobacco, and manufactured goods. They are expert navigators and sailors, and have schools for teaching navigation on some of the islands and they make and repair nautical instruments. They are a kind, unoffensive people, of a dark copper colour, neither short in person. Neither murder nor theft is known among them, nor, being strict Mahomedans, are drunkenness. They are remarkable for their hospitality and kindness to shipwrecked mariners, for which they refuse all pecuniary compensation. They are governed by a sultan, whose title and rank are hereditary. He resides in the island of Male or Meib, and pays annual tribute to the British government in Ceylon. Under the sultan are five vassals or ministers of state. Pop. 150,000 to 200,000.

MALDON, a par. and port, and market in England, co. Essex, 30 m. N. E. London, on a branch of the Eastern Counties Railway and on the ridge of a hill, r. bank Black wall, near the confluence of the Chelmer. It consists chiefly of one spacious street upwards of 1 m. in length E. to W., with many houses of an antiquated appearance, but also several

of ranges of handsome modern buildings, is lighted with gas, partially paved, and amply supplied with water. It has a large old town-hall of the date of Henry VI., a spacious church, in the early Norman and early English style, with a curious triangular tower of Norman architecture, surrounded by a hexagonal square place of worship for Independents, and Wesleyans. A Society of Friends meeting-house, a free grammar-school with a library attached, and several minor charities. The harbor, formed by the bay of the Blackwater river affords safe anchorage to vessels not drawing more than 8 ft. water, and of heavier burden anchor in the offing, and discharge their cargoes by means of lighters. The import trade consists of coal, iron, corn, &c. There is also a productive fishery, and oysters of superior quality are taken in abundance. The port is of considerable consequence to the Essex coast, and much of the adjoining country is supplied through it. The borough sends two members to Parliament. Registered electors (1851) 845. Pop. (1851) 6883.

MALDONADO a ls. and harbour Uruguay N. E. coast of the estuary of the Rio de la Plata, 2 m. E. Monte Video; lat. 34° 58' 30" S lon. 54° 55' 45" W (a). The town, about 2 m. from the shore, is built on the brow of a hill gently descending 250 ft. above sea-level. The principal buildings form a quadrangle, including the new church. The common habitations are of brick, and covered with straw but the houses, in the streets issuing from the square, are low, and constructed of earth. Pop. about 1000.

MALE, Meib, or King's Island, one of the Maldiva group, lat. 4° 10' N lon. 73° 24' E. It is the residence of the sultan, and the seat of his government, and was once completely fortified by a wall and bastions only the N. and W. sides of which are now in a state of repair. It exports coconuts, tortoise-shell, dried fish, coir, coir, coir, and mats. The native vessels are from 100 to 200 tons burthen. The climate is very unhealthy. Pop. 1600 to 2000.

MALE, a market in Austria, Tyrol, circle and 50 m. from Trent, on the Roon. It has a church, a Capuchin monastery, and large cattle fairs. Pop. 1161.

MALE-MYR a tn. Bernese, r. bank Ironwall 76 m. N. Ayr. It has many handsome gabled tenements, and contains about 800 houses. (How and Soc Bengal April 1837.) **MAIMORI**, a vil France, dep. Bouches-de-Rhone, on a rock, near r. bank Duranoe, about 25 m. E. N. E. Arles. An old castle overlooking the town and surrounded with strong ramparts, is partly used as a prison. Pop. 1200.

MALEO a market in and com. Italy Lombardy, gov. Milan prov. and 17 m. S. E. Lodi 1 m. from the Adia with a church and chapel a flour and three oil mills. Pop. 4042.

MALEW par. Isl. of Man. Pop. 5568.

MALEFI, a vil Austria, Dalmatia, circle and 7 m. N. Ragusa, on a bay of the Adriatic with a church, and local court. It has long been famous for its olive-oil. Pop. 2284.

MALGARAIL, or **MIGALARA**, a tn European Turkey, prov. Boeotia, near Galipoli 65 m. E. Adrianople, with about 600 houses.

MALGHAT a tn. Spain, Catalonia, prov. and 55 m. N. E. Barcelona, in an extensive plain near the Mediterranean with a church, an ancient tower, and manufactures of flannel and blond lace. Pop. 2336.

MALIN a vil Ireland, co. Donegal 10 m. N. by E. Londonderry with a neat church. Pop. 244.—**MALIN ISLAND** has 4 m. N. by W. and near 270 ft. above the sea.

MALINES, a tn. Belgium. See MECHELEN.

MALINKA, a river, which rises in the N. slope of the Caucasus, flows N. separating Circassia from Russia, then E., and joins the Terek, 16 m. W. S. W. Mozdok, after a course of about 110 m. Its chief affluent is the Beslan.

MALLARDSTOWN, par. Irel. Kilkenny, 2526 aa. Pop. 433.

MALLARE or **MALLARA**, a vil and com. Italy Piedmont, div. Ivrea, prov. Savona, 7 m. from Cavour with two parish churches, a public school, a charitable endowment, lunatic, and a trade in shawmats. Pop. 1597.

MALLEN (anc. *Mallor*) a tn. Spain, Aragon, prov. and 89 m. N. W. Saragossa, r. bank Ebro, near its confluence with the Ebro. The streets are irregular but the houses well built. It has a church, modern courthouses, good prisons, two primary schools, a flour, and several oil mills, and a trade in corn, oil, and wine. Pop. 1853.

MALLENOWITZ, a market to Austria, Moravia, circle and 13 m. N. N. E. Hradisch, on the Drauzna, with a church, a castle, a chapel, and two annual fairs. Pop. 1387

MALLERZA, a vil. and par. Spain Asturias, prov and about 25 m. from Oviedo, with a parish church, a primary school, manufacture of linen, and numerous mills. P. 1876

MALLICOLLO, one of the New Hebrides Is., S. Pacific Ocean, lat. (S. 9°) 26° S. E. 107° 32' E. about 55 m. long, and 15 to 17 m. broad discovered by Quince in 1606, and visited by Cook in 1774. It is moderately elevated, and contains some forests with large trees; and was supposed by Cook to be fertile, but the fruits inferior to those of the Society or Friendly Islands.

MALLING two par. Eng.—(East) Kent 2765 ac. Pop. 1741 —(South) Sussex, 2380 ac. Pop. 780

POP. MAILING (Went), a m. and par. England co. Kent 8 m. S. by W. Rochester. The town, on a small rivulet that falls into the Medway, contains an ancient church with a fine Norman tower, and a Baptist chapel. Area of par. 1866 ac. Pop. 2021

MALLORCA, Isl. Mediterranean. See MAJORCA.

MALLOW, a par. par. market to, and par. Ireland co. Cork. The town, 18 m. S. by W. Cork, 1 mile Blackwater, connected with the estuary of Mallickashan, on the S. bank, by a bridge of 16 arches, is noted for its mineral waters and the scenery of its environs. It is lighted with gas, has a county infirmary, courthouse, bridewell, union workhouse, spa, and club-house, and barracks, all commodious, and some of them neat buildings, a handsome parish church, in the later English style, a commodious R. Catholic chapel, and places of worship for Independents and Wesleyans. Four public schools, a loan fund, and a dispensary. Races take place annually in September on a course about 3 m. E. from the town. There are several soap and candle manufactories, linen and silk works, tanneries, a brewery, and malting establishment. A considerable trade is carried on with the surrounding districts. The borough sends a member to Parliament. Registered electors (1851) 143. Pop. 6561. Area of par. 3830 ac. Pop. 9278

MALI WYD par. Wales, Merioneth, 16,450 ac. P. 1201

MALMEBY a m. Prussia, gov. and 21 m. S. S. W. Aix-la-Chapelle, on the left of the hollow of a well known district, on the Weser. It has three churches, one of them a handsome edifice, formerly attached to a well-endowed abbey and a superior burgher school, a justice-of-peace court, important manufactures of sole leather, of which above 6000 pieces are annually prepared, woollen cloth, paper, greasing cards, &c. glue, and dye-works, an excellent cotton factory; and mineral springs, which, in their properties are not inferior to those of Spa, but not much frequented. Pop. 4159 —The church is too high to be well adapted for agriculture but causes great numbers of cattle. Area, 297 geo. sq. m. Pop. 29,567

MALMESBURY a par. par. and market to, England, co. Wilt, 23 m. N. E. Bristol on the side of a hill, and nearly surrounded by the two branches of the Lower Avon, over which there is a bridge of six arches. It consists of four principal par. paved, and lighted streets. Houses mostly of stone, and has near its centre an ancient octagonal market-cross. It likewise possesses a new townhall and market-houses, with two parish churches, one of them a magnificent Norman structure, which originally formed the nave of the church belonging to an ancient monastery; four Dissenting chapels, two public and several private schools, and societies for the relief of the poor. The manufacture of woollen cloth, formerly the chief branch, has given way to wool-stapling. Large quantities of malt are made here, and a great deal of butcher-meat is sent to London. The borough sends a member to Parliament. Registered electors (1851) 809. William of Malmesbury the historian, and Thomas Hobbes, the philosopher, were born here. Pop. par. bor., 6996. —(Local Correspondent.)

MALMESBURY (St. Paul) par. Eng. Wilt. 5332 ac. Pop. 2443

MALMÖ, a seaport to Sweden, cap. lln, on the Sound, and in one of the most fertile districts of Sweden, 16 m. S. E. Copenhagen, lat. 56° 38' 0" N. lon. 18° 2' E. (N.) It was formerly a place of strength, being enclosed by ditches, and walls flanked with bastions, and otherwise fortified. All the fortifications have disappeared, to the great improvement of the appearance

of the town, which consists of houses that, though often old, are generally well built, of a large and regular square, surrounded by an avenue of lime, alder and chestnut trees, and a number of spacious streets. The principal buildings are two churches, one of them of ungaily exterior, but handsome within, and possessed of an uncommonly large organ, an elegant library, fine altar decorations, and costly ornaments; the old castle still surrounded by walls and ditches, and occupied partly as barracks, partly as a prison and house of correction; the governor's house, townhouse, hospital, and theatre. The manufactures consist of woollen and linen cloth, soap, vinegar, tobacco, oil, and particularly gloves, which may be considered as the staple trade, much cramped by the want of a good harbour is chiefly in grain and brandy. A steamer plies regularly between Malmö, Copenhagen and Lübeck. Pop. 10,803. —The Lix, bounded N. and W. by Christiansburg, S. by the Baltic, W. by the Sound, and N. W. by the Öttinga, greatest length, S. E. to N. W. 80 m., breadth varying from 10 m. to 40 m. consists generally of an extensive plain, occasionally broken by hills, and forming one of the most fertile tracts in the kingdom. It has a moist and heavy, but not unhealthy climate contains several lakes, of which that of Hingepön is the largest, produces corn in such abundance as to leave a considerable surplus for export, makes excellent cheese, and rears the finest horses and cattle in Sweden. For administrative purposes, it is divided into 15 districts, of which Malmö is the capital. Pop. 194,190

MALMYCH, or MALMIST, a m. Russia, gov. Viatka, on the Sohoema, near its confluence with the Viatka, 77 m. N. E. Kazan. It consists of about 600 houses, of wood and the inhabitants are chiefly employed in agriculture, but have some manufactures and general trade. Near it are some gold-washings.

MALNABE a vil. and com. Italy Lombardy gov. Milan prov. and 13 m. E. N. E. Como, on a gentle hill near the confluence of the Arza with the Ticino. It has a handsome church with three naves, supposed to have been built in the thirteenth century, some manufactures of linen and cotton, a bell foundry and three cotton mills. Pop. 2062

MALO, a m. Italy gov. Venetia prov. and 11 m. N. W. Vicenza near the Buechione with two churches and a salt-petre factory. Pop. dist. 10,900

MALO (St.) [Latin Malodorus] a m. and seaport France, dep. Ille-et-Vilaine, on the rocky coast of Anjou, situated with the mainland by a long causeway called Le Sillon, 40 m. N. N. W. Rennes, lat. 48° 39' N. lon. 2° 18' W. (N.) It is strong by natural position, and well fortified. The whole area of the island is occupied by the houses, and the walls flanked with towers, rising up directly from the water's edge, are washed by the sea. The ramparts furnish a fine walk, which makes the whole circuit of the town but owing to defect of space, many of the streets are very narrow, and the houses closely crowded together are so high as to exclude a free circulation of air. Among the public buildings may be mentioned the cathedral, a Gothic structure very capacious, and much modernized with some good marble statue, and the ancient castle, in the form of a square with a large tower at each angle. The harbour is formed by the mouth of the Rance, the island, and causeway. It is dry at low but the flood-tide rushes in with great impetuosity and runs to the extraordinary height of 45 ft. It is difficult of access, being encumbered at its entrance by shoals, but within a mile, large, and very commodious, with a broad quay, running close beside the walls. It has excellent building docks, in which a considerable number of vessels are constructed. The roads are to the S. W. and are almost enclosed by a little archipelago of bare, angular, white rocks. On several of these, strong forts are erected, and on one of them is the tomb in which Othello's island, a native of the town, has buried by his own desire. It has manufactures of hosiery, silken-ware, silk-cloth, cordage, soap, and fishing-boats, it trades in corn, fruit, wine, brandy, salt provisions, tobacco, silver, honey, wax, and agricultural produce. St. Malo ranks as a fortress of the third class, and possesses courts of first resort and commerce, a custom-house, a consulting chamber of manufacturers and trade, a first-class school of hydrography and an agricultural society. The town of St. Servan is separated from St. Malo by a creek, across which a solid work of granite has been thrown, with flood-gates wide enough to admit steamers and frigates; thus forming a valuable floating-dock. Pop. 3448

MALOI, two places, Russia.—1 (*Ardogriels*), A tn, gov and 43 m. S.E. Orel, on the Kollinskawa; with a church and some general trade. P (agricultural) 3703.—2, (*Jaroslavskij*) A tn gov and 40 m. N Kaluga, r bank Louga, with six churches, and some trade in milk and honey. Kutsow defeated the French here in 1812, when the town was partly burned down. Pop. 1860 3750.

MALONNE, a tn. and com. Belgium, prov and 8 m. N.W. Namur, on the Sambre with a church, three chapels, and a communal house and herd by an old abbey founded in 665. Coal is worked in the commune, and there are several mills, two blackfields, and a brewery. Pop. 3183.

MALONNO, a vil and com. Italy Lombardy prov and 42 m. N N.E. Bergamo, 7 bank Olivo with a large and handsome church. Lead and iron are wrought in the neighbourhood, particularly the latter which occupies several smelting furnaces, and employs the greater part of the inhabitants. There are also a saw and a walk mill. Pop. 1980.

MALOUINER, isla. S. Atlantic. See FALKLAND ISLANDS.

MALPARTIDA, several places, Spain, Extremadura. 1, (*de Caocera*), A tn, prov and 6 m. W by E. Caocera, liberally well built. Has a square, wide and paved streets, a church three chapels, a townhouse, prison, two schools, a cemetery, and some trade in grain and cattle. Pop. 3834.—2 (*de Ponceca*) A vil, prov and 51 m. N by E. Caocera, with a spacious square, a church, two chapels townhouse, prison, and two schools. Good wine and oil are expressed here. Pop. 2191.—3 (*de la Serena*), A tn prov and 55 m. E. N.E. Badajoz, 8 m. N Zalamea with wide, well-paved streets, a church townhouse prison school and storehouse. Considerable numbers of pigs are reared here. Pop. 1545.

MALPAS—1 A market town and par. England co and 13 m. S.S.E. Chester. The town consists of four streets diverging at right angles from a common centre and has a church several meeting houses for Dissenters, an endowed grammar school and several charitable institutions. Matthew Henry, the commentator was a native of the parish and Dr Heber

Bishop of Calcutta was a native of the town. Area of par 37 094 ac. Pop. 6710.—2, A par. England Monmouth 968 ac. Pop. 337.

MALPLAQUET a vil. France, dep. Nord, 16 m. N W Avenue. It is remarkable as the scene of a great battle fought in 1709 in which the Allies, under Marlborough and Prince Eugene, defeated the French under Villars.

MALS a market tn. Austria, Tyrol circle Oberlandthal in a mountainous and romantic district, S.E.W. Inns. It was formerly defended by a strong castle; and has a parish church a Benedictine hospital, and an hospital. Pop. 1680.

MALS-ELF a river Norway which rises in lake Alna, in a mountainous district on the N. frontier of Sweden, flows N.W. and falls into the Malmøer Fjord opposite to the island of Qualøen after a course of above 80 m. Its chief affluent is the Berde, which it receives on the left.

MALSCH two places, Baden.—1, A vil circle Middle Rhine, ball Ehlingen 10 m. E N.E. Rastatt. It has a church, a brewery, and a trade in corn and cattle. Pop. 2868.—2 A vil circle Lower Rhine, ball Westloeh, S.E.E. Mannheim with a church Hinkelshaus, and oil-mills. Pop. 1930.

MAJSTROM, or *MAJSTROV* (Danish, *Madagat* a whirlpool) a whirlpool Arctic Ocean, off W coast Norway, immediately S.W. of Moaknessen, the most S. of the Lofoden Isles, lat 67° 48' N., and lon 12° E. It prevents the appearance of a rapid current, which runs alternately 6 hours from N to S and 6 hours from S. to N, producing immense whirls. The depth of the water around supposed at one time to be too great to admit of soundings, has been ascertained not to exceed 30 fathoms with a bottom of rocks and white mud. The whirlpool is greatest at high or low water, and when the wind is N.W., and opposed to the reflux of the waves, it attains its greatest fury and becomes extremely dangerous but in ordinary circumstances, it may be traversed without apprehension.

MALTA [anc. *Melita*, French *Melle*] an isl. Meditor ranean, forming part of the British Empire 62 m S.W.

Sicily and 197 m. N. Africa, lat. (Valletta palace) 35° 53' 45" N., lon. 14° 51' 15" E. (n.) greatest length N.W. to S.E. 17 m. greatest breadth about 9 m., area, 95 sq. m. It is

of an irregular oval shape, deeply indented on all sides, except the S. where the coast forms a continuous and almost unbroken line. The largest bays are those of Marsa and Sol-

rocks on the S W, and Malcha and St. Paul's on the N E, but the most important, in every respect, is the double bay formed by the opposite sides of the remarkable peninsulas on which the capital, Valletta, stands. The S W coast is remarkably bold, and having not a single opening in which a vessel can take refuge, is considered dangerous. The N coast has a more level shore. The surface is very much broken by rocks, which places it in all directions, and are almost destitute of any covering of soil, leaving few intervening spaces which can be brought under regular culture. The elevation, however, is not great. The culminating point, which occurs near the S W coast, does not exceed 1200 ft. and from this point the surface presents the appearance of an inclined plane sloping, with more or less rapidity, towards the N E shore. The rocks are all stratified and arranged in nearly parallel layers, with a very gentle dip generally N E. to S E. They are disposed in 4 distinct groups, descending in the following order:—1. Coral limestones of a compact and almost flinty texture, and a reddish brown or whitish colour. 2. Yellow sandstone and blue clay the former above, in beds of about 20 ft. thick, and abounding in fossils, more especially than the next. 3. The latter from 100 to 120 ft. thick and containing only a few fossils generally enveloped in iron nodules. 4. Sand stone, arranged in five beds, which have a total thickness of about 100 ft. and are very calcareous. 5. A yellowish white semi-crystalline limestone, of great thickness and from its hardness and durability forming an excellent building stone, for which purpose it is extensively quarried. The climate, on the whole is good. The range of temperature seldom exceeds 8° in 24 hours the air is usually dry and clear and strong gales are not frequent, except in spring, when they are much felt, and often accompanied by thunder-storms. The winter climate, from the middle of October till that of January cannot be surpassed, but in summer the heat becomes extreme, and the bright light reflected from the bare white rocks and houses is very annoying and often injures the sight. There are no lakes or proper running streams in the island, but the springs are so numerous and copious, that no deficiency of water is felt. The soil is very thin, and lying on a calcareous rock, which is continually showing itself above the surface, is unfit for general cultivation. The cere raised here does not more than three months supply. The staple product is cotton for which both soil and climate are well adapted. Both the vine and olive are cultivated, but the produce of both is inferior. Frank particularly figs and oranges, is very abundant and of excellent flavour. The manufactures consist chiefly of cotton goods, cabinet-work made for exportation chiefly to Greece and the Ionian islands and jewellery including neck chains and gold filigree-work, for which the Maltese have long been famous. Other minor articles of manufacture are soap, leather, macaroni &c. The central position of Malta in the Mediterranean, makes it particularly in war an important commercial depot, and at all times an invaluable naval station. It has, in consequence, received great attention from the British Government, and been both provided with excellent docks and very strong fortifications. The language commonly spoken is Italian, but the native Maltese have a peculiar dialect, closely resembling the Arabic, though with a considerable mixture of Punic words. Maltese appears very early, and makes a considerable figure in history. According to Homer it was first peopled by the Phoenicians. It passed successively through the hands of the Phoenicians, Greeks, and Carthaginians, and was finally attached to Rome during the second Punic war. After the fall of the Roman empire, it was seized, at different times, by Vandals, Goths, and Saracens. From the last, it passed to Sicily and followed its fortunes till 1522, when Charles V. granted it to the Order of St. John of Jerusalem. In 1798, the Grand Master Hompesch surrendered it, without defence, to Napoleon. It was afterwards blockaded by Nelson, and taken after two years. It is now along with the islands of Comino and Gozo (which are a formally recognized possession of Great Britain. Pop. about 100,000.—(Perr. Papers Martin's *Colony*, Murray's *Handbook for Travellers in the East*.)

MALTBY, two parts Eng.—1 York (W Riding) 4517 ac Pop. 924.—2, (in Merse) Lincoln, 1571 ac Pop. 293.

MALTINGEN a market in Baden circle Upper Rhine, 15 m. N W Freiburg, with a parish church, and two annual fairs Pop. 1406.

MALTERS, a to and par Switzerland, can. and 11 m. W Lucerne, on the Emmenthal. It has an important annual market, chiefly for cattle and young horses. Cattle is very prevalent, and hence the valley sometimes gets the name of Kriethal. Pop. 4455

MALTON or **NEW MALTON** an anc. bur and market in England, co. and 16 m N E York, r bank Derwent, on the York and Scarborough railway. It consists of several streets, diverging from a central area or market-place and is altogether about $\frac{1}{2}$ m. long. The streets are lighted with gas. Houses generally well built, many of them found some. It has a neat town-hall, a mechanics institution and some suits of public rooms, to which a subscription library and news-room are attached two ancient churches one in the Norman and the other in the later English style, also places of worship for Baptists, Independents Primitive Methodists Wesleyans, and Unitarians and several schools. Considerable quantities of agricultural produce are conveyed hence, by the Derwent, to Hull, Leeds, Wakefield, and London. Malton returns two members to parliament Registered electors (1801) 539 Pop. 768

MALTON (Old) par Eng York (N Riding), 8293 ac. Pop. 1665

MALUENDIA, a vil and oom Spain, Aragon, prov and 40 m. S W Saragossa, r bank Jiloca. It has three churches a courthouse, primary school and manufacture of brown paper eye-works, felling, and flour mills. Pop. 1135.

MALVAGLIA, a to. and par Switzerland, can Tessin, 9 m N Bellinzona. The whole neighbourhood is very romantic, and one of the most important cattle-marts of the canton is held here. Pop. 1684

MALVAGNA a vil Spain, prov Catania, finely situated on the side of one of the hills of Mount Etna. Pop. 1000

MALVERN (Great and Little).—1 (Great), A to and par England, co Worcester. The town, one of the most celebrated and fashionable watering places in the kingdom, 8 m. S.S.W Worcester is finely situated on the E side of the Malvern hills. It is irregularly built but is surrounded by beautiful villas and handsome mansions. The hotels, boarding and lodging houses, are all of an excellent description, and the accommodation for bathing and for drinking the waters good. The library is a handsome building, in the Italian style and is well supplied with books and newspapers a part is appropriated to a bazaar and adjoining are baths and billiard-rooms. There are several schools, a district visiting society a dispensary, and a clothing-club. The abbey church, formerly that of the Benedictine priory is a fine specimen of ecclesiastical architecture. It has a fine sublimated tower with windows of richly stained glass. At one time there was a celebrated monastery here, founded in the time of Edward the Confessor. Area of par 5621 ac. Pop. 3311.—2 (Little), A small par and vil 4 m S Great Malvern with an ancient stone church in the Gothic style all nearly in ruins, excepting the chancel and tower, and a R Catholic chapel Area, 948 ac. Pop. 88.

MALVERN HILLS, a range, England, which stretches N to S, between Herefordshire and Worcestershire, for about 10 m. and forms one of the finest boundaries of the vale of the Severn, on the E. Their greatest height does not exceed 1444 ft.

MALWAH [Bharat, a mountainous country? an old Mahomedan prov Hindoostan, present Bengal, mostly between lat. 22° and 25° N and lon. 74° and 79° E. and now included in the states of Bhopal, Nagpur, Gwalior Indore &c. It is rather an elevated region, its centre consisting of a tableland or plateau, in general open, but diversified with cool table-topped hills. Few of its elevations, however exceed 2000 ft. Numerous rivers have their sources in this province, and descend in every direction. The principal of these are the Nerbudda, Chumbul, Soyna, and Cans. The savage tribes called Bhils are numerous in this territory, chiefly occupying the mountains contiguous to the Nerbudda. In appearance, they are a diminutive wretched-looking race, but active, and capable of undergoing great fatigue. Their chiefs exercise absolute power and are implicitly obeyed when commanding the perpetration of the most atrocious crimes.

MALWAN or **BOCCANANNO** a to. and fortified in Hindoostan, Cochin, preid and 800 m. S Bombay, lat. 15° 35' N; lon 73 42 E.

MALTY or **MALEI**, at N. Siberia, Arctic Ocean, about 45 m. S.W. of St. Kozmin. A great deal of seal ivory is found on it.

MAHA, two rivers, Arctia Russia, in the N.E. of Gov. Irkutsk. They are distinguished by the names of Verkhne-Mama and Nijne-Mama. The former, the larger of the two, has a course of about 100 m. They both join on bank Vician.

MANADITCH a. in Russia, gov. and 90 m. S.E. of Kama, cap. circle. A bank Vatica, not far above its junction with the Kama, and with about 2000 inhabitants. The craters, bounded on the S. by the Kama, and well watered by the Vatica and the Komaka, is excessively covered with pine forests, but has also good arable and pasture land. P. 116,500.

MAMANAGUAPE, or **MOMMOT**, a tn. Brazil, prov. and 40 m. N.W. Paraiba, L. bank river of same name. It has a townhouse church, and primary school its trade in cotton, formerly considerable, has been absorbed by Pernambuco. Pop. dist., 4006.

MAMBRE, a par. Eng. Worcester 2808 ac. Pop. 381.

MAMBOGABA, a vil. and par. Brazil prov. and 100 m. W. Rio-Janeiro near the coast, on a small river of same name. It consists of a number of houses clustering round the church as their centre, and presenting a striking and beautiful appearance when approached from the sea. It has many distilleries, and building-yards in which a great number of houses are made. The woods of the district abound with the finest timber and the soil seems particularly adapted for the various species of palm. Coffee, manioc, millet, haricots, and, above all, rice, are extensively cultivated. Pop. 4000.

MAMLOE (2305) a tn. and par. Portugal, prov. Tronco-Monte, co. Villa-Rica, V. bank Douro, where it is joined by the Tua, 20 m. N. E. Lamego. It is famous both for its wine and oranges, particularly the latter which are among the best in Portugal. Pop. 1230.

MAMLS [Latin *Mamalis*] a tn. France dep. Sarthe near the source of the Dvne, 25 m. N. E. Le Mans. It has two tolerably handsome squares, opened into by several well-built streets a sort of first resort and commerce, and a commercial capital a Gothic church surrounded by an elegant wooden ramp, and modernized in 1831. Manufactures of hemp-cloth, calicoes, cotton stuffs, woollen hosiery, and mother-of-pearl buttons and wax-refineries, tanneries, breweries, and several annual fairs. It is supposed to occupy the site of a temple of Mars which was destroyed in the 7th century. It was once strongly fortified, and was long in possession of the English, who demolished its fortifications in 1438. Pop. 5788.

MANHEAD par. Eng. Devon 1165 ac. Pop. 258.

MANHILLAD par. Eng. Monmouth 1987 ac. P. 287.

MANHOLE, a hamlet, England, co. Monmouth, 7 m. W. Pontypool. The inhabitants are principally employed in the extensive coal and iron works carried on in the neighbourhood. Pop. 6789.

MAMINA, a large Indian tn. Peru, prov. Tarma. lat. 29° 4' 48" S. around which the potato is met with in great perfection. It is supplied with water from clear, bubbling sulphur springs and near it gypsum, alum, and carbons of ash abound. (Bulletin in Jour. Roy. Soc. 1851.)

MANMOLA, a tn. Naples, prov. Calabria-Ultra I., dist. and 7 m. N. Gerace. Pop. 4360.

MANMOO-KHALI, a fort, Afghanistan close to Gunduck, about 60 m. E. Kabul, on the road to Jelalabad, lat. 34° 17' N.; lon. 70° 4' E. Here the British, under General Pollock, in their advance on Kabul in 1842 defeated the Afghans.

MANOJADA, a vil. in Ecuador div. Sazara, prov. and S.E. Azuay. It has a principal and several minor churches, two monasteries, manufactures of articles in iron and wood, and a trade in corn, fruit, cheese, wool, and other coal. Pop. 1771.

MAMORE, a large river S. America, Bolivia, an upper branch of the Madeira, having its sources on the N. slopes of the lofty Andes of Cochabamba, lat. 17° 30' S. lon. 63° 10' W., whence it flows N. to about lat. 10° 30' when it is joined by the Beni, and is thereafter known as the Madeline. Previously to its being united to the latter river, it is joined by the Guaporé or Iténez, in lat. 11° 37' S. lon. 62° W. Its whole course, from its source to its junction with the Beni, is about 500 m.

MAMPAYA, a maritime tn., Bol. Buenos, S.W. coast, lat. 49° 35' N., lon. 109° 10' W. and formerly one of the best markets among the E. islands for opium. It is situated near the mouth of a river of the same name, and is governed by a fort. The anchorage in Mampaya road is in 5 to 8 fathoms, about 3 or 4 m. off shore. Here the tide runs about 2 m. per hour nearly E.S.E. and opposite.

MAN (Isla or) [Latin, *Mons* or *Montana*] an Isl. Irish Sea, about 30 m. W. England, 33 m. E. Ireland, 15 m. S. Scotland, and 45 m. N. Wales. lat. (London High) 54° 24' N. lon. 6° 58' 50" W. (=). Extensive length, N. E. to S. W., about 80 m., with an irregular breadth varying from 6 to 13 or 15 m. Area, 179,300 ac. Viewed from a distance, the general aspect of the island, though in some respects beautiful, is rather tame, for the mountains, which extend nearly through its entire length, although of considerable altitude, neither tower up with sufficient abruptness, nor assume picturesque forms. The highest point of the range is Snowdon or Bannfell about 2000 ft. above sea-level.

This range of mountains and hills which occupies a considerable portion of the surface of the island is chiefly composed of clay-slate, containing some beds of roofing-slates. Low rocks of granite make their appearance in some parts of the slate district. On the S. end of the island, mountain limestone, extending from Porthcawl to Derby Haven a distance of about 5 m. rests upon the slate, separated from it by a bed of conglomerate. The N. end of the island is nearly flat, and is chiefly composed of alluvial soil. Vases containing ores of lead, zinc, copper, and iron, intersect the mountains in a N. and S. direction. The lead mines have been worked to advantage. The island is well watered, numerous springs and rivulets issuing from the sides and bases of the hills and mountains. Some of the larger streams are stocked with trout, and other species of fresh water fish. The names of the principal are the Neth at Porth, the Colby near Ramsey, and the Black and Grey Waters near Douglas. The valleys are some of them tolerably fertile in grass and pasture, and where the land is somewhat level, grain is frequently cultivated. The N. district of the island is not so fertile as the S. but timber is more abundant to the N. The climate is upon the whole mild and temperate, vast quantities of rain fall for seven or eight months of the year and occasionally the island is visited with a long continuance of cold E. winds. Agriculture is a good deal improved but is still very backward. Wheat, barley, oats and potatoes are the principal crops. Turnips also are raised, and flax for home use. The live stock of the present day is composed of an improved breed, the old, with exception of the native sheep, which are still found on the hills, being nearly extinct, or at any rate wanting fast out. Small properties are less numerous than formerly but by far the largest portion of the island is still in the possession of yeomen farming their own little estates, consisting of from 10 to 200 ac., and possessing mostly a portion of lowland with hill pasture.

Man used to be one of the principal seats of the herring fishery but latterly, being for several years comparatively deserted by the herring shoals, the fishery in consequence became quite inconsiderable. There are some bleaching-works in the island but few manufacturing establishments. The women, however, were weavers, linen, and cotton fabrics for home use. The principal exports are corn, potatoes, eggs, limestone, fish, linen, and salt-cloth imports, spirits, wine, colonial products, and manufactured goods.

This island was originally peopled by the Manx (*Mannica*), a tribe of the Celtic race. It was latterly held as a feudal sovereignty by the earls of Derby and more recently by the dukes of Atholl, from whom it was purchased for the British Crown in 1806 and finally in 1856, certain remaining privileges were ceded by the duke on receiving an award of £216,000. There is still, however, a considerable difference between the duties on commodities in the island and in Great Britain the duties on almost all foreign articles consumed in the former being decidedly lower than those on the same articles when entered for consumption in Britain. The government, political institutions, and laws of Man are in many respects peculiar. The legislative and judicial authority is principally vested in the House of Keys, formerly a deluged, but now a self-elected body of 24 individuals. Two assessors, officers of great antiquity, are judges in some civil and criminal cases. The governor is named by the

Crowe; and has a council, consisting of four or six individuals. The Kays, deacons, governor, and council, constitute the parliament; or, as it is called, the Synodal Court, of the island. The established religion is that of the Church of England, under the bishop of Sodor and Man, who has a seat (without a vote) in the British House of Peers. The Manx language, derived from the ancient Celtic, is still in common use, although all the inhabitants speak English. Principal towns, Castletown (the capital), Peel, Douglas, and Ramsey. Pop. 58,887.

MANA.—1. A river, French Guiana. It rises in the centre of the country flows generally N. and, after a course of about 150 m. falls into the Atlantic 160 m. N. W. Cayenne. Its mouth is barred by sandbanks, and vessels, drawing more than 12 ft. water, cannot enter it except at high tides. On its banks is a French colony for free blacks.—2. An isle in Cook's Strait, New Zealand lat. 41° 7' S. lon. 174° 54' E. It is about 2½ m. long and 1 m. broad, depastures a few sheep and is a whaling station.

MANAAR (GULF ISLAND AND TOWN).—The *gulf* is the tract of sea lying between the Island of Ceylon and the E coast of the S. extremity of the peninsula of Hindoostan, being separated from Palk's Straits by Adam's Bridge. It is about 180 m. wide at the broadest part, but is so full of sandbanks and shoals as to render its navigation difficult, if not impossible by vessels of large burden. It possesses many extensive fisheries, and abounds in pearl banks and shark shells.—The island is off the N. W. coast of Ceylon, from which it is separated by a strait, 2 m. to 3 m. broad at high water. It is 18 m. long, and 2 m. to 3 m. broad, and forms a kind of continuation of Adam's Bridge. It is low composed almost wholly of a mixture of shells and sand, nearly unrecognizable of any sort of culture, while the water is generally impregnated with salt. It is chiefly planted with coconuts and palm-tree trees, besides a small variety of shrubs and vegetables, among which cotton predominates. In the most wild and uncultivated part of the sandy tracts the best chaya-roots are produced the collection of which forms the exclusive occupation of a particular class of people called *Adalgas*. Great numbers of black cattle and goats are reared on the island from the milk of the latter the inhabitants make a coarse kind of cheese, small and round. In early times, Manaar was the superstore of Malaccan commerce, and its exports and imports extensive. At present, its exports are chiefly confined to the coast of Ceylon, and consist of chams, chaya-roots, palm-tree raffers, areca-nuts, iron wood, and salted fish. Its imports are cloth, rice, spices, and drugs.—The town, at the S. extremity of the island is small but neat has one principal, and a number of smaller streets and contains many good houses, with several E. Catholic chapels, and a commodious bazaar, well supplied with merchandise. It has a small square fort, which contains besides the officers quarters, magazines and barracks, a small Protestant church, and two reservoirs for water.—(Clyton Gamble)

MANACORAN, par Eng Cornwall 1845 ac. Pop. 562.

MANACOR, a tn Spain, id. Majorca, 3 m. E Palma, on a gentle declivity. It is well built, has several spacious squares, and wine, well kept streets. Its buildings are substantially the most important are the palace of the present kings of the country a large parish church a chapel of ease, townhouse, prison, two schools, and an hospital. It has also manufactures of bread, wine, oil, and vegetables, and some trade in grain, oil, cattle, and fruit. Pop. 10,815.—(Madox)

MANAGUA par Wales, Montgomery, 6633 ac. P. 793

MANAGUA, a tn. and lake, Central America, state of Nicaragua. The town situated near the S. W. shore of the lake, 22 m. S. S. W. Leon, consists of long rows of huts and low houses, and a large square, with houses of two stories lining the sides, and a large church in its centre. There is also another large church, conspicuous by a white archway in front. The inhabitants, chiefly Indians, are very industrious, and have among them many small workshops, remarkable for their dexterity in imitating articles of foreign manufacture. In order to avoid the jealousy and rivalry of Granada and Leon, Managua was recently selected for the meeting of the legislature. On some rocks, a few miles from the town, are a great number of figures, supposed to be ancient, and curiously painted in bright red. Pop. about 12,000. The region around is remarkable for beauty, salubrity, and fertility, and

has many hill slopes, admirably adapted for coffee plantations.

—The *lake*, sometimes called Leon, from having that town at its N. W. extremity is about 33 m. long, and discharges itself into the Lake of Nicaragua by the Tupigara or Panagoya. It is 156 ft. above the level of the Pacific, only 16 ft. above that of Nicaragua, and, though shallow near the shores, is understood to be very deep in its centre. These circumstances, and its distance of not more than 85 m. from the port of Realajo, have recently attracted considerable attention to this lake, in connection with the proposed navigable communication between the Atlantic and Pacific Oceans.

MANALIPA or **MANIPIA**, an Isl. Sooloo Archipelago. See COCO (ISLANDS)

MANAMA, a tn., Persian Gulf. See BAGHERAT
MANAN, or **MANAN** (GREAT AND LITTLE), two isls. N. America, in the Atlantic.—1. New Brunswick, at the entrance of the Bay of Fundy, and opposite the S. extremity of Passamaquoddy Bay. It is 13 m. long and 6 m. at its greatest breadth.—2. U. States, Maine, off Sebasteon harbour. It has a lighthouse, with a tower 25 ft. high.

MANAON, a tn. Brazil. See BARRA DO RIO-NIGRO

MANABAROWAR, or **TWO-MARNA**, a lake Tibet, noted in Hindu sacred legends. It is 112 m. S. E. N. E. Delhi, lat. 30° 40' N. lon. 81° 38' E., at the foot of Mount Kailas, 15,200 ft. above sea-level. It forms nearly a circle about 15 m. in diameter, and is one of the head sources of the river Sudej pouring its waters into Lake Rakas-Tal, or Tso Lanak, which throws off feeders to that river.

MANATON par Eng Devon 5399 ac. Pop. 442

MANAWAIU a river, New Zealand, N. Isl. It rises on the W. slope of the highest mountain range to the N., flows in a very tortuous course, S. by E. to lat. 40° 30' S. where it turns W. and N., and then S. W. to Cook's Strait, which it enters by a mouth about 800 yards wide at half-tide about 53 m. N. by E. Wellington, after receiving several affluents on either side. On a bar, at its mouth there are only 7 ft. of water at low tide but inside the bar there is depth enough for small vessels for about 50 m. The tide rises 8 ft.

MANBY, par Eng Lincoln 1460 ac. Pop. 240

MANCHEL, par Eng Warwick 4120 ac. P. 5346

MANCHA (La), an ancient territory, Spain, in the S. of New Castle now included in the four provs. Lland-Ned, Toledo, Ciudad, and Albacete. It is covered in the N. by ramifications of the mountains of Toledo, and in the S. E. and S. by the sierras of Alarcas and Morona. Towards the centre, it is composed of an elevated and generally barren plateau. The name and scenery of La Mancha have been rendered familiar by the descriptions of Cervantes in Don Quixote.

MANCHA REAL, or **MANCHELA DE JAEN** a tn. Spain, Andalusia, prov. and 8 m. E. Jaen. It is indifferently built, has a large and handsome square, a spacious church, with three naves, town-hall, prison, two schools, an hospital, several chapels, and manufactures of linen, coarse cloth, wine, oil, and earthen ware. Pop. 8966.

MANCHEL (La) a maritime dept. France, washed on the W. N., and N. E. by the English Channel, and bounded on the E. by dep. Calvados, S. E. Orne and G. dep. Mayenne, and E. de la Vilaine lat. 48° 27' to 49° 45' N., lon. 0° 44' to 1° 59' W. Its shape is irregular, but, with some allowance, may be regarded as a parallelogram, the longest side of which N. to S., is 30 m., and the shortest 20 m. area, 226½ sq. m. The coast about 155 m. in length furnishes, on the N. side the important harbour of Cherbourg. The surface of the department on the whole flat and sandy but a considerable ridge traverses it N. to S., forming the water-shed between the E. and W. In the direction of this ridge, the country is undulating and in many places, though by no means mountainous, sufficiently elevated and abrupt to be very picturesque. The shores are generally flat, and lined with swamps, alternately covered by the tides, and left dry by the fall of the tides. The climate is mild but damp. Of the numerous but small rivers, the only ones deserving of notice are the Calonne, Sienne, Vire, and Douve. About 3 of the whole surface are arable, 1 meadow, and 1½ waste. The cereals raised are more than adequate to the consumption, but the best land only is adapted for wheat. A prevailing crop is a species of black oats, which enters largely into the diet of the working-classes. The culture of the potato is general. Apple orchards, particularly in the

interior are extensive, and produce great quantities of cider, which is the ordinary beverage. The most common forest trees are oak, beech and larch. The cattle are large, and a tolerably good breed; the sheep are small, but yield good mutton. Considerable attention is paid to the dairy, and the butter called *Isigny* and made in several districts, has long been famous. The horses belong to the Norman breed, which as one time had a European reputation, but the great demand for them, for military purposes, has both thinned their numbers and somewhat deteriorated their quality. Both lead and iron are partially worked. Near Cherbourg fine blocks of building granite are obtained, and in several other quarters, sandstone, limestone, marble, pavement, and potter's clay are found. A good deal of salt and soda are procured from the salt marshes. The inhabitants are industrious, and numerous manufactures are carried on none, however, to an extent deserving of a separate notice. The trade is almost confined to agricultural produce, and fish, fresh and salted.

Manche was originally inhabited by the Unelli and Abriacæ. It was subsequently included in the territory which the Normans wrested from Charles the Simple in the tenth century. Along with the other dominions of William the Conqueror it became a fief of the English king, but returned to the crown of France under Charles VII. For administrative purposes, this department is divided into six arrondissements—St. L., the capital. Arranches, Cherbourg, Coutances, Mortain, Valognes—subdivided into 46 cantons, and 640 communes. Pop. (1859) 600,832.

MANCHESTER, a city U. States, Virginia, on bank James river opposite Richmond. It has two churches, an extensive cotton and eight tobacco factories, a cotton-seed, oil and a flour mill. Pop. 1,600.

MANCHESTER (anc. Mancunian) the most important manufacturing town of England occupying chiefly a low tract of ground on both sides of the Irwell, at the confluence of the

Medlock and the Irk, 183 m. N. W. London, 53 m. E. by N. Liverpool; lat. (St. Mary's) 53° 32' N., lon. 2° 14' 25" W. (L.). It consists of Manchester proper, including the suburbs of Hulme, Chorlton, Ardwick, Chesham, &c., situated on the E. or L. bank, and of the extensive borough of Balford, situated on the W. bank of the Irwell, the communication across which is maintained by eight bridges, several of which are handsome structures. Among them may be specified Victoria Bridge, consisting of a single, elegant arch; Blackfriars' Bridge, of three arches, the iron bridge of Bridgeways and Springfield Lane, and the suspension iron bridge of Broughton. The site, owing partly to its leviness, and the tenacious subsoil on which it rests, and partly to the halting of the streams by the numerous mills and works established upon them, has been considered somewhat unhealthy though exaggerated ideas have been entertained on the subject, and many of the only real causes of disease have been either removed or greatly modified by improved drainage, and the introduction of an adequate supply of pure water. The almost unexampled rapidity with which Manchester has risen up has produced the apparently opposite but by no means contradictory results, of leaving it comparatively poor in architectural ornament, and yet superior to most manufacturing towns in general appearance.

If it cannot boast of many venerable structures embodying the conceptions of master minds and rich in historical recollections, it has comparatively few of the narrow, twisted and crowded lanes, by which all large towns of ancient date are more or less characterized, while it can point to spacious streets and squares, well paved and well lighted, and lined with houses, which not only when occupied as private mansions, but also when intended for business and manufactures, are generally of a most substantial and, not unfrequently, of a magnificent description. Market Street continued in the line of the London road nearly across the centre of the town, towards the Irwell, is one of the finest

MANCHESTER.—INCREDIBLE TREE INFIRMARY &c., from Rodney Street.—From a large Photograph by Haslam, Manchester.

streets out of the metropolis, and any town might well be proud of the splendid edifices lining such streets as Mosley Street, George Street, King Street, and Parker Street.

PRINCIPAL BUILDINGS.—1. Churches.—The places of public worship in Manchester and its neighbourhood, exceed 180. Of these the Establishment has 49 the Wesleyan Methodists 29 the Methodist Association 17 the Methodist New Connection 2 the Primitive Methodists 8, the Independents 22, the Baptists 10 the K. Catholics 10, the Scotch Presbyterians 5 the Unitarians 5 and several other denominations one or two each. Of the Established churches, the first place is due to the Collegiate Church, which since the erection of Manchester into a bishop's see, has become the Cathedral. It was built in 1429 and is considered a fine specimen of perpendicular Gothic, though the soft and mouldering stone of which it is built has rendered numerous repairs necessary,

and somewhat altered its original appearance. It consists of a nave and aisles, and is rendered conspicuous by its lofty tower, which is 150 ft. in height, and in its upper part highly ornamented; though, unfortunately in such a rapid state of decay that it has been pronounced dangerous. A deeply recessed doorway in the W. side of the tower now closed, was formerly the principal entrance. The interior has a very striking appearance. The roof, nearly flat, is divided by moldings richly carved, and is finely painted, and gilded. The choir contains some very elaborate carved work, not surpassed by any cathedral in the island, though the subjects represented are little in accordance with the solemnity of the place. Behind the altar is a curious piece of old tapestry, representing the death of Ananias and Sapphira, and in some of the finely-proportioned clerical windows, by which the nave is lighted, are remains of the original painted glass.

St. Ann's Church, near the centre of the town, is a Grecian structure, with a tower and a fine organ. St. Peter's, also Grecian, is remarkable for its fine bell and a picture of the Descent from the Cross, by Antonio Canova. St. Mary's, an irregular building, not easily reducible to any style of architecture, has an elegant spire, supported by a lantern

composed of eight Ionic pillars, and a painted window representing our Saviour and Mary in the garden, and over the altar a copy of Raphael's Assumption by Williams. St. John's, in the later English Gothic, has a tower with a pair of bells a neat and richly ornamented interior partly lighted by painted windows, and some beautiful monuments, among

which was, in marble, by Flaxman, and another in Caen stone, from the designs of Messrs Travis and Mangnall are conspicuous. St. Matthew's, a large and handsome building of modern Gothic, after designs by Barry, is well situated, and has a spire 132 ft in height, and a fine organ. Trinity Church, Salford, the oldest in the borough, is surrounded by a tower of perpendicular Gothic, and is interesting from the antiquity of its interior, which is filled up with dark oak pews. St. Philip's and St. Simon's, both in Salford, are handsome edifices. The former, of Grecian architecture, has a tower rising above a semicircular porch of the Ionic order; the latter, in the pointed or early English style, has a tower and spire 150 ft in height, a pulpit of carved oak, and three well-executed coloured windows. St. George's, in Hulme, one of the finest churches in Manchester, has a lofty pinnacled tower and a handsomely fitted up interior. Holy Trinity, also in Hulme, a splendid building in the early English style, built from the

gift of £10 000 by Miss Atherton, has a very beautiful interior, a superbly painted and gilt chancel and some richly stained lancet windows. All Saints' (Greenway Square, Manchester), has a tower surmounted by a dome, and a beautiful circular window of coloured glass. St. Luke's, of Chesham Hill Road, of perpendicular Gothic, is a splendid building with a tower terminating in an elegant crocketed spire 170 ft high and has some fine oak carving in the interior. Among the churches not established, the most deserving of notice are St. John's R. Catholic, in Salford, a cruciform structure, of decorated English, with a central tower, terminating in an elegant spire 200 ft high, said to be the loftiest in Lancashire; a splendidly decorated porch, an interior in which a good deal of taste has been displayed and three large pictures copied from those behind the high altar of Medinacith Cathedral; Cavendish Street Independent Chapel, in the early English style, with a handsome interior, a fine window of

stained glass and a tower terminating in an elegant spire 173 ft. high. The English Presbyterian Church in Salford, is in the perpendicular style, with a tower and lofty spire.

2. *Municipal and Commercial Buildings and Institutions.*—The Townhall situated in King Street, which, by the removal of old and unsightly buildings, has now become one of the most important streets in Manchester, is built in the Grecian style, borrowed partly from the temple of Erechthon, and partly from the Temple of the Winds at Athens, and has on each side of its portico which is approached by a flight of steps, figures of Solon and Alcibiades, and in the attic story above it, medallions portraits of Luke and others; and in its interior a splendid hall 130 ft. long by 38 ft. wide, having its walls, and the dome which forms the centre of its ceiling covered with allegorical frescoes. In these buildings are situated the offices of the Chamber of Commerce, an institution founded in Nov. 1830 for the promotion of measures calculated to benefit and protect the trading interests of the town and neighbourhood of Manchester. It is conducted by 24 Directors and has been, from its commencement, a constant exponent of the laws and of monopolies of every kind. It was the first public body to repudiate protection for manufactures and to call for the abolition of every species of differential duties, and for the repeal of the navigation laws. Questions of a purely political complexion are not entertained at any of its meetings. Its proceedings attract attention in every commercial community throughout the world. The Manchester Commercial Association is another institution, having similar objects in view. It holds regular meetings, and publishes an annual report of its proceedings. The Exchange, one of the finest structures of the kind in the kingdom, has a front consisting of a lofty Doric portico, with eight fluted columns, and, in the interior a splendid commercial room, 185 ft. long by 92 ft. wide, partly divided by two rows of fluted Ionic columns and lighted from above by a lofty glazed centre dome and two side octagonal lights. In the upper part is a large room containing a library of more than 30,000 vols. The Corn Exchange has a handsome front of six Ionic fluted columns, and is capable of holding 2400 persons. The Free Trade Hall, though only of brick deserves notice for its extraordinary dimensions, which enable it to contain, when crowded, upwards of 8000 persons; this structure, under whose roof so many important meetings, connected with the Free Trade movement, have taken place, and from whose platform proceeded those great principles of commercial freedom which have since been adopted by the Legislature (in 1853) about to be pulled down, and replaced by a handsome building adapted for large meetings, concerts, lectures, &c. The Salford Townhall finely situated with a spacious area in front is a handsome and commodious structure. The Branch Bank of England, which has its principal facade nearly opposite to the Townhall Manchester is one of the handsomest buildings of which the town can boast. It is in the Grecian style with a Doric colonnade. The County Court Hall Nicholas Croft, a spacious and ornamented building recently erected has a handsome circular facade. The workhouses of Manchester and Salford are large and commodious structures, admirably adapted for their purposes. The Borough Jail on the Hyde Road finely situated so as to form a conspicuous object from the surrounding country, is a large and in no far as the purpose for which it is intended would admit of it, a handsome building in which the classification of prisoners is carried out as strictly as possible in all its details, and all important modern improvements in the system of prison discipline are admirably carried out. The new Bailey Prison in Salford, though unfortunately situated in the midst of the town, is said to be remarkably healthy and has the reputation of being one of the best-regulated prisons in the country.

3. *Educational and Literary Establishments.*—At the head of these, at least for its antiquity, is Othman College or Hospital which immediately adjoins the Cathedral and is approached through a handsome gateway. It is a very old building, occupying the site of the residence of the Baron or Thane of Macclesham was originally used as a dwelling-house by the collegiate body, was converted into barracks by the army of the Parliament, and, having been purchased by the trustees of Chetham's charity was first occupied by the boys in 1656. The boys, whose dress is similar to that of Christ's Hospital in London, are eighty in number, and remain

in the institution till the age of 14, when they are apprenticed with a small premium. Attached to the institution is a valuable library of above 12,000 vols., freely open to every person, resident or stranger. The Lanchester Independent College, occupying an airy situation, with a considerable space of open ground around it, is a noble building, in the English academic style, consisting of a body from the centre of which a lofty pinnacled tower rises, and of two wings, carried backwards at right angles. It was built by the Independents as a theological academy, and will accommodate about fifty students. Manchester New College, a theological institution established by the Unitarians is said to have a valuable, though not very extensive, library. Owen's College, founded by a bequest of upwards of £100,000 from the gentleman whose name it bears, is still in its infancy but gives instruction in all the branches usually taught in the English universities. Mr. Owen's munificent bequest having been given to fund the college, and not to provide buildings for it, the institution has hitherto occupied a large house in which Mr. Cobden formerly resided, but the task of furnishing adequate accommodation, has been entered upon with spirit and voluntary subscriptions, in a large amount, have been already (1853) obtained. The Free Grammar School founded by Hugh Oldham, Bishop of Exeter in 1520 has an income of above £4000 per annum, and a great number of exhibitors at Oxford or Cambridge. The education given includes the principal European languages, classics, mathematics, and various other branches. The Commercial Schools established by the Manchester Church Education Society occupy a handsome building erected in 1843, and furnish a complete course of education to the middle classes on very favourable terms. The Ladies' Jubilee School now called because the subscription for the building was commenced in commemoration of the jubilee of the reign of George III., was founded to promote the moral and religious education of poor female children, and having received a great addition to its resources by a munificent bequest of a salary of £1000 has increased the number of its pupils to forty, and treats them so well for domestic service, that the demand for them far that purpose always exceeds the supply. The Royal School of Medicine and Surgery, founded in 1824, is on the same footing as similar schools in the metropolis, qualifying for examination at Surgeons' Hall &c. It has an average attendance of 80 to 100 students and has in connection with it museums of anatomy and materia medica a laboratory library and medical society. The Literary and Philosophical Society established in 1781 has numbered many distinguished individuals among its members, and published several volumes of valuable Transactions, in the council room are fine portraits of Sir Isaac Newton, Sir Humphry Davy, Dr Dalton &c., and a noble marble bust of Dr. W. Henry, by Chantrey. The Chetham Society established in 1843 for the publication of historical and literary remains, connected with Lanchester and Cheshire, has published 22 vols. generally of a very interesting description. One of the most valuable of the literary institutions of Manchester is the Free Library situated in Camp Field. It was established in 1861 by public subscription, extending to £17,742 and contains upwards of 16,000 vols. in the reference, and 5000 in the lending library. It is, as its name implies, perfectly free, and is supported by a local rate of one halfpenny in the pound upon the poor rate assessment. Its establishment was suggested by Dr. J. Watts, but its completion was mainly owing to the great exertions of the mayor for the time being, Sir John Potter and Mr. James A. Turner. Manchester has the credit of establishing the first free lending library in the kingdom. Other societies deserving of mention are the Natural History Society which possesses a very valuable museum, the Geological Society with a museum and library, the Statistical Society the Law Association, the Medical Society, the Royal Institution, occupying buildings which cost £46,000 and are among the most ornamental in the town; the Athenaeum, the School of Design, Anson's Lyceum, the three Mechanics Institutions, and several Musical Clubs. In addition to the libraries already mentioned, notice is due to the Subscription and New Subscription, the Fenton, the Newhall Buildings, the Foreing, the Law Library, and also to the Salford Museum and Library, which is open to the public.

Beneficial Institutions.—Some of these have been men-

tioned among the schools, but others more immediately referred to under this head are the Royal Infirmary which, in its architectural and general appearance, forms one of the greatest ornaments of the town, consisting of the three sides of a quadrangle, with a fine portico, supported by four fluted Ionic columns in the centre of each, and surrounded by a spacious area, tastefully laid out with green borders and walks, with a sheet of water in front. The Blind Asylum, supported partly by subscriptions, but chiefly by a munificent bequest of £20,000, left to it by Mr. Henshaw of Oldham and the Deaf and Dumb Asylum, mixed together, so as to form one handsome building in the English collegiate style. Other benevolent institutions deserving of notice are the Lunatic Asylum, the Eye, Lock, Salford Royal, and Lying-in hospitals, the public Baths and Wash-houses, the Model Lodgings, houses the Juvenile Refuge Panslatory, Strangers' Friend Society, &c.

Places of Amusement and Recreation.—Manchester possesses two theatres, a large and handsome Concert Hall, and a Museum of Natural History, already referred to occupying a handsome edifice of three stories with about 100 feet of front, and containing many valuable and interesting collections, well kept and well arranged. In the Free Trade Hall, a series of cheap concerts have been given for several years, in which thousands of the working-classes have been in the habit of resorting. The great boast of Manchester however is not its indoor amusements, but its fine parks and gardens, where not amusement merely, but health and instruction too, may be obtained by the easiest means and in the most agreeable manner. The most important of these are the Botanical and Horticultural Gardens, scarcely surpassed by any out of the metropolis, the Peel Park, situated 1 m. W. of the Exchange, bounded on its E. side by the Irwell and covering an area of 33 a., laid out with great taste and judgment, so as to afford ample space for recreation, or more active and boisterous sports, and containing among its other ornaments, a bronze statue of Sir Robert, 10 ft. in height, placed on a granite pedestal, the Queen's Park, about 2 m. N. E. from the Exchange, laid out in a style similar to that of the Peel Park with rustic seats and pleasant shady spots, and, in some respects superior to it, from possessing larger trees, a more diversified surface, and a fine sheet of water near its centre. Phillips's Park, situated about 2 m. S. from the Exchange, near localities almost entirely occupied by the working-classes, who gladly and beneficially avail themselves of its spaces of recreation and the Zoological and Pomona Gardens. The three parks were established by public subscription in 1845, and cost about £33,000 of which sum £3000 was given by the Government.

Cemeteries.—Of these Manchester has not much to boast. That in Rusholme Road, though only opened in 1851 in what might then have been considered a rural district, is already so completely surrounded by streets, that it has now almost all the features, and lies open to the charge of being merely an extra-mural graveyard. That of Ardwick, covering about 12 a. though well laid-out and carefully kept, is on similar grounds objectionable. The only true cemetery, in the modern sense of the term, is that of Hargreaves, situated about 2 m. out of town on the Rochdale Road, and on a sloping of nearly 11 a., laid out with some taste, but by no means having such features, as a cemetery worthy of Manchester ought to possess.

Manufactures and Trade.—To these Manchester owes its rapid rise, and almost all its present importance. Its site in these respects has been admirably chosen. It stands close to one of the largest and most valuable coal fields of England, at such a convenient distance both from the W. and E. coasts, as to form a naturalemporium for the traffic of the Atlantic and the German Oceans, and on the Irwell with its two tributaries, the Mersey and the Rochdale, though not possessed directly of much value for navigation, are fully capable of being made subservient to it, and are of great importance for many manufacturing purposes. To develop these natural advantages, a network of canals, in which the engineering genius of Bridley gained some of its greatest triumphs, furnishes easy communication to numerous important towns, of which Manchester may be regarded as the common centre and to these has now been added a system of railways, which almost leaves nothing farther to be desired in regard to facility of transport,

and to the benefit of which Manchester from the leading part which it took along with Liverpool, in proving the practicability and profitable working of such a mode of transit, may be said to have established a peculiar claim. The great staple article of manufactures and trade in Manchester is cotton, in the various forms of which it has taken so decided a lead not only in this country but throughout the civilized, and we might almost add the uncivilized world, that the name both of the town and its goods have become household words. In more immediate connection with the cotton manufacture are numerous bleach-works, dye-works, print-fields, chemical works, and engine factories. Probably next in importance to cotton is the spinning of silk and manufacture of silk goods, which, long depressed by a heavy import duty on raw silk, took a sudden spring when relief in this respect was obtained and has since advanced with such rapid strides, as enables it to be regarded as an important staple of the place. Besides articles of pure cotton and pure silk, mixed goods, in which silk and cotton silk and wool, cotton and wool are combined, are manufactured to a considerable extent. The following Table, furnished in February 1853, by the Inspector of Factories gives the most recent and accurate information in regard to the important subjects in which it relates—

STATISTICAL TABLE OF THE FACTORIES AND PRINT-WORKS IN MANCHESTER AND SALFORD

	Number of Spindles	Persons employed.	Short-wool.
Cotton-Spinning.	50	1392	1240
Cotton-Wearing	60	7708	1021
Cotton-Spinning and Wearing	42	17558	4704
Woolen and Worsted Spinning and Weaving	142	30580	737
Silk-Throwing, &c., and Braid Works.	5	980	80
Flax-Spinning	60	7190	180
Print-Works	50	1190	108
Total	223	49,264	813

Forges and foundries, also, where steam-engines, large cast-iron and brass cannon, large and various articles of iron, malleable and cast are made, are numerous. The only other articles particularly deserving of notice are paper, chiefly made at extensive mills in the vicinity here, and engraving in connection with the printing of cotton goods. The trade embracing all the above manufactures is necessarily very extensive.

Means of Communication.—Here it is hardly necessary to notice the ample means of local transport furnished by the numerous omnibuses which continually ply in the streets, and afford a cheap and commodious mode of transport in all directions. The railways are the Liverpool and Manchester which has its terminus at Victoria Station, Heyth's Bank, and will always hold a prominent place in the history of the railway system, from having been the first for self-locomotives, that was opened in this country, the Lancashire and Yorkshire, occupying part of the same station communicating by a branch with Oldham, and leading N. past Rochdale, connecting Manchester with Halifax, Bradford, Huddersfield, Wakefield, Leeds, &c. the Manchester and Broughton forming one of the principal branches of the London and North Western and the great thoroughfare to the S. the Manchester, Sheffield, and Lincolnshire, leading E. and communicating with Sheffield Hall, Great Grimsby &c. stations at London Road the E. Lancashire, which has its station in New Bailey Street, Salford, and communicates with Bury, Blackburn &c., and the S. Junction and Altrincham which has its station in Oxford Road, and is intended to connect Manchester with Chester, through Warrington. The canal system had, at the close of the last century, adopted Manchester as its centre, and all its quarters are now intersected by canals. That of the Duke of Bridgewater communicates with the Mersey at Burton, those of Ashton-under-Lyne, Stockport, and Macclesfield all join each other and have a common terminus at the back of Piccadilly, that of Rochdale and Halifax communicates with the Bridgewater, and that of Bolton and Bury has its terminus in Salford. If anything is still wanting to make the means of communication perfect, it is a navigable channel

between the Mersey and Irwell of such depth as would enable vessels of large size to come direct from the ocean and discharge or receive their cargoes at shipping-wharfs in Manchester. Schemes apparently far more extravagant have been realized the most eminent engineers have pronounced it not impracticable, and to the Mersey and Irwell Navigation Company will probably belong at no distant period, the honour of having carried it into effect.

The Corporation.—The borough of Manchester comprises the several townships of Manchester Chorlton upon Medlock, Hulme Ardwick, and Cheetham, and also the small extra parochial district called Beswick, and was incorporated by royal charter granted in October 1838. The management of the local affairs is entrusted to the town council 64 in number elected under the provisions of the Municipal Corporations Acts bearing the respective titles of mayor, aldermen, and councillors and who appoint from their body committees for the transaction of the various departments of the public business, such committees reporting their proceedings for approval at the general meetings of the council. Prior to the incorporation of the borough, the several townships named, with two exceptions (Cheetham and Beswick) had local acts, under which commissioners were appointed to manage the local affairs and consequently a separate establishment for purposes of government existed in each town ship. These arrangements very frequently gave rise to an considerable inconvenience and prevented the establishment of any system of police which would apply to the whole borough or any combined action for public objects. Since the incorporation of the borough a separate commission of the peace and court of quarter sessions, has been obtained by grant from the Crown and an efficient constabulary force established for the borough, under the control of the watch committee of the council and the divided system of police and watching previously existing in the several townships superseded. The authorities, in cases of necessity are able to bring the whole body of men into operation under one head, at any time and in any part of the borough and the services of this combined police force have been on several occasions most valuable, especially in the disturbed periods of 1839 1842 and 1847 when serious riots were suppressed without any service of life. The town council have obtained several Acts of Parliament for improving and enlarging the borough which have proved most beneficial in preventing nuisances, and securing paving sewerage cleansing and proper sanitary regulations. A jail capable of accommodating about 500 prisoners has been built at a cost of nearly £30,000 and the council are now (1853) constructing under powers obtained from the Legislature extensive water-works, calculated to afford a supply of about 30,000,000 gallons of water daily at an expenditure (including the purchase of the previous very inadequate water-works) of about £1,050,000. It is anticipated that when the whole of the new water-works are completed, and the large additional supply obtained, the sale of water for the purposes of trade will enable the council to relieve the inhabitants from the payment of rates for the supply of water to houses for domestic uses. The council have also under their management extensive gas-works, established prior to the incorporation of the borough within the township of Manchester but since that time, considerable extensions have been made, and notwithstanding frequent reductions in the price of gas to consumers, a profit of upwards of £25,000 a year is realized, and is expended in the improvement and widening of the streets and thoroughfares. Many years prior to the incorporation, the authorities of the township of Manchester had two opportunities afforded them of purchasing the manorial rights and properties held by the Mosley family on one occasion for about £20,000 and on the other for upwards of £90,000. The purchase was however overruled, after the negotiations had been completed by the mortgagees or co-mortgagees. The town council in 1846, accomplished the purchase of the rights and properties from Sir Oswald Mosley Bart. for the sum of £200,000, £155,000 of which was left on mortgage, at 4½ per cent. interest, the income at that time being under £10,000 a year. Since 1846, under the management of the corporation, the income has increased yearly, and is now upwards of £16,000 per annum.

General Condition.—The commercial rise of Manchester has been so rapid, that, in the case of a town as of an insti-

tutute, we must not be surprised to find some things of great value neglected. The demand for labour has been so great, that, prior to the passing of the Short Time Bill it was common for women and children to labour in the mills 18, 24, and occasionally 36 hours per day. A population so engaged could not pay much attention to mental cultivation and although, doubtless, the business of practical working has been much improved within the last 20 years, yet the day-school attendance of Manchester has fallen off considerably in proportion to the population. In order to remedy this defect, and to prevent any future recurrence, Manchester now demands a national system of education. The condition of the town is sensibly affected by the constant influx of poor Irish people who are, for the most part, hand-loom weavers, and wage an unequal contest for life with the most perfect of machinery. The children of these people obtain employment in the cotton and other mills, and their condition is thus much improved. Other agencies are also in active operation for the social improvement of Manchester. 73 town missionaries visit from house to house amongst the poor and 26 temperance meeting-rooms open their doors weekly.

History.—Manchester was known at a very early period as one of the chief stations of the Druids, who have been and an altar called Moyon, which enjoyed the privileges of sanctuary. It subsequently became a place of some importance under the Brigantes, who built a castle called Mamucium, the site of which is still preserved by its present name of Castle Field. On the conquest of S. Britain by the Romans, about A.D. 79 the castle was converted by them into a station and received the name of Mamucium, obviously a corruption of the Brigantes Mamucium. Here a small part of the foundation of the wall is at present discernible, and now, vestige almost, none, have been discovered at various periods. After the Romans withdrew the Saxons, about 488, wasted Mamucium from the Britons but were again forced to restore it. In 620 it was taken by Edwin, king of Northumbria, and was shortly after occupied by a colony of Angles. About this time the old name of Mamucium seems to have been supplanted by its Saxon form. Manchester from which Manchester is easily derived. The conversion of the inhabitants to Christianity is said to have been effected about 625 by the preaching of Paulinus and a church dedicated to St. Michael, Manchester next passed to the Danes who about 920 were expelled by Edward king of Mercia. This prince not only repaired the castle, in which he placed a strong garrison, but raised the tower from the ruins into which it had fallen while half barbarous chiefs were contending for its possession. Its charter conferring the privilege of a borough was granted in 1301. We hear of Manchester cotton, for the first time in 1352 but the article so designated, notwithstanding its identity of name, had nothing in common with the modern fabric, being in fact a woollen cloth of coarse texture, woven from the unprepared fleece. At this time the manufacture of broad-cloth was introduced by the Flemings, and made considerable progress. In 1422 during the reign of Henry V. the collegiate church now the cathedral, was built, and a college endowed. This college was dissolved in the reign of Edward VI and after remaining for a short time with the Crown became the property of the Derby family. During it a civil war the possession of Manchester was keenly disputed and suffered much at the hands of both parties. About this time, it is described as 'one mile in length, with good streets and buildings, and the inhabitants more industrious than in any other part of the north of England.' Its progress since has been rapid, almost beyond example, but the details connected with it can scarcely be regarded as historical events, and are, in fact, more a history of the cotton trade than of the town of Manchester. Manchester was honoured by a visit from Royalty on October 10, 1851. Its share in the representative system of Britain was first conferred by the Reform Bill, under which it enjoys the privilege of sending two members to Parliament. Registered electors (1851), 13,921. P. including Balford (1851) 401,321. (Duffield's *Stranger's Guide to Manchester* Manchester as it is, *Correspondence in Manchester*—See Kerr.

MANCHOORIA [Chinese *Kiang-King*, French *Mandchourie*, German, *Mandschurei*], an extensive but little known territory belonging to China, comprising all the most E. portion of the high table-land of Central Asia lat. 41° 30'

to 86° N. and lon. 118° 30' and 141° 18' E. bounded N by the Yalou mountains, which separate it from the Russian gov. of Yakutsk E. by the Sea of Okhotsk, the Gulf of Tartary and Sea of Japan, S by Corea, and the Gulf of Chukchi, and W by Mongolia, and the Russian gov. Irkutsk; area, estimated at 700,000 sq. m. Its sea-coast is about 1200 m. in extent. Several mountain systems traverse it in various directions, mostly, however from S.W. to N.E. Of these, the most marked is the Yalou mountain, already alluded to as forming the N. boundary of the territory. An extensive range also runs parallel to the coast, and in some places so near, that a strip only of arable land is left. Inhabited by a peculiar race, holding little intercourse with the Manchou. Another considerable range, called the Khinghan mountains crosses the W. part of Manchou, from S. to N. With exception of this S. portion sloping to the Yellow Sea, nearly the whole of this vast territory is drained by the Amoor or Faghu, which pursues a winding but central course E. to W., through the entire region, entering it at lon. 130° 23' E. and falling into the Gulf of Bagien at lon. 140° E. The other principal rivers are the Songari and Onon, both flowing S. to N., and the Silimpi and the Thilidi from N. to S. all tributaries of the Amoor or Sagalia. There are three considerable lakes in Manchou, the Hurun Fir and Kinka. The first is said to be 200 m. in extent, but nothing is known of it, nor of the Fir. The Kinka, about 40 m. long and 25 m. broad is the source of the Songharian one of the head streams of the Onon. It is about 90 m. from the coast, lat. (S. end, 45° 7' N. lon. 128° E. In the S. parts Manchou is tolerably fertile, and well cultivated, resembling in this respect the richer countries of Asia. But in the N. the aspect is thoroughly Siberian, the winter is cold & excessive, and the summers are short. The mountains are covered with vast forests of fine timber chiefly pine, forming a retreat for numerous wild animals, the hunting of which, and trading in their skins, form the chief means of support to the hunting population of this inhospitable region. The flora is chiefly of European genera, but *Aspidopogon*, *bedeckers* and *homocarpus* are so plentiful, as to impart a peculiar character to the vegetation. Rice and safflower abound. It is one of the chief localities whence the Chinese obtain the wonder-working gun-powder and saltpetre is extensively cultivated. The rivers and coasts abound in fish, among which carp, sturgeon, salmon, pike, and other species as well as shell fish, are plenty. The pearl fishery is carried on by Government. Manchou is divided into the three provinces of Sheng King m. the S., including what used to be named Leao tong, bordering on the trait of Pe-chiao and Corea. Kina comprising all the region E. of the river Songari, and in the N. a large area W. of it, and also the N. part of the island of Turalai or Bagien. The Tai har comprising the N.W. section of the country a large portion of which is included in the valley of the Noma; an affluent of the Songari. The capital of the whole country is Noshien, lat. 41° 50' 30" N. lon. 128° 7' E. Manchou is under a strictly military government every male, above 18 years of age, being liable to be called on for military service. The Manchou are a Tungusian race. In the 17th century, they invaded China, and placed their leader on upon throne. Since that time, the Manchou dynasty has continued to reign in China, and the Manchou language has become the court and the official language. Pop. variously estimated, from 2,000,000 to 4,500,000.

MAND, a vil Hungary, Thibet Thies, on Sonthmar, on a well wooded district, 16 m. from Sonthmar-Nemeth with a church. Pop. 1000

MANDAL, a seaport in Norway built of its own name, prov. and 22 m. S.W. Christiansand, on both sides of a river of the same name, at its mouth in the German Ocean. It is a small place, chiefly depending on trade for its harbour which is good, and much used as a harbour of refuge. Trade and ship-building are the chief occupations, exports timber and fish. Pop. (1845), 2886.—The river rises in hill Nedene, in the Hak-Fjeld, enters Mandal, flows almost due S. and falls into a small bay at the town, after a course of about 55 m. It is well supplied with fish.

MANDAN, a dist. in the N.W. of the U. States, bounded E. by the British possessions, E. the Wisconsin territory, S. the Indian territories, and W. Oregon. Length, E. to W., 600 m., breadth, 120 m. area, supposed to be 800,000 sq. m.

It has been imperfectly explored, but it is understood to consist chiefly of an elevated plateau, covered with prairie, on which large herds of bison, elk, and deer pasture. The Missouri and Yellow Stone rivers rise in this district.

MANDARA a state of Central Africa. S. of Bornu. It is mountainous, and has numerous forests and lakes, but is in many parts extremely fertile. Inhabitants, Malianians.

MANDAS, a vil Kardana, N. Cagliari, in a level plain. It has tolerably regular and paved streets, a church, a convent, a primary school, manufactures of woollen cloth, and a trade in brandy, wine, hides, and cheese. Pop. 1387

MANDAVEL, or MANDAVIA, a seaport in Hindoostan, Outah, N. shore, Gulf of Outah 37 m. S.W. Blonj lat. 22° 50' N., lon. 69° 18' 15" E. (u.) Though its harbour is only an open roadstead with a creek, it is by far the most important port which Dutch possessions. No fewer than 250 vessels, varying from 20 to 200 tons, belong to it, and carry on an extensive trade with Zanzibar, and the whole E. coast of Africa, with the Red Sea, and Arabia, the Persian Gulf, Malabar, Borneo, and India, as far as Ceylon. The town, situated within gunshot of the port is surrounded with gardens and fortified in the Asiatic style. The inhabitants, composed principally of Bhattians, Banyans, and Brahmins, have been estimated at 50,000

MANDE (St.) a. to. Franco, dep. Seine, at an outlet of the forest of Vincennes, about 4 m. S.E. Paris. It is almost entirely occupied with villas, and places of amusement for the Parisians, who seek to it in great numbers on holidays. Its chief manufactures is glass, particularly the coloured kind known in commerce as Venise glass. There are also manufactures of pasteboard, stained paper and leather varnish. Pop. 2900

MANDEO a river, Spain, Galisia. It rises near the village of Groyola, prov. Coruña, flows first N. and then W. N.W., passing Betanzos, and, after a course of about 35 m., during which it receives the Mandio on the left, falls by a wide mouth into the Atlantic at Coruña.

MANDETIVORE, or *Lexore* an isl. Hindoostan, Pakh. Straits, off the N.W. coast of Ceylon, lat. (S. end) 8° 15' N. lon. 80° E. It produces partly coconuts and the palm-tree, and has a large breed of cattle and goats. Its principal vil. and seaport is Kayts (which see). Pop. 5000

MANDINGA, a bay and group of islets Caribbean Sea, northern of Panama, N.E. coast lat. 9° 30' N., lon. 78° 58' W. (x) The anchorage is sheltered, and has depth for any class of vessels. The islets are situated at the entrance to the bay

MANDINGO (Gour), Caribbean Sea. See PLAS (BAH) **MANDINGOEA**, a well known tribe of W. Africa, remarkable for their intelligence, and, generally for the advances they have made in civilization. The original country of this people, who are now spread over a great portion of W. Africa, was the N. slope of the high table-land of Senegambia, between the head water of the Niger and Senegal. Their language is more widely diffused, and more employed by translators than that of any of the other languages of W. Africa. The personal appearance of the Mandingos is prepossessing, their features are regular and open, their figures well formed and strongly, averaging a height rather above the common. The costume of the Mandingos is extremely plain simple, neat, and becoming consisting of a cap, shirt, trousers, and sandals. Their religion is Mahometan, but they are not rigid in its observance.

MANDIVER, a seaport, Hindoostan. See MANDAVIA

MANDOW, a ruined city Hindoostan, prov. Malwah, 63 m. S.W. Oojonj lat. 22° 23' N. lon. 75° 20' E. 1944 ft. above sea-level, on the labular summit of one of the Vindhyan hills. The walls of this once celebrated city are said to be 28 m. in circumference. The style of the architecture is principally Afghan. The most remarkable remains are the palace of Shah Bahadur, an emblem, the Jahan-Ka-Mahal the Juma Masjid, the finest and largest specimen of the Afghan mosque to be seen in any part of India, and the mausoleum of Hussain Shah entirely of white marble. The prevailing material in the buildings is a calcareous fine red stone. The scenery in the vicinity of the town is magnificent, and the vegetation luxuriant.

MANDU, or *Mandru*, a river, Brazil, which rises in a lake of same name, prov. Espirito-Santo; pursues a winding N.N.E. course through mountain valleys, and joins r. bank

Does, about 4 m. below the entrance of Escudonhas, after a course of about 100 m.

MANDURIA a tn. Naples, prov. Terra d'Otranto, dist. and 21 m. S.E. E. Taranto. It is on the whole a well-built town, though somewhat ragged and has several handsome churches, a large palace, six convents, and an orphan asylum. It suffered much from an earthquake in 1783. Considerable remains still exist of the old Manduria, destroyed by Fabius Maximus in the second Punic war. Pop. 4670.

MANERBIO, a tn. and com. Italy Lombardy gov. Milan, prov. and 14 m. S.W. Brescia, near r. bank Nola, here crossed by a handsome bridge. It has two churches, three chapels, and a weekly market. Pop. 3731.

MANERIVY par. Vales Fambrocks 300600 P. 966. **MANERIVY** a tn. Spain prov. Navarra in a valley of same name, near the Salado 10 m. S.W. Pamplona. It has a church, townhouse, two primary schools, several distilleries and a trade in corn and maize. Pop. 1104.

MANETIN [anc. *Manetina*] a tn. Bohemia circle and 18 m. N.W. Pilsen with a church a handsome palace, with extensive and well laid-out gardens, manufactures of woollens, and six yearly markets. Pop. 1112.

MANEWDEY par. Eng. Essex 9486 ac. Pop. 152. **MANHATTAN** par. Eng. York (N. Riding) 8456 ac. Pop. 455.

MANFRONDA a seaport in Naples, prov. Capitanata, dist. and 22 m. N.E. Foggia, at the foot of Mount Gargano, and on the gulf of its name. It is walled both on the land side and toward the sea, from which it is separated by a narrow ridge of rocks covered at high water. The walls are flanked with large round bastions, and the harbour, which a small mole shelters from the S. wind, is commanded by a strong castle. The water in it, however, is so shallow as only to admit small vessels. The town which has been built on a regular plan is remarkable for its symmetry though the unfinished state in which some of its edifices remain, give it rather a melancholy aspect. It has no manufactures, but a considerable export trade is carried on in fruit, particularly oranges, corn, and salt the last obtained from extensive lagoons S. of the town. The supply of water is very deficient, but vegetables and fish are both sold as usual. Manduria is the see of an archbishop. About a mile S.W. of it is the old town, originally Saponaria, and to have been founded by a Greek colony under Dionysius. Here the cathedral belonging to the archiepiscopal see still stands. It is a Gothic edifice, of small dimensions, with a handsome portico, but without much internal ornament. The new town was founded in 1281 by King Manfred, natural son of the Emperor Frederick II. It enjoys many privileges, but, notwithstanding, continues stationary. Pop. 6000.

MANGA, a tn. Brazil prov. Maranhão near Itapicuru at the confluence of the Igara and Mendi Mirim. It has a church, a primary school, townhouse, and prison. In 1838, Kayanda Gomes, with his followers, broke open the prison here, let out the deserters and convicts, and, retreating to Vargem raised the standard of rebellion. Pop. dist. (agricultural) 3000.

MANGAIA or **MANOIRA**, an isl. B. Pacific Ocean, lat. 21° 57' S. lon. 156° W. [a.] It is of volcanic origin, about 20 m. in circumference, and sufficiently high to be distinguished at 25 or 30 m. distance above every abrupt. It has neither port nor road, but the sea is of great depth around it. The only communication with the land is by means of canoes, which alone are capable of clearing the narrow line of heavy surf separating the shore from the ocean. The productions of the island coconuts, figs, turkeys, fowls, ducks, yams, sweet potatoes, and pine-apples the last, however are not raised without much trouble and care. Mangaua was discovered by Capt. Cook, who attempted without success, to find a landing-place for his boats. Pop. estimated at 9000.

MANGALORE, a seaport in and fortress, Hindoostan, Malabar coast, prov. Canara lat. 12° 49' N. lon. 75° E. It is large, and well built, and stands on the edge of a fine salt-water lagoon which communicates with a river. The port will not admit of vessels drawing more than 10 ft. water except in spring-tides, but there is good anchorage off the mouth of the river, in 5 to 7 fathoms. The exports are principally rice, pepper, small fresh coconuts, and turmeric, the European sugar, salt, and piece goods. The inhabitants are chiefly Malabars

or Nipalis said to be descended from a colony of Arabs. Pop. 30 000.

MANGARATIRA, a small tn. and seaport, Brazil prov. Rio-de-Janeiro, W. side of a promontory which projects into the Bay of Angra-da-Bahia, and divides it into two. It has a handsome stone church and a considerable trade in the produce of the district, consisting chiefly in sugar, rum, coffee, tobacco, and rice.

MANGEEA an isl. S. Pacific. See **MANGAIA**. **MANGOO**, or **MARGAUD**, a tn. and com. Italy Piedmont div. Cuni prov. and about 6 m. from Alba, on a lofty height. It has three churches, one of them situated on a monastery a palace and a charitable endowment two silk mills, and a trade in sweet wine. Pop. 1817.

MANGOALDE, or **AMARA DA BARRA**, a tn. and par. Portugal prov. Beira-Alta, about 8 m. from Viseu. It has a large palace. Pop. 3184.

MANGOLA, or **MANGOL** (KULIA) one of the Xulla Is. Indian Archipelago, between Celebes and Ceram, lat. (N. point) 1° 47' S. lon. 126° 3' E. (N.) about 60 m. long by 10 m. broad. It is separated at the W. end, from Xullatoby by a narrow strait, in which is a dangerous whirlpool. This island was depopulated by war and is now an uninhabited waste.

MANGORO or **MANOROR** a considerable river: Madagascar E. coast, and near the centre of the island formed by several head streams which have their sources in the Ankaratra, Angavo and other mountains in the interior. It falls into the sea at lat. 20° S. This river is nearly as broad as the Loire in France but not so rapid and is navigable a considerable distance into the interior. It swarms with alligators.

MANGOTSFIELD par. Eng. Glouster 3551 ac. 1. 3967. **MANGUEIRA** a lake, Brazil prov. São-Pedro do Rio Grande, between Lago Mirim and the ocean. It is of a long and narrow shape, 90 m. long and only 4 m. broad. It discharges itself into the sea, by a small stream called Taim.

MANGYFLOO, a vil. Austria, Slavonia, co. Syrmia about 4 m. from Csepeln. It has a Greek church, and numerous mills. Pop. 1061.

MANICH a tn. Central Asia latitude 50 m. N.W. Khiva. It stands tolerably high, and is surrounded by a dilapidated wall. It consists of about 150 houses, has nine mosques, 40 shops, and is inhabited chiefly by Uzbeks, who live chiefly by agriculture and fishing.

MANHU a river Brazil which, at various points separates provs. Minas-Geraes and Espírito Santo. It runs in the former prov. at some distance S.E. from the town of Pomba, and pursuing a N.E. course for about 250 m. joins r. bank Doce. Its principal affluent, which it receives on the right, is the Pomba. Various tribes of Indians inhabit its banks, and gold-mines were worked near them.

MANI an Indian vil. Yucatan 57 m. N.E. Campeche at which are numerous ruins of a former considerable town the most important are those of a church and convent amongst the grandest of these early structures erected in Yucatan, and built upon the ruins of still earlier edifices.

MANIACO or **MANIAGO GRANDE**, a tn. and com. kingd. of Italy gov. Venetia, prov. Friuli and 23 m. N.W. Udine, in a plain near Mount Jof. It has two churches, and manufactures of various articles of hardware and cutlery particularly razors and surgical instruments. Pop. 8500.

MANICA a tn. and small state or district, S.E. Africa, territory Mosoutapa. The town is situated near the source of the Manoro, or Aranza, lat. 18° 45' S. lon. 32° 50' E. The district is mountainous, but in many parts fertile. Gold, though now much more scarce than formerly is obtained here in considerable quantities, both by mining and washing. The gold is exchanged for Beate cloth, beads, silk, and iron.

MANICK, a river, S.E. Africa, sometimes called King George's river falls into Delagoa Bay about lat. 25° S. Its sources are unknown, but it has been explored for about 60 m. from its embouchure S. and found to have a N. direction, running nearly parallel to the sea-shore, its water is fresh close to the mouth, and the current runs in many parts twice and a half miles an hour. The river at its entrance, forms several islets, with narrow channels between, and an inconsiderable depth of water. The islands are swampy and covered with mangroves, as is also the S. bank, but its oppo-

sites is parched and sandy with scarcely a patch of vegetation. Further up, however, the appearance of the country improves, the soil becomes rich, and it is well cultivated, and the inhabitants, who are numerous, seem to be living in abundance and comfort. Rice is the principal production. Beyond the cultivated tract the banks of the river become low, and their vicinity, in general, a stagnant and fœtid swamp.

MANICOUAGAN, a lake, river, and bay, Lower Canada. The river flows S. for about 150 m. from the lake to the bay of same name, in the St. Lawrence, in lat. 46° 12' N., lon 68° 5' W.

MANIGOU a vil and com France dep Haute Savoie, prov Geneva in a valley between lofty mountains E. S. E. Annecy. It has a handsome church, an elementary school, a charitable asocw ment, and a trade in wood cattle, butter and cheese. Pop. 1691.

MANIKYALA a vil Punjab lat. 33° 54' N lon 73° 9' E. remarkable for an antique monument of great dimensions, supposed to have been a shrine of Buddha. Manikyala is supposed to occupy the site of the Taxila of the Greeks.

MANILA (Latin, *Manilla* French, *Manille* English *Manilla*), the cap city of Isl Luzon and of all the Philippine islands, one of the R. Lathioh primate, and one of the great emporiums of the P has in lat. (celestial) 14° 33' N. lon. 121° E. (s) on the bay of the same name, and at the mouth of the river Pang, which is here crossed by a bridge. The city proper forms the segment of a circle between the river and the sea, and its suburbs extend over numerous islets

the foreign merchants and the great centre of trade. The aspect of the whole is at once Spanish and Oriental long lines of heavily-moored batteries admire churches, and angular towers, and massive houses of solid masonry, mingle with airy cottages in groves of tropical trees, raised on posts

THE CRUISE OF HUNGARY MANILA.—From Valdez, Voyage autour du Monde.

to permit the free passage of the waters in the rainy season, and so constructed as, by their slanting to stand the shock of an earthquake. The streets are straight, but, for the most part, unpaved, and, during the rains, almost impassable. In the city the houses are two stories high, and each has its central court yard. Stables, storerooms &c., occupy the ground floors above are the public and sleeping-rooms. In the windows opening on the balconies small squares of semi-transparent shell are substituted for glass, and temper the intense light of the sun. Here reside the heads of the state, church, and army and all who would be thought of the aristocracy. No foreigner may sleep within the walls. A bridge leads across the river into the Rincón suburb where a street, called the Escalita, runs to the right and the left, lined with innumerable shops and stalls and crowded with a strange and motley population of various races. By law the Chinese ought to be dispersed over the country to till the ground, yet here many of the merchants and shopkeepers, and all the artisans are of that nation. Infinitely exceeding the Tagalogs in activity and address, they are disliked, but are indispensable. Here too, each trade has its own locality. Beyond the Escalita, a swarm of Chinese Indians and Moles (half-castes) appear as goldsmiths and jewellers, painters and emallers, oil and soap merchants, confectioners, and keepers of gambling-houses and cock-shops. Other suburbs have each its special character. San Fernando is the seat of one of the great sugar manufactories, and Santa Mesa of a steam-cargo manufactory at the Alcazaria the Chinese steamships discharge their cargoes. Fishermen and weavers inhabit the division of Tondo, and its gardens supply the markets with fruit and vegetables. Malate is famous for its embroidery. Pasig is inhabited by artisans and artists, convalescents resort for health to Santa Ana and San Pedro Macati; the Chinese burying-ground attracts the curious to Bancanay and near it stands the Lepers house a frightful receptacle for sufferers from elephantiasis St. Anthony's fire, and various other vile diseases.

The principal public buildings are the cathedral, the palace of the governor and the archbishop, both extremely ample; a beautiful townhouse, ten churches, belonging to different religious orders, but open to the public several monasteries, convents and boarding institutions for females in which there are no vows; the arsenal; three colleges for young men and two for young women the supreme court, prison, civil hospital, St. Thomas's university, a machine and a commercial school, a large theatre, built entirely of wood, and held toge-

formed by the river and its branches, and easily reached on all parts by boats. Behind lies an extensive plain, which rises into several hills, and then again into mountains, some thousand feet high, and clothed with vegetation to their summits. The Pang, the steps leading down to which are crowded every morning with bathers of both sexes, is prolonged into the bay by two piers, terminating the one in a small fort, the other in a light-house. Vessels of some hundred tons may come up as far as the bridge. On the S side stands the city, having a dilapidated look, but strongly fortified with walls and ditches. On the N stands the Rincón suburb, more populous than the city itself, the residence of

these with henebun pine and native fastenings; the custom-house and barracks. The city has several squares, in the largest of which the Prado, there is a bronze statue of Charles IV. The cemetery is remarkable for its pretty garden and small beautiful church. The environs of Manila are beautiful and picturesque.

The royal and pontifical university of St. Thomas is in the hands of the Dominicans, and has an attendance of about 500. The college of St. Joseph belongs to the Jesuits, that of St. John Lateran, gives a plain education to 240 Indians and Mestizos. The Escuela Pia belongs to the city and is for Spanish children alone. A royal marine school was established in 1870, and a commercial school in 1840. The colleges of St. Potenciana and St. Isabella are for girls; the latter for orphans. The monasteries have libraries attached to them, still sciences and learning are at a low ebb and, though the clergy boast that the Indians are taught to read and write, they are low in point of intelligence and morals. When a foreigner lands at Manila, his luggage is searched for Bibles and pocket pistols, both being prohibited articles.

Manila is the seat of government, and of the supreme courts. The municipality dates from 1571. The city councillors are the constitutional advisers of the governor and captain-general. A tribunal of commerce was established in 1854 and a board of trade in 1835. The administration of justice is weak, and serious crimes frequent.

Admirably fitted by nature for trade Manila has been brought, by the political and legislative changes of the present century from a state of comparative obscurity to rank with Calcutta and Batavia. Its relations with Britain the U. States, and Australia, are rapidly augmenting. Being the only port in the Philippines open to foreign vessels, it is the centre to which all their productions flow and the resort of

shirts; mats and cigar-cases. The Ispal Indians are ingenious workers in metals and wood, notwithstanding the inferiority of their tools, they are excellent cabinet-makers and ship-builders.

Manila was founded by Legazpi in 1571. In 1645 it was nearly destroyed by an earthquake. In 1717, the seal of a governor in representing abuses, led to the murder of himself and his son in an insurrection. In 1763, it was taken by a British fleet, and held for 15 months. In 1808 an English house was permitted to establish itself there, a privilege extended in 1814, to all foreigners. The privileges of the Philippine company expired in 1854 and were not renewed. Manila has ever been a very loyal city and hence an almost total cessation of intercourse with the Spanish American republics. It has frequently been visited by severe and destructive earthquakes. The most recent of these visitations took place in the autumn of 1852. The first shock occurred on September 16th at 6½ p.m. and other four shocks were felt before midnight; they continued, at intervals, till the 30th of the same month and occurred again on the 10th, 11th, and 12th of October. Though, providentially only three lives were lost during all these repeated commotions, the loss of property was great, scarcely a building in Manila remaining uninjured, and many being completely destroyed. The effects of this earthquake were much more severely felt throughout the other parts of the island of Luzon than even in the capital. Pop. city 15,000, including suburbs, 140,000.

The bay is a land locked sea, having an entrance about 12 m. wide contracted into two principal channels—Buen Grande, 8 m. and Boca Chico, 3 m. wide—by the islands of Corregidor Cavallo, the Puercos or Hog islands and the Nan or Hayocan. It measures about 80 m. N. to S. and 25 m. E. to W., is surrounded by steep shores, and, besides the port of Manila, has on its shores those of Cavite and Mariveles both of which afford good anchorage. It receives numerous streams—(Malib, La Pila, Marikina, N. Hinkley's *Locality of Manila and the Philippines*, Wilkes *United States Expedition Voyage of H. M. S. Sumner*, *Poleta oficial de Filipinas, Octubre 1852*).

MANILA is a th. Spain Andalus, prov and 65 m. S.W. by W. Malaga, about 1 m. from the Mediterranean. It is poorly built, defended by a fort is composed of several irregular ill-paved narrow streets, and has a handsome church, chapel, two schools, and a coveyery. Agriculture and fishing making earthenware, bricks, and tiles, and trading in fish, brandy grapes, &c. are the chief occupations. Pop 1698.

MANILA is an Isl. Indian Archipelago, between the Isla Ceram and Borneo lat 3 17 S. lon 127° 28' E. It is high about 13 m. in length, and 6 m. in breadth, well cultivated and populous. The channel between it and Borneo called the Strait of Borneo or Manupa Passage is about 17 m. wide, clear of danger and destitute of soundings. On the S. side of the island is a fort, off which, and within a small inlet, there is anchorage close to the shore.

MANISA, or MANAR, [anc *Magnesia*], a city Asiatic Turkey, path, Amolida, near 1 bank Kodu or Harman, 30 m. N. E. Smyrna. It lies along the foot of a fine range of hills, backed by the almost perpendicular face of Mount Siphan. At apparently inaccessible places on this cliff are many entrances to artificial caves, cut in the shape of doors, evidently tombs of a very early date. The town which is in a thriving condition, is clean and neat, with tolerably wide streets, has a great many minarets, and numerous handsome public buildings, in this respect excelling Smyrna, particularly the principal khan, which is a remarkable and magnificent structure, of a quadrangular form solidly built in white stone, round a square and regular area which contains in its centre a copious fountain of pure water. Of the 18 mosques the city contains, two are stately imperial ones. In the square before each of the latter is a beautiful marble fountain, composed of the materials of some ancient work of art.

THE HARBOUR MANILA. From Valentia, Voyage autour du Monde.

an infinite number of colonial vessels of all sorts and sizes. It exports sugar, tobacco, indigo, Manila hemp and cordage, gold-dust, birds'-nests, coffee, mignon wood, masts and masts, hides, trapping articles—shell, cotton, rice, and colored money, and it imports British and U. States cloth, hardware, &c. French novelties and perfumery and a great variety of articles, tea, pottery, &c. from China. The value of British goods imported direct and through Singapore, China, and Australia, &c. amounted in 1846, to £261,184 being more than twice the value of the total imports in 1840, from all countries.

The manufactures of Manila consist chiefly of cigars and cheroots, a government monopoly which gives employment to several thousands both of men and women, of carriage from the flames of the cigars, and of which the best is made by steam machinery, the beautiful fabrics called pique, woven from the fibres of the pine-apple leaf, and afterwards exquisitely embroidered with gold or silver, and various other cloths made of the same filament, pure or mixed cotton

Cotton and silk goods, and goat-hair shawls, are manufactured here to some extent. The mountains about Magnolia were formerly famous for the production of the loadstone, whence the name magnet is supposed to have been derived P 26,000.—(Follow a *Joia Mitor* Chamey's *Engl. Siged.*)

MANIKES, a town, prov. and 4 m N W Valencia, c bank Turis, with a church, courthouse, two primary schools, manufacture of fine cotton and shawl ware, once important, but now declining, and several flour-mills. Pop. 1906.

MANITCH or **MANITON**, a river and lake, Russia. The river issues from the salt lakes of Obaki in the E. of gov Astrakhan, flows W N W expanding into Lake Maniton or Ilmen, and above a course of about 300 m joins the bank Don, a little above Old Toherkank. Its principal affluents are the Chavuruk, on the right, and the Kalama and Egorik on the left.—The LAKE is a long narrow expanse of brackish water of irregular shape, about 60 m. long, N W to S.E. and from 12 to 3 m broad.

MANITORA LAKE British N America, intersected by the parallel of 51° N and the meridian of 96° W. It is about 110 m. long and 30 m at its greatest breadth. Its communications with Lake Winnipeg by the Dauphin.

MAINTOULIN a group of islands, British America, stretching E. to W along the N shores of Lake Huron, and consisting chiefly of the Great Manitoulin or Beared Isle Little Manitoulin or Cockburn, and Drummond. Great Manitoulin 80 m long by 30 m broad, and with an area of 1600 sq m. is deeply indented by numerous bays has an elevated and very rugged surface, and at its W side, presents more majestic features than any other part of the lake. It appears to be well watered, both by streams and lakes. One of the latter, about 10 m long, by 7 m wide at its ends, connects towards the centre so as to have the shape of an hour-glass. Many of the precipices are covered with clumps of beautiful trees; and behind, in the interior, are large and dense pine forests. The prevailing rock is limestone. Little Manitoulin has a diameter of about 7 m and, in its general features, resembles Great Manitoulin though its elevation is rather less. The channel between them is about 8 m long, by 4 m wide. Drummond, 24 m long with a breadth varying from 3 to 12 m has an irregular surface, covered with large masses of rock. Towards the centre it attains the height of about 250 ft., and then slopes gradually to the shores, often presenting low white cliffs in broken lines. It is separated from the American shore, on the W by a strait, called the True Detour, which is scarcely 1 m wide, and forms the principal passage for vessels proceeding to Lake Superior.

MANJEE or **MANJER**, a Hindu festival, Bengal, prov. Behar at the confluence of the Gogra with the Ganges 46 m. W N W Patna. At the custom house here, boats ascending or descending undergo an examination.

MANKAREE, a to Celebes. See **MACAMAR**.

MANKEIRA a to Punjab, between the Jallum and the Indus, 50 m from the former, and about 30 m from the latter, lat. 31° 25' N. lon. 71° 50' E. It is surrounded by a mud wall and has a circular, built of burned brick.

MANLLEIK, a to British Columbia, prov. and 40 m N N.E. Borden, c bank Ter, with a church, hospital, and sulphur springs, manufacture of cotton and worsted goods, and a trade in corn and fruit. Pop. 1901.

MANNEBODERF (Hinter Aargau) a to and par Switzerland, can. and 16 m S E Zürich, E. shore of Lake Zürich. It is well built, and has several good houses, particularly the secondary school, also a post-office and a cotton-mill, considerable attention is paid to the raising of fruit. Pop. 2368.

MANREH, or **MANROH**, par. Sect. Poobles, 17 080 sq. Pop. 258.

MANNEBODERF a market in Lower Austria, 19 m. S E Vienna with a church, a castle, and manufacture of steel, wire, and lace, out of which various articles are made, and sold chiefly in Hungary and Turkey. Near it are excellent stone quarries. Pop. 1900.

MANNEBODERF a mountain-chain, Austria, which commencing on the frontiers of Moravia, stretches S.E. through Lower Austria, along the bank of the Gross Kamp, and terminates on the E. bank of the Danube. It forms a series of broad ridges, of moderate elevation, generally well wooded, and has a length of nearly 60 m. It gives its name to two Austrian districts, which are situated on either side of it.

Vol. II

MANNHEIM, a to Baden, cap. circle Upper Rhine, r bank Rhine, between it and the Neckar, and in a situation so low that a high dike has been constructed to protect it from inundation, 66 m. S.S.W. Frankfurt. It is of an oval form is entered by three principal gates and is built with the greatest regularity—13 streets running parallel to each other from N to S. and 10 crossing them at right angles from E. to W. The whole town is thus divided into a great number of square sections, of a uniform and somewhat monotonous appearance, and as these sections only are named, and no names are given to the streets, a stranger has considerable difficulty in finding his way. The number of public squares is 14, almost all of them adorned with fountains, which how ever, are not well supplied with water. Several of the squares are handsome but the most deserving of notice are the Parade and the Planken. The principal buildings are the castle or palace, a huge quadrangular structure of red sandstone, not possessing much architectural merit, but with a tolerable museum in one of its wings, and good gardens behind it, terminating in a raised terrace, which overlooks the Rhine the church of the Jesuits, an imposing edifice, with a profusely decorated interior behind this church is the observatory a very complete structure of its kind in the form of a somewhat monotonous tower, 107 ft. high, the theatre, a large quadrangular building of three stories, in which Schiller's *Robbers* was first acted, the parish church, and the churches of Concord and Trinity, the synagogue, the townhouse, old mint, arsenal, barracks, merchants' hall and house of correction. The manufactures, consisting chiefly of carpets, linen and silk goods, trunks, liquors, starch glue, &c. are comparatively insignificant but the trade which had somewhat decayed, has recently been very much extended, and Mannheim is now the first commercial town in the grand duchy. Thus it owes to its admirable position on two important navigable rivers, and the additional facilities which it has acquired by the opening of the railway to Karlsruhe and Frankfurt. The principal articles of trade are tobacco, corn, wine, wood, hay, &c. millinery, broom-making, &c. The commerce and transit trade is particularly active. Mannheim was once strongly fortified, and lying not far from the French frontier and near the centre of military operations, was repeatedly the object of attack, and suffered dreadfully during the wars between France and Germany. In a siege by the Austrians, in 1793, only 14 houses remained uninjured. Hence, notwithstanding the antiquity of its foundation, it has become an entirely modern town. Pop. 53,343.

MANICOULO, or **FIVE ISLANDS**, See **VANICORO**.

MANNING RIVER, a river, New S. Wales, which rises about lon. 151° 50' E. flows E., along the N. limits of co. Gloucester and falls into the sea, by several outlets, in lat. 32° S. The scenery on this river is beautiful, and the soil excellent.

MANNINGFORD, two par. Eng. Wilts.—1 (Abbots') 519 ac. Pop. 118.—2 (Buses) 1088 ac. Pop. 375.

MANNINGTON par. Eng. Norfolk, 546 ac. P. 12.

MANNITREE, a market and par. Eng. Lancashire, 8 m N by E Colchester. The former on the S. bank of the Stour is paved and lighted, has a church Baptist, Independent and Wesleyan chapels, and a national school. The malt trade is carried on extensively. Area of par. 115 ac. Pop. 1176.

MANNU, a river, Isl. Sardinia, formed by the union of three small streams, 9 m. N. S. S. It flows S., receiving the *Santulana* on the right, and the *Sixeria* on the left, and, after a course of about 45 m. falls into the Gulf 6 m. N W of the town of Cagliari.

MANOE, an isl. Denmark, off N W coast Schleswig, 10 m S W Ribe. It is the largest and only inhabited island of a small group, which altogether have only an area of about 4 sq. m., and form a single parish. They are supposed to have been originally a single island separated from the mainland by a narrow channel, and to have been broken up into their present form by the forces of the waves. The idea is confirmed by the shallowness of the channel, which becomes so dry at low tide that the island is accessible on foot or horseback. Pop. 500.

MAVOEL ALVES, three rivers, Brazil, in the N of par. Goyas. They all join r bank Tocantins. The first is frequently called Manoel Alves-Mardonal, but more properly

37

Lake Alred. The second is merely a small stream, which takes a N. course, and joins the Tocantins a little above the point where that river is joined by the Bombo. The third and largest of the whole, called the Manoel-Alves-Baptist-run river in the mountains between *provs. Pernambuco and Piaui*, and proceeding W N W becomes a majestic river by the augmentation of numerous small streams, and finally after a course of nearly 400 m., joins the Tocantins, about 160 m. below the confluence of the Bombo, and above the town of São Pedro d'Alcantara. Only the lower part of its course is properly known: it appears to form the natural boundary between *provs. Goyas and Maranhão*.

MANOEL-ILHA, an isl. Brazil, on N. E. coast, prov. Rio-Grande-do-Norte, near the mouth of the Açu or Appodi. The inhabitants carry on a considerable trade in salt, and in dried and salt fish.

MANOYO ISLAND, one of the Navigator Islands, S. Pacific Ocean, lat. 18° 50' S. lon. 173° 3' W (a). It is of volcanic origin, about 4 m. in circumference, and, at the highest part, 473 ft. above sea-level. It is covered with forests, as the station of an English missionary, and has about 1100 inhabitants.

MANOPELLO, or MANTUPELLO, a tn and com. Naples, prov. Abruzzo-Citra, dis. and 12 m. S W Chieti P. 2708

MANOR-HAMLET, a market tn. Ireland, com. 22 m N Lethin. It has a handsome market-house, considerable barracks, a dispensary, a union workhouse, and a bridge with courteous attached, a handsome church, a R. Catholic chapel, and two dissenting-meeting-houses, and several schools.

Near it, on a gentle eminence, stand the ruins of the castle once the largest and strongest fortress in the county P. 1778

MANORBIER or MAXORBIER, par. Wales, Pembroke 3493 ac. Pop. 604

MANOQUE, or N. par. Wales, Pembroke 1266 ac. P. 189
MANOSQUE (Latin Mennocens), a tn. France, prov. Alpes, dis. 19 m. S W Digne. It is a strong, thriving little place, surrounded by a handsome wall, market place, and silk mills, tanneries, distilleries, manufactures of grape syrup, linen, gages, and grugram yarn, and a considerable trade in wine, brandy, olive-oil, silk, wool, &c. *Mannosque* owes its origin to the counts of Forcalquier, who built a palace and afterwards conveyed both it and the town to the Knights of St. John of Jerusalem. The body of Gerard Jung, the founder of this order, was long preserved here. Pop. 4714.

MANRESA (Jana, Maresca), a city Spain, Catalonia, prov. and 34 m. N W Barcelona 1 bank, Girona, on several hills. It is well built, surrounded by old walls, commanded by a fort, and has clean and well-paved, though, in many cases crooked and steep streets, numerous squares, a college, and parish church, with a noble tower, several chapels, three convents, an hospital, orphan asylum, town and court houses, prisons, barracks, a college, and some primary schools, a theatre, and, in the environs, along the bank of the river, a pleasant promenade. It likewise possesses considerable manufactures of linen, woolen, cotton, and silken fabrics of all kinds, also of cutlery, hardware, earthenware, leather, soap, cordage, paper, gunpowder, brandy wine, and oil, and a good trade. Pop. 18,350. (Mades and Melado.)

MANS (Lut) (Latin, Mundus Commenius), a tn. France, cap. dep. Sarthe, on the ridge and slope of a hill, washed by the Perthe, which is here crossed by three bridges, 112 m. S W Paris. The lower part of the town, near the banks of the river, is poorly built, and the streets are so narrow and winding as to be almost unfit for carriages. The upper part of the town has a much better appearance. It is not regular, but the houses are well built of terra cotta. The streets are spacious, and the market-place, into which most of them open, is both very large and handsome. There are two finely planted, and well-kept-out public walks. The principal building is the cathedral, a fine Gothic structure, with a very old choir supposed to be of the 10th century, a lofty, massive square tower, a finely-embellished portal, a noble organ, and some painted glass, which, from its antiquity is of considerable interest in regard to the history of the art. The other buildings deserving notice are the churches of Notre Dame and St. Antoine Vinteuille, the former in the shape of a Latin cross, and very ancient, the latter comparatively modern, but very handsome, the Prefecture, library of 40,000 vols., and museum, including a picture-gallery, all occupying part of the

buildings of an old monastery; the theatre, and cavalry barracks. The principal manufactures are linen, coarse wool, lace, and blankets, lace, hosiery, paper, leather, wax candles, and green soap. There are also bleachfields and worsted mills. The trade in clover and lucerne seed may be considered as the staple, and is very extensive, but there is also a considerable trade in linen thread, iron, salt, wine, brandy, chestnut walnuts, oil, wax, cattle poultry, &c. La Mans is the seat of a bishop, and possesses courts of first resort and commerce, a consulting chamber of manufactures, an agricultural and scientific society, a communal college, a diocesan seminary and a school of design. It is a place of great antiquity and is said to have been founded, in the second century, by the Romans, of whose buildings numerous vestiges still remain; among others, a considerable part of the walls with which they surrounded it, and of three subterranean aqueducts, by which water was conveyed from a distance. It was taken by William the Conqueror in the 11th century, and long continued, though with occasional interruptions, in the possession of the English, whose King Henry II. the first of the Plantagenets, was born in it. In the Revolutionary war the Vendéens sustained one of their worst defeats here, and were ultimately massacred, without distinction of age or sex to the number of 10,000. Pop. (1802) 23,779.

MANSELL, two par. Eng. Hereford 1, (Gosse) 1323 ac. Pop. 118 - 9 (Long) 1847 ac. Pop. 807

MANSEK, an Aramo Tisbury. See MARKS

MANSELD, a tn. Prussian Saxony gov. and 80 m. N W Merseburg, cap. circle, on the Thallus, at the foot of the Schlossberg, which is crowned by a strong castle. It has a church, hospital, and school, and near it, are several smelting furnaces. It is the original family seat of the famous Count Mansfeld. Pop. 1439. - The circle is mountainous, and rich in minerals. Area, 172 sq. m. Pop. 44,666.

MANSEFIELD - 1 a vil. U. States Ohio, 60 m N W E. Columbus with a courthouse, jail, market place, six churches, and two printing-offices. Pop. 1838 - 2 an isl. British N America, Hudson's Bay; lat. (8 point) 61° 31' N, lon. 80° 25' W about 75 m long and 18 m broad.

MANSEFIELD, a market tn. and par. England, co. and 18 m N by W Nottingham. The town is on a deep vale on a branch of the Midland railway, has narrow and irregular streets, lighted with gas; a church, with a tower and spire, places of worship for Baptists, Wesleyans, Independents, Quakers and Unitarians; a handsome Grecian townhall, situated in the market-place, two schools, manufactures of lace, stockings, silk and cotton gloves, muslin, chert, and tobacco, an extensive trade in malt, and in cutting and working architectural ornaments the stone for which is obtained in the adjacent quarries. Market day Thursday. Area of par. 8070 ac. Pop. 10,627

MANSEFIELD WOODHOUSE a vil. and par. England, co. North. The village is 2 m N Mansfield, is well built and contains several respectable houses, a church, Methodist chapel and two charity schools, and has considerable manufactures of cotton, lace, &c. Area of par. 2860 ac. P. 1872

MANSEFIELDSTOWN, par. Del. North 2416 ac. P. 652

MANSI L.A. (De Las Mulas), a tn. Spain, prov. and 15 m S.E. Leon 1 bank Esla, tolerably well built; with a church, townhouse, prison and two schools. Pop. 1921

MANSFON, par. Eng. Dorset 1233 ac. Pop. 184

MANSURAH a tn. Lower Egypt, r. bank Delta branch of the Nile cap. prov. of same name 85 m S W Ichnusa, lat. 31° 2' N lon 31° 25' E, beautifully situated on an eminence, and adorned with numerous mosques. It has narrow streets, with houses built of brick, but the greater part of it is in ruins. Its trade is carried on chiefly by Syrian Christians, who export the fine rice growing round Lake Mansurah from which it is about 20 m. distant, and oil-muscle. The mode of catching shikars, by means of ovens, is carried on here to a great extent.

MANSURSE, a vil. Siberia, gov. and 110 m N.E. Irkutsk, on the road from that town to Yakutsk, on a small stream of same name, west of the Lena. It consists of ancient-looking houses, and is surrounded by the Kalvingang, at its confluence with the Dnepr, 6 m. E. Scherachai, has a church, and a trade in furs and garden produce. Pop. 1080

MANTA (La) a vil. and com. Italy Piedmont, dist. Coud, prov. and about 5 m. S Saluzzo, at the foot of a hill of same name, covered with chestnut trees and vineyards. It has an ancient castle, two churches a communal school, several silk-mills, manufactures of kitchen utensils, and a trade in cattle, mules, and silk. Pop. 1387.

MANTIGAR, a vil. Portugal, prov. Beira-Baixa, com. and 18 m. W S Guarda, at the foot of the serra Estrela. It has two churches, an almshouse, manufactures of woollen cloth and lace, and a trade in excellent butter and cheese. Pop. 2073.

MANTERDORF a market in Austria, duchy, circle and 55 m. S S E Salzburg with two churches, an old castle, finely seated on a height, and rendered still more conspicuous by a massive tower 140 ft. high. Pop. 1120.

MANTES [anc. *Machina*] a town, France, dep. Seine-et-Oise, 1. bank Seine, opposite to Limay, with which it communicates by two handsome bridges connecting the banks with an island in the river 23 m. W S Paris and a station on the railway from Paris to Rome. It contains a fine Gothic church, with two lofty towers, which make a conspicuous appearance at a great distance a beautiful Gothic tower, the only remains of the ancient church of St. Maclou a public library, and a secondary ecclesiastical school and has many features of leather and saltpetre, famous breweries, numerous mills, and a trade in leather, corn, and wine. Pop. 4400.

MANTINEA, an anc. in Greece, Morea, in a plain about 8 m. N Trophita, and famous for the victory which the Thebans, though with the loss of their celebrated leader Epaminondas, gained over the Spartans. The crest of the walls, with exception of a few towers, is still entire, but the city itself has long ceased to exist. Its site is partly occupied by the modern village of Paleopol.

MANTIQUERIA a Serra or mountain range, Brazil, containing the highest summits in the interior of that empire. It stretches E. to S. W., in the S. part of prov. Minas-Geraes, and appears to be the centre of various ramifications, extending into provs. Bahia, São Paulo, Goiás, and others. Its E. slopes are separated from the Serra dos Goyaz by the river Paranaíba and Paranaíba, and the former as well as the Parana Doce, and São Francisco, are tributary to it for numerous affluents. None of the summits exceed 8600 ft. It is crossed by several roads leading from Minas-Geraes into the more E. provinces.

MANTOV, two parts Eng. —1 Lincoln 4650 ac. P 198 —2 Rutland 1290 ac. P 273.

MANTUA (Italian *Mantova* French *Mantoue*) a town in Italy, Lombardy gov. and 80 m. E. S. E. Milan on the prov. same name on two islands formed by the Bianco which here divides into several arms and afterwards spreads out into a marshy lake or swamp, partly natural and partly formed by art. The stagnant water and marshes surrounding the town make its site very unhealthy, but constitute one of its most important defenses, and in connection with the formidable works which enclose it on every side and guard all its approaches have made it so strong that it not only ranks as the first fortress in Italy but is deemed impregnable by any means but force. The communication between the islands and with the mainland is maintained by means of several bridges—the longest of which, Ponte di San Giorgio, is regarded as a masterpiece, it crosses the entire lake for a length of more than 800 yards, and forms the principal approach to the town, which, when viewed from it, presents, in its huge piles of building, its castle, towers, and cupolas, a very peculiar and striking appearance. Mantua is entered by five gates—one of which, leading to a bridge or dam, called the Porta Marina, and deserving of notice as a curious specimen of ancient engineering, is an imposing Doric structure. The streets are regular and wide but in many places very indifferently paved the houses which line them are always substantial, often rising in huge masses, with rows of long and lofty arcades, fortified battlements, and feudal towers. There are few large squares the best are the Piazza di Virgilio formerly an immensurable swamp, but now drained, and converted into a fine park, laid out in finely-planted alleys, and enclosed by elegant mansions; the Piazza della Erbe, where the daily market is held. The Republic of Mantua, the Piazza del Argine, with a noble palace crowned by a bronze bust of Virgil; and the Piazza in which

the Tyrolsian patriot, Andrew Hoffer was infamously shot. The signs of departed greatness and continuing decay are very visible in Mantua. Near its centre, the population seems dense, and there is much appearance of activity, but in many other parts numbers of houses are untenanted, or in ruins and in the outskirts, grass grows freely on the streets. The most remarkable edifices are the cathedral, not very spacious, but after an elegant design by Giulio Romano, with a richly ornamented facade a fine Lombard campanile, row of beautiful Corinthian pillars, supporting a highly-decorated roof, and a great number of frescoes particularly one by Andrea Mantegna, the church of Santa Andrea, conspicuous from a distance by its majestic cupola and Gothic tower, enriched with numerous paintings, and presenting in its interior one of the finest specimens of the revived Roman or Italian style the church of Santa Barbara, containing the mausoleum of Carlo Gonzaga the church of San Sebastiano, a beautiful Italian structure, with some good frescoes in a dilapidated state 15 other churches several of them possessed of good paintings, but not otherwise remarkable two synagogues, one of which, called the Scuola Grande, is a handsome structure, recently completed the Castello di Corte, an ancient ducal palace of the Gonzagas, a huge, irregular pile, flanked by machicolated towers, the whole in a half ruinous state, partly used as a prison, and partly as public offices the Palazzo Imperiale (Imperial palace), an antique castellated structure, supported by lofty pointed arches, lighted by tall Gothic windows and terminated by forked battlements; the Torre della Gabbia, so called from an iron cage hanging from its centre in which criminals were wont to be exposed; the Torre del Orologio, and the Torre della Zuccato, the Beccaria and Peschiera, or almshouse and salt market, both built by Giulio Romano and admirable in their kind, the house of Giulio Romano the Palazzo Lottoreo with enormous caryatides supporting its facade the museum military arsenal, theatre, and elegant amphitheatre, the lyceum, gymnasium, ducal seminary and other public schools occupying the buildings of the old Jesuit college the infant and ragged schools the library of 80 000 volumes the extra, and two founding hospitals the Monastero di Polesina, the principal house of correction for the whole of Lombardy the penitentiary and several charitable endowments. The manufactures, of very limited extent, consist chiefly of leather, linen, silk, woollens, sail-cloth, carriages, barges, parchment, paper, cards, and soap. The trade is chiefly in the hands of the Jews, who have in a separate quarter called Il Ghetto, and form about one-twelfth of the whole population. The principal article of trade is silk. Mantua is the see of a bishop, the seat of a civil tribunal, and mercantile court, and the residence both of a military governor and of a provincial delegate.

It is said to have been founded by the Etruscans 400 years before the building of Rome. On the decline of the Roman empire it was pillaged by the Huns, afterwards taken by the Longobards and still later annexed to the exarchate of Ravenna. Charlemagne gave it its first fortifications. In the 11th century it was held in common with Ferrara, Modena, and Reggio, under the sway of the family of Canossa. In the beginning of the 13th century it became independent, and continued so till 1376, when it fell under the iron rule of Bonaccolini. In 1328 it found better masters in the Gonzagas, who first as capitans then as marquises, and finally as dukes of Mantua governed it with great ability and distinguished themselves by the splendour of their court, and their patronage of literature and art. After it had been thus possessed for several centuries, the last duke, by taking part with the French in the war of succession, was declared to have incurred a forfeiture, by withdrawing his allegiance from his huge lord, the Emperor of Germany, and accordingly on his death in 1708, the Emperor Joseph took possession of the duchy and annexed it to his other dominions. The fortifications of the town, previously formidable were completed, and put into their present form by the Austrians. Their strength was put to the test in 1796, by Napoleon, who, apparently hopeless of reducing it by any other means, contented himself with keeping it under strict blockade, till famine compelled the garrison to capitulate. Among the distinguished natives of Mantua are its neighbours, who by the name of Mantuanians are that of the Roman poet Virgil. Pop. [1849] 30 374. The province of Mantua is bounded N and E by that of

Brescia, W. Cremona, S. the Duchy of Modena, and the district of Genualia, belonging to the Duchy of Parma; R.E. Ravenna, and S. Verona. It consists of an extensive plain, mostly low, and in part damp and insalubrious, but generally of great fertility. It is divided into 17 districts. Area, 983 sq. m. Pop. (1848) 270,100.

MANUA or **OMAKOAOH** one of the Navigator isles, S. Pacific Ocean, lat. 14° 15' S. lon. 160° 26' W. (n.) It has the form of a regular dome, rising, in most places, precipitously from the water to the height of 800 or 400 ft., after which its ascent appears more gentle and even. It is 16 m. in circumference, well watered, and covered with luxuriant vegetation, and has many coconut groves on its N.W. side. The inhabitants are a finely-formed race, lively and well disposed, and nearly all profess Christianity. Their canoes are well made, 30 or 40 ft. long, very swift, and capable of containing from 20 to 25 persons. The island furnishes pigs, fowls, sweet potatoes, fruit, and some taro. The principal settlement is on the N.W. side, where there is anchorage for a small vessel. — (Wilkes *U. States Exploring Expedition*.)

MANUELA, a vil. and com. Spain, prov. and about 28 m. from Valencia, on a hill above r. bank Albufera. It has a church, townhouse, prison, and two primary schools, a flour-mill, and a trade in rice, which is largely cultivated in the district, and makes it unhealthy. Pop. 1028.

MANUAU **MANAKAO**, or **STONED'S HARBOR**, a bay N.W. coast of the N. I. of New Zealand lat. (Beacon Bluff) 37° 6' S. lon. 174° 52' E. It has a comparatively narrow entrance between two headlands, and then spreads out into a wide expanse called Manuka water bounded, on the N., by the district of Auckland. Towards the shore it shallows much and is encumbered by sandbanks.

MANULLA, par. Irel. Mayo 5464 ac. 1 op. 1387. **MANY** (Jama and Nant) two vils. Hungary, circle Thutcher Daube, co. and about 33 m. N.E. bish. Eisenberg. The former contains a church, and has a pop. of 2087 the latter is merely a hamlet.

MAVIONA (Nant) a vil. Hungary Thutcher Daube, co. and 18 m. from Tolos. It has a K. Catholic church and a trade in corn, wine, cattle, and tobacco. Pop. 1080.

MAVITTU a river and lake, Russia. See **MAVITCH**.

MANZANARES, a river, Spain prov. Madrid. It rises in the sierra Guadarrama, near the confines of prov. Segovia, flows S.E. and E. past Colmenar and Madrid, and falls into the Jarama, near Vaua-Madrid. Its bed is of sand, through which the water filters in summer leaving it almost dry, but sometimes the rain torrents descend in such a body from the Guadarrama Mountains, that, from a rivulet, the Manzanares becomes a mighty stream. Its course does not exceed 40 m. in length.

MANZANARES a tn. Spain, New Castile, prov. and 25 m. E. by N. Ciudad-Real r. bank Asner commanded by an ancient castle. It is walled well built, has a handsome Gothic church, several chapels, town and session houses, a prison, hospital, convent, a Latin and some primary schools, and a cemetery manufactures of linen cloth, serge, hats, soap, bridle lines, bricks, wine, and all and some trade in grain, wine, oil, and oranges, with Andalusia, Madrid, and Valencia. Pop. 2069.

MANZANERA a tn. Spain, Aragon, prov. and 24 m. S.E. Teruel. It has a church, a convent, a distillery, several mills, and a trade in corn and cattle. It was fortified by the Catholics in 1539, but shortly after obliged to capitulate. Pop. 1997.

MANZANILLA, a tn. Spain, Andalusia, prov. Huelva, on a height between the streams Carralón and Puerco. It consists generally of well built houses and spacious streets, contains a parish church, townhouse, prison, and two primary schools and has manufactures of cork, a distillery, several oil-mills, and extensive cellars for the wine produced in the district. Pop. 1721.

MANZANILLA — 1 A bay, Mexico, W. coast, dep. Guadalupe, dist. Colima, 180 m. S.E. Cape Corrientes, lat. 15° 3' N. lon. 104° 16' W. (n.) It has good anchorage, and communicates with the city of Colima, but it has not a single house, and is making no progress as a port, partly, probably on account of the unhealthiness, and the swarms of mosquitoes and sand-flies with which it is in-

festes. — 2 A point, isthmus of Panama, N. coast Caribbean Sea, high, steep, and projecting with two hummocks on it, lat. 8° 25' N. lon. 79° 32' W. (n.) — 3, (Llanos or New Bay), New Granada, isthmus of Panama, on the Caribbean Sea, a little to the E. of the mouth of the river Chagres. It forms a large, beautiful and secure roadstead, about 5 m. in width, with many coves and harbours within it, and a depth of water decreasing from 6 to 4 and 2 fathoms. It has neither steeple nor rock, may be safely entered day and night, and has, consequently become a favourite resort of ships of war, and steamers visiting that part of the coast. The shores are fringed with luxuriant coco-nut trees. — 4, A point Venezuela, fringed with luxuriant coco-nut trees. — 5, A point Venezuela, N. lon. 61° 4' W. — 6, A bay and point lat. Hayti, N.W. coast. The bay which is a little to the S.E. of the point, has excellent anchorage lat. 19° 45' N. lon. 73° W.

MANZANILLO a tn. and seaport, ist. Cuba, S.E. coast, 46 m. N.E. Cape de Cruz lat. 20° 22' N. lon. 77° 15' W. It has a good harbour, and a considerable trade. Nearly opposite are some keys of some extent. Pop. 5000. **MANZANO** a vil. and par. Italy Venetia, prov. Friuli on the Natisone about 8 m. from Palua with a parish and an auxiliary church, and several mills.

MAON an isl. Adriatic, off the coast of Dalmatia, about 24 m. N.W. Zara, about 5 m. long by 2 m. broad. It affords good pasture.

MAOUNA, or **TUTUULA** one of the Navigator isles S. Pacific lat. (N.E. point) 14° 15' S. lon. 170° 37' W. (n.) It is high broken, and of volcanic appearance 17 m. long and about 5 m. broad, highest peak 2337 ft. above sea-level. The spurs and ridges that form the high land are precipitous, steep-edged and frequently rise in mural walls from the water to a height of 800 to 400 ft. Above this height, the surface is covered with a luxuriant vegetation to the very top of the mountains the coco-nut tree, and tree-fern, give the principal character to this beautiful scenery but bananas, guavas, and orange trees are also numerous. La Perouse's expedition was attacked by the natives of this island and 11 persons slain hence it is sometimes called Manuana Island. Maoua is under several chiefs, each of whom rules over a town, district, or bay. — (Wilkes *U. States Exploring Expedition*.)

MAPARTOWN par. Irel. Louth 1440 ac. Pop. 263.

MAPPILO a vil. and com. Italy Lombardy gov. Milan, prov. and W. Bergamo. It contains a parish church which stands on an eminence above the village, and is well decorated and in the vicinity on the side of the mountain is a kind of calcareo-quartzite scorioles, resembling the Roman papyrus and much used for finer purposes. Pop. 1715.

MAPPERTON par. Eng. Somerset 1534 ac. P. 210.

MAPIMI a tn. Mexico dep. and 115 m. N.E. Durango, in a sterile uninhabited district, abounding with the precious metals, which have not hitherto been turned to much account. Pop. 8000.

MAPLE-DUNHAM par. Eng. Oxford 2878 ac. P. 609.

MAPLEBEECH par. Eng. North 1186 ac. Pop. 162.

MAPLEFURNWELL par. Eng. Hants 816 ac. P. 206.

MAPLEHEAD, two par. Eng. Essex — 1 (Green) 1929 ac. Pop. 494 — 2 (Little) 1062 ac. Pop. 367.

MAPOCHA a river Chili an affluent of the Mapo which it joins about 16 m. S.W. Santiago after a course, generally S.W. of above 80 m.

MAPOOTA a considerable river of S.E. Africa. Its sources are unknown though conjectured to be in the country of the Makotse, somewhere about lat. 26° S. It flows in a general N.E. direction and falls into Delagoa Bay S. side, about lat. 26° S. It is intricate at its entrance, but a vessel drawing 10 ft. water may with care, ascend it for 80 m. It swarms with hippopotami and alligators.

MAPPERTON par. Eng. Dorset, 804 ac. Pop. 85.

MAPPLETON, two par. Eng. — 1 Derby 778 ac. Pop. 200 — 2 York (E. Riding) 4971 ac. Pop. 449.

MAPPOWDER par. Eng. Dorset 1187 ac. Pop. 280.

MAE-MEXON a lagoon, Spain, prov. Mexico extending N. from Cape Palos about 14 m.; greatest breadth about 5 m. separated from the Mediterranean by a sandbank about 800 yds. broad. Fine mullet are caught in the lagoon, chiefly at the narrow opening by which it communicates with the sea.

MARA ARABARI, or YILGAMARA, a vil. isl. Serdina, div. and prov. Cagliari, s. bank Caralis, with several churches, a primary school, and a trade in corn and wine. Pop. 1981.

MARA CALANOVIS, a vil. isl. Serdina, div. Cagliari, not far from Sinal; with an ancient church of three naves, and three minor churches, but the inhabitants, nevertheless, sunk in ignorance and barbarism. Pop. 1776.

MARACAYBO or MARACAYBO, a fortified city and seaport, Venezuela, cap. prov. of same name. W. side of the entrance to the Lake of Maracaybo, from the gulf of the same name, lat. 10° 40' N. lon. 71° 45' W. A number of the houses are built with chalk and sand, and thatched with a kind of reed which grows on the banks of the lake, and which is preferred to tile, on account of its coolness though it renders the danger of fire very great besides giving the town a very mean appearance. It contains a parish church, a large and very handsome structure, several convents and monasteries, and an hospital. The harbour of Maracaybo is deep, but is obstructed by a bar on which there are only 10 ft. water at high tide, and but 7½ ft. at ebb. The number of vessels that entered the port in 1847 was 55. Value of cargoes, £267,777. Cleared in the same year, 90 values of cargoes, £17,877. Of the foreigners that entered 13 were Americans, and four only British. The total amount of imports, for the same year was £28,998 and of exports, £104,564. Pop. 14,000.

—The province extends around the shores of the lake or lagoon of the same name. It is generally low and unshelving and left almost entirely to the native tribes. The climate is excessively hot. —The LAKE is of an oval form, about 98 m. in length, 80 m. wide at the broadest part, and about 350 m. m. circumference. It communicates with the Gulf of Maracaybo, in the Caribbean Sea, by a channel about 18 m. long, and 3 m. broad at the narrowest part, which is opposite the town of Maracaybo. It has a considerable depth of water, except towards the shores, but the bar which obstructs the access to the port of Maracaybo before spoken of, almost always closes the stream, where it unites with the sea. The waters of the lake are fresh and sweet, from the number and magnitude of the rivers that fall into it, but when strong N. breezes prevail it becomes brackish towards the N. end. The number of rivers that fall into it, on all sides, is very great, and some of them are of considerable size. Amongst the latter are the Zulia, Chama, Motatan and Paria. —The *ORCA* is in the Caribbean Sea entrance between Cape San Roman and Point Espada the former in lat. 13° 11' N. lon. 70° 7' W. (s.), and the latter in lat. 13° 4' N. lon. 71° 10' W. (s.). It is about 60 m. wide at the entrance and about 90 m. in length southward to the channel which communicates with the lake of the same name.

MARAGHA, or MARAGA, a tn. Ierba, prov. Azerbaijan on an affluent of Lake Urmiah 50 m. S. by W. Tabriz. It covers a very large area, partly covered with houses, and partly occupied by extensive gardens is surrounded by walls flanked alternately with square and round towers, is well built and has a splendid bazaar and bath. Its principal trade is in a white marble, not so thin as to become transparent, and he occasionally used for windows. There are fine extensions in the vicinity. Pop. about 15,000.

MARAGOGIPI, a tn. Brazil, prov. Bahia, l. bank Guanabara near its junction with the Paranaíba, 60 m. E. W. Cachoeira. It is finely situated and the houses, though of earth wall built, and of shabby appearance. It has five churches, a courthouse, a Latin and two primary schools and a trade in manioc, sugar, and tobacco transmitted by small streams into the Paranaíba, and thence to Bahia. Pop. 8000.

MARAIÓ, an isl. Brazil, prov. Para, in the mouth of the Amazon, between the towns of Mampá and Pont. Tylone greatest length, E. to W. 170 m.; greatest breadth, 150 m. The surface is flat, and is watered by the Moudin and Araxá, both of which are tidal streams, and navigable. The soil though somewhat swampy is fertile, and well adapted for raising all the products of the torrid zone. The inhabitants, who are all of Indian extraction, raise large quantities of rice, but their chief wealth is in cattle. Pop. 30,000.

MARAKAH, a tn. Egypt. See DOWSOA (NEW).
MARABALA, or MARABAYA, an isl. coast of Brazil, prov. Rio-de-Janeiro, forming a long and narrow belt of sandy ground, stretching about 30 m. W. to E., between the Atlantic and the Bay of Santa Cruz, and having a breadth which no-

where exceeds 8 m. In E. extremity is separated from the mainland by a narrow channel, abounding with shalows called Barra do Guaratiba. Its W. extremity terminates in a sandy tract, called Morro da Marabala, and is separated from Ilha Grande by a channel about 6 m. wide, forming the entrance into the Bay of Santa Cruz, and possessing depth sufficient for vessels of 250 tons. It is inhabited by 1630 Tupia Indians, who live solely on fish, manioc, flour, and salt. Some sugar-cane is grown, and breadly distilled, and there is a church on the island, substantially built, in 1760, of stone and lime.

MARANGANE, a vil. B. L. coast, Africa, 8 m. from Quailmane, on a slightly elevated piece of ground. It is stragglingly built, inhabited solely by slaves who cultivate a tract of land in the vicinity for their masters. Extensive groves of orange and acacia-trees surround it.

MARANHÃO, a river, Brazil, which has its source in Lake Formosa, in the serra Itapicuru, and in the serra Falsa da Costa at the foot of the serra das Furnas in province Goyaz, and flowing first N. W. and then N. N. E., unites with the Tocantins-Paquana in forming the greater river of the Tocantins, usually known by the name of the Tocantins-Grande. Some geographers make the course of the Maranhão much longer, giving its name to the united stream as far as the junction of the Paranaíba, in lat. 12° S. The Amazon originally had the name of Maranhão. The present river must not be confounded with it.

MARANHÃO or MARANHAU, a maritime prov. in the N. of Brazil, so called from the name originally given to the river Amazon bounded N. by the Atlantic, E. and S. E. Piauí, S. W. Goyaz, and N. W. Para lat. 1° 22' to 10° 30' N. lon. 41° 30' to 48° W. Area, 94,900 sq. m. The E. half of the coastline forms almost a continuous straight line, unbroken by a single indentation of any magnitude; the W. half, on the contrary, contains several bays, particularly those of St. Marcos and St. Jose, forming the respective embouchures of the Itapicuru and the Meirim, and situated on the opposite sides of the lake of Maranhão. The surface has the highest elevation towards the S. and S. W., and slopes more or less gradually N. N. E., till it terminates in extensive plains. The principal rivers are the Paranaíba, which bound the province on the E., but does not receive any important affluent within it; and the Itapicuru and Meirim which traverse it centrally S. to N. and directly or by their numerous affluents, carry off the greater part of its drainage. There are several lakes, but the only one of any consequence is Mata. As the province lies almost under the equator day and night, throughout the year, differ little in length, and the climate is extremely hot. Thunderstorms, also are of frequent occurrence in November and December and continue occasionally to occur till March. A considerable part of the surface is occupied by forests, which yield excellent timber, and ornamental and dye woods, that, by means of numerous small streams, are floated into the larger rivers, and thence conveyed to the coast, forming important articles of trade. But the chief sources of wealth to the inhabitants are their cultivated crops, of which the most important are rice, cotton, and the sugar-cane. Much of the produce of the last is converted into spirits. The principal fruits are various species of palm, bananas, pine-apples, and mangoes. Ginger, yalap, ipseacouma and other medicinal plants, grow spontaneously. The parts of the province lying between province Piauí and the river Meirim, are tolerably well peopled by Brazilians or Indians, amongst whom civilization has made considerable progress. But from this river W. to the frontiers of Para, a great part of the country is in possession of Indians, who are still in a state of nature. For administrative purposes the province is divided into nine comarcas—Alcantara, Brejo, Caxias, Chapada, Guimaraes, Ilha do Maranhão, Itapicuru, Peste-Bona, and Ylana, subdivided into districts, which take their names from the principal towns in them. It appoints four deputies to the general legislative assembly and two senators. The provincial assembly composed of 38 members, holds its sittings in São Luis or Maranhão. Pop. 390,000.

MARANHÃO MARANHAM, or São Luis, a tn. Brazil, on a shoal prov. W. side island of same name, 790 m. E. Belém or Para, and 280 m. W. Coara or Fortaleza, lat. (estimated) 3° 41' 42' S., lon. 44° 18' 42' W. On the E. side it is surrounded by mountains, which form a kind of

natural fortress the town, in that direction being accessible only by narrow passes, which a few troops could easily defend against any number of assailants. On the N and S, it is encircled by the steep straits like Penedico and Mambo, which rise and fall with the tide. At the mouths of these two rivers is a basin, accessible, at high water, to vessels drawing 20 ft., affording fine shelter, and defended, at its entrance, by a series of forts. The town itself is built on unequal ground, but with considerable regularity and as almost all the houses have gardens attached occupies a much larger space than its actual population might seem to require. The streets cross each other at right angles, and are paved, and the houses, at least in the principal thoroughfares are of two stories generally provided with balconies, and have a handsome appearance. The principal edifices are the cathedral and episcopal palace, magnificent structures, both built by the Jesuits, the one as their titular church, and the other as their college the governor's palace, the townhouse and prison the custom house, treasury, college, the richly-endowed hospital *de Misericordia*, and two other hospitals, and various churches, *capuchins*, and numerous. The trade is of great importance, the provinces of Para, Minas, Ceará, Rio-Grande-do-Norte, and Goias, having been their regular sources of supply. The principal exports are rice, cotton, rum, medicines, and *marcote* *de tartarugo*, a kind of butter made of tortoise eggs. The imports consist of various articles of European manufacture. Maranhão is the seat of the provincial legislative assembly the residence of the provincial governor the see of a bishop, and possesses a lyceum or college in which the ancient and modern languages, rhetoric, geography, grammar, philosophy, mathematics, design, navigation and astronomy are taught a commercial school and a botanical garden principally designed to promote agriculture by furnishing cultivators gratuitously with new seeds and plants. Owing to the hills around the town the air is somewhat confined and the heat extreme. Epidemic diseases are not prevalent, but the purity of the air is much affected by the nuisance arising from stagnant pools which are chiefly left by the retreating tide. Pop. 20 000 —

THE ISLAND lies between the bays of São-José on the E. and São-Marcos on the W. On the E. it is separated from the mainland by a channel called the Rio do Mosquito on the N. It is washed by the Atlantic, greatest length N. E. to S. W. 23 m. greatest breadth, 20 m. Its surface is more elevated than that of the mainland and on the E. side is broad by rock, which makes access to it difficult. It is well watered, and the soil is generally fertile, and produces, in abundance, rice, tobacco, manioc, millet, and pumpkin. Pop. 40 000

MARANO — 1 A maritime in Italy Venetia, gov. Venice prov. Friuli 21 m. S. N. E. Udine on a tongue of land, once fortified among the lagoons of the Adriatic. It contains a parish and two auxiliary churches. Pop. 1000 — 2 A vil. Italy The Marches delago and 11 m. S. E. Verano on the Adriatic, with wine, olives, and milk culture. P. 1600 — 3 A tn. Naples, prov. and about 4 m. N. W. Naples. Pop. 6800 — 4 A tn. Naples prov. Calabria-Citra, dist. and 6 m. W. Cosenza. Pop. 4000

MARANON a river S. America. See AMARON

MARANON (Latin, *Marechnon*) sin. *Francia*, prov. Charente-Inférieure, at the confluence of the Sèvre-Niortaise and the Vendée, 13 m. N. W. E. La Rochelle. It is surrounded by marshes, which notwithstanding the efforts that have been made for the purpose, are very imperfectly drained. It is, however, regularly built and well situated for trade. The tide ascends about 2 m. above the town but the water at the quay does not admit vessels of above 100 tons. Those of larger burden are obliged to discharge below. A maritime canal has been commenced, which will open the navigation to vessels of 300 tons. The principal trade is in grain, other articles are oleaginous, lacustrine and clover seeds, wine, brandy, hemp, flax, bogus, wood for fuel, ship timber, and particularly, a kind of flour called *marais*. A good deal of salt is obtained from the salt marshes in the neighbourhood. Pop. 5500

MARASH a pass Asiatic Turkey, bounded N. by that of Rivas, W. Karamania, S. Aleppo, and E. Diarbekir, greatest length, N. E. to S. W. 150 m., greatest breadth, 105 m. The surface, with the exception of a belt in the E. along the banks of the Euphrates, consists almost entirely of lofty wooded mountains, being traversed centrally by Taurus proper in the S. by part of the Lurdan Tagh, and in the N.

by part of the Anti Taurus. It belongs wholly to the basins of the Euphrates, and the Jychoon. The former waters the whole of its N. frontier and receives from within it the Karaman or Karm, and several minor streams, the latter rises in Taurus near its centre, and drains it S. W. Owing to the elevation of the surface, the climate is mild the snows on the mountains serving to moderate the excessive heats of summer. Many of the valleys are fertile, and excellent fruit is abundant, but the pasturage is much better adapted for pasture than agriculture. A large proportion of the inhabitants are Turkomans.

MARASH, or KERMANIA (anc. *Germene*) a tn. cap. above pass, picturesquely situated on a slope of the lofty Agir Tagh above r. bank Jychoon, 30 m. N. W. Aleppo. It occupies the sides and intervening valleys of three remarkable shoulders that in the centre being crowned by the castle, and overlooks an extensive and fertile plain but is poorly built, consisting of about 3500 houses of wood and clay. The mosques, about 25 in number are of an inferior description. In the vicinity tobacco, rice, and other grains, are largely cultivated. On the slopes of the Taurus there is very fine timber and besides a mine of excellent iron, which is worked there is also a mine of native steel. The town probably owes its existence to the pass of the Taurus situated to the N., along the slopes of the Anti-Shehr

MARATIA, a tn. Naples prov. Basilicata, dist. and 10 m. S. Lagonegre near the Gulf of Policastro. Pop. 4380

MARATHON a vil. N. Greece 20 m. N. E. Athens, and within a few miles of the Channel of Egripo or Negropont, famous for the victory of Miltiades over the Persians, and remarkable for the fine mountain scenery in its vicinity

MARATHONIST a small sea, airport in Greece, in the Moron, dist. of Malva. W. shore and near the head of the Gulf of Kolokythia, lat. 38° 44' N., lon. 22° 30' E. It is built on a huge rock which overhangs the sea, and consists of about 100 wretched houses of mud brick, in the midst of which stands a large church with a spire. Opposite the town, is an island of the same name (anc. *Cresus*) which forms a kind of roadstead, sheltered from N. and W. winds. A considerable quantity of valonia is shipped at the port of Marathon. The town stands on the site of the ancient Miletos, and near it are the remains of Cytium called Paleopolis, and numerous other relics of antiquity

MARATUA or ST. JOHN'S ISLAND Indian Archipelago, Calabes bay, off the N. E. coast Borneo N. point lat. 2° 15' N. lon. 118° 55' E. (a) It is about 24 m. in length N. S. and 4 to 12 m. in breadth. Trepan is collected here. This island is the largest of a group of six islands, called the Maratus or Maratuba islands

MARAYACA a mountain, Yucucala, in Guyana, about lat. 5° 40' N. and lon. 5° 50' W. 23 m. N. N. E. of the vil. of Esmeralda. Sir R. H. Schomburgk estimates its height at 10 000 to 11 000 ft. but was not able to form a base-line for its accurate measurement, in consequence of the dense woods at its base. He there found a species of *Arundinaria*, growing in clusters like the bamboo and though not more than half an inch in diameter rising, first without a knot, for 15 or 16 ft., then becoming branched, and attaining an additional height of from 50 to 40 ft.

MARAYI or MARASMA a lake S. Africa, about lat. 18° S., and lon. 35° E. It is very imperfectly known, and owing to the deep bogs which surround it, is approached with difficulty even by the natives. It is said to have fresh water, and to be fed chiefly by the Tabane, of which the *Mcgonatze* or *Mofunatze*, is one of the principal branches. Both the river and the lake abound with crocodiles. At the S. W. extremity of the lake, is the village or town of Maravi.

MARAZION MARATZEV or MAROASTREVO, a market in England co. Cornwall, 18 m. W. S. W. Falmouth, pleasantly situated at the N. extremity of Mount Bay, on the slope of a hill, and sheltered from the E. and N. W. winds. It has one principal street, rather curved, and generally not well kept, and contains an Established church a Wesleyan, and a Baptist chapel, and a Friendly meeting-house. It has two charity schools, and a literary society. The inhabitants are generally employed in the tin and copper mines in the vicinity. St. Michael's Mount lies about $\frac{1}{2}$ m. to the S., and is connected with the mainland by an isthmus, 40 yds. broad. Pop. 1870 (Local Correspondent)

MARAZZI a vil. and com. Italy, Piedmont, div. Genoa, 1 m. from San Martino, on the Beugne. It has two parish churches, a small fort, three palaces, and a trade in corn, wine, oil, and fruit. Pop. 2890

MARBACH, a tn. Württemberg, circle Neckar, esp. bail, r. bank Neckar, 15 m. S. Heilbronn. It is walled, has two gates, two churches, a chapel, Latin school, old castle, various manufactures, and several mills. Schiller was born here. Pop. 2840. Area of bail, 58 geo. sq. m. Pop. 39 750

MARBACH, two places, Switzerland.—1. or Mospet, A. tn. and par. com. and 22 m. S.W. Lausanne 2-00 ft. above sea-level with a church, and a considerable trade in horses. Excellent flax is extensively grown. Pop. 2004.—2. A vil. and par., com. and 15 m. S.E. St. Gall, in the valley of the Rhine, with a church, used both by Protestants and R. Catholics. Inhabitants chiefly employed in knitting and spinning wools. Pop. 1118

MARDAIA, a vil. and com. Belgium prov. Brabant, 22 m. S.E. Brussels. The chief employments are agriculture and the rearing of cattle. Pop. 1782

MARBELLA a city and port, Spain, Andalusia prov. and 28 m. S.W. Málaga, on the Mediterranean. It is well built, and has clean, wide, and paved streets a handsome square, an elegant church, with a lofty tower several chapels, two hospitals, some schools, a townhouse, prison, small theatre, and ancient fortress, now converted into a cemetery. Many features of Spanish fabrics, leather, refined sugar, and oil, several iron-smelting furnaces, and an important trade in grain, fruit and wine. Many of the inhabitants are fishermen. Pop. 2860

MARBLEHEAD a seaport and township, U. States Massachusetts, 18 m. N.E. Boston on a rocky point projecting 3 or 4 m. into Massachusetts Bay. It has five churches, two banks, and a safe harbour easy of access. Inhabitants chiefly fishermen. Pop. 456

MARBURG a tn. Hesse-Cassel, esp. prov. Upper Hesse, agreeably situated on the slopes of an acclivity above the Lahn, and on the great Frankfurt railway 46 m. N. Frankfurt. The houses are, in general, poorly and irregularly built, and the streets are both narrow and dirty. The principal buildings are the castle of the landgraves of Hesse, an ancient edifice, remarkable both for site and architecture, and now partly used as a prison, the university the first founded in Germany after the Reformation, and attended by about 200 students the church of St. Elizabeth, built in the 13th century and affording a pure specimen of the pointed Gothic the observatory, library and townhouse. The manufactures are of little importance, consisting chiefly of linen, leather and earthenware. Marburg is the seat of several courts and public offices, and possesses—besides the university already mentioned, to which an observatory chemical laboratory, mineralogical cabinet, anatomical theatre, and botanical garden, are attached—a gymnasium an industrial and riding school. Marburg early embraced, and makes a considerable figure in the early history of the Reformation. Here Luther and Zwingli held a conference in presence of the landgrave, with a view to terminate their unhappy differences on the subject of the Lord's supper. Pop. 7864. Area of dist. 160 geo. sq. m. Pop. 28 917

MARBURG, or **MARNEBURG** a tn. Austria, Styria, cap. circle, L. bank Drava, 36 m. S. by E. Grätz, on the Vienna and Trieste railway. It is walled, has four suburbs, a ducal chateau, with good paintings, an old castle, a theatre, a gymnasium, several schools, an infirmary and military hospital several well-frequented fairs and some trade in corn and wine. In the night-school, N. of the town, on a corner hill are the remains of the old castle of Otto Marburg. Pop. 4500

—**THE CRUISE** is watered chiefly by the Drava, which traverses it lengthwise has excellent pastures, on which great numbers of cattle are reared produce of fruit and wine considerable. Area, 1052 geo. sq. m. Pop. 208 800

MARBURY par. Eng. Cheshire 2836 ac. Pop. 758

MARCARIA, a tn. and com. Italy Lombardy gov. Milan, prov. and 14 m. S.W. Mantua, esp. dist. near L. bank Ohio, here crossed by a handsome wooden bridge. It contains a parish church, two chapels, and a handsome chateau of the Marchioness Castiglione, with fine gardens, and has several mills. Close to the village are the remains of an old feudal castle. Pop. 6072

MARCEL (Str.), [anc. *Arpincenopolis*]—1. A tn. France, dep. Indre, on the Creuse, 16 m. S.W. Chateauroux. It appears to have antiently been a place of some importance and among other ancient Roman remains are vestiges of a theatre. The only trade is in wine. Pop. 1043.—2. A vil. France, dep. Saône-et-Loire, about 2 m. from Chalon-sur-Saône, which contained the Benedictine abbey in which Abelard died

MARCELLAS a vil. and com. France, dep. Hautes Pyrénées, prov. Gascogne W. Armezy on a lofty hill. It contains a small subequated parish church and has some trade in corn wine, and fruit. Pop. 1108

MARCELLIN (Str. [Latin, *Macoris*]) a tn. France, dep. Isère, near r. bank Isère, 20 m. W. S. Grenoble. It is walled, has four gates and is, in general, well built streets straight, and adorned with fine sparkling fountains. The public square is handsome, and there is a well built market. Its chief manufactures are earthenware, and it has also cotton mills, and a trade in excellent wine, raw silk, thread, linen, walnut, oil, cattle, and game-meat cheese. Pop. 2754

MARCELLO (Ras), a vil. and com. Tuscany, in the Val di Lama, about 18 m. from Pistoia. It has a handsome church, with a tower and spire a convent two schools, manufactures of woollen, several paper-mills, and a trade in chestnuts and wood. Pop. 4683

MARCH, or **MORAWA** a river Austria, which rises on the N. frontiers of Moravia, on the S. W. side of the Spiglitzer Schneeberg near Altschitz, and proceeds S.E. passing Olmütz, Kromau and Brachau. On reaching the last town, it turns S.S.W. forming the boundary first between Moravia and Hungary and then between the archduchy of Austria and Hungary and ultimately joining L. bank Danube about 7 m. above Pressburg. Its principal affluents are on the right, the Hama, Teys, Zaya, and Rast and on the left, the Beeswa, Mlava, and Budawa. Total course, including windings, about 160 m. It is navigable from Gding, near the point where it begins to form the boundary between Moravia and Hungary, at its mouth it is about 400 yards wide.

MARCH a market tn. and chapelry England, co. and 2 m. N. W. Cambridge on both sides of the Old Kenn, and on the Eastern Counties railway. Its two principal streets cross each other at right angles and are each nearly 2 m. long, not very straight, but well kept. The town, generally, is irregularly laid-out houses mostly of brick, and some well built a good square market-place in the centre. The places of worship are a handsome established church, and several dissenting chapels. There are a national grammar and infant schools, and a mechanics institute. Pop. 6241

MARCHAM par. Eng. Berks 4940 ac. Pop. 1197

MARCHAMALO a tn. Spain New Castile prov. and 2 m. N. Guadalajara, in a plain L. bank Henares. It has a church, earthenware with prison and primary school an oil mill and a trade in agricultural produce and bread which is twice esteemed for its superior quality. Pop. 10881

MARCHE or **MARCHE EN PAYSANNE** a tn. Belgium, prov. Luxembourg near Shapenette a Forest of Arden, about 25 m. S.E. Dinant. It is a pretty comfortable looking town and has two churches, three chapels, a communal house, a court of first resort, a prison, some benevolent institutions pen-work, tanneries flour bark and saw mills. About 200 persons are employed in making lace. It has a trade in iron wood and cattle. It is named *Marche-en-Paysanne*, from having been the capital of the old district of Paysanne. A treaty between Austria and the States of Holland, which was concluded here in 1577, bears the name of the Perpetual Edict. Pop. 1804

MARCHE (La) a tn. and prov. France, which is divided into High Marche, esp. Gueret, and Low Marche, esp. Hellas. It was bounded N. by prov. Berry E. Bourbonnais and Auvergne, S. Limousin and W. Poitou. It now forms dep. Creuse, and part of dep. Haute Vienne.

MARCHE LES BAINS, a vil. and com. Belgium, prov. Hainaut, 15 m. N.E. Mons, with a brewery and several chateaux and four mills. Pop. (agricultural), 1178

MARCHEGGI a tn. Lower Austria, circle Lower March, 77 m. S. Vienna. It is surrounded by old walls, and has a Gothic church, and an ancient castle with a theatre, library and park. It is famous for the victory which Octavian gained here, in 1260, over Bala. Pop. 11190

MARCHEA, a *tu*. Spain, Andalusia, prov. and 20 m. S. by S. Seville, in a sandy valley, and upon two hills. The soil is well built; retains some vestiges of its ancient tower-hanked walls, and has some fine squares, and clean and paved, though for the most part, arched and steep streets. Its public buildings are, three parish churches, several chapels, towers and court houses, prisons, two hospitals, an orphan asylum, college, storehouse, three convents, and a palace of the Duke of Arco. It has manufactures of linen, serge, and cloth, earthenware, soap, wine and oil, and carries on some trade with Seville. Pop. 11,890.

MARCHES (Land), a *vill* and com. France, dep. Sarthe, 1/2 bank Loire, 6 m. S.E. Chambray; with two churches, and some trade in wine, of very indifferent quality. Pop. 1087.

MARCHENNES, or **MARCHENNES-VILL** (Latin, *Marchenna*) a *tu*. France, dep. Nord, in a marshy district, on the Scarpe and canal of Douai, 19 m. S.E. Lille. It is poorly and irregularly built, has some manufactures of tulle and leather, dress-making, and a considerable trade in fish, fruit-trees, and asparagus. Pop. 3217.

MARCHEIN, a *tu* and com. Belgium, prov. and about 91 m. S.W. Liège, on the Hoyers. It has four forges, four mills, and a mill flour, and four paper mills, fine quarries of building and paving stone, and two breweries. Pop. 2245.

MARCHWIEL par Walen, Dunbligh, 5316 m. P. 685.

MARCHIANA, a *tu*. Tuscany, dist. and 9 m. S.E. Pistoia. Fertile. It consists chiefly of a long street stretching along the beach, is the seat of a court of justice, has two churches, and a trade in wine, wood, and iron. Near it are granite quarries, which were worked by the Romans. Pop. 2177.

MARCHIANO, a *vill* and com. Tuscany, on an elevated plain, near 1 bank canal of Chiasso, 35 m. E. Rome, with a church and an old castle. Here, in 1455, the Tuscan defeated the French. Pop. 2514.

MARCHIONAGO, or **MARCHINAGO**, a *vill* and com. Italy, Lombardy, prov. Pavia, dist. and 2. Bergamo, with a church. It is famous for the defeat which the Ghibellines of Pavia here sustained, in 1152, from the Guelphs of Milan. P. 1296.

MARCHIGNY, a *tu*. France, dep. Saône-et-Loire, near 1 bank Loire, 68 m. S.W. Chalon. It has manufactures of table-linen and earthenware, builds a good many barges, and has a trade in corn. Pop. 2547.

MARCHINLE, a *vill* and com. Belgium, prov. Hainaut, near the Sambre, on the road from Charleroi to Philippville, 34 m. E. Mons. It has manufactures of iron, a brewery and a distillery. Coal is worked in the vicinity. Pop. 1549.

MARCKE, a *vill* and com. Belgium, prov. W. Flanders, on the Lys, 34 m. S. Bruges. It has manufactures of linen, a tannery, an oil, and two flour mills, and a trade in corn. Pop. 1544.

MARCKOLSHHEIM, **MARCKELSH**, or **MARCKELSH**, a *tu*. France, dep. Bas-Rhin, on the Isère, and the Rhine and Moselle Canal, 28 m. S.E. W. Strasbourg. It has manufactures of linen and earthenware, breweries, brick and tile works, and a trade in tobacco and hemp. Across the Rhine, on the side of the Kobernau, old city and castle of Litzberg. P. 2290.

MARCLE, two parts. Eng. Hereford—1. (L266), 1215 m. Pop. 152—2. (M26), 6242 m. Pop. 1126.

MARCO (Mar), several towns, Naples, particularly—1. Prov. Calabria-Citr., dist. and 17 m. N. N. W. Cosenza, the see of a bishop, and containing a cathedral and two other churches. Pop. 1200—2. Sicily, prov. Messina, dist. and 16 m. W. W. Patti, on a height, near the sea-coast. Near it, to the N. W., are the ruins of a Roman bridge. Pop. 3000—3. (Ar. Gove) Prov. Crotone, dist. and 16 m. N. W. Arco, with a fair, which takes three days. Pop. 9900—4. (Ar. Zuma) Prov. Capriano, dist. and 12 m. E. N. E. San Severo. Pop. 9000—5. (Ar. Crotone) Prov. Capriano, dist. and 22 m. E. W. San Severo; with an annual fair. Pop. 5160.

MARCO (Mar), a *tu*. Sicily, prov. and 46 m. W. W. Messina, near the N. coast, on a hill, with a difficult road up to it. It contains a number of well-built houses, partly occupied by nobility, several churches, with some good gardens, and carries on trade in honey, wax, wine, oil, and silk. The suburbs are laid out in regular squares and streets; just in the vicinity, on the N. E., are the remains of a Roman city. Pop. including that of three dependent vill., 4990.

MARCOUF (Mar), two small isls. France, in the English Channel, off the coast, in the mouth of St. Helier, about 4 m. from the mainland, and 12 m. N. E. Cherbourg. They boast chiefly of barren rocks, but are of some military importance, and, in time of war, have repeatedly been taken possession of by the British.

MARCOUET, a *tu* and com. Belgium, prov. Luxembourg, 1 bank Ourthe, 42 m. N. N. W. Arlon, at the foot of a hill called *Munzigen* (*Monte Asens*), which gave its name to a county, of which Marcouet was the capital. It has a church, two chapels, and several communal houses, inhabitants employed in agriculture. Pop. 1064.

MARCOVELO, a *vill* Hungary, Thither Thelma, co. Temeswar, in a fertile district, 3 m. from Kiskir. It has a church, and a trade in agricultural produce. Pop. 1477.

MARQ, a *tu* and com. Belgium, on a small river of the same name, about 30 m. N. M. Mous. It has a bark and six flour mills, some linen-weaving and a trade in agricultural and dairy produce. Pop. 2465.

MARCOSS, par. Glemorgan, 1041 m. P. 62.

MARCE, or **MARZA**, a *vill*. Hungary, Thither Duxin, co. and about 7 m. from Odenburg. It has a church, and a trade with Vienna in wine, wood, and fruit, especially cherries. Pop. 1128.

MARCEALY, a market in Hungary, Thither Danube, co. Szeged B. of Lake Balaton, and 77 m. S. Raab. It has a R. Catholic church, a castle and a trade in wine. P. 1400.

MARDES, a *tu*. France, dep. Eure-et-Loir, 4048 m. P. 941—2. East 7007 m. P. 1050—3. Wilt, 1278 m. P. 907—4. (East) Sussex 988 m. P. 69—5. (North) Sussex 682 m. P. 19—6. (West) Sussex 2298 m. P. 360.

MARDIN, a *tu*. Asiatic Turkey, path, and 335 m. N. W. Bagdad, on a lofty mass of limestone, overlooking a large and fertile plain. It is distinguished by the salubrity of its climate, is substantially built of stone, and has a prosperous appearance. Among the public edifices are Chancery, Syrian, Catholic, Armenian, and Jewish churches, and a large and handsome bazaar. At a short distance, there is a Jacobite monastery said to contain the largest library among the Syrians, and to have works in 13 different languages. Pop. about 14,000.

MARE, an isl. Brazil, off E. shore Bay of All Saints, or Bahia, opposite to the mouth of the Pinheiros, prov. and 14 m. N. by E. Bahia. It has a extent of nearly 13 m., is of great fertility, producing, in particular great quantities of banana, which constitutes the principal wealth of the island; and contains a parish church and a primary school. Pop. 700.

MAREB—J. A considerable river Abyssinia, an affluent of the Atbara or Tazara. It is formed by the junction of several head streams, all having their sources in the kingdom or state of Tigre. The principal of these, called the *Mamuel*, rises on the W. slopes of the mountain-range which separates Dankali from Tigre about lat. 14° 42' N. lon. 39° 42' E. The junction of these streams occurs at lat. 14° 39' N., from which the Mare flows in a N. W. direction, till it joins the Atbara at lat. 10° 10' N. (the whole course being about 240 m.—2. A *tu*. Arabia (see. Sahel), 60 m. N. E. Sana, lat. 15° 40' N. lon. 45° 30' E. Numerous rapids would indicate that this had been formerly a place of great importance. These consist of fifty-foot stones, great numbers of which have been carried all the way to Sana, two days' journey, where they are used in the buildings of that town, made of white marble, with long inscriptions in the ancient Hanyratia character; square gold coins, and jewels and pearls, found assiduously in the water-courses after heavy rains.

MARCONIA, a river, Italy, which rises in the E. slope of the Central Apennines, on the frontiers of Tuscany, flows N. E. and, after a course of about 65 m., falls into the Adriatic, a little below Rimini. It is navigated by barges.

MAREE LOCH, a Scottish lake, in the W. of Ross-shire, forming a long and comparatively narrow expanse, stretching S. E. to N. W. for 16 m., with an average breadth not exceeding 1/2 m. Owing to its depth, while, in most places, it is 60 fathoms, its bottom here is less than 10 fathoms. The country along its shores is of the highest description, and its shores are fringed with 24 wooded islands. The lake discharges itself into Loch Ness by a small river of same name.

MARSHAM, two parishes, England, Lincolnshire. (44-John, 1860 to 1900. Pop. 2,500. 53° 55' N. lat. 10° 55' W. lon. 53° 55' W. lon.)

MAREMMA, a low swampy tract, Tuscany, which stretches along the shores of the Mediterranean, from Oristella to Plorence, and, notwithstanding repeated attempts to drain it, continues to unhealthily, that it is cropped only by shepherds during a part of the year. It contains glass and sulphur, and there are also said to be seams of coal.

MARENNE, a vil. and com. Italy. Fiesolano div. Com. prov. Firenze, N. E. Fiesolano. It has several handsome houses, a large and richly-decorated parish church, a public school, and a charitable endowment; a silk-mill, and a trade in corn, wine, fruit, and silk. The painter Carlo Dolce was born here. Pop. 1877.

MARENCO, or MARENGO-SPIZZA, a vil. Italy, Piedmont, r. bank Noemida, and so near Alessandria as to be considered one of its suburbs. It is memorable as the scene of the victory which the French, under Bonaparte, gained, in 1800, over the Austrians, under Melas, and in which General Desaix was killed.

MARENNE (Latin, *Marema*) a tu. France, dep. Charente-Inférieure, 28 m. S. La Rochelle, about 1 m. from the Bay of Marenne. It is surrounded by salt marshes, which yield a good deal of salt; is well built, but its climate is so unhealthy as to be a serious obstacle to its prosperity. Its trade is in salt, brandy, and white wine, corn, maize, garden beans, lentils, mustard, green cress, in great request, and fine mair, used by soap-makers. Pop. 1864.

MAREOTIS, or MAREOT, a lake, in the N.W. part of Lower Egypt, separated from the Mediterranean on the W. by the long and narrow belt of land on which Alexandria is situated, and communicating on the N. with Lake Melch. It is irregular in shape, and, in the S.W., has a long, narrow creek, but the great body of water is about 28 m. long, N.W. to S.E., and 20 m. broad. It was at one time of sufficient depth to answer all the purposes of inland navigation, and was kept constantly full by the waters of the Nile, while its shores were surrounded by beautiful gardens and vineyards. Towards the close of the last century, it was nearly dry and had become notorious for the pestilential atmosphere formed by its miasmata. The English, while besieging the French in Alexandria, let the sea into it, in order to deprive the besieged of fresh water, and cut off their communication with Cairo, and it has, in consequence, again become a lake.

MARESFIELD, par. Eng. Sussex; 7750 ac. P. 1865.

MARETZ, a tu. France, dep. Nord, 11 m. S.E. Cambrai.

MARSH, several places, France, particularly—1. A tu. and com., dep. Puy-de-Dôme, 12 m. S.W. Moulon; with manufactures of hosiery and hats, a cotton-mill, and six annual fairs. Pop. 1765.—2. A vil. and com. dep. Vendée 15 m. S.E. Bourdeaux-Vendée, s. bank Lay, which is here navigable. It ships goods from Nantes and Rochelle; and has six annual fairs, each of two days. Pop. 1600.—3. (Mermet-sur-Ay), a vil. and com. dep. Marne, 16 m. S. Rheims; near s. bank Marne, here crossed by a handsome bridge. It consists chiefly of a large and handsome stone, the walls well-built, built with a castle near its centre, and an ancient church with a lofty spire, and has a considerable trade in champagne. Pop. 306.

MARSH, par. Eng. York (N. Riding), 2138 ac. Pop. 193.

MARGA, a vil. Hungary, banet of Temesvar, near the frontier of Transylvania, and about 50 m. from Karansebes. It has a new and a flour-mill, and is inhabited chiefly by the soldiers of a Wallachian-Illyrian frontier regiment. P. 604.

MARGAM, par. Wales, Glamorgan, 18 735 ac. P. 4747.

MARGARET (St.), three par. Eng.—1. Middlesex, 687 ac. Pop. 21,814.—2. Norfolk, 2675 ac. Pop. 14,563.—3. (St. Chrys), Kent; 1924 ac. Pop. 783.

MARGARET MANN, par. Eng. Dorset; 525 ac. P. 77.

MARGARET'S (St.) par. Eng. Hereford; 5083 ac. P. 216.

MARGARET'S (St.), three par. Ire.—1. Dublin, 2401 ac. Pop. 411.—2. Wexford; 2424 ac. Pop. 244.—3. Wick; 438 ac. Pop. 24.

MARGARETHA (town), market-town, Hungary, Thibet, Danube, on the N. Odenburg, about 8 m. from Gachina, with a church. Pop. 1866.

MARGARETTING, par. Eng. Essex; 2260 ac. P. 617.

MARGARITA, an Isl. Venezuela, dep. Cumana, in the Caribbean Sea, lat. (W) and 10° 55' N. lon. 68° 55' W. (N.) It is about 50 m. from the mainland, of very irregular form, being reduced, near the centre, to a narrow isthmus, with a broad expansion on the E., and a smaller on the W. Its greatest length, E. to W., is 87 m. breadth at the E. end, about 30 m., at the W., about 10 m. The connecting neck of land which unites the two extremities of the island, to a low, swampy tract. Both portions of the island are rocky and rise to a considerable elevation, in some parts as high as 6000 ft. above the sea. The coasts are rocky and very steep, but contain several harbours—the principal of which, Puerto Rico, lies on the S.E. coast, it is a spacious basin, and secure from all winds. Indian corn, bananas, and ground provisions are raised, as are also small quantities of sugar, coffee, and cacao. An extensive fishery is carried on upon the banks between Margarita and the mainland, where great quantities of fish are taken, and sent to the neighbouring countries. Fowls and other curious birds are extremely numerous on the island. It has several small towns or villages—the most considerable of which, Acanduba, is situated on the E. side of the island. Margarita was discovered by Columbus, in 1498. Pop. estimated at 15,000.—2. An Isl. N. Pacific Ocean, on the coast of Old California, lat. 24° 18' N. lon. 111° 43' W. (N.) Length, N.W. to S.E., 80 m.; breadth, 10 m.

MARGARITA, a tu. Isl. Mayores, 22 m. S. Alameda, tolerably well built with several squares, a parish church, two schools, a vicarhouse, a brewery distillery, and some trade in coffee, grain, and fruit. Pop. 7568.

MARGARITA (or SANTA KATARINA), a vil. and com. Italy, Fiesolano, div. Com. prov. and W. Mondovì, on the Biobio. It has a handsome modern church, a fine palace with a large and beautiful garden; a monastery, communal school, charitable endowment, and a paper, an iron, and several silk mills. Pop. 1619.

MARGARITA SAWA, a tu. Sicily prov. and 41 m. N.W. Girgenti. Pop. 1770.

MARGARIT (town, *Gypharia*) a tu. Turkey in Europe, Albania, sandjak and 40 m. S.E. Delvine, com. dist. of same name, in a fertile plain. Pop. 4200.

MARGATE, a seaport, market tn., watering-place, and par. England, co. Kent. The town, 64 m. E. by N. London, on a branch of the South-Eastern Railway, is about 2 m. N.W. the N. Foreland, lat. 51° 38' 24" N. lon. 1° 28' 15" E. (N.), pleasantly situated at the N. extremity of the Isle of Thanet, partly on the acclivity of two hills, and partly in the intervening valley. The older part of the town, occupying the latter, and stretching along the shore consists of a number of narrow, irregular streets, but the new part is well laid-out, and contains some good streets and squares, paved and lighted. The principal buildings are the market, townhall, theatre, public subscription library, sea-bathing infirmary and several barns. The stone pier is also a fine structure, upwards of 900 ft. long, 60 ft. wide at the broadest part, and 26 ft. high, with a parapet of 44 ft. A portion of this pier is partitioned off as an esplanade, elevated 7 or 8 ft. above the ground. Several Boulders this pier there is a wooden pier, 1000 ft. long, and about 18 ft. wide. The old church of Margate, on a hill, has a square tower at the N.W. angle. The church of the Holy Trinity, a modern structure, is built of Bath stone, in the early English style. There are places of worship for Baptists, Wesleyans, Lady Huntingdon's Connection, Presbyterians, R. Catholics, Society of Friends, and a woman's chapel. The charities comprise Draper's hospital and a free school which provides education for 400 children. There are several bathing establishments in the town, libraries, billiard and reading rooms, and other places of recreation and amusement. Adjoining the town, also, are the Tilford gardens, for concerts, fire-works, &c. As many as 100,000 visitors, it is said, sometimes arrive during the season. A considerable fishery for skate, haddock, sole, and sea-bass, is carried on here, and some little trade with the Netherlands, for the immediate wants of the district. Pop. m. 9107. Area of par. 4075 ac. Pop. 10,000.

MARGAUX, a vil. France, dep. Gironde, 15 m. S. Bordeaux, in a rich wine district, near s. bank Garonne. It has an ancient seat, white-washed villas, situated in gardens, enclosed with acacia hedges and trained vines. About 3 m. distant is Chateau Margaux, the vineyard around which pro-

MARGAUX, a vil. France, dep. Gironde, 15 m. S. Bordeaux, in a rich wine district, near s. bank Garonne. It has an ancient seat, white-washed villas, situated in gardens, enclosed with acacia hedges and trained vines. About 3 m. distant is Chateau Margaux, the vineyard around which pro-

does the famous share of its sun, so much in request in England, in which almost the whole produce, about 100 pigs, is exported. The grapes which produce it is small, and poor to the taste, with a flavour resembling that of black currants. Pop. 1084.

MARGHILAN or **MAMERITA**, a m., khamsa and 54 m. W. S. W. Kaban in a verdant and well-watered plain. Though not surrounded by walls, it is a large and well-built place, with a *caravansaray*, a lofty watch-tower apparently of ancient date, and several mosques. The inhabitants, partly Tadshiks, but chiefly Uzbeki, manufacture silk goods, and carry on a considerable trade.

MARGITZA, or **Ko-MARGITZA**, a vil. Hungary, banat of Temeswar, on the Bega Canal, between Dobocina and Jarcova. It has a Greek church and a trade in cattle. P. 1054.

MARGITTA, two places, Hungary.—1, (*Nagy-Margita*) circle Thutur Thoma, co. Torontal, W. Temeswar with two churches. Pop. agricultural 1723.—2, A market in co. Bihar 35 m. S.E. Debroulin with a four-sall. Much wine is produced in the neighbourhood. Pop. 2947.

MARGONIN is a French city W. France, gov. Bretonne, on a lake, 40 m. W. S. W. Bretonne. It has two churches and a synagogue and manufactures of linen and hair. Pop. 1969.

MARGUERITE (Br.)—1 A river Lower Canada. It rises about lat. 48° 50' N. and, after a S.E. course of 86 m. joins the Saguenay, 19 m. above its outfall in the estuary of the St. Lawrence.—2, The largest of the Lerins, a group of isls. off the coast of France, dep. Var.

MARHAM two yrs. England.—1 (Cherry), Norfolk 3968 ac. P. 905.—2 (Church) Cornwall 2739 ac. P. 564.

MARHIA par first Kerry 2794 ac. Pop. 650.

MARHOLM par Eng. Northampton, 1790 ac. P. 172.

MARIA several places, Spain, particularly—1 A m. Andalusia, prov. and 57 m. N. by S. Almeria with a square, a church two chapels, and manufactures of glass, carpets, quilts, drugs, and chemical essences. Pop. 3500.—2, (Sancti Marci de Aro) a n. Old Castle prov. and 18 m. N. W. Segovia with manufactures, a church, two chapels, a town-house, primary and two schools, and manufactures of linen and woollen fabrics, and wine. Pop. 1584.

—3, (Sancti Marci del Parnaso) a vil., prov. and 90 m. N. Leon, in a plain. It has a parish church, a primary school, and a trade in linseed-oil. Pop. 1404.—4 A m., ol. Majorca, prov. and about 25 m. from Palma, on two heights separated by a valley. It has a parish church, a primary school, and a trade in soap, figs, and wine. Pop. 1085.—5 (Sancti) a m., Isl. Majorca, 9 m. W. E. Palma, in a fertile district. It has a trade in oil, wine, sugar, and cattle. Pop. 1918.

MARIA A MORTU, or **MARIA DE MORTU** (SANTA) a m. and com. Trencin near Florence, on a height above r. bank Arno. It is walled has a church, a castle in ruins, and a trade in corn, musa, wine, oil and silk. Pop. 9652.

MARIA ISLAND, 1st Van Diemen's Land E. coast Richmond dist. nearest point about 3½ m. from the mainland summit, at the N end, 8500 ft. high, lat. 42° 55' S. lon. 148° 5' E. (u). It is about 12 m. long, with an extreme width of 7 m. A low sandy isthmus, nearly overlooked at high water, connects the mountain masses which form its extremities. The scenery of the island is romantic, the soil generally good, and of great depth in the valleys. Part of the E. coast presents lofty granite walls, rising 800 or 400 ft. perpendicularly above the sea. These are penetrated by deep caverns, into which the sea rolls with a noise resembling distant thunder. On the opposite side, the island declines gradually to the shore. On either side of the isthmus, or narrow neck of land to which the island is reduced in the middle, are two spacious bays, called, respectively, Oyster Bay and Boldie Bay. On this island, as a place called Oyster Cove the last remnant of the Tasmanian race is quartered and maintained by the colonial government. In 1848, their numbers amounted to 25, namely, 12 men, 32 women, and one male child, of pure aboriginal blood.—2 An isl., N. Australia, Gulf of Carpentaria, on the W. coast (N point) 14 50' S., lon. 128° 54' E. (u) about 7 m. long, and 1 m. to 4 m. broad.—3, An isl., S. Pacific Ocean, in the Low Archipelago, lat. 23° 0' S.; lon. 136° 0' W.

MARIA (Kuo) a vil. Hungary co. Bihar, about 2 m. from Petia, with a Protestant church, the ruins of an old castle, a trade in wine and cattle, a weekly market, and several small mills and fairs. Pop. 1861.

MARIA (SANTA),—1, An isl. Portugal, in the Atlantic, the coast S. of the Azores, lat. 57° N., and lon. 29° W.; greatest length, about 13 m.; breadth, 9 m. It has a lofty and rugged surface, composed of *slaty rocks*, which, towards the sea, form bold precipitous cliffs. Like the other islands of the group, it has evidently been heaved up by volcanic agency, but, unlike them, it has no volcanic rocks, and nowhere exhibits the action of heat, or marks of eruption, subsequently to its formation. Beside the scoriae, of such the island is chiefly composed, there are everying signs of limestone, which is burned into lime, and exported to the other islands, and large beds of clay which is extensively manufactured into coarse pottery, and, in like manner exported. The soil forms only a thin covering on the surface, but is rendered very fertile by irrigation, and produces much maize, wheat, and wine, though its natural resources are very imperfectly developed. Brushwood is abundant, but there are not many large trees. The pastures are stony, but feed large numbers of cattle and sheep, particularly the latter which thrive amazingly. Game and poultry are to be had everywhere at so low a price as to make living very cheap. The climate is the best in the Azores. The chief place is Porto on the S.W. side of the island near the sea. Pop. 5500.—2, An isl. S. Pacific Ocean coast of Chili, prov. Conception opposite the entrance of Aruco Bay lat. 57° 2' S. lon. 73° 34' 16' W. (u). It is about 2 m. or 3 m. N. from Point Laysan on the mainland. It is comparatively low and dangerous, on account of numerous outlying rocks.

MARIA (SANTA) numerous places, Naples, particularly—1, (di-Capodi) a m., prov. Lavoro, dist. and 5 m. N. W. Caserta. It has a criminal and a civil court several Roman antiquities, including the remains of a large amphitheatre, a subterranean gallery and a triumphal arch across the road to Capua. Pop. 8300.—2, (di-Lenz) prov. Otranto, dist. and 26 m. S.E. Gallipoli, near Cape Lerna. It is the sea of a bishop. Pop. 3000.

MARIA-TRIN, a vil. Switzerland can. and 20 m. N. N. W. Solothurn in a place of ground covered by moss. Born and the French sep. Haut-Kain. It contains a Benedictine abbey finely seated on a height among romantic scenery and, immediately beneath it, a natural cavern that has been converted into a chapel, with an image of the Virgin, which annually attracts more pilgrims than any place in Switzerland except Einsiedeln. The church of the monastery is spacious and handsome.

MARIA (SANTA), a vil. Hungary Thutur Debrec, on Szabolc, on the high road from Csakbanya to Abad Vidoros. It has a parish church, and some transit trade. Pop. 1618.

MARIA-TREKHEIMHART a royal town in Hungary, co. Bacs, 26 m. S. W. Segedin. It is, properly, rather a district than a town, as it has an area of 80 sq. m. It has three handsome churches and several convents manufactures of linen, woollen cloth, dye-works, and a considerable trade, particularly in horses, cattle, sheep, and wool. Pop. 40,000.

MARIA-ZELL, a market in Austria, Styria, circle and 26 m. N. Bruck, in the midst of mountains near the Balne. It is a small and new-looking place, but has acquired great celebrity from its possession of a handsome church, with a shrine to which 800 pilgrimage processions proceed annually from different parts of the Austrian dominions. The number of pilgrims yearly has been estimated at 100,000 and the object which attracts them is a rudely-carved piece of limestone wood, painted black, and about 16 inches high, intended to represent the Virgin and Child, who are clothed in the coarsest stuff, and about buried under garb and ornaments of immense value. The inhabitants derive a lucrative trade in relics, rosaries, and smaller relics, supposed to have derived virtue from having been in contact with the image. P. 900.

MARIAGEE, a small tn. Denmark, Jutland, lat. and 14 m. N. by W. Randers, on the S. shore of the long and narrow fiord of same name. It owed its existence to a large monastery and manory in the vicinity and, on its suppression at the Reformation, lost all its former importance. It has dwindled into insignificance, and, though possessed of a winter haven with 1½ m. water, has scarcely any trade. Its inhabitants live chiefly by agriculture and handicraft employments. Pop. 500.

MARIAKERKE, a vil and some Belgian prov. E. Flanders, on the canal of Bruges, 5 m. N.W. Ghent. It has manufactures of linen, starch, and vinegar, a bleachfield, dye-works, distilleries, and breweries. Pop. 1095.

MARIALVA, a tn. Portugal, prov. Beira-Alta, 80 m. S.E. Lamego. It is defended by a strong castle, and contains two churches, a convent, and hospital. Near it are several remarkable antiquities. Pop. 400.

MARIANNA, a tn. Brazil, prov. Minas-Geraes, pleasantly situated between two hills, and watered by two small streams, the Carmo and Manduário, 15 m. E. Ouro-Preto. It is the site of a bishop, and is upon the whole well built, has spacious and paved principal streets, and two extensive squares, adorned with several fountains, a cathedral and seven other churches, episcopal palace, townhouse, seminary for ecclesiastics, a superior school, in which Latin, Portuguese, French, mathematics, drawing, and philosophy are taught, two primary schools, and an hospital of mercy. The trade is of very limited extent. Pop. 5300.

MARIANE ISLANDS, N. Pacific. See LADROXAS.

MARIANO (anc. Marioum), a tn. and com. Italy, Low Italy, gov. Milan, prov. and 8 m. S.E. Como, between the Sesve and Lambro. It has a parish church, townhouse, a school, and several silk mills. Pop. 3555.

MARIANPOL, a tn. in Russian Poland, volivod Augustow, 127 m. N.E. Warsaw, on bank Bzupowce. It is mostly built of stone, and contains two churches and an ancient monastery. Pop. (1841), 2922.

MARIANSLEIGH, par. Eng. Devon, 1963 sq. P. 894.

MARIAS (Las Tazas), three isls., N. Pacific Ocean, off the coast of Mexico, dep. Guadalupe, 240 m. E.S.E. Cape Loma, and about 70 m. N.W. N.W. Cape Corrientes lat. (S. cape of the central or largest island) 21° 10' N., lon. 108° 10' W. They abound with wood, water, salt-petre, and game, and were formerly much frequented by English and American whalers. They were called the Islands de la Magdalena by Diego de Mendana, in 1595.

MARIASCHETZ, a vil Bohemia, circle and 16 m. N.W. Leitmeritz, remarkable for its church built by the Jesuits in 1708 and containing an image which annually attracts thousands of pilgrims.

MARIBO, a tn. Denmark, near the centre of the island between two lakes, one of which is called the Maribo-See, and once had a strong castle on one of the numerous wooded islands. Maribo owes its existence to a sunnary erected, in 1417, by Erik of Pommern. Its castle haven serves as a landing place for Bagholm, which is about 4 m. distant, and communicates with the port by a good road. Pop. 1400.

MARICA, a tn. Brazil, prov. and 20 m. E. Rio-de-Janeiro, on a lake of same name, about 6 m. from the sea. It is the headquarters of a body of national guards, and seat of an electoral college; has a townhouse, with prison, a parish church, and a considerable trade in manioc, flour, rice, and millet, almost all conveyed on mules to Rio-de-Janeiro. Some sugar and rum, also, are exported, at a small harbour in a chain of lakes communicating with the sea, and accessible to sloops. Pop. of dist., 6000.

MARIE-AUX-MINES (St.), a tn. France, dep. Haut-Rhin, 20 m. N.W. Colmar, on the Lapprette, at the foot of a mountain of its name, across which is one of the highest passes of the Vosges. It extends above 1 m. in length, between two mountains, on both sides of the river is tolerably well built, and possesses a Calvinistic consistorial church, a consulting chamber of commerce, and several de gruellemans. It is the chief seat of the manufacture of coloured tannins including, among other articles, cotton laces, creases and woven cloth, creases of all sorts, ginghams, &c. It has also worsted, cotton, felling, and paper mills; hatteries, and dye-works. Its trade is in cherry, herring, paper coloured cottons, cotton-twist, and the numerous articles of its manufacture. In its neighbourhood, argilliferous lead was long worked to a great extent. Only a single mine is now in operation. Pop. 7724.

MARIE-GALLIEUX, a French W. India isl., 14 m. S.E. Guadeloupe; lat. (S. point) 15° 53' N., lon. 61° 24' W. (w.) about 12 m. long, and 8 m. broad, area, 60 sq. m. traversed N. to S. by a range of hills, parallel to the E. coast, where it presents a tract of high and precipitous rocks. The W. and N. sides of the island are level; and, parallel with the former, is a narrow lagoon, 7 or 8 m. in length, separated from the

sea by a low, narrow tract of sand. Its produce consists of coffee, cotton, a little sugar, rum, and starch; it abounds in wood, particularly the wild cinnamon-tree. Its principal town, Grand Bourg or Bannetier, stands near the S.W. point, where a fortress is built. Pop. (1849) 12,740.

MARIE (St.), a tn. and par. N.E. coast lat. Martinique about 18 m. N. Fort-Royal. It has an unhealthy site, but a fertile and well-cultivated district, in which a good deal of sugar is produced, and shipped at a landing-place with good anchorage. Pop. about 4500.—2, An isl. E. coast Madagascar called by the natives *Moor-Jonah*, lat. 10° 48' S., and lon. 50° E. It is separated from Madagascar by a channel about 9 m. wide. The French have an establishment upon it.

MARIEFRED, a tn. Sweden, lin. Nykoping, on a bay, S. side of Lake Mälaren, 30 m. W.S.W. Stockholm. It is built almost entirely of wood but with great regularity and has a church and a townhouse. In the vicinity on a tongue of land formed by the junction of two islands of the lake, is the beautiful and interesting castle of Gripsholm. Pop. 560.

MARIENBAD, a watering place, Bohemia, circle Pilsen, in a kind of triangular basin formed by several mountain-ranges, about 24 m. from Carlsbad. It is of comparatively recent origin, and has been cut out of the great Bohemian forest since 1810. The village consists of about 50 or 60 buildings, chiefly lodging-houses, built like a crescent, on a slope in the middle of the wood. The Kneissel (Well house) is a magnificent establishment, and is provided with all the usual appliances of assembly-room, theatre, &c. The springs are of two kinds—the Kneisselbrunn, which assumes and purgative and the Ferdinand-Brunn, which contains less salt, but much more carbonic acid. They are used in the form both of mod vapour, and gas baths the latter derived from a past-bag which emits enormous quantities of carbonic acid gas. By a peculiar apparatus the whole person of the patient, or only the peculiar part affected, can be exposed to the gas, and it is said, with very beneficial effect. Great quantities of the water are drawn both kinds of springs.

MARIENBERG, a tn. Saxony, circle Zwicken, 85 m. S.W. Dresden. It contains a church, an orphan, and a minor's hospital and has a manufactory of glass-engines, and several saw mills, and flour mills. Most of the inhabitants find employment connected with the important mining operations which are carried on in the neighbourhood. Pop. 4447.

MARIENBOURG, or MARIENBURG, a tn. Belgium, prov. and 50 m. S.W. Namur, connected by railway with Charleroi. It is regularly fortified, being surrounded by a wide forest and walls, with only one gate and containing seven streets, which radiate regularly from the Place d'Armes. It was built, in 1542, by Mary Queen of Hungary and sister of Charles V. Its fortifications were demolished by Louis XIV. but restored in 1818. It has a church and, a short distance beyond the walls, a very ancient chapel of Notre Dame, which annually attracts great numbers of pilgrims. Pop. 562.

MARIENBURG,—1, A tn. Prussia, gov. and 27 m. S.E. Danzig, on the Nogat, over which there is here a bridge of boats, about 550 ft. long. It was one of the seats of the knights of the Teutonic order from whence the Prussian monarchy may be said to have sprung and contains the castle or palace of the grand masters, an imposing edifice in a peculiar style of Gothic, with a splendid apartment called the chapter-house, and a remarkably elegant church. Besides it, there are three other churches, one Protestant and two R. Catholic, a deaf and dumb institution, a superior town-school, a normal school, and poorhouse. The manufactures consist of woollen, linen, and cotton cloth, hosiery, lace, &c. The trade is in corn and wood. Pop. (1846), 6965.—The castle consists, for the most part, of a low flat, not remarkable for its fertility. Area, 242 sq. m. Pop. 63,567.—2, A vil. Brazil, gov. Livonia. W. above lake of same name, 60 m. S.W. Pskov. It has a church, and fine manor-house, and produces in its vicinity the best flax of the government.—The lake is about 8 m. long, by 8 m. broad, and has very picturesque scenery.—3, A market tn. Transylvania, dist. and 12 m. N. Krasnodar, on a mountainous ridge, above the Adria. It has one spacious principal street, a large townhouse, and a dilapidated castle. Pop. about 3500.

MARIENWERDER, a gov. W. Prussia, bounded, W. by Pommern and gov. Danzig, W. Pommern and Brandenburg, S. Poland and gov. Bremen, and K. East Prussia.

lens, 5110 geo. sq. m. The surface is constantly broken by low hills, but consists, for the most part, of an extensive flat, traversed N to E, by the Victoria, and drained either by it or its affluents. It contains a great number of lakes, several of which, as the Kulkas, Kowalew or Sobbesse Schanzhausen, and Great Botkinsen, cover a large area. A considerable part of the surface is also occupied by forests. Much of the arable land is only of indifferent fertility, and is not very carefully cultivated, but several rich alluvial tracts occur, chiefly along the banks of the streams, and raise all kinds of grain beyond the wants of the inhabitants. The meadows and pastures, also, are excellent, and rear vast numbers of horses, horned cattle, sheep, and swine. The minerals are of no consequence, and neither trade nor manufactures have made much progress. The government is divided into 13 circles—Kala, Flator Grandens, Kunka, Lofan, Maranwerder, Rosenberg, Schlochen, Sobets, Stramburg, Stahm, and Thora. Pop. (1849) 631,046.

MARINWEEDER, a town, France, cap above gov. on a gentle eminence on the Morlan, about 2 m. E. of the Viala, 43 m. S.E. Daurig. It is well built, has four suburbs, and contains an old castle, partly used as a prison, and partly occupied by the courts of justice and other local courts, a handsome cathedral or town church of early date, with a tower 170 ft. high, some finely-painted glass, and several ancient tombs, particularly of the Teutonic knights, a gymnasium, two asylums, one for soldiers who have lost their sight, and another for their children, a house of refuge for destitute children, and an hospital. The manufactures consist of woollen and linen cloth, leather hats, beer, bradys and liquors. There are also several mills, and four yearly markets. Marinwerder is the seat of several courts, particularly one whose jurisdiction extends over the whole of W. France. Pop. (1846) 6222.

MARJESTAD a town, Sweden, cap. Nix, at the mouth of the Tide, in a small bay in the S.E. shore of Lake Weser 157 m. W.S.W. Stockholm. It is the residence of a governor and seat of several public courts. It built chiefly of wood arranged in spacious and regular streets contains a beautiful and finely situated church, court-house, and other public buildings on an island formed by the mouth of the Tide, and connected with the town by a bridge a prison and post-house and has a trade in corn. Marjestad was once the see of a bishop, and in the vicinity forming a conspicuous object from the lake, are the extensive and picturesque ruins of the bishop's castle. Pop. 1500.—The lake, also called SKANARÖN, lies chiefly between lakes Western and Western, and forms part of W. Gothland. It is well watered, and drained chiefly by Lake Western is generally flat, though possessing some elevations, chiefly on the banks of the lakes, and rising, in some cases, 2000 ft. above them. There are some marshes. Wood is abundant. The soil is partly sandy, and partly argillaceous-calcareous, and generally fertile. Lin is the chief crop. There are rich iron and alum mines, quarries of building-stone, and beds of potter's clay and it contains the two most important glass-works in Sweden—Brunne, and Arana. It is divided into 14 districts. Pop. (1849), 178,897.

MARJETTA, a town, U. S. S. S. Ohio, on both sides of the Muskingum, at its junction with the Ohio, 90 m. E.S.E. Columbus. It is regularly laid out in wide streets, and compactly and neatly built. It has a courthouse, jail, four churches, a bank, market-house, literary female academy, lyceum, and a college, founded in 1831. It is the oldest town in the state, having been founded in 1788. Pop. 1900.

MARIGLIANO a town, and com. Naples, prov. Laverio, 17 m. E.N.E. Naples. It is regularly built, has three handsome churches, and an annual fair. Pop. 7214.

MARIGNANE (Latin, *Martine Chelone Anthonis*), a town, France, dep. Bouches-du-Rhône, 18 m. S.W. Aix, on a lagoon of its name. It is tolerably well built, has straight but narrow streets, an old castle, which is disappearing process, and some trade in wine. Pop. 1869.

MARIGNANO See MARIGNANO.

MARIGNIER, a vil. and com. France dep. Haut Garonne, prov. Fougny E. B. Garonne, a bank Arve, with a modern church, and a trade in corn, fruit, and excellent wine, the produce of the district. Pop. 1900.

MARIGOT.—1 A bay and is, French W. India, N. coast of Martinique. There is good anchorage in the bay in

4 to 7 fathoms sandy ground. The town is protected by a fort, which stands on the E. side of it.—2 A bay, W. India, Isl. St. Lucia, W. coast.—3 A town, Guadeloupe, and another, Martin-Gabriel. See CAPITENRI.

MARIGUANA, one of the most of the Bahama lake, having Cayce Passage on the S.E., and Mariguana Passage on the N.W. It is about 26 m. in length and 3 m. to 5 m. in breadth lat. 23° 22' N.; lon. 72° 57' W. (a).

MARIN, —1, A town, French W. India, of Martinique, S.W. coast, with a good harbour. Pop. 2907.—2, A small town, and port, Spain, Galicia, prov. and 4 m. S.W. Pontevedra; with a church, townhouse, prison, two schools, and several large storehouses for curing mardines, and selling other fish. Pop. 1299.

MARINDUQUE, one of the Philippine isls. between the S. portion of Luzon and the Isl. of Mindoro, lat. (S point) 13° 7' N. lon. 121° 7' E. (a.) about 60 m. in circumference. It is fertile and cultivated.

MARINELLA a small seaport Sicily, prov. Girgenti, near the mouth of the Belled 14 m. E.S.E. Marra. A delivery of anchovies and mardines is carried on at it, but its chief claim to notice is its site near that of the ancient Selinuntum, and its ruins, consisting of the stupendous remains of three Doric temples, the largest of which covered an area of 834 ft. long, by 54 ft. broad, and has still some columns standing, the lower diameter of which is 104 ft.

MARINER, a town, Sicily, prov. and 15 m. S.E. E. Palermo. Pop. 6500.

MARINUS (Latin, *Marinopolis*), a town, France, dep. Puy-de-Dôme, at the confluence of the Morge with the Allier 15 m. N.E. Clermont. It is a small but well built handsome town, and contains numerous churches, and manufactures of chamois leather. Pop. 3269.

MARINHA (GRAND) a vil. and par. Portugal, prov. Estremadura, com. and 8 m. from Leiria, in a sandy and also marshy district. It has very extensive glass-works. 1850.

MARINII LA, a New Granada, prov. and 50 m. S.E. Antioquia lat. 6° 41' N. or a picture 5705 ft. above the sea level. Pop. 4918.

MARINO (see Fowles) a town, Papal States, com. and 18 m. S.E. Rome, a little N. of Lake Albano. It is a large place, with a castle. Pop. about 6000.

MARINO (RAV) a town and small republic, Italy. The republic consists of a rugged tract; area about 17 sq. m., of a nearly circular form, and enclosed on all sides by the Papal States, 17 m. N.W. Urbino. It is the last surviving representative of the Italian republics, and, not so much by following as by lagging behind the improvements of the times, has preserved its independence for 14 centuries. It has no printing press, machinery is common, and still lately, the gaming-table furnished part of its revenue. By its constitution, which is unwritten, the legislative assembly of a general council of 60 elected by the people, and the executive of two consuls elected every six months, and superintended by 12 members of the general council, of which members two-thirds are changed every year. The judicial office is confined only to a stranger who must be a doctor of law, and holds office for not longer than three years. The army numbers about 40 men. The republic possesses, in all three castles, four convents, and five churches.—The town, San Marino, occupies the crest of a rocky mountain, but the principal inhabitants reside in the hamlet of Borgo, at its foot, where shelter is obtained from the cold winds which blow over San Marino, and often keep it covered with snow when the low grounds are enjoying a comparatively summate temperature. The principal object of interest in San Marino is a superb cabinet of medals amounting to upwards of 40,000. The independence of the republic has been repeatedly threatened, at one time by the dangerous vicinity of the Malatesta of Rimini, at another by the intrigues of ultramontans, and at another by Napoleon, who had issued a decree for its suppression, but was induced to rescind it, mainly by the magnanimous efforts of Antonio Onofri. The same patriot afterwards nobly plucked his name, and obtained its formal recognition by the Congress of Vienna. A marble bust in the council chamber, and an inscription on his tomb gratefully record his services, and justly award him the title of "Father of his country." Pop. in, including Borgo, 1900; of republic, about 7000.

MARIPOCA a vil and par Brazil, prov and 35 m W N W Rio-de-Janeiro, on a small river of same name. It has a parish church and some trade in sugar, rum, molasses, coffee, and cattle. Pop. 1800

MARIPU, a small tn, Brazilian Guiana, b. bank Hanyara, about 40 m. from the Amazon. It has a parish church, and is inhabited chiefly by Indians, who subsist chiefly by hunting and fishing. Europeans who take up their residence here are very subject to intermittent fevers.

MARIQUITA, a tn. New Granada, dep. Cundinamarca, cap. prov same name, on the Magdalena, 10 m W Honda, lat. 6° 16' N lon. 76° W Formerly celebrated for its gold and silver mines now long abandoned

MARTIMO [see *Herve or Martima*], an isle off N W coast Sicily forming the most W. of the Egades, lat. 38° N lon. 12° 5' E. Its length is about 4 m., breadth about 3 m. It is mountainous and barren. At its N E extremity is a castle, seated on a steep rock.

MARITZA a considerable river, Turkey in Europe, prov Rumelia, formed by the junction of two principal head streams which flow from the S. slopes of the Balkan mountains, from sources about 40 m. apart. The junction of the streams takes place near Paphos, about lat. 43° 10' N, from which point the river flows S. E. to Adrianople, where it bends to the S. W. and following this course, with pretty numerous windings, falls into the *Ægean* Sea, about lat. 40° 50' N. Its whole course, from the junction of the head streams to its mouth, is about 180 m. Its principal tributaries are the Toudja, which joins it a little below Adrianople, the Erkene Kial, and Ipsala, all flowing from the N. E. and the Uzunja Arda, and Tcherna from the S. W., besides numerous smaller streams. The Maritza thus forms the great central channel by which the entire province is drained.

MARJUL, a tn and seaport, Russia, gov and 150 m. S. E. Kiewersk, on N W shore of the Sea of Azof at the mouth of the Kalynus. It contains two stone churches and has a good market. The inhabitants, almost all Greeks, whom the Empress Catherine II. transported, very much against their will, from the Crimea, carry on a considerable trade, for which their position gives them great facilities. Pop. (1851) 4698

MARLE, par Eng Somerset, 4804 ac. Pop. 1245
MARLE (or *Marle*) a village, which, with the Belgian prov Antwerp, flows N into N. Brabant, past Brda, turns W assumes the name of Dintel, and enters the Velle Rik after a course of about 40 m. in which it receives several affluents. It is canalized and navigable to a considerable extent.

MARLEH, a tn., E. Africa. See *MARADIBU*

MARLBURY par Eng. Lincoln 422 ac. Pop. 115

MARLDORF a tn. in Baden, Lake circle, 6 m. E. N. E. Constance. It is walled, has three gates two suburbs, three churches, a castle, a schoolhouse, and an hospital. P. 1476

MARLOD a par. Wales, Pembrok. 2478 ac. P. 508.

MARLOW a tn. Marklenburg-Schwarzw., circle Wurttemberg, on the side of a hill, above the Becknitz, 15 m. E. N. E. Kottack with a church, a distillery, and two mills. P. 1391

MARLOW (GREAT AND LITTLE) —1, (Great), a par. bor. and par. England, co. Buckingham. The town is beautifully situated on l. bank Thames, here crossed by a handsome suspension-bridge, 29 m. W by R. London. It contains

of two principal and three smaller streams. The market-house is a spacious building. The church is also a fine stone structure, with a lofty and elegant spire. There are four chapels—one each for Independents, Baptists, Wesleyans, and R. Catholics, the latter a very handsome edifice—a free grammar-school, and a number of charities, including a set of almshouses, two large paper-mills, and two breweries; and rope-making and the manufacture of holy-linen, caps, linen, and covered wine, are pretty extensively carried on. There is also a considerable trade in corn, malt, coal and timber. It sends two members to Parliament. Registered electors (1851) 854. Area of par., 5152 ac. Pop. of bor. 4495.—2 (Lanc.) A par., about 18 in N.E. Great Marlow Area, 5346 ac Pop. 694.

MARMANDE (Lath. *Mormanda*), a bn. France, dep. Lot-et-Garonne, 81 m. N.W. Agen. It crowns a plateau, which rises rapidly from the banks of the Garonne, here crossed by a handsome bridge of a single arch, and is a pleasing, well-ordered town, with somewhat of a venerable aspect, many of its houses being timber-framed. It has several tolerable squares, a townhouse, a cathedral, college, and hospital. Several handsome fountains. Manufacture of hats, woolen stuffs, brandy, leather, and cordage; a commodious and much-frequented harbour and a trade in grain, flour, wine, brandy, dried prunes, tobacco, hemp, &c. Pop. 5199.

MARMARA (Sea of) Turkey. See **MARMORA**.

MARMARON, a co. Hungary, circle Thither. Thence bounded, N.E. and E. by Galizia and Bukowina, S. Transylvania, S.W. by Szekesvar and W. by Ujpest. Its greatest length, S.E. to N.W. 90 m., greatest breadth 45 m. area, 2884 sq. m. It is very mountainous, being traversed in all directions by branches of the Carpathians. The principal river is the Tisza, which takes its rise in this co. in two streams, called the Black and White Thames, flows through it, and receives numerous affluents within it. There is very little arable land and the crops raised fall far short of the consumption. The hills are, in general, well wooded. Among the minerals are silver iron, and precious stones, particularly those called Hungarian diamonds, but the most valuable mineral product is rock-salt, which is found in extensive beds in several districts and is annually worked to the extent of more than 25,000 tons. The great majority of the inhabitants are Rumanians, and next in number are Wallachians. Hungarians live in five localities, and Germans only in one. The county is divided into five districts, of which Szeged is the capital. Pop. 170,000.

MARMINGOT () a vil and com. Italy Lombardy gov. Milan prov. and 5 m. N.W. Mantua, on the high road between Mantua and Brescia, near the Mincio. It has a church, a copper mill, and the ruins of a magnificent palace erected here in 1489 by Frederick Gonzaga. Pop. 2310.

MARMOLÉJO a tn Spain Andalusia prov. and 22 m. N.W. Jaen. It is well paved has two squares, a parish church, two chapels, a townhouse, prison, hospital, orphan asylum, two schools, and the remains of an ancient castle. Near it are much esteemed mineral waters. Pop. 2020.

MARMORA (LA) a vil and com. Italy Piedmont, div. and about 22 m. from Corti with a church some manufactures of coarse woollens and a trade in cattle and dairy produce. Pop. 1167.

MARMORA, or **MARMARA** (SEA OF) (anc. Propontis), an inland sea, lying between European and Asiatic Turkey or between A.E. Europe and the most W. part of Asia, communicating with the Mediterranean by the narrow Strait called the Dardanelles, and with the Black Sea by the Bosphorus. Length from Gallipoli to the head of the Gulf of Ismid, 177 m., greatest breadth, which is near the centre, or about 100 m. 52° 15' N. rather more than 50 m. With exception of the Gulfs of Ismid and Moudania, both on the Asiatic side, it has no very marked indentations. It has several islands, of which the largest is Marmora, situated towards its W. end, whence the sea derives its name, there or four other islands lie in its vicinity, and at the E. end on the Asiatic coast, and not far from Constantinople, is a group called the Princes Islands.—The Island of Marmora is 11 m. in length, and 5½ m. in breadth, and called by the Turks

Marmar Adasi; it is moderately high, with a range of conical hills running along it, which, when coming from the W., has the appearance of two high hills. The S.W. extremity of the island is in lat. 40° 30' N. lon. 27° 30' E. (a.)

MARMORICE, or **MARMARARA**, a tn. and by, Asiatic Turkey, near Andania, S.W. coast, N. of the island of Rhodes; lat. (anc.) 38° 51' 5" N. lon. 28° 19' E. (a.) The town is very picturesquely situated at the head of the vast

MARMORICE.—From a sketch by Lord, Ann. B.S.

bay near the site of the ancient Phrygia, vestiges of whose port still exist. It is irregularly built. Its houses mass and separated by narrow streets. In the highest part are the ruins of a modern castle, and behind it is a mosque. It has some export trade in timber, honey, turpentine, wax, lacquer, &c. The harbour or bay is extensive and magnificent, though the entrance is remarkably narrow. It was used as a place of refitment by the British fleet in conveying the expedition to Egypt.—CAPE MARMORARA, at the mouth of the bay is in lat. 36° 43' 54" N. lon. 28° 20' 45" E. (a.)

MARMOUTIER, or **MARMONIERSTADT**, (Latin *Mauri Monasterium*) a tn. France, dep. Bas-Rhin, 17 m. W.N.W. Strasbourg. It owes its name to an abbey founded in the sixth century and richly endowed by Charlemagne II. The church, whose height is said to be of the ninth century, is a handsome and curious structure, finely proportioned and adorned in the interior with grotesque figures. Marmoutier has breweries, bleachfields, tile-works, and potteries, and some trade in cattle. Pop. 2480.

MARMULLANE par. Ireland, Cork; 529 m. P. 2218. **MARNE**, a vil Denmark, duchy Holstein, 8 Dittmarsh, near R. bank Elbe. It has a small harbour with 6 ft. water, a considerable trade, important general and cattle markets, and a bathing establishment. Pop. 1300.

MARNÉ, an island dep. France, bounded N. by dep. Ardennes N.W. Alsace, S.W. Seine-et-Marne, S. Aube, S.E. Haute-Marne, and E. Meuse, lat. 48° 50' to 49° 14' N. lon. 5° 30' to 5° E.; greatest length, 67 m., greatest breadth, 60 m. area, 3116 sq. m. It forms a kind of plateau, in some parts attaining a height of nearly 1200 ft., but only by a long and gradual ascent, and is composed almost throughout of a subsoil of chalk, with a thin covering of earth, which is by no means fertile. The whole department belongs to the basin of the Seine, the greater part of the surface being drained by the Marne, which traverses it easterly but almost centrally S.E. to N.W. In the S.W. it is traversed, for a short distance, by the Aube, and, after its confluence, by the Seine. The Aisne entering it from dep. Meuse, flows N. near its E. frontier; and the Sappe and Vela, which have their sources within it, traverse it towards the N.W. It contains a considerable number of small lakes, which are well supplied with fish. The only district which can be considered unhealthy is in the W., where stagnant pools and marshes still prevail, notwithstanding many efforts which have been made to drain them. Though the soil as has been said is by no means fertile, about three-fourths of the whole area admits of some kind of culture by the plough, and only one-fourth is absolutely waste. Nearly one-fourth is wood. The principal crops are wheat, rye, barley, oats, and clover, particularly the last two, which more than supply the consumption. Potatoes, coleworts, and cabbages, are

on the W coast, is at Cape Agadir, or rather Agadir, lat. 30° 57' 30" N. Adjoining the central chain are several tablelands of great extent, consisting of irregular plains and, at a little distance from it, M., extends the maritime chain now called El-Rif, and formerly the Atlas Minor, its general height is from 2500 ft. to 3500 ft. Of the interior chains which run parallel with the Atlas in the desert, in the E.E., there is little known, but there is no ground for supposing that they attain considerable magnitudes.

Rivers.—The height of these mountains, and the general uniformity of their slope on both sides, procure for Morocco the distinction of having the largest rivers of all N. Africa. Of these, the rivers flowing from the N side of the Atlas have the shorter course, but are well supplied with water, thus running S. whether directly into the sea, or into the sands of the desert, extend much farther but are dry in summer. The Mulais or Mulais, rising in a principal knot of the Atlas, nearly in lat. 32° 30' N., flows N.E. to the Mediterranean, with a course of 350 m. This river in the lower part of its course, formed suddenly (when it was called Mulais or Mulucha) the E. boundary of Mauritania Tingitana. In all the revolutions which the political divisions of the country have since undergone it has been constantly selected as a boundary (owing, doubtless, to its vicinity to the desert of Agades) and now its valley forms, in the maritime district, the boundary between Morocco and Algeria, as settled by treaty in 1845. The boundary-line leaves the coast at lat. 31° 11' W., 8 m. E. of the mouth of the river. The Sebou descends from Mount Ségou W. to the Atlantic in a course of 200 m. The rapidity of its course, and the sandbanks at its mouth, seem to indicate that it can never be rendered navigable. The Oum-el-rébiç [mother of verdure], which enters the sea at Aramlat lat. 33° 17' N., has a course of about 190 m. During spring, and early in summer it cannot, in general, be forded with safety. The Tensift, which passes near the city of Morocco has a length of about 180 m. It is a large and full river yet formidable in many places. Near the capital, it is occasionally bridged by 37 arches, which may be reckoned among the handsomest structures in Africa. Of the rivers which run into the desert, the most E. the Gharaboua to have a course S.E. E. occasionally traversable for 300 or 400 m. The Ziz, which, with its numerous affluents, waters a very fertile and populous country is wholly spent before it attains half that length. The Daras, which rises in the central and most elevated portion of the range of Atlas (lat. 31° to 32° N.), first runs S. for nearly 300 m., forms a vast lake, and then, turning W., enters the ocean in lat. 29° 18' N., after a course of 700 m. the lower portion of its bed, however, is perennially quite dry.

The lake El-Dahla, formed by the floods of the Daras, is reported to be very large, having perhaps three times the surface of Lake Geneva, but it disappears annually, and gives way to richly cultivated fields. Shallow or shallow pools, which the hot season converts into salt-pans, are numerous along the coast. The fresh-water lake of Jebel el Akhdar [green mountain] which lies about 30 m. N. of Morocco, is compared, by Leo Africanus, to Lake Hohen in Tuscany.

The coast, being generally low and little broken, offers few good harbours of those, Tangier and Mogador or Swire, are the best, the rest, as El-Arrouch, Sio or Salao, and Rabat, Melchida, Azamor &c., are but open roadsteads at the mouths of rivers.

Geology.—Embracing the geology of this remarkable region, there is scarcely anything known. Though the summits of Atlas often rise into peaks, they never exhibit needles or jagged outlines, with acute angles, their contour is characterized rather by rounded heights clothed with luxuriant forests than by rugged and precipitous forms. It is vaguely stated that granite is the prevalent rock in the main chain of Atlas, and that on its west transition Massicot and sandstone. The soil, washed down in abundance from the hills, bears no trace of volcanic substance. A broad tract of lowland, along the shores of the Atlantic, consists wholly of sand and gravel, and appears to have been formed by the sea.

Mines.—Of the mineral treasures said to be contained in Atlas, the richest and best known are the copper ones, which are found chiefly in the S. continuation of Atlas, between the rivers Sio and Tensift. The mines are wrought most actively near Tola and Gifras, and the produce is brought for sale to

the market of Tirodant. There are reports, also, of iron mines in the interior and of lead found in the vicinity of Tassana. The khal or ore of antimony, used by Moorish talismans for darkening the eyebrows, is obtained from Toulia. Amethysts of great size and beauty have been found in the recesses of Atlas.

Climate.—The climate, W. of Atlas, is in general much more temperate than might be expected from such low land tables. This is due to the circumstances that a lofty chain of mountains, covered in some parts with perpetual snow, intercepts the hot winds from the deserts of the interior, so that the equable and refreshing sea-breezes prevail throughout the year. Hence the extremes of temperature lie within moderate limits: the thermometer in the plains, rarely falling below 40° Fah. in the winter; while, even in Tirodant, the chief town of Sio, it does not rise above 95 in summer. The mean annual temperature of the city of Morocco, at an absolute elevation of 1554 ft. is about 64°, which may be assumed, with probability as the mean of the whole country W. of Atlas. In the region E. of the mountains, the difference between the extreme temperatures increases rapidly with the distance from the sea, and intense cold, often assumed erroneously as a proof of great elevation is felt in winter, while, in summer, the heat of the plains is insupportable. In respect of salubrity, Morocco is highly favoured, being quite free from endemic diseases, notwithstanding the filth of the towns, and the general neglect of sanitary precautions.

Vegetable Productions.—With a genial climate and generally fertile soil, Morocco might easily become, under an enlightened government, one of the most productive countries in the world. Of its Flora there is as yet but little known. The forests of El-Rif contain, among other species of oak, that which bears edible acorns, and also that which yields cork. In the higher regions of Atlas are found the Aleppo pine, the cedar of Lebanon, many varieties of cypresses and of juniper yielding fragrant gums. The *Pinus decolorata* or *decolorata*, and the *Chamaecyparis humilis* or dwarf-palm, form extensive woods N. and S. of Atlas. In the maritime region grows the *Elaeagnus argentea*, from the olive-like fruit of which is extracted an excellent oil called arpio, consumed in large quantities in the country though little known in Europe. It is said that the sugar-cane was formerly cultivated with success throughout the W. part of Morocco. Among the wild plants of the S. provinces, may be mentioned the caper and avoird. The latter of which, in particular, supplies an important article of commerce.

Cultivation.—Notwithstanding these favourable circumstances, the agriculture of Morocco is in the lowest possible condition. The soil is but rarely scratched with a wooden plough, neither oxen nor capital and the labours of the husbandman, and the annual production is calculated barely to supply the wants of the country. Hence, when any failure of the harvest takes place, the most dreadful famines afflict a land naturally capable of rearing abundance. Yet, in Morocco, the cultivator of the soil is also its proprietor, and the taxes in which he is legally assessed do not exceed a fortieth part of the produce. But, on the other hand, right of property and law are of no avail under barbarous despotism, and a system of administration which is no better than organized pillage and oppression, besides, a myriad and short-sighted policy discourages a free trade with, and exportation of articles of food to, the Christian states of Europe. The cultivator therefore, never thinks of great gains nor of distant markets, sure of being despoiled by those above him, he takes no pains to improve his condition, and labours only to supply the indispensable wants of one doomed to poverty. The cereal crops are wheat, which is excellent; barley, of inferior quality, and chiefly given to the cattle and swine, which is said to be extraordinary; grain on the S. side of Atlas. But durrah or millet (*Sorghum vulgare*) constitutes the chief support of the population, though beans, the excellent sun, and even osany-seed, are consumed in large quantities by the poorer classes. The vine is cultivated only near the towns, not, however for the making of wine, but merely for the sake of the fresh grapes and raisins. All the fruits of E. Europe, and the Canary Islands, are to be found here, rarely exquisite, but in sufficient abundance. Among the medicinal and medicinal productions must be mentioned saffron, mace, pimento, arise-seed, cumin, coriander, and calophyll.

Liquor and manna, too, are brought from S. This last of manna might be easily increased, but its length and variety would indicate only the capabilities of the country, and not the extent of its cultivation. It must be borne in mind, that in Morocco the rude wooden plough is often held by a woman, and drawn by an ass, or an ass and heifer yoked together; and that a large portion of the population leads a pastoral life, subsisting wholly on the produce of their herds and flocks, or else on game and the wild fruits of the forest, particularly on the *Bidr* or Lotus of the ancients (*Zingibier Lotus*).

Animals.—The lion still haunts the plains on the sides of Atlas, particularly near the springs, followed by panthers and cubs. The wild boar inhabits the woods, and is seldom chased. Gazelles, and several species of large antelope, especially the babian, enter the country from the desert. Of Pachydermata—elephants, rhinoceroses, &c. which, according to ancient writers, at one time tenanted these W forests, there is now no trace. More formidable by far, however than herds of prey is the locust, which, coming from the desert, makes its appearance in Morocco in May, when it lays its eggs. The locusts breed some forty or more miles from the coast, and in another month they take wing, consuming all vegetation in their progress, spreading devastation over the fields, and terrifying the people with the threat of pestilence and famine. They are gathered and eaten in large quantities, dressed in a variety of ways. The ostrich is chased on the S. frontiers of Morocco, and the ostrich feathers brought from that quarter are the best known in commerce.

Stock.—The wealth of the Arab tribes who are scattered over Morocco, consists chiefly in their droves of herds, and flocks. In the interior, and S. districts, the flesh of the camel is generally eaten. The spotted small horses, for which this country was famous in ancient times, are still numerous, particularly in the S. provinces, but the prohibition to export horses, and the usurping exercise of the Sultan's prerogative of taking the best horses wherever he can find them, effectually hinder the development of this branch of industry. Horned cattle are numerous, particularly in the N. districts, so that their number may be estimated at 5,000,000 or 6,000,000, but owing to defective breeding or treatment, the cows milk in Morocco is much less nutritive and abundant than in Europe. The bulls are generally small, and are employed by the Arabs in the labours of the field—bullocks being little known in this country. Still more important are the sheep, supposed to number at least 45,000,000. The native variety is much larger than the European sheep, and has a broad tail loaded with fat, and often weighing, in a well-conditioned animal, 50 lbs. The wool is frequently of the finest possible description, and is said, moreover, to increase in weight after being kept some time in store. With a little care and management, the fleeces of Morocco might be rendered a source of great wealth. It is remarkable that while tawny or even black fleeces are common in Spain, the wool of Morocco is almost invariably white. The goats are estimated at 10,000,000 or 15,000,000, and furnish a principal article of export—the well known Taffelt, Bafan, or Morocco leather.

Manufactures.—In general, among the rural population, each family supplies all its own wants. Every woman spins, and every man knows how to weave the coarse cloth which forms his bark or mantle. In the towns, however, some manufactures have sprung up. Fez makes and exports great quantities of the cloth eye which bears the name of that city, and which are much admired for their fine *seret* dye, obtained from a berry found in its vicinity. The tanners of Magueira have a great reputation, though surpassed in some respects by those of Morocco, who can render the lion's or panther's skin as white as snow and as soft as silk. This is done by means of two plants, the Tira and Tesya, natives of Atlas, and unknown to Europeans. Of the fine Moroccan leather Fez furnishes the red, Taffelt the green, and the city of Marrakech the yellow. The Morocco carpet, called by the Moors Sherah and Katchah, and much esteemed in Europe, under the name of Turkey carpet, are made chiefly in the provinces of Desalle. The Jews alone do business as goldsmiths and jewellers.

Commerce.—The commerce of Morocco may be conveniently considered under three heads:—1. Commerce with the West, carried on by means of the caravans to Mecca, which have

at once a mercantile and a religious character. 2. With Soudan or Negroland, across the Great Desert; 3. The maritime trade with European States. The pilgrims and merchants who mean to join the H. caravan, assemble in Fez seven months before the time of the festival in Mecca. The caravans proceed first to Tena, and thence holding an inland course to Kairouan; its mercantile followers, however, contrive to visit Algiers, Tunis, and the other chief towns near its route, and, being constantly engaged in petty dealing with the tribes through whose country they pass, they are not wearied with the slowness of their march. Halting for some time at Tripoli and Alexandria, they at length reach Mecca, where, at the time of the H. there is a fair lasting five months, and, perhaps, in some respects, the greatest in the world as it sometimes brings together 200,000 men and above 100,000 camels, from all parts of the Mahometan world. Here they buy Persian silks, perfumes, spices, and some Indian goods; to which are afterwards added cotton and raw silk in Calce. The capital thus expended is supposed to amount to 2,000,000 of dollars (250,000 £). The goods exported by the S. channel are colonial, indigo, alum, fine leather, woollen cloths, and cotton shawls. There is also much business in buying and selling done at the towns named through on the march. The caravans, or, to use the language of the country, Kafilahs for the interior assemble at Taffelt, whence they proceed, in the first instance, to Akka or Taiz, on the borders of the desert S. of Atlas. Though the Kafilahs going S. are much less numerous than those destined for Egypt or Mecca, yet they often reckon from 16,000 to 20,000 camels, and 500 or 600 men. They halt in the desert at Tauder or at Arwaja to procure salt, and then advance to Timbuctoo, where they meet the merchants from the S. and dispose of their goods, chiefly salt, wax, waxen candles, molasses, Turkey daggers, tobacco and looking-glasses, for ivory, rhinoceros-horn, incense, gold dust, ostrich feathers, gums, malagathia or Gunia pepper, cardamum, *asafoetida* indigo and slaves. This traffic yields them a great profit. Of 4000 black slaves annually brought into Morocco by the Kafilahs from the S., not more than half remain in the country: the rest are profitably disposed of in Algiers and Tunis. The capital advanced on each expedition to Timbuctoo is estimated at 1,000,000 dollars (125,000 £), and the returns are said to exceed in value ten times that amount. The trade by sea with European states is said to have been opened, in 1561, by Thomas Wadham, an Englishman, who then obtained, at Agadir, a cargo of sugar dates, and almonds. The first of these articles is now no longer exported, but to the others are added wax, oil, skins, and leather, wool, copper and the various produce of Magreb, brought by Kafilah, and exported from Mogador. Of the whole of this commerce with Christian states, two-thirds in amount are carried on with Great Britain: the imports from which may be valued, in round numbers, at 2,500,000, carried in 16,000 tons of shipping. Five cities, namely, Fez, Morocco, Magueira, Bahat, and Tetuan or Tatan have mints, and coin gold, silver and copper. Formerly the Jews, who managed the mints, debased the coin, but, of late years, this evil has been corrected. The exportation of the national coin is strictly prohibited but, as foreign money is admitted, the Spanish dollar forms the chief ingredient of the circulating medium. In order to obviate the inconvenience which might arise to commerce from sudden attacks of plague or other epidemics, in a country so ill organized, the foreign coin minted at Tangier are prohibited, by the emperor or sultan, a council of health, empowered to make such quarantine regulations as circumstances may render necessary.

The inhabitants.—Race.—An important element of weakness in the social and political constitution of Morocco is to be found in the division of its population into several distinct races, which, so far from uniting repel one another. The Berbers may be regarded as the oldest inhabitants of the country, they are divided into Amalg and Shilha, of whom the latter, inhabiting the recesses and high plains of Atlas S. of the capital, seem to retain traces of a comparatively advanced civilisation. They devote themselves to agriculture rather than to pastoral pursuits, and, though habitually peaceful, are distinguished also for their courage and warlike, in consequence of which war is taken by the Government not to tempt nor provoke them to the use of arms. The Amalg inhabit the mountains of Fez-Rif, and parts of Atlas. The Arabs

from the bulk of the rural population in the plains. Some of them are cultivators, the poorest and most oppressed portion of the population; some are Bedouin, most of them inhabiting the country with the victorious successors of Mahomet; while others claim Hamyurite descent, and a much more ancient settlement. In the towns along the coast we find the Moors, a people now physically distinct, but whose origin, as a distinct race, could not be satisfactorily explained. The belief that their name was derived from a Greek word which signifies black is evidently without foundation; for the inhabitants of the N. W. angle of Africa are not and never were black, and, besides, the Romans, though they used the name *Mauri*, preferred calling the people Mauruli, a variation which evidently discomfutes the proposed Greek etymology. It is more likely that the name *Moor* was derived from a Semitic word (Hebrew, *Makur*) signifying the West, so that it was in fact equivalent to the *Maghrib* of the present day. At all events, the inhabitants of the Iberian peninsula know the occupants of the opposite African coast under no other name than that of *Mauruli*, *Mauri*, or *Moors*, and consequently when, at the commencement of the 8th century the Arabs carried their victorious arms from W. Barbary into Spain, they were generally called, by Spanish writers, the *Moor*. This name, consisting the Berbers as well as the pure Arab tribes and dynasties which for some centuries ruled the S. of Spain. The Mahometans expelled from Spain in the 15th century were, therefore, all called Moors or Moriscos (*Maurani*). They were indignantly received by their Arab and Berber brethren in Africa, who seem to have viewed them only as strangers and intruders. A remnant of the refugees, however, gradually found shelter in the seaport towns, and from them are unquestionably descended that portion of the population of Morocco who are at this day distinctly styled *Moors*. The chief physical characteristics of this people is their complexion, and it is said that, in the harem, extreme corpulence is considered by the ladies as the first of personal attractions. Their manners and customs differ little from those of Egypt, but the Moors are more indolent and much less social than the Arabs. A considerable number of Jews is to be found in all the commercial towns of Morocco; where, in spite of this opposition to which they are subjected, they often accumulate wealth, being the sole dealers in bullion and holders of capital. But, in the interior also, among the Berbers in the valleys of Atlas, there are many villages and communities of Jews—Jews in faith at least, if not by descent—which lay claim to high antiquity. To these various ingredients of a checkered population, must be added the negroes and their posterity of every shade, who are particularly numerous in the S. provinces. The children of black mothers are despised but, though inferior in rank, they are superior in energy, and in civil wars and revolutions have always played a principal part.

Civilization.—The civilization of Morocco is in a low and fallen condition. The attention given at the schools in the chief towns, and completed at the university of Fez, entitled *Uar al-His* (the school of knowledge), does not go beyond the theology of the Koran. The public libraries, once famous, are now dispersed true wastes; and whatever monuments of art are to be found in the kingdom, point to past ages, particularly to those when literatures and art flourished under the Arabian dynasty in Spain. In the interior of the country, at present, there are extensive tracts without schools or even mosques, and the obstructions in the way of any intercourse, arising from the jealousies and local feuds of different tribes, towns or extended communities, prevent the natural development of civilization. Made in the only art for which the Moors are said to manifest a decided taste, but they have not as yet arrived at any proficiency in it.

Government.—The sovereign or Sultan of Morocco, styled, by Europeans, emperor, bears the title of Emir of Mâmorin, or Lord of the true believers. He is ordinarily called, by his subjects, simply *Said*—our Lord. He is absolute in the strictest sense, the lives and properties of his subjects are at his disposal, from him alone proceed the laws, which he makes and annuls at his pleasure. It is the Sultan's custom to give, in whatever part of the kingdom he may be, public audiences or *darwazas* four times a week. On these occasions he is surrounded by his officers of state and his guards, and is distinguished from them only by an umbrella held over his head. But after all, none to the Sultan is attainable only

by those who can afford to fee a corps of officials. This imperial revenue is derived from arbitrary exactions on property from duties on imports and exports, from monopolies and from fines or confiscations. The Sultan's treasury, called the *Zai-el-mak* (House of the funds), is in Mâmorin, a mysterious and impenetrable structure, guarded by 8000 blacks. It is supposed to contain money, jewels, and bullion, to the value of 50,000,000 of dollars (\$11,350,000). It was formerly customary to put to death immediately the persons employed to deposit treasures within its walls. The military force, maintained by the Sultan, does not ordinarily exceed 16,000, of whom half are blacks, and of the remainder a large portion are Bedouin from the S. desert. The marine force of Morocco is at present insignificant.

History.—In the *Mauri* or *Mauruli*, Mayyll, Madones, and Gentili of ancient writers, it is easy to recognize the Moors or Moriscos, the Shellish, Amasig and Gemish or Beni Gadalsh of modern times. These people were imposed, by Roman writers, to have come from Asia and particularly from Persia, but it seems now certain that the Berber belongs to what is called the Semitic family of languages. It is not likely that the Romans, occupying chiefly the coast of Mauritania, were acquainted with the interior of Morocco, inhabited mainly with the same population. The Vandals, who held the country for some years, at the end of the 5th and beginning of the 6th century are supposed to have introduced into it the practical habits which afterwards became so characteristic of the coast of Barbary and Morocco. The Vandals being expelled, *Mauritania* appears to have enjoyed tranquillity till the latter part of the 7th century when the Arabs, fired with enthusiasm spread over N. Africa, and having taken possession of Mauritania, penetrated S., even to Sids and the borders of the desert. It was about this time that the Jews were expelled from Spain by decree of the Council of Toledo (A.D. 694), and sought refuge in great numbers on the shores of Africa.

The victorious Arabs in Mauritania remained for a long time in a state of turbulent division, without any attempt at consolidating an empire. But near the close of the 8th century, a Sherif or descendant of Mahomet, named *Zaid*, contrived to obtain such an ascendancy over the Berber tribes as to about A.D. 780, that they made him their sovereign with the title of Emir. His son and successor, of the same name, founded in 807, the city of Fez, and assumed the dynasty of the Edrisites. The S. part of the country was, at this time, in the hands of independent chieftains. It was in 1085 that the warlike sect of the Morabites (El Morabitin, or strictly bound by religion) first rose into existence among the Genaah, and on the borders of the desert. In 1055, their chief, Abu Bekr ben Omar el-Laundil, was proclaimed, under the title of Emir el-Mâmorin, sovereign of Maghreb-el-akka. His residence was in Segheema or Tâfiliat, but his grandson and successor crossed the mountains, and in 1073 laid the foundations of the city of Morocco, which thus arose with the remarkable dynasty of the Morabites or Almoravides. These were succeeded by the Almohads, the Beni Merin, and the El-Wattids, who ruled, however, only a portion of the country.

—Fez, Morocco, Sids, and Tâfiliat or Segheema, forming, in general, so many independent states. In the time of El-Wattid, the founder of the last-named dynasty (A.D. 1480-1501) the expulsion of the Moors and Jews from Spain added 800,000 souls, it is said, to the population of Maghreb-el-akka. In the middle of the 18th century, a new dynasty commenced with the ascendancy of the Sherif Hossain. The fifth of this family, commonly called *Hasan* Sherif el-Mâmorin (1679-1808), made himself master of the entire of Maghreb-el-akka, and pushed his conquests through the desert as far as Timbuctoo and Kaga. His reign is regarded as the golden age in the history of Morocco, but dividing his empire on his death-bed between his five sons, he prepared its speedy ruin. The ninth and last Moroccan dynasty is that founded in 1846, by *Mahd* Sherif el-Fihli, or King of Tâfiliat, who was remarkable, among other things, for his numerous posterity, having 84 sons and 134 daughters. From him the present (1858) Sultan of Morocco, *Mahd* Abd-ur-rhman, whose reign commenced in 1857, is the tenth in succession. His predecessor abdicated, in 1814, the sovereignty of Morocco throughout his dominions; and, in 1817, he dissolved his marine, and strictly prohibited piracy.

For an estimate of the population of Morocco, there are no certain data whatever. Jackson assumes it to be 15,000,000, Grilberg de Hamel, 8,500,000, but in every particular instance where the estimates of these writers can be subjected to scrutiny, they are found to be far in excess. There is reason to believe that the population of Morocco is about double that of Algeria, whence we may conclude that it is between 5,000,000 and 8,000,000, and probably does not much exceed 6,000,000. The Berbers appear to be much more numerous, and the black population much less so than has hitherto been supposed. (Account of Morocco, by James Gray Jackson, 4to. London, 1811. *Notes of Ali Bey el Abassi, in Africa*, 8vo, 1814; *Geographical Notes of the Empires of Morocco*, by Lieut. Washington, in the *Jour. Roy. Geo. Soc.*, 1881; *Aspects of Morocco*, by Grilberg de Hamel, Genoa, 1884; *Western Barbary*, by J. E. Drummond May, 1844; *Description Géographique de l'Empire de Maroc*, par M. Razou, 8vo, 1846.)

MAROCOCO (Arabic, *Marrakech*), the cap. city of above empire, on the N side of an extensive and fertile plain, 1500 ft. above sea-level, lat 31° 87' 31" N; lon 7° 25' 30" W. It is nearly 6 m. in extent, and is surrounded by a strongly built machicolated wall of taspie work (lime beaten in a case or frame with earth), 80 ft. high, with foundations of masonry and square towers every 50 paces. In the walls there are 11 gates. The entire space within however, is not generally covered with buildings, but comprises large gardens and open areas of from 20 to 30 m. in extent. The streets are narrow and irregular, and in many cases connected across by arches and gates, which are unpaved, and are in consequence exceedingly dirty when it rains. The houses are mostly constructed of tappy or tappa, but several also are built of stone; they are generally of one story flat roofed, the side towards the street plain and white-washed, here and there a narrow unplastered opening for a window and the apartments fronting into a court. There are several open areas through out the city used as market-places. Besides which, there is a covered bazaar, where a great variety of articles are always on sale, including milk, scarfs, shawls and handkerchiefs, cloth, linen, hardware, tea and sugar, fruits of various kinds, boots, shippers, saddles, coarse pottery, and embroidery in gold and silver in which the people excel. There are altogether 19 mosques in the city of which six are remarkable for their size and architectural elegance. On the S. of the city stands the palace, comprising a space of about 1600 yards long by 600 yards wide, and near it is the Jews quarter (El Mhish) a walled enclosure of about 1½ m. in extent, one-half of it nearly in ruins, thronged to suffocation, and excessively filthy. The Jews are the only goldsmiths, tanners, and tailors in Morocco, mostly rich, though with an outward appearance of poverty. The Moors are the shoemakers, carpenters, masons, smiths, and weavers. There are several tanning and leather-dyeing establishments, one of which is said to employ 1500 persons. The colour dyed here is confined to yellow. There are the ruins of extensive aqueducts in the vicinity of the town some of them 20 m. in length. There are also several large castles outside the walls, one of which is upwards of 1600 years old. Morocco has long been hastening to decay, and is now nearly half in ruins, the result of war, plague, and wretched government. Pop (1844), estimated at 100,000.

MAROMME, a town, France, dep. Seine-Inférieure, 4 m. N E Rouen, 7 bank Cally. It has manufactures of cotton paper and powder mills, tanneries, dye-works, and bleach-works. Pop. 2989.

MARONNE (La), a river, France, an affluent of the Dordogne, which it joins on the E bank, near Argenteuil, dep. Corrèze, after a W course of about 44 m. unavigable.

MARONT, or **MARONTA**, a large river, S. America, forming the boundary line between Dutch and French Guiana. It rises in a lake of the same name in the Tencarique Mountains, flows with numerous windings, generally N., and falls into the Atlantic, lat 5° 23' N., lon 58° 50' W. total course, about 300 m. At its mouth it is about 3 m. wide, but small covered with sand-banks; still it is navigable for small vessels for about 15 m.; but further up it is filled with rapids.

MAROOT, a town, Hindoostan, principally, and 48 m. S.E. Bahawalpore; lat 25° 15' N., lon 73° 48' E; surrounded with a mud wall, having numerous bastions. It is a consider-

able meet for grain, brought from the fertile parts of Bahawalpore, to meet the demands of the dealers, who purchase and convey it to the desert tracts seaward.

MARORE, a vil. and comm., duchy and 2 m. S E Parma, with a church, and a trade in cattle and swine. Pop. 1308.

MAROS, several places, Austria.—1 (*Bogud*), A vil. Transylvania, co. Thourough, about 9 m. from Katus with three churches. Pop. 1369.—2 (*Bogud*), a vil. Transylvania, co. Hunyad, with a church. Pop. 808.—3 (*Kagay*), or *Gross-Marosch*, a market in Hungary, circs. Hilber Danube, co. Honit, 7 bank Dunab, 23 m. N W Pesth, with two churches, and, on the opposite side of the river the castle of Ynesgrad. Pop. 2507.—4 (*Ynesgrad*), [also *Agroptis*], a town Transylvania, cap. of the Marosch Kreis on the Maros, in a beautiful and fertile flat. 54 m. N N E Hermannstadt. It occupies several hills, is fortified and generally well built; contains five churches, a gymnasium, seminary, college, a library of 60,000 volumes and a good cabinet of minerals. Not far from the town is a strong castle, in which a garrison is stationed. The district around is fertile, and produces much wine and fruit, but more especially tobacco, which is in request to all the markets of Hungary. Pop. 10,000.

MAROS [*Latm, Marosch*], a river Austria, which rises in Mount Maros, belonging to a branch of the Carpathians in the E. of Transylvania, which it traverses N E to S W passing Szasz, Szasz, and Karlsburg, enters Hungary and proceeds almost due W, forming the boundary between Hungary proper and the Banat, passing Arad and Jons 1 bank Thulau, nearly opposite to Bagedad after a course of above 400 m. Its principal affluents are, on the right, the Aranyos, and, on the left, the Nyarad, Kokol, Bebes, and Strahl. In the upper part of its course, at Lappa, it is enclosed between lofty rocks; in the lower part, it flows through an extensive plain, and becomes navigable at Karlsburg.

MAROS, a seaport in Spain, prov. Coruña and 80 m. W Santiago, lat. 42° 48' N., lon. 8° 57' W. N. end of a long narrow bay, including several hamlets, it contains about 1000 houses, and has three small squares, the principal of which is used as a market for fruit and provisions; a distant house, a primary school, a tolerable townhouse, and a church. Fishing and fish-curing are carried on there are also handlooms, and flour-mills, as well as numerous tanning stores. Imports—milk, copper, iron, wine, brandy oil, flour, tar, pine-bark, and canvas. Exports—salt fish, sturgeon, seals, paper preserved sealine, kidney beans, rye, maize, and lemons. Pop. 4782.

MAROSIACA, a kind of Italy gov. Venetia, prov. and 15 m. N E Vienna, at the foot of Mount Rosaria which is crowned by the ruins of an old castle. It is walled, flanked with towers, has five gates, a court of justice, and several public offices, three churches, an hospital, manufactures of straw and straw hats, and important cow-markets. Pop. 2800.

MAROSUJAR, two places, Austria, Transylvania.—1 (*Alz*), a market tm, co. Unter-Waldenburg, on the Maros, 26 m. S E N. Karlsburg. It has two churches, and, near it, valuable salt-mine. Pop. 1900.—2 (*Alz*), a vil. co. Nieder-Waldenburg, with a castle, a chapel, and two extensive flour-mills. Pop. 573.

MAROTI ARATON, a town Hungary Hilber Danube, co. and 10 m. N W Bara, with a four-towered handsome church, manufactures of woollen and linen, and flour and saw mills. Pop. 1900.

MARPOD, par. Isle of Man. Pop. 1884.

MARPOD, or **MARALON**, a vil. Austria, Transylvania, about 4 m. from Leschkeub, in a mountainous district. It has a Protestant church, and is inhabited partly by Saxons, and partly by Walachians. Pop. 1094.

MARQUAIN, a vil. and comm. Belgium, prov. Hainaut, 39 m. N W Mons; with two tile-works, a tannery, and a flour-mill. Pop. (agricultural), 1180.

MARQUESAS, or **MARSA ISLANDS** [French, *Marqueses*], an isl. group, S. Pacific Ocean; lat. 8° to 11° S., lon. 138° 30' to 145° W. composed of 12 islands and islets, divided into two groups the more S. comprising Fatohiua or Magalana, Motou or San Pedro, Touate or St. Christ. Hiva or Dumbou, which is the largest of this group, 35 m. long E. to W., by 5 m. to 10 m. broad, and the N. of Fatohiua, called Head's Island, by Ota; the more N. group comprises Hanapou or Adam's Island, Koua-Houa

as Washington Island, Nookahiva, the largest of all the Marquesas, 18 m long E. to W., by 10 m broad; Motouiti or Franklin Island, and Hison and Petou-othou, Kato and Rakea Islands. Their coasts are generally inaccessible, rising from the water like walls, but in Nookahiva are some excellent natural harbours. The islands are generally high, some of their summits reaching an elevation of about 5000 ft.; they are extremely broken and craggy, with a steady belt of land between them and the sea, but the intervening valleys are singularly fertile and productive, being copiously watered by streams, which form numerous cascades. Their principal food productions are peles, yams, coconuts, sugar cane, coconuts, and handsome hogs also are numerous. The men are well-formed, active, and powerful, all tattooed, but not with much taste. The women have regular features, good complexion, fine teeth, and neat hands, but Captain Belcher doubts them the extreme beauty ascribed to them by former voyagers, although he admits that they are altogether the finest of the sex he had met with in Polynesia. The people of these islands were esteemed cannibals, but Captain Belcher was disposed to qualify the charges brought against them of cruelty and ferocity. The Marquesas were discovered, in 1595 by Alonso Mendez de Neve. They were seized, shortly visited and described by Cook and the Forsters, in 1774, when Hood's Island was added to the group. In 1797 three more were discovered by an American captain called Ingraham and were named Washington Islands. In 1843, they acknowledged the sovereignty of France. The population of the whole group is estimated at 20,000.

MARQUINA a in Spain, prov. Biscay, 26 m E. Bilbao, at the confluence of two small rivers. It has a church, several chapels, townhouse, hospital, some schools, a convent, and manufactures of iron vessels and earthenware. Pop. 1188.

MARQUISE, MEXICO, or MARCA a in France, dep. P. de Calais, 7 m. N. N. E. Boulogne, on the coast, with salt-works, breweries, and tanneries. Pop. 1052.

MARR, near New York (W. Hading) 1807 m. P. 226.

MARRATXI a in Spain, Isl. Majorca, dist. and 5 m. N. E. Palma, with a church, manufactures of earthenware, several mills, and a trade in corn, wine, and oil. Pop. 1636.

MARRIATUBA, an. xl. Brazil. See *BRASIL*.

MARRICK, par. Los York (N. Hading), 5580 m. Pop. 555.

MARBOS, a par. Wales, Carmarthen, 2574 m. Pop. 155.

MARRIBIO a vil. Isl. Sardinia, near the shores of the large lagoon of Sams. It has a church, a primary school, and a trade in corn, wine, and dairy produce. Pop. 1015.

MARRUM, or MARSUM, a vil. Holland, prov. Friesland, 9 m. N. Leeuwarden. It is a large, good-looking place with a church and school and 19 distillery factories. Pop. 935.

MARSAGLIA a vil. and com. Italy, Piedmont, 6 m. from Turin, and E. N. E. Mondovì, with a palace, a church, and a trade in corn, potatoes, wine, chestnuts, and silk. The French, in 1693, here defeated the Savoyards, and took their Duke, Vittorio Amadeo II. prisoner. Pop. 932.

MARSALA (anc. Lilybæum) a seaport in Sicily, prov. and 18 m. S. S. W. Trapani on the low promontory of Capo Boeo, near the mouth of the Maresa. It is built in the form of a square, and surrounded by massive walls, flanked with bastions. The houses are substantial, and the principal street, called Canaro, is regular, and traverses the town through its whole length, dividing it into two nearly equal parts. It has a cathedral, a large edifice, ornamented with extensive marble Corinthian columns, which are said to have been originally intended for the church of St. Thomas of Canterbury, in England; a church, with a square which usually contains when the bell is rung; a college, three abbeys, several convents, an hospital, and a most dignified. The harbour, which the Sa-

raune estimated so highly as to give to it and the town the name of Marsa Alla, or port of God, has been filled up, and now there is only a mole for small vessels, while those of large size must lie to the S. W., nearly 2 m. off shore. The trade is chiefly in corn, oil, wine, fruit, and bastins. Marsa, under the name of Lilybæum, was the chief fortress of the Carthaginians in Sicily and figures much in the wars between them and the Romans. Pop. 21,000.

MARSAN (Lan) a dist. France, which formed the E. part of La Chaulosse, and belonged to the former prov. of Gascony. It now forms part of dep. Landes.

MARSBURG [Upper and Under], two contiguous towns, Prussia, Westphalia, gov. and 85 m. E. N. E. Arnberg, on the Rhine. Upper Marsberg has a church and chapel, Unter Marsberg three churches, and a lunatic asylum for the whole of Westphalia. In the neighbourhood is the fortress of Ernberg. Pop. 8443.

MARSCHENDORF [Bohemian, Moravia], a vil. Bohemia, circle and 55 m. N. E. Küniggrätz, in a valley. Look Ausp. It has a church, a school, a castle, manufactures of linen, a brewery distillery saw and other mills, and a trade in corn and cattle. Pop. 1248.

MARSIANO a in Italy Umbria, deleg. and 14 m. S. by W. Perugia, on the Nestore, an affluent of the Tiber. Pop. about 2500.

MARSDEN, a vil. and chapelry England, co. York (W. Hading) 7 m. S. W. Huddersfield at the confluence of the Colne and Wassenden. It has three chapels, several schools, manufactures of woollen cloth, a silk spinning mill, an iron-foundry and a steam-engine factory. Pop. 2685.

MARSEIL LAN a seaport in France, dep. Herault, on the lagoon of Iles, 24 m. S. W. Montpellier. It has a small port, and a brandy distillery. Pop. 2034.

MARSEILLES [Latin, Massilia Italian, Massaglia, Spanish, Marsella, French, Marseille] a city and the principal commercial seaport of France, on the Mediterranean, cap. dep. Bouches-du-Rhône, on the N. E. shore of the Gulf

of Iles, at the head of a bay, the entrance to which is sheltered and defined by a group of islets, 400 m. S. E. E. Paris; lat. (observatory) 45° 17' 45" N.; lon. 5° 22' 15" E. (m.)

It stands on the seavall and at the foot of a hill, around which a semicircular chain of lofty hills rises at a short distance, but leaves the view open to the sea. It naturally divides itself into the old town on the W. and the new town on the E. The surface covered by the former is very uneven, the streets are narrow and irregular, and the houses which line them of great height. The new town, on the opposite side, is traversed N to S. by a long and splendid street, commencing at the Aix gate, and terminating at the Place Cardeine. Almost all the other streets are spacious and regular, lined with handsome houses, fully proportioned in height to the positions they occupy. Between the old and new towns is a street or promenade, called the Grand Cours, planted with a double row of trees, adorned with fine fountains, and bordered with many elegant mansions. It forms the great place of resort. Marseilles is not rich in public edifices. The most deserving of notice are the church of La Major, regarded as the oldest in the town, and supposed to occupy the site of a temple of Diana; the church of St. Victor, also of great antiquity, and originally consisting of a grotto, or cavern, in which the first Christians of the town were accustomed to meet in secret for worship, and to bury the bodies of their martyrs; the lofty belfry, all that the revolution of 1793 has allowed to remain of the once beautiful Gothic church of the Anapoles, the church of Chariteux, situated without the town, but unquestionably the finest of which it can boast, the Hotel de Ville, a heavy building, overloaded with various ornaments, the Prefecture, a huge edifice, supposed by some to be the handiwork of Marseilles, and surrounded by a well-kept-out garden, the museum, observatory, library, and two theatres. Not unworthy of notice, also, are the public fountain, the triumphal arch through which the town is entered on the side of Aix, and the spacious and well constructed quays, with their numerous warehouses. These quays would naturally form one of the best promenades but to them, as a common centre, all the impurities of the town descend, and make every place in their neighbourhood absolutely loathsome and pestilential. Marseilles is the see of a bishop, and possesses a court of first jurisdiction, a court and chamber of commerce, an exchange, a royal naval observatory, a maritime syndicate, a mint, an academy of sciences, belle-lettres and arts, an almanac, a royal medical society, an agricultural society, a first-class school of hydrography, a royal college, a secondary school of medicine, a special school of design, a diocesan seminary, a deaf and dumb institute, &c. The harbour is one of the finest in France. It is in the form of a parallelogram, the longer side of which is about 950 yds., and the shorter rather more than 500 yds. It has from 18 to 24 ft. of water, and is capable of holding 1000 or 1200 merchant vessels. Its entrance is narrow, and somewhat curved, so that vessels coming from the E have some difficulty in making it, but, once entered, it is perfectly secure in all weathers. It is strongly defended by two forts, one called the Tower of St. John, on the N. and the Port of St. Nicolas, on the E. Close to this fort a new wet-dock, called Fort de la Juliette, measuring 500 yds. by 400, has recently been formed.

The most important manufactures are soap soda, and other chemical products, also woollen hosiery bonnets and hats, olive-oil, glass, vermilion, sheet lead, glass, earthenware, &c. In the building-docks, a great number of frigates and other vessels are built. The trade, which was previously great, has been nearly destroyed by the acquisition of Algeria. It consists chiefly of soap, olive-oil, wine, brandy, corn, flour, dried fruits, oranges, and other products of the southern department; salt provisions, tobacco, wool, skins, iron, cotton wool, cotton twist, dyewoods, and other articles of colonial produce. A great part of this trade is merely transit between Germany, Savoy, Switzerland, and Italy, Spain, and the Levant.

Marseilles is supposed to have been founded by a colony of Phoenicians, about 600 years before Christ. Its progress for centuries was rapid and almost without interruption, till, having taken the part of Egypt in the great contest for supremacy between him and Caesar, it was besieged by the latter, and, being taken, was deprived of all its peculiar privileges. On the decline of the Roman empire, it became a prey to the Goths, Burgundians, and Franks. In 735 it fell into the hands of the Saracens, who completely destroyed all the ancient monuments which previous barbarians had spared

In the 10th century it fell under the domination of the Counts of Provence, and continued for some centuries after to follow the fortunes of that house. Pop. (1822) 141,577.

MARSH, two towns. Eng.—1, (Chesel), Lincoln 4291 ac. Pop. 658.—2, (Gulston) Bucks 2752 ac. Pop. 944.

MARSHKAND, a resort on Sweden, on a steep rocky isl. about 4 m. from the mainland, and 30 m. N.W. Gothenburg. It was once a thriving, stirring place, but has greatly decayed, and though it has a good harbour with great depth of water commands only an insignificant trade. Its chief importance at present is as a bathing-place, to which the Swedes resort in great numbers in July and August. Pop. 2173.

MARSWORTH a par. Eng. Bucks 860 ac. P. 484.

MARTA, a small river Papal States by which Lake Bolsena sends its surplus waters into the Mediterranean, total course, about 80 m.

MAJ TA (SANTA) or MARTA, a seaport in New Granada, N coast on the Caribbean Sea, 105 m. N.E. Cartagena; lat. 11° 15' N. lon. 74° 10' W. (N.). It has some good houses, a cathedral and a good harbour with safe anchorage, defended by a castle and batteries. A considerable trade is carried on here with the neighbouring Indians, who bring earthenware and cotton stuffs. It has also some foreign trade, chiefly in dyewoods. In the vicinity is the Nevado de Santa Maria, an isolated range of mountains, extending S.S.W. to N.N.E. over a space of nearly 90 m. Its highest summit, El Picacho, is above 18 000 ft. high. Between the town and these mountains the land is level and produces oranges, lemons, pineapples, and grapes in abundance. Earthquakes are frequent. Pop. 8000.

MARTA (SANTA), in Spain. Estremadura, prov. and 24 m. S.E. Badajoz in a valley overlooked by three hills. It has level and straight, but ill-kept or unimproved streets, a church, townhouse, prison, and two primary schools, a sewer, and a trade in corn. Pop. 1800.

MARTABAN, in Borneo, cap. prov. of same name, r. bank and near the mouth of the Salween river, lat. 16° 30' N. lon. 97° 30' E. It stands at the foot of the Elengat or Martaban Hills, here washed by an extensive sheet of water to about 1 m. in length, and is surrounded by a decaying stockade of timber. It consists chiefly of two long streets, and has some conspicuous temples. On its right is a rocky

around surrounded by a two-pass battery, with a deep ditch or water-course beneath. Martaban was captured by the British in 1824, and again in 1859. The latter has been long since transferred to Mandalay, from which it is only about 10 m. distant.—The province lies between lat. 15° and 17° N., and lon. 97° and 99° E. It produces pepper, cardamom, rice, salt, and fish.

MARTABAN (Gour or), a sea arm, E. side, Bay of Bengal, between the Burmese dominions on the W. and the British Tenasserim provinces on the E. On the parallel of 16° N., it has a width of about 130 m. It receives a number of large rivers, including most of the mouths of the Irrawadi on the W., the Salween or Zitang on the N., and the Salween on the E.

MARTANA, a small isl., in the N W of Lake Bolson, Papal States, memorable as the scene of the imprisonment and murder of Amaleasina, Queen of the Goths, only daughter of Theodoric, and niece of Clovis. She was strangled in 535 by the order or connivance of her cousin Theodatus, with whom she had shared her kingdom.

MARTANO, a tn. Naples, prov. Terra d'Otranto, dist. and 16 m. S.E. Lecce, with an hospital. Pop. 2530.

MARTEE KAKAR KA-TANDA, a tn. Sunda, 16 m. S.W. Kijepore. It has an extensive trade with Marwar in Sindh, &c.

MARTEL (Latin, Martellum) a tn. France, dep. Lot, 54 m. N.N.E. Cahors. Its parish church, surrounded by a helthy in the form of a square tower is very ancient, very spacious, and possesses some finely-painted glass. P. 1776.

MARTELD, a vil. Hanover, Unterhohy, bail. Hoya with a church. Pop. 1185.

MARTH (Vlad), a vil. Hungary, on Danube, 4 m. from Buda, with a trade in corn, cattle, and wine. P. 1597.

MARTHA (Savina) see MARTA.

MARTHA (Rio), two places, Portugal.—1 (*de Baura*) A tn. and par., prov. Minho, 13 m. from Braga. It contains a Bernardine convent, with an image of the Virgin, to which numerous pilgrimages are made. Pop. 1011.—2, (*de Peneda*) A tn. and par., prov. Trás-os-Montes, near the Douro, 9 m. W.N.W. Lamego. It contains two richly-endowed abbeys. Pop. 800.

MARTHA-ON-THE-HILL (Str.) par. Leg. Surrey 1070 m. Pop. 42.

MARTHAM par. Fng. Norfolk 2644 ac. Pop. 112.

MARTHA'S VINEYARD an isl., U. States, off the S. coast of Massachusetts, 35 m. S. Plymouth. 21 m. long, 3 to 5 m. broad, and poor inhabitants chiefly fishermen.

MARTHO a vil. and com. France, dep. Savoie, prov. and 3 m. from Albert-Ville, r. bank Arly with a church, communal house, primary school, and a trade in corn, fruit, wool and dairy produce. Pop. 1307.

MARTONANA, a vil. Austrian Italy, gov. Milan, prov. and 30 m. S.E. Cremona, 1 bank Po with a church, and two curacies. Pop. about 1450.

MARTIGNY-BELAND, a vil. and com. France, dep. Maine-et-Lore, 18 m. W. Beaumont, near r. bank Layon. It has five annual fairs. In the vicinity are the mineral springs of Jonestown, with a bathing establishment. Pop. 2124.

MARTIGNY (German Martenack), two places, Switzerland, csa. Valais, 17 m. W. S.W. Sion.—1 (*Le Vallé*) r. bank Drance, near its confluence with the Rhone, 1480 ft. above the sea. It has a handsome church, on the walls of which are several old Roman inscriptions, the site being understood to be the same as that of Octodurus. P. 908.—2, (*Le Borey*) lies on the Simplon road, about 1 m. higher up the valley of the Drance, at the termination of the car-road from St. Bernard, and the mule path from Chamonix and is thus a place of great resort. Near it are the ruins of a fine old castle. The monks of St. Bernard, who have served on the mountains for a time, return to a convent here, while their place is supplied by others. Pop. 2467.

MARTIGNES (Latin, Martiana Colonia Anathilensis) a commune, dep. France, dep. Bas-Rhin, at the entrance of the lagoon of Berre, 16 m. W. N.W. Marseilles. Its situation has procured it the name of the Little Venice of Provence, being built partly upon an island, and composed of three little towns, which seem to float upon the bosom of the water, and communicate with each other by bridges. The houses are well built, and the streets are, in general, regularly

laid-out. It has a church, with a fine facade, a townhall, and an hospital, a good harbour, much frequented by small coasting vessels; and excellent building docks, in which a considerable number of merchantmen are built. Many of the inhabitants live by fishing. Pop. 6412.

MARTIN DE-SER (Str.), a tn. France, dep. Charente-Inférieure, 11 m. W. N.W. La Rochelle, on the Isle of Ré. It has a good harbour, with a safe roadstead; is defended by a citadel, possesses a court of commerce, an exchange, a fine arsenal, hospital, prison, and a considerable trade in red and white wine, brandy, vinegar, salt, fish, hemp, wood, pitch, iron, &c. Pop. 2107.

MARTIN DE-TROUS (Str.), a vil. France, dep. Aube, a suburb of Troyes. It has a handsome church, with its painted glass and a beautiful portico, a small seminary, manufactures of hosiery and a cotton-mill. Pop. 8071.

MARTIN (Sar), a river, Spain, prov. Tarrag. It rises in the district of Sagura, flows N.E., and joins r. bank Ebro, 9 m. E. by N. Hija. Total course, about 80 m.

MARTIN (Str.), eleven pars. England.—1, Cornwall, 2003 ac. Pop. 348.—2, Gloucester Pop. 1968.—3, Hereford 3810 ac. Pop. 1487.—4, Jersey 5711 ac. Parishes 16. Pop. 1855 ac. Pop. 3087.—5, Balow 5314 ac. Pop. 2122.—7, Wilt 1836 ac. Pop. 3771.—8, Worcester, 1802 ac. Pop. 4718.—9, York (E. Riding) 760 ac. Pop. 8917.

—10 (*Hussingtree*) Worcester 1972 ac. Pop. 6050.—11 (*Message*), Cornwall 2369 ac. Pop. 622.

MARTIN (Str.) par. Irel. Kilkenny; 783 ac. P. 234.

MARTIN (Str.), one of the Leeward isls., W. Indies, between the islands of Anguilla and St. Bartholomew, lat. (Fort Marigot) 18° 4' 8" N.; lon. 65° 5' 8" W. (N.), belonging partly to the French and partly to the Dutch. Its form is nearly that of an equilateral triangle, its sides, facing to the E. N.W. and S.E. each 7½ m. in length Area, 30½ sq. m. It is deeply indented with bays and lagoons, some of which afford good anchorage; and is, upon the whole, hilly the highest part is the table-land in the centre, 1861 ft. above sea-level. It is watered by several rivulets in the S. part are salt-water lagoons, from which great quantities of salt are obtained by the Dutch. The climate is considered healthy and light, sunny, but fertile, especially in the N. district principal produce, salt, sugar, rum, and tobacco, the last of excellent quality. The French and Dutch made a settlement on this island in 1653; they were expelled by the Spaniards, who themselves abandoned it in 1659. The French and Dutch subsequently resumed possession and divided it between them. Pop. N. or French division (1849), 3778, of the Dutch or S. division, 2861.

MARTIN (Str.) an isl. England, in the N.E. of the Solly group, about 2 m. long S.E.E. to W. N.W. and 6 m. in circuit, area, about 720 ac. It is surrounded by sandbanks, which become nearly dry at low water. The most of the surface is waste, but, when cultivated, yields good corn, potatoes, and grass. Its houses, consisting of three groups, are chiefly inhabited by pilots and fishermen. Pop. about 280.

MARTIN (Str.), several places, Austria, particularly.—1 A market tn. Upper Austria, circle Linz, 8 m. from Ried, with a church, a school, a castle, and three mills. P. 780.—2, A vil. Tyrol, circle Brennek with a church. P. 1811.—3, A vil. Styria, circle and S.E. Marburg, 1 bank Drave, with a church. P. 1211.

MARTINA, a tn. Naples, prov. Terra d'Otranto, 18 m. N.N.E. Taranto, with some curacies. Pop. 4000.

MARTINICZE a vil. Austria, Solvome, about 22 m. E. Peterwarda with three churches. Pop. 2106.

MARTINENGO, a tn. and com. Italy Lombardy gov. Milan, prov. and 10 m. S.E. Bergamo. It is walled, has several courts, a great number of handsome houses, and a spacious square, a church, two suppressed monasteries, and a gymnasium, several endowed elementary schools, and a house of industry manufactures of silk goods, and several silk-mills. Pop. 4598.

MARTINHO (Rio), two places, Portugal.—1 (*de Mourão*), A tn. and par., prov. Beira-Alta, 6 m. N.W. Lamego, near l. bank Douro. P. 1800.—2, (*de Porto*) A tn. and par. Estramadura, 22 m. S.W. Lamego, on the Atlantic. Its harbour, which at one time admitted large ships, has been very much silted up; but some vessels are still built here. Pop. 1000.

of which include sulphur, manganese, silica, &c. *Limon*, pottery ware, lead, and oil, are made. Pop. 11,022.

MARTRES-DE-VEYRE, a *tn. France*, dep. *Puy-de-Dôme*, on the Veyre, about 8 m. E.E. Clermont. It carries on a considerable trade in wine, and has, in its vicinity, three acclimated springs. Pop. 1923.

MARTRY, par. *Irel. Meath*; 8891 ac. P. 608.
MARUA, or *MATRU*, one of the Society Is., S. Pacific lat. 16° 25' S.; lon. 155° 12' W. (u.) It is small, and comparatively elevated, about 5 m. in circumference, surrounded by a barrier reef of coral at the distance of about 8 m., which encloses numerous small islets covered with coco-nut trees; but the lagoon is too shallow to admit vessels exceeding 150 tons burden. Volcanic rocks, corals, and slag abound.

MARUM, a *vill. Holland*, prov. and 12 m. W.S.W. Groningen, irregularly built and walled with a church and school. Pop. agricultural 794.

MARUTRA, or *LORD HOON'S ISLAND*, an Isl. S. Florida, Low Archipelago, lat. 31° 30' 45' S.; lon. 185° 28' 16' W. 11 m. long, and nearly 5 m. broad. It consists of a number of small islets rising from a chain of coral, a little above the water's edge, and has a marked section of moss and grass, interspersed with clumps of evergreen trees thickly interwoven. It contains a lagoon, and is steep on all sides.

MARVÃO or *RANÇO DO PRATO*, a *tn. Brazil* prov. Paraíba in a plain watered by a river of same name about 30 m. above its junction with the Poti and 100 m. N.E. Oeiras. It has a church, mines of silver, alum and copper. Pop. dist. 3000.

MARYAON a *tn. Portugal* prov. Beira-Baixa, 84 m. S.E.E. Casale-Bonco on steep mountains of the same name, the ancient *Marimino*. It is walled, defended by a strong castle, and has two churches, a convent, hospital, and almshouse. Pop. 1720.

MARVEJOLS [*Latin, Marvigovis*] a *tn. France*, dep. *Lozère*, 10 m. W. Mende, 1 bank Colagne. It is well built, well paved, and adorned with several fountains. It has a court of first resort, and several public offices, a communal college, a secondary ecclesiastical school, a chamber of manufactures, an agricultural society, manufactures of serge and other woollen stuffs, tanneries, dyeworks, brick works, a cornmill, and a trade in the articles of manufactures. Pop. 8879.

MARWOOD par. *Eng. Devon* 5396 ac. P. 1054.

MARY (St.)—1. An Isl. N.E. coast Madagascar lat. (N point) 16° 40' 30' S.; lon. 50° 4' 40' E. (a.) 31 m. long, N.E. to S.W., and 2 m. to S. broad. Its surface presents a succession of hills 200 to 400 ft. high, separated by deep and generally narrow valleys, so thickly covered with trees and underwood as to be in some places impenetrable. On the W. side, about 7 m. from the S. point, there is a bay with an island at the entrance, where small vessels may find shelter. The climate is hot and unhealthy. The soil is extremely fertile. Buffaloes are numerous, goats scarce, and sheep still more so. Goats and ducks abound, but all high. Fish are plentiful on a reef which surrounds the island. The natives manufacture a kind of cloth from the fibres of the raffia or sago, the coarsest sort of which they send to the Mauritius and Bourbon, where it is used for boat sails, peonies, &c. The finer and parti-colored kinds, some of which are very beautiful, they mostly use themselves. They also work in iron, and carry on a considerable trade in shells, wax, and turmeric. The French have a settlement here. Pop. (1849), 5709.—

2. A small island, also off Madagascar at the head of Antongil Bay, N.E. coast; lat. 15° 50' S.; lon. 49° 45' E.—3. A small Isl., sometimes called *Island*, E. coast Africa, Delagoa Bay; lat. 25° 55' S.; lon. 35° 3' 5' E. (a.) It is about 7 m. long, and 3½ m. broad; of sandy formation, and moderate height.—4. The most S. of the Azores, lat. 36° 58' 20' N.; lon. 26° 6' 12' W. (a.) about 7 m. long, and 5 m. broad; area, 36 sq. m., of trap formation. Nearly in the centre stands a conical mountain, 1898 ft. high, which falls on the E. and W. sides to the shore line of about 3 m. in breadth. To the N. it throws out a range of undulating heights, which terminate at the sea in lofty mural cliffs of more than 300 ft. elevation. On the W. side of the island, vegetation is scanty, while the central parts are covered with the common heath, myrtle, and arbutus of the Azores. The E. side is occupied by the agricultural productions of the island, consisting chiefly of wheat, Indian corn, oranges, a small quantity of wine, potatoes,

and hemp. Part of the wheat, and all the oranges, are exported. The inhabitants are, in general, extremely poor, but keep their persons and their houses clean and tidy. The island contains the small town of Vila do Porto, and several hamlets. P. (1840), 4698.—5. An Isl., England, the largest of the Solly Isles; lat. 49° 50' N.; lon. 6° 19' W. (a.) It contains several villages, the principal of which is called Hough or Hough Town. On the W. side of the island there is a Garrison with barracks and batteries. Area, 14640 ac. Pop. 1645.—6. A group of long flat islands, Humberston, Great, Madras, coast of Canada, between lat. 13° 38' to 15° 17' N., the outermost of the range being 5 m. from the shore, having a channel with 8, 4, and 5 fathoms irregular soundings between them and the main but safe for boats only.—7. A cluster of small islets in the Gulf of St. Lawrence, on the S. coast of Labrador, lat. 50° 20' N.; lon. 60° W.

MARY (St.), a river, N. America, by which Lake Superior discharges itself into Lake Huron. It is about 60 m. long, and varies in breadth from 2 m. to 1½ m. After issuing from Lake Superior it flows slowly, through a low and well-wooded country, for 15 m., and then begins to have a strong current, caused by a series of rapids about 5 m. below. These rapids, in a course of 900 yards, have a fall of 23 ft. 10 inches. On each side of the rapids are a number of alluvial islets, varying in height from 10 ft. to 50 ft.

MARY (St.) 14 pars. *Eng.*—1. Berks 1846 ac. P. 9148.—2. Cumberland 6988 ac. P. 16 437.—3. Essex 1827 ac. P. 1244.—4. Jersey P. 1068.—5. Lancaster P. 10 942.—6. N. York 4302 ac. P. 7161.—7. MARY, or *MARIA CAPE* (St.)—1. Newfoundland, S. coast, between Placentia Bay and St. Mary's Bay, lat. 48° 50' N.; lon. 54° 15' W. (a.)—2. Nova Scotia, S.W. coast, forming the S. entrance to the bay of the same name; lat. 44° 7' N.; lon. 60° 11' W. (a.)—3. S. America, E. coast, Uruguay lat. 34° 39' S.; lon. 54° 9' W. (a.)—4. S. extremity of Madagascar, lat. 25° 38' 54' S.; lon. 45° 42' E. (a.)—5. Africa, W. coast, Senegambia, forming the S.W. entrance to the estuary of the Gambie lat. 13° 30' N.; lon. 16° 41' W. (a.)—6. Africa, S.W. coast, Benguela lat. 13° 25' S.; lon. 17° 35' E. (a.)—7. S. E. coast, lat. New Ireland; lat. 4° 2' S.; lon. 155° 18' E. (c.)

MARYBOROUGH, a market in and par. Ireland. The town cap. of Queen's co. is 47 m. S.W. Dublin, a station on the railway thence to Cork, and on an affluent of the Barrow, has a spacious market-square a handsome jail, an elegant district lunatic asylum, county infirmary, with dispensary attached; the courthouses, barracks, and public schools; a parish church, R. Catholic chapel, and meeting-house for Wesleyans and Calvinists a convent of the Presentation, in which 200 children receive gratuitous instruction; and a national school. It has three extensive flour-mills, and a good general trade. P. 2679. Area of par. 7049 ac. P. 4494.

MARYBURGH a *vill. Scotland*, co. Inverness, 2 m. S.W. Fort William, on Loch Ull, with a Free church missionary chapel-of-ease an Episcopal and a R. Catholic chapel a school; and some herring-fishing. Pop. 408.

MARYCULTER, par. Scot. Kincardine; 9000 ac. P. 1655.

MARYHILL, a *vill.* and par. Scotland co. Lanark, 3 m. N.W. Glasgow, on the banks of the Kelvin, here crossed by the Forth and Clyde Canal. It contains an Established and a Free church a R. Catholic chapel, two print-works, bleach and glass works, an iron-foundry, cotton-mill, boot-binding yard, library and schools. Pop. 6700.

MARYKIRK, par. Scot. Kincardine; 9396 ac. P. 2232.

MARYLAND one of the maritime U. States, America, lat. 36° to 39° 44' N.; lon. 76° 10' to 79° 30' W.; bounded, N. by Pennsylvania, E. Delaware, S.E. the Atlantic, S. Virginia and Chesapeake Bay, and E. Virginia. It is of very irregular shape, rendering it difficult to give a proper idea of its length and breadth; but the usual estimate makes

the former 196 m., and the latter 120 m.; area, 15,859 sq. m., of which 4292 sq. m. are covered by the waters of the Chesapeake, which, penetrating the state through its whole breadth from S. to N., and indenting it by numerous estuaries, forms its most characteristic feature, and naturally divides it into two portions—the most smaller of the two, on the E., called the Eastern Shore; and the other, on the W., called the Western shore. The E. shore, comprising the larger part of the peninsula formed by the Bays of Delaware and Chesapeake, has a low flat, and somewhat sandy surface, covered, in many places, with stagnant water which makes agriculture and intermittent rivers prevalent. The W. shore, below the falls of the river, has much the same appearance as the E., but gradually rises towards the N. W., where it is traversed by a lower branch of the Appalachian chain, and attains the height of 2000 ft. above sea-level. By far the most important river is the Potomac, which separates Maryland from Virginia, nearly throughout its whole length of 550 m., and is navigable to Washington, a distance of 300 m. The Susquehanna also a large river, but only a small portion of its lower course, before it falls into the N. extremity of Chesapeake Bay belongs to Maryland. The only other rivers deserving of notice are the Patuxent, which, though its course is short, has a broad estuary that makes it navigable by large ships to Baltimore, and the Patuxent, navigable for 50 m. by vessels of 250 tons. But all these means of internal communication are outstripped by Chesapeake Bay which has a length of 370 m., with a width varying from 7 m. to 80 m. Almost all the lower part of Maryland is covered with alluvial deposits. The strata beneath belongs generally to earlier series of the tertiary formation, the ocean and the melocene. The piscoene, the most recent of all, is found only in limited patches. Where the surface begins to become elevated the tertiary formation terminates, and is succeeded by a belt of metamorphic rocks, composed chiefly of gneiss, micaeous and chlorite slate, occasionally intermixed with granite, serpentine and limestone. This belt, which lies nearly parallel to the Atlantic coast, has, in Maryland, a width of from 30 to 80 m., and is overlain unconformably by strata of new red sandstone, dipping gently towards the N. W. This sandstone occupies only a narrow trough among the metamorphic rocks and beyond it, to the W., rises the first ridge of the Appalachians. This part of the chain, in Maryland, consists of metamorphic rocks similar to those already referred to, but immediately N. W. of it, we enter the great Appalachian valley, occupying an enormous area and extending, under different names, in a S. W. direction, from Vermont to Alabama. The portion of it in Maryland is called the Hagerstown valley, and is principally based on the Trenton limestone, so remarkable for its caverns. Here rocks of the Silurian and Devonian systems are succeeded by a full development of the carboniferous with its valuable seams of coal and ore of iron. Within the state are three important coal-fields. Two of them, with an estimated aggregate area of 370 sq. m., being situated in a densely-wooded country, have not been opened up, but the third, called the Frostburg or Cumberland basin, occupying an area of 30 m. long by more than 4 m. wide, has been exhausted with care, ascertained to be of excellent quality and worked to some extent, chiefly for the supply of ocean steamers. Much of the low land of Maryland contains a considerable mixture of sand, but is well adapted for agriculture, and generally under good cultivation. The most important crops are Indian corn, wheat, and oats. Next to these, but in much smaller quantities, are potatoes, ordinary and sweet, rye and buckwheat. Tobacco is grown to the extent of about 21,000,000 lbs. annually, the meadows yield heavy crops of hay, and great numbers of live stock are reared particularly cows for the dairy—sheep and swine the most numerous of all. The principal manufactures are cotton goods, cordage, bricks, and articles in iron, the trade, chiefly foreign, is extensive.

TOTAL VALUE OF THE EXPORTS AND IMPORTS OF MARYLAND for each of the following years—

Years.	Value of Exports.	Value of Imports.
1860	1,452,262	1,275,879
1861	1,174,122	1,386,141
1862	2,728,608	1,908,558
1863	1,795,371	796,448

The state is divided into three districts—E., S., and N. W.; and, by the constitution, the people of each district have the privilege, alternately, of electing the governor, who is chosen for three years. The Senate consists of 21 members, elected for six years—one-third retiring every two years, and the house of delegates of 37 members. Annapolis is the seat of government; other principal towns are Baltimore, Frederick, and Hagerstown. The suffrage is possessed by every white male citizen resident one year preceding an election within the state, and six months within the city or county where he votes. The prevailing forms of religion are the Protestant Episcopalians, B. Catholics, Methodists, Presbyterians, and Baptists. Pop. (1850), 588,885; of whom 74,077 were free-coloured, and 90,866 slaves (1800) 887,049 of whom 87,189 were slaves.—(Kennedy's *Hist. and Statistics of Maryland*.)

MARYLEBONE, a pari borough, forming the N. W. portion of London and comprehending the parishes of Marylebone St. Pancras, and Paddington, and bounded by Oxford Street on the S., and by the borough of Finsbury on the E. As no remote period it contained only a few solitary houses, situated in open fields, which were long notorious as the lurking-places of robbers, and an extensive enclosure within it was a well-stocked deer park, in which Queen Elizabeth entertained the Russian ambassador with a hunting party. It is now covered with spacious streets and squares, lined with elegant mansions. Among the more remarkable localities within it are the Regent's Park, beautifully laid out in pleasured walks, lawns, and pleasure-grounds, and occupying among other interesting places of resort the Zoological Gardens and the Colosseum, the magnificent ranges of buildings in Wrenthorne Terrace, Lavender, Manchester, Portman and Euston Squares, the terminal of the London and North Western and of the Great Western railways, the churches of St. Marylebone, St. Pancras and Holy Trinity church to Bishop's Road Paddington, and St. Catherine's and the Mid Essex hospitals. Area of the bor., 5810 ac. Pop. (1851) 370,567 of which 128,184 are in par. Marylebone 128,479 in St. Pancras and 25,173 in Paddington.

MARYPORT, a market town and seaport, England, co. Cumberland, 25 m. S. W. Carlisle, at the mouth of the Ellen, and at the W. terminus of the Maryport and Carlisle railway. It is irregularly built, has a chapel, and places of worship for Baptists, Burghers, Presbyterians, Wesleyans, a Friends meeting-house three ship-building yards, and manufactures of cotton linen checks, sail-cloth, cloth, coarse earthenware, leather, nails and anchors. The herring-fishery is productive, and considerable quantities of trout are taken in the river. Pop. 3718.

MARYSTOWN par Eng. Devon, 2895 ac. Pop. 570. MARYSVILLE a considerable mining town, U. States, California, in the valley of the Sacramento, 110 m. N. E. San Francisco, 1 bank Feather River near the confluence of the Yuba.

MARYTOWN par Scot. Forth 2180 ac. Pop. 366. MAZZAMONI a small isl., off S. E. coast Sicily, about 7 m. N. N. W. Cape Passaro, and 21 m. S. S. W. Syracuse. The tinny fishing is extensively carried on here.

MAZZANO, a town in Naples, prov. Salerno, dist. and 24 m. N. E. Caserta. It contains four churches. Pop. 8300.

MAS d'AUXIRON (Lat., [Latin, *Apennine Masses*]) a tn France, dep. Lot-et-Garonne, 25 m. N. W. Agen, with a curious Romanesque church. Pop. 1415.

MAS d'Aux (Lat., [Latin, *Arles*]) a tn France dep. Ardege, 15 m. N. W. Forz. It has a church, manufactures of alum, copperas, and wooden combs, and a worsted-mill. Pop. 1590.

MAS A FUERA, an isl. S. Pacific Ocean, off Chili. W. from all Juan Fernandez or Mas-a-tierra, lat. 28° 49' N., lon. 89° 54' W. It is high and mountainous, of a triangular form, about 12 m. in circumference, and difficult of access. Wood and water are abundant, and fish plentiful on every side of the island.

MASANARA a vil. and com. Spain, prov. and about 4 m. W. B. Valencia, with a church, chapter-house, two primary schools, manufactures of cloth, and a rice, a felter, and three oil mills. Pop. 1515.

MABHATE, an isl. Indian Archipelago, one of the Philippines, S. of the S. E. extremity of Luzon, lat. (S. point) 11° 15' N., lon. 123° 17' E. (S. E.) It is about 80 m. long by 40

17 m. broad its principal produce is rice. In the centre of the N.E. side of the island there is a safe harbour called Fort Magna. It is very thinly inhabited.

MASCAL ISLAND, Bay of Bengal, off the Chittagong coast, from which it is separated by a very narrow channel 16 to 18 m. long by 10 m. broad, thinly peopled and mostly cultivated, but some of its cereals and opium, both of superior quality. Lat. 21° 30' N., lon. 91° 50' E.

MASCALI NUOVO, a tn. Sicily, prov. and 17 m. N.N.E. Catania, at the foot of Mount Mica. It is ill built; has several churches and convents, and an active fishery. A little W.N.W. is the village of Mascali Vecchio. Pop. 4000.

MASCALUCIA, a tn. Sicily, prov. and about 3 m. N. Catania, on the S. slope of Mica, by an eruption of which it was greatly injured in 1669. In 1818 it was in a great measure destroyed by an earthquake. Pop. 1600.

MASCARA, an ancient tn. Algeria, prov. and 48 m. S.E. Oran, on the S. slope of the Atlas with three suburbs, and, upon the whole, rather a picturesque appearance. It has two public squares, a mosque, two market-places, and manufactures of carpets. The French army took possession of the town on December 6, 1835, and evacuated it on the 6th of the same month, after having destroyed the artillery and munitions of war which Abd-el-Kader had deposited there. It was again taken possession of by the French, May 30, 1841, and since that time has constantly been the seat of a strong garrison. The population, which it was occupied by the French, was estimated at 19,000. It was (1849), consists of 4512, of whom 1776 are Europeans.

MASCARENE ISLANDS, or the **MASCARENHAS** the mts. Bourbon, Mauritius, and Rodrigues, so called from Mascaren has, a Portuguese navigator who discovered Bourbon in 1540.

MASCAT a tn. Arabia. See **Muscat**.

MASHAM a market tn. and par. England co. York (N. Riding). The town 12 m. S.W. Northallerton, by bank line, contains a church, chapel for Baptists, Methodist, and Wesleyans, several schools, a mechanics institute, a library and several small retail trades, with a library, and a couple of small market-places. Area of par. 22,525 ac. Pop. 2605.

MASHBURY, par. Eng. Essex 615 ac. Pop. 91.

MASHWON, or **MASWON**, a village tn. S. Africa Bechuanaland country lat. 26° 5' S. lon. 25° 55' E., 108 m. N.E. Letlako. Pop. estimated at 10,000.

MARIO, a vil. and com. Italy Piedmont, div. Alessandria, about two m. from Origlio, by bank line with a church, a monastery, and a trade in wine. Pop. 1898.

MASK (Lough) a lake, Ireland, co. Galway and Mayo, 11 m. S. Coober about 8 m. in length, by 4 m. in breadth with numerous small islands scattered along its shores, which on the E. are low and flat, but on the W. are more bold and rugged.

MASKAT, a tn. Arabia. See **Muscat**.

MARNOW a large fishing vil. Spain, Catalonia, prov. and 8 m. N.E. Barcelona, on the Mediterranean. It is tolerably well built, has a large church, with a lofty tower a handsome townhouse, erected in 1845 a prison, several schools, and three Moorish towers; manufactures of linen, cotton, and woollen fabrics, cables, sails, ropes, and other marine stores; hemp, wine, and oil, and dock-yards for ship and boat building. Pop. 6349. (Mader.)

MARNUT (or **JUMY**) a vil. and com. Belgium, prov. Hainaut, 6 m. N. Mous; with manufactures of slucery, a tannery and a flour-mill. Pop. (agricultural), 1409.

MASON ISLAND, a small ill. Ireland co. Galway 14 m. S.E. Clifden, circumference 2 m. shores rocky. It contains the ruins of a church. Inhabitants engaged in fishing.

MAONKE, a vil. and com. Italy, Piedmont, div. Genova, 3 m. from Camporosso. It has a handsome church, a convent a foundry and a trade in ironware, corn, potatoes, chestnuts, and dairy produce. Pop. 3097.

MASSA several places, Italy.—1. A tn. and com. Tuscany prov. and N.W. Florence. It is walled, has an ancient church, a castle, and a trade in wine, oil, silk, and chestnuts. Pop. 2656.—2. (Maritima, or di Marone), A tn. and com. Tuscany near the crest of a hill, 88 m. S.W. Siena. It is the see of a bishop, the seat of several public offices, and has a cathedral and a parish church, but, owing to the numerous marauds which surround it, is extremely unhealthy. Pop. 3,399, com. 1894.—3. (Supernum.) A vil. and par. Austria Italy prov. Trieste, 27 m. S.E. S. Mantua, on the Po;

with a court of justice, and several public offices, a church, and three schools. Pop. 3000.—4. (Zemleria), A tn. Papal States, dioc. and 80 m. S.E. S. Ferrara, near the S. Mantua. It is walled. Pop. 4000.—5. (Loburn, or di Serravalle), A tn. and com. Naples, prov. on the Gulf, and 19 m. S. Naples. It is the see of a bishop. Pop. 1781.

MASSA DUCALE, or **MASSA DI CARRARA**, a tn. Italy, dioc. and 68 m. S.W. Modena, cap. duchy of Massa di Carrara, picturesque situated near a bank Frigido. It consists of spacious and well-paved streets and well-built houses in the erection and decoration of which a preference of Carrara marble has been employed; and has a cathedral of little merit, with a curious ancient doorway a large but not handsome palace, with heavy marble consoles and friezes and an old castle, finely seated on a rocky ridge, which overhangs a stream, and is covered with terraces, on which vines have been trained. A fine old cathedral, which formed the chief ornament of the town, was wantonly demolished during the rule of Bonaparte's sister, Madame Bonaparte. The manufactures are chiefly of silk goods, and a considerable trade is carried on in Carrara marble. Pop. 9836.

MASSACHUSETTS, one of the Atlantic U. States of N. America, bounded N. by Vermont and New Hampshire, E. the Atlantic, S. the Atlantic, Rhode Island, and Connecticut, and W. New York, lat. 41° 27' to 43° 51' N. lon. 70° 10' and 73° 30' W. length 190 m. breadth 100 m.; area, 7500 sq. m., capital city Boston. The southern part of the state is indented with deep and extensive bays, of which Massachusetts Bay, whence the state is named and which includes the large bays of Boston and Cape Cod, Buzzard and Nantucket Bays are the most extensive. The indentations in these bays form excellent harbours, the most commodious of which are Newburyport, Boston harbour and Marblehead. The islands of Nantucket and Martha's Vineyard, with the Elizabeth, and several other small islands, belong to Massachusetts. The W. part of the state is traversed by the Green Mountains, whose loftiest peak rises 4010 ft. above sea-level. A low range, which seems to be a continuation of the White Mountains of New Hampshire, enters Massachusetts E. of the Connecticut, by which it is divided, below Northampton, into two ridges the two highest peaks of which are Mount Tom on the W. of the river and Mount Holyoke on the E. To the E. of this range are some detached mountains, one of which, Wachusett, rises between 2000 and 3000 ft. above sea-level. The most considerable rivers are the Connecticut, Housatonic, and the Merrimack. The soil is poor and sandy near the coast, where salt marshes frequently occur but in the middle and W. parts it is very fertile, and better cultivated than in any other state in the Union. Iron mines and quarries of granite, syenite, white marble, and slate are wrought extensively, and copper, anthracite coal, yellow ochre, serpentine, and asbestos are also found. The common den est animals attain to a good size in the most famous and hilly country, where also wolves are still found. Fish abound in the rivers and in the sea. The climate of Massachusetts appears to be remarkably healthy although liable to extremes of heat and cold. The mean annual temperature is about 48°. The principal vegetable productions are Indian corn, rye, oats, potatoes, hemp, flax, grass, hops, beans, and pumpkins; wheat, buckwheat, and barley are raised only in small quantities. Some silk, and a good deal of sugar are produced. A considerable portion of the surface of the ground is still covered with forests, consisting of pine of oak, walnut, hickory, maple, ash, cedar, cherry, and chestnut. All the fruit-trees of England are cultivated with success. Massachusetts is the principal manufacturing state in the Confederation, and in textile fabrics produces more goods than the united output of all the other states in the Union. Indeed, scarcely a square mile is destitute of the workshop. For cotton goods there are 8337 mills, 82,583 looms, and 1,330,769 spindles, producing annually about 900,000,000 yds of cotton cloth. Lowell is the great centre of the cotton manufactures. For woollens there are 191 mills, 4643 looms, and 208,864 spindles, manufacturing assuissims, broad-cloths, damasks, blankets, &c. Worsteds goods, hosiery, silks, linens, &c. are largely manufactured. There are numerous forges and furnaces, machine-shops, making machinery of all kinds, and, also, manufactures of edge-tools, agricultural implements, and cutlery to a large extent. Other articles of manufacture are

bees, leather, small arms, glass, paper, &c. Ship-building is carried on extensively 41,225 tons having been built in 1851. The trade, both foreign and domestic, is extensive. The most important exports are dried and salted fish, tallow and sperm-oil, milled beef, flour, soap, candles, leather, and cotton goods; and the imports chiefly coffee, sugar, molasses, indigo, iron, and hemp, with silk, linen, and woollen goods of English manufacture.

TOTAL VALUE OF THE EXPORTS AND IMPORTS OF THE STATE OF MASSACHUSETTS, 1850-51 AND 1861-62.

Year.	Value of Exports.	Value of Imports.
1850	\$ 525,867	\$ 825,660
1861	8,270,573	6,316,025
1861	5,432,251	6,426,220
1862	5,022,508	6,968,804

In shipping, it is far superior to any other State of the Union, except New York. The means of internal communication are simple, through a complete system of railroads, and several navigable rivers, supplemented or aided by canals.

The principal religious denominations are Congregationalists, Baptists, Methodists, Episcopians, and Universalists. Education is carefully attended to, ample provision is made by the state for its encouragement, and the school system is the most complete in the Union. In 1851 there were 3067 public schools, attended by about 180,000 children.

Massachusetts is divided into 14 counties, and, besides the capital, Boston, the chief towns are Lowell, Springfield, and Salem. It was at first composed of two colonies—Plymouth colony, first settled by 120 Puritan families, who landed in Plymouth in 1620, and Massachusetts Bay colony. These two were united in 1693, under the name the state now bears. The American Revolution commenced in Boston and its neighbourhood, and the battle of Bunker's hill in its suburbs, Charleston, was the first regular engagement fought during that memorable struggle. Slavery was abolished in this state in 1788. Public debt of the state (to 1850), \$1,310,725, (1862) \$65,598. Pop. (1850) 994,400 (1860) 1,251,000. MASSACRE, an Isl. Pacific. See MALOYA.

MASSAFRA, a to Naples, prov Terra d'Otranto, dist and 6 m. N W Taranto, on the slope of a hill. It is walled, and the most of the houses are built on the edge of a chasm, through which a stream has worked its way. Pop. 7000.

MASSALEK, or MORALAK, a to Russia, gov and 50 m. W Kaluga, cap. circle, on the Moskwa, at its confluence with the Gorochna. It has three churches, and a considerable trade in salt, corn, hemp and oil. Pop. 1248.—The church is well wooded, rears many cattle, has numerous lakes, and much land adapted for the growth of hemp. Pop. 120,000.

MASBARONY, a river British Guiana, supposed to rise about lat. 4° 30' N lon 60° W. It pursues a very circuitous course, generally N E. through a mountainous country, and joins the Oyuki, about 12 m. above the entrance of the joint stream into the estuary of the Essequibo. Numerous islands are scattered over its surface, and its navigation is very much obstructed by falls and rapids. It has been explored for about 400 m.

MASSAY, a to France, dep. Cher 21 m. W N W Bourges, with three annual fairs. Pop. 1185.

MASBACH, or MASBACH, a market in Bavaria, Lower Franconia, 7 m. S E. Miltenberg, with a school, the works, limekilns, several distilleries, and numerous mills. P. 1172. MASER, or MASER, a vil. and com. Italy, Piedmont, prov Turin, prov and S S E Ivrea, on a height above r bank Dora Baltea. It has two churches, an old castle, and a trade in soap and wine. Pop. 3300.

MASMELEN WARMEN, a vil and com Belgium, prov E. Flanders, on the Malenbeck, 7 m. S E Ghent. It has manufactures of linen, a brewery, bleachfield, oil and cheese flour mills, and a trade in agricultural produce. Pop. 2073.

MASBERA, an Isl. about 20 m. off S E coast Arabia, S. point, Aden Harms; lat. 20° 7' 30" N lon. 56° 38' E. It is rather low and rugged, extending from 38 to 40 m., nearly N N E. and S S W. It abounds in copper, the mines of which were formerly wrought by the Persians, but had been lost sight of for many years, till re-discovered, in 1846.

MASBERANO, or MASBERANO, a to Italy, Piedmont, prov Turin, prov and 30 m. N N W Yverdon, r bank Arve-

tola. It is walled, and well built, has several large squares, an elegant castle, a collegiate church, a college or gymnasium, an archiepiscopal palace, a free school, hospital, and charitable endowment manufactures of ironware, several tineries, and a trade in wine. Pop. 2600.

MASBEVAUX, or MASBEVAUX, a to France, dep Haut-Rhin, 18 m. N N E Belfort, on the Doller. It has many houses of calico, a cotton-mill, and a blast-furnace; and carries on some trade in cherry brandy. Pop. 2679.

MASBIA, a to France, dep. Castel on a narrow valley 45 m. N E. Avrilles. Above the town, on opposite banks of the Allagnon, rise two rocks crowned by chapels. P. 1329.

MASBICO (anc. Massico), a to Naples, prov Terra di Lavoro, dist. Caserta. Its wine was famous in Roman times, and is much celebrated by Horace. In the vicinity Appianus Claudius gained a famous victory over the Samnites.

MASBINGHAM, two par. Eng. Norfolk—1 (Great) 4112 ac. Pop. 548—2, (Little) 2278 ac. Pop. 134.

MASBINGOY, a vil and com. France, dep Haute Savone, prov Geneve 8 m. from Rumilly, with an ancient church and an old castle. Pop. 1041.

MASBOW, a to Prussia, prov Pomerania, gov and 23 m. N N E Stralsund. It is walled, flanked with towers, has two gates, a court of justice, a church, an hospital, and a trade in cattle. Pop. 2226.

MASBOWA, the principal seaport of Abyssinia, on a small barren Isl. in the Red Sea, about 1 m. long by 300 yards to 400 yards broad at the N extremity of Arkabek or Agawgo Bay, lat. 16° 30' N lon. 39° 21' E. It is a town of partly built of stone, but most of the houses are constructed of poles and bent grass and surrounded by a fence of reeds. The most considerable buildings are the mosques, the Doholah's and Hanan's houses, and a few warehouse, which are built of coral and also the bazaar, where millet, dates, tobacco, beef, mutton, fowls, and occasionally fish, are to be procured. The trade of the port has hitherto been carried on solely by seven or eight Persian merchants, and the Arab merchants of Jidda and Mecca. About 250 Arab boats, of 40 to 300 tons, and one or two European vessels, of 800 to 400 tons, arrive annually. The chief imports are corn, maize, and rice; pearls gold-dust, and ingots cotton manufactures of various kinds, glassware, arms, military, elephants teeth, cloves, spices, wine, and spirits. Principal exports rhinoceros-horns, gold, ivory, honey, slaves, and wax. These are brought by caravans from the interior. In the narrow channel between the island and the mainland, there is good anchorage. The island is dependent on Mecca, under the immediate jurisdiction of the Prince of Ashoke to whom it pays an annual tribute. The governor is, however, absolute king of the island. Pop. estimated at 4000.

MASTENBROEK, a vil Holland, prov Overijssel, 6 m. N W Zwolle with a church. Pop. (agricultural), about 1000.

MABULIPATAM a seaport and dist., Hindoostan, presid Madras, coast of Coromandel. The town, cap. of the dist., is situated at the head of a spacious bay of the same name, on a small branch of the Kistna, lat. 16° 10' E lon. 81° 4' E. It is of considerable size, and has lately extensive manufactures of cotton, which find a ready market in Persia, where they are much esteemed, and to which the greater portion of them is exported. About 15 m. S E. the town stands the fort, in the form of a parallelogram, 800 yards long by 600 yards broad, and connected with the former by a straight causeway 2000 yards in length. The shore is flat all round the bay, the depth in approaching it being not more than half a fathom for the distance of nearly a mile.—The summer is, in great part, composed of extensive tracts of grass plain, and towards the N of wild open jungle. The cotton produced here is comparatively of good quality, but is not raised to any great extent, its culture being less profitable than that of grain. Area, 6000 sq m. Pop. (1851), 570,388.

MASULLAK, a vil Isl. Sardinia, prov Sassari; with three churches, a Capuchin convent, a primary school, and a trade in corn and wine. Pop. 1056.

MATA (La), several places, Spain, particularly—1, A to New Castle, prov and about 20 m. W N Toledo, consisting chiefly of low barren hills, with a church, a town-house, primary school, an oil-mill, and a trade in corn and

chick peas. Pop. 1000.—A. to Extramadura, prov and 77 m. N W. Glycer, with an ancient church, a townhouse, primary school, an oil mill and several flour mills, and a trade in oil and wine. Pop. 1005.

MATAGORDA, a small settlement in U. States, Texas, at the mouth of the Colorado, on a bay of same name. It has a considerable foreign trade.—The bay is 55 m. long, with an average breadth of about 7 m., and is enclosed from the Gulf of Mexico by a peninsula 45 m. long, by 2 to 3 m. broad lat. (8. point) 28° 34' N. lon. 96° 30' W. A little to the S.W. of the port is an island of same name.

MATALA (Carr), lat. Candia, S. coast, the most southerly point of Europe, lat. 34° 55' S. N. lon. 24° 45' 15' E. (a.) MATAMA, a vil. Benguel, Fouta-Djanga, l. bank Senegal, lat. 15° 44' N. lon. 13° 5' W. It is a market for millet, hides, and butter.

MATAMORAS, a tn. and river port Mexico, dep. Tamaulipas, r. bank Rio Bravo-del Norte, 50 m. above its outfall in the Gulf of Mexico, at Refugio. The town is well built, has numerous churches, convents, and schools, and a considerable trade, the exports consisting chiefly of specie, horses, wool, and hides, and the imports of manufactured goods, principally from Great Britain and the U. States. 1 20 000

MATANA, a native state, lat. Borneo S.W. coast, on the Carimata Strait. It yields the best diamonds in Borneo also birds' nests, iron tin, and sappho.

MATAN ISLAND, a small Isl. Indian Archipelago, one of the Philippines, on the E. coast of the island of Zebu lat. 10° 20' N. lon. 123° 40' E. It is about 10 m. in circumference. It was on this island Magalhães was killed in 1521 when returning from Amurca.

MATANZA (La) a tn. Canaries, on N. part of Isl. Tenerife. It is built in a straggling manner and has a parish church and three primary schools. Pop. 1374.

MATANZAS, a fortified port, on bay lat. Cuba, N.W. coast. The town is lat. 23° 3' N. lon. 81° 40' W. (a.) 52 m. E. Havana, to which it ranks next in commercial importance. It stands on a flat on both banks of the San Juan, which brings down so much mud that the harbour is materially injured by it. The houses, mostly of stone, are built in a very durable manner though with a total absence of architectural beauty. It has two churches, an excellent hospital, extensive barracks, a theatre, and a cock-pit. The state of education is surprisingly low. The importations are chiefly articles of food, and materials and machinery for sugar and coffee estates, most of the latter and other goods are brought from Havana. The principal exports are sugar, molasses, and coffee, amounting, in 1847, to 397 171 boxes sugar 3,405,777 lbs. coffee, and 54,841 lbs. molasses.—The bay is spacious, easy of access, and completely sheltered from all winds, except those from the S.E. which send in a heavy sea. A railroad connects Matanzas with the interior Pop. (1845) estimated at 45 795

MATAPAN (Carr), [see *Tamaron Proconotum*] the most S. point of the Morea, Greece, and of the continent of Europe, lat. 36° 31' 50" N. lon. 22° 28' E. It terminates in a high steep, pyramidal point, at the base of which is a cavern, apparently blackened by the fire of former volcanoes. Upon its summit are the ruins of an ancient temple, supposed to have been dedicated to Neptune.

MATAPOZUELOS, a tn. Spain, Leon, prov and 17 m. N.W. Valladolid, with a handsome church, a courthouse, hospital, two primary schools, and manufactures of woollen and linen cloth, brick and tile works, a distillery, and a trade in corn, wool, and hides. Pop. 1120.

MATAPAN, or MATAPAN, a tn. Java, prov and S.W. Dyak-Jakarta, formerly the residence of the Emperor of Java. It lies among hills, was formerly partly walled and had an extent of 2 m. each way, but is now much fallen off in appearance and population.

MATARELLO, a vil. Austria, Tyrol, circle and about 6 m. from Trento, with a church, and a castle. Pop. 1260

MATARIKH (anc. *Mataphos* or *Os*), a vil., Lower Egypt, in a beautiful and well-planted district, 6 m. N.N.E. Cairo. It is now a very insignificant place, but, though never of great extent, it very early acquired, and long continued to possess great celebrity from its temple of the Sun, which was a very magnificent structure, and was, for ages, the chief seat of Egyptian learning. According to Strabo, the city stood

on a large mound, and had lakes in front filled with water from the neighbouring canal. Since his time the level of the land must have risen considerably, as the foundations are sunk beneath the ground, and the obelisk, which now forms the most conspicuous object among the ruins, is buried to the depth of 5 ft. 10 inches. The whole height of this obelisk, measured from its first pedestal, is 66 ft. 2 inches; and the shape of its apex seems to indicate that this height was originally increased by the addition of some covering probably of metal. The gardens of Matarikh were renowned for a balsam, produced from plants first brought from Judæa by Cleopatra, and believed to be the same as the balsam of Gilead, mentioned in the Bible. They also deserve notice as the locality where, about 80 years ago, the introduction of Italian cotton was first tried in Egypt. In the plain in the vicinity, Salim Salim was buried in 1517, previous to his defeat of Ismail Bey, which transferred the Mameluke empire to the Osmanlis, and, in the same locality, in 1800, the Turks were finally defeated by the French under Kleber.

MATARIKH, a vil. Lower Egypt, on a point of land projecting into Lake Memphite 21 m. S.E. Damietta; inhabitants chiefly employed in fishing in the lake. The produce, which is very great, is dried and salted on the spot and sent on camels or asses to Menzaleh, whence it is carried by canal to different parts of the country.

MATARRA, a city, Spain, Catalonia, prov and 19 m. N.E. Barcelona, on the Mediterranean. The older part of the town is built on a declivity and the streets are narrow and inconvenient; the more modern portion, which extends to the sea-side, consists of spacious and well-arranged streets, composed, for the most part, of handsome houses. It has eight squares, a fine church several chapels, two convents, town and courthouse, prisons, barracks, a custom-house, hospital, theatre, college, numerous primary schools, and a large cemetery; manufactures of linen, woollen, cotton, hemp, and silk fabrics, Spanish ropes, mills, glass, pottery, hardware, bricks, tiles, soap, leather, small shot, brandy and wine, and a spacious dock for building and repairing merchant vessels. The commerce of Matarra is active, especially in the fishing department. Its exports are wine, brandy, manufactured goods, timber, fruits, &c. imports, grain, sugar, cacao, coal, barilla, and sparite. Pop. 13,010.—(Madox and Mellado.)

MATARRUNA, a vil. and par. Brazil, prov and 70 m. N.E. Rio-de-Janeiro, N. shore of Lake Araruama, on a river of the same name, here crossed by a bridge. It has a church, and a small harbor, from which small vessels get down into the sea with the abbing tide, carrying with them the produce of the district. Pop. 3290

MATAVIANA, a river, Spain, prov Teruel. It rises near Peñaraya, on the confines of Valencia, flows N and N.E. receives the Algas at Nonsape, forms part of the boundary between Aragon and Catalonia, and falls into the Ebro, near Fayon, total course, about 80 m.

MATVING, par. Eng. Essex 2894 ac. Pop. 653 MATHEMATICA, a tn. in Hungary, Thälher Theles, co. Sastham about 9 m. from Mestor-Bathor, with a Protestant church, a Jewish school, and a trade in corn. P. 2560.

MATVY par. Irei Cork 7057 ac. Pop. 2137

MATELICA, a tn. Italy The Marche, delag and 22 m. W.S.W. Macerata. It is walled, has seven convents and manufactures of coarse woollen stuffs. Pop. 2068.

MATEO (San) a tn. Spain, Valencia, prov and 40 m. N.N.E. Castellon-de-la-Plana. It is walled, has two squares, a church, several chapels, a townhouse, prison, hospital, two well-attended schools, a convent, having a fine church, with two towers; and manufactures of cloth, linen and hempen fabrics, leather and oil, in which latter article considerable traffic is carried on. Pop. 2546.

MATEO (San), or YVACA-DE-SAN-MATEO, a tn. Canaries, Isl. Gran Canaria with a church. It rises around it some wheat, rye, potatoes, and vegetables. Pop. 2721

MATERA, a tn. Naples, prov Basilicata, cap. dist. r. bank Gravina, 50 m. W.W. Tarento. It is a place of great antiquity, the residence of an archbishop, seat of a civil court; and has a cathedral, three convents, and a royal school of belles-lettres, medicine, law, and agriculture. P. 11,590.

MATHEOS (Silo), two places, Brazil—1, a tn. prov Espírito-Santo, on a height near river of same name, about

16 m. from the Atlantic. It is surrounded by swamps and stagnant pools, which spread pestilence around, and makes agues and malarial diseases very prevalent. It is built without any regularity, has a church, a Latin, and two primary schools, and a considerable export trade in the produce of its own district, which is very fertile. The principal articles are manioc, flour, sugar, and millet—2, A. m., yuca, and 190 m. S. E. W. Cores, I bank Jaquebire, originally a hamlet of Carib Indians. It has a church, a primary school, townships, and prison. Inhabitants chiefly engaged in agriculture and the rearing of cattle. The Indians, who are numerous, confine their culture to the raising of cotton, and subsist by the chase. Pop. par, 2000, dist. 18,000.

MATHERNE, par. Eng. Monmouth 2281 a. P. 451.

MATHERNE, par. Eng. Worcester 2266 a. P. 234.

MATHERY, par. Wales Pembroke 6902 a. P. 1032.

MATUBA, a m. Hindostan prov. and 80 m. N. W. Agre, lat. 27° 51' N., lon. 77° 52' E., a bank of a river, a popular resort of Hindoo votaries, who come from far and near to bathe in this spot, which is sacred to Krishna, and for whose conveyance numerous flights of steps (shants) descending to the river have been turned. It was formerly surrounded by a lofty wall, of which some fragments and three gates only now remain. The fort, which is situated on a high hill close by, is also in ruins. The interior of the town is extremely dirty, the streets narrow and irregular. The greater portion of the houses are built of brick, with thatched roofs, and are from two to three stories in height. The residential areas are more built of clay, and thatched with grass or reeds. There are numerous bazars, 190 Hindoo mandirs or places of prayer, and 19 mosques. Among the latter is the famous mosque, built by the Emperor Aurangzeb, which is called by his name. There is little trade here, although the Jauna is navigable at all seasons of the year, even for large boats. Pop. estimated at 60,000 of which 6000 are Mussulmans, and 54,000 Hindoos, among the latter there are 16,000 Brahmans and Fakirs, who submit on the aims of the devotees.

MATINA, a river Central America, Costa Rica, formed by the junction of the Chirripo and Bepelito, and, after an E. course, entering the Caribbean Sea, near lat. 10° N. lon. 82° 25' W. At its mouth is a village of same name.

MATTANA, a div. Madagascar (what see).

MATLASK, par. Eng. Norfolk, 473 a. P. 164.

MATLOCK (BRIDGE AND BATH) two vils. England, co. and 16 m. N. by W. Derby, about 14 m. distant from each other in the parish of same name, on the Amburgate and Howday branch, N. Midland railway.—MATLOCK BRIDGE, constantly situated on the Derwent, and entered by a handsome stone bridge across it, is built in tiers of houses, rising in succession from the base nearly to the summit of a steep acclivity, and has a small church perched on a rock, and surmounted by a spire. Place of worship for the Independents and Wesleyans, a free school, a weekly market, and four annual fairs, chiefly for cattle.—MATLOCK BATH is situated in the beautiful vale of the Derwent, and scenery equally distinguished by grandeur and beauty, and has long been much frequented for its mineral springs, which has a temperature of 89°, and contains carbonic acid gas. Over each of the springs, there is a number of handsome hotels have been erected and there are lodging-houses, affording accommodation for 400 or 500 visitors. The only manufactures are vases, and similar articles, made of the Stone-age and marbles of the county, and exhibited in workshops, which are called mansems, and from the number of natural as well as manufactured curiosities which they display, well deserve the name.—The Park was formerly famous for its lead-mines, which are still worked to a limited extent, and the cotton manufactory was established in it by a factory built by Sir Richard Arkwright Area, 5980 a. Pop. of par., 4910.

MATO, or MATO-GROSSO (Great forest), the most W. prov. of Brazil, lat. 7° to 24° N., lon. 61° to 65° W. bounded N. by a range of mountains nearly in lat. 7°, which separates it from Para; E. the Araguaia, which separates it from Goyas, S. E. the Parana, separating it from São Paulo, A. Paraguary and W. Bolivia, area, 865,800 sq. m. It is traversed, N. W. to S. E., by a mountain chain, forming the principal watershed between the basins of the Amazon and the Rio-de-la-Plata. The principal branches of this chain are the Cordillera Geral, in the N. W., and the Serra Parana, which linking with the other,

stretches across a considerable portion of the central part of the province. From the mountains innumerable streams descend, and proceed through lofty rocky valleys, which gradually spread out into immense plains. The principal rivers are, in the W., the Guapore, N. the Juruena, N. E. the Xingá, E. the Araguaia, S. E. the Parana, with its tributary, Paraguary, and W. the Paraguary, with its tributaries São Lourenço and Taquary. There are also numerous lakes, some of them of considerable extent. The dense forests, which cover a great part of the surface have given the province its name. They abound with inexhaustible supplies of the finest timber, both for common and ornamental purposes but, from the deficiency of the means of transport, cannot at present be turned to much account. They also yield many rare and valuable gums, balsams, and medicinal plants. Cacao, jalep, and annil, and maiti (Tee Paraguary) are of spontaneous growth. The wild animals which haunt the woods are extremely numerous. Among others are antelopes, antelope, various species of wolf, varieties of deer, hares, &c. Land-birds and water-fowl also abound. The province is particularly rich in minerals. There is scarcely a district in which gold is not found though the working of the mines has almost ceased to be profitable. Iron is everywhere abundant, but lies there regarded. Rock-salt and saltpetre are both worked to a limited extent. Over an extensive region near the centre, diamond mines have been wrought from a very remote period, and still continue to yield a large revenue to Government. In other quarters, various other gems and crystals are obtained. In many of the valleys and plains, the soil is of remarkable fertility producing rich crops of rice, millet, cassia, clove, cotton, sugar, and tobacco but as the number of inhabitants bears no proportion to the extent of the surface, the greater part of it necessarily remains in a state of nature. For administrative purposes, Mato-Grosso is divided into two comarcas, Cuiabá, and Mato-Grosso, subdivided into numerous districts. It sends only one deputy to the general legislative assembly, and appoints only one senator. The provincial assembly consisting of 20 members, holds its sittings in Cuiabá. Pop. 180,000.

MATO-GROSSO, or VILLA BELLA a city Brazil, prov. and cap. comarca of same name, on a height above a bank Guapore, below the confluence of the Alegre, 800 m. N. Cuiabá. It is surrounded by plains, which are annually inundated, and is built with considerable regularity. The houses are low, constructed of earth and wood, and covered with tiles and, being white-washed both within and without, have a cheerful and comfortable appearance. It has three churches a townhouse, smiling-house, hospital, barracks, and arsenal; a Latin, and two primary schools. Its climate is very unhealthy. The comarca is of vast extent, stretching E. to W. between the Araguaia and Mattozo, about 700 m. and N. to S., 500 m. Its only trade is in horses and cattle. Pop. comarca, including only those civilized, 16,000.

MATOSCH NOI, or MATOSCHNIK STRAIT, a strait, Russia, which connects the Arctic Ocean with the Sea of Kara, and, stretching W. to E. across Nova Zembla, divides it into two distinct islands, length, about 150 m., average breadth, not more than 5 m. The shores are generally steep, and frequented by immense flocks of water-fowl. The rivers which fall into the strait, teem with fish, and in the strait itself seals are very numerous.

MATRA a mountain-range Hungary, forming a ramification of the Carpathians, between the Theiss and the Danube, and extending partly through co. Neograd, Hoves and Goeis for about 24 m.; culminating point, near Gyngyás, about 5500 ft. high. Owing to its central position, and the wide plains which stretch from its base, it commands one of the most extensive views in Hungary. The range is well wooded, abounds with game, has valuable pastures, and rich mines of iron.

MATRA, a vil. Hungary, Thicker Theiss, no. and 12 m. from Arad; with a handsome non-mixed church. Pop. 1346.

MATREMAI, an id. and to Japan. See Yamo.

MATRON, par. Eng. Gloucester, 450 a. P. 53.

MATTERBOREN, a mountain, Switzerland, See Camen.

MATTERBOREN, or RAEY MAXROCK, a market in Hungary, co. and 10 m. N. W. Oedenburg, with a trade in wine. Pop. 402.

MATTERSEY, par. Eng. North; 2310 a. P. 452.

MATTHEW (Gr).—1, An Isl. Sam, 13 mi off W coast, in the Mergel Archipelago; lat. (N point) 10° 15' N lon 95° E, about 16 mi long N to S, and 10 mi broad. It rises in the centre to a height of 5000 ft., above level with rocks. At the N end is Haidin or Gage Harbor, a spacious bay, capable of containing the largest navy in the world with from 5 to 11 battleships, and sheltered from all winds. The island abounds, towards the N end, with wild plantains and yams, and with ground rats of large size.—2, (or *Gore Island*), Russian America, in Boling's Sea, S.E. point, or Cape Upright, lat. 60° 18' N, lon. 175° 4' W (a), about 26 mi. long, N.W. to S.E. It is composed of hills of moderate height, separated by deep valleys, which, at a distance, give it the appearance of several islands.

MATTIE, a vil and com. Italy, Piedmont, div Turin, prov Susa, with a church, the remains of an old castle, and a trade in agricultural produce. Pop. 2239.

MATTISBELL, two pars Eng. Norfolk.—1 2280 ac Pop. 1045.—2 (Burgs) 604 ac. Pop. 225.

MATTO-GROSSO, a prov Brazil. See MATO-GROSSO.

MATTOI, a river S.E. Africa, rising in a salt-water marsh on the interior behind Delagoa Bay, into which it falls, lat. 30° S. branches at its mouth, 840 ft., and depth, 16 ft.

MATIRAH, a to, and bay Arabia. See MATAR.

MATUKU, one of the Feejee Is., S. Pacific lat. 19° 14' S, lon. 179° 44' W (a). The face of this island is broken into volcanic peaks but has many fertile valleys. On the W side is a good harbor, where wood and water are to be had.

MATURA, a to Isl Ceylon, Dondra Head, the extreme S point of the island. A bank N.E. Ganga river have crossed by a wooden bridge. It contains many handsome houses, chiefly belonging to Dutch families, and a Protestant church. **MATURIN**, a dep. and river port, Venezuela. The former occupies the N.E. portion of that republic, extending from the Gulf of Paria, W. to the Unare, lon. 65° 20' W., and from the Caribbean Sea to the Orinoco. It comprises the provinces of Cumana, Barcelona, and Margarita the latter comprehending only the island of that name, and the smaller ones around it. The navigable rivers, besides the Orinoco, are the Guapiche, Neuren, and Unare. Smaller streams numerous, the greater portion of which empty themselves into the Gulf of Paria. The climate is warm and humid. The greater part of the territory consists of fertile plains, which are covered with vast herds of cattle. The cultivated districts produce great quantities of maize and tobacco, and also some coffee. On the peninsula of Araya N of Cumana, salt is manufactured. The capital of the department is Cumana.—The towns. A bank of a river which falls into the Gulf of Paria lat. 9° 50' N lon. 65° 50' W, has some shipping business. In 1847, the imports amounted to £12,285 the exports, £29,703.

MATZDORF or **MATZDORF**, a to, Hungary, co. Zips, 1 bank Popper 6 m. S.W. Kismart, with two churches, a school, distillery, a brewery & trade in flax, vinegar, horses, and swine. Pop. 1060.

MAUBAN, a to Philippines, in Luzon, on the coast, 60 m. S.E. Manila, lat. 14° 12' N lon. 121° 50' E.

MAUBERGE (Latin, *Mellipotum*) a to, France, dep. Nord, on the Sambre, 47 m. S.E. Lille. It is walled and defended by several forts is clean, well and regularly built, and has two churches, a communal college, and two hospitals, manufactures of fireworks, and other articles in iron, beaten and rolled, nails, steel, and sugar a salt-refinery, tanneries, and marble works. It exports, by the Sambre, coal, marble and slate, which form the principal articles of trade. In 1759 it was regularly fortified by Vauban, and in 1815, after the battle of Waterloo, it was besieged and taken by the Prussians. Pop. 2814.

MAUBOURGUES (Latin, *Mellipotum*), a to, France, dep. Nantes-Pyrenees, 16 m. N.W. Nantes, on the Adour. It contains mostly of a good square, traversed by one long street and has a parish church, in a mixed Gothic and Oriental style. Pop. 2510.

MAUBRAY, a vil and com. Belgium, prov Hainaut, 24 m. W. Mons, nearly situated. It has a mill, and a trade in agricultural produce. Pop. 1060.

MAUCHLINE (Gaelic, *Maigh*, a meadow, and *Maigh*, a lake), a manufacturing to, and par., Scotland, co. Ayr. The former, 7 m. S.E. Kilmarnock, a station on the Glasgow and

Dumfries Railway, is mostly built, and contains an established and a Free church, a small prison, two branch banks, a public library, and four schools. The weaving of cotton goods, and the manufacture of wooden snuff-boxes, cigar-cases, and other fancy articles in painted wood, gives employment to the inhabitants. About 1 m. N.W. is the farmhouse of Mungall, for about nine years the residence of Burns, and in the vicinity likewise, are Ballyharry, Derkington, Lager water, and other scenes celebrated in his poems. Arms of par., 7206 ac. Pop. 2470.

MAUDLINTOWN, par. Irel. Wexford 841 ac. P. 756. **MAUER**, or **MOWAN**, a vil Lower Austria, in a deep valley 6 m. S.W. Vienna, with a church, a castle, mineral springs, and a bathing establishment and a trade in corn, fruit, wine, and dairy produce. Pop. 1066.

MAUERKIRCHEN, or **MAUERKIRCHEN** a market in Lower Austria, circle Ion, 8 m. from Brunn, with an ancient church. Pop. 1000.

MAUGHAN'S (Gr), par. Eng. Monmouth, 1804 ac. Pop. 193.

MAI GHODI par. Isle of Man. Pop. 4463.

MAUGUIO (Latin, *Mellipotum*), a to, France, dep. Ille et Vilaine, on a lagoon of its name, 7 m. N.E. Montellier. It caused in 800 had a strong castle, a port, and a mill, and makes some figure in the history of the period. Pop. 1653.

MAUI, or **MOWAN**, one of the Sandwich Is., S. Pacific Ocean, N.W. from Hawaii; lat. (S.E. point) 20° 44' N lon. 155° 58' W (a). It is divided into two oval shaped peninsulas, connected by a low isthmus, only a few feet higher than the beach. The two peninsulas, called, respectively, East Maui, and West Maui rise, the former to a height of 10,000 ft., terminating in a crater 3700 ft. deep, and falling almost perpendicularly towards the sea; the latter to an elevation of 8100 ft. and having many sharp peaks and ridges, divided by deep valleys, which, in descending towards the sea, open out, and form sloping plains on the N and S sides, of considerable extent. Numerous beautiful cascades pour over the rocks, from heights of several hundred feet. On some fertile tracts, particularly on the E. division, wheat, potatoes, turnips, corn, melons, and some fruits, including grapes are produced, but these are not raised in large quantities. The sugarcane thrives well, but no systematic efforts, to any great extent, have yet been made, as its cultivation. The amount of arable land has been variously estimated at one-fourth and one-eighth; but not more than one-tenth is cultivated. On the W side of W. Maui, is the bay and town of Lahaina. The latter is built along the beach for a distance of three-quarters of a mile, and is principally composed of grass-houses, situated as near the beach as possible. It contains the king's palace, built of coral rock, a fort, and some storehouses, belonging to the king. Lahaina is much resorted to by whalers, who have obtain abundance of provisions particularly potatoes. The population is estimated at 2000. Maui has been occupied as a missionary station since 1829, and the church contains about 800 members. The schools, attended by about 1000 children, are very inefficient, there being neither regular teachers nor school-houses. Pop. island (1840), 5000.—(Wilson's *U. States Expl. Exped.*)

MAULDE, a vil and com. Belgium, prov Hainaut, 21 m. W.W. Mons, with two breweries and a mill. Pop. (agr. culture) 1577.

MAULDEN, par. Eng. Bedford 2574 ac. Pop. 1457. **MAULE**, a prov. Chile, extending from the river of the same name to the Tinto, a distance of about 40 m. to 60 m. The surface is undulating, and in many parts hilly. It produces various kinds of grain, but raising cattle is the principal object of the agriculturist. Wine and tobacco are exported to the other provinces.—The *urru*, like all those of Chile, rise on the W. slopes of the Andes. Its sources are near the peak of Desambado, lat. 33° 25' S. It falls into the sea at lat. 35° 20' S., after a course of about 130 m. At high tide vessels, not drawing more than 6 ft. water, may enter the mouth and proceed some distance upwards, flat river barges may ascend it at any season for 20 m.

MAULMAIN, a to, Tennessee, prov. So. Missouri.

MAUMEE, a vil, U. States, Ohio, 124 ac. N.W. Columbus; 1 bank river of same name, at the foot of the rapids. It has a courthouse, five churches, and several water-propelled mills and factories. Pop. 1500.—The river rises in the

N. E. part of Indiana, and, after a N. E. course of about 100 m., falls into Lake Erie. It is navigable for small craft 18 m. to Perryburg.

MAUNDVEE, a maritime tn. Hindocoteo, presid. and 10 m. S. Bombay. Lat. 18° 47' N. lon. 78° 1' E.

MAUNDWYA, a tn. Hindocoteo, prov. Gujarat, r. bank Nerbudda. It has a trade in timber which is floated down the river to the sea-coast. Pop. 4000 to 5000.

MAUPITI, an isl., S. Pacific. See **MARUA**.

MAUR, a vil. and par. Switzerland, can. and 7 m. S. E. Zürich, S. W. side Lake Greifon, with a small castle. P. 2189.

MAURA (SARZA), (anc. *Leuconia* and *Nordus*), one of the Ionian isls., the fourth in size, about 10 m. N. from Cephalonia and Ithaca, separated from the mainland of Greece by the shallow channel of Santa Maura, through which boats only can pass. S. extremity, Cape Drosio, lat. 38° 25' 30" N. lon. 20° 55' 45" E. (n.), about 18 m. to 20 m. long and 7½ m. to 10 m. wide. Its surface is extremely mountainous and rugged, particularly towards the centre. The E. side is waste and barren, but the W. and N. parts are very productive, yielding vines, olives, citrons, pomegranates, almonds, and some corn. Money and wax are also produced, and considerable numbers of sheep and goats are reared. But the staple commodity of the island is bay salt, of which about 8000 tons are annually exported. Besides agriculture, a large portion of the inhabitants are engaged in navigation and the fisheries. Under the jurisdiction of this island are included the islands of Meganisi, Chitros, and the uninhabited ones in the channel of Santa Maura. Pop. estimated at 18,000.

MAURA (SARZA), the capital, is situated on the N. E. part of the island, on a narrow strip of land, almost surrounded by the sea, and is extremely unhealthy. It is enclosed by walls and towers, and defended by a castle generally occupied by British troops. It has a hill and dirty, houses mostly of wood, and has several Greek churches.

MAURIAU (Latan, Mauricium), a tn. France des Cap. Cantal. 21 m. W. N. W. Aurillac. Many of its houses are well built, and it has two handsome ancient churches: a *Hôtel de Ville*, prefecture, court of justice, prison, and an hospital; a good trade in corn, wine, fruit, salt, horses, mules, horned cattle, sheep, swine, wax, cheese, leather, and timber. Pop. 2118.

MAURICE (St.), a tn. and par. Switzerland, can. Valais, 1 bank Rhone, 18 m. W. Siem. A bridge of one arch romantically placed, but not older than the 15th century, though sometimes attributed to the Romans, spans the river, and forms the boundary between cantons Vaud and Valais. The town stands squeezed in between the mountains and the river, and contains an abbey, a church, with a lofty tower and several Roman inscriptions built into its walls; a townhouse, now converted into a bakery, an old castle, and a considerable transit trade. Pop. 1136.

MAURICE (St.), a tn. France. See **CHAMMONT**.

MAURICE (St.), or **THREE RIVERS**, a river, British N. America, which issues from Lake Ojibwas, near the skirts of a mountain ridge; lat. 45° 40' N. lon. 78° W. flows S. E. into Lower Canada, and, after a course of nearly 300 m., joins 1 bank St. Lawrence, at the town of Three

Rivers. It is computed to drain an area of 8400 sq. m. Its navigation is practicable for 120 m., but is much interrupted by cascades, when portage becomes necessary. Its principal affluents are the Kaskia, Pienay, Ribbon, Windigo, Vermilion, Eshewash, Rat, Maskinongie, and Shawanaga. It also expands into numerous lakes, and forms about 14 small islands.

MAURICE, a vil. Holland, prov. Gelderland, 30 m. W. Arnhem, 1 bank Rhine with two churches, and an elegant school. Inhabitants chiefly engaged in agriculture and pig-breeding. Pop. 1370.

MAURITIUS, or **ISLE OF FRANCE**, an isl., Indian Ocean, a colony of Great Britain E. from the islands of Madagascar and Bourbon lat. (Port Louis, the capital) 20° 5' 42" S. lon. 57° 51' 45" E. (n.) It is of an oval form, about 40 m. N. E. to S. W., and 25 m. in breadth, and is surrounded by coral reefs. It is composed chiefly of rugged and irregular mountains, rising weakly into points or pinnacles of considerable height; the highest are the Brabant mountain, 2000 ft. and the singular insulated rock, Peter Rote, 2600 ft. Between the mountains, however, and along the coast, there are several large and fertile plains

and valleys, well watered by numerous streamlets, many of which become periodically dry, and having an exceedingly rich soil of black vegetable mould or stiff clay. Iron exists, but is of an inferior quality. The climate is salubrious, but violent and destructive hurricanes are frequent, more especially in March or April. When first discovered, the island was almost entirely covered with wood, a considerable part of which has now been cut down, although some extensive forests still remain. Some of the trees are very valuable,

particularly the black ebony, esteemed the most solid, close, and shining of any in the world. In the general character of its vegetation, Mauritius is somewhat similar to that of the Cape in the number of succulent plants, cactuses, spurge, aloes, house-leeks, fig-marigolds, &c. Many plants from Europe, Africa, Madagascar and India are acclimated and thrive well. Shady groves of mango, dense masses of mimosa, and nearly every beautiful tree of the tropics are to be met with here. The principal objects of cultivation are sugar cane, maize, mulberry, and vegetables; and, to a limited extent, coffee, pepper, and the mulberry for the production of silk. The exports of sugar, which is the staple of the island, increased from 64,686 184 lbs. in 1859, to 121,976,140 lbs. in 1862 nearly one half sent to Great Britain. Value of imports and exports:—

	Imports	Exports
1860	£1,708,270	£2,569,440
1861	1,947,293	1,932,781
1862	2,435,413	2,417,263

The imports consist of provisions of all kinds, live stock, copper, cordage, glass, cotton manufactures, &c. The government of the island is vested in a governor, a colonial legislative council subordinate to the orders of the sovereign in council. The Mauritius was discovered in 1605, by the Portuguese. The Dutch took possession of it in 1698, and named it Mauritius, in honour of Prince Maurice. It eventually fell into the hands of the French, from whom it was captured by the British in 1810 and definitively ceded to us in 1815. It is well known as the scene of St. Pierre's tale of *Paul and Virginia*. Principal towns are Port Louis and Maitland. French is the language chiefly spoken. Pop. (1846) 161,950 (1861) 322,517.

MAURO (Sax), several places, Naples, particularly — A m. prov. Basilicata, dist. and 24 m. S.W. Matera. P. 2900. **MAURES** (Latin, *Mauris*), a m. France, dep. Cantal, 30 m. S.W. Aurillac with a public square, adorned with a fine fountain. It has a trade in linen, wax, chestnuts, and several important fairs. Pop. 1785.

MAURY prov. Eng. Norfolk, 1669 ac. Pop. 65. **MAUTENDORF**, a market in Upper Austria, circle and 57 m. S.E. Salzburg with a church, a townhouse, an old castle, and manufactures of wire and stoves. Pop. 1120. **MAUTH**, or **MATRO**, a market in Bohemia, circle and 31 m. S.W. Herson with a church, glass-houses, and many houses of iron. Pop. 1200.

MAUTHAUSEN, or **MAUTHAUSEN**, a market in Upper Austria, circle Muhl. A bank Denche, have crossed by a flying bridge, 13 m. S.E. Linz. It is well built, has a church, a picturesque old castle, manufactures of leather, dye-works, extensive granite quarries, and the most important horse-market of Upper Austria. Pop. 1200.

MAUVESIN (Latin, *Malesmum*) a m. France, dep. Gers, on the Arretz, 16 m. S.E. Auch, with the remains of a strong castle. Pop. 1871.

MAYIS-KEMER prov. Eng. Lincoln 1810 ac. P. 207.

MAYRO or **MARRO POTANCO** — 1, at *Guerres* (anc. *Cephallen*), A river Greece, Lydia, which rises near Marmarion, in the N. slope of Mount Vardito, flows S.E. 2 m., and after a course of nearly 60 m. falls into Lake Potamo — (anc. *Acheron*). A river Turkey in Europe, prov. Albania, it rises S.W. of Janina, and flows in a winding S.W. course of about 40 m. to the Indian Sea.

MAYROMATI (anc. *Megaron*) a vil. Greece, Morea, at the foot of the steep hill of Thessalon, and nearly in the centre of the enclosure of the ancient city. It is a wretched village, consisting of about 20 huts. The ruins, however, are extensive, and through magnificent specimens of the military architecture of the ancient Greeks.

MAYES (Sax), a small seaport and market in England, on Cornwall, opposite Falmouth, irregularly built, inhabited chiefly by pilchard fishermen and pilots. The Wesleyans and Independents have places of worship here. Pop. 641.

MAWGAN two par. Eng. Cornwall — 1, (St. Mawgan), 3575 ac. P. 1010. — 2, (St. Mawgan), 5528 ac. P. 782.

MAWNA, par. Eng. Cornwall; 2558 ac. Pop. 589.

MAXDORF, a vil. Hesse, circle Cassel, 9 m. from Rotenburg with a school, and numerous glass polishing-mills. Pop. 1163.

MAXEN a vil. Saxony, circle and 9 m. S.E. Dresden, where, in 1759, the Austrians defeated the Prussians. P. 685.

MAYEY, par. Eng. Northampton; 2580 ac. Pop. 649. **MAXIMIN** (Sax), (Latin, *Forum Sancti Mariani*), a m. France, dep. Var, 24 m. N.W. Toulon. It is surrounded with ancient walls, has a church of the 18th century, one of the finest specimens of the Gothic architecture of the period. woollen manufactures, cotton-mills, and distilleries; and some trade in saffron, and six annual fairs. Pop. 3557.

MAXSTOCK, par. Eng. Warwick 4701 ac. Pop. 260. **MAYTON** par. Scot. Northburgh 4014 ac. Pop. 650. **MAXWELL TOWN**, a burgh of barony, Scotland, on Kirkcudbright, forming a suburb of Dumfries, with which it is connected by two bridges. It contains a handsome church several schools, courthouses, two iron-foundries, two ropewalks, two mills, a brewery, and a damask manufactory. Pop. 2530.

MAY, a small isl. Scotland, Frith of Forth, 5 m. S. Crail, in Fife, 1 m. long, by $\frac{1}{2}$ m. broad. It has the ruins of a priory and a chapel, dedicated to St. Adrian, who is buried here; and a fixed light. It is frequented by immense numbers of sea-fowl. Pop. 22.

MAY (Lx), a m. France, dep. Maine-et-Loire, about 7 m. S.E. Beaupreux. Pop. 1063.

MAYAGUES, a seaport, W. Indies, W. side isl. Porto Rico, at the mouth of a small river, in a stream of the same name. It is one of the most important places on the island. An adventurer, named Descartes, took it in 1622, and attempted to establish a republic.

MAYAR, a nation of American Indians, who, before the Spanish conquest, occupied the whole peninsula of Yucatan, including the districts of Peten, British Honduras, and Tabasco. The only pure remnant of them are some scattered tribes, chiefly along the banks of the Usumacinta, San Pedro, and Panama, and politically included in Peten, but their language is still spoken by the Indians of all the countries originally in their possession. They are comparatively harmless, and besides hunting and fishing, their principal occupation is in cultivating maize, cacao, and tobacco, the best of superior quality.

MAYBOLE, a burgh of barony, market in, and par. Scotland, co. and 5 m. S. Ay. The town, paved and lighted, contains Established, Free, and a Presbyterian churches, a Wesleyan chapel, two schools, a townhouse, savings bank, and two libraries. Weaving is the general occupation of the inhabitants. Pop. burgh, (1851), 3562. Area of par., 30,081 ac. Pop. 7615.

MAYEV, a m. Rhenish Prussia, gov. and 16 m. W. Coblenz. It is walled, has a church, two chapels, a gymnasium, and manufactures of woollen cloth, red leather, and earthenware. Pop. 4908.

MAYENNE, a m. House-Darmstadt. See METZ.

MAYENFELD or **METENFELD** a m. Switzerland, cant. Grisons, near r. bank Rhine, 11 m. N. Coire. It is walled, and has a handsome church, townhouse an old castle, and an important transit trade. Pop. 1221.

MAYENNE, a W. dep. France, bounded N. by depts. Manche and Orne, E. Sarthe, S. Maine-et-Loire, and W. Ille-et-Vilaine. Lat. 46° to 48° 54' N. lon. 0° 5' to 1° 19' W. It is of a compact and nearly rectangular shape, greatest length, N. to S. 66 m., greatest breadth, 43 m., and 1966 sq. m. Its surface is much broken by acclivities, and intersected by valleys and rivulets. It is nowhere properly mountainous, but a range of hills of considerable elevation stretches along both its W. and E. frontiers. Its strata belong chiefly to the secondary formation, and there is a small outcrop partially worked in the neighbourhood of Laval, near its centre. Marble, limestone, slate, and granite, also occur, and a good deal of iron-ore is raised, though the iron which it yields is of very indifferent quality. The only river of the dep. is the Mayenne, which traverses it N. to S. and a few small tributaries. The soil, except in particular spots, is not very fertile; but the larger part of it, nearly two-thirds, is under cultivation, while not one-twentieth is waste. About one-seventh is in meadow, and one-twentieth in wood. The grain raised leaves a surplus after meeting the home consumption. Not much wheat is grown, the principal crops being rye, barley, buckwheat, oats, hemp and flax. From the cowherds, which are numerous and extensive, a good deal of older is sold. Many cattle are reared, and considerable attention is paid to the dairy. The rearing of bees and poultry are important branches of rural

country. Game abounds, and the Mayenne is famous for its fish—carp, trout, pike, etc. The chief manufactures are linen, particularly sailcloth and table-linen. There are also cotton and paper mills, extensive blackfields, eight blast, and ten refining furnaces. The trade is chiefly in corn, wine, cider, honey, wax, cattle, poultry, wool, marble, building-stone, slate, raw wool, linen cloth, linen thread, etc. Mayenne, in the middle ages, was the theatre of numerous contests between the English and French, and was not definitely assigned to the latter till 1554. For administrative purposes, the department is divided into three arrondissements—Laval, the capital, Châteauneuf, and Mayenne subdivided into 37 cantons, and 374 communes. Pop. (1852) 374,566.

MAYENNE (Latin, *Meduana*), a town, France, dep. Mayenne, 17 m. N N E Laval, chiefly on the bank Mayenne, but connected by a bridge with an extensive suburb on the S bank. The whole town is irregularly and very indifferently built streets narrow and steep, and houses huddled together without any order. It has a large public square, adorned with a fountain, and a street of the Vierge, two churches, in the suburb and an old castle of the lords of Mayenne on the S bank, and putatively a model of the bridge. This castle was taken by the English, under the Earl of Salisbury in 1424, after a three months siege. The manufactures of linen, cotton, and tucks, are important, and employ about 8000 persons in and around the town. There are also cotton-mills, blackfields and dye-works. Pop. 7970.

MAYENNE (La), (Latin *Meduana*) a river, France, which rises in *Dept. Orne*, flows S. across *dept. Mayenne*, passing Laval, enters *dept. Maine-et-Loire*, and, a little above Angers, falls with the Loire and Sèvre in forming the Maine. The total course, about 125 m. of which about 55 m. commencing at Laval, are navigable, though much obstructed. Its chief affluents are on the right, the Varonne, Orléans, Ernée and Oudon; and on the left, the Jossanne and Oudon.

MAYET (Latin, *Meduana*), a town, France, dep. Sarthe, 19 m. N N E Flacé. It has an old castle, situated on the N side by a large tower and manufactures of sailcloth, serge, druggery, and blankets. Pop. 1849.

MAYFIELD, a town and par. England, co. Sussex, 31 m. N E Brighton, with a handsome church, schools for boys, parsonage and Wesleyan, and an endowed school. Area of par. 18,904 ac. Pop. 5053.

MAYFIELD par. Eng. Bedford 3780 ac. Pop. 1318.

MAYGLASS par. Irel. Wexford 8328 ac. P. 1095.

MAYLAND par. Eng. Essex 2080 ac. Pop. 208.

MAYNE, three par. Irel.—1 Kilkenny 1941 ac.

Pop. 423.—2 Louth 1061 ac. Pop. 262.—3 Westmeath 6504 ac. Pop. 1854.

MAYNOOTH, a market town, Ireland, co. Kildare, and 18 m. W N W Dublin, with which it is connected by railway. It has an Episcopal church, a R. Catholic chapel, a school, and a R. Catholic college, founded, in 1795, by an Act of the Irish Parliament, and endowed for the education and maintenance of 500 students intended for the priesthood. Part of its revenue consists of a grant from the Imperial Parliament of £20,000 a year. Near it are the ruins of the castle of Maynooth, built in 1426. Pop. 1610.

MAYO, a maritime co. Ireland, W coast, prov. Con. bounded S. and E. by Galway, Roscommon, and Sligo, and on the N. and W. by the coast, greatest length, N to S, 55 m. greatest breadth, E to W, 72 m. containing an area of 13131 sq. m. or 1321381 ac., of which 497,887 ac. are arable, and 800,111 ac. uncultivated, the remainder occupied by plantations, towns, and water. Its coasts are deeply indented by numerous spacious bays and harbours—the principal of which are Killybeg Bay on the N. coast, and Broadhaven, Blackadd, Tulloghan, and Olow Bay, on the W. It comprises also numerous islands, which lie close on its shores—the largest of which are Achill, Glenties, and Inishowlin. The country is, in many parts, extremely mountainous, its highest summits varying from 2370 ft. to 2680 ft. above the level of the sea. There is, however, also much level and fertile land. Its only river of any size is the Moy, which falls into Killybeg Bay. There are numerous fresh-water lakes dispersed over the country; but they are all small, with exception of Lough Gown, Glenties, and Carravore, the first of which is about 9 m. long, and 2 m. to 2½ m. broad. The second is the largest parts is limestone; in the other parts, red Vol. II.

sandstone, mica-slate, granite, and quartz. Iron-ore abounds, but none unwrought. The west of this coast there are several valuable slate-quarries. Cattle form the chief crop, but considerable quantities also of barley, bere, rye, potatoes, and turneps are grown, but pasturage is more attended to than tillage. The principal occupations are agriculture and fishing. The fishery districts are Westport, Balmullet, and Killybeg, together comprising 236 m. of maritime boundaries, which had, in 1843, 1046 registered fishing vessels, employing 4548 men and boys. In September 1844, there were 189 netted schools in operation, attended by 30,099 children. The county is divided into nine baronies, and returns two members to Parliament. Constituency (1861) 1014. Principal towns—Catheter Ballina, and Westport. Pop. (1841), 388,687 (1851) 374,830.

MAYO, a vill and par. Irel. co. Mayo, 20 m. S.E. Newport, with the ruins of a monastery and of an old round tower. Area of par. 11,848 ac. Pop. 2379.

MAYO, one of the Cape Verde is. lat. (N point), 15° 19' N, lon. 23° 13' W (E), 15 m. S. N. E. Santiago. It is about 21 m. in circumference, with a rocky coast, which, on the N. and N. E. ends, is also full of shoals, rendering navigation dangerous. There are two hills of some magnitude on the island, which may be seen from a distance of from 80 m. to 85 m. but the rest is flat and barren, and nearly destitute of water and altogether so of wood, yet the cattle here are considered better than those of any other of the Cape Verde islands. The only other valuable commodity it produces is salt, of which great quantities, formed by natural evaporation, are obtained in a large sandy bay, about 3 m. in length, and 1 m. in breadth, communicating with the sea by a narrow channel, through which the water enters only at high tides. The trade in salt, formerly in the hands of the British, is now in those of the Americans, who carry off many ship-loads annually. There is a small miserable town of the same name on the island. The natives are negroes, but have adopted the Portuguese language and manners.

MAYO, a river Mexico, which rises in a mountainous district in the S. W. of prov. Chihuahua, flows W. S. W. across prov. Sonora, and, after a course of about 180 m. falls into the Gulf of California.

MAYOMBA, or *MAUMBA*, a seaport and bay W. coast, Africa, K. Guinea, territory of Loango lat. 3° 23' 45' S, lon. 10° 28' E. (N). The river is at the head of a bay, which is extremely commodious for anchoring, being quite clear, with a fine sandy bottom all round, m. from 4 to 7 fathoms. The inhabitants work in copper and collect ivory and gum.

MAYORES a town in Spain. See *Casas* (ALZAS).

MAYORGA DE CAMPOS, a town, Spain, Leon, prov. and 42 m. N. W. Valladolid, 1 bank Cas. It has six churches, two chapels, a convent, townhouse, hospital, two schools, and manufactures of coarse cloth, serge, and wine. Pop. 3002.

MAYOTTA, an isl. Indian Ocean, one of the Comores, at the N. E. entrance of the Mozambique channel Valentine Peak, S. and lat. 17° 54' S, lon. 45° 15' E. (N). It is less frequented than the other islands of the group to which it belongs, and is surrounded with reefs, within which are several small islands, and a number of bays, suitable for a anchorage. It is about 80 m. long, by 30 m. broad, volcanic, mostly composed of lava, basaltic, its highest summit nearly 2000 ft. high, intersected by deep valleys or ravines, and well wooded. In the more level parts, the soil is a deep vegetable mould of great fertility. There are two vill. towns—that of Choa or Mayotte, and that of Zaoudi on an isl. of same name one of those included within the enclosing reef. It has suffered severely from the Madagascar pirates, being only about 160 m. from the N. W. coast of that island. Pop. (1849) 6268. (—Descentes *Geographie de Madagascar*.)

MAYPOCHA, a small river, Chili, which rises on the W. slopes of the Andes, flows W. and S. W., past Santiago, and at lat. 35° 40' joins the Mapocho entire length, about 50 m.

MAYPU, a river Chili, prov. Santiago, has its sources in the Andes, near the volcano of the same name; lat. 35° 40' S. It is joined by the Mapocho, and by several other considerable tributaries, and falls into the sea, nearly on the same parallel as that in which it has its rise, total course, about 100 m. It is not navigable, but its waters are much used to irrigate the contiguous country.

MAYRHOFEN, a vil. Austria, Tyrol, circle Schwaz, dist. and near Zell; with a church. Pop. 1345.

MAYSVILLE, a tw. U. States, Kentucky, l. bank Ohio, 60 m. N. E. Lexington, with which it is connected by railroad; has three churches, an academy, three schools, a harness for boats, lumber-yard, a cotton-factory, saw-mill, brewery, a store and a saw mill. Pop. 3741.

MATWALDAN, a vil. France, prov. Rhodan, gov. Languedoc, circle Nîmes, with two churches, a castle, and two mills. Pop. 1626.

MAZAGAN, a seaport, Morocco, N. W. coast, lat. 33° 15' N., lon. 8° 29' W. (n.) 185 m. N. N. E. Mogador and 250 m. W. by S. Fez, near the extremity of a low rocky point projecting into the sea, and forming the W. limit of a sandy bay affording a good anchorage for small vessels. The ruins in the form of a square, the sides of which are about 800 yds. in length, encompassed by walls 80 ft. thick, and 25 ft. in height. The town is in a most salubrious site, and of the buildings still standing, a large proportion are used as storehouses for wool, great quantities of which are shipped here. The principal magazines and soldiers' quarters, bomb-proof, are of tolerable repair. It is well supplied with water. Pop. 2000.

MAZAGLO, a tw. in Brazilian Guiana, prov. and about 150 m. W. N. W. Para, near l. bank estuary of the Amazon. Much rice and cotton are raised in the district, but the population, instead of increasing, continues to diminish, chiefly in consequence of the prevalence of ague and the ravages of small-pox.

MAZAGONG a tw. in Hindostan, isl. Bombay principally inhabited by descendants of Portuguese. It has two Roman Catholic churches, and a good dock for small vessels.

MAZAMET, a tw. France, dep. Tarn, l. bank Arnette, 32 m. S. E. Alby. It has a consistorial Calvinistic church; important manufactures of coarse woollens, fannels, and molasses; weavers, paper, and tanning, and dye-works, and a trade in corn and excellent cheese. Pop. 4698.

MAZAN a tw. France, dep. Vaucluse, about 5 m. E. Carpentras famous for its sweet wines called Grenache. It has some trade in olives, saffron, and cherries. P. 2572.

MAZANDERAN or **MAKENDJAN** a prov. Persia, bounded N. by the Caspian, E. Khorram, S. Irak Ajem, and W. Gilan, greatest length E. to W., about 300 m. breadth varying from 50 to 70 m. It forms the greater part of the low plain which lies along the S. shores of the Caspian, but rises rapidly towards the S. as it ascends the chain of the Elburz.

It has no rivers of any consequence, but is watered by numerous streams, which, belonging to the basin of the Caspian, have all in devotion. The high grounds are finely wooded, and the low plains extremely fertile. Even the sugar-cane thrives, and heavy crops of rice are everywhere grown. Cotton grows luxuriantly and the mulberry is employed in rearing vast numbers of silk-worms. Fruit also is very abundant, and the pomographic forms whole forests. The worst evil by which the province suffers is the extensive nature of its climate, which causes intermittence of fevers and malarial, the latter not uncommon and makes fevers, agues, droupies, &c., very prevalent. Pop. 150,000.

MAZAMONDOX a tw. Spain, New Castile, prov. and about 11 m. from Toledo. It has a church, townhouse, primary school and a trade in charcoal. Pop. 1586.

MAZATLAN, a tw. and seaport, Mexico, dep. and 153 m. S. E. Cuauhtemal, at the entrance into the Gulf of California, lat. (mean-time) 23° 11' 48" N.; lon. 106° 38' 40" W. (n.) It is built on the crest of some heights, and has a clean and healthy appearance. The water is hot, but a very inferior and vegetables are scarce; but the supply of fish, pork, and oysters is abundant, and turkeys of excellent quality are found on the river. The port is sheltered in some extent from the N. winds, but exposed to the W. and S. It forms the outlet for the products of the mining district of St. Sebastian, and exports considerable quantities of English goods. In 1846 its exports amounted to 2642,510, and its imports to 2320,200. Pop. 5000.

MAZIRA an isl. Arabia. See **MOHARRA**.
MAZUREN (Lans. Montzen), a tw. France, dep. Artois, l. bank Lez, 29 m. N. E. Yvel, with tanneries and some trade in wool. Pop. 2438.

MAZO, or **MATO**, a tw. Chucaras, S. side St. Pablo, consisting of wooden houses, most of them in a ruinous state. It

has a courthouse and prison; and, near it, wheat, rye, millet, potatoes, wine, honey wax, and silk, are raised. Pop. 4181.

MAZUFURABAD, a small tw. Punjab, l. bank Khem-ganga, 60 m. N. by W. Attock. lat. 34° 13' N.; lon. 72° 24' E., commanding the entrance of the Raranda Pass into Cashmere.

MAZARA (anc. *Byzopolis*), a tw. Sicily, prov. and 35 m. S. Trapani, l. bank Salma, near its mouth. It is surrounded by an old Sarracene wall, flanked by small square towers and has also an old citadel at its S. W. angle. It is poorly built has narrow, ill-paved, and filthy streets; a cathedral, surmounted by a fine spire, several other churches, a bishop's palace, senate-house, several convents, an hospital and a college. Its harbour is capacious, but so shallow as only to admit small vessels, and the roads for which larger vessels must anchor want shelter. The trade, however, is important, and there is a considerable export of corn, wine, brandy, seeds, oil, and cotton. The Saracens landed here when they invaded and conquered Sicily. Pop. 6840.

MAZARA, (Val de), an ancient division, which com. comprehended the W. part of Sicily, and now forms prov. Trapani and Girgenti, great part of prov. Palermo, and part of that of Caltanissetta. Palermo was its capital.

MAZZARINO, a tw. Sicily, prov. and 15 m. S. E. Caltanissetta with a college, and sulphurous springs. The family to which the celebrated Cardinal Mazzarin belonged, took its name from this town. Pop. 3000.

MAZZARON, a tw. and port, Spain. See **ALMAZARON**.
MAZZO, a vil. and com. Italy, Lombardy, prov. Sondrio near l. bank Adda, S. Berninco, with a handsome church, of which Giannangelo Medici, afterwards Pius IV., was minister. Pop. 1129.

MDOUKAL, a vil. Algeria, in the Sahara, at the S. E. extremity of the lake Hadra, 97 m. N. W. Constantine. P. 700.

MEADON, the cap. city of Japan. See **MIKAO**.
MEADVILLE, a tw. U. States, Pennsylvania, E. side of French Creek, lat. 41° 48' N.; lon. 80° 10' W. It has an elegant courthouse, seven churches, an academy, a state arsenal in the west of Allegheny college, and has also three tanneries, three mills and two printing-offices. Pop. 1819.

MEAHGUNG, a tw. Hindostan, kingdom of Oude; lat. 26° 49' N.; lon. 80° 22' E. on a flat, with a small lake on either side of it. It has wide streets, and is one of the handsomest little towns in the territory, though said to be now falling into decay. It is walled, defended by towers, and has strong gates.

MEALY MOUNTAIN, a mountain range, British A. America, E. coast Labrador between Cape Charles and Sand Bay, composed of muscaine, the highest land on the coast, estimated about 1484 ft. above sea-level, and covered nearly to the top with timber.

MEANA—1 A vil. and com. Italy, Piedmont, div. and W. N. W. Turin with a church and a trade in corn, cattle, and cheese. Pop. 1550.—2, A vil., isl. Savina, div. Cagliari, S. Corsica, with five churches, a primary school, manufactures of coarse woollens which employ about 250 looms, and a trade in wine, oil, fruit, cattle, and dairy produce. Pop. 1507.

MEANEE (Indian fishing station)—1, A tw. Bolina, on the Fathala branch of the Indus, 5 m. N. Hyderabad, lat. 25° 34' N.; lon. 68° 24' E.; famous as the scene of a great victory obtained by the Anglo-Indian army under Sir Charles Napier over the Baluchis, headed by the Amers of Bolina, on February 17, 1843. The British force consisted, on this occasion, of only 2500 men, and 12 pieces of artillery, the Baluchis army of 25,000 men, with 15 pieces of artillery. The former lost 256 men, killed and wounded; the latter about 5000.—2, A vil. Bolina, 5 m. N. Bolina, chiefly inhabited by Baluchis, lat. 25° 24' N.; lon. 67° 54' E.—3, A vil. Bolina, 6 m. S. Hyderabad, l. bank Indus, lat. 25° 20' N.; lon. 68° 30' E.—4, A tw. Bolina, r. bank Indus, 45 m. S. W. Hyderabad.—5 A tw. Punjab, r. bank Ravi, over which is a much-frequented ferry, 31 m. N. W. Lahore.—6, A vil. Afghanistan, l. bank Damanj, lat. 29° 21' N.; lon. 70° 40' E.

MEARS, par. Eng. Somerset. 2269 s. Pop. 1665.

MEARN, par. Scot. Renfrew, 7 m. by S. m. Pop. 8704.

MEARNHAM, par. Eng. Derby; 1490 s. Pop. 1863.

MEATH, a maritime co. Ireland, E. coast prov. Leinster bounded N. by Cavan, Monaghan, and Louth, E. by the Irish

Sea and Dublin, W by Westmash and S. by Dublin, K. 34 m. and King's county. Greatest length, N. to W., 47 m., greatest breadth, N. to S., 40 m. Area, 208 sq. m., or 572,342 ac. of which 547,891 are arable. The country forms the E. part of the great limestone plain that extends over all the central portion of Ireland. It has only about 20 m. of coast, and no harbour of importance. The rivers are the Boyne and Blackwater. The surface is level or undulating, rising towards the W and N W the soil, a rich loam, and, in some places, of extraordinary fertility. Oats are the principal crop, after which follow wheat, potatoes, turnips, barley &c., and a considerable breadth is under meadow-land, flax, madder and clover. Both the state of agriculture and the condition of the occupiers of land in this county are, speaking generally, alike bad. The occupations of the inhabitants are almost exclusively agricultural, chiefly grazing. Some coarse cloths are manufactured. In September 1845, there were 181 national schools in operation, attended by 15,538 children. The county is divided into 18 baronies, and returns two members to Parliament. *Constitution (1851)*, 1175. *Principal towns* Navan and Kells. *Pop.* (1841) 168,828 (1851) 140,750.

MEBAUX (*Latin, Melba*) a *co. France*, cap. dep. Escouper-Marne, on the Marne, which divides it into two unequal parts, near the canal of Ourcq 24 m. S. N. E. Paris. It is tolerably well built, contains a large though irregular square, a noble Gothic cathedral, begun in the 14th, and continued in the 16th centuries, but still unfinished, an Episcopal palace library of 14,000 volumes, colleges, townhouse, hospital, theatre, and cavalry barracks; manufactures of calicoes and cotton goods, leather, earthenware, agricultural implements, and numerous flour-mills, and a considerable trade in corn, cattle, wool, poultry, and grain cheese, known as *fromage de Brie*. Meaux is the see of a bishop, has courts of first resort and consistory, a communal college, diocesan seminary and secondary ecclesiastical school, an agricultural and scientific society. It was taken by the Normans in 892, and, after a regular siege, by the English, in 1491. It may be regarded as the cradle of the Reformation in France; its bishop, Brissonnet, who had early embraced the reformed doctrine, though he afterwards adjusted these having gathered around him a number of able men, some of whom, as Jacques Laffrere of Exilles and William Farel afterwards distinguished themselves as reformers. *Pop.* 7782.

MEBAVY per Eng. Devon 3289 ac. *Pop.* 294.

MEBARREZ, or **MEBARREZ**, a *tn. Arabia*, dist. and about 23 m. S. El Ahas. It consists of the town proper surrounded by a deep ditch, defended by lofty towers and of an extensive suburb, with which it communicates by a single gate. To the E. of the town are date groves, interspersed with many large villages and hamlets. *Pop.* about 10,000.

MECCA, or **MEKKA**, the most celebrated city of Arabia, and long the capital of an independent state in the Hejaz, five days journey 2½ d. lat. 21° 28' N. lon. 40° 8' E. the birthplace of Mahomet, the founder of the superstition that bears his name, who was born here, A. D. 571. It is styled by Mahometans El Mubarrak [the noble] Om-el Kora [the mother of towns], Belad el-Amn [the land of the true believers] &c. Mecca stands in a narrow sandy valley 100 to 200 paces broad, extending, in a general direction N. to S., enclosed by sterile hills, from 200 to 500 ft. high, without trees or verdure, and in all surrounded with water. In its centre is the Belad-Ilah [house of God] or El-Haram [the inviolable]—the great mosque, enclosing the Kahe, dividing the whole into the upper (northern) and lower (southern) towns these again being subdivided into 35 quarters, exclusive of the suburbs, which stretch in single lines of houses along the narrow parts of the valley. The length of the city, properly so called, is 1600 paces, but 2000 paces more must be added for the suburbs. Mecca is reported to be in itself a good-looking city, the streets being wider than in most Eastern towns, the houses of stone, often three stories high, and well-lighted with windows looking towards the street, which gives them a gay and European appearance. It contains, however, but one great public square, and that is occupied, to a great extent, by the Belad-Ilah. It has not a second handsome mosque; there is no bazaar, no bath or inn, and, with exception of the Sherif's house, and two houses treated as madhouses or colleges, has converted into corn-stores, it contains no large

buildings. The streets, unpaved, are, in dry weather, darkened with clouds of dust, and, in rain, rendered impassable by deep mud. It is an open unprotected town. The castle, indeed, on its S. E. side, near the Sherif's house, is large enough for a garrison of 1000 men and is thought by the Arabs to be impregnable; but while it commands the city, it is far from itself commanded by the surrounding heights. The old walls, which closed up the valley towards the N. E., and S. W., have long disappeared. The stationary population of Mecca was estimated by Burckhardt, in 1814, at between 25,000 and 30,000, including 8000 or 4000 Abyssinians and negro slaves. But the city is large enough for three times that number; and is usually filled at the time of the Haj or pilgrimage to the Kahe, when apartments in almost every house are hired to strangers, and thousands besides encamp outside the town. This pilgrimage, customary among the Arabs in early and idolatrous ages, and subsequently enjoined by Mahomet on all his followers, is the sole foundation of Mecca's fame, and the only source of her wealth and opulence.

The great temple of the Kahe, the Belad-Ilah, or El-Haram, is an unymmetrical, modern-looking patchwork of ancient fragments, without any pretension to unity or style. It may be entered by 18 doors, and is adorned by numerous minarets, such as ordinarily decorate the larger mosques in the East, and not remarkable either for magnitude or beauty. Within, the great four-sided court of the temple, surrounded by colonnades of irregular pillars, is about 250 paces long and 200 wide and, nearly in the middle of it is a hollow surrounding the Kahe (cube) or sacred house, measuring, in length, about 18 paces, in width 14 paces and in height not exceeding 40 ft. The present edifice was reared in 1597 the previous one having been destroyed by a sudden torrent, after heavy rain, and it is probable, from its situation, that the Kahe has often suffered from a like casualty. The sides of the Kahe are completely covered by the Karcas, that is, the veil or curtain of rich black silk, which is renewed every year, at the expense of the Ottoman Porte. This silken curtain, waving and fluttering with every breath of wind, is thought, by the simple devotees around, to be fluted by the wings of guardian angels. The pilgrims, most of them ignorant and half-savage, come here disposed to look with reverence on the Kahe, but their reverence turns to enthusiasm, and their joy gets the better of their awe, as they gaze on the life-like movements and solemn undulations of the rich silk curtain. At two spots only is this covering removed, for the curtain is sent so as to expose a gray stone at the S. E. angle of the building, which is thought meritorious to touch, and in like manner at the N. E. angle, is exposed the celebrated black stone, the kissing of which is a chief object of the pilgrimage. This stone is believed to be the angel whose office it will be, at the last day, to identify those who have duly performed the Haj. This belief however has not always availed to save it from rude treatment. It was carried off by the followers of Karmath, in A. D. 926, but was soon after recovered and replaced, bound in silver. Again in 1022 it was broken to pieces with a hammer, by the emissary of a heretical sect. On this occasion some fragments were separated together; and at present, the exposed surface of this stone, worn smooth by the lips of its worshippers, does not exceed 7 inches in diameter. Towards the slope of the Haj, the old curtains of the Kahe are removed, to make way for the new ones; they are immediately divided into thousands of pieces by the officers of the mosque, who realize a good sum by the sale of these shreds of silk. Besides the assemblage or pulp of the Imam, and the dais assigned to the doctors of the different sects, there are several irregular and, in some measure, unsightly buildings, round the Kahe. In one of these is the famous wall of Zeinunn, alleged to be the one whence Hagar obtained water for Ishmael, and which is surrounded with a circular wall 5 ft. high and 10 ft. in diameter. The water of Zeinunn is perfectly fresh, though every other spring in the neighbourhood is brackish, at the same time it is whitish, lukewarm, and difficult of digestion. A great deal of disease and mortality among the pilgrims is caused by drinking it immoderately. They devoutly believe it to be a sure remedy for all bodily ailments, and even salutary for the soul; for sick pilgrims, expiating death, often get themselves laid in the neighbourhood of the wall, trusting that, when they shall have expired, the hand of charity will sprinkle their bodies with the water of Zeinunn. Windings.

shoes, duly dipped in this water may be reckoned among the most profitable and most characteristic specimens of the industry of Mecca. Few pilgrims leave the holy city without taking with them some flask filled from the sacred well, the odorous waters of which, if laid out upon the soil, instead of being wasted on evaporation would suffice to produce a real, not an imaginary paradise.

The Meccawi, or inhabitants of Mecca, are, with exception of a few *Hajjati* Bedouins, all strangers by birth or parentage that is to say they are either not natives of the place, or not descendants of the indigenous tribes. They are, in fact, settlers or children of settlers attracted hither by gain. They are extremely proud of their city food of fine clothes and pearls, devoted to the pleasures of the table, and cold spectators of the humors which they periodically witness, and of which they make their money. Intent on gain they care not for learning; the colleges of Mecca have fallen to decay and the libraries, once rich, have totally disappeared. As Mecca, during the pilgrimage, is visited by 100,000 strangers on an average it becomes, for three or four months in the year, the greatest market in the East. Its merchants occasionally accumulate large fortunes, and, under the protection of the Turbans, they are not afraid to show their riches, and live like princes. On the other hand, it is proverbial that Mecca is the beggar's paradise; the beggars of the holy city are as numerous as well as numerous. The Sherifs, or direct descendants of Mahomet are now a numerous and widely-spread body. They all wear the same costume, priding themselves on the green robe which marks their descent and thence, uniformly send their sons in infancy to be reared by the Bedouins. These nobles as they may be called, elect the Sherif of Mecca, and their choice is invariably confirmed by the Ottoman Sultan.—(Nicholson *Descent de l'Arabie* *Travels of Ali Bey Burckhardt's Travels in Arabia*.)

MEXEJANA a vil. Brazil prov and 12 m. E. Ceara, with a townships and church. Cotton-growing and cattle-rearing are carried on. Pop. 2000.

MICHELENI a vil. and com. Belgium prov. Limburg, 1 hour Meuse, 14 m. E. N. E. Hasselt with manufactures of earthenware and two flour-mills. Pop. (agricultural) 1197.

MICHELIN (French *Mézières* Flemish *Michele*) a tn. Belgium, prov. and 14 m. S. S. E. Antwerp, with which and with Brussels, Ostende, Liège, &c. it is connected by railway. It lies in a fertile plain on both sides of the Dyke, is of a circular form, and entered by eight gates. Though presenting somewhat of a decayed and deserted look, it is remarkable for the quaint architecture of its houses, and the extreme clean-

ness of its streets. Its principal edifices are its cathedral, an ancient Gothic structure, with a massive square tower 246 ft. high, not originally intended to have terminated in a spire, which would have made the whole height 640 ft.; the church of Notre Dame, built on the model of the cathedral; the church of St. Peter and St. Paul, with a communion-table regarded as a master-piece of wood-carving; the church of St. John the Baptist and St. John the Evangelist; the church of Notre Dame d'Harvey, crowded by a dome the church of the Angehage, with a very remarkable facade, and the archbishop's palace, a plain, but handsome modern edifice. The manufactures consist chiefly of fine lace, for which the town has long been famous—felt and straw hats, woollen stuffs and woollen yarns, linen, almost-worked, oil, leather, wax and tallow candles, paper, wax-stick, copper-ware, jewelry, cordage, glass, soap, starch, glass, vinegar &c. The trade, in addition to the above articles of manufacture, includes some hemp, flax, and hops, facilitated greatly by Michelin being the central station from which all the Belgian railways diverge. The three weekly markets are well attended, and there are two important annual fairs, each of which lasts 15 days. Michelin is the see of an archbishop, and possesses a court of first resort, a communal college, a great and a little seminary an academy of design a botanical garden a society for the encouragement of the fine arts, two barracks, two prisons, a most-de-pit, several hospitals, almshouse and other benevolent institutions. It appears to have been founded in the fifth century. For some time it was the capital of a lordship, and was governed by its own counts. About 882 it was burnt down by the Normans but was rebuilt in 897, and soon after rose into importance. Its greatest prosperity was in the 14th century when it had important manufactures of broad-cloth, which employed above 5000 looms. Its most distinguished natives are Jean Bod, an ardent minister, and Michel Corda, a good historical painter. Dubouas, a celebrated botanist, and physician to Charles V. Ernest of Mansfeld, a famous general, and Eype or Eypson, a distinguished jurist. Pop. 24,284.

MICHOACAN MICHOACAN, or VALLADOLID a state or dep. Mexican confederation, bounded, S. W. by the Pacific and surrounded on other sides by Colima, Jalisco Guanajuato, and Queretaro, and Mexico; lat. 17° 55' to 20° 37' N. lon 100° to 104° W. area, 22,598 sq. m. Alt N. and E. part consists of a tableland 5000 ft. to 8000 ft. above sea-level from which rise the noted Jorullo, and numerous snowy peaks. Sulphurous springs are abundant. Towards the W. the country descends by terraces to the Pacific, along which stretches, for 120 m. a tract of low land extending several miles inland. The basin, which forms the boundary towards Mexico on the S. E., and the Lerma, with their respective tributaries, are the most considerable streams that descend on, as well as lakes, are numerous. A considerable portion of the soil is remarkably fertile, and capable of producing in abundance all the ordinary European and Maltese crops. The sides of the mountains are covered with forests of valuable woods, and there are gold, silver and lead mines, which were at one time wrought extensively. Possessing no exports the products of the state are carried inland to Mexico and other places. The climate is remarkably healthy Besides Morelia or Valladolid, the capital, the principal towns are Tzucucaro and Ziaucaro. Along with Jalisco and Colima, this state formed the ancient kingdom of Michoacan. It is divided into four departments, and 63 municipalities. Pop. 491,679.

MICINA-BOKRANG a tn. Spain, Andalusia, prov. and 50 m. S. E. by S. Granada. It is indifferently built, has two squares, a church, three chapels, three schools, a town-house, small prison, storehouse manufactures of linen and brandy and some trade in wine, oil, and silk. Pop. 2630.

MICKENHIM—1, a tn. Bavaria, Prussia, on the Rhine; with a church Pop. 1796.—2, a tn. in Rhinisch Prussia, gov. and 21 m. S. Cologne. It is walled, and has a church, a chapel, several mills, and a trade in corn and cattle. Pop. 1800.

MICKLEBURG *See* MICKLEBURG.

MICO a tn. Spain, New Castle, prov. and 31 m. from Madrid with poor, earthen houses, tolerably well-paved and spacious streets, a large and magnificent church, good townhouse, prison, two primary schools, and a considerable trade in flour, sent to Madrid. Pop. 1418.

MEDAK, a vil. Austria, Croatia, at the confluence of the Glacina with the Leca, 12 m. from Gorizia; with a church and a distillery estate. Pop. 1377.

MEDBOURNE, *see* Eng. Leicester 2530 ac. P. 867.

MEDE, a tn. Brazilian States, div. and 25 m. S. Novara. It is well built, has three churches, a small theatre, a com-

NOTRE CATHEDRAL AND MARKET PLACE, MICHELIN.—From *Paris's* *Illustration*.

ness of its streets. Its principal edifices are its cathedral, an ancient Gothic structure, with a massive square tower 246 ft. high, not originally intended to have terminated in a spire, which would have made the whole height 640 ft.; the church of Notre Dame, built on the model of the cathedral; the church of St. Peter and St. Paul, with a communion-table regarded as a master-piece of wood-carving; the church of St. John the Baptist and St. John the Evangelist; the church of Notre Dame d'Harvey, crowded by a dome the church of the Angehage, with a very remarkable facade, and the arch-

usual school, manufacture of hats, a tannery, several silk-mills, and a trade in rice, corn, fruit, wine, and silk. P. 4415.

MEDEAH, or **MADANA**, a tn. Algeria, 46 m. S.W. Algiers, 1 bank one of the head-streams of the Waddi. It is walled, has two gates, a few mosques, a building formerly used as a barracks for janissaries, a large square structure containing the magazine, and a palace. The latter has nothing particularly attractive in its external appearance, but within it is a large square court, paved with white marble, and surrounded by a gallery with arcades of Moorish architecture, into which the doors and windows of the apartments open. The town is supplied with water from a neighbouring mountain, by means of a lofty aqueduct. Pop. (1849), 5596, of whom 2159 were Europeans.

MEDERACH, a tn. Prussia, Westphalia, gov. and 48 m. S.E. Arnsberg, on the Ocker with four churches, and manufactures of woollens and potash. Pop. 2514.

MEDILLAN, a city, New Granada, dep. Cundinamarca, prov. and 60 m. S.E. Antioquia. Pop. estimated at 14,000.

MEDKMBIJK, a seaport, and once fortified in Holland, prov. N. Holland, 29 m. N.E. Amsterdam, near the entrance to the Zuider Zee. Its harbour once spacious, is now partly silted up, and its commerce is insignificant. It has four gates, five churches, and a synagogue; a townhouse, several schools, and is the seat of the royal marine institute, for education and training young men intending to be naval officers. Inhabitants occupied in seafaring, and in trading in cheese, better rock-salt coals &c. Pop. 2667.

MEDNICE, a vil. Austria, Galicia, circle and about 66 m. from Sandomer on the Leczynka. It has two churches, a synagogue, and a mill. Pop. about 1830.

MEDESANO, a vil. and com. Italy, dist. of and 10 m. S.W. Parma, 1 bank Taro with a primary school, limekilns, and a trade in cattle, sheep and swine. Pop. 3824.

MEDGYER, **MEDAKOT**, or **MEDWADZ** (anc. *Macha*), a free town, Austria, Transylvania, ep. dist. or stuhl, 1 bank Great Kôkal 25 m. N.N.E. Hermannstadt. It is walled has six gates a view over the plain, four churches, a gymnasium with a small library, and a Franciscan monastery. Though there are four annual fairs, the external trade is not important but a good deal of wine is sent into the interior. Pop. 5900.—The *szarvaz* or *szarvaz* belongs wholly to the basin of the Maros. It is sandy and not well adapted for wheat, but has good pastures, and produces the best wine in Transylvania. Area, 184 geo sq m. Pop. 32 000.

MEDIA, a country of ancient Asia, the boundaries of which, from having varied at different times, are not easily determined. Strabo divides it into Great Media and Media Atropatene. The former consisting of an elevated plateau with a good climate and a fertile soil, separated from the low country of the Tigris and Euphrates, on the W and S.E. by a mountain range, and extending E to the Caspian mountains (the modern Elburz), and a desert, apparently corresponding with the Persian province of Irak Ajam; the latter which extended as far N as the Arax, corresponds with Azerbaijan, and may also have included Mamedecan and Ghilan. The capital of Great Media was Ecbatana, now Hamadan, that of Atropatene was Gasa or Gassha, which appears to have had its site not far from the modern Tabriz. Media originally formed part of the Assyrian empire, rose afterwards to be an independent monarchy, and, having been subjugated by Cyrus, was incorporated with Persia. On the downfall of the Persian empire it passed, first to the Seleucids, and then to the Parthians.

MEDIANA, a tn. Spain, Aragon, prov. and 21 m. S.E.E. Saragossa, 1 bank Ghal; with a church, townhouse, prison, a superior and a primary school, several mills, and some wool combs. Pop. 1811.

MEDICINA, or **MEDRINA**, a tn. Ital., legation and 16 m. S. Bologna. Pop. about 6190.

MEDINA (Arabic, *Madinah al-Nabi*, The prophet's city, i.e. *Yathrib*, the *Jathrippa* of Ptolemy), a city, Arabia, celebrated for containing the tomb of Mahomet, and chief place in N. Hejaz, about 248 m. N. by W Mecca, lat. 24° 57' N., lon. 39° 58' E. It stands at the E. side of the mountainous rugged parallel to the Red Sea, about 8000 ft. above sea-level; an immense plain extends E. from it; in every other direction the view is bounded by hills or mountains, which, towards the S.W., have a bold and rugged appearance. The summits of

the maritime chain are in winter often covered with snow and Medina, on the table-land at the foot of these mountains, experiences severe cold and frost. At it compels, however, a depression in the table-land, and all the streams from the country around flow towards it, it is the most fertile spot in all Hejaz, though, from the same cause, extremely unhealthy. The town forms an oval about 2800 paces in circumference, and is surrounded by a strong stone wall about 40 ft. high, dashed with towers, while on a rock, at its N.W. side, stands the castle. Of its three gates, that facing the S., and called the Bab-al-Miani or Egyptian gate, is remarkable for its beauty. Though Medina has no large buildings besides the great mosque, two smaller ones, a college, and public baths it yet seemed to Burckhardt the handsomest city in the E. after Aleppo. The houses are of stone, two stories high, and many of them bespeak opulence and comfort. Beyond the walls of the city, W and E, are suburbs consisting of low houses, yards, gardens, and plantations, in which the Bedouin encamp. These suburbs have also their walls and gates. The canal, which supplies Medina with water from a valley, a few miles to the S., is a noble work, and undoubtedly the greatest of its kind in Arabia. It is generally about 55 ft. underground, and terminates in a basin from which all may draw without restraint. The water, like that of Mecca, is lukewarm and indigestible.

The mosque of the prophet stands at the E. side of the city and resembles that at Mecca in its plan, though on a smaller scale and its colonnades are likewise remarkable only for their extreme irregularity. The tomb of the prophet is enclosed with a screen of iron filigree, painted green, and of excellent workmanship, at the S. side of which the pilgrims go through his devotions for all of which he pays, but is concealed with the assurance that one prayer here is as good as a thousand elsewhere. There are four doors into the interior, but one of these only is open and kept by a cunch. Admission into the enclosed area, or El Hajarah, is allowed only to Pashas, leaders of the Hajj, and such like, on payment of a large fee. There is little to be seen inside, however, but the embroidered silk curtains which are sent every five or six years from Constantinople, whether the old curtains are sent back that they may cover the tombstones of the Sultan and his family. The curtains are said to conceal a quadrangular black stone, supported by two pillars, between which are the graves of Mahomet, and his friends and successors, Abu Bakr and Omar. The Arabs in Medina know nothing of the great magnet which, according to some Europeans, supports the coffin of Mahomet. Through the pilgrimages to the prophet's tomb is not considered by Mahometans as an unperpetrated duty like that to the Kahe, yet great numbers flock to the former and the more ignorant classes of pilgrims, from Africa particularly, seem to prefer decidedly the mosque of the prophet to the house of God. It is estimated that one-third of the Meccan pilgrims go on to Medina, the pilgrimage to which may be performed at any time of the year. The inhabitants of Medina are, like those of Mecca, strangers in the land of the Bedouin, who are all poor, and incapable of changing their habits. The settlers attracted to the holy cities become in a short time as true Arabs in feelings, manners and language. The people of Medina are less gay and vicious than those of Mecca, and at the same time more studious as to appearances, nor are they inattentive to learning, and some of them are said to possess fine libraries. The *Shaykh* in Medina are Ulama or doctors of the Koran and not men of the sword, as in Mecca. It is remarkable, that the two holy cities of the orthodox Mahometan world are in the midst of sectaries, for as Mecca is surrounded by the followers of Sufi, so the Bedouin tribes, and many of the *Shaykh* at Medina, are adherents of Ali. But the chief distinction between the two cities is, that in Mecca the better class of people live altogether by trade, founded on the great concourse of strangers who visit the Kahe in Medina, on the other hand, commerce is held in contempt and the settlements of the Bedouin, in this respect, have retained their unaltered force. The business of the place is all done by the merchants of Yumbo or Yanbo, a port on the Red Sea, about 102 m. S.W. The population of Medina is supposed to be from 18,000 to 20,000, of whom 15 000 are within the walls. Medina appears to have been originally quite independent of Mecca, and to have been ruled by a governor appointed by the Caliph. In the course of the

fifteenth and sixteenth centuries, however, the latter city obtained a decided ascendancy, and the Sherif of Mecca ruled all Hejaz. This continued until the Turks, pursuing their Medina was, from the N., the key of this country, contrived to obtain a footing in it, opposing the ill-fated emperor, as governor of the city with a garrison of Spanish. This state of things continued till the beginning of the present century, when the place fell into the hands of the Wahabîs. They were in turn expelled by the Turco-Egyptian army in 1814, whose operations against Deraïyah were directed from this point, which ended in the subjugation of those forces and turbulent reformers. From that time it has remained undisturbed as the capital of the N. pashalik of Arabia.—(Nicholson *Despatch de l'Arabie*, *Traité de Ali Bey*, Burckhardt's *Travels in Arabia*.)

MEDINA.—1. A vil. Sonagumba, Jaén country on a small hill lat. 35° 18' N. lon. 3° 18' W., where dyking, chiefly in blue and green colours, is carried on to a considerable extent.—2. (see *Meck*) A river England, Isle of Wight. It rises on the E.W. coast of the island, flows N. and enters the Solent at Cowes harbour. It is navigable for vessels of 80 tons to Newport.

MEDINA, several places, Spain.—1. (*de las Torres*) A town, Extremadura, prov. and 36 m. S.E. Badajoz. It has low small houses, built without any approach to uniformity. A townhouse, several primary schools, a house of refuge, a parish church, and, on an isolated eminence, the remains of an ancient castle. It flourishes the numerous flour and three oil mills, manufactures of blankets, and friezes, and extensive helmers. Pop. 2260.—2. (*de Pinar*) A vil. Old Castile, prov. and 29 m. N. by E. Burgos. It has a fine bridge of seven arches over the Trueta, a townhouse, two churches, three universities, a Latin and three primary schools, several benevolent institutions—an hospital for the sick, an asylum for lunatics and wanderers above 50, and another for 12 poor persons of both sexes; also lunatic. 11 fairs, one for linen—oil, very numerous. Pop. 1150.—3. (*de Rivas*) A town, Leon, prov. and 25 m. N.W. Valladolid, on the Segura. It has 11 squares, large and small, some of them, as well as of the streets, provided with arcades. A substantial well-built townhouse, the ruins of a palace, several handsome arcades which give entrance to the city, two Latin and several other schools, a foundling hospital and an infirmary, a granary, three hand some churches, two universities, and various benevolence in and around the town. Of its walls only three bastions and six gates remain, to testify to the solidity and beauty of the ancient fortifications. Agriculture is the chief occupation, but there are also manufactures of serge and other woollen stuffs, coloured leather, pottery, tiles, hair, chocolate, brandy, &c., and a considerable traffic is carried on with Galicia, the Asturias, and other parts. Still Medina has greatly declined from its former commercial importance. Pop. 4800.—4. (*del Campo*) (see *Mittham Campestre*), A town, Leon, prov. and 36 m. S.W. Valladolid. It has a townhouse, a primary school for each sex, two hospitals, a collegiate, and six parish churches and a religious old tower. The great square is surrounded with houses, and has a fountain in the centre. There are likewise ruins of convents, barracks, and other edifices, which denote the ancient importance of this place, which is said to have once contained 50,000 inhabitants. It was a royal court, and much-frequented impregnable. In the castle the infamous Count Borja was confined for two years, until he escaped by the aid of the Count of Benavente, and Queen Isabella died in it, November 26, 1504. Medina was the capital of the Campo, or level district, which is one of the finest wheat countries in the world. Besides grain, some wine is exported; and there are two chocolate-mills, tobacco, and fat manufactory. Pop. 2760.—5. (*delos*) A vil. Andalusia, prov. and 93 m. S.E.E. Cadix, in the form of an amphitheatre, on a broad eminence, in the middle of an extensive plain. In general the houses are but one story high, but there are some of three stories, but with painted doorways and windows; and the streets are clean and well paved. The principal square in which stand the Town and Doric townhouse and the granary has a planted promenade, and is provided with lamps. There are also ten schools, two of them gymnastics; a foundling hospital, an orphan asylum, and two other benevolent institutions, two churches, two universities, five suppressed monasteries, and five benevolent agricultural

schools, manufactures of earthenware, bricks, staves, mill-stones, carpets, cordage, &c.; flour and oil mills. Carrying trade and other produce to Cadix, and other places, are the chief occupations. The principal articles imported are soap, wine, wool, and cotton, oil, fish, and other necessaries. Pop. 10,554.—(Nelson.)

MEDINACELI. A town, Spain, Old Castile, prov. and 43 m. S. Burgos with a townhouse, granary, primary school for both sexes, a one-story high palace of the Duke of Medinaceli, an hospital for the sick, poor, two universities, a parish church, and some manufactures of hemp and linen fabrics, harness, and ordinary cloths. Pop. 1600.

MEDINET AMU or MEDINET-BANCO. See TAMER.

MEDINET-EL-FAYOUM A town, central Egypt, cap. prov. Fayoum, 55 m. S.W. Cairo. It stands near the mounds marking the site of the ancient Arsinoe or Crocoditopolis, and is a place of some importance, being the residence of the governor, and containing a number of barracks, barracks, and houses. It has manufactures of woollen linen and cotton goods, shawls, carpets, &c. is the entrepot of a considerable trade, and is famous for its rose-water produced from fields of roses in the vicinity. Pop. about 5000.

MEDITERRANEAN SEA (Latin, *Mare Internum*, French, *Mer Méditerranée*, Spanish and Italian, *Mar or Mare Mediterraneo*, German, *Mittelmeer* or *Mitteländisches Meer*) a great inland sea, between lat. 30° 30' and 45° 30' N., and lon. 15° W. and 35° E. about 2500 m. long, breadth, from Venice to the Bay of Sidra, 1200 m. It washes the shores of Europe on the N. and N.W., those of Africa on the S., and those of Asia on the E., and communicates on the W. with the Atlantic Ocean by the Strait of Gibraltar and on the N.E. with the Black Sea, through the Sea of Marmara and the Straits of the Dardanelles, and Constantinople. It is very irregular in shape, and by the projection of the S. part of Italy, and of Cape Bon in Africa, and the interposition of the island of Sicily, is divided, near its centre, into two distinct, and not very unequal portions, an E. and a W. In addition to these, on the other important subdivisions are the Tyrrhenian or Tuscan Sea, between the W. coast of Italy and the islands of Sardinia and Corsica, the Adriatic Sea or Gulf of Venice, between the E. coast of Italy and the W. coast of Turkey in Europe and Dalmatia, the Ionian Sea, between the W. coasts of Turkey in Europe and Greece, and the E. part of Italy and the island of Sicily, the Aegean Sea or Archipelago, between Turkey in Europe and Greece, on the W. and Turkey in Asia on the E. and the Levant, which is usually understood to include the whole sea E. of the island of Crete. The largest gulf, or bay, on the shores of Europe, those of Ligea, Genoa, Tarentum, Lepanto, Koron, Kolokythia, Argos and Salamis, on the shores of Asia, Adramytti, Smyrna, Adalia, and Skanderoun, and on the shores of Africa, Sidra, and Cabes. The most remarkable cape, commencing in the W., and making the circuit of the coast, are those of Gibraltar, Gata, Palos, Mar Spartivento, Lanes, Matapan, Colonna, Athos, Baba, Othello, Amasoor, Bon, and Ceuta. The largest and most important islands are Sicily, interposed, as already noticed, between the two great divisions of the sea, Sardinia, Corsica, and the Balearic Islands in the W. division, and Cyprus, Rhodes, Crete, the Ionian Isles, and Malta, in the E. division. The principal rivers which discharge themselves into the Mediterranean are the Rhodanus, Rhodanus, Po, and Nile, but its communication with the Black Sea entitles it to claim it as part of its basin, and consequently also the great rivers, Dan, Dnieper, Dniester and Dniestr. Between Cape Bon and the Sicilian coast, where the water is shallowest, the depth barely exceeds 50 fathoms; but in almost all other places, particularly at a distance from the shores and islands, is so much increased, that it often gives no soundings. Owing to the very narrow channel which connects the Mediterranean with the main ocean, there is very little tide, though, in some places, as in the Ionian Sea, the Adriatic, on parts of the African coast, &c. a rise of more than 6 ft. sometimes occurs. The general current, entering from the ocean, proceeds E. along Africa, then N. along Syria, and begins to return by proceeding W. along Anadolus. The prevailing winds are the S.E. and S.W. in spring, and the N.E. and N.W. during the rest of the year. They blow either mildly, and with great violence. The most remarkable are the Bura in the Adriatic, the Etesian and Tyrrhenian in the Aegean; and the burning Sirocco,

from the African desert. Water-works are common on the coast of Asia Minor. Active volcanoes exist on the coast of Naples, in the Lipari Islands, Sicily and the Grecian archipelago; and, in Italy, 1881, the remarkable active volcano named *Graben's Island* was shot up from the sea, between Sicily and the African coast, lat. 37° 50' N., lon. 13° 43' 15" E., and again disappeared (see *GRABEN'S ISLAND*). The Mediterranean abounds with fish, and also furnishes the finest coral, sponge, and ambergris.

MEDJIBO, a *tu. Basile*, gov. Fodohk, 70 m. N.E. Katsenik, r. bank Bag. It is surrounded by extensive marshes, and accessible only by a bridge. Pop. 4386.

MEDIL, or *MEDIL*, a *vil. Austria*, Moravia, circle Olmütz, 4 m. from Lititz, with a church. Pop. 1736.

MEDLING or *MEDLING*, a market *tu.* Lower Austria, 9 m. S.W. Vienna. It has a church of the 13th century an ancient townhouse, barracks, and a bathing establishment created over a chalybeate sulphurous spring, which is much resorted to by visitors from Vienna a theatre, and some prize-works. Pop. 8500.

MEDMENTHAM, par Eng. Hants 3420 ac. P. 401.

MEDNOI, or *COTTEZ ISLAND*, Asia Russia, Behring's Sea, 100 m. E. Kamtschatka, and 85 m. E. Behring's Isle, lat. 55° 7' N. lon. 160° E.; length, N.W. by S. 85 m.; breadth, about 11 m.; surrounded by rocky precipices but with two good harbours, into which two small streams fall; much frequented by seals and sea-fowl; few inhabitants.

MEDO, a small *isl.* Brazil, bay of São Marcos, prov. and 4 m. W. Maranhão, covered with verdure but fringed by shoals, on which many vessels have been wrecked.

MEDOO, a *dist. France*, which belonged to the former prov. of Gascony, and is now included in dep. Gironne; Lescarpe was its capital. It gives its name to one of the best of the French clarets.

MEDOMBLEY, a *vil.* and chapelry England, co. and 12 m. N.W. Durham with a chapel and places of worship for Baptists, Methodists, Quakers, and Wesleyans, and several schools. Pop. 756.

MEDSTED, par Eng. Hants 3811 ac. Pop. 482.

MEDVEJII-OZROVA, see DEAD ISLANDS.

MEDVES, a *vil.* Hungary Thither Thelen, co. and 5 m. from Temesvár, on the Theiss with a school. Pop. 1602.

MEDWATER, a river, Basile, which rises in the N. of gov. Basile, and S.W. enters gov. Don Caesaria, and, after a course of about 300 m., joins 1 bank Don, at the town of Ostroverk.

MEDWAY (see *Faga*, a winding course) a river, England, which rises in *co. Sussex*, flows N.E. in a winding course across *co. Kent*, past Tunbridge and Maidstone, to Rochester and Chatham where it becomes a tidal stream of great depth, its reaches forming a safe and commodious harbour for the royal navy. Below Chatham it spreads out into a broad estuary in which are several islands, and joins the Thames at Shoore. The Eden, the Tulse, and the Bault, are its chief affluents. It is navigable to Faversham, 30 m. above Chatham, distant diatance.

MEDYN, or *MEDYN*, a *tu. Basile*, gov. and 87 m. N.W. Kaluga, cap. circle, on the Medynka, with two churches, and some general trade. The French were here defeated by the Russians in 1812. Pop. (1850) 2744.

The circle, well wooded and fertile, departs outside of a superior description. Area, 978 sq. m. Pop. 73 671.

MEDZIBOR, a *vil.* in *France*, gov. Basile, gov. Basile, dist. Wartemburg, with a church, and a trade in cattle, corn, wine and tobacco. Pop. 1843.

MEEDEN, a *vil.* Holland, prov. and 16 m. S.E. Groningen; with a church, a school, a corn and a filling mill. Pop. (1870) 1231.

MEELICK, two parts, Ireland—1. (Galway), 4115 ac. Pop. 1003.—2. (Mayo), 3055 ac. Pop. 3669.

MEELNAGH, par *Irish* Wicklow, 4189 ac. P. 1843.

MEEN (see), a *tu. France*, dep. Ille-et-Vilaine, 24 m. W. N. W. Rennes with interesting ruins of a monastery, in the court of which Bertrand du Guesclin defeated a party of English. Pop. 1685.

MEENAR, *MENAR*, or *MENAR*, a maritime in Persia, prov. Korassan, on the Persian Gulf, at the mouth of the river of same name, lat. 21° 7' 45" N. lon. 56° 45" E.; in the better part the houses are built of rough stone, connected with

and with tide in the wharves in place of glass. Near it is the fort of Meenah, on elevated ground, on the S. bank of the river. It is of a quadrangular form, flanked by round towers at the corners; has strong walls, and is generally in good condition, and garrisoned by about 100 men.—The river rises in a mountain called Jebel Shama, distant about 80 m. from the town. When the snow melts from the hills, or heavy rain falls, it swells into a large and rapid stream, but, at other times, it is insignificant. It is a source of great fertility to that portion of the district adjoining the sea through which it passes, rendering it so beautiful and so productive as to have obtained for it the name of the Paradise of Persia.

MEENAM or *MENAM*, a *vil.* Persia, prov. and 90 m. W. Korassan, in a mountainous district, lat. 29° 45' N., lon. 54° 55' E.; remarkable for the number of its groves.

MEENGANA, or *MOONGANA*, a *tu.* Punjab, 105 m. S.W. Lahore lat. 31° 17' N. lon. 72° 25' E. where white cotton cloth is manufactured to the extent of 1,800,000 yards annually for the Afghan market.

MEERANA, a *tu.* Saxony, circle and 12 m. N.E. E. Zwickau, with the ruins of an old castle, manufacture of woollen and casimere, several dye-works a silk-works, two mills, and three lineries. Pop. (1840) 7840.

MEERAT, a *tu.* Hindoostan, prov. and 88 m. W. by N. Ajmer, lat. 26° 35' N.; lon. 73° 45' E.

MEERBEKE, a *vil.* and com. Belgium, prov. E. Flanders, 21 m. S.E. Ghent with several distilleries, breweries three factories four flour and two oil mills. Pop. 7441.

MEERENDRE, a *vil.* and com. Belgium, prov. E. Flanders, 6 m. N.W. Ghent; with some weaving of linen and cotton fabrics. Pop. 2545.

MEERGHUR, a *tu.* W. Hindoostan, princip. and 60 m. E. Bahawalpur lat. 29° 10' N. lon. 72° 22' E. protected by a small brick built fort.

MEERHOUT, a *vil.* and com. Belgium, prov. and 30 m. E. by N. Antwerp, on the Grand Noche. It has two breweries, two distilleries, some oil and corn mills, and manufacture of woollen stuffs, tobacco vinegar, cordage, &c. Pop. 8406.

MEERLE, a *vil.* and com. Belgium, prov. and 23 m. N.E. Antwerp, on the Mark with three breweries and several mills. Pop. 1388.

MEERPOOR—1. A thriving *tu.* Solade, near 1 bank Pishawar, a great bazaar of the Indus, and on the route from Cutch to Hyderabad, lat. 24° 45' N. lon. 68° 20' E. Pop. 10,000.—2. A *vil.* Solade, 10 m. E. Garra. Close to it is Meerdurra, a named city exhibiting many evidences of former population and wealth, lat. 24° 40' N. lon. 67° 45' E.

—3. A *vil.* Solade near bank of the channel of the Bugger, formerly the great W. outlet of the Indus lat. 24° 30' N. lon. 67° 45' E.—4. A *vil.* Solade, 22 m. W. Chitrawar, lat. 25° 34' N. lon. 68° E.—5. A *vil.* Belochistan prov. Cutch Guudera, on the great route from Solade to Ghera and Kandahar, on the Nari lat. 25° 26' N. lon. 67° 55' E.

MEERSEN, a *vil.* Holland, prov. Limburg 4 m. N.E. Maestricht, r. bank Geule with two churches, a synagogue two schools, and two castles. Pop. (agricultural) 1000.

MEERUT, a *tu.* dist. and division, Hindoostan prov. Delhi. The town, 35 m. N.E. Delhi lat. 28° 55' N.; lon. 77° 25' E., on a wide and dry plain, is of considerable extent, and surrounded by a brick wall, the streets are narrow and the houses mean. A small canal or water-course, with a handsome bridge over it, runs through it. The principal buildings are the Mahometan tomb, without the walls, built of red stone and the church, the largest in British India, being capable of containing 3000 persons. At a little distance from the town is a handsome and spacious barracks.—The district is intersected by those of Moradabad Saharapur

Boothmashwar, and Delhi. Area, 3283 sq. m. P. 560 798.

—The division comprises the districts of Saharapur Moradnagar Meerut, Boothmashwar and Aillyghar or Aillyghar. Area, 10 116 sq. m. Pop. 8,384,432.

MEERDEN, par Eng. Herts 1008 ac. Pop. 183.

MEETH, par Eng. Devon 3479 ac. Pop. 383.

MEGALO-KASTRO, a name given to Candia (which see).

MEGALOPOLIS, an anc. city of Greece, Morea, near the sources of the Rouda, 12 m. S.E.E. Tripolitis. It was 6 m. in circumference, but little of it now remains except its vast theatre, which is very perfect.

MEGANISHI [also, *Thakelash*], one of the smaller Indian isls., between St. Maurice and the mainland separated from the latter by a narrow channel, and distant from the latter about 6 m. S. and in lat. 38° 50' N. lon. 20° 45' E.

MEGARA, a vil. Greece, 20 m. W by N Athens, on the isthmus of Corinth, formerly of considerable extent, but now an insignificant place, in a remote state, with about 1070 inhabitants.

MEGASPELION a convent, Greece, Morca, near the Kalavrita, 25 m. S.E. Patras. It is said to be one of the earliest monastic foundations in Greece, and occupies a vast cavern in a steep and almost inaccessible rock, above 800 ft. in height. In front of the cavern is a vast wall, 12 ft. thick, and, on an average, 65 ft. high and within it are a church, with a mosaic pavement, and a fine painting, numerous cells for monks and servants, storerooms, kitchen, &c. The wall is surmounted by five structures, stank, like Swiss cottages upon the cliffs, and presenting a somewhat odd but picturesque appearance. The slope in front of the convent, down to the river in laid-out in terraced gardens, while the bare precipices at the bank are crowned with forests. The Turks, under Ibrahim Pasha, besieged the convent, but were repulsed with a loss of several thousand men, while the besieged had only one man killed and two wounded. The number of monks is from 250 to 300.

MEGEN a tn. Holland, prov. N. Brabant, 14 m. N.E. Hertogenbosch near I bank Mass with a church, townhall, Latin gymnasium, two schools, and two convents. Pop. (agricultural) 1040

MEGEVE a vil. and com. France, dep. Haute Savoie, prov. Faucigny 6 m. S. Salanches, with a church a convent, and hospital manufactures of woollens and cottons, and a trade in grain, butter, cheese, and honey. Pop. 800.

MEGNA the name given to the river Brahmaputra throughout the latter part of its course, and by which it is known at its embouchure in the Bay of Bengal.

MEGTER, several places, Hungary particularly.—1 A vil. Hither Danube, co. Neograd with a church. Pop. 1262.—2, (Buda) A vil. Hither Danube, co. Pesth, near the Danube, with a church inhabited chiefly by Germans. Pop. 816.—3, (Jassy) A market tn. Thither Danube, co. and 19 m. N.W. Kasserov, in a fertile district with two churches. Pop. 1722.—4, (Pest) A vil. Hither Danube, co. Pesth, on an island of the Danube above Buda belonging to the family of Batarsky. Pop. 1092.—5 (Tol) A vil. Hither Danube, co. Neutra, with a church, a castle, and a distillery. P. 1992.

MEGYES, two places, Hungary.—1 (Arad) A market tn. Thither Throno co. Honthary, Sla. and near Nagy Banya, with a Protestant and a Greek church. Pop. 1383.—2, (Jassy) A vil. Thither Throno, co. and 11 m. E. Sathmar, with a church. Pop. 2022.

MEHADIA, or **MINDAL**, a market tn. Hungary. Bank 78 m. S.E. Timarova, I bank Bala-Eka, romantically situated at the bottom of a deep and narrow dell. It has an ancient castle, a normal school and thermal baths, which were well known to the Romans under the name of 'Therma Heralia,' and are still the best frequented in Hungary. The waters are sulphureous, and have nine or ten sources. The temperature of the hottest is 121°. A great number of Roman antiquities and inscriptions have been found here. P. 1684.

MEHADIA—A tn. Tunis. See ALMAHADIA.—2, A small tn. Morocco, N.W. coast, I bank, and near the mouth of the Wad Boker, about a mile from the sea, and 80 m. W by S. Fez, lat. 34° 18' N. lon. 6° 24' W. (a). It is walled, has a fort at the angle of the town which faces the entrance of the river; was formerly in the possession of the Portuguese, and a place of some consequence, but has now no trade, inhabitants, chiefly fishermen, subsisting by the sale of shabbel, a fish much resembling salmon, which is caught here in great abundance. Pop. said to be now under 400.

MEHLER, or **MEXA**, a vil. Saxo-Coburg, princip., and 20 m. E. Gotha, near the Gemasbach, with a church, manufactures of cottons, an iron and eight other mills. P. 706.

MEHLBACH, a tn. Prussia, prov. and 89 m. S.W. Koenigsberg, on the W. bank, with a court of justice, a castle, four churches, manufactures of linen, a trade in linen, yarn, wool, cattle, and sw. bark, and other mills. Pop. 3269.

MEHLING or **MUGGER**, a market tn. Upper Bavaria, on the railway from Augsburg to Munich, 6 m. E. Jengel-

statt, near I. bank Danube, here crossed by a bridge. It has a castle, a paper and several other mills, and a trade in cattle. Pop. 1569.

MEHUN-Gua-Yavon (Latin *Magadan* of Aristotle), a tn. France, dep. Cher, on the Yèvre, 10 m. N.W. Bourges. It has a Romanesque church, a red ruinous castle, in which Charles VII. starved himself to death, and manufactures of druggs and pack-shedding. Pop. 3374.

MEI-ONIA, a tn. Persia. See MEYKONIA.
MEIA-CO-SHIMAH, a tn. See MEYKONIA.
MEIA-POUYE, a tn. Brazil, prov. and 60 m. E. Goyas, on the Almas. It has five churches, an hospital, a Latin and a primary school, many distilleries and potteries, and is well situated for trade, lying in the tract along which numerous herds of cattle are driven for São Paulo, and province Minas-Geraes. Near it, millet, mandio, cotton, tobacco, sugar, and barley are grown and some gold mines are worked. Pop. of district, 8000.

MEIDLING (Oster and Unter) a vil. Lower Austria 3 m. S.W. Vienna with a church, several handsome villas, a theatre, barracks, a cotton printfield, and some manufactures of cotton, linen, and leather, but its chief attraction is its fine pharos bell, which are much frequented. Pop. 850.

MEIPOD or **MEPOD** par Wales, Montgomery. P. 1763.

MEIGLE, a vil. and par Scotland, co. and 19 m. N.E. Perth, with a weekly cattle-market and two annual fairs. Area of par, 8000 ac. Pop. 728.

MEILEN a tn. and par Switzerland, cant. and 8 m. S.E.E. Zurich, E. shore of Lake Zurich; with a fine old Gothic church, and several manufacturing establishments, particularly for silk. Pop. 2934.

MEINLEBEG a vil. Germany, Lippe Detmold, half Horn; with a church and well-frequented distilleries and sulphureous springs. Pop. 1044.

MEINERZHAAGEN, a tn. Prussia, Westphalia, gov. and 27 m. S.W. Arnsberg on the Vahne with a church, a paper mill and a blast-furnace. Pop. 2250.

MEININGEN a tn. Germany cap. of Hassen-Malagen, in a narrow valley surrounded by wooded hills, r bank Werra 40 m. S.E.E. Erfurt. The older part of the town is very differently built, but the modern part is both regular and handsome. It has a palace, in which the Duke resides, containing various collections of art and natural history, three churches, one of them containing curious monuments of insight, a gymnasium, military, theatre, barracks, several schools, and benevolent establishments. Neither the trade nor manufactures are of importance though there are 10 annual fairs. Pop. 6205.

MEININGEN (Saxony) See SAXE-MEININGEN.

MEIR, a vil. and com. Belgium, prov. and 31 m. N.E. Antwerp, on the Mark. It has manufactures of woollen cloth, three breweries, two mills, and a trade in wood and bark. Pop. 1663.

MEIRE, a vil. and com. Belgium, prov. and 8 m. S.E. Ghent. Linen fabrics, thread, and bricks, are manufactured, and some trade is carried on in fax. P. 3483.

MEIRLEBEE, or **MEIRLEBEE**, a vil. and com. Belgium, prov. R. Flanders, 3 m. S. Ghent, r bank Scheldt, with three distilleries, several brickworks, a flour, an oil, and two malt mills. Pop. 6298.

MEIRINGEN, or **MEIRINGEN** a tn. and par Switzerland cant. and 59 m. S.E. Bern, r bank Aar, romantically situated in the valley of the same name. In 1703, the Alpbach, a mountain torrent which issues from a narrow gorge immediately behind, covered a large part of the village with rubbish 30 ft. deep, in the course of an hour. Partial protection has been obtained by the erection of a stone dike, 1000 ft. long by 5 ft. thick. A good many of the inhabitants are weavers. Pop. 4135.

MEIRINGEN, a tn. Germany Hesse-Homburg, on the Glan, 30 m. S.W. Mainz. It is walled, has a castle, three churches, a courthouse, grammar-school and two mills. Pop. 2678.

MEISEN, a tn. Saxony, prov. and 14 m. W.N.W. Dresden, I bank Elbe, here crossed by a fine bridge. The position of the town, the loftiness of its houses, and the conspicuous objects presented by several of the public edifices, give it a very striking appearance as a distance, but it is in general very indifferently built, and its streets are narrow and

gloomy. It has a noble Gothic cathedral, of the 16th century, with a lofty spire of open work, and some beautifully-painted glass; the old castle of the Margraves, erected in the 15th century at vast expense, on a precipitous rock above the town, but now degraded into a porcelain factory, at which the finest Dresden china first was, and still continues to be made in the Franzenau church, a large and magnificent edifice, used as the custom-house the town or *Franzenau*, and several other churches the townhouse, cloth-hall and the *Affmann*, a large and richly-endowed school or college, with several valuable collections. One of the most interesting sights in the town is the porcelain factory, already mentioned, and first established by one *Böttcher*, an alchemist, who, after wasting the gold of his patron *Augustus I*, king of Poland and elector of Saxony, in a vain search of the philosopher's stone, at last more than compensated him by an accidental discovery of the art of making china. This is now the great staple of the place, employing about 550 persons, but there are also manufactures of worsted, tobacco, leather, playing-cards, penicils &c. There are also several sugar-refineries, dye-works, and printing-establishments, at which the art of illuminating and embellishing books is carried to high perfection. The trade, particularly in wine and porcelain, is considerable. *Mausen* is the see of an archbishop, the seat of several courts and public offices, and possesses, in addition to the *Affmann* mentioned above, a school of design and some other educational establishments. The two elder *Schlegels*, and *Adamson* the celebrated homoeopath, were born here. Pop. (1849) 6914.

MEKLENBURG (or *Mecklenburg*) **SCHWERIN** a grand duchy, Europe. 13th state German Confederation. bounded N by the Baltic Sea, W principally of Rostock, belonging to Meklenburg-Strelitz. S.W. Hanover. S. Prussia, and E. Prussia and Meklenburg-Strelitz lat. 53° 7' to 54° 15' N lon. 10° 40' to 12° 10' E. area, 8648 sq. mi. capital Schwerin. The surface is generally flat, the only exception being a ridge of low hills, which forms the watershed between the basins of the Elbe and the Baltic, the former receiving the drainings of the S. and W. chiefly by the Elbe and its tributaries, and the latter that of the N. by the *Trave*, *Stoppnitz*, *Warnow*, *Recknitz*, and *Penne*. The sea-coast is low but much indented by several bays, of which the largest is that of *Wismar*. The most extensive lakes are those of *Muritz*, area, 39 sq. mi. and *Schwerin*, which lies in a hollow, surrounded by a chain of gentle heights. Smaller lakes are very numerous, and, indeed, form one of the characteristic features of the country. The climate is mild, and the soil is generally fertile, and produces corn in such abundance as to leave a large surplus for export. After corn the principal crops are pease, beans, potatoes, and turneps. The rearing of stock attracts considerable attention and the breeds have, in recent times, been much improved. Both horses and cattle are largely exported and wool has become one of the most important sources of revenue. Woods, once extensive, have been very much diminished, and a serious want of timber begins to be felt. Minerals are of no consequence, and manufactures have not made much progress. The trade, confined almost entirely to agricultural produce and greatly facilitated by the proximity both of the Elbe and the Baltic, is extensive. Every one may carry on the business of distiller free from tax of any kind, and the consequence is that the distillation of spirits from grain is carried on to an extent seldom equalled even in Germany and the taste for ardent spirits, particularly among the peasantry is far too prevalent. The Government, which is a limited monarchy, is intimately connected with that of Meklenburg-Strelitz. Each duchy has its separate states, but both bodies annually meet together and have power to make common laws, and impose common taxes, for the whole of Meklenburg. Meklenburg-Schwerin is divided into six districts—*Strelitz* of Meklenburg or duchy of Schwerin, town and district of Rostock, domain of scattered counties, principally of Schwerin, and lordship of *Wismar*. Pop. (1857) 548,765.

MEKLENBURG (or *Mecklenburg*) **STRELITZ** a grand duchy Europe, intimately connected with the above 90th state, German Confederation; capital, *Neu-Strelitz*. It consists of two larger and several smaller districts the former separated by the interposition of Meklenburg-Schwerin, and the latter existing in separate patches. The two larger districts are the circle or lordship of *Burgard*, on the E. of *Mek*

lenburg-Schwerin, and enclosed on every other side by *Prussia*; and the principality of *Rostock*, at the opposite extremity of Meklenburg-Schwerin, and bounded on the N. by the Baltic, and on the W. by the territory of *Lithuania*, and duchy of *Lausenburg*. The whole area is estimated at 752 sq. mi. The physical features of this duchy are the very same as those of Meklenburg-Schwerin above described, but accordingly reference is made. In union with that duchy, it has a fourteenth vote in the plenum of the Confederation. Pop. (1851) 99,623.

MEKON, *MEKON KONG*, or *CANDORA* river, a large river of S.E. Asia. It is supposed to rise in Tibet, about lat. 28° 30' N., lon. 98° 30' E. whence, under the name of *Len-teen king*, it flows N.E. across the Chinese prov. of *Yunnan* takes the name of *Kion* long traverses, still in a S.E. direction, the territory of *Laos*, in its whole extent, assuming now the name of *Mekon*, leaving *Laos*, it still holds on in a S.E. course, interspersed *Cambodia*, regarding the portion belonging to *Annam* from that conquered by *Siam*, and falls into the *Chin Sea* by two main streams called *Japanese* and *Onogawa* rivers, and numerous small branches, the most S. of which is in about lat. 9° 30' N. lon. 106° 30' E.

MEKRAK, or *MOCKRA* a large maritime prov. *Baluchistan*, comprising upwards of three-fourths of the entire coast line of that territory, having *Afghanistan* and prov. *Kakhetia* and *Saravani* N., *Baskard* W., *Jalavand* and *J. B.*, and the Indian Ocean S., about 600 mi. E. to W. and *Rup.* in breadth, N. to S. but almost entirely unknown. The whole coast is one vast arid and sterile waste, with high mountains rising at the back, wholly destitute of both trees and vegetation. The N.W. portion of the province is traversed by considerable mountain ranges, which rise to the N. into the elevated tract known by the name of *Kohistan*. The two more remarkable ranges of *Mekra* extend E. and W. and in some degree parallel to each other. During rainy weather numerous torrents flowing N. to S., discharge themselves into the sea. Their channels are broad and deep on the coast, but narrow and intricate in the mountains. In the wet season they swell into terrific torrents when the rain ceases, however a few hours are sufficient to run off their waters. In the hot season the heat is extreme, and in August, the hot winds destroy all vegetation. A little grain is cultivated here and there, and the date-palm thrives well but the chief dependence of the inhabitants is on their sheep, goats and camels. Fish abound on the coasts. The exports, small in quantity, consist of wool, fat, hides, butter, dates, the imports of raw cotton, coarse cotton cloths, iron, and sugar. The inhabitants, with exception of those on the coast, are a weakly race of men, addicted to intemperance and all sorts of excesses. The women are represented as extremely ugly and of dissolute habits. Pop. estimated at 200,000.

MELI, a vil. and par. *Austria* Italy gov. and 44 mi. N.W. Venice, near the confluence of the *Adige* and *Pave*; with a court of justice several public offices, a parish church, and two oratories. Pop. 9300.

MELADIA an isl. *Austria*, in the *Adriatic*, off the coast of *Dalmatia* 15 mi. W. N. W. *Zara*. Marble and fine petrifactions are found on it and it has a few inhabitants, who live by fishing.

MELAKURI, or *MALACORRE* a to. W. *Africa*, cap. of an independent territory on a river of same name, about 69 mi. N. N. W. *Free Town* *Sierra Leone*. It stands at the highest point to which the *Melakuri* is navigable, occupying a picturesque site on the sloping banks of a large basin formed by the confluence of the *Melakuri* and *Mawetta*, and the obstruction of their channel by several rocky islands. It consists of four distinct portions, two on the b. and two on the N. side of the basin, but so connected as to appear at a distance one continued town. The houses consisting generally of one circular room, with two or three small sleeping chambers under the projecting roof, are built in alternate courses of sun baked bricks and well-tempered clay. Others of an inferior description, are made of wattle-work, coated with clay, and plastered with mud. The only public buildings are four very rudely constructed mosques, and throughout the town marks of decay are visible, deserted houses and ruined gateways meeting the eye at every step. The prosperity once enjoyed was owing to the trade in slaves and in timber. The latter branch has suffered much from the improvidence of the negroes; who,

having felled all the timber near the town, now chiefly derive their subsistence from the export of rice to Sierra Leone. There is also some trade in cattle, hides, wax, gum, and cocoa and kola nuts. Pop. in about 1000; territory about 80,000.

MELASSO (anc. *Melase*) a town in Asia Minor in S.W. of the Taurus, 80 m. N.E. of Bozdra. It is of considerable size, but the houses are generally mean. It contained at one time a great number of temples, and still exhibits numerous remains of antiquity.

MELAZZO a town and com. Italy, Piedmont, prov. Alessandria, prov. and about 8 m. S. Acqui, with a church, an old castle, on an isolated height; a public school and quarries of building stone. Pop. 1588.

MELAZZO or Melazzo (anc. *Melase*) a seaport in Sicily, prov. and 24 m. W. Messina, on an elevated promontory which projects into a bay of same name. It is surrounded by strong fortifications, has some handsome houses, several churches and convents, barracks, an hospital, a harbour with ample depth of water; a valuable rumy fishery and a trade chiefly in wine, oil, and silk. In the Bay of Melazzo the ancient *Insularis* was, several naval battles have been fought. Pop. 9700.

MELBOURNE.—A market in and par. England in the Anglo-Norman style. Baptist, Wesleyan, Independent, and Swedenborgian churches, two schools and a mechanics institution. Area of par. 3200 ac. Pop. 2690.—2, A par. Eng. Cambridge 4084 ac. Pop. 1031.

MELBOURNE a town in Australia, cap. Victoria, on the Yarra Yarra river crossed by a handsome bridge near its mouth, in Port Phillip, 410 m. S.W. Sydney. Lat. S. 46° 36' S., lon. 144° 57' 49' E. It extends for 2 m. along

half of the houses are built of stone and brick, and some are now allowed to be constructed of wood. Many of the houses have fine gardens attached. Several of both the public and private edifices are very handsome. Amongst the former are the Union Bank of Australia, the mechanics institution, the R. Catholic chapel, the new government offices, and the courthouses. The mill is a large but gloomy structure, built of dark ferruginous sandstone. Inns and houses of accommodation and well-stocked shops, are numerous. A botanical garden was commenced in 1846, on a grant from the legislature of £500, with a prospective annual allowance of about half that sum. The garden is prettily situated on the E. bank of the Yarra, about 1 m. S. from the town, but, as yet, has comparatively few plants.

Besides the R. Catholic chapel above spoken of, there are places of worship belonging to the 1. relevant Episcopalian, Presbyterian, Wesleyan, Independent, and Baptist, and Quakers meeting-houses, and Jews synagogues. Sunday and day schools are attached to the English, Scotch, and R. Catholic churches, and there are besides, several private seminaries for the education of youth and a number of religious and benevolent societies. Four newspapers are published here. The town is amply supplied with water from the Yarra, which above the falls close to the town, is not reached by the tide, and the markets are abundantly furnished. In consequence, however, of the immense influx of emigrants attracted by the recently discovered gold-fields, prices have become very exorbitant, and neither the most ordinary services, nor the most common necessaries, can be obtained without an expenditure which, to those possessed of fixed and moderate incomes is almost ruinous. Hence in June, 1852, masons and house-carpenters refusing to work for £1 a day, all public buildings and other houses in progress, except temporary shops and lodgings, were stopped, jackboots for the diggings were charged 27, ordinary boots £4 a pair of shoes £3. Moderately good cart horses were previously offered at from £10 to £15, were not to be had for less than £20, and pistols and revolvers, which from the state of society had become indispensable could only be obtained at the most extravagant rates. The smallest lodgings cost £3 per week and sufficient houses of four or five unfurnished rooms, from £250 to £240 a year. The gold-falls, to which this sudden revolution in prices and the state of society is attributable, are situated chiefly at Mount Alexander 70 m. N.W. and Ballarat, 60 m. W. W. and more recently at Ovens 180 m. N.E. Melbourne, but extend over a vast tract of country. In an address to the Crown, by the legislative council Sept. 1852, the weekly yield of gold at the Victoria diggings, calculated on the previous three months, was stated at 80 000 oz. giving at the rate of 70s per oz. a gross annual value of £14,000,000. By far the larger proportion of the gold yielded by the Victoria diggings finds its way to Melbourne, by government or by private escort or in the hands of individual diggers, still, a not inconsiderable amount is carried off, by escort, direct to Adelaide, in S. Australia. The total yield of these diggings to the end of December 1852, has been estimated at about 4 000 000 ounces which at 70s per oz. gives a value of £14,000 000 sterling. The number of diggers employed is supposed (in January 1853) to exceed 100,000. Melbourne, in respect to the means of communication is not very favourably situated. The Yarra Yarra is very narrow has only depth enough to float small vessels, and, close above the town, is interrupted by falls, the proper harbour, accordingly, is at the mouth of the river in Hobson's Bay, Port Phillip, and though only 2 m. distant by land, is 7 m. to 8 m. by river. Allowing for some difficulty of entrance from the narrow channel communicating between Point Nepean and Lemnath, and the shoals which line its sides, it is scarcely possible to conceive a safer entrance, or a more sheltered and easily navigable bay than

the river having a breadth of 1 m. The principal part of the town is laid out in a low fertile valley, while the extreme ends are carried over two picturesque eminences. The streets are broad and regular, all running at right angles to each other but contain numerous quays, where houses have not yet been built, and, owing to the want of pavement, become almost impassable, in wet weather, from mud. More than

by falls, the proper harbour, accordingly, is at the mouth of the river in Hobson's Bay, Port Phillip, and though only 2 m. distant by land, is 7 m. to 8 m. by river. Allowing for some difficulty of entrance from the narrow channel communicating between Point Nepean and Lemnath, and the shoals which line its sides, it is scarcely possible to conceive a safer entrance, or a more sheltered and easily navigable bay than

Port Phillip, which forms a basin of from 60 m. to 70 m. in diameter. In many central places, the depth varies from 12 to 15 fathoms, and, even near the shore, is generally from 5 to 7 fathoms. At Williamstown, where vessels for Melbourne generally anchor, it is 5 fathoms, and in Geelong Bay the other most frequented anchorage, the depth varies from 2 to 7 fathoms. Melbourne is incorporated and has a mayor, aldermen, and councillors. The assessed annual value of the town is about £70,000. Melbourne was founded by Sir Richard Bourke May 19 1837. Pop. (February 1862), 25,000, but now (1865), estimated at not less than 50,000. —(Wells' *Australian Gazetteer*, Melbourne Argus January 1863, &c.) See SUPPLEMENT.

MELBOURKE, a maritime co., W. Australia, about 50 m. in length from E. to W., its breadth not yet defined. In its N.E. parts is a range of high mountainous lands the S.E. is intersected by the river Moore.

MELBURY, four par., England, Dorset. — (Abbot, 2276 ss. P. 434 — 2, 1837 ss. P. 157 — 3, *Devon* 1198 ss. P. 284 — 1, (Brough) 1094 ss. P. 55.

MELCEBOURNE, par. Eng. Bedford, 2574 ss. P. 290.

MELCHTHAL, a valley, Switzerland, in the S. of cant. Unterwalden, about 6 m. long, N. S. and little more than 2 m. wide. It is enclosed by lofty mountains, 6000 to 8000 ft. above the sea. It is watered by the Melch, which discharges the waters of the lake of that name into the A.A. Iron was once worked and smelted here, and there is still a marble quarry. The cheese made is of excellent quality. Among the natives of the valley was Arnold an der Halden, one of the four heroic mountaineers who met at Grütli, in 1307, and swore to liberate their country from Austrian oppression.

MELCOMB, two par., Eng. Dorset. — (Horey) 2181 ss. P. 181 — 2, (Bapth) 1849 ss. P. 5273.

MELCOMBE REGIS co. of the Wymondham, a vil and par. Norway 85 m. S.S.W. Trondhjem, a bank Orkel. It has copper works. Pop. 4280.

MELDEN, a vil and com. Belgium, prov. E. Flanders, r. bank Scheldt 18 m. S.S.W. Ghent. It has a trade in linen, cattle, and agricultural produce. Pop. 1573.

MELDRETH, a vil and com. Belgium, prov. F. Flanders, on the Moinebeck 18 m. E. Ghent. It has several manufactures of linen, several breweries, an oil and three flour mills, and a trade in flax. Pop. 1904.

MELDOL, a, in Italy, deling, and 7 m. S. Forli r. bank Reno. It has an important annual fair which lasts from 1st to 25th August. Pop. 2420.

MELDON, par. Eng. Northumberland 998 ss. P. 144. MELDORF, a vil Denmark, Holstein 54 m. N.W. Hamburg, cap. of the S. Denmark, in a barren sandy tract. It has several public offices, a grammar-school, several benevolent institutions, and some trade in corn, for which there is a weekly market. The chief employments are weaving and agriculture. Pop. 8100.

MELDRETH, par. Eng. Cambridge 2080 ss. P. 778.

MELDRUM (Old), a market tn. and par. Scotland, co. and 16 m. N.W. Aberdeen on the road to Banff with a handsome town-hall surrounded by a square, a brewery and distillery several corn-mills, and a considerable manufacture of cotton goods. Pop. tn., 1102. Area of par., 7474 a. Pop. 3929.

MELLA, a vil and com. Italy Piedmont, div. Genes 2 m. from Voltri, among lofty rocks. It has a church and a palace, several paper-mills, and a trade in agricultural produce. Pop. 2495.

MELEDA, or MELPRA, in Isl. Austria, Dalmatia, circled and 19 m. W.W. Ragusa, opposite to the peninsula of Radoconello, from which it is separated by a channel about 5 m. wide; greatest length, N.N.W. to S.S.E., 33 m.; mean breadth, not more than 2 m. Its coast-line is considerably indented, and furnishes several commodious harbours, but is partly lined by high and steep, particularly towards the W. extremity. The interior is traversed by lofty hills, generally of a barren and arid appearance, and intersected by numerous valleys, which, though not carefully cultivated, are fertile, and produce corn and maize vegetables, wine, oil, and fruit; and the pastures feed great numbers of sheep and goats. Considerable attention is paid to the rearing of silk worms and bees. There are several remarkable subterranean grottoes, chiefly in the neighbourhood of Radoconello, the largest vil

lage of the island. The harbour of Palama, on the W. side, is considered the best on the Dalmatian coast. Some persons, misled by similarity of name, and the mention of Adria in Paul's voyage, have erroneously supposed this to be the island on which he was shipwrecked. Pop. 900.

MELEGNANO, a tn. Italy, Lombardy, prov. and 10 m. S.E. Milan, near 1 bank Lambro, here crossed by a bridge. It is a large and handsome place; has a court of justice, several public offices, three churches, and a trade in silk, rice, wax, and dairy produce. In 1279 a peace was concluded here between the Gualdi and the Ghibellini, and in 1515 Francis I. here defeated the Imperialists. Pop. tn. and com., 7000.

MELEVOCZE, a vil Hungary Thlither Thlith, co. Torontal, 29 m. N.E. Enyorvarden. It has a trade in corn and cattle. Pop. 4515.

MEIFI (anc. *Aufidus*) a tn. Naples prov. Basilicata, cap. dist., on a lofty volcanic height, 75 m. S.E. E. Naples. It is surrounded by walls in a very dilapidated state, and defended by an old castle, in the form of a hubcap, and has a beautiful cathedral, several convents, and some trade in excellent wine. In August, 1851 an earthquake destroyed 163 edifices and damaged other 278. Among those destroyed were five monasteries, and seven churches, including the cathedral. Many hundreds of the inhabitants were entombed in the ruins. Pop. about 8000.

MYLFORD (Lowe), a vil and par., England, co. Suffolk, 18 m. W. by N. Ipswich, on a branch of the River with a large annual cattle fair. Area of par. 5185 ss. Pop. 2387. MELLAGOPO — 1 a tn. Friesland prov. Mido, 40 m. S.E. Vianen. It is the most westerly town in the kingdom, and a place of some strength, being both walled and defended by a citadel. It has an hospital, an almshouse, and a trade in mutton and hams. Pop. 650 — 2 a tn. Brazil prov. and 180 m. S.W. Para, W. shore of Lake Amapa and on the river of this name which, passing the town, falls into the Tappary 10 m. below. It has a church, and a considerable trade in timber. Pop. 4000.

MELGAR in Pinar del Rio, a vil. Spain, prov. and 24 m. W. Burgos 1. bank Tago. It is a capital of the houses, in the story streets in general broad and straight and all paved and clean. It has a courthouse, a prison, a granary two primary schools, a Latin grammar-school, and a spacious and handsome church. manufactures of implements of husbandry, hats and shoes, five tanneries, a dye-works, a tanning and three flour mills. Pop. 2116.

MELGIG, a salt lake or marsh, Algeria, lat. 33° 56' N., lon. 7° 5' E. about 30 m. long by 20 m. broad. It receives the Adjoudj from the N.W. and a small stream from the E.W.

MELIANA, a vil Spain, prov. and about 8 m. from Valencia, at a short distance from the sea. It has a parish church, primary school, a school, a prison, and a trade in fruit and agricultural produce. Pop. 1058.

MELDEN, par. Wales, Flint, 4779 ss. P. 1200.

MELIKUT, a vil Hungary circled Hither Danube, co. Bacs, 110 m. S. by E. Pesth, in a fertile wheat district, with a church. Pop. 4533.

MILLULA, a fortified place belonging to Spain, empire of Morocco on the Mediterranean, 185 m. E. by S. Conza; lat. 35° 18' 18" N., lon. 2° 58' W. (h). It occupies a peninsula, united to the continent by a rocky isthmus, 121 yards long, 95 yards broad, and 35 yards in height, above the sea-level, and covers a space of 500 yards in diameter. It is defended by about 150 cannon, and has three lines of fortification. The magazines are large and bomb-proof and capable of containing munitions and provisions for 10,000 men for a year and the place is well supplied with water. The streets are irregular but clean, and the houses are in rather a dilapidated condition. The town having been seriously damaged in 1848 by a dreadful earthquake, accompanied by a hurricane, which overthrew part of the walls and many edifices. Among the buildings which escaped, or were slightly injured, are the parish church, the school of engineers, one of the barracks, the watch-tower, the house of the commandant of engineers, and the royal hospital. There are two landing-places, protected by batteries.

MELIN, a vil and com. Belgium, prov. Brabant 31 m. S.E.E. Brussels. It has quarries of white stone, and a trade in agricultural produce. Pop. 1658.

MELINDA, a resort in E. Africa, coast of Zanzibar lat. 7° 04' N. lon. 41° 5' E. It is large and handsome, the houses built of stone; has numerous mosques, but its churches and other buildings, erected by the Portuguese, who possessed it for some time, are now in ruins. The anchorage is at a considerable distance, and the coast shallow and beset with rocks and shelves. A very considerable trade is carried on by caravan with the interior and by sea with the Red Sea, Persia and the N parts of India. The exports consist of ivory, gold copper, wax, and drugs, in exchange for silk, cottons, linen cloths, and European commodities. Vasco da Gama visited Melinda in April 13, 1498, where he was kindly received, and furnished with pilots to proceed to India.

MELTON-MOWBRAY a market tn. and par England co. and 14 m N.E. Leicester on the Syston and Peterborough branch of the Midland Counties railway, r bank Eye or Wreak here navigable, and crossed by two bridges. It consists of two principal streets; the houses of which are almost all of brick, and of the most part, substantially built, and has a lofty and spacious cruciform parish church, with a beautiful porch and tower place of worship for the Independents, Wesleyans, and H. Catholics, several schools and almshouses, a considerable trade in pork pie and more especially in Stilton cheese, which has here its central locality a weekly market, and six annual fairs. The only manufactures, of any consequence, are bobbin lace and worsted hosiery. The prosperity of Melton-Mowbray is greatly owing to its being the seat of the Melton Hunt, which has its meeting here for the five months commencing with November, and attracts the sporting world in such numbers, that stabling for about 800 horses has been provided and the surrounding country is partitioned with hunting stables. In 1644, during the civil war the royalists, after a severe action here, defeated a body of parliamentary troops of about 2000 men. William de Melton, archbishop and chancellor of England under Edward III. was a native of Melton-Mowbray. Area, 10 266 ac. P 4060

MELUN (Latin, *Melodunum*), a tn. France, dep. dep. Seine-et-Marne, 27 m S.E. Paris, on both banks of the Seine, and partly on an island in it, communicating with the opposite banks by two bridges. It is regularly and tolerably well built, and gains much in appearance by six handsome quays and six promenades. It contains a large and regular square, an old

collegiate church of mixed architecture partly in the ogival style, built on the island *palais-de-papier* there, and the convent of St. Angela, and a central house of Antonian for five departments. On the W part of the island are the ruins of the old castle of Melun, and an old tower which tradition attributes to Julius Cæsar. The manufactures consist of woollen cloths and other woollen stuffs, printed cottons, and calicoes. There are also tanneries and cotton-mills. The trade is in corn, flour, cheese, wool, and cattle. Melun possesses a court of first resort and a communal college. The French king, Philip Augustus, was born in its castle. Pop. 11822, 7427.

MELVERLEY, par Eng. Salop 1418 ac. Pop. 542. **MELVILLE ISLAND**—1 A large Isl. Australia, N coast, lat. 11 to 12 S, and lon 180° 20' and 181° 34' E. separated from Bathurst Island by Apsey Strait, and distant from the mainland about 15 m. Area, about 1800 sq m. The N and W coasts are low covered by dense woods of mangroves, and intersected by swamps. In the centre it rises from 120 to 200 ft. Streams of water are scarce. The upper soil is of inferior quality, but the subsoil, to the depth of 2½ ft., is a brown mould of a spontaneous character. The surface of the elevated ground is covered with small thinning masses of ironstones, having a metallic lustre. Vegetation is luxuriant. Among the forest-trees, several species of eucalyptus are most abundant. The cabbage-tree is common and ginger grows wild. The fauna is identical with that of Australia. Alligators abound in Apsey Strait, and turtles are found at some places on the coast. The natives though resembling those of Australia, are more athletic, active and enterprising but extremely shy and cannot be prevailed upon to hold intercourse with Europeans. 2 An uninhabited Isl. Pacific. Low Archipelago lat. 17° 35' S, lon 149° 41' W (a). It is very low and encloses a lagoon communicating with the sea by a very small boat passage. Some mother-of-pearl is obtained here.—3, A large uninhabited Isl. Arctic Ocean, lat. (Winter Harbour) 74° 47' 12 N lon 110° 48' 15 W (a). The shores consist of steep rocks, while the interior is occupied by mountains, always covered with snow. Captain Parry wintered here in 1819-20, and, in 1851, its S. and S. W. shores were explored by Lieut. M. Clintock and its S.E. by Mr. Bradford, in search of Sir J. Franklin.

MELZO, in Austria. Italy, prov. and 10 m. E Milan, in a fertile plain. It is well built, and has an hospital, and manufactures of linen and fustian. Pop. 3028.

MELHIKO v. Hl. Spain, Extremadura, prov. and 37 m W N W Cáceres. Its houses are almost all of one story, and it has two squares a townhouse, prison, primary school, and church. Pop. (chiefly agricultural), 2803.

MELMURY par Eng. Devon 4089 ac. Pop. 763.

MHAMEL, a town and seaport, Prussia, gov. Königsberg, cap. circle, at the N end of the Kurische-Nähe, where the Drüge falls into the Baltic, 72 m. N E Königsberg; lat. 55° 43' 42" N lon. 21° 8' 12" E (a). It is defended by a citadel, consisting of four bastions, with ravelins and half moons, and is divided into three quarters—the old, the new and Frederick's town, with three suburbs. It is the seat of an admiralty and several provincial courts, and contains three Lutheran churches, a R. Catholic chapel, a synagogue, exchange, theatre, hospital, infirmary, a superior town school a school for navigation an industrial school and house of refuge for neglected children. Its manufactures consist of woollen and silk cloth, cotton, soap, &c. but the great source of its prosperity is its trade, which is very extensive, and consists chiefly of timber, corn, flax, hemp, potash, lard, and colonial produce. The exports and imports were, in value, as follows—

Years.	Exports.	Imports.
1843	475,421	175,471
1846	869,538	600,618
1849	280,809	481,088
1850	1,070,802	444,018

The harbour is large and safe, and has a depth of water from 14 to 17 fathoms. It is provided with a good dock, and a good light-house, which stands on the N E side, 98 ft. above the sea, and may be seen 50 m. off. Ship-building is carried on to a considerable extent. Pop. (1846), 9906.—The **QUECLA**, the most N. of Prussia, consists of a long, narrow str. bounded N and E. by Russia, S. gov. Gumbinnen, and W

the Baltic sea, 186 geo. by m., exclusive of water. Adding the Kurische-Nähe, the whole area is 512 geo. sq m. A great part of it is covered by heath and forest. Only a small portion is fitted for the plough. Almost all the inhabitants are engaged in commercial employments or in fishing, including in the latter amber fishing. Pop. 46,078.

MEMMINGEN a town Bavaria, circle Swabia, on the Aach, 41 m. S W Augsburg. It is walled has six churches and chapels, a handsome townhouse, grammar and industrial schools, an ordinary and an orphan hospital and an infirmary; manufactures of shirtings, cotton, wax-cloth, taffety ribbons, and lace, and a copper two iron, and numerous other mills; a foundry partly for casting bells a blacksmith and glue-work and a good trade in the above articles, and in corn and hops. Pop. 6876.

MEMPHIS, a v. l., U States, Tennessee, on a high bluff 1 bank Mississippi, immediately below the mouth of the Wolf or Loosahatchie, 205 m W by S. Nashville. It is regularly laid-out, has four churches, an academy, and a considerable trade. Pop. 8300.

MEMPHIS (Coptic *Memf*, *Memf*, and *Memf*) an ancient Egypt, on the bank of the Nile about 10 m. S. Cairo. It is said to have been built by Memus, the first king of Egypt and in the time of Abulbela, about 1842 its remains were very extensive but little deserving of notice now exists, except a large colossus of Rameses, which is remarkable for the beautiful expression of the face, and, though now prostrate, must, when erect, have measured 43 ft. 8 inches exclusive of pedestal.

MEMPHREMAGOG, a lake, N America, partly in Vermont, U States, but chiefly in Lower Canada. It is 30 to 40 m. long, and 2 to 3 m. broad, contains an island, with a valuable quarry of novaculite or novaculite.

MEVA, a town Russia, gov. and 42 m. E Orenburg with a church, and a trade in provisions and salt. Pop. 2000.

MENABE, a div. Madagascar (which see).

MLNADO a Dutch prov. or gov. and its cap. is Celébes, comprising all the N portion of the island, including both sides of the Gulf of Tomini or Gorontalo. It is mountainous, of volcanic formation, and has several active volcanoes. The low grounds are fertile, producing all manner of tropical vegetation, including rice, wheat, coconuts, cacao coffee, and tin sometimes yields iron-wood, shagbark, &c. Iron copper and gold are found. The streams are numerous, but un navigable.—The town, N coast of the N peninsula, lat. 1° 28' N lon 124° 50' E, on a large fine bay, with a fort and Dutch garrison is inhabited by Christians Mahomedans, and Pagans and outside is a Chin see suburb. It has some trade in tortoise-shell trapping, birds-nest, coffee, cacao and gold dust. Pop. (1845), 6000.

MENAI STRAIT, a channel N Wales, separating the island of Anglesea from Caernarvon, its true narrow S. W. and N E and is about 11 m. long from its S. W. entrance to Bangor Ferry where it expands to a breadth of 1 to 4 m. The navigation of this strait is, in some places, difficult and hazardous but, as the passage saves time and distance, it is much used by vessels under 100 tons burden and occasionally by vessels of a larger description. The first and last portions of each tide flow run in contrary directions in this strait. At the entrance, the neap-tides rise 10 to 12 ft., ordinary spring-tides 20 to 21 ft., and extreme equinoctial tides to nearly 30 ft. This strait is crossed by two stupendous stone towers, the Menai Bridge and the Britannia Bridge, about a mile apart from each other. The former which is a suspension-bridge, was planned and executed by Telford the distance between the supporting pyramids or points of suspension is 560 ft., and the height of the carriage-way above high water is 100 ft. The Britannia Bridge is an iron tubular bridge, for carrying the Chester and Holyhead railway over the strait. It consists of two lines of tubes, each 1512 ft. long supported on three towers, besides the shore abutments, 100 ft. above the sea, formed of narrow wrought-iron plates, 8 to 12 m. thick, weighing including the permanent way of the railway 10,640 tons. The clear internal height of the tubes is 28 ft. at the centre, and 18 ft. at the extremities, and the width 14 ft. The first train passed through the tube on March 6, 1850. The whole cost of this extraordinary structure, which occupied about four years in construction and erection, was £201,865.

MENAM, a large river of S.E. Asia. It has its sources in the Chinese province of Yunnan, about lat. 23° 45' N. lon. 100° 15' E. It flows generally S.E. across the country of Laos and the kingdom of Siam, passing Yuthia and Benkot, and finally falls into the extreme head of the Gulf of Siam about lat. 13° 50' W, by three principal arms, the most E. of which forms the harbour of Bangkok. This joined in its course by several large tributaries, the principal of which are the Anan and the Krupak, but is comparatively little known.

MENAN, two isls. Bay of Pandi. See MANAN.

MENANGKABU, a native state, isl. Sumatra E side of the Padang hills, and, on the equator, witnessed one of the most beautiful and most fertile tracts of the island. It is well cultivated, thickly peopled, and yields rice, pepper, sugar, and other vegetable products, and has iron and gold mines. The inhabitants fabricate their own iron weapons, cutlery, guns, cottons, and silk. Menangkabu was at one time the most powerful state in the island and, though Jambi, Indragiri, Sik, and Pasoputan, are now separated from it, still its Sultan is esteemed the chief of all the Malays, and the protector of the Mahommedans. — (Van der Aa.)

MENAR-LA-VILLE, a town in France. See MEL.

MENASALBA, a town in Spain, New Castle, prov. and 26 m. S.W. Toledo. It has a townhouse, prison, public chambers, two primary schools, an hospital, two granaries, and a church. Cattle rearing tillage seven flour-mills, a considerable number of handlooms for serge and charcoal burning furnish employment. Pop. 9600.

MENRILLA, a town in Spain, New Castle, prov. and 29 m. E. Ciudad Real, r bank Arzob. It has seven principal streets, generally lined by houses of only one story many of them ruinous, and contains a handsome church, a courthouse, prison, nursery and three schools and has manufactures of serge, earthenware and coals. An oil and several flour mills, and a trade in bread with which it supplies the surrounding districts. Pop. about 5000.

MENGHIA (Ka) or **MESCHUR**, a large town, regency and at a short distance S.E. the town of Tripoli. It is a wide spread place, the houses, which are built in the Egyptian manner being such a great mass of ground attached to inhabitants chiefly Bedouins. Each Tuesday a market is held, which is attended by a great many merchants from Tripoli.

MIFACONICO, a vill. and com. Italy 11 m. from Genoa, prov. and about 5 m. from Bobbio with an ancient church, surrounded by a dune and a trade in corn and excellent cheese. Pop. 1132.

MENDANA ISLANDS Pacific. See MANQUERAS.

MENDAYIA, a town in Spain, prov. Navarra 1 bank Ebro 86 m. S.W. Pamplona, with a church, townhouse, hospital, primary school, a trade in corn, maize and fruit, and in active saltery in the Ebro. Pop. 1091.

MENDE (Latin, *Mammet*) a town in France, dep. Loire, on the Loire, 66 m. N.W. Niamey. It has a finely planted boulevard, and a great number of public buildings, is well built and has narrow, irregular, winding streets, a cathedral, with two bell-towers, one of which is particularly admired for the delicacy of its workmanship, an old municipal palace, now converted into the prefecture and a public library, manufactures of paper and particularly a common kind of stuff known by the name of Mende serge, and largely exported. Mende is the see of a bishop, and possesses a court of first resort, a chamber of manufactures, a diocesan seminary, a communal college, and an agricultural and scientific society. Pop. 1889.

MENDEFE, a mountain range, Af. r. in the S. of Nigeria, near lat. 6° 50' N. lon. 15° E. It is apparently a ramification of the Gabal of Kumeri (or Mountains of the moon), and has one conspicuous, lofty peak, believed to be volcanic.

MENDELN, a town in Prussia, Westphalia, gov. and 11 m. N.W. Arnsberg, r bank Rhine. It has a court of justice,

four churches, a posthouse, manufactures of silk, velvet, needles, and leather, and a trade in cattle. Pop. 1896.

MENDER (Larica), river, Asiatic Turkey. See CAZARET. **MENDER** — 1 (anc. *Simois*), a river, Asiatic Turkey, rises on the W. side of Mount Ida, flows N.W., and falls into the Hellespont, at its S.W. entrance. It is a small stream, course, about 55 m. — 2 The little Mender. See CAZARET.

MENDHAM par. Reg. Suffolk, 1144 ac. Pop. 877.

MENDIG (Nimrod and Omer), two nearly contiguous vills, Prussia, gov. and 15 m. W. Cologne. The latter has a church and mineral springs. Pop. 1150. The former has also a church, but is chiefly noted for the remarkable mill stone quarries which have been wrought near it for about 800 years. The material quarried is a hard, porous lava, probably from a neighbouring volcano, extending nearly 5 m. in length and 8 m. in breadth. In this bed, funnel-shaped pits have been sunk, and, from their bottoms, the quarries branch off in all directions, forming subterranean caverns, supported by pillars which have been left in the workings. The lava is separated by natural seams or fissures into gigantic columns from 15 to 40 ft. high. The millstones are of the best quality and are largely exported to all quarters of the world. Pop. 1229.

MENDIGORRIA, a vill. Spain, prov. Navarra, 17 m. S.W. Pamplona. It has a townhouse, prison, an hospital, two endowed schools, a church, and a pretty promenade some brandy and linen are made. Pop. (agricultural), 1514.

MENDIP HILLS, a lofty ridge, England, which stretches for about 25 m. in a W.N.W. direction, across the N. of Somersetshire, with a mean breadth of 4 m. to 5 m., and a height of about 1000 ft. It is partly wooded and cultivated but the far greater part forms a heathy slope-wall. Mines of lead and calamine were once wrought in it to some extent, but have been almost abandoned.

MENDI ESHAM, a town and par. England, co. Suffolk, 144 m. N.W. Ipswich. It has a handsome church, with a lofty tower, places of worship for Baptists and Wesleyans, and a free school. Area of par., 3944 ac. Pop. 1444.

MENDOCINO, a lofty cape N. Pacific, the most W. point of Upper California, lat. 40° 45' N., lon. 124° 33' W. (n).

MENDOZA, a city, prov. and river, confederation of La Plata, S. America. The city is pleasantly situated on a level plain E. declivity of the Pampean range, 3591 ft. above sea-level, lat. 33° 53' S., lon. 69° 56' W. about 55 m. E.S.E. from the volcano of Aconcagua. It is compact, well built, for the most part of red-burnt bricks, plastered and white-washed and contains some fine buildings, all the houses have gardens or orchards attached to them. It has a good parish church, some convents and a fine alameda nearly 1 m. long

THE PUBLIC SQUARE, MENDOZA - From Buenos Aires, Voy. de la Plata, 1889, Vol. 1, p. 100.

shaded by rows of magnificent poplars. From this city two well-frequented roads lead to Chili, over the Andes, by the mountain passes of Uspallata and of Portillo. Pop. 12,000.

— THE PROVINCE, of which Mendoza is the capital, comprehends the country W. of the river Desaguadero as far as the Andes, including the Yala of Uspallata, in all about 150 m.

E. to W | on the N, an imaginary line about 18 m from the capital separates it from the prov. of San Juan, while the S. boundary is formed by the Diamante, in all about 180 m N to S. With exception of the Paramillo range, or E. chain of the Andes, and some offsets, the country is level. The soil is sandy, and naturally barren, but when irrigated, as large tracts are, by waters drawn from the Desaguadero, Mandos, and Tenzay, its principal streams, it produces abundant crops of wheat, barley, Indian corn and lucuma. Haul and dew are rare, except in the S. districts in some parts of which they are so abundant that corn may be raised without irrigation. The climate is dry and healthy, but hot in summer. It is favorable to the growth of fruit trees, the produce of which, figs, peaches, apples, nuts, olives, and wine, constitutes important articles of export. Brandy wine, corn and flour hides, soap, and tallow are likewise sent in considerable quantities to the provinces of Cordova, San Luis, and Buenos Ayres. Besides these products, the mines of Copallata once yielded much silver and veins both of silver and copper are known to exist, and limestone, gypsum, alum, mineral pitch bitumens, slates and a variety of saline deposits, including common and Glauber salts, are abundant. 1 sp. about 40 000.—(Sir W. Parish, *Buenos Ayres, &c.*, 1862).—The Merced river rises on the E. side of the Andes, about lat. 32° 45' S near the volcano of Aconcagua, and flows S E to lat. 32° 10' passing the city of Mendoza at a distance of about 10 m, where it winds round and pursues a N course till it falls into the Lake of Guaranacoche, lat. 32° S. its whole length being about 200 m.

MENDEIRIO a tn. and par. Switzerland, can. Tessin, cap. dist. 9 m S.S.E. Lugano. It consists only of one long, well-paved and tolerably well built street, and college of Servites, to which a handsome church is attached; a Capuchin monastery and Ursuline nunnery and has manufactures of silk, and some silk mills and a limited trade. Pop. 1715.

—The district is the prettiest and most fertile in the whole canton, producing in abundance wheat, rye, silk, wine, and tobacco. Area, 45 sq. m. Pop. 12 735.

MENEHOU (St. L.) (Latin, *Menecou*) a tn. France, dep. Maine, on the Aune, at the junction of the Aune 25 m. N.E. Chalons-sur-Marne. It is built with considerable regularity has two handsome squares a townhall with a grand facade a court of first resort, a communal college a well endowed hospital an infirmarian manufactures of earthenware, hosiery, leather bobbins, and other articles of tuncery and a considerable trade in wood and ship-timber, corn, garden vegetables, particularly melons and asparagus. Near it are numerous forges, glass-works, and potteries. Pop. 8068.

MENES a vil. Hungary co. and 12 m. L. N. E. Arai with a fine castle. It is famous for its wine, which is said to rank next to that of Tokay. Pop. 1577.

MENGE a tn. Württemberg, circle of the Danube, 37 m S.W. Ulm. It is walled has three gates, two churches, a grammar-school, an hospital two mills, and a pleasure-field. Many of the inhabitants are employed in embroidery. Pop. 3044.

MENGERINGHAUSEN a tn. Germany princip. Waldeck, dist. Twiste, 12 m. N. Waldeck. It has a church, a manor-house, and two mills. Pop. 1743.

MENHERIOT par. Eng. Cornwall, 6097 ac. Pop. 1944.

MENIN, a tn. Belgium prov. W. Flanders, 1 bank Lys, near the French frontier, 7 m W.S.W. Courtray. It is a place of considerable strength but, though in general well and regularly built, has a dull lifeless appearance. The only buildings deserving of notice are the church and the belfry. It possesses a college, several primary schools and benevolent institutions, has breweries, famous for their beer; tanneries, salt-refineries, bleachfields, a dye-works, manufactures of common and table linen, lace, stockings, oil, soap, tobacco, chocolate, and candles, and an important trade in corn, horses, horned cattle, and wool. Menin was first fortified in 1850, and has stood numerous sieges. Pop. 7838.

MENJILE or *Mucur*, a small tn. Parana, prov. Ghibon, r. bank Shabrood, 41 m. S. Heid, lat. 36° 42' N, lon. 40° 30' E. It exports oil and soap.

MENMUIR, par. Scot. Forfar, 5 m. by 2 m. P. 693.

MENNEVRET a vil. France, dep. Aisne, 36 m. from Veruon. Pop. 2148.

MENNIGHUFEN a vil. Elsenh. Prussia, gov. and 10 m. W.S.W. Milsen. It has a church, and spurs a large quantity of yarn. Pop. 1083.

MENOUF, a tn. Lower Egypt, in the Delta, 1 bank canal of same name, 34 m. N.W. Cairo with narrow and crooked streets, and houses in general ill built. Pop. 4000.

MENS, a tn. France, dep. Isere 25 m. S. Grenoble, with manufactures of glass and linen, and a considerable trade in the latter. Near it is a frequented acclimated spring. P. 1798.

MENFELDEN, a vil., Dutchy and 10 m. E.N.E. Nassau, with a parish church. Pop. 1014.

MENSHIEB (Rc.) (anc. *Phelous*) a tn. Upper Egypt, prov. and 10 m. N. Girgeh, 1 bank Nile, lat. 26° 27' N, lon. 31° 50' E. It enjoys a considerable trade, as the boats between Cairo and the outcrops usually stop here for provisions. There are here mure-works, and an extensive Government cotton factory.

MENSTIE, a vil. Scotland co. and 6 m. N.E. Striving, near the foot of the Ochil. Woollen weaving is actively carried on. Pop. 518.

MENTHOY, par. Eng. Bucks. 1940 ac. P. 800.

MENTONE, a tn. Italy princip. Monaco on the Mela terrace, 18 m. E.N.E. Nice. It is well built, and though not provided with any proper harbor, has a considerable trade in oil and fruit. Pop. 8300.

MENTRIDA, a vil. Spain New Castle prov. and 24 m. N.W. Toledo. It has a townhouse and prison, a palace belonging to the Duke del Infantado, two elementary endowed schools, a church of substantial architecture, and a lofty clock tower, an almshouse various chocolate, flour, and oil mills, and a trade in oil and fruit. Pop. 2650.

MENTZ, (anc. *Moguntiacum* German *Mos*, French, *Mayence*) a tn. Hesse-Darmstadt, cap. prov. Rheinhessen, 1 bank Rhine opposite to the mouth of the Main, and 20 m. W.S.W. Frankfurt, with which it is connected by railway. It is one of the fortresses of the German confederation, and has a garrison, partly Austrian partly Prussian of 8000 men, commanded alternately for five years, by an Austrian and a Prussian governor. The town, situated partly on a flat, and partly on an acclivity rises up gradually from the Rhine, in the form of an amphitheatre. It is walled flanked with bastions and defended besides by a Citadel and several forts and outworks. A bridge of boats, above 1600 ft. long, con-

MENTZ, THE CATHEDRAL, from the Rhine-plain.—From A. Menzies, *Memorabilia of the Rhine*.

nects it with its suburb of Castel, near which the river forms an island, on which some fortifications have been erected. The houses are generally lofty, and, when situated in open squares and spacious streets, have often a venerable and noble appear-

ance; but, as many of the streets are narrow, they exclude both air and light, and give several quarters of the town a dark, confined, unwholesome look. The promenade, which forms the great resort of the inhabitants, is the Neue Anlage outside the gates, forming extensive public gardens, well laid-out, and commanding fine views of the town and surrounding district. The principal edifices are the cathedral, a vast building of red sandstone, finished in the 11th century of little architectural merit, and with the disadvantage of a very bad locality, being almost concealed from view and blocked up by mean houses, but terminated at its east end by an octagonal tower surmounted by a spire, 70 ft. in height, and adorned with several finely-painted windows, a beautiful pulpit, and a great number of ancient and curious monuments of the Bishop Electors of Mainz; the merchants' hall formerly the electoral palace [Kurfürstliche Schloss]; the old collegiate church of St. Stephen, occupying the highest site in the town, surmounted by a lofty tower, decorated within by a fine altar screen and presenting throughout one of the finest specimens of early Gothic architecture; the church of St. Jeter the Deutsch Haus (German house) or Grossherzogliches Schloss [grand ducal castle], now the governor's palace, containing a splendid hall decorated with stucco and several portraits of electors and Teutonic grand masters; the former, Daubergsche Palais, now used by the courts of justice; the library buildings, containing in addition to the library a museum, with several good collections, antiquaries, philological and ethnological apparatus, pictures, &c. One of the most interesting objects in the town is the house, or rather the site of the house of John Gutenberg, better known by the name of Gutenberg and deserving of particular remembrance as the inventor of movable type. The site is now occupied by the Leasing, or reading room, and the rooms of a literary association; but the house in which he was born exists, and, more interesting still, the house which contained his first printing office. An admirable bronze statue of Gutenberg, by Thorwaldsen, erected by subscription, obtained from all parts of Europe, stands in an open space near the theatre. The manufactures, not of much importance, consist chiefly of leather soap, hats, glass vinegar, tobacco, and mineral instruments. The trade, particularly transit, is extensive, being greatly facilitated both by water communication and railway, and has in recent years greatly increased. The principal articles are wine, corn, and wool. Mainz owes its foundation to a Roman camp, which Drusus pitched here. It was, shortly after, converted into a permanent bulwark, and became the most important of a line of forts built along the Rhine, as a barrier against the incursions of the Germans. On the decline of the power of Rome it was almost entirely destroyed, but was afterwards restored chiefly by Charlemagne, and became the first ecclesiastical city of the German empire, of which its archbishop-elect ranked as the premier prince; he possessed domains which had an extent of 1200 sq. m., and a pop. of 400,000. Its history, during the 16th century is of considerable interest, in connection with the progress of the Reformation, which early brought Luther into collision with its ecclesiastical authorities. Pop. 31,845.

MENZALEH an extensive salt water lake, Lower Egypt, 5 E. Dumetia, stretching along the coast for about 36 m from that town, with a breadth of about 20 m. It is divided by the projecting peninsula, on which the town of Menzaleh is built, into two large gulfs, and the whole is separated from the sea by a long and narrow neck of land. The general depth of water is about five fathoms, but in some parts it is double, and even much greater. It is too salt to use the sea, with which it communicates by two practicable mouths, those of Dylich and Omm Faragah, supposed to be the ancient Mendecian and Tanitic openings. It contains a number of islands, but some of these are uninhabited, except those of Marish occupied by fishermen, at the extremity of the peninsula on which the town of Menzaleh stands. Some of them, however, are covered with ruins. It abounds in fish the taking of which gives employment and subsistence to a numerous class of the population. The environs are fertile in wheat. The town, 20 m. S. by E. Dumetia, S. W. side of the lake, on a canal of some name, 12 m. from its entrance into the lake, is supposed to occupy the site of the ancient Ptolemais. It has several minarets, some respectable houses, and a trade in rice and fish.

MENZINGEN, a tn. and par. Switzerland, cant. and 4 m. N. N. E. Zug. It is a cheerful, well built place, and contains a townhouse, built in 1611. Pop. 2649.

MENZINGEN, a market tn. Baden circle Middle Rhine, 16 m. N. E. Carlsruhe; with a church, two castles, and two mills. Pop. 1870.

MEPALL, par Eng. Cambridge 1469 ac Pop. 559
MEPALL, a tn. Holland, prov. Drenthe, 35 m. S. W. Assen, at the junction of the rivers Eikhofter Beest, and Havelter, continued by the Beest, navigable hence 6 m. S. W. to the Zuider Zee. It has two churches, a synagogue, a poorhouse, and several schools, walk, oil, saw, and corn mills, three breweries, a vinegar-work; manufactures of various kinds of linen and cotton fabrics, including esteemed sailcloth, blanchers' hat-factories, ropes, tin-works, bomb-making yards, and tobacco-works. It carries on a considerable trade and transit trade, being the chief port and outlet for the products of the province. Pop. 2076.

MEPPEN a tn. in Hanover, prov. Osnabrück, op. industrial dock of Arnhem-Meppen, at the confluence of the Hase with the Ems, here crossed by a wooden bridge, 42 m. W. N. W. Osnabrück. It is of a rectangular shape and is walled has two gates, narrow crooked streets, two churches two hospitals, and a R. Catholic gymnasium, manufactures of soap, leather, linen and tobacco, several dye-works, a bleachfield and linens, and a considerable general trade, greatly facilitated by the Ems and the Ems canal. Pop. 1561
MEPILISHA, par Eng. Bedford 1849 ac P 503
ME QUINENZA, a tn. Spain prov. Saragosa and 92 m. W. N. W. Tarazona, at the foot of a mountain crowned by a castle, almost the only remains of its fortifications, 1 bank Ebro, at the confluence of the Ebro. It has a mean appearance, steep and crooked streets, a townhouse, two barracks, a granary three primary schools, and a church, two flour and two oil mills, and some charcoal-burning. Mequenza is supposed to be the Gogopates mentioned by Caesar, and was a place of considerable importance in early Spanish history Pop. 1370

MEQUINEZ a city, Morocco near 1 bank Sebou, and 20 m. W. Fez, in a beautiful and well watered plain. It occupies a great extent of space, the houses consisting of a ground floor only. The city is surrounded by a wall 6 ft. high, which serves as a defence against the Berbers, who often make incursions even to its gates and contains a handsome palace, built by Muley Ismael, who had resolved to make it the capital of his northern dominions. The emperors of Morocco still reside occasionally at Mequinez. Pop. 60,000.

MER and **SER**, two lofty summits of the Himalayas, in the N. E. part of the Punjab, about lat. 33° 35' N. lon. 75° 25' E. They are apparently within a few miles of each other, and seem to be of about equal height. It is remarkable, that while one of their peaks is white with perpetual snow, the other continues bare and black.

MELI, or **MEXARZA-VILAS**, a tn. France, dep. Lour-et-Cher 12 m. N. E. Blois. It has numerous tanneries and currying-works, and a trade in wine, brandy, and vinegar Pop. 2068.

MELI-AN-GLAC (Sea of Ice) *See Alps*.
MELRA, a tn. France, dep. Oise, 15 m. S. Beauvais. It employs a considerable number of spinning-lathes, and has an extensive trade in articles of ivory, bone, and fine wood works for agricultural implements, tanneries, manufactures of lace, and some trade in corn, barres, milk cows, cattle, and wool. Pop. 2478

MERA (also and **MESED**) two nearly contiguous vils. Hungary co. Abauyvar on the Barcozya, 4 m. from Porro. They have a handsome manor-house, a mill, and a trade in agricultural produce. Pop. 1665

MERABING, a tn. S. A. Africa, cap. of the territory of the Matabele, situated about 100 m. S. W. of Delagoa Bay. It occupies the summit of a long, but narrow ridge, and forms an important stronghold, being accessible only on the W. by two openings called *Likochetches* (for the horn gates). These are narrow passages, defended on both sides by strong stone walls, and so effectually guarding the approach, that the in-

Julians have been able to sustain many protracted sieges. The houses, within, are not built close to each other but scattered in groups of 30, 50, or 40 huts. In peace, the pop. is about 1400, but in war is greatly increased, by numbers resorting to it, for protection, from the neighbouring kraals.

MERAN, a to. Austria, Tyrol, circle and 14 m. N.W. Bozen, at the junction of three valleys at the confluence of the Passer with the Adige. The houses are mostly built upon scree. It has two churches, Capucin and Benedictine monasteries, English, female institute, and a gymnasium. Much excellent fruit and wine are produced here. From the bridge over the Passer nearly 30 castles may be counted among which stands the old castle of Tyrol, partly in ruins which gives its name to the country and was the first residence of its princes. Pop. 2300.

MERAPI.—1 Three volcanoes, on Java; one in prov. Besoeki, belonging to the Idjang group, and the most difficult to climb in the island, a destructive eruption of which took place on January 23 and 24 1817 the second is a silent volcano, in prov. Djokjokart, rich in sulphur the third is in prov. Kaido, 9860 ft. high, one of the most important in the island, and continually sending forth dense black smoke severe eruptions took place, December, 1832, December, 1833, and August 1837.—2, An active volcano on Sumatra, near W coast, 45 m. N.E. Padang, about lat. 0° 30' S., lon. 100° 30' E. and about 2330 ft. high.

MERATE a to and com Italy Lombardy vi and 30 m. N.E. Milan, with the palace occupied, in 1785 by the king of Sardinia, and now the property of the Belgioioso family. Pop. 2078.

MERAVIGLIE a chain of nine small lakes, France, in the N of dep. Alpes Maritimes, and a little W of Tenda near the Col de Tenda, a pass in the Maritime Alps.

MERBES-LE-CHATEAU, vi and com. Belgium, prov. Hainaut, 18 m. S.E. Mons, a bank Sambrs with a brewery, two tanneries, six back-mills, a marble sawing-work, two poteries, a brick and a marble works. Pop. (agricultural) 1657.

MERIBERY, a to Honduras prov. Madrugada, near Canara, 17 m. N.E. Mangrove, lat. 15° 6' N. lon. 75° 9' E. From the architectural remains of antiquity found here it would appear to have been a place of great extent and importance in remote times. The pagodas are all built of brown stone and the largest is a stately edifice the pillars and roof being sculptured and carved in a very elaborate manner. The inhabitants are principally of the Jan religion.

MERLADAL, a to. Spain, lat. Minorca 12 m. N.W. Port Mahon. It has a large and handsome church and a trade in corn, cattle, fax, and fruit. Pop. 3690.

MERLATELLIO, a to Italy, dep. Urbino—4 Pesaro and about 15 m. S.W. Urbino r bank Metauro. It is a paltry dirty place without an inn. Pop. 1200.

MERLATO-SARACENARO, a to Italy, dep. and 30 m. S.E. Forl i bank Savio. Pop. about 4000.

MERCENASCO or **MARCONASCO**, a vi and com. Italy Piedmont, dep. Turin, prov. and about 6 m. from Ivrea with an old but elegant church, ancient castle in ruins and some trout trade. Pop. 2208.

MERCHINGEN, vi Baden, circle Lower Rhine, on the Kessach. It has a church and a castle. Pop. 1194.

MERGHEM, a to, and com. Belgium, prov. S. Brabant, 10 m. N.W. Brussels with a paper and three other mills. Pop. (agricultural), 4943.

MERCIA one of the kingdoms of the Saxon Heptarchy. It is said to have been founded by Angles, under a leader of the name of Odo, in 885, and included co. Chester, Derby, Nottingham, Lincoln, Salop, Stafford, Leicester, Rutland, Northampton, Huntingdon, Hereford, Worcester, Warwick, Gloucester, Oxford, Bucks, and parts of Hertford and Bedford. It was subdued, about 825, by Egbert of Wessex, and afterwards formed a dependency of that kingdom.

MERCKEM, a to, and com. Belgium, prov. W. Flanders, on the Yperle, about 18 m. S.W. Bruges, with several breweries, oil-works, and a ropery. Pop. (agricultural), 8660.

MERCOGLIANO, a to and com. Naples, prov. Principato Ultra, dist. and 2 m. W. Avellino. Pop. 4186.

MERCURAGO (Latin, *Mercurius*) a vi, and com. kngrl. of Italy, Piedmont, on Lake Maggiore, 1 m. from Arona, with a church, near it some Roman antiquities have been found. Pop. 1660.

Vol. II

MERCURY Gumbay a vi and com. France dep. Savoye, 2 m. W. Albert-Ville, with church, an old feudal castle, and communal school, several mills, and a trade in wool, corn and fruit. Pop. 1920.

MERDIA a to. Asiatic Turkey. See **MARDIN**.

MERE, a market to and par. England, co. Wilts. The town, 31 m. W. by Salisbury, has a market-house, a silk throwing-mill, and manufactures of English dowers and bed-fitting. Pop. 1156. Area of par. 7400 ac. Pop. 2591.

MEREGYE or **MARACOR** a vi Austria, Transylvania, co. Klausenburg 24 m. from K. Feist with a church. Pop. 1500.

MEREND **MEHREND** or **MEHREND**, a to Persia, prov. Azerbajan 40 m. N.E. Tabreez, formed of four villages, whose houses are separated from each other by large gardens, which yield cochineal, excellent opium and famous apricots and peaches. Pop. about 10,000.

MERETSCH, a to. Russia, gov. and 55 m. S.W. Wilna, at the confluence of a small river of same name with the Niemien. It contains a church, several churches a Dominican convent and a school, and some general trade. P. 8500.

MREVALE par. Eng. Warwick 3150 ac. P. 213.

MEREWALE, or **MAREWALE**, a river, S. America, Guiana, which rises about 4 N. and lon. 63° W., and unites with the Koroato to form the Caura, an important affluent of the Orinoco. Its winds much through a mountainous country, and, being much broken by rapids, becomes impassable, even by Indian canoes, above the point where it is joined by the Atakuti.

MEREWORTH par. Eng. Kent, 2376 ac. P. 912.

MERGENTHAL (Gauze) a vi Bohemia, circle Buns-lau, about 6 m. from Gabel with a church, and three mills. Pop. 1147.

MERGENTHEIM, a to Württemberg, circle Jaxt, i bank Tauber, 56 m. N.N.E. Stuttgart. It has well built houses, and spacious, well-kept streets an old castle, occupied by a prince of Württemberg a high altar, townhouse, gymnasium library and banking establishment. P. 2281.

MERGOGZO a vi and com. Italy Piedmont, dep. Novara, prov. and about 8 m. from Pallanza, on a height above the Toce. It has a church, marble quarries and a trade in corn, wine, fruit, dairy produce and fish obtained from Lake Maggiore, in the vicinity. Pop. 3079.—The lake lies W. of Lake Maggiore is about 2 m. long by 1 m. broad and remarkable for its limpid and pure water.

MERGUL ARCHIPLAGO a chain of six, Indian Ocean, off the coast of Tennesse and Lower Siam, the more N ones forming a part of the British prov. Margul lat. 9° to 15° N. lon. 97° to 98° 30' E. The principal islands are Dornet, King, and St. Matthew. They are generally covered with trees and have, most of them, small trickling rills of pure water. A few cultivated patches are here and there to be met with. The adjoining sea abound in fish and excellent oysters, pearls also, of good quality and lustre, are found along the shores of nearly all the islands. The inhabitants are harmless and industrious, but few in number.

MERGUL, a seaport in India, E. the Ganges, opp. of the Tennesse province, and on one of the mouths of the river Tennesse lat. (large pagoda) 13° 36' 43" N. lon. 90° 35' E. (a.) It is enclosed by a stonework of entire trees, forming a kind of wooden wall, pierced with brick gateways, and consists of wide streets, and houses built on piles. The religious edifices which are numerous, but, with the exception of the large pagoda, paltry suffered much when the town was stormed by the British in 1824. The harbour is safe, and has 2 fathoms water over the bar at low tide, with an additional rise of 3 fathoms at spring-tides. A good many vessels are built at it. The trade mostly with China, includes exports of pepper wood, tortoise-shell, shark fin &c. Pop. about 8000.

MERHEMET ASAD (formerly, *Sherr-Mogendal*) a to. Persia, prov. Azerbajan, 80 m. S.W. Tabreez. It was formerly a very considerable town. It contains a fort and palace, and 1000 houses but is now half in ruins.

MERIDA (Latin, *Emerita Augusti*), a city, Spain, Estramadura, prov. and 30 m. E. Badajoz, i bank Guadiana, here spanned by a Roman bridge of 31 arches, 3575 ft. long, 36 ft. broad, and 33 ft. above the river. The houses are, many of them, two stories, and the streets paved and clean. It has a townhouse, an hospital for the poor, a lunatic asylum, four

primary endowed schools, a theatre in the annex of Santa Clara, two sumarias, three suppressed convents, two parish churches, of substantial construction, and a chapel of ease. In the neighbourhood are several hermitages and two cemeteries and the statue of St. Olaf, the patroness of the city stands in the suburb. In respect of steepness and well-preserved monuments of antiquity Merida is the Roma of Spain. According to the chronicle of King Sisebut, the walls were 24 m. in circuit, 15 bastions high, and 10 bastions broad, with 1700 towers, 84 gates, and five castles and, in time of peace, the garrison consisted of 80,000 infantry, and 10,000 horse. Besides the bridge above mentioned, which was built by Trajan, the principal Roman remains are a triumphal arch 44 ft. high, in honour of that emperor and called the arch of Santiago, the castle, now called the Conventual, which was added to it by the Moors, and afterwards became the episcopal palace, and then that of the Templars, the temple of Diana, now built into the house of the Count of Carica, and in which are 19 fluted granite columns, 40 ft. high, with Corinthian capitals, the theatre, which is almost perfect, nothing being wanting but the proscenium, the amphitheatre or Numanus, the circus 1556 ft. by 885 ft. and in good preservation, the great aqueduct, arched in three tiers, one of the grandest remains of antiquity, &c. Merida perhaps existed before the Roman conquest, but it was at least rebuilt by the legatus Publius Carisus, in the year 23 A. C. Augustus here settled the veteran cohorts, of the fifth and tenth legions, who had served in Cantabria. The city became the capital of Lusitania, and continued in great splendour for several centuries. It capitulated, in 715 to the Moors, from whom it was taken again by Alonso el Sabio in 1259, and from that day the province and city date their decline, and now are poor and almost depopulated. Some of the arches of the bridge were destroyed, in 1812 during the siege of Badajoz, in order to impede Marmont's advance to the relief of Exeter, in 1808 8000 French kept at bay the whole army of Castile for a month, although the river was fordable. P. 5780

MERIDA the cap. city of Yucatan, Central America lat. 20° 18' N. lon. 71° 30' W. on an elevated, fertile plain surrounded by three rivers—E. the Mucuy, S.W. the Al barragan, and S. the Chama, none of which are navigable. It was formerly the second city of Yucatan, but was almost wholly destroyed by the great earthquake which overran the city of Caracra, 350 m. distant, on March 26, 1812. It is regularly laid-out, the streets intersecting each other at right angles, each having in the centre a clear stream of running water. Previously to the calamity above alluded to, Merida contained five convents, and three parish churches at present, one only of the former remains, now converted into the cathedral. A convent of nuns still exists there are also an hospital and a public college. It was founded in 1569 under the name of Santiago de los Caballeros. P. about 4000

MERIDA the cap. city of Yucatan, Central America lat. 20° 58' N. lon. 89° 35' W. about 25 m. from the sea, 90 m. N.E. Campeche. It has a Moorish aspect generally, having been built at a time when that style prevailed in Spanish architecture. The streets are of good width, and laid-out at right angles, but slope towards the centre so as to form channels for carrying off the water. In rainy weather, they are flooded to the edge of the side walks, which are 4 ft. wide, and rendered impassable for hours. The streets are named after a painted wooden figure of some animal or other object, placed in a conspicuous situation at one of the corners, as the Street of the Elephant, the Bull, the Lion, &c. The city contains a number of fine squares, the principal of which, the Plaza Mayor, 600 ft. square, stands in the centre. From this point great streets diverge, two in the direction of each cardinal point, so each there is a dissipated gate, and beyond are the barriers or suburbs. The square is bounded by the cathedral, Bishop's palace, government-house and dwellings occupied by the extensive. There are, altogether 14 churches in the city and suburbs some of them in a good style of architecture, and richly ornamented particularly the cathedral, which has a most imposing appearance, being surrounded by well-proportioned domes, parades, and towers, and having a series of lofty windows. In the E. part of the city, on an eminence, stand the remains of an old Franciscan convent, a remarkable and interesting edifice, enclosed by a high wall with towers, and now called the Castle. The market

occupies a large square in a central position. Poultry is abundant and cheap, as are also the other necessaries of life. The climate of Merida, though very dry, and not subject to great changes, is productive of febrile diseases at all seasons of the year from which even the natives are not exempted. Agues and pulmonary complaints are also prevalent. Merida was founded in 1542, and stands on the site of an ancient Indian town. Pop. estimated at 28,000

MERIDON the Eng. W. lat. 50° 10' N. lon. 10° 55' E. (a) **MERIONETH** or **MERIONETHIAN**, a maritime co. N. Wales bounded, N. by Carnarvonshire and Denbighshire N.E. Denbighshire, E. and S. Montgomeryshire, S. Cardiganshire, and S.W. and W. Cardigan Bay an inlet of the Irish Sea; area, 48,000 ac. Nearly the whole surface is covered with wild and barren rocks and mountains, some of them of considerable height, rugged and picturesque. The highest summits attain an elevation of 2500 ft. to 2900 ft. One of the most remarkable of these peaks, though not the loftiest, is Cader Idris, the summit of which consists chiefly of numerous columns of highly crystalline gneiss, similar to those forming the Giant's Causeway in Ireland. Slate-rocks almost entirely occupy the county. The principal minerals are lead and copper ore, and slates. The copper-ore have been worked to a great extent. Limestone is also quarried in great quantities, particularly the white limestone. There are numerous rivers and lakes but, with one exception, they are mostly small. The largest lake, Tegid or Bala Mere, is nearly 13 m. in circumference. Numerous marshes occur along the sea-coast. In the larger valleys, and near the coast, the climate is mild but on the mountains it is cold and tempestuous. The soils are various those of the low lands are very fertile. Oats form the chief grain crop, but barley is also extensively grown wheat is raised on the best soils and rye on temporary enclosures of small pieces of prepared waste land. Potatoes are grown very generally and fruit trees are profitably cultivated throughout the whole of the county. Considerable quantities of cheese and butter are made, but the former is extremely poor. The cattle and sheep here are small and hardy but the wool of the sheep is very bad, being mixed with coarse, long hairs. Great numbers of the diminutive race of ponies, called merioneth are reared. The chief manufactures are a peculiar kind of cotton cloth called 'Welsh plains' and knitted woollen stockings and socks. Principal town, Dolgelly. Pop. (1851), 83,843.

MERISCHWANDEN a town and par. Switzerland can Aargau, near 1. bank Rhine, 10 m. S.W. Zürich. It is an old place, and several Roman antiquities have been found in the neighbourhood. Pop. 1292

MERK, a vil. Hungary. Thutur Theles, on Southern about 1 m. from Villed with two churches. Pop. 1005

MERKAH, a small seaport in E. Africa, Meridians territory lat. 1 44 1 N. lon. 44° 51' E. (a), 45 m. S.W. Makdidiu. Pop. about 8000

MERKELADORF, or **MERKLINGEN** a vil. Bohemia circle Kollengitz, near Lower Adersbach, 16 m. from Trautenau with a church, a school, and a chapel to which numerous pilgrimages are made. Pop. 1985

MERKELGÖHN a vil. in the Harzberg, circle Neuch, on the W. Rhine 13 m. N.W. Ulm with a church, manufactures of linen, and a mill. Pop. 1297

MERLERA the most N. of the Ionian Isles, 7 m. N.W. Corfu lat. 39° 58' N. lon. 19° 53' E. (a) It is small but fertile, greatest length, 8 W. to N.E., about 3½ m.

MERMENTAU, a river, U. States, Louisiana, which, after a N. course of 300 m. falls into the Gulf of Mexico, 230 m. W. the Mississippi. It forms a lake of same name, and has only 8 ft. water on the bar at its mouth.

MERMERIKO, a vil. Senegambia, 1 bank Faldid, nearly opposite Faldid-Yaya, lat. 15 51' N. lon. 15° 20' W. inhabited by Foulahs and Serres. The houses are remarkably plain and several of them handsome.

MEROE (also ore), a tract of country in Nubia, lying between the Bahr-el-azek, the Nile, and the Atbara. In the N. part, and on the E. bank of the Nile, 80 m. N.E. Khartoum, are the ruins of the city of Meroe, the ancient cap. of Ethiopia, celebrated for its monuments, its commerce, its oracle of Ammon, and its sanctity.

MEROO a river, New S. Wales, co. Wellington, about 120 m. N.W. Sydney. It flows W. N.W. to the Oodgong,

an affluent of the Macquis. Rich gold-diggings have been established on it.

MERRIMACK, a river U States, which rises in New Hampshire, flows E. by N. into Massachusetts, then winds N. E. and E. and falls into the Atlantic, a little below Newburyport. It is navigable for vessels of considerable burthen to Haverhill, about 50 m. up. It canals afford a means of navigation past the falls and rapid, total course, about 150 m.

MERRINGTON, par Eng Durham 1834 ac P 504.
MERRIOTT par Eng Somerset, 1698 ac P 1489.
MERRITT, a to Hindoostan presid Bombay, prov Bhopoor, 125 m. S. S. E. Poona, lat 16° 51' N. lon. 74° 47' E., of considerable extent and walled but the houses, constructed of stone and wood mixed, are low and mean-looking. There are a number of rudely built little mosques in the town. The fort, in which the rajah resides, is a work of some strength.

MERSEA, two pars. Eng Essex.—1 (East) 3867 ac. Pop. 281.—2 (West) 4415 ac. Pop. 870.

MERSEBURG a gov Prussian Saxony, bounded N by Hanover, Anhalt, and govs. Magdeburg and Potsdam. N govs. Frankfurt and Liegnitz, S. Kingdom of Saxony, Saxony duchies, and govs. Erfurt and W. govs. Erfurt, and Schwarzburg, Hanover and Brunswick, area, 8020 sq. m. The W. part of the govt. has a finely undulating surface and the soil is uniformly fertile, towards the N. W., where it borders on the Harz, it is more hilly, and both the soil and climate are of a more unequal nature; E. towards the Elbe, its fertility still further degenerates, and extensive tracts become covered with sand and heath. None of the hills attain a height exceeding 1800 ft. The whole govt. belongs to the basin of the Elbe, which receives part of its drainage directly, and the remainder chiefly by its important tributaries—the Unstrut, Saale, Mulde, and the two Elsters. The minerals are of great value, and include silver, lead, copper, iron, coal and lignite. Manufactures have made considerable progress, and the inhabitants are in general, both industrious and enterprising. The govt. of Merseburg is subdivided into 17 circles. P. (1848) 742,644.

MERSEBURG a to Prussian Saxony, esp. above govt. 1 bank Saale, 14 m. W. Leipzig, on the railway thence to Glesnack, here crossed by a bridge, connecting with suburbs on the opposite side. It is walled, has an old castle, originally an episcopal palace, afterwards the residence of the dukes of Saxe-Merseburg and now used for public offices, a fine Gothic cathedral, on a rock overhanging the river with a richly-decorated portal, the church of St. Thomas, and three other Lutheran churches, old and new townhouses, old monastery of St. Peter, several schools, an orphan hospital &c. manufactures of linen, leather, stained paper, pasteboard, tobacco, and vinegar, and extensive breweries and distilleries. The general assembly of the States of the province is held here every second year. Pop. (1848) 11,349.

MERSEY an important river England, has its rise in the range of hills on the S. W. confines of Yorkshire, at the point where Cheshire and Derbyshire join the former. It flows in a general S. W. direction to Runcorn where it expands into an estuary 2 m. to 3 m. broad, on the N. side of which is the great commercial port of Liverpool, and below which it joins the Irish Sea. The entire length of this river included by the estuary is from 55 m. to 80 m. Principal affluent, the Irwell to which it is navigable.

MERTHYR-TYDIL, a market to part, bar, and par Wales, in S. W. of Glamorgan 31 m. N. N. W. Cardiff, on the Taf at the N. extremity of Taf Vale, and a station on the Taf Vale and Aberdare Railway. It has risen up within a century, from a mere village to a place of great extent and

importance, and, though consisting generally of irregular assemblages of workmen's houses, situated on both sides of the river and communicating by two bridges, has recently undergone important changes, which have greatly improved its sanitary condition and general appearance. A street, recently formed and now become the principal thoroughfare, contains good shops and dwellings, and near its centre is one of the finest gasworks and splendid market-places in Wales. The public buildings and institutions include two Established churches and a chapel of ease and about 80 places of worship, belonging chiefly to the Wesleyan and other Methodists, Independents, Baptists, &c. national and other schools, a mechanics institute, a theatre, and, in the vicinity Cyfarthfa castle, with its park and Pen-y-Darren House, with its gardens, form conspicuous and pleasing objects. The town owes its prosperity to its situation near the centre of the valuable coal and mineral field of S. Wales. The mines are extensively worked, and among the important iron-works which have been established, those of Dowlais alone, when in full work, employ about 6000 persons. The shipping ports are Swansea and Cardiff, particularly the latter, to which, in addition to the railway already mentioned there is access by the Glamorgan and canal. The weekly market is well attended, and there are three annual fairs. The borough sends a member to Parliament registered electors (1851) 988. Area of par 17,744 ac. Pop. 46,878.

MERTOLA (ant. *Julia Myrtilis*) a to and par Portugal prov Alentejo 70 m. S. S. E. Évora, on the west of a bill to bank Guadiana, here navigable. It is an ancient place, walled, and has a convent almshouse and hospital. P. 2409.

MERTON, par Scot Berwick 7000 ac. Pop. 693.

MERTON a vil and par England no Surrey 8 m. S. W. London on the Wandsworth here crossed by a bridge. It is a church erected in the 13th century, and an Independent chapel. Area of par 1780 ac. Pop. 1870.

MERTSEINA, or *MERSENA*, a vil Hungary, co. Krasowa, 6 m. from Károly, in a fertile district, which produces much wheat and maize, and rears great numbers of cattle. P. 1568.

MERUL, or *MORUL*, a vil Hungary banat of Temeswar on the Bistritza, about 30 m. from Karcaneb, with a church. Pop. 1372.

MERVE (ant. *Antiochia Margiana*) a to, Turkistan Khansha and 345 m. S. E. Khiva, on the caravan-road from Khansha to Khiva and Bokhara, about 12 m. E. from the Moorgiah and about 40 m. S. E. from where the river disappears in the sand. It was formerly one of the four imperial cities of Khoreasan, and the capital of many of the Persian sultans, particularly of the Seljukian dynasty. It was then surrounded by beautiful gardens, the fruits of which were much esteemed. About the beginning of the present century it was taken and pillaged by the Uzbeks, since which time it has gradually declined. The country around is called *Marochak*, and is very unhealthy. The population uncertain about 8000.

MERVILLE (Latin, *Mercviorum*), a to France dep Nord, 1 bank Lys, 19 m. W. Lille. It has manufactures of linen, particularly damask and table linen which has long been famous, and still forms its great staple. It has also manufactures of cotton velvet, silk-refineries, brick and glass works, bleachfields, tanneries, and building yards for barges. Its trade is in corn, cattle, wool, and cheese. Pop. 6021.
MERWEDE (Dut.) a river Holland, formed by the junction of the Maas and the Waal; it flows W., past Gorinchem and Dordrecht and below the latter, at the Dordrecht lock it receives the waters of the Oude Maas (Old Maas).

MERXEM a vil and com. Belgium, prov and 3 m. N. E. Antwerp, on the Little Scheldt with a brewery, distillery, salt-refinery, brick works, an oil and three flour mills. P. 1648.

MERXHEIM, a vil Germany, Hesse-Hanau, bail Meisenheim, with two churches and four mills. Pop. 1385.

MERXHEIM a vil and com. Belgium, prov and 9 m. E. N. E. Antwerp, on the Campine, on the Marck or Merck. It has a brick works, two breweries, an oil and two flour mills. There is here an agricultural colony established for the suppression of mendicancy. Pop. 1881.

MERZ-EL-KEBIR, a seaport to Algeria, prov and 8 m. N. W. Oran. It is a place of great strength, and possesses

a considerable trade; the imports, in 1948, amounting to 518 878. It was first mentioned by the Spaniards, who called it *Masaguer*. The French took it in 1890.

MERZDORF—1 a vil Trnava, prov. Bilecia, gov. Lăpuș, circ. Lăpuș, with a church and a mill. P. 1095.—2 a vil Bohemia, circ. Kőszeg, 4 m. from Bannau with a church, a school, a walk and three other mills. Pop. 1419.

MESZECZ, a vil. Bohemia, circ. Kőszeg, 6 m. from Opotčina with a church. Pop. 1145.

MENZIG, a tn. Prussia, gov. and 22 m. S.E. Trier or Treves, cap. circle, r. bank Saar with a church, two chapels, a synagogue, building-docks, and some general trade. Pop. 3471. Area of circle, 123 geo. sq. m. Pop. 31 709.

MESAGNA a tn. Naples prov. Terra d'Otranto, dist. and 11 m. W.S.W. Bitonto with a castle, several convents, hospital, and some manufactures of kitchen utensils. P. 5000.

MESCHÉDE, a tn. Rhénish Prussia, gov. and 10 m. E.S.E. Aachen, cap. circle, on the Rur; with five churches and chapels. Pop. 3056. Area of circle, 323 geo. sq. m. Pop. 28 510.

MESÉN, or **MESKIR**, a tn. Russia, gov. and 150 m. N.E. Archangel, cap. dist. on a river of same name, about 18 m. above its mouth in the White Sea. It has two churches, and a small haven, at which it carries on a good trade chiefly in furs, tallow, whale and seal oil, and fish. Pop. (1849) 1455.

—The narrow straiting the E. part of the gov. is about 600 m. long, E. to W., and about 300 m. broad. The climate is too severe to admit of much cultivation. Great part of the surface is occupied by tundra and lakes. The inhabitants of the interior, chiefly Samoyeds, have a few stunted cattle, and considerable herds of reindeer, though on the coast live by fishing, or engaging as sailors in Archangel vessels. —The river rises in the S. of the gov., on the frontiers of Vologda, proceeds into the latter gov., first S. and then N. re-enters gov. Archangel, flows easterly to N.W., and a little below the town, falls into the bay of same name, in the White Sea, after a course of about 450 m. Its principal affluents are, on the left, the rivers, Yashka, and Sobolva, and on the right the Plesna and Pora.

MESERITICH two places, Austria, Moravia —1, (Green), a tn. circ. Igau, 58 m. W.S.W. Olmütz with an old castle, two churches, and an hospital, considerable manufactures of linen, and an important corn-market. Pop. 3900. —2, (Waldsee), a tn. circ. Pless, 35 m. E.S.E. Olmütz, on the Betscha with a handsome chateau, a church, many manufactures of linen, several mills, and some trade in cheese. Pop. 1920.

MESERITZ (Polish *Mieleszyce*) a tn. Prussia, gov. and 56 m. W.N.W. Posen, cap. circle, at the junction of the Peczka with the Odra. It is walled, defended by a castle, has two churches, a synagogue, and hospital, several provincial courts, and manufactures of linen, leather and hosiery. Pop. 4668. Area of circle, 368 geo. sq. m. Pop. 33 011.

MESHAW prov. Eng. Devon 1761 ac. Pop. 237.

MESHIDA, or **MUSKO** a tn. Prussia, cap. prov. Kurland, in an extensive valley of same name, 500 m. N.E. Ipatan, lat. 56° 20' N. lon 59° 35' E. It is surrounded by walls, enclosing a much larger space than its population requires, and everywhere has a very desolate appearance. Near the centre of the town, there is some degree of bustle, but elsewhere, little is seen except extensive burying-grounds and endless tracts of ruins. Its principal street, however, is spacious and handsome. An aqueduct, the banks of which are shaded by trees, passes through it, while at its extremity are seen the splendid spires and gilded minarets of the shrine of Imam Raza. This edifice, the only one particularly deserving notice is situated in an oblong, about 120 yards long, by 75 yards broad, enclosed with masonry work of painted and gilded stone, arranged in sherry and elegant patterns, and entered by four lofty and magnificent gateways. The shrine itself at the S.W. part of the oblong is composed of a mass of buildings, the proportions of which are partly hid by the wretched hovels around it, but is entered by a silver gate, the gift of Nadir Shah, and has a very gorgeous interior a vast hall like the central nave of a cathedral, rising loftily into a central dome, ornamented with the richest colours, and a profusion of gilded and carved work. Within the same enclosure, and connected with the shrine by a broad passage, is the

mosque of Gohar Shah, considered one of the most beautiful and splendid in Persia. The only other edifices deserving of notice are several colleges, an extensive bazaar a spacious but unfinished caravansary and a palace, of little architectural merit, so constructed as to form a kind of citadel. The manufactures consist of velvets esteemed the best in Persia; sword-blades, celebrated for their temper, some other species of armour and some silk and cotton goods. A considerable number of the inhabitants are employed in cutting gems, obtained from the turquoise mines in the vicinity. The situation of Meshid on the great caravan routes of Persia, makes it an important entrepot for the produce of surrounding countries, and rich caravans are daily arriving from Bokhara, Khiva, Herat, Kerman, Yazd, and other quarters. Pop. estimated at about 40 000.

MESLIN L. Evreux, a vil. and com. Belgium, prov. Hainaut, on the Sille 18 m. N. Mons. It has manufactures of linen yarn and calico, and two mills. The castle of Mesnage is in the vicinity. Pop. 1873.

MESLO, a river, Asiatic Russia, which rises in the N. of gov. Tyumen; flows W.N.W. and falls into the Gulf of Tazovsk, after a course of about 140 m.

METUOI A tn. Italy Romagna, deleg. and 61 m. E.N.E. Ferrara r. bank Po di Goro twice purchased by the Papal Government from the house of Austria first by Pius VII, for about £210,000 and afterwards in 1822 by Leo XII, for £100,000. Pop. 4600.

MESOLONGHI a tn. Greece. See *MESOLONGI*.
MESOPOTAMIA (Between the rivers) the smallest name of the country in Asiatic Turkey, lying between the rivers Tigris and Euphrates, now comprised in the pachalik Diarbekir and Bagdad. The name did not come into use till after the time of the Macedonian conquest of Asia.

MESORACA, a tn. Naples, prov. Calabria-Ultra II, dist. and 28 m. W. Crotone. Pop. 2074.

MESQUITELLA, a tn. and par. Portugal, prov. Beira Baixa, 16 m. W.S.W. Guarda in a valley. Pop. 1083.

MESSE a walled in Morocco, W. coast, at the mouth of a river of same name, 110 m. S.W. Toudert; lat. 30° 4' N., lon 9° 58' W. (n.). Pop. 8000.

MESSANBY (German, *Messing*) a vil. and com. Belgium, prov. Luxembourg 4 m. N.E. Longwy with oil and flour mills, and mines of iron. Pop. 2070.

MESSE, or **MESSEMONS**, a vil. Austria, Transylvania, stadt Hermannstadt, about 27 m. from Sigheturg with a church. Inhabitant, Hazons. Pop. 1306.

MESSEJANA a tn. and par. Portugal, prov. Algarve com. and 28 m. S.W. Beja. It is walled and has a convent. Pop. 1500.

MESSENE, a vil. Greece. See *MESEMONATI*.
MESSEIN a dist. France, which belonged to the former prov. Lorraine, and had Metz for its capital. It now forms the greater part of dep. Moselle, and part of depa. Meuse and Meurthe.

MESSINA, a prov. Sicily bounded N. by the Tyrrhenian Sea, E. the Strait of Messina and the Ionian Sea, S. prov. Catania, and W. prov. Palermo; length, N. to W. about 100 m. mean breadth, 25 m. The Neptunian chain of mountains traverses it, E. to W. throughout its length, and forms a watershed of which the S. slope belongs to the basin of the Tyrrhenian Sea, and the S. to that of the Ionian Sea. The streams of the former are the Montore, San Antonio, Fitalia, Inganno, and Carona. Those of the latter, the Savoca, Mongiù, and Cantara. In summer several of these streams are dry. The mountains are covered with wood, but the soil in the valleys, and on the banks of the rivers, is both fertile and well cultivated. The vegetable productions include silk, hemp, flax and fruits, as citrons, oranges, pistachio-nuts, grapes, and olives the great mineral product is sulphur. The province is divided into four districts—Messina, the capital, Castrolibero, Mistretta, and Patti subdivided into 27 circondarios and 94 communes. Pop. (1883), 238,352.

MESSINA (anc. *Zancle*, French, *Messone*), a tn. and seaport, Sicily, cap. prov. and on the strait of same name, lat. (right) 38° 11' N. lon 15° 34' 45' E. (L.). It rises from the shore in the form of an amphitheatre, with the Neptunian mountains for a background. The whitewash of the houses contrasts finely with the dark woods of the mountains, and nothing else is finer than the scene which meets the eye of

the spectator as he approaches it from the sea. Messina ranks as a fortress of the first class, it is walled, flanked by bastions, and defended by a citadel on the E., and several forts, both on the E. and W. The harbour is one of the best in the Med-

terranean. It is formed by a deep bend in the shore which curves from W to N E., and so much resembles a neckle that the town took its original name from that implement, and was called Zancle (Zancle). The N E. side is a projecting tongue of land, and has much more the appearance of an artificial mole than of a work of nature. The opposite extremities draw so near each other as to narrow the passage, and render it difficult for vessels to certain winds to make it but, once within there is ample space, great depth, and perfect shelter. The breadth of this splendid basin is about 4 m. Facing the harbour is a broad quay called the Marina, adorned with statues and fountains, and forming the favourite promenade and, immediately beyond it is a magnificent terrace called Palladium, once lined with noble edifices, most of which were damaged or thrown down by the fearful earthquake of 1783. The interior of the city has gained considerably in appearance by that catastrophe. It was formerly ill drained, the streets were narrow and the houses so high as to exclude both light and air, and gave the whole town a stifling, gloomy look. The modern town is generally composed of well-built houses of two stories, and spacious streets well paved with blocks of lava. Among the public edifices are included nearly 60 churches, many of them of great beauty, and adorned with fine sculptures and paintings; but it may be sufficient here to notice the cathedral, a Gothic structure with a somewhat heavy exterior, but supported within by vast pillars of granite, supposed to have belonged to a temple of Neptune, and adorned by fine mosaics and an exquisitely carved pulpit. The viceregal palace, with a large open space finely planted, and laid-out in walks; the archiepiscopal palace, the seminary, grand seminary college, large and well endowed hospital, numerous convents, two theatres, barracks, and arsenals. The manufactures consist chiefly of silk goods. The trade, both transit and general, is extensive. The principal exports are silk, olive-oil, linseed and other seeds, oranges, lemons, and other fruits, corn, wine, and spirits called *brandy*, liqueurs, lemon-juice, skunk, musk, rags, betelnuts, &c. The tunny and other fisheries are carried on to a considerable extent. In 1847, the value of the exports amounted to £248,100; of the imports, £280,860.

Messina is the see of a R Catholic archbishop and arch-

deacon, and a Greek preceptor. The seat of a high appeal court, a high criminal court, an ordinary civil court and a court of commerce. It also possesses a royal college or *Real* *Academia Carolina*, with a full complement of professors in

belles-lettres, philosophy law and medicine and a naval academy. Messina, under the name of Zancle, is said to have been founded 1004 years B.C. The Messinians having afterwards obtained possession of it, called it Messina. Charles of Anjou to avenge the massacre of the French in the Sicilian Vespers, besieged it without success, and lost great part of his fleet. In 1674 on the revolt of Messina from Spain a Spanish fleet blockaded the port, but a French fleet arriving a great naval battle was fought, in which the former was defeated. In 1743, the plague carried off the greater part of the inhabitants and the ruin which earthquakes had repeatedly threatened was fearfully consummated by that of 1783, which shook down its most solid edifices, and made it for a time a city of the dead. During the revolt in Sicily, in 1848, Messina, after being several times unsuccessfully bombarded by the Neapolitan fleet and a large body of land troops, on September 2 and fired upon for four successive days and a large portion of the city reduced to ruins, before it surrendered. Pop. (1850) 37,074.

MESSINA (STRAIT OF) [Italian, *Faro di Messina* Latin, *Fretum Siculum*], a strait, which separates Sicily from Italy and communicates between the Tyrrhenian and the Ionian Sea. It has a length of about 20 m. and gradually widens towards the S. attains, on the parallel of 38° a width of 11 m., but, in the N. where it is narrowest, does not exceed 3 m.

From the Faro tower on the N.E. extremity of Sicily to the rock of Scylla, on the opposite coast of Italy the exact distance, as ascertained by Capt. Smyth is 6047 yards. The depth is so great, that, in the centre, no bottom has been found with a line of 100 fathoms, and a strong current continually running with the tide more especially when the direction is from N to S. makes the navigation somewhat difficult but by no means so formidable as was fabled by the ancients, to whom the rock of Scylla, already mentioned and that of Charybdis, on the opposite side of the strait, but at some distance to the S. seemed so dangerous, that it was generally believed to be almost impossible to avoid the one without being dashed upon the other.

MESSINES (Fiume, *Messene*) a m. and com. Belgium, prov. W Flanders, 5 m. S. Ypres. It has a church and an establishment called Hospice Royal to which the daughters of soldiers who have fallen, or been wounded or maimed, in the service of their country are educated and maintained till 18 years of age. Messina has manufactures of sermone and tulle, hosiery, lace, &c. and a dye-work and a trade in corn and butter. Pop. 1485.

MESSING, par. Eng. Essex. 2549 sq. Pop. 791.

MISSINGHAM par. Eng. Lincoln 6190 sq. P. 1876.

MISSIS (anc. *Mosses*) a large vil. Assize Turkey pash. and 21 m. S.E. Adana, r. hook Ryhoon, lat. 36° 58' N, lon. 35° 38' E., composed of mud huts, erected on hillocks of sand and rubbish, inhabited by a gang of Turcoman freebooters, who are tributary to the pasha of Adana.

MISTANZA, a vil. Spain, New Castle, prov. and 22 m. S.W. Ciudad-Real. It has a townhouse and prison, two primary schools, a parish church, and, in the vicinity the cemetery and the remains of a castle; and manufactures of lace. Pop. (agricultural), 2160.

MISTCHOWSK, a m. Russia, gov. and 41 m. W.S.W. Kaluga, cap. dist. on the Turge. It has four churches, an important yearly market, which lasts a week, and a trade in hemp, hemp-oil, tallow, corn, and cattle. Pop. (1850) 4911.

MISTRE, a m. and par. Italy, gov. and 6 m. N.W. Venice cap. dist., near the Murano. It is surrounded by fine villas which are continued, without interruption,

along the road to Padua, and almost connects Mantua with that city to which there is a railway. It has a court of justice, several public offices, four churches, an hospital, an old castle, and an active transit and general trade. Pop. 5900. dist. 17 000

MESURADO, a cape, W coast Africa, Liberia at the mouth of a small river of same name. lat. 6° 15' N. lon. 10° 40' W. (s.) on which is situated the town of Mesurata.

MESURATA, or **MESURAN**, a tn., N. Africa, state and 123 m. S.E. Tripoli, near the Mediterranean noted for its manufacture of carpets. Cape Mesurata, hard by the town, is in lat. 23° 25' N. lon. 15° 10' E. (s.)

META a large river, New Granada, which has its sources in the E. Andes, about lat. 4° N., 85 m. S. Santa Fé de Bogotá. It flows N.E. to lat. 6° N., where it turns nearly due E. forming, for about 165 m., the boundary line between New Granada and Venezuela, and ultimately falls into the Orinoco, at lat. 6° 12' N. total course, about 500 m. Its banks are chiefly inhabited by Indians. The Meta, and its numerous branches, are navigable for the greatest part of their course nearly to the base of the Andes. Almost all its tributaries flow from the same range of mountains in which its own sources lie: the principal are the Chuanare, Arzopora, Grapo, Casana, and Upiá. The affluents from the E. and S.E. are insignificant.

METAPA, or **METAPUA** a tn. Central America, state and 65 m. S.E.E. Guatemala, near the lake of same name with iron-mines in its vicinity. Pop. about 8000

METAURO (anc. *Metaurus*), a river Italy The Marches, which flows E. to the sea at St. Angelo in Lido, and falls into the Adriatic S.E.E. Fano; total course, about 60 m. The Romans gained, near its banks, a victory over the Carthaginians, under Hasdrubal.

METDOWICH, a tn. Herzegovina, on a steep hill overlooking a fertile but superficially-irrigated plain, near 1 bank Neretva, 24 m. S.W. Metina. It is poorly built and the streets, from their steepness, are in several places cut into stairs. It is well situated for trade which, however is almost confined to salt, sold to the Turks. Pop. about 500

METELA, a tn. Prussia, prov. Westphalia, gov. and 24 m. N.W. Münster on the Yvette with a church, manufactures of woolen and linen cloth, and a trade in cattle. Pop. 1460

METFIELD, par. Eng. Suffolk 2163 ac. Pop. 651

METHERINGHAM, par. England Lincoln 4590 ac. Pop. 1523

METHILL, small seaport in Scotland on Fife, 10 m. S. Cupar on the Firth of Forth with a good harbour having 16 ft. water at spring-tides. Weaving and flax-dressing are the chief sources of employment. Pop. 1613.

METHLEY par. Eng. York (W. Riding) 8240 ac. Pop. 1926

METHLICK par. Scot. Aberdeen 14,400 ac. P. 1907

METHVEN a vil. and par. Scotland co. and 6 m. W. K. W. Perth with a parish, a Free, and a U. Presbyterian church, a school, a savings-bank, friendly society and an agricultural association. Inhabitants chiefly engaged in hand-loom weaving. Area of par. 10 700 ac. Pop. 2454

METHWOLD par. Eng. Norfolk 15 199 ac. P. 1659.

METHYE, two lakes, British N. America—1 A little E. the Rocky Mountains in the country of the Cree Indians; lat. 51° 45' N., lon. 118° 40' W.—2 Nearly 800 m. to the N.E. of the former, has a portage at its N. side, and a fort of same name at its S. extremity.

METILAWITZ, a vil. Austria, Moravia, circle Posen It has a church. Pop. 1156.

METILLI, a tn. Algerian Sahara, Wady Makh, 38 m. S.W. Gardia. It is situated on a hill, and surrounded by a battlemented wall, entered by three gates, and nearly covered by extensive gardens. It has a mosque, and a market, and is a place of considerable commerce.

METROPOL, a tn. European Turkey, in Greece, 22 m. S. Corfu, on the side of the ancient Gerania, of which many vestiges remain.

METSKE (Rath), a vil. Hungary, co. Borsany with a trade in corn, cattle, wine, and timber. Pop. 1281

METTET a tn. and com. Belgium, prov. and 12 m. S.W. Namur, with a primary school, and, near it, three chateaux inhabited chiefly employed in agriculture and iron-mining. Pop. 2216.

METTINGEN a vil. Prussia, prov. Westphalia, gov. Münster circle Tecklenburg with a church, and four annual fairs. Pop. 1680

METTINGHAM, par. Eng. Suffolk 1366 ac. P. 863

METTMANN, a tn. Prussia, gov. and 8 m. E. Düsseldorf on the Rhine with three churches, and manufactures of iron and steel, linen cotton, and cloth. Pop. 2385

METTON, par. Eng. Norfolk 680 ac. Pop. 77

METZ (pronounced *Metz* Latin, *Divodurum Metanensium*) a tn. France, cap. dep. Moselle, on both sides of the river Moselle, near the junction of the Sella, 73 m. N.W. Strasbourg. It is regarded as the strongest fortress in France, that of Strasbourg, perhaps, excepted and forms the centre of defence on the German frontier between the Meuse and the Rhine. The works are of great extent, and were constructed after the plans of Vauban and Balleau. It is walled has six gates, and all the resources of engineering skill have been expended on its fortifications. The principal of these are the Forts of Belle Croix, and the Double Couronne, the former covering the whole E. and the latter defending the N. side of the town. In addition to these, there is a redoubt called Pelt, which, by opening the sluices on the Sella, can be converted into an island, and surrounded by a lake about 3 m. in extent. The part of the town on 1 bank Moselle is flat, that on the r. bank rises up from the river in the form of an amphitheatre. Most of the streets are narrow and winding, and several of those on the r. bank so steep as to be inaccessible by carriages. The houses are generally built of brown stone, and of three or four stories but many of them stand low, narrow lanes, so crowded up that the air cannot circulate. The finest parts of the town are along the quays, the opposite sides of which communicate by numerous handsome bridges, and in the neighbourhood of the *Reynolds*, which is finely placed, commands a view of great extent and beauty and is said to be one of the finest promenades of the kind in Europe. The buildings most deserving of notice are the cathedral, a Gothic structure, in the form of a magnificent Latin cross, surmounted by a spire of open work 397 ft. high, and with a vaulted roof which rises 109 ft. above the pavement the church of Notre Dame de la Ronde with a church built in 1180 the arsenal, one of the largest in France, with a cannon-foundry, and an armory containing about 80 000 muskets of various calibres, capable of receiving 1500 patentes a royal college, occupying the buildings of the old abbey of St. Vincent, the *palais-de-justice*, containing in addition to the courts, a public library of 30 000 volumes; the prefecture, townhouse, mint, &c. The manufactures consist of coarse woollen cloths, flannels, and other woollen stuffs; honary hats parchment, embroidered muslin stained paper, glue, leather &c. There are also numerous cotton-mills, breweries, milleries, and silk-works. The trade is in wine, brandy beer, confectionary drugs furniture, leather iron, &c. Metz is the seat of a bishop the seat of a court for departments Moselle and Ardennes, and of courts of first resort and commerce, and possesses a commercial chamber and exchange a university, academy, a royal school of artillery and engineering a royal college, a shoemakers' seminary, and secondary ecclesiastical school; an agricultural and industrial society, a society of literature, science, and art; free schools of design, painting, and music; lectures on midwifery, botany, &c.

Metz, under the Romans, rose to considerable importance, being traversed by an grand military road. Under the dependence of Clovis, it became the capital of the kingdom of Austrasia, and on the decline of the house of Charlemagne, passed to the Emperor of Germany who, in order to make it a barrier against France, strongly fortified it, and allowed it to possess an almost republican freedom. In 1682, it claimed the protectorate of France, and ceased to be free. The Emperor Charles V. made a great effort to recover it the same year but was ultimately obliged to abandon the siege. The revocation of the Edict of Nantes, by depriving it of many of its best and most industrious citizens, influenced a blow from the effects of which it has never recovered. Pop. (1682), 43,484.

METZENSHOFEN (Ober and Unter) two contiguous parishes in Hungary co. Abaujvar, 15 m. W. Kaschau. They contain each a church, and a normal school, and are inhabited by Germans, who are very industrious, and chiefly employed in working in iron. Pop. (Ober), 1283, (Unter), 8431

METZINGEN or **MAUXEGES**, a tn. Wittenburg on the Rhine, 17 m. S.E. Metz, with a church, a school of arts, manufactures of woollen and linen cloth, tanneries, dyeworks and mills, and some general trade. Pop. 4337.

METZVOY, a tn. European Turkey. See **MESEVOY**.

METZ a town, France, which rises on the S. slope of Mount Meuse, about 113 m. E.N.E. of London, dep. Côte-d'Or, on the left bank of the Yonne, down R.R. past Montfort, and joins the bank of the Yonne at 3 m. above Fontenay, after a course of about 50 m., of which 8 m. are navigable.

MEUDON (Latin, *Medon*) a tn. to France, dep. Seine-et-Oise, 6 m. E.N.E. Versailles on the railway to Paris. It has an extensive chateau, surrounded by an extensive park, called the *Forêt de Meudon*, a favourite holiday resort of the President. It has a considerable manufactory of whitegoods, several glass-works and ironworks, and numerous blacksmiths. In 1842 a fearful railway accident took place here as a *San day* return train to Paris. Owing to the breaking of the axle of a locomotive the carriages were driven forward on the engine, where they were almost immediately enveloped in flames and more than 100 persons burnt alive. Pop. 1706.

MEULBEKE, a tn. and com. Belgium, prov. W. Flanders, 10 m. N. Courtray; with several breweries, a vineyard, and a good deal of weaving. Pop. 3254.

MEUNG-SAN-LOUIS (Latin, *Meungensis*) a tn. France, dep. Loiret, r. bank Loire, 11 m. S.W. Orleans. It is well built, has a fine chateau, manufactures of felt hats, numerous tanneries, paper and extensive flour mills, and a considerable trade in flour and leather. Pop. 2648.

MEURIM a tn. Brazil, prov. and 75 m. S. Maranhão, 1 bank river of its name with a church. Inhabitants employed in raising sugar-cane and cotton, and in rearing cattle.

MEURIN, a river, Brazil which rises in the S. of prov. Maranhão, flows E.N.E. then N.W. between the rivers do Negro and Barra Alperata, receives numerous affluents, of which the principal are the Graxim and Pindaré, and falls into the Bay of São Marcos, on the W. side of the island of Maranhão with so strong a current that its mouth is very difficult of access. Total course, about 250 m.

MEURS, or **MÖRS**, a tn. Rhineland, Prussia, gov. and 18 m. N.W. Düsseldorf, on the Rhine; with two churches, a gymnasium, normal school, and deaf and dumb institute, silk, cotton, and woollen manufactures, a cotton-mill, blacksmith and several breweries. Pop. 3899.

MEURSAULT (Latin, *Morsus Salis*) a tn. France, dep. Côte-d'Or, 37 m. S.S.W. Dijon, in a district famous for both wine and wax, in which it has some trade. Pop. 2301.

MEURTHE, an E. dep. France bounded N. by dep. Moselle, W. Meuse, S. Vosges, and E. Bas-Rhin lat. 48° 25' to 49° N., lon. 5° 44' to 7° 34' E. length, E. to W. 75 m. breadth, N. to S. 46 m., area, 2332 sq. m. The surface is finely diversified by hill and dale, and on the E. frontier, the W. slopes of the Vosges rise to about 1800 ft. above the lower grounds. There are extensive plains, but numerous valleys intersect it in all directions, and form the basins of considerable streams. These basins are principally four—those of the Meurthe, Moselle, Saône, and Sarre; there are also several lakes, climate variable. Nearly a half of the whole surface is arable, and less than 10% waste. Wood occupies nearly one-fifth, meadows rather more than one-fortieth, and meadows not quite one-eighth. The soil varies much in quality. The most fertile is in the valley of the Saône; the least fertile is that of the Sarre. The principal cereals are wheat, oats, and barley. The culture of the potato is general and that of rape, though of comparatively recent introduction, has proved very successful. A great quantity of the best land is devoted to the vine, and, in favourable years, yields large returns, but none of the wines bear a high name. Fruits of various kinds, and of good quality, are extensively grown. The domestic animals are of very inferior breeds. The most important, as a principal article both of food and export, is swine. In several of the extensive forests, both deer and wild boars abound. Other game, particularly hares, is becoming scarce. A little iron is worked and there is a single mine of rock-salt. The strata belong to the upper series of the secondary formation, and exhibit a large development of the *Jura limestone*, which is extensively worked, and yields, in particular localities, good marble. From stratum walls, copious supplies of brine are obtained,

and, on the most important of these, the salt-works of Dieuze have been established. Manufacturing industry, long in a very depressed state, has, in recent years, made considerable progress. Among other manufactures, may be mentioned common woollens, cottons, and hemp goods, umbrellas, glass, paper, plan and stained earthenware, basket-work, &c. The trade consists, in addition to the above articles of manufacture of corn, wine, and rape-seed oil. The department, in respect of its inhabitants, consists of two great divisions—the German race and German language prevailing in the one, and the French race and language in the other. For administrative purposes, Meurthe is divided into five arrondissements—Nancy the capital, Châtenay-Salins, Lunéville, Barrois, and Toul, subdivided into 29 cantons, and 714 communes. Pop. (1892) 459,423.

MEURTHE (La) (Latin, *Muris*) a river, France, which rises on the W. side of the Vosges, in Mount Bon Homme, dep. Vosges, and, proceeding N.W. past St. Die, enters dep. Meurthe, to which it gives its name, passes Nancy, where it becomes navigable, and joins r. bank Moselle, about 7 m. below total source, about 100 m. Its principal affluents are the Vologne, Mortagne, and Sarre.

MEUSE, an E. dep. France bounded N. by dep. Ardennes, and a small corner of Belgium, Luxembourg, W. dep. Ardennes and Meuse, S. dep. Haute-Marne and Vosges, and E. dep. Meurthe and Moselle lat. 48° 25' to 49° 55' N. lon. 4° 54' to 5° 50' E. length, N. to S. 58 m., breadth E. to W. 40 m. area, 2368 sq. m. The surface is very much diversified and broken, being intersected by numerous ramifications of the Vosges and Fennelins culminating points, about 1800 ft. high. They consist of two principal chains, which form the watershed between the basins of the Meuse and the Moselle. The far greater part of the department belongs to the basin of the Meuse, which enters it at its E. end, and traverses it diagonally N.W. A considerable portion of the W. and S.W. belongs to the basin of the Saône, being drained partly by the Orne and Saône, tributaries of the Marne and partly by the Aisne directly which has its source within the department, and its tributary the Aisne. The strata belong chiefly to the upper part of the secondary formation. The only mineral of importance is iron, which is extensively worked and maintains a number of blast-furnaces and other iron-works. Rather more than one-half of the whole surface is arable, considerably more than one-fifth wood, and not one-fifth waste. meadows occupy nearly one-twelfth. The soil of the plains is, in general, thin and far from fertile, that of the valleys, particularly those of the Meuse and Orne, deep and rich. Much of it, in these valleys, is occupied by verdant meadows. The corn produced leaves a surplus after meeting home consumption, but the modes of culture are very imperfect. The principal crops, besides corn, are hemp, flax, and clover, and in some districts, the gooseberry is carefully and extensively cultivated and considerable tracts are covered with vines, which yield wine of good name. The domestic animals are of inferior breeds, but the rich meadows fatten a great number of oxen, of which there is a considerable export. The dairy produce, also, is large, and small cream-cheese, resembling Gruyère, is made. Swine and goats are extensively reared. This department contains numerous manufactures of cotton goods, cotton twist, and hosiery, iron-works, dyeworks, glass-works, oil and paper mills, tanneries, breweries, distilleries, &c. The trade, in addition to the articles thus produced, is in corn, clover and lucerne-seed, cheese, butter, pork, cattle, and timber, both for carpentry and ship-building. A considerable number of the inhabitants emigrate annually for employment, many of them carrying with them various articles in wood and wicker work. The number of pilgrims is very considerable. For administrative purposes Meuse is divided into four arrondissements—Bar-le-Duc, the capital, Commercy, Montmédy, and Verdun, subdivided into 28 cantons, and 588 communes. Pop. (1892) 522,667.

MEUSE (Latin, *Mosa*, Flemish *Moss*, Dutch *Moss*, Walloon, *Moselle*), a river Europe, which rises in France, in S. of dep. Haute-Marne and, proceeding N., crosses the N.W. corner of dep. Vosges, and traverses dep. Meuse and Ardennes on reaching Sedan, it enters Belgium, and at Namur, where it receives, on the left, its largest tributary, the Sambre, almost doubling its volume, changes its course to N.E., and passes

Lidge, where it is separated by the Ourthe separates Dutch from Belgium, passing Maastricht and Mookermond, at the latter of which it reaches the Roer. In the N part of Dutch Limburg, its course is changed to N.W., and, subsequently it becomes W. The whole of its after course is through the Dutch territory. Passing Mookermond, it proceeds N through Lamburg, where it partly separates Limburg from Dutch Brabant, forming the boundary between Brabant and Gelderland, and, at Bommel, flows so close to the Rhine as to be brought into communication with it, but, by a sudden bend S.E., again resumes its W course, receives the Lay on its L bank near Fort Crevecoeur, and finally turning N.W. joins the bank West, one of the arms of the Rhine, and gives its name to the mighty accumulated flood of those streams, which, proceeding W through Holland Proper, is divided, near Dordrecht, into two great rivers, the one of which bends round to the N., and reaches Rotterdam, the other branch continues W., and shortly after the two branches again unite, and discharge themselves, sand shoals and quicksands, into the North Sea. The direct length of the Meuse is 230 m. and its length including windings, 660 m. It is navigable for about 450 m. Of these about 160 m. are in France, 160 m. in Belgium, and 180 m. in Holland. In the upper part of its course, its valley is wide and somewhat, and becomes, at times, almost narrowed to a point, while the stream pours along

through a deep and precipitous gorge. In the lower part of its course, it waters vast alluvial plains, which, in a great measure gained from it by Dutch industry and perseverance. It is ever threatening to inundate and ravage as its own domain. The delta of the Meuse exceeds that of any other European river.

MEUSELBACH, a tn. Schwarzburg Rudolstadt, bail and 6 m. S. Kieselge, on a stream of same name; with a church and two paper-mills. Pop. 1506.

MEUSELWITZ, a vil. Sax-Altenburg, 6 m. N. Altenburg. It has a castle, with a library a church, and a mill. Pop. 1527.

MEUX, a vil. and com. Belgium prov and 6 m. N.W. Namur on the Meuse; with manufactures of linen and hampes goods and a trade in agricultural produce. P. 1328.

MEVAGH per Irel Donegal 21 021 ac. Pop. 4961.

MEVAGISSEY par Eng Cornwall, 1844 ac. P. 2029.

MEW ISLAND one of the Copeland islands (what ac).

MEWAN (Sr) par Eng Cornwall, 2832 ac. Pop. 1289.

MEWEL, or GAWW a tn. W Prussia, gov and 9 m. N.W. Marienwerder at the junction of the Parsa with the Vistula; with two churches, and barracks. Pop. 9707.

MEXBOROUGH par Eng York (W Riding) 2328 ac. Pop. 1652.

MEXICO (THE REPUBLIC OR CONFEDERATION OF) [French, *Mexique*; Italian, *Mexico*; formerly *New Spain*] a state of great extent, founded by Spain, on the N. side of the isthmus joining N. and S. America. It formerly extended through 26° of lat. (18° 58' to 42° N.) and through 87° of lon. (from Cape Colote, to Yucatan lon. 68° 43' W. to Cape Mendocino, in Upper California, lon. 124° 27' W.) but recent events have reduced its length by 8° its N. limit being now in the parallel of 34° N. This curtailed it at least half of its original dimensions it still has an area of about 824,140 sq. m. Where not confined by the sea, its borders in the E. on Guatemala, on the N.E. and N. it is separated from the U. States by the Rio Grande del Norte and the 34th parallel. The name Mexico or rather Mejico derived from Mexitli, the Aztec god of war was given originally to the capital city, more commonly named Tenochtitlan.

As at present (1855) constituted, Mexico consists of the following states or departments and territories:—

THE STATES OR DEPARTMENTS AND TERRITORIES OF MEXICO their AREA POPULATION and CAPITALS, &c.
(From *Leyda de Tepala's Cuadro Sinoptico de la Republica Mexicana, en 1850. Mexico, 1850*)

States or Departments, and Territories, as	Area in Spanish sq. leagues	Area in English sq. m.*	Population.	Capital.	Population.

* The Spanish square judicial league is equal to 7.19 English sq. m.

† Tenochtitlan declared herself independent, for the second time, in 1846, but has again joined the Mexican Confederation.

Mexico.—Mexico is a very remarkable region. It is an enormous ridge, raised by volcanic force, between two

oceans, and ramifying into several chains as the land grows wider. This ridge, which forms a continuation of the Andes of S. America, is, in the isthmus of Panama, where its chains are least a mass of granite, varying from 150 to 800 ft. in absolute elevation. It leads W. to the shores of the Pacific Ocean, reaching off, in Guatemala, a branch N.E. through the peninsula of Yucatan. On entering Mexico, the ridge strikes N.W. and acquires a greater breadth, so that the State of Oaxaca may be said to occupy the summit of a single ridge, 150 m. wide, falling rapidly on one side to the shores of the Pacific Ocean and descending, by a succession of terraces on the other side, to Tehuacan and Vera Cruz, to thus succeed the great Mexican table-land, beginning with the elevated plains of Puebla, Mexico, Queretaro, and Michoacan, which have an absolute height of 6000 to 8000 ft., a chain of volcanic cones and snowy peaks rising, at wide intervals, far above them. Between the 18th and 21st parallels, the Mexican chain runs N. and S. Beyond the latter limit it turns

N.W. and, under the name of Sierra Madre or Tape-Summa, runs through the States of Queretaro and Guanajuato, where unusually rich silver-mines are contained in its bosom. N. of Guanajuato, it divides into three branches, of which the middle one or central chain continues running to the N.W. as far as the 30th parallel, beyond which it bends N. till, under the name of Sierra Verde, it joins the Rocky Mountains, in lat. 40° N. The E. branch runs through the State of San Luis Potosi, gradually sinking till, in lat. 26° it disappears on the border of the plain watered by the Rio Grande del Norte. The W. branch spreads over Guadalupe, declines N. of the mouth of Bolson, and, rising again in the States of Sonora and Sonora, forms, in the latter the mountains of Pimeria Alta, which are celebrated for their gold-mines. The Mexican chain of mountains may be justly considered as a continuation of the Andes, yet they differ widely from the latter in their general structure. The Cordillera of S. America are frequently intersected by immense lacunes or precipitous valleys, called quebradas, in some cases nearly a mile deep. The

elevated table-lands enclosed by them, such as the plains of Santa Fé de Bogotá, those of Caxamarca and Quito, in Peru, and that round the lake of Titicaca, are all of comparatively small extent, and generally accessible only on foot, with mules, or on the backs of Indians. In Mexico, on the other hand, if we start from Tehuantepec, on the shore of the Pacific Ocean, lat. 16° 30' N., we soon reach the plain of Oajaca, at a height of 5500 ft., and thence a wheel-trail can roll without difficulty to Santa Fé de New Mexico (lat. 36° 12' N.), a distance of 1400 m. Though some parts of this route might fall below the level of 2000 ft. and others nearly reach an elevation of 8000 ft., yet the slopes are so gradual as to offer no serious impediment to the construction of an easy road, but that facility pertains wholly to the internal communications, the descent from the Mexican table-lands to the sea on both sides, is everywhere rugged and abrupt, and presents such difficulties in the way of carrying goods, as will probably always cut off the mineral and most productive provinces of Mexico from a fair participation in the commerce of the globe. In going from the city of Mexico (7400 ft.) to Asunción, on the S. sea, the road attains a height of 8500 ft. before the rapid descent commences, the great roads between the capital and Vera Cruz cross the mountains at a height of 10,500 ft.

Summits.—The loftiest of the snowy summits and volcanic cones, scattered along the Mexican highland lie all within the narrow zone compressed between lat. 18° 29' and 19° 12' N. They are all of volcanic origin, and in several of them the subterranean fires still continue raging. Ascending W. from the shore of the Mexican Gulf, a little S. of Vera Cruz, we first meet, 13 m. from the sea, in lat. 18° 24' N., the still active volcano of Tuxtla (5118 ft.), the highest point of the Sierra de San Martín. Further N. (lat. 19° 37'), the peak of Orizaba or Citlaltépetl [Star-mountain] 17,378 ft. Its flanks covered with rich woods anterior to the close of the 16th century it became extinct. A few miles further N. (lat. 19° 28') is the Cofre de Perote or Manacamatépetl [rectangular or cube mountain] (15,418 ft.) S.W. of these on the confluence of Puebla lat. 18° 30' N., is the still active volcano of Popocatepetl [Smoking mountain] 17,684 ft., while 35 m. further N., stands Iztaccíhuatl [the white lady] 15,703 ft. high. The latter appears to have been extinguished at an early period, and, since the 17th century, Popocatepetl has had no violent eruption, though clouds of smoke and ashes are occasionally thrown out from its enormous crater. About 50 m. W. of the White Lady the Ilo del Fraile, the highest point of the Nevado de Tolúca—another extinct volcano—attains the height of 15,350 ft. About 120 m. W. of this mountain, stands Jorullo (black sea), which rose, on the night of September 28, 1759, from the level plain to the height of 4149 ft. Of all the mountains here named, only three namely Popocatepetl, Citlaltépetl and the Iztaccíhuatl rise above the limit of perpetual snow which may be assumed to run between lat. 19° and 20° N., at an elevation of 15,000 ft., though varying much with local circumstances. The Nevado de Tolúca reaches that limit, but can hardly be said to rise above it.

Geology and Mines.—In Oajaca, granite everywhere breaks through the superincumbent rocks, and forms the highest summits of the mountains. Quartz, siliceous, and syenitic extend down from the central ridges to the sea on both sides. In all these rocks are found auriferous veins. On the borders of Guatemala, the prevalent rocks are porphyry, of many varieties clay-slate, and limestone, all broken by granite. The first of these contains veins of silver, lead, and copper. In Puebla, all the primitive rocks are covered by enormous masses of calcareous tuff. Further N. granite seems to form everywhere the foundation of the rocky system while the table-land is a superincumbent of porphyries, which contain (when they do not incline to trachyte) these rich deposits of the precious metals for which Mexico has long been so famous. Old sandstone, Kiamasine, clay slate, syenite, serpentine, amygdaloid, dolerite, and basaltic lavas accompany these predominating rocks. The coal formations are wanting, but deposits of rock salt may possibly be found in Oajaca, where salt-works issue from gypsiferous strata, near San Juan de los Rios. Some of the Mexican mines, once celebrated, as those of La Puebla, are now quite exhausted; others, as Bolaños, hardly repay the cost of working them. The chief mining districts of the present day are, in the order of their productiveness, as follows.

Juárez—Guamajuato, San Luis Potosí, Zacatecas (the vera grande), Durango, Chihuahua, Sonora (the Vera Grande), Tasco (Mexico), Oajaca, Real del Monte (Mexico), and Huasteca (Mexico). According to authentic records, the produce of the Mexican mines (gold and silver) reckoned from 1890 to 1893 exceeded \$270,000,000. In 1804 and 1806, the annual produce of the mines exceeded \$5,000,000, but the decline of the mother country began, at this period, to press on the colony and the activity of the mines abated. Then came the civil wars of the revolution, the proprietors of the mines, mostly old Spaniards, were obliged to quit the country, the mines, abandoned soon went to ruin—some falling in others filling with water; while the capital which might have restored them was spent in civil war. On the restoration of order, in 1826, the Mexican government held out inducements to foreign capitalists to re-open the mines, and several English companies were accordingly formed for that purpose. Though some of these soon relinquished their undertakings, the produce of the mines is now considerable, as will be seen in the following Table—

ANALYSIS OF GOLD AND SILVER MINES IN MEXICO, 1849-1854.

Years.	Gold.	Silver.
1849 -	6	\$ 3,708,361
1851	800,000	\$ 4,481,161
1852	189,777	\$ 7,717,141
1853	111,408	\$ 3,991,828
1854	168,314	\$ 3,001,869
1855	190,761	\$ 3,001,869

For the eighteen months ending June, 1849 the total produce of the gold and silver mines was estimated at \$2,560,000. About the year 1850, a new impetus was given to mining operations, by the discovery, in the state of Sonora, near Pima, of quicksilver mines so rich as to be named New Almaden, after the famous quicksilver mines of Almaden in Spain. But since the period referred to, the emigration of miners to California has seriously interfered with mining industry.

Coast and Harbours.—The opposite shores of Mexico differ widely in physical conformation. On the W. the great current of the Atlantic Ocean sweeps round the peninsula of Yucatan and through the Gulf of Mexico, causing a continual increase of sandbanks, extension of the beach, and barring of river mouths. On the whole Mexican coast of the Gulf of Mexico, from Cape Catoche in Yucatan to Texas, there is no bay of any importance, no good harbour, any of access, nor any sheltered anchorage. This want might, perhaps, in a few cases, be supplied by art. Between Yucatan and Tabasco lies the Laguna de Terminos 45 m. long and 50 m. wide, and connected with the sea by two channels, the deepest of which has but 2 fathoms. Could this channel be deepened, the lagoon might become a very important harbour. Further W., on the coast of Tabasco, the Laguna de Santa Ana, though deep within, is quite inaccessible by shipping, owing to the shoal and narrow passages leading to it. Similar remarks apply to the lagoons of Matamoros, Tampulco and Tampico, beyond the last-named place N. extends a long succession of sandbanks, fringing the shore, and exhibiting, in its earlier stages, the process of forming islands. Here the coast of Tamaulipas, we find the Laguna de Marías, de Madre, de San Andrés and a few more, all difficult of approach, and rapidly filling up with sand. When we turn from the Gulf of Mexico to the S. Sea, the scene changes completely. On the W. coasts of Mexico, the highlands approach the seashore, the plains between them are narrow, and rarely very low, and from Ampulco to Guaymas extends a series of the harbours capable of sheltering the largest vessels. Many of these have never perhaps, been entered by a foreign ship, and even the harbour of Asunción in lat. 16° 30' N., the most commodious and capacious probably of all known, is now but little frequented. N. of this, the small ports of Jiquilá, Poxtlan, San Felipe Manzanilla, and some others, follow in succession, until, in lat. 21° 33' N., we arrive at the harbour of San Blas, at the mouth of the Rio Grande de Santiago. This noble harbour, resembling that of Asunción in its natural advantages, is, like the latter, almost quite deserted. More important than these, at present, is the harbour of Mazatlan, lat. 23° 15' N., in which now centres the trade with China and the E. India. This port is difficult of access, and inferior in most respects to the harbour of Guaymas.

lat. 27° 40' N. The E. shore of the Californian peninsula offers many bays and small havens. Its W. side, towards the ocean, is less indented, yet it does not want for good harbours; the bay of San Cristóbal lies in lat. 27° 53' N., then follow the bays of San Francisco, Las Virgenes, and Todos Santos. *Shores and Lakes.*—Mexico is, in general, but sparingly watered, and labour under the almost total want of navigable rivers reaching the interior. Within the tropic, the land is narrow, and the streams, descending from the elevated interior to the seas on both sides, assume the character of rapid torrents, dry at one season, and overwhelming at another. Further N. where the breadth of the continent admits of the formation of great rivers, the dryness of the climate forbids it. The longest, and probably the greatest, in all respects, of the Mexican rivers, is the Rio-Grande-del-Norte, called also Rio-Brazo-del-Norte (see QUERARO), which now marks the E. boundary of Mexico, towards Texas and the U. States. Formerly, it was the eighth river from the E. bank of the Mexican territories. The Rio de Tampoco is formed by the junction of the Panuco, which runs near San Luis Potosí with the Tula or Montedama, the sources of which are in the State of Mexico. The united streams, flowing N. E. to the gulf, close by Tampoco de Tamulimpas, take the name of this city. Its total course, about 200 m. On the bar at the mouth of the Tampoco, there are but 18 in. of water, but within, good anchorage may be found with from 5 to 10 fathoms, and small sailing vessels may ascend the Panuco 40 m. The San Juan runs in the mountainous mountains of Oaxaca, flows S. and E., forms the great lagoons of Toluá and Embarradero, and at length reaches the sea through the Laguna del Madero. It is navigable, for ships of moderate burden, 24 m. above its mouth. The Rio de Guasacualco issues from the mountains of Tarrifa, lat. 17° N. flows W. towards the State of Oaxaca, Tabasco, and Vera Cruz, then winding round to the N. and E., falls into the gulf, in lat. 18° 5' 37" N. This river has attracted much attention, because it has been the subject of the communication between the two seas (the Mexican Gulf and the Pacific Ocean), might be conveniently effected by joining the Guasacualco and the Chiriqué or Chimalapa, which latter rises about 14 m. from the sources of the former, and falls into the Bay of Tehuantepec. The Rio de Tabasco, and the Usumacinta, are both considerable rivers, rising in Guatemala the former enters the gulf at the Port of Tabasco, the latter falls into the Laguna de Terminos. The rivers running into the Pacific Ocean are towards the S., all rapid, and important only as they water considerable towns or less populous. The Chimalapa or Chiriqué, already mentioned, the Tehuantepec, Rio Verde, and Rio de Tlascala or Papagallo, are considerable streams, which have, at present, no commercial value. The Rio Balsas or Zacatala descends from the State of Mexico and, after collecting several large streams, reaches the ocean with a broad and deep channel, navigable for boats a good way up, and forms at its mouth the little harbour of Zacatala. The first great river which we meet with, going N., on this side, is the Rio Toluá or Rio Grande de Santiago, the second in magnitude of the Mexican rivers, which is formed by the junction of the Toluá and Lerma, near Salamanca, in Guanajuato. The sources of the Lerma, in San Luis Potosí, are at least 8000 ft. above the sea. After a very winding course of 600 or 700 m., the Toluá enters the ocean near San Blas (lat. 21° 32') by several mouths. This great river has many rapids, and is, in the rainy season, an impetuous torrent. In the dry season, on the other hand, it is fordable 24 m. from the sea. The briefest mention will suffice for the rivers Cd. Iliam, Maya, Yagui, and Guaymas, the last two of which (in lat. 27° 37' and 28° 26' respectively) form good harbours at their mouths. The river Cd. Iliam, and forms part of the N. boundary of Mexico towards the U. States. At its junction with the Colorado, it is 3 m. wide, and navigable for large vessels.

The lakes and lagoons of Mexico are very numerous, but comparatively unimportant. The largest of them is Lake Chapala, in Jalisco, which covers an area of 1500 sq. m. The states in which they chiefly occur are Chihuahua, San Luis Potosí, Mexico, and Michoacán.

Climate.—A country which extends through 17° of N. latitude, must necessarily embrace a great diversity of climate, but Mexico has not only a great extension in latitude, but a configuration of surface, also which is calculated to exhibit

great diversities of climate within a narrow compass. It is known that an absolute elevation of 8000 ft. produces on the climate an effect equal to that resulting from an increase of 10° of latitude. How various, therefore, must be the climate of a country, the extensive and cultivated plains of which run frequently S. above than elevation. The principal high plains, in the vicinity of the city of Mexico, are the valleys of Toluá, 8000 ft., of Tenechitlan, 7400 ft., Atlixpa, 6450 ft., and the valley of Tula, 5300 ft. above sea-level. Thus we find at once, close by the capital, differences of climate arising from elevation, which, at a common level, could have been produced only by an intervening meridional distance of 1200 m. The valley of Toluá produces the sugarcane, Acatlan yields cotton, Tenechitlan is rich in wheat and other European grains. Toluá is the agave, from which is made the popular beverage of the country, the four different climates being thus distinctly and completely marked. Hence it is, that Mexico, being, to a great extent, a table land, three-fifths of its area lying within the tropic, has not a tropical, but a temperate climate. The mean temperature of the Mexican coasts, between the 15th and 20th parallels, is 76° Fah., while the elevated plains, within the same limits, have 64°.

But general rules are here continually modified by local circumstances, and in a manner not easily explained, palm-trees, gigantic firs, and birds of such plumage, ascend at some points, to an unusual height, and the culture of the sugarcane is successful, in certain situations, at an elevation of 4000 ft. The Mexicans divide their country, in respect of climate, into Tierras Calientes (hot lands), which rarely exceed 900 ft. in elevation, Tierras Templadas (temperate), ranging between 4000 and 5000 ft., and Tierras Frías (cold), above 7000 ft. The coasts of Mexico, particularly those of the gulf, are insufferably hot, humid, and dreadfully unhealthy. On the Pacific coast the climate is hardly less so. Here the rank vegetation reaches down to the sea-side, and, in the shallow water, mangroves and molluscous denizens and green serpentine. The most dangerous parts of the W. coast to strangers, and to natives from the interior, are Acapulco, San Blas, and the valleys of Papagallo and Ferguena. The plains of the interior, from 2500 to 4500 ft. high, where the evergreen oak predominates in the woods, enjoys a delicious climate, perfectly healthy, and, at the same time, favourable to luxuriant vegetation. Higher up, the air, more rarefied, is also drier, and trees of vigorous growth disappear with unexpected rapidity. Hence a large proportion of the elevated plains of Mexico present a most dreary and unattractive aspect—dry, barren and desolate. The falling of the woods, and the drainage of lakes, has, in some measure, augmented this evil. North of the tropic, though the land generally sinks, the aridity increases, and, with it, the violent changes of temperature. The rains begin, on the E. coast, about the first week in May and, advancing with the trade-wind, reach the capital about three weeks later, they cease in October when the dry season begins. The quantity of rain that falls annually in Vera Cruz, is, on an average of nine years (1828-1836) 185 inches, but it is extremely irregular and was, in 1839, only 64 inches. Earthquakes are of frequent occurrence in Mexico, particularly in Oaxaca, along the E. coast, and near the capital, but they are generally slight, and do little damage. They are what the natives called *Zembleros* or vibrations, rather than *terramotos* or earthquakes, properly so called. The most remarkable volcanic phenomena recorded in Mexico in modern times, are the rise of Jorullo, in 1769, and the eruptions of Tuxtla (the highest point of the mountains of San Martín, S. of Vera Cruz), which commenced in March, 1793, and continued for three years. The S.W. shores of Mexico are visited at times by hurricanes of intolerable fury.

Vegetation.—Mexico possesses a variety and abundance of vegetable productions known to hardly any other portion of the earth. The forests near the coasts display the grandest forms of tropical vegetation. There may be seen the gigantic mahogany, the Brazil wood, the Campeche wood, American ebony, yellow and iron wood, intermingled with the elegant giant-ferns and palms without number. Then, as we ascend, we meet with magnificent magnolias, cactaceae, plumbaceous, and oleaceae. Varieties of hyacinths, begonia, hibiscus, barbin, &c. cover wide tracts. At the absolute height of 8000 ft., the Mexican cells begin to predominate in the tropic, associated with euphorbias and scrotae. The oak disappears

generally at the height of 10,000 ft., while the pine groves extend between the elevations of 8,000 ft. and 14,500 ft. Within these limits, also, grow the various species of agave, the arbores, dahils, and geraniums. The cactus kind are widely diffused, groups of them occurring on sandy tracts near the sea-side, while they frequently reach an elevation of 10,000 ft., but their favourite region lies between the limits of 8,000 ft. and 8,500 ft. above the sea. The best cultivated districts of Mexico are those which lie near some of the richest mines in the plains, extending from Zolaya and Salinas to Salda, Guadalupe, and Villa de Lora. In the wildest and dreariest spots of the Cordilleras, the opening of mines has never failed to call tillage into existence. To this early bias and the influence of the mines, it may be ascribed that there is at present a very considerable population scattered over the mountains of Mexico, with an agriculture varying widely according to height and other circumstances, but always sufficient for their wants. On many parts of the table-land tillage is much checked by scarcity of water, to remedy which, reservoirs and canals of irrigation have been constructed, at great expense. Of the articles of food cultivated by the Mexicans, the most important is maize, the return of which varies from 130 to 50 fold. To Mexicans of all classes it is the staple article of subsistence and it is also the chief food of the cattle and horses. The districts most distinguished by the culture of this grain, are the S. and E. parts of the state of Mexico, the states of Puebla, Queretaro, and Oaxaca, and the neighbourhood of Aguas Calientes, in Zacatecas. There appears to be but little ground for supposing that the cereal grains were known to the Americans previous to the 16th century. At the present day, wheat and barley alone are cultivated in Mexico and most successfully at an elevation of 7,000 ft. The former yields from 20 to 60 fold or more, whereas 12 fold is thought a good return in England. It is said that the Bajío or that portion of the great table-land which is watered by the San Juan or Rio Grande de Santiago, with some other high plains of Mexico, is capable of supplying wheat enough for the support of five times the present population of the republic. The productions above mentioned belong to the table-land of Mexico, the inhabitants of the Tierras Calientes, and the sea-coast, look for their chief and ordinary food in the banana or mango (*Musa paradisiaca*), called by the Spaniards Plátano, and which is to them what the maize is to the people of the highland. To the same region of Mexico belongs the manioc called also yuca, producing cassava or manioc flour, and tapioca. Another important object of cultivation, which occupies extensive tracts on the table-land of Mexico, is Spanish pepper (*capsicum* in Aztec Chilli), which is consumed by the inhabitants in enormous quantities. Among the cultivated plants of Mexico, there is none more important or characteristic than the maguey (*Agave Americana*) from the sap of which is prepared the favourite drink of all classes the pulque of the Spaniards, the ocell of the Aztecs. The filaments of the thick fleshy leaves, serve for the same purposes as hemp, while their outer cuticle is the material formerly used as paper by the Aztecs. The agave gives little trouble, and is easily propagated, it thrives on the poorest soil, so that, near a town or populous district, a plantation of it is always a valuable estate. It seems doubtful whether the vine is to be considered as a native Mexican plant, but at all events it is now found wild in all the woods. Wines little inferior to those of Jura (cherry), and Val de Polce, are now made at Farnas and Tehuacan, but this branch of culture and industry is still only in its infancy. The Spanish Government always protected the monopoly of wine-growers, by prohibiting the culture of the vine in its American possessions an order to extirpate the vineyards in Mexico was issued in 1802. The olive, too, was another useful plant, the culture of which was forbidden by the tyrannical monopoly of Spain, since the revolution, it has received attention. The oil now made in Mexico is equal to the best imported from France and Italy, and already nearly sufficient for the home consumption.

Colomed Produce.—Sugar was exported from Mexico in large quantities under the Spanish government; at the present day, the amount of it produced hardly suffices for home consumption. Still a very great extent of Mexican territory is adapted to the growth of the sugar-cane and, from the genial character of the soil, a plantation in Vera Cruz yields

twice as much nearly as one in Cuba. The consumption of coffee by the Mexicans themselves is still but small, and the exportation not yet great, but it is rapidly growing. Though it was from Mexico that Europe first learned the use of chocolate (chocolatl, the Aztec name of the cacao-fruit), yet the culture of the cacao-tree has there declined to such a degree, that an importation from Caracas and Guatemala is required at present to satisfy the internal demand. Vanilla [properly *Yopallia*, a small pod or husk], which also enters into the composition of chocolate, is another Mexican product. Tobacco, the consumption of which in a country where every one, male and female, smokes, is enormous, from being the object of a Government monopoly since 1838, is high in price and inferior in quality. Cotton was cultivated extensively in Mexico, before the arrival of the Spaniards, and may again be expected to become an important article of culture in a country where the cotton plant is not so unusual as in the U. States, but continues productive for several years. The cochineal insect, so valuable for its dye, seems to be peculiar to Mexico. In ancient times this branch of industry was prosecuted with much more zeal than at the present day, the heavy impost laid on it by the Spaniards having disgusted the Indians by whom alone it was constant but easy labour was carried on. Mexico has several worms which produce a kind of silk, but soon after the conquest, the true silkworm was introduced by the Spaniards, and large plantations were made of the white or Chinese mulberry. The silk trade had grown to considerable importance in the 18th century, when the Indians, irritated by the exactions to which it exposed them, conspired to extirpate it, and destroyed at once, in a great extent, the mulberry-trees. Since the revolution, pains have been taken, particularly in Oaxaca, to restore this branch of industry but with no conspicuous results as yet.

Zoology.—The wild animals of Mexico are extremely numerous. The bison, or American buffalo (*Bos Dromedarius*) in Mexico called also Cibolo, comes to midwinter, in immense herds, from the forests of the N. W. It does not appear that any attempt has yet been made to tame or domesticate it. The grizzly bear, the most formidable of his kind, inhabits the mountains in the N. provinces. In several rivers, near lakes and rivers, live the tapir (called also by the Spaniards *Asa* or *Daniel*), which is the largest indigenous quadruped after the bison. Among the feline animals are the jaguar the cougar or puma, the ocelot, jaguarundi and tiger-cat. The tagicat and javali are singular species of wild swine, the latter a deadly enemy of the jaguar. The Mexican forests swarm with porcupines, anteaters, gluttons, sloths, weasels, and polecats, in great variety, armadillos, weasels, and monkeys. Among the viverrines we find the marmoset or sea-sow (found in the lagoons of the E. coast), the flesh of which is thought a delicacy. The W. coasts are frequented by whales and seals of the most valuable kinds. The feathered tribes of Mexico are countless, one the condor, is said to have the song of the nightingale. In the rivers we find the Mexican crocodile (*C. Eubroderus*) besides some alligators, as the cayman (*C. paucispinus*). We must hunt by the lizards and the reptiles also, specially mentioning the rattlesnake and two species of boe. A species of murex, yielding a fine purple dye, is found on both coasts, but chiefly on the W. coast. The pearl fishery once so profitable along the coast of Old California, seems now incapable of revival.

Domesticated Animals.—The ancient Mexicans never attempted to subject to economical purposes the wild animals around them. They knew nothing of the llama; and from the bison, the wild sheep and goat, they derived little or no advantage. The savage Comanches have always employed large dogs to carry their tents and draw their baggage, while the Mexicans kept only the small dumb dog (Tehuacan), which they fastened for the table. But at the present day, Mexico is abundantly stocked with domesticated animals, introduced by the Spaniards. Horned cattle and horses have indeed grown wild in many parts, and now occupy, in immense herds and droves, the great plains of the interior. The chief cattle farms are in the muer states—Jalisco, Durango, Chihuahua, &c., where herds of 30,000 or 40,000 are not uncommon. The greater derives all his gains from the flesh, fat, and hides of his cattle. The milk and butter the latter rarely made, and of inferior quality) are here of little value. A great

slaughter of cattle (Matanza) takes place on each farm every year, and is followed by a feast. The sheep farms are mostly in the N. part of Mexico, and though often on a great scale, are in their husbandry very primitive and rude: the wool is coarse, and little care is bestowed on the sheep. The acquisition gives much less attention, it would seem, to their sheep and cattle, than to their breed of horses; which last, it is well-known, conducted not a little to the conquest of Mexico. Horses are now very numerous in Mexico, and the N. frontiers of that country, as well as the grassy plains of Texas, are frequented by immense droves of them, in a perfectly wild state. The Mexican horse is usually small but well made and hardy, sure-footed and extremely docile. Oxen and mules are the ordinary beasts of burden, while the horse is reserved for the middle. Mules are also numerous, and are, perhaps, faster than horses. Four or even six pairs are sometimes harnessed together in handsome equipages, 100,000 of them are said to be constantly employed by carriers and in the mines.

Manufactures and Foreign Trade.—The chief manufactures are sugar and rum, alone, wine, and brandy, earthen and stone ware, glass, paper, and the thread and tissues of cotton wool, and silk. Sugar and rum are made in numerous distilleries, but more especially in the states of Vera Cruz, Tlaxcala, Yucatan, Mexico, Queretaro, Michoacan and Guadalupe; the preparation of olive-oil employs 49 mills in the capital, in addition to those in Toluca, Toluca, Guanajuato, and Puebla, and wine and brandy are produced in considerable quantity only in Guanajuato, Coahuila, Lower California, Sonora, and Chihuahua, more especially the last the largest and best port wines are in Mexico, Guanajuato and Guadalupe, four glass works exist in the city, and others in the state of Mexico, and in that of Puebla paper both of coarser quality and also not inferior to the best papers of other countries, employs a number of mills in the states of Mexico, Puebla, and Jalisco: but owing to the scarcity of linen rags, is usually made of cotton or the fibrous part of the alce the spinning and weaving of cotton, in addition to numerous handlooms throughout the country, employ 62 factories, driven by machinery in the federal district, and the states of Coahuila, Durango, Jalisco, Mexico, Puebla, Queretaro and Vera Cruz the principal seats of the woollen manufacture are in the federal district, the states of Mexico, Queretaro, Sonora, and the territory of Tepic, in all of which broad-cloth, sumptuous, coarse, hanks, &c. are made of a price and quality enabling them to compete with similar articles imported. Silk, spun chiefly by the hand, but partly also by a machine driven by horses employs numerous persons in the states of Puebla and Guadalupe, but more especially in the capital where the quantity annually spun exceeds 40,000 lbs. the only silk goods worn within the Confederation are ribbons, and mantles called volanes, which, in Mexico, are considered an essential part of female dress. The only other manufactures deserving of notice, are gold and silver lace, oil-cloth, and decorative candles, for the making of which, a company with exclusive privileges, has recently been established. In 1817 the whole annual value of manufactured goods was estimated at £15,727,659 the progress since made is so great, that the value is (£1650) believed to be not less than £18,000,000 to £20,000,000 sterling. The foreign trade, as yet, is limited to the importation of manufactured goods and articles of first necessity, from Europe, Asia, and the American states, in return for gold and silver and a few natural products.

The following Table exhibits the extent of the chief imports from Great Britain —

QUANTITY OF BAYNET COTTON, SILK, LINEN, AND WOOLLEN MANUFACTURES IMPORTED INTO MEXICO, 1860-1 and 1863-4

Years.	Cotton Manufactures.			Silk, and Silk-Mixed Manufactures.	Linen, exclusive of Yarn.	Woollen, and Woollen-Mixed, exclusive of Yarn.
	Cotton, Yarn.	Cotton, Piece and Dyed.	Twist.

1863	55,757,071	—	512,130	24,125	250,799	309,701

Schollable Races Castes, &c.—The population of Mexico is composed, as in the other Spanish-American states, of three

distinct races—the aboriginal Indians or red men, as they are called, the Europeans or white men, and the Africans or Negro race, introduced as slaves by the Europeans. These, by intermixture, give rise to other denominations; but all may be classed, with reference to caste and color, as follows:—1. White men, who, if born in Spain were called *Chapetones*, or rather *Chachupines* (*Chachupin* means, in Aztec, a man on horseback, or rather a centaur—half-man, half-horse) and, if natives of America, of unadmixed European blood, are styled *Criollos* (*criollo*). 2. *Mestizos*, the progeny of a white father and a red or Indian mother. 3. *Mulattoes*, from the union of the white and Negro races. 4. The Indians or red race, of various distinct tribes. 5. *Zambos*, resulting from the mixture of the Indian and Negro races, and, 6. The African Negro, the unadmixed offspring of this race, born in America, are called *Chinos*. The distinctions of breed and color were formerly estimated with much anxiety, but they have now lost their importance, the privilege of caste being altogether abolished. It is difficult, at the present day, to define the exact limits of either the white or the red race, as, according to purity of blood, but it is quite certain that the latter constitutes the great majority of the Mexican population. It is probable that four-sevenths of the nation are Indians, and two-sevenths of mixed origin. The remaining one-seventh being *Criollos* and Negroes or *Chinos*, who are, together, but a handful.

It has been said that five-and-thirty distinct languages are spoken, by the Indian tribes, within the limits of Mexico. But distinct as these tribes may be in language, manners, and even in physical characters, they still have certain points of general resemblance which seem to prove that, at some remote period, they all issued from one common stock. The most widely-spread Indian language in Mexico is, as might be expected, that of the most civilized nation the Aztecs, which, including the dialects spoken by the Toluca, Chichimeca, &c. extends through several degrees of latitude. The Mexican Indian has the general physical characteristics of the indigenous American. He is well made and muscular, capable of supporting great fatigue, and attains a great age, unbroken by infirmities. In ordinary habits, he is temperate and simple. His variety tastes animal food, maize, &c. in the low regions, banana, and bean, with the fava, the pulse, constitute his subsistence. The dwellings of the Indians vary with the climate. In the temperate regions, on the coast, the Indian hut made of cane and palm-leaves, resembles a great bird cage. Higher up, where timber is abundant and shelter acceptable, it takes the form rather of a Swiss or Swedish loghouse: but in the cold region, on the table-land it is built of sun-dried bricks, with a well-closed timber roof. In all cases the plan is the simplest possible—a single room, sometimes divided into two by a neat partition. The Mexican Indian is habitually grave and taciturn. He can labour, but not with large views, or for a distant object; he can improve but slowly for reason weighs lightly with him against habit. His way of life seems like a narrow path in the dark woods: his imagination never opens to him a brighter scene, and his only escape from the oppressive shade is by intoxication. Many Indian families in Oajaca, Michoacan, and Puebla, have risen to opulence by the cultivation of the agave for pulque, or by rearing the cochineal.

The *Mestizos* constitute the majority of the coloured population, they have a pleasing appearance, and are inclined, the women particularly to coquetry. In character they are much more gentle than the Mulattoes, whose passions are sometimes dangerous or violent. The *Bambos* and Negroes occupy chiefly the sea-coast and low regions, the climate of which they alone can support. The soil trade and hazard of their position, the very slight moral influences and restraints under which they grow up, may perhaps help to explain the bad reputation of the *Bambos*, who are said to be generally vicious, treacherous, and malignant. The Mexican *Criollo* is distinguishable externally from the true Spaniard by his general meanness and hard features, in character and dis-

positions he varies little from the primitive world, and still exhibits all the pride, frankness, courtesy, and hospitality of his forefathers. The fashions and dress of the country, as well as its political constitution, have undergone a total revolution within the last quarter of a century. Formerly the men wore small jackets, loose trousers, lace-boots, and low-crowned, broad-brimmed hats, with the tops or ample dark-coloured cloak. At the present day, the better classes adopt the fashions of Paris and London, retaining of their primitive costume nothing but the serape. The ladies still go to church in the old attire—black silk gowns and the mantilla or shawl veil, which covers the head, and hangs down over the back and shoulders; elsewhere, they yield to the smothering influences of French millinery, and the only European articles of female dress as yet obstinately rejected by them, are hats and bonnets. The middle, lower, and coloured classes (Poblanas) of the population adhere much more steadfastly to the showy ancient costume; fine dress indeed, seems to be their ruling passion, and their only ambition is to shine in bright silks and lace veils, covered with gold and silver fringes, and roses of precious stones. The Ranchero, or small farmer owns or hires a few acres, on which he cultivates his corn and grazes his cattle. He is a person of lofty thoughts and aspirations—a devoted patriot, a staunch fighter in all the revolutions wherever guerrillas are required, a hard rider, and a capital boom-companion. He is an Arab in his habits, and especially in his love and management of the horse. Dressed in his leather trousers and jerkin with his serape over his shoulders, his broad-brimmed and silver-corded sombrero on his head his heels armed with spurs, having three inch revolvers and, provided with his sword and gun, the Ranchero is ready to traverse the republic for months. The dwellings of the upper orders are generally well built of stone, not handsome but on a good scale and well adapted to the climate. At table also, they are simple and temperate. Besides their love of pompous display the passion which most sways them is that of gaming in which all classes indulge. Monte is the universal game but many devote their whole souls to cock fight-

MEXICAN FOGANAS

From *Sketches*, by George Thompson at Anthropological Museum in Mexico.

ing, to which the English have lately added, near the capital, horse-racing also. It is to gaming that we must ascribe the great number of violent deaths or murders, as they might be called, which take place in the Mexican cities: 150 is said to be the annual number in Mexico, 250 in Oaxaca. It needs hardly to be stated, that education is in a very low condition in Mexico, and that the science and learning of the Mexican

retains, like his household furniture, much of the fashion of the 16th century.

Antiquities.—We may briefly state that it is perfectly ascertained that powerful, and, for the most part, kindred tribes,

SEEK HAD RANCHERO.—From *Sketch*

descended on Mexico, from the N. from the seventh to the twelfth centuries the Toltecs arriving at the former and the Aztecs at the latter period. It is certain that these nations had attained to a high degree of civilization, they were good smiths, good masons, had made some advances in the arts of design, they raised great edifices, constructed vast works, palaces, pyramids, roads, aqueducts, bridges, &c. they had a more accurate calendar, and one better adjusted by meteorology, than the Egyptians, Greeks, and Romans, and finally, they had a system of picture-writing by means of which they recorded many facts, and which, if it had not been rudely and utterly demolished, would have probably led them on rapidly in the career of improvement. Attempts have been made to trace the origin of these arts to Siberia, China, Japan, or Egypt. But from whatever quarter the people may have originally come, there seems little doubt that their civilization was developed in the New World. In comparing their habits and accomplishments with those of the inhabitants of the Old World, the differences are far more strongly marked than the affinities. Their ignorance of the cereal grains, of milk, and of pastoral pursuits, draws a broad line between the civilization of Mexico and that of Asia. The monuments which remain to attest their boldness of design and progress in the arts of construction are widely scattered and there is reason to suspect that they are as yet but imperfectly brought to light. It will be sufficient here to mention the extensive remains of the city of Teotihuacan, near the modern Mexico, with its disks, aqueducts, and fragments of a bridge. Oaxaca is rich in ancient remains, among which the chief are the palace and pyramid of the Zapotecas at Mitla. Another great pyramid or *teocalli* is to be seen near Cholula, in Puebla. Near Villanueva, in Zacatecas, are the extensive and remarkable ruins known as Las Edificios. In Vera Cruz are the pyramids of Papantla, built of colossal masses of porphyry. The extensive ruins of Palenque, in Chiapas, are well known, but they have been eclipsed by those of Itzamal, in Yucatan, more recently discovered, and which seem to indicate a style of art distinct in some respects from the ordinary Mexican.

Government and History.—The government of Mexico being still in a state of transition, may be sufficiently described in our account of the events connected with the revolution. When Napoleon overthrew the Spanish throne, Mexico remained firm in her allegiance but when he was defeated, and the restored Spanish monarch promised his people a constitution, then discontent arose in the colonies. Used to obey

the king, they could not submit to be ruled by a Spanish Cortes. They were willing to have a Bourbon as king of Mexico, but all parties were adverse to the union with Spain. The first anti-constitutional effort, in 1810, was chiefly fomented by the clergy. In 1820, the viceroy, Apodaca, received orders to proclaim the constitution of 1812 himself aware to the measure, he sent Colonel Iturbide, apparently on an expedition against the rebel Guerrero, but really to sound the wishes of the people. Iturbide, however, joined Guerrero, and raised the standard of revolt. Apodaca was deposed, and the views of the insurgents were proclaimed, namely that Mexico should form a constitutional monarchy, independent of Spain. The crown was offered to a Spanish prince, but the proposal being at once rejected by the Spanish Cortes, the Mexican Cortes proceeded to carry out their scheme of national independence and in May 1823, elected their general and president, Don Augustin Iturbide, Emperor of Mexico, by the title of Augustin I. The new monarch, however, soon showed his distaste for constitutional government, and consequently, before the year was round, the country bristled with arms, the chief officers, Santa Anna among the number, revolting, and demanding the re-opening of the Cortes. Iturbide yielded, abdicated and left the country in April 1823. The experiment of a monarchy having failed, the plan was now tried of a federal republic, copied in many particulars, from that of the U. States, the main principles of its constitution being—the independence of Mexico, the abolition of the R. Catholic religion, the abolition of all distinctions of caste, and the division of the powers of government into three branches—the legislative, executive, and judicial. This scheme, though it encountered much opposition, was ultimately adopted in February, 1824. The first president was General Guadalupe Victoria. The federal state were 19 with five territories. The distinction between a state and territory consisting in the former having, the latter wanting, the amount of population entitled to be represented in Congress. This constitution, though copied, as said above, in many particulars from that of the U. States, deviated from that model in one or two important points. It established an exclusive religion, resulting from the abuse where which the clergy had all along taken in the revolution and it omitted to make judicial proceedings public, and to use the intervention of a jury. It abolished slavery however and, being followed up by measures calculated to facilitate the naturalization of strangers, and to promote education it effected at once a prodigious improvement in the condition of the community. For the next ten years Mexico was the sport of the solitary and intriguing guerrilla, until, in 1835 Santa Anna, who had distinguished himself, in 1829 by defeating, at Vera Cruz, an invading body of Spaniards, changed the federal into a central republic. Hard pressed by his rival, Bustamante, he seems to have felt little scruple as to the means by which he could obtain power. In the meantime, the distant provinces showed an inclination to push too far the principle of independence. Yucatan was disaffected, Texas, filled with adventurers from the U. States, revolted, and established its independence by a victory, in which the Mexican general, Santa Anna, was taken prisoner. This successful revolt of Texas was an event pregnant with important consequences in ten years more this new state was annexed to the Union of the U. States then came the long wished for and pro-nounced war of the latter with Mexico, which was concluded in February 1848, by Mexico yielding to the U. States about 530,000 sq. m. of territory, namely, New Mexico, Upper California, and those parts of Tamaulipas, Chihuahua, and Coahuila which lie E. of the Rio-Grande-del-Norte. The country was under a dictator from 1841 till 1844, and

in the latter year, the government reverted again to that of a central republic, which it continued to be till 1845, when it became a second time a federal republic. Though the country be still (1858) as it has long been, in an unsettled state, this form of government is still maintained. The army consists of 8909 men, and the navy of a single vessel, lying at Vera Cruz.—[Alex. von Humboldt, *Political Essay on New Spain*, 1811; H. G. Ward *Mexico in 1827*; do. *Capit. MEXICO, or MEXICO (*from Tezcucotlan*) a city, N. America, cap. above confederation and state of same name, beautifully situated in a vast plain, 7400 ft. above the sea, enclosed by lofty mountains and covered with broad meadows and lakes lat. 19° 26' 45" N., lon 98° 5' 7" W. (c). When taken by Cortes, in 1519, Mexico stood on several islands in Lake Texcoco and was approached by four great causeways, which stretched through the lake, and met in the center of the city. Owing to the drainage and more rapid evaporation produced by the removal of the forests and other causes, the lake has dwindled and the present city, though occupying the same site, is now about 2½ m. from its shores. The district was therefore very different from that which Cortes has rapturously described, but still continues to strike all travellers with admiration. This admiration is not diminished, but rather increased, by a nearer approach. The city is built, with the utmost regularity in the form of a square, is enclosed by lofty walls, and consists of a great number of spacious streets, either parallel or at right angles to each other forming a series of square blocks of measure and uniform structure, and leading to a central square, which covers an area of from 12 to 15 acres, and is lined with public edifices of the most imposing description. The houses are almost all built of hewn stone, in a very pure style of architecture are three or four stories in height, have flat terraced roofs, and are often not only provided with iron balustrades and gates ornamented with bronze, but covered with porcelain mosaic, of elegant patterns. The streets are well paved but often badly cleaned and being neither lighted

THE GREAT SQUARE AND CATHEDRAL, MEXICO.—From *Rept.*

nor watched, become unsafe for night passengers. The most remarkable edifice is the cathedral, built on the site of the great temple, or pyramid temple of the Aztecs and occupying one entire side of the central square. It is 600 ft. long, by 450 ft. wide, and, though not in strict conformity with any order of architecture, is remarkably imposing. The walls

are built of massive basalt, but the front is covered over with the most laborious carving, while lofty towers rise up against the wall for the support of its two lofty towers. The interior is gorgeous, almost beyond description, though the decorations are more remarkable for coarseness than for taste. The choir is formed of rare carved woods, and elaborately covered with gilded images of the high altar, raised from the floor, on an elevated platform, exhibits a profusion of candlesticks, crosses, and other ornaments of solid gold or silver, and is crowned by an image of the Virgin, decked in jewels, estimated at the value of more than half a million sterling; and all the other parts of the church are a perfect wilderness of columns, statues, shrines, fonts, &c. Another side of the great square is occupied by the national palace, the residence formerly of the viceroys, and now of the president. It stands on the site of the palace of Azayacatl in which Cortes was lodged by Moctezuma, and is a quadrangular pile, of such enormous dimensions, that, besides accommodating the president and his family, it contains the principal government offices, the supreme court, the chamber of deputies, and that of the senate.

Both these chambers the only parts of the interior particularly deserving notice, are very elegant. In the S.E. corner of the square, opposite the principal front of the cathedral, is the Casa Municipal or townhouse, partly occupied as an exchange. Immediately E. of the national palace, but without the square, is the university, which contains the national museum, and has in its front, a magnificent modern market. At some distance W. of the square is the *Mineria*, or school of mines, which occupies one of the most elegant edifices of the city, and in which lectures on the sciences connected with mining are occasionally given. Ascribed to it is a tolerably good mineral museum. In addition to the cathedral Mexico contains from 20 to 60 churches and convents, few of them remarkable for architectural merit, but most of them possessed of considerable riches and ostentatiously set off by gaudy decorations. One of the most elegant of the churches, is that of San Domingo, a light and airy structure, surmounted by a spire and dome, but somewhat injured in its effect by the proximity of the Inquisition. The antiquities of Mexico might naturally be expected to present objects of the greatest interest, but almost all of these have either perished or been removed from their original sites, and can now only be seen in the fragments collected within the national museum. The other edifices and objects particularly deserving of notice are the convents of St. Francisco, St. Augustine, and La Merced, all of them large and imposing structures, with numerous apses and cupolas, and the last particularly admired for the elegance of its interior; the magnificent aqueducts by which the city is supplied with water; the public fountains, the colossal equestrian statue of Charles IV. in the courtyard of the university, the *alcaldia* or public prison, a large and substantial structure, the theatre, of considerable dimensions but devoid of architectural merit; the Plaza de Toros, a large circular enclosure for bull fights, with accommodation for about 8000 spectators; two magnificent *pasajes*, or promenades—the one Paseo Nuevo, to the W. of the city, consisting of a broad avenue, shaded by rows of stately trees, and broken at intervals by fountains—the other the Paseo de la Viga, on the opposite side of the city, skirting one of the canals leading to the Lake of Chalco and very tastefully laid out, and the Alameda, a park of 10 or 12 *as*, formed into labyrinth by magnificent forest-trees, and the great place of public resort, particularly on festivals, when its carriage-ways become thronged by gay equipages, and from 8000 to 10 000 persons of all classes often crowd its walks. The manufactures, of comparatively limited extent, include gold and silver lace, jewellery and silversmith's work, woollen cloths, blankets, baize, cotton goods, hats, soap, liquors, carriages, and tobacco, the trade is also very limited, the exports being confined almost entirely to the produce of the mines, while the imports are chiefly manufactured goods from Europe, and silk goods, especially hosiery, from China. Mexico, originally Tenochtitlan, is said to have been founded in 1325, and occupied as already stated several islands of Lake Texcoco, to which access was given by broad causeways. When first visited by the Spaniards, they were so struck with its magnificence, that their powers of description appear to have been baffled, and their language naturally assumes the form of hyperbole. But they had not long be-

come masters, before their tyranny, and the opposition which it excited, brought all the miseries of war upon the city, and almost all its ancient splendid disappearances. A new city, however, soon arose, under the genius and indefatigable perseverance of Cortes, and numerous edifices, varying in magnificence with the most celebrated structures of the old world, rose up as if by magic in every quarter. The lowness of the site, compared with the level of the surrounding lake, was a serious obstacle to its prosperity, exposing it not only to pestilential vapours, but to inundations, which caused fearful ravages. The additional evaporation, caused by the removal of the forests so far resembled the evil, by curtailing the dimensions of the lake, but it was found necessary to adopt a more artificial process, and, by means of an immense cut through the solid rock, 12 m. in length 150 ft. deep, and 800 ft. wide, commenced in 1603, and completed in 1789, the waters of several lakes adjoining, which, from occupying a higher level than Texcoco discharged themselves into it, and often raised its level so as to threaten a complete submergence of the city were diverted into the Pantano which carries them directly to the Gulf of Mexico. The important events which have since taken place, having not more to do with the history of the city as that of the Confederation. Pop. 170,000.

—THE STATE OF MEXICO, situated between lat. 19° 24' and 21° 47' N., lon. 102° 37' and 109° 27' W. is bounded N. by Queretaro, E. Vera Cruz, E. Puebla S. and S.W. the Pacific, and W. Michoacan, greatest length, N. to S., 320 m. greatest breadth, 330 m. area, 18,535 sq m. More than two-thirds of the surface are covered by mountains, resting on a plateau which has a height of 6500 to 7500 ft. above sea-level. The culminating point, Nevado de Toluca, has an absolute height of 14,566 ft. Pop. 978,687. —THE FEDERAL DISTRICT OF MEXICO comprehends the N. part of the state and the immediate environs of the city. Area, 89 sq m. Pop. 200,000.

MEXICO (GULF OF) a large indentation E. coast, N. America, washing the shores of Mexico and the U. States, measuring about 1000 m. E. to W. and 800 m. N. to S. estimated area 800 000 sq m. It is partly formed by the projection towards each other of the peninsulas of Florida and Yucatan nearly in a line between which lies the island of Cuba, leaving a communication on its N. with the Atlantic through the Florida Channel, and on its S. with the Caribbean Sea, through the Channel of Yucatan. The gulf is free from banks, and contains only a few small rocky islands on the coasts of Yucatan with the Florida reef near its E. extremity. The shores are low and generally lined with flat sandy islands, not far from the land and numerous lagoons. There are few harbours, and the rivers which fall into it are obstructed by bars at their mouth, which render them all except the Mississippi nearly inaccessible for vessels of large draught. A current of water entering the gulf from the Caribbean Sea, is soon divided into two portions, the one running E. along the coast of Cuba, the other W. in a curved line through the middle of the gulf, round towards the Florida Channel, where it meets the other current, and the two united form the Gulf Stream (see ATLANTIC). The temperature of the Gulf of Mexico is 86 in summer or 6 higher than that of the ocean in the same parallel. At high tide the Pacific raises several feet above the level of the gulf, and at low water it falls as far below it.

MEXICO (NEW), a territory of the U. States of America; lat. 33° to 38° N. lon. 108° to 115° W. bounded, N. by the territory of Utah, N.E. unsettled territories, E. and S.E. Texas, S. the Mexican states Chihuahua and Sonora, and W. Upper California. greatest length, E. to W., 730 m., greatest breadth, 417 m. area, 310 744 sq m. The surface is generally mountainous being traversed from N. to S. by the Rocky Mountains, which form its principal watershed, and divide it into two great basins—the one on the E., drained chiefly by the Rio-Grande del Norte and its affluents, and the other on the W., drained in like manner directly and indirectly by the Colorado. A small portion of the N.E. belongs to the basin of the Mississippi. The W. portion is very imperfectly known, but is understood to be, for the most part, sandy and sterile, and destitute, not only of trees, but almost of vegetation, except along the banks of the streams. The most important of these, next to the Colorado, is the affluent the Gila, forming the S. frontier, but along its whole line, few spots are seen susceptible of agricultural improvement.

The E. portion, forming what was long exclusively known by the name of *Mer de l'Inde*, is better known, and has a much more attractive appearance. It consists chiefly of a central valley extending across the whole territory, from N to S, with an average breadth of 50 m., traversed by the Rio-Grande, and bounded on either by the main chain, or by ramifications of the Rocky Mountains, among which are the Sierra de los Mirabres on the W and the Sierra Blanca on the E. To the S. of the town of Santa Fé they average from 9000 to 8000 ft. high, but in the vicinity of the town, and N of it, some snowy peaks are seen, rising to the height of 10,000 or 12,000 ft. They are composed chiefly of granite, sienite, basalt, &c., and are said to be highly metalliferous. The higher ranges are covered, in many places, with pine forests; and the lower with cedars and occasional oaks. The climate, though differing widely in the mountainous districts and in the low valleys, is generally temperate, equable, and salubrious. In some of the more confined valleys, however, the summer heat often rises to 100°, and in the mountains, the winter is both long and severe. The sky is almost always clear and dry. The soil is generally sandy, and looks poor, but when irrigated, produces abundant crops of Indian corn, wheat, and pulses. Fruits, also, are abundant, and the vine is largely and successfully cultivated. Considerable attention is paid to the rearing of cattle, and many of the inhabitants possess large flocks and herds. For administrative purposes, the territory is divided into seven counties, of which that of Santa Fé is the capital. It first became known to the Spaniards in 1581, and was formally taken possession of in 1598. It remained with them till 1848, when the U. States obtained the cession of it as one of the results of the Mexican war. In 1850, it was erected into a territory with its present limits. Pop. (1850) 61,505, exclusive of independent Indian tribes, roughly estimated to amount to an additional 36,000.

MEXIMIEUX, a tn. France, dep. Aisne, agreeably situated on an escarpment, near r. bank Aisne, 23 m. S. Bourges. It contains a secondary ecclesiastical school. Pop. 1676.

MELNBERG, a tn. Prussia, prov. Brandenburg, gov. and 75 m. N.W. Potsdam. It is walled, and has a church, and a trade in cattle. Pop. 1607.

MELTBY, a tn. Switzerland. See **MAHRELD**.

MEYGEN, a vil. and com. Belgium, prov. E. Flanders, 9 m. W. Ghent, with two distilleries, and an oil and a flour mill. Pop. 1314.

MEYMAC, a tn. France, dep. Corrèze, 25 m. N.N.E. Tulle, with an ancient church, a well-managed hospital, manufactures of muskets, and some trade in horses, mules, and cattle. Pop. 1845.

MEYMEED, or **MIR OMED**, a tn. Persia, prov. Khorasan, 45 m. N.W. Ashkezar, lat. 36° 55' N., on the high road between Tishren and Meshed.

MEYOV, or **MERO**, an uninhabited m. Indian Archipelago, Malacca Passage, between Gilolo and Celebes; lat. 1° 12' N., lon. 126° 39' E. It is high but of even appearance.

MEYRINGBEN, Switzerland. See **MERRINGER**.

MEYRLEIS, a tn. France, dep. Lozère, r. bank Yonne 24 m. S.W. Mende, with manufactures of common hats, Iarn lace, thread, canvas, wool, corn, cheese, &c. Pop. 1878.

MEYSEL, a vil. and com. Belgium, prov. Brabant, 6 m. N.W. Brussels, with a distillery, a brewery, two mills, and a trade in agricultural produce. Pop. 2376.

MEZAFRIO, a tn. and par. Portugal, prov. Trás-os-Montes, 13 m. S.W. Vila Real, near the Douro. P. 1170.

MEZE (Latin, *Messa*), a tn. France, dep. Hérault, on the lagoons of Thau, 18 m. S.E. Montpellier. It has an old abbey with its church still in good preservation, a small harbor for vessels from 40 to 60 tons, well sheltered, and defended from the winds by moles in the form of a half moon, manufactures of salt, obtained from the salt marshes, liquors, and distilleries and a trade in corn, wine, honey, salt, &c. The situation in commerce is valuable. Pop. 4334.

MEZENAC (Mount), France. See **CAUVENAC**.

MEZERIE, a tn. and river, Russia. See **MAMER**.

MEZIERES (Latin, *Mosera*, *Mosierensis*), a tn. France, dep. Ardennes, r. bank Meuse, opposite to Charleville, with which it communicates by a suspension-bridge, 126 m. N.E. Paris. It stands on a tongue of land formed by the

river, which washes it on two sides, and ranks as a fortress of the second class. Being walled, defended by a citadel, and otherwise strongly fortified by Vauban. It has a town-hall, prefecture, infantry and church, manufactures of ironmongery, cutlery and leather, and a trade in leather, serge, hosiery linen &c. Metziers, under Chevalier Bayard with a handful of men, resisted Charles V. when in 1521 he attacked it with an army of 40,000. The Allies besieged and took it, in 1815 after Waterloo. Pop. (1852) 3926.

MEZIN (Latin, *Messum*), a tn. France, dep. Lot-et-Garonne, r. bank Garonne, 20 m. S.W. Agen. It is, on the whole, not well built, has an ancient church, manufactures of corals and earthenware, tanneries, a paper and numerous flour mills. Pop. 2051.

MEZINGEV, a tn. Wurtemberg. See **METZGER**.

MEZO, numerous places, Hungary, particularly — 1. (Barany), a vil. co. Dukes, 57 m. N.E. Segedin, with a Protestant gymnasium. Inhabitants chiefly employed in vine and olive culture and rearing cattle. Pop. 7900.—2. (Csege), a vil. Transylvania, co. Thorenburg, with a church. P. 1643.—3. (Zegyes), a vil. Thier-Thomas co. Landed 89 m. E. by N. Segedin. It has one of the most important military stores in Hungary, and in the first four years of the war which broke out on the first French revolution, furnished 80,000 horses to the army.—4. (Kecses), See **KOVACS** (Mezo)—5. (Terny), a vil. Thier-Thomas co. Szathmar, with a church, and baths. Pop. 1230.—6. (Tuz), See **TUN** (Mezo).

MEZQUITA (San Marcos), a tn. and com. Spain, Galicia, prov. and about 50 m. from Orense, with a church, townhouse, ancient palace, primary school, custom house, manufactures of linen, and a trade in cattle and agricultural produce. Pop. 3380.

MEZRICHEL, a vil. Bohemia, circle and 16 m. from Kungratz, with a church and a mill. Pop. 1035.

MEZANA-BIALI, a vil. and com. kunged of Italy, Piedmont, div. Novara, prov. Lomellina, l. bank Po, with a church, a public school, and a trade in corn, rice, and timber. P. 2547.

MEZANA MURMUKO, a vil. and com. Kingdom of Italy, Piedmont, div. Turin, prov. and about 18 m. from Biella, with a very ancient church, and a trade in wine and chestnuts. Pop. 3907.

MEZANIGO, a vil. and com. Italy, Piedmont, div. Genova, prov. Chiavari, 3 m. from Dorsanico, near the Stura, with four churches and a trade in dairy produce and oak timber. Pop. 2340.

MEZGANI (I), a vil. and com. dusky and 14 m. N.N.E. Paris, in a fertile corn and wine district, with a school. Pop. 3970.

MEZGANINO, a vil. and com. Kingdom of Italy, Piedmont, div. Alexandria, prov. and near Voghera, r. bank Po. It has a handsome church, and a trade in corn and fruit. Pop. 1769.

MEZTNIFF, a vil. and com. Italy, Piedmont, div. N.W. Turin, in the valley of Lanzo, near the Stura, here crossed by two wooden bridges. It has two churches and manufactures of articles in iron, iron-munies, and limestone quarries. Pop. 2502.

MEZO or **LOREN**, an lak Austria, coast of Delmatia, about 7 m. N.W. Ragusa, 8 m. long by 2 m. broad, tolerably fertile, producing wine and oil. It has a church and two monasteries. It was taken by the British in 1815, and continued in their possession till 1818.

MEZOTURJO, a tn. Boly, prov. and about 21 m. S. Palermo, inhabited by Arants. Near it both saiper and plaster are found.

MEZOLOMBAYDO, a market in Austria, Tyrol, circle and 16 m. from Trent, cap. dist. with a church and a castle, a Franciscan monastery, and a trade in fruit. Pop. 2318. dist. 15,189.

MEZOVGO, or **METROVO**.—1. A tn. European Turkey, prov. Albania, majlis, and 28 m. N.E. Janina, l. bank Arta, in a chain of the Grammos Mountains, which forms one of the most important passes between Macedonia and Albania. It stands nearly 8000 ft. above sea-level, and consists of about 1000 houses; it has some woollen manufactures, and a trade in wine.—2. The culminating point of Pindus (which see).

MGLIN, a tn. Russia, gov. and 180 m. N.E. Oostrogov, cap. dist. It is one of the best towns in the government, has four churches, and a considerable trade in agricultural

produce, particularly hemp. Pop. (1849), 6327. — The climate is low and undulating, and well covered with wood.

MAHAR, a Hindoostan, presid. Bombay, in the Concan, 1 bank Mahar or Kantoora, here navigable, 25 m. S. by W Bombay, lat. 18° N. lon. 73° 30' E., at the foot of a principal pass in the Ghats.

MHEYREUR, a Hindoostan, presid. Bengal, prov. Malwa, 1 bank Nerbudda, here about 1500 ft wide lat. 23° 30' N. lon. 75° 32' E., 78 m. S. by W Ojawa. It consists of two wide streets, intersecting each other at right angles, paved with stone. At the W end is a fort, 80 ft. to 100 ft. above the surface of the river with the margin of which it communicates by one of the finest ranges of Ghats in Hindoostan. Within the fort are several Hindoo temples, and a palace.

MHOW, a river, several m. Hindoostan, presid. Bengal — 1, Prov. Malwa, 10 m. S. Indore, 2019 ft. above sea-level lat. 22° 35' N. lon. 75° 50' E. It is an important military cantonment, and contains a barracks and fort — 2, Prov. Allahabad, 68 m. S.E. Benares lat. 25° 01' N. lon. 83° 37' E. formerly a place of considerable trade — 3, Prov. Allahabad, near 1 bank Beland, 78 m. S.W. Benares lat. 24° 37' N. lon. 81° 56' E. — 4, Bundelcond 170 m. W by S. Allahabad lat. 25° 20' N. lon. 79° 7' E.

MHYE a large river Hindoostan. It rises in the Vindhya Mountains, prov. Malwa, about 60 m. W by S. Indore lat. 23° 30' N. lon. 75° E., flows N.W. for about 100 m., to lat. 23° 50', where it bends round to S.W. and falls into the Arabian Sea near the head of the Gulf of Cambay 21 m. W Baroda, lat. 23° 20' N. total course, about 260 m.

MIAO, or **MLAO**, a river, Japan, rd. Nippon in an extensive plain, on the Yedo-gawa. lat. 35° N. lon. 135° 40' E. the residence of the Mikado or imperial emperor the seat of his diet or court, and hence the constitutional capital of the empire. It does not, however, equal Yedo in size, where the Shogun or military emperor holds his court. It is about 4 m. long, and 5 m. broad, and is esteemed the paradise of the empire not merely for its delightful situation and construction for it abounds in exquisitely laid-out gardens, palaces, and temples, but for the surpassing beauty of its woods. The houses, which are, for the most part, built of wood plastered with lime and clay, do not exceed two stories in height, and are formed into long and narrow but regular lines of street. Miao is the centre of the learning and science of Japan — by the greater portion of all the works published in the empire emanating from the daim, which is regarded as the principal college, not simply for the study of theology, but for all the various branches of literature, and in many features, no place in Japan can rival Miao carved ornaments Japanese vases, and other articles, being made here of a kind and quality far superior to anything that is allowed to be exported to Europe. Every house in the city has a storehouse attached to it, well provided with these objects of manufacture. Pop. estimated about 600,000.

MIAJADAR, a vil. Spain, Extremadura, prov. and 32 m. S.E. Caceres with narrow streets, a townhouse, prison, five schools, a church, of noble architecture, but in part ruinous and several hermitages, four tanneries, an oil and various flour mills, and agriculture and cattle-rearing. Pop. 2465.

MIANA a vil. Persia, prov. Azerbaijan 1 bank Karangoo or Kila, 80 m. S.E. Teheran lat. 37° 30' N. lon. 49° 40' E. It is a miserable place, of 650 or 700 houses infested by a poisonous bug respecting the deadly effect of whose bite many exaggerated statements have been made.

MIARINO or **MIARVO**, a vil. and town Italy Piedmont div. Novara, S. shore Lake, and a little E. the town of Orta, with a church, and a small college or seminary. Pop. 1025.

MIAVA, a vil. Hungary Hither Danube, co. Temes, on a river of the same name, 45 m. N. N.E. Pressburg. It has a church, chapel, and synagogue, manufactures of linen, and oil, corn, and many mills. A little coal is worked in the neighbourhood. Pop. 8000.

MICHAEL, or **MICHOE** (Sar) an isl. Portugal, in the Atlantic, the largest of the Azores lat. (E. point) 37° 49' 18" N. lon. 25° 6' 15" W. (a.) greatest length, E.N.E. to W.S.W., about 45 m. greatest breadth, about 13 m. At a distance, it presents an elevated, rugged, and barren appearance but, when nearly approached, is seen to contain numerous valleys, covered with rich vegetation. Like almost all the other

islands of the group, it is evidently of volcanic formation, and has frequently, in early and more recent times, proved the tremendous activity of its volcanic agency. None of the rocks are primitive, but conglomerates prevail to a considerable extent. The far greater part of the island is composed of volcanic matters, basalt, tuff, pumice, and cinders and thermal springs are numerous. Most of the loftier summits are evidently craters. The culminating point, said to be Mafra, is estimated by Boyd at not more than 4000 ft., though others make it much higher. The other most conspicuous heights are Pico do Fogo, and Pico do Varra. The soil on the higher slopes is thin, and suffers so much from drought as often to have a very parched and barren appearance, but, in the lower valleys, where, to the natural fertility of decomposed lava the benefits of irrigation are added, vegetation becomes most luxuriant, and almost tropical.

The culture is unskilful and careless in the extreme, two abundant crops, chiefly of wheat, maize, and pulses, are annually raised, and a surplus of grain, to the amount of about 40,000 quarters, remains for export. But the products for which St. Michael is most famed, and from which it derives its largest source of revenue, are oranges and lemons, of which 120,000 boxes are annually exported. At the shipping season it is not uncommon to see from 70 to 80 vessels lying in the roads to be laden with them. The vine also is extensively cultivated but the produce though said to be excellent is all consumed on the island. The sugar-cane thrives well and yielded excellent returns, till its growth was discouraged as interfering with the produce of Brazil. Melons and bananas, of excellent quality are very abundant the latter, however only in low, sheltered spots, particularly in the S. Among domestic animals, sheep and goats are very numerous the sea is almost the only beast of burden. Fish abound along the coast, but the fisheries, which might be very productive are neglected. The inhabitants are humane and hospitable, but extremely indolent and voluptuous. For administrative purposes, St. Michael is divided into three districts — Ponta Delgado, the capital Ribeira Grande, and Villa Franca. Pop. 80,000. — (Boyd's Azores &c.)

MICHAEL par. Isle of Man. Pop. 1410.

MICHAEL (Str.) several par. England — 1 Derby 11040 ac. P. 500 ac. P. 5075. Here 1000 ad. P. 2248-4 (Lancashire), Cornwall, 870 ac. P. 191 — 5 Church, St., Somerset 43 ac. MICHAEL'S MOUNT (Str.), a remarkable conical rock England, on Cornwall on the N.W. side of Mounts Bay, opposite to the town of Marazion lat. 50° 7' N. lon. 5° 28' 30" W. (a.) It is the ancient Cornish of Ptolemy and consists of a vast mass of granite protruding through solution rocks, and rising gradually from a base nearly 1 m. in extent, till it attains a height of 350 ft. It is connected with the mainland by an isthmus, which is dry at low but covered at high water. Its surface is extremely rugged and large overhanging masses are seen as if threatening to precipitate themselves into the sea. Its summit is crowned by a castle or fortified monastery which has been repaired and fitted up for residence, and at its base is a village, with a lighthouse, at which copper-ore, china clay, and plumbago, are exported. The mount is defended by three batteries, mounting 18 guns.

MICHAEL CHURCH on Axor, prov. Wales, Radnor, 1986 ac. Pop. 155.

MICHAELIS (Str.), a vil. Saxony circle Dresden ball and near Freiberg inhabitants chiefly employed in its neighbouring mines. Pop. 1886.

MICHEL (Str.), numerous places, France, particularly — 1 (de-Frere), A. n. dep. Vendée, on the canal of Fontenelle 24 m. S.E. Bourbon Vendée. It has a small harbour for

vessels of 30 to 40 tons, and some trade in corn and beans. P 1741 -2 (see *Thürschke* or *Beckford*), A. in. and com., dep. Alsace, 7 m W Vervins with manufactures of embroidered tulle and near it a malleable iron-works. Pop. 2301.-3, (Mont-Maclos or *Mont-Moreau*), A. in. and com., dep. Vendée, 5 m from Fontenay-le-Comte with the majestic ruins of the Abbey de la Grainetière. Pop. 1217

MICHEL (Saxt) a vil. and com. Belgium, W Flanders, 2 m S. Bruges, with manufactures of linen, flour-mills, and a trade in corn and cattle. Pop. 1118

MICHEL MORT (Saxt), France. See *Mort St Michel*. MICHELSELBERG, a mining in Bohemia, circle and 29 m W N W Pilsen. L. bank Wunnschbach; with a church and a school a smelting furnace, a paper and several other mills. It was once the centre of very important mining operations. At present the produce is very limited, and is confined to a little silver, cobalt, lead, and antimony. Pop. 598

MICHELSDORF or MICHAELSDORF.-1 A vil Upper Austria, circle Traun 8 E Steier with a church, a powder mill, and manufactures of scythes. Pop. 2375 -2 A vil Bohemia, circle and 23 m. K. Chrást, with a church, a school and two mills. Pop. 1840

MICHELROMBACH a vil Hesse Cassel prov. Fulda, circle Hünfeld. It has a church, and three mills. Pop. 1001

MICHELSTADT a in Hesse-Darmstadt, prov. Starkenburg in the Obermainland, circle Minding, 30 m. S.E. Darmstadt. It has a church school manufactures of woollens, cottons, and leather, and an iron, worsted, and several other mills. Pop. 3004.

MICHIGAN, one of the northern U States lat. 41° 48' to 47° 30' N, long 82° 20' to 90° 10' W bounded, N by Lake Superior N.E. and E. Lake Huron S.E. a projecting portion of Upper Canada and Lake Erie, S. Ohio and Indiana W. Lake Michigan, and N.W. the Menominee and Montreal rivers separating it from Wisconsin, length 344 m. breadth 300 m. area, 60,042 sq. m. It consists of two separate peninsulas—one, on the N.W. washed on the N.E. and S. by Lakes Superior, Huron and Michigan—and the other on the S., washed on the W. by E. and by Lakes Michigan and Huron. The N.W. peninsula, occupying nearly a third of the whole surface is comparatively elevated, and presents a succession of mountains and lakes, plains, rivers, and forests. It has not been accurately surveyed, but it is not understood to possess much agricultural value. Along its E. and R.E. shores, as far W. as Point Detroit the only rock which becomes visible in low-tide, accompanied with the usual indications of gypsum and saline springs. In the interior are extensive sand plains, almost sterile but relieved by tracts of spruce and sugar-maple forests. The latter tree is particularly abundant, and enables the natives to provide them selves with ample supplies of sugar. Few tracts can boast of being better watered. Numerous minor lakes are scattered over the interior about 40 large and 60 small streams discharge themselves upon its shores and a coal-line, estimated at 720 m., with several large bays and excellent harbours affords unusual facilities for navigation. The poverty of the soil is also compensated by the mineral treasures beneath it. Copper of the finest quality abounds in the neighbourhood of Lake Superior and large masses of native copper are often found in the river beds. The surface of the S. peninsula is so level that few elevations occur which deserve even the name of hills. The interior however is gently undulating, and rises gradually from the lakes towards its centre. It is mostly covered with fine forests of timber interspersed with plains and prairies. On the shores of Lake Michigan are tracts of sand, sometimes covered with scummy vegetation though generally bare, and on those of Lake Huron, high scummy bluffs and low swamps prevail, but, with these exceptions, the soil is well adapted to all the ordinary agricultural crops—including wheat, rye, oats, barley, Indian corn, flax, hemp, and the various artificial grasses. The rivers which generally run near the centre, and flow either W. to Lake Michigan, or E. to Lake Huron, are both numerous and important the larger of them being navigable for boats and canoes almost to their sources. Small clear lakes, also, towering with firs, are seen in every quarter. The climate is much modified by the peninsular position of the state and hence, the intense cold, common in other regions under the same

latitude, is so little felt, that it seldom becomes necessary to house cattle, even in the dead of winter. This advantage has been turned to good account, and both grazing and sheep-farming form extensive and profitable employments. Agriculture, however, is the great staple; and heavy crops of wheat are raised, for which the elevated lands are famous. Next to wheat, the most important crops are oats and Indian corn. After agriculture, lumbering is perhaps the chief employment. Manufactures have made little progress, but the trade is very important; and in addition to the vast natural facilities already adverted to has received the benefit of the railway system, two important lines, one called the Central, and the other the Southern railroad traversing the S. part of the S. peninsula from E. to W., and furnishing the means of a transit, to the final development of which it is difficult to assign limits. The prevailing religious body in Michigan is the Methodist, which, in numbers, surpasses all other denominations, next in number are Baptists and Presbyterians, and there are several congregations of Independents, Protestant Episcopalians and E. Catholics. The common schools, supported partly by state, and partly by local taxation, were attended in 1849, by 125,218 scholars, 4758 additional scholars were educated at private schools. By the constitution of 1850, every white male citizen who is major may vote at all elections. The Senate consists of 22 members, elected, one-half, annually, for two years the House of Representatives consists of not less than 64, nor more than 100 members, elected annually. The governor and lieutenant-governor, elected by a plurality of votes, hold office for two years all judges and justices of the peace are elected by the people. The first settlement in Michigan was made by the French, at Detroit, in 1670. In 1763, the country was ceded to the British, by the peace of Paris, and passed from them to the U States, at the close of the revolutionary war. It was erected by Congress into a separate territorial government in 1805 and became a state of the Union in 1836. Pop. (1840) 212,267, (1850) 307,054.

MICHIGAN a in U States Indiana, S. shore Lake Michigan, lat. 41° 42' N. long 85° 40' W, with three churches several stores, and large warehouses. It is the only lake port in the state. Pop. 700

MICHIGAN (Lark) the second largest of the great lakes of N. America. It is wholly within the U States, having the State of Michigan E. and N.W., Wisconsin and Illinois W., and Indiana S. On the N.E. it communicates with Lake Huron by the narrow strait of Michilimackinac. It is 330 m. long, and on an average, 60 m. broad, area, estimated at 16,961 sq. m. Many tributary streams fall into it both from Wisconsin and Michigan. The coast is generally sandy but preserves great regularity. The lake is nearly free from islands excepting at its N. extremity and on the Strait of Michilimackinac. There are only three bays of any note—Green Bay the largest, at its N.W. end so called from the unusually dark green colour of its waters and Great and Little Traverse Bays in the same quarter. The lake is said to be 564 ft. above sea-level, the greatest ascertained depth is 1000 ft.

MICHILIMACKINAC, a strait, U America, connecting Lake Huron with Lake Michigan and containing an island of the same name, called also Mackinac Island see

MICHIPICOTON, a bay Upper Canada, N.E. extremity of Lake Superior, into which falls a considerable river of same name, at the mouth of it stands Fort Michipicoton. In the bay is a small island of same name.

MICHEL, a vil Bohemia, 4 m from Prague, and the property of its university, with a church, a castle, and a flour-mill. Pop. 1000

MID-LOTHIAN See *Edinburgh* (County of)

MIDCALDER, par Scot. Edinburgh, 7 m. by 8 m. Pop. 1474

MIDDELBURG (Latin, *Mechoburyum*, *Mechum* German), a town, Holland, prov. Zealand, near the middle of the Walcheren, 47 m. S.W. Rotterdam, 6 m. N. by E. Flushing. It is a good-looking, remarkably clean town ornamented with numerous spires and towers surrounded by a broad canal, well supplied with fish, bordered by a prettily planted countenance, and surrounded by a large number of fine gardens, rich meadows, and bleaching-grounds. It is openly built, has numerous squares, of which the great market (Grootmarkt) is the most notable, and at the same time, one of the finest

THE TOWNHALL, MIDDELBURG.—From a Dutch print.

in the kingdom. On the N. side of the great market stands the splendid townhall composed of two portions; an older, in Gothic style, whose present front, overlaid with ornaments, were completed in 1518, and a new side wing in the Ionic style finished in 1784. On the N. front of the old building are 20 colossal statues of the counts and countesses of Zealand the series along with the Emperor Charles V. Among the other important edifices and institutions may be specified the abbey, an extensive structure, with a fine tower the courthouses, prison, exchange, gymnasium, academy of design, and other schools (theatre museum barracks, three Reformed and two R. Catholic churches, a Walloon and an English, a Baptist, and a Dissenting church; a synagogue, an infirmary an orphan hospital, and various benevolent literary, and scientific institutions. The harbor, though of considerable size, is smaller than once it was and the shipping trade is very limited, though at one time important, and including an extended intercourse with the E. Indies and other parts of the world. Some cotton weaving brewing chocolate-making tanning, lace-making, worsted-spinning and silk-reeling, are the chief manufactures, in addition to which a few saws are built. It is an ancient place and was taken by the Dutch from the Spaniards, in 1574. Zacharias Jenson, a spectacle-maker here discovered the telescope, in 1600 this discovery has, likewise, been attributed to Johann Lipperhey, also a citizen of Middelburg. The ill-fated British Walcheren expedition, in 1809, here lost 7000 men, from the effects of the unhealthy climate fever and ague being very prevalent in spring and autumn a result of the marshy neighborhood. In 1810, when Holland had been united to France, Middelburg was made the capital of the department of Bouches-de-l'Escaut. Pop. (1800), 16,934.

MIDDELBARNIS, a vil. Holland, prov. S. Holland, the Over-fakts 18 m. S.W. Rotterdam. It is a new of the best-looking village in the province has a neat townhall, three churches and a synagogue, a school and a porchouse. It has a harbor, connecting with the Haringvliet and many of the inhabitants are employed in fishing, and in herring-curing, and the remainder in agriculture. Pop. 8104.

MIDDELSTUM, a vil. Holland, prov. Groningen, 10 m. N.W. Appingedam, with a church and a school. Pop. 739

MIDDLE, par. Eng. Salop; 6909 ac. Pop. 1880
MIDDLE, par. Scot. Dumfriesshire, 80 000 ac. P. 2168
MIDDLEBURY, a vil. N. Pacific. See Eoa.

MIDDLEBURGH, a town, Denmark, at Funes, on the Little Belt, across which there is bare a ferry to Jutland. It has a good winter haven, admitting vessels drawing 10 ft. The purpose-fishery is of some importance, and employs a good many of the inhabitants. Middleburgh was founded in the 11th century, and has suffered much from pillage, pestilence, and fire. Pop. 1600

MIDDLEHAM, a market in and par. England, co. York (N. Riding), on the line, 9 m. S.W. Richmond with a market-house, and some woollen manufactures. Area of par, 2108 ac. Pop. 866

MIDDLEHAM, a hamlet, par. Eng. Durham, 1071 ac. Pop. 1719

MIDDELSBROUGH, a river-port and par. England, co. York (N. Riding), on the Stockton and Darlington railway. The tower, which is almost wholly of modern erection, is situated at the mouth of the Tees, 44 m. N. York. It consists of several regular streets, diverging from a square in the centre, lighted with gas has a number of good shops a hand some exchange, in the Georgian style, a fine church in the later English style, with a square embattled tower surmounted by an elegant spire, and places of worship for Independents, Primitive Methodists and Wesleyans. A dock, exceeding 9 ac. in extent, has been constructed, with capacious warehouses and other accommodations for shipping, including two yards for building and repairing ships. There are four public breweries in the town, three iron-foundries a sailcloth manufactory extensive potteries, and brick and tile works. Pop. 7864. Area of par, 2300 ac.

MIDDLESEX, the metropolitan co. of England, bounded N. by Hertford, E. Essex, S.E. Kent, S. Surrey and W. Buckingham. It is further defined by the Thames on the S., the sea on the E. and the Colne on the W. It is one of the smallest counties in England, but the most important, from its containing the greater portion of the city of London. Area, estimated at 160 490 ac. of which 150 000 ac. are arable, meadow and pasture. The surface is generally flat, and mostly perfectly level, with exception of the slight eminences, Hampstead, Highgate, and Harrow-on-the-Hill on the N. side of London none of which exceed 400 ft. in height. The county, which belongs entirely to the basin of the Thames, is chiefly occupied by the London clay the remainder by the plastic clay, which attains a thickness of 100 ft. to 120 ft. The soil is various, mostly gravelly, and not naturally fertile but enriched, especially in the vicinity of London, by a profuse application of manure, from time immemorial. A tract of fine, rich, sandy loam also stretches along the Thames well adapted for garden ground, and is, in part, so occupied for the supply of the London market. There are some extensive commons in various parts of the county. Although the metropolitan county agriculture seems to be less advanced here than in most other counties in England, and, what is still more remarkable the farming implements are generally bad, clumsy, and antiquated. The principal crops are wheat, barley, potatoes, beans, pease, turnips and cabage. But by far the largest part of the county is in grass, there being, it is said, 70,000 ac. of upland meadows and pastures, the management of which, particularly as respects the making of hay, is extremely well understood. The number of cows kept in the county for supplying the metropolis with milk, is between 7000 and 8000, usually of the Holderness breed. Many early house hares are shot, and game hares raised for the London market. Minerals of no importance, but, near London, vast quantities of earth and clay have been dug up, and converted into bricks. Middlesex returns 14 members to Parliament, two of which are for the county. Pop. (1861), 1,886,576

MIDDLETON, several pars. Eng.—1, Essex; 875 ac. P. 170 —2, Norfolk; 8038 ac. P. 933 —3, Shropshire; 850 ac. P. 108 —4, Warwick; 8640 ac. P. 492 —5, York (S. Riding);

MIDDLETON, a par. Eng. Somerset 2520 ac. P. 737.

MIDHURST, a par. bur. market tn., and par. England, co. Sussex. The town agreeably situated on a gentle eminence, r. bank Rother 46 m. S W London, is clean, and generally well built, has a church, a Baptist chapel, a free grammar and a national school; a set of almshouses, and several minor charities. Iron-works, formerly in its vicinity have been abandoned, on account of the expensiveness of fuel. Midhurst sends a member to Parliament; electors (1851), 379. Area of par., 671 ac. Pop. bur., 1461.

MIDIAH, a maritime tn. Turkey in Europe, prov. Romania, on the Black Sea at the mouth, and 1 bank Tolpaz lat. 41° 58' N. lon. 28° 8' E. It has a small roadstead, exposed to E. winds, but sheltered by Cape Serres from the N. Here vessels may anchor in 10 or 12 fathoms.

MIDLEY, par. Eng. Kent 2168 ac. Pop. 87.

MIDMAR, par. Scot. Aberdeen, 12 000 ac. Pop. 1166.

MIDNABOE or **MIDNABOON**, a tn. and dist. Hindoo-

Hoogly, and, on the other side, by the districts Bardwan, Deccourah, Ringbom, Mohurbang, and Balasore, area, 5250 sq. m. About half a century since, this district was nearly all a jungle, never cultivated but not wholly uninhabited. It has been somewhat improved in this respect, but still contains an immense extent of uncultivated and unproductive ground. Most of the land is tilled by the peasantry who pay the rent, the class of labourers who work for hire being scarce. The most important articles of agricultural produce are indigo, betel nut, and sugar. Honey, wax, and lac, are obtained from the jungle portions of the district. The manufactures are few, comprising some cotton cloths, gunas, metal and shell ornaments, and pottery. Area, including Hudgeallee, 6029 sq. m. Pop. 686,328.

MIDOEZ, a tn. and par. Portugal, prov. Beira-Deixa, com. Coa, 26 m. W S W Guarda. Pop. 1647.

MIDSOMLER NORRIS, par. Eng. Somerset, 3922 ac. Pop. 8799.

MIDWOLDE, a vil. Holland, prov. Groningen, 5 m. N W Windecoote with two churches and a school. Pop. (agricultural) 1674.

MIELAN a tn. Franco, dep. Gers, 31 m. S S W Auch. It has a promenade from which the Pyrenees are distinctly seen, and has some trade in sheep. Pop. 1171.

MIERAS or **CAINHO** (San Juan Bautista) a tn. Spain, Asturias, prov. and 10 m. S Oviedo, r. bank Lena or Candil. It has a church, a fine old palace, a townhouse, and two schools an iron foundry many flour-mills, and, in the vicinity, mines of cannon iron, sulphur, and coal, and a trade in these, and in mules, horses, cattle, and swine. Pop. 4000.

MIES, or **SILBERSTADT**, a tn. Bohemia, circle and 14 m. W Pilsen r. bank river Misa. It is walled, has three gates, two churches, silk-works, an iron, paper, and other mills, and several sawmills. Pop. 1171.

MIESBACH, a market to Bavaria, cap. dist. 16 m. S S W Munich with a church, chapel castle, hospital, and manufactures of salt-petre and pitch. Pop. 1400. Area of dist., 812 sq. ac. Pop. 18,618.

MIETAU a tn. Russia. See **MITAU**.

MIFFUSY a vil. and com. France, dep. Haute Savoie, prov. Faucigny in a narrow valley with an ancient Gothic church. Pop. 2333.

MIEZZA, a tn. Spain, Lanz, prov. and about 24 m. from Salamanca. It has 11 built houses, irregular dirty streets, a townhouse church, primary school, and several oil and flour mills. Pop. 1051.

MIGHARINA, a vil. Naples prov. Calabria-Ultra 11 dist. and about 7 m. W N W Catanzaro. Pop. 1600.

MIGLIUNICO a tn. Naples, prov. Basilicata, dist. and about 9 m. S W Matera. Pop. 3745.

MIGNANEGO a vil. and com. Italy Piedmont dir. Genoa, 2 m. from San Quirico, near the Rosta. It has a church and a trade in corn, chestnuts, potatoes, and dairy produce. Pop. 2380.

MIGUEL-LEZARIN, a vil. Spain, New Castile, prov. Toledo, 65 m. S E Madrid. It has a townhouse, two endowed schools, a church, and some handloom weaving agriculture, and trade. Pop. 2200.

MIGUEL (San) a vil. Azores. See **MICHAEL (St.)**.

MIGUEL (San) a gulf and harbour, New Granada, isthmus of Darien. The gulf forms an indentation of the Bay of Panama, E. side about lat. 8 10' N. lon. 78° 20' W.

—The harbour is an inlet in the gulf, interspersed with a few islets, having an entrance about 8 m. wide, and extending about 8 m. inland, with soundings in 15 to 8 fathoms. Its communication, at its lower part, with Darien harbour through Boca Grande and Boca Chica passages, on either side a considerable island, the former encumbered with rocks, but the latter with 8 fathoms water. Darien harbour has a depth of 14 to 9 fathoms at low water, is about 16 m. long, by 6 m. broad, and completely sheltered. It receives the rivers Darien or Grande, Integridad, and Gavarnad, the last navigable for about 7 m. inland, and the tide rises to within the latter, about 11 m. further. These two harbours have been pointed out as furnishing an eligible termination to a tidal inter-oceanic canal between the Atlantic and Pacific, proposed to be cut from Caledonia Bay, on the Caribbean

See, a distance, to the Lara, where the tide ceases to affect it, of only 80 m. — (*The Journals of Darwin to 1852 by Lionel Gishborne, London, 1858.*)

MIGUEL (Sax), a vil Bolivia, prov Chuquisaca, on a granite height, 160 m N E Santa-Cruz-de-la-Sierra. Several of its houses are in a dilapidated state but it has a large and handsome church, with a richly decorated altar, and a good organ. Pop. about 2000.

MIGUEL (Sax), two places Portugal — 1, (A. A. de) A. in, and par prov Beira-Baixa, 9 m E Castelo Branco, Pop. 988. — 2, (do Outeiro) A. in, and par prov Beira-Alta, com Tondello, 9 m W S W Viseu. Pop. 1470.

MIGUEL (Sax) several places, Brazil — 1, A. in, prov and 20 m S S W Alagoas on a river of same name with a church, and a trade in tobacco and cotton, sent to Belém or Macayá. Pop. dist. 2000. — The river, after passing the town, traverses a lake, on the shore of which is the village of Santa Anna, and falls into the ocean. Total course, 55 m. Its mouth is barred, but small boats ascend to Santa Anna, and convey cargoes of cotton, sugar and timber, to be iron shippod into large vessels outside the bar. — 2 A. in, prov Santa Catharina, in a bay of same name, 15 m N W Deserto. It has a church, a primary school, numerous sugar-works, a pottery for making glazed earthenware, and a tannery. The bay affords good anchorage, and shelter from the W wind to vessels of all sizes. Pop. dist. 5000. — 3, A. in, prov and 85 m N Parahiba, with a church and a school. In the district excellent cotton is grown. Pop. 1000. — 4, (de P. r. cocho) A. vil, and par, prov Minas-Geraes, dist. S. B. Cabeta, on both sides of the Piracema, have crossed by a wooden bridge. It is built in the form of an amphitheatre, and presents a very pleasing appearance all the houses being provided with gardens. It has four churches. Millet and haricots are grown, and large herds of swine reared in the district. Pop. 10,949.

MIGUEL TURICA, a tn Spain, New Castle, prov and 2 m S. Ciudad Real. Its houses are in general low but the streets are broad, paved and cheerful. In the main square stand the town-halls and prison. It has two primary schools, a church and four hermitages one of which, Santo Cristo de la Muerte, is remarkable for the richness and elegance of its architecture. Agriculture and cattle-rearing, the manufacture of brandy, leather, bricks and tiles, coarse woollens, worsted stockings and oil-expressing, are the chief occupations. 1 op. 653.

MILHATZELFALU, or MICHELDORF, a vil Austria, Transylvania, co. Nieder-Waldenburg, at the confluence of the Kokel with the Maros inhabited by Walachians. P. 1185.

MILHALY, numerous places Hungary particularly — 1, (Jász-Tóth) A. vil, Hübner Thelma, dist. Jazygia, at the confluence of the Zagna with the Tarna, with a parish church, Pop. 1890. — 2, (Nagy) A. market vil. Hübner Thelma, co. and 87 m S W Zemplin, on the Latorca, here crossed by a bridge with an ancient church, a synagogue, a chateau, and two flour-mills. Pop. 2118. — 3, (Hosot-Szent) A. market to, co. Eisenburg, 85 m S S W Oedenburg with a large cattle-market. Pop. 1784. — 4, (O-Szent) A. vil, co. Temes, on the Bega Canal, E N E Temesvár. Pop. 2001. — 5, A. market to, Thüth Thelma, co. and 23 m S E Oedenburg, near the Mark with a church and a castle. Pop. 1500. — 6, (Szent) A. vil, Thüth Thelma, co. Szeben, on a fertile dist., about 12 m from Tokay with a Protestant church, and a trade in agricultural produce. Pop. 4692. — 7, (Szent) Transylvania, See COMENATZAL, — 8, (Fala) A. vil, co. Szeben, 6 m from Fialkov, with a Protestant church. Pop. 2107.

MILHIE (St), a tn France, dep. Meuse, in a valley on the Meuse, 21 m N E Dar-le-Duc, with several ancient churches, manufactures of linen, leather and calico, a cotton-mill, and some trade in corn, wool, and wine. Pop. 4875.

MILHA, a tn Saxo-Wesmar, circle and 8 m N Eisenach, r. bank Werra. It has a church, and manufactures of velvet. Pop. 1294.

MILHOLAZO, or MICHOCURU, a market in Austria, Solovacia, co. Yaros, on the Drave, here crossed by a ferry 12 m from Riklos. It has a R. Catholic church. Pop. 2150.

MILAS, a river, Asiatic Russia, which rises on the E. slope of the Ural mountains, in gov Orenburg, flows E N E. past Tshelakinsk, crosses gov Perm and, after a course of about 290 m, joins r. bank Irt, 80 m E Shadrinsk.

MILABES, a river Spain, which rises in prov Teruel, at the foot of the sierra Javalambre and flows S E. to the Mediterranean, across prov Castellón de la Plana; total course, about 70 m. Affluents, Vallons, Mora, &c.

MILAB, a tn Spain, Andalucía prov and 14 m S S W Malaga, at the foot of sierra Baza, about 4 m from the Mediterranean. It has a town-house, a prison, five schools, a church, four hermitages, and nine manufactures of brown, and one of white paper, wool ml and fine flour. P. 4085.

MILDBRECHT, or KRONENBURG, a vil Holland, prov and 15 m N W Utrecht, a scattered place with two churches, a school, and a neat town-hall. Inhabitants engaged chiefly in dairy farming. Pop. 1335.

MILJIRITCH, a tn Russia, gov and 73 m N W Kharlov with a church, and three annual fairs, at which large quantities of woollen and silk goods are sold. Pop. 7000.

MIKESZARZA, or FANARONAS, a vil Austria, Transylvania, co. Kolosberg, 20 m N N E Hermannstadt; with two churches. Pop. 1267.

MIKHAILOW, a tn Russia, gov and 32 m S W Nizhny, cap. dist. on both sides of the Prona. It has 11 churches, inhabitants engaged in agriculture and general trade. 1 op. (1840) 8891. — The district has good arable and meadow land, yielding large quantities of corn, flax, hemp, and hops, and rearing great numbers of cattle for the Moscow market.

MIKHAILOVKA, several towns, Russia, particularly — 1, Gov and 54 m N W Koursk, on the Svyaz. It has three churches, manufactures of linen, wax, and leather, several distilleries, dye-works, and oil mills, and carries on a considerable trade in corn, wood, hemp, leather and sheepskins. 1 op. 6000. — 2, Gov and 70 m S E. Ekaterinodar, 1 bank Mskowka. Pop. 8581.

MIKHAILI LIZA, a tn Asia Minor. See MURALITCH.

MIKLOS numerous places Hungary particularly — 1, (Szent) A. market to, Hübner Danube, co. Liptau with a church. Pop. 1708. — 2, (Szent) A. vil, co. Stuhlweissemburg on the Sarus 12 m from Földvár with a church. 1 op. 1187. — 3, (J. ar-Szent) A. vil, Hübner Danube, co. and 32 m N E Erseburg on the Marva, with a church, and a flour and a saw-mill. Pop. 2137. — 4, (P. r. co-Szent) A. market to, Thüth Danube, co. and 22 m S E Oedenburg, above the Raab, with a church and a flour-mill. A little N of the town is the royal hunting seat, called Mon Bijoux. Pop. 1748. — 5, (Kis Szent) A. vil Thüth Thelma, co. Temes, 80 m W S W Arad, with a church, and an hospital. Pop. 1473. — 6, (Kis-Szent) A. market to, Hübner Danube Little Kunszent, 86 m S S Pesh. It has a R. Catholic, and a Calvinistic church. Pop. 4780. — 7, (László Szent) A. vil Thüth Danube, co. Oedenburg, near the Látka. Pop. 1260. — 8, (Nagy Szent) A. market to, Thüth Danube, co. Torontal, 25 m W S W Arad on the Maros. It contains a R. Catholic and a Greek non-united parish church, and a practice-economical industrial school. Pop. 14,222. — 9, (Lebony-Szent) A. vil, Thüth Danube, co. and 6 m S Wieselburg with a church and a castle. Pop. 1222. — 10, (Szent-Szent) A. vil, co. and 4 m S Pesh on an island formed by the left arm of the Danube. It has a church. 1 op. 1808. — 11, (J. ar-Szent) A. vil, Thüth Thelma, co. and 50 m N E E. Temesvár. Pop. 2086. — 12, (J. r. co-Szent) A. market to, co. Hava, 56 m S W Debreczen with a primary school. The district is fertile, and yields good crops of corn but the inhabitants are chiefly employed in rearing horses and cattle, and in fishing. Pop. 9101.

MIKLOSFALU, a vil Hungary, Thüth Danube co. Wieselburg with a church, and a Lutheran chapel. P. 1240.

MIKOLA a vil Hungary, Thüth Thelma, co. Szathmar 4 m from Sathmar-Neszeck, with a church, and a bathing establishment. Pop. 1113.

MILULINEZ, a tn Austria, Galicia, circle and 12 m S Ternopol, on the Seret. It has a church, sulphur baths and an old castle, in which a factory for weaving fine linen has been established. The trade is considerable, consisting in fat cattle, wax, honey, hemp and bempen goods, and linen and woollen cloth. Pop. 2000.

MILAGRO (San. Argem), a tn Spain, prov Navarra, on a height, on the Aragon, 40 m S S by W Pamplona. It has three squares, a church, courthouse with prison, hospital, and two primary schools; brick and tile works, and lime and plaster kilns. Pop. 1059.

MILAN a tn. Algolia, prov. and 31 m. NW Constantine, on the ancient Roman road between that city and Algiers, and surrounded by gardens filled with the finest fruits and flowers. Pop. about 4000.

MILAN (Italian *Milano*) *Germes, Mediolan, Latin, Mediolanum* a city kingd. of Italy cap. gov. of same name, and of the whole Lombardic or eastern kingdom, in a beautiful and fertile plain, between the Adda and Ticino, which feed several canals one of which encircling a considerable portion of the interior of the city, divides it into two unequal parts, while other three on the outside are available both for irrigation and traffic.

gation and traffic. By railway, it is connected N. with Como, and E. with Treviglio, the latter part of an unfinished line to Verona and Venice. The town is built in the form of an irregular polygon the perimeter of which exceeds 5 m., and is surrounded by walls, which were once flanked with large and massive bastions. These, with a single exception, have been removed and the space occupied by them and the northern ramparts has been converted into pleasure walks, shaded by magnificent chestnut-trees. Though one of the most ancient towns in Lombardy it has been so often partially destroyed and rebuilt, that few antiquities remain and, in consequence of the numerous changes and improvements of recent years, cannot fail to be soon altogether modernized. It is entered by 11 gates, several of which are magnificent. The leading streets, proceeding from these gates, are tolerably wide, well paved, provided with footpaths, and lighted with gas, the lateral streets, though, for the most part, slim, are less commodious and, in many places, become narrow and twisting. The houses are built, for the most part, of brick, and covered with tiles, but have often a handsome and showy exterior. The finest streets are the Corso di Porta Romana, Corso di Porta Nuova, and Corso di Porta S. Andrea.

All of these, more especially the last, have ranges of elegant mansions, which would be ornaments to any capital in Europe. The squares are scarcely on a scale of equal magnificence. The largest, called the Piazza d'Armi, occupies an immense space, obtained by the demolition of the citadel and its outworks. Part of it has been converted into an amphitheatre, 800 ft. long, by 400 ft. broad, much used in summer for races and shows, and, though capable of containing 30,000 spectators, not unfrequently crowded.

Among the public edifices of Milan, the first place belongs to the Duomo or cathedral, a vast and magnificent structure, inferior in magnitude to St. Peter's at Rome, but, in some respects, not unworthy its rival. It is composed throughout of white marble, and, though exhibiting a somewhat incongruous mixture of styles, in which the ancient Gothic is occasionally made to give way to the modern Italian is one of the most impressive ecclesiastical edifices in the world. The Duomo, in its present form, was commenced in 1387, and has ever since been advancing to completion, without having yet reached it.

Its form is that of a Latin cross, divided into five naves, terminated by an octagonal apse and supported by 52 octagonal pilasters of uniform size except four, which, having to bear the noble cupola, are larger. Around the exterior are 4500 niches of which above 3000 are already occupied by statues, in the interior everything is of the most imposing and gorgeous description and the eye wanders almost overpowered by the number of grand and beautiful objects which claim its attention. Among the other remarkable edifices are the church of Sant' Ambrogio, founded by St. Ambrose in 387 and though completely repaired in 1681, still retaining so much of its original form and containing so many ancient epitaphs, and other relics of the ancient building imbedded in its walls, as to form a rich museum of early Christian antiquities. The church of Sant' Eustorgio, with an ancient cupola and interesting monuments, the church of San Lorenzo, terminating in a cupola, flanked by four ancient towers, the church of Santa Maria delle Grazie, with a cupola and sacristy by Bramante, and the celebrated Last Supper by Leonardo da Vinci, unmissably so placed as scarcely to be recognized the church of Santa Maria della Passione, a magnificent edifice, with excellent paintings, and a magnificent museum, regarded as one of the best works of the sculptor Andrea Verrocchio, the church of San Paolo, an elegant structure, in the form of a rotunda surmounted by a fine dome, and remarkable for the rich and almost overloaded ornaments of its facade, the church of San Carlo Borromeo, a magnificent modern basilica, the Palazzo Reale or La Corte, a large and handsome edifice, occupied by the viceroys adorned with numerous fountains, and surmounted by a lofty tower, the archiepiscopal palace, adjoining the cathedral and connected with it by a kind of tunnel, the Palazzo in Governo, embellished with a modern facade, and containing a vast court lined with porticoes supported by pillars, the Palazzo del Marmo now used as a custom-house and treasury, the Broletto of Palazzo Municipale less remarkable for its architecture than for the historical associations connected with it, and containing two large courts, which are used as a corn market, the Palazzo della Ragione or de' Turchini, a large square building, standing on open arches situated in the centre of the Piazza del Mercato, and partly used as a register office, several other fine edifices among the same name, more especially the Loggia degli Orazi, and the Palazzo della Città or townhall, the Palazzo di S. Stefano Lettera e Arte, with the Pinacoteca of the Brera, containing an ill arranged, but very valuable collection of paintings, and several fine busts and statues, the Biblioteca Ambrosiana, the earliest, and still one of the most valuable public libraries in Europe, the Palazzo di Giustizia, and de' Tribunali the former for the criminal court, and the latter for the ordinary courts of justice, the Royal Palace or S. Stefano Reale, the general police-office, the barracks, forming a long and elegant range of buildings, capable of holding 4000 men; the prisons, one of which is re-

garded as one of the best works of the sculptor Andrea Verrocchio, the church of San Paolo, an elegant structure, in the form of a rotunda surmounted by a fine dome, and remarkable for the rich and almost overloaded ornaments of its facade, the church of San Carlo Borromeo, a magnificent modern basilica, the Palazzo Reale or La Corte, a large and handsome edifice, occupied by the viceroys adorned with numerous fountains, and surmounted by a lofty tower, the archiepiscopal palace, adjoining the cathedral and connected with it by a kind of tunnel, the Palazzo in Governo, embellished with a modern facade, and containing a vast court lined with porticoes supported by pillars, the Palazzo del Marmo now used as a custom-house and treasury, the Broletto of Palazzo Municipale less remarkable for its architecture than for the historical associations connected with it, and containing two large courts, which are used as a corn market, the Palazzo della Ragione or de' Turchini, a large square building, standing on open arches situated in the centre of the Piazza del Mercato, and partly used as a register office, several other fine edifices among the same name, more especially the Loggia degli Orazi, and the Palazzo della Città or townhall, the Palazzo di S. Stefano Lettera e Arte, with the Pinacoteca of the Brera, containing an ill arranged, but very valuable collection of paintings, and several fine busts and statues, the Biblioteca Ambrosiana, the earliest, and still one of the most valuable public libraries in Europe, the Palazzo di Giustizia, and de' Tribunali the former for the criminal court, and the latter for the ordinary courts of justice, the Royal Palace or S. Stefano Reale, the general police-office, the barracks, forming a long and elegant range of buildings, capable of holding 4000 men; the prisons, one of which is re-

garbed as a model of its kind, the house of correction at Porta Nuova, and a great number of theatres, among which that called Della Scala takes precedence, accommodating 4000 spectators, and said to be the largest known, not excepting even the San Carlo of Naples.

Among the literary and educational establishments in addition to the Palazzo di S. Stefano, the Pinacoteca, and Ambrosian Library already mentioned, are an astronomical school, and an optical and meteorological school, each with an obser-

From Chamber Map of the Milanese.

vatory attached the imperial college of Porta Nuova, the college Longone, two lycæums, with botanical garden and play field; three gymnasiums, an archiepiscopal seminary, a deaf and dumb institute, a school of practical chemistry, polytechnum, obstetric, veterinary orphan, military, manual, drawing and numerous other schools, male and female. The principal benevolent endowments are the Ospedale Maggiore, richly endowed, and occupying a vast range of buildings in the Gothic style, with a facade adorned by five bas-reliefs, and a large square court enclosed by porticoes; the Ospedale di Santa Caterina, Ospedale dei Fate-bene Fratelli, Ospedale dei Poveri, the Monte di Pietà, the Infant house of refuge, the House of Invalids (Le Case degli Invalidi), the penitentiary and house of industry (Casa di Ricovero e d'Industria), the military, orphan, and several foundling hospitals.

Milan notwithstanding its position and the great extent of its population, has few manufactures. The most important are tobacco, carried on in a large Government factory silks, cottons, lace, carpets, hats, earthenware, jewellery, and articles in gold and silver. The spinning and throwing of silk employ a large number of hands and furnish the staple article of trade. The other principal articles are corn, rice, and cheese. The occasional visits of the emperor, and the constant residence of a viceroy gave to Milan many of the appendages of a court and independent capital. It is also the seat of an archbishop, the seat of courts of primary resort, criminal and mercantile courts, and a court of appeal for all Lombardy. Its foundation is attributed to the Insubrian Gauls, but the first distinct notice of it occurs a.d. 221, when it was subdued by the Romans under whom it acquired so much importance, that in the dream of the empire, attributed to Constantine the Great, it ranks as the second city of Italy. In the middle of the fifth century it was sacked by the Huns, under Attila, and again in the following century

by the Goths. Greater horrors yet awaited it; and the Goths, who had been driven out by Belisarius, having regained possession by the aid of the Burgundians, gave it up to the flames and put almost all its inhabitants to the sword. Having been rebuilt, it again rose to eminence and became very flourishing under the Lombards and Charlemagne. Arcotegno grew with its prosperity and it lorded it so haughtily over the neighbouring towns and republics, that in 1158 when the emperor Frederick I. whose supremacy it refused to acknowledge, had resolved to take summary vengeance, the inhabitants of Parma, Cremona, Lodi, Como, and Novara, eagerly hastened to the task, and razed it to the ground. The emetics practised produced a reaction, and in 1167 the famous Lombard league was formed at Pavia, and among other important results, succeeded in bringing back the Milanese; and the city again rebuilt, became even more populous and influential than it had ever been before. It long continued, however to be torn by internal factions, headed by the leading nobility, among whom the Visconti at last gained the ascendancy, and ruled it from 1398 to 1447. They were succeeded by the Sforza, whose last duke died in 1535. The Spanish rule now commenced, and lasted for 170 years, but ultimately, after long wars, in which all the great European powers were engaged, the peace of Utrecht was concluded in 1711, and gave the duchy of Milan to Austria. Her possession was interrupted by the victories of Napoleon, but restored at his downfall and Milan which the French had made the capital of their kingdom of Italy was afterwards the cap. of that part of it over which the Austrian sway extended. Among the natives of Milan are Pope Alexander II, Urban III Celestine IV Pius IV and Gregory XIV the jurist Alciato, the geometer Cardan Baccaria, author of the celebrated work on *Crimes and Punishments*, Agnesi, a lady, celebrated for her scientific attainments, and Alessandro Manzoni, the first living novelist of Italy. Pop. city (1848) 166,826, city and suburbs, 189,880.—The town is bounded N by Como, W by the Ticino, separating it from the Sardinian Stakes, E by Lodi and S by the Po, and E by the Adda separating it from Bergamo. In the N, the surface, though not properly mountains has some lofty hills which merge into undulating plains. Towards the Adda and Ticino these plains become flat, low and marshy, but the greater part of the surface is of a fertility which can scarcely be surpassed. Area, 768 sq. m. Pop. 400,197.

MILANESSE an ancient division in the N of Italy which was bounded N by Switzerland, E the republic of Venice and the duchy of Mantua, S the Po, which separated it from the duchy of Parma, and W Piedmont. The W portion of it is now included in the Sardinian States; and the portion E of the Ticino, by far the larger of the two, in Austrian Italy. Milan was its capital.

MILKORNE (PONT), a small town in par England co. Somerset, 86 m. S. Bristol with a church, hospital for Independents and Wesleyans, a gristmill, with a handsome doorway several schools, and two libraries, some leather-dressing and glove-making. It was formerly a pari. bur. but was disfranchised by the Reform Act. Area of par. 1977 ac. P 1744.

MILBOURN (St. Andrew), par. Eng Dorset 1717 ac. Pop. 320.

MILDI N par. Eng Suffolk, 1339 ac. 10p 165.

MILDLAU a vi Saxony circle Zurich had Wolkenstein with a church and numerous oil and other mills. Pop. 3072.

MILDENHALL, par. Eng Wilts 4025 ac. P 480.

MILDENHALL, a market town and par. England, co. Suffolk, on the Lark a tributary of the Ouse and the Eastern Counties Railway 11 m N W Bury St Edmunds. It consists of a principal and several minor streets, and has a large and handsome church with a lofty tower a fine portal, a richly-carved wooden ceiling and several ancient monuments and three dissenting places of worship, a spinning-mill for raw silks, and a trade in grain. Area of par. 13,710 ac. P 4974.

MILHAM par. Eng Norfolk, 2851 ac. Pop. 581.

MILETTIN a tn Bohemia, circle Budebow, 57 m N E Prague, on the Bistritz, with a castle, and church. P 1370.

MILETO, a tn Naples, par. Calabria Ultra II, flat, and about 2 m S W Muntelione. It is well built in the style of a bishop, and has a fine episcopal palace. It suffered much from the great earthquake of 1783. Pop. 1460.

MILETUS, a ruined city Asia Minor, near Andania, 90 m. S.W. Ephesus, near the mouth of the Meander, formerly especially celebrated for its magnitude, its extensive commerce, and the numerous colonies which it sent out. The remains of a vast theatre of a Christian church formed out of a Greek temple of the Corinthian order and of a fine mosque, built of the ruins of Christian churches, still exist. An aqueduct also may be traced, and the site of several temples. The modern village contains but a few houses, and not more than 50 inhabitants.

MILFORD, a vil U States, Delaware, 70 m S Philadelphia, N side Mispell creek. It has two academies and six schools, two tanneries, and numerous mills. Pop 2356.

MILFORD, par Eng. Ham., 6286 ac. Pop. 1782

MILFORD, a vil England, co. and 6 m. N Derby with an established church, various dissenting chapels, several schools, a mechanics institute, manufactures of cotton, bleach works, and an iron foundry. Pop. 835.

MILFORD a seaport in Wales, co. and 6 m. N.W. Penbroke, beautifully situated on the N shore of the haven of same name. It is of very recent origin and consists of three streets parallel to the shore and intersected by others at right angles. It is regularly and substantially built of stone, is defended by two batteries on the opposite sides of the haven, and has an elegant Episcopal chapel, with a lofty castellated tower and a richly-gilded roof, places of worship for Baptists, Friends, Independents, and Wesleyan Methodists, a custom-house, quarantine establishment, spacious hotel and good market buildings. The town, situated opposite the Men of W. Route, the finest anchorage in that part of the haven derives its chief importance from the resort of shipping. Its principal business is shipbuilding which is still carried on to some extent, notwithstanding the removal of the royal dock yard, at which several ships of the line were built. The trade is chiefly in timber imported from America, limestone, and culm sent coarwise and anthracite for drying malt sent in considerable quantities to London and other ports on the English and Bristol channels. The system of the coast are famous for their quality and the fishery of them is very active. Pop. 2837.—**MILFORD HAVEN**, one of the safest, deepest and most spacious in the kingdom forms a deep indentation in the S.W. coast of Penbroke, stretching about 10 m from E. to W. with a breadth of from 1 m. to 2 m and branching off into numerous bays creeks, and roads. Owing to the strength and height of the tides, which in springs rise from 28 ft. to 30 ft. the largest vessels can enter or put to sea in any winds, more expeditiously than from any other large harbour in Great Britain. These advantages early marked out Milford Haven as an important naval depot, and as already mentioned a royal dockyard was actually formed, but the distance of the haven from the Channel which must always be the great naval thoroughfare, is such a serious disadvantage that the Channel ports still continue to maintain the preference.

MILIANA [anc. Africana] a to Algeria, prov and 65 m. S W Algiers on a mountain slope 3000 ft. above sea level. The streets are narrow and crooked, houses of two stories, built of mud and brick, and whitewashed. It has 25 mosques, 5 of which are of considerable size a luncheon a pottery and various kinds of manufactures. Roman remains are still occasionally met with here. In 1840, it was found by the French to have been abandoned and delivered to the flames. It now contains a French garrison. Pop. (1840) 2340 of whom 1105 are Europeans.

MILAILLY or **MILLAILL**, a to Bielly, prov and 15 m N W Evreux, r bank Caserta. A little to the S.W. are some traces of the ancient Hybla. Pop. 2500.

MILIS a vil Ital Sardina, div Cagliari, prov Boncheli, 5 m. N Oristano. It has several churches, and a trade in lemon-wood, oranges, and other fruit. Pop. 1450.

MILITARY-GAZETTE, or **MILITARY FRONTIER**, a belt of country Austria, domestic stretches along the frontier of Turkey from the Adriatic Sea, and Dalmatia to Transylvania and bounded N by Croatia, Slavonia, Hungary, and Transylvania and S by Bosnia, Servia, and Walachia, area, 9528 sq m. m. Pop. about 100,500. This military frontier, originally formed about the middle of the 16th century, by the Emperor Ferdinand I, has subsequently undergone repeated modifications, and now consists of three principal

divisions—the Croatian frontier subdivided into those of Karistadt, Banat, and Warasdin; the Slavonian-Servian frontier, and the Banat frontier. The inhabitants are both cultivators of the soil and soldiers and the magistrature are officers of different grades. The properties are hereditary military fiefs, which the inhabitants hold from the state under different conditions of military services one of which is maintaining a permanent military corps against Turkey, another duty is that of guarding against the invasion of neighboring waters. In time of peace, the force of the military frontiers is about 45,000 strong. The inhabitants are divided into 14 regiments of infantry 1 of hussars, and 2 battalions of seamen.

MILITELLO two places Sicily—1, A to, prov and 21 m. S.W. Catania on the top of a rugged height, in a healthy district. Pop. 8000—2, A to, prov and 49 m. W W Messina, in a valley on a small stream not far from its mouth, on the N coast. Pop. 2500.

MILITON (MILTON and RAR) two nearly-contiguous vils. Hungary, Hither Danube cu basin, about 14 m. from Zombor on the moorland Moorburg. They have a Catholic church, and a trade in wine and agricultural produce. Excellent melons are grown in the vicinity. Pop. Nemeth-Militon, 3665 Ratz-Militon, 2662.

MILITSOE a to, Prussia, gov and 31 m N.E. Breslau, chief place circle, on the Harthe. It has a castle, three churches, a synagogue, a library hospital, manufactures of woollen linen, and leather and several mills. Pop. 2707.

—The district is flat, well wooded and well watered, but not very fertile. Area, 278 sq m. Pop. 50,181.

MILLAN a to, Canada, prov and 24 m. S.W. Logansburg 1 bank Cardenas. It is well and regularly built, has a church courthouse prison, primary school, and manufactures of ordinary linen several flour-mills, and a trade in corn and cattle. Pop. 1771.

MILLAS a to, France, dep. Pyrenees-Orientales, 10 m W Perpignan, with a brandy-distillery, a breeding-stud and some trade in corn, barberries, cattle, brandy agricultural implements, &c. Pop. 1997.

MILLAU [Latin *Mediomagus*] a to France dep. Aveyron, in a rich valley near the confluence of the Dordogne with the Tarn 31 m S.E. Rodez. It is surrounded by steep rocks, has one wide street and a large square, but most of the other streets are very confined though in general straight and lined with wall built houses. It has manufactures of woollen goods, leather leather gloves, and articles in chambray several silk mills, and a trade in wool, raw and spun, leather wood, for carpentry and shipbuilding cheese of Roquefort, wine, almonds cattle, &c. Millas possesses courts of first resort and commerce, a chamber of commerce, agricultural society and communal college. It was long one of the strongholds of the Protestants. Pop. 8138.

MILLBROOK, two pars. England—1, Bedford 1450 ac. Pop. 600—2, Hants 9448 ac. Pop. 6191.

MILLEDGEVILLE, a to U States, cap Georgia, 145 m N.W. Savannah lat 32° 7' N lon 82° 20' W, r bank Oconee, here crossed by a bridge at the junction of Fishing Creek and at the head of steam boat navigation. It is regularly laid-out, the principal streets being parallel with the river and crossed by others at right angles and has three spacious squares, a handsome courthouse, in the Gothic style, state-arsenal, market-house, penitentiary three churches, and an academy. Pop. (1850), 4095.

MILIBIMO a to Italy, Piedmont, div Genoa, prov and 14 m W N.W. Novara r bank W Bormida, here crossed by a bridge. It is built in the form of a parallelogram, is walled, has a spacious street, the houses of which are lined by arcades an ancient parish church small hospital and a trade in wine chestnuts, silk, and charcoal. Pop. 1803.

MILLINGTON, par Eng. York (E. Riding) 2760 ac. Pop. 259.

MILTON, par Eng. Cumberland 38,472 ac. P. 2115. **MILLPORT** a watering-place, Scotland, beautifully situated on the S.E. side of Isl. Cumbray, Firth of Clyde, with a handsome parish church, surmounted by a tower, a Scottish Episcopal church and college, forming an elegant range of buildings, with a pyramidal spire, and Free and Independent churches. It presents a very pleasing and striking appearance from the water, and is much resorted to by the citizens of Glasgow for bathing and summer quarters. P. 817.

MILLSTADT a vil. Austria, Dlyria, gov Laybach, circle and 18 m. N W Villach, N shore of lake of same name. It has an old Benedictine abbey. Pop. 500.—The lake, about 9 m. long, by 2 m. broad, lies among beautiful scenery flanked by wooded hills rising from the shore and terminating in the distance in lofty mountains.

MILLSTREET, a village in Ireland, co. and 27 m. N W Cork; with an established church, a R. Catholic chapel, a dispensary, a convent school for girls, and a national school for boys. Inhabitants chiefly employed in agriculture. Pop. 1501.—(Local Correspondent.)

MILLTOWN, a small market in Ireland, co. Kerry 9½ m. S. Tralee, near the Mauna, navigable for ships of 100 tons to within a mile of the town. It has a neat church a handsome R. Catholic chapel, and three schools. Pop. (aggravated) 797.—(Local Correspondent.)

MILLTOWN, a vil. Ireland co. and 2½ m. S. Dublin on the Dodder with an established church, R. Catholic chapel, Wesleyan meeting-house and school. Pop. 736.

MILLTOWN MALRAT, a tn. Ireland, co. Clare, 18 m. W Ennis, near a bay of the same name, with a parish church, R. Catholic chapel and a large hotel during the bathing season it is much frequented. Pop. 1453.

MILLY, several places France, particularly —1, (Lahn, Hesse), a tn. dep. Saane-et-Oise, on the Ecole, 30 m. S. S. E. Paris with a large square, spacious market-hall, hospital, a church and a trade in grain. Pop. 3078.—2, A. tn. and com. dep. Oise, on the Little Tournai, about 8 m. N N W Beauvais. It was once strongly fortified, and stood several sieges, but only remains one of the gates now remain. It has manufactures of woollen serge, and sieges, and wool and hemp mills. Pop. 1040.

MILNA a seaport in Austria Dalmatia, circle and 18 m. S. Spalato W coast of Dalmatia, on a large bay, which forms an excellent natural harbour. It has building docks, at which a number of vessels are constantly. Pop. 2768.

MILNATHORTH a vil. Scotland co. and 1 m. N K. K. road. It is of neat appearance, consisting of five good streets and has, besides the parish church on a height at a short distance from the place, a Free and a L. Presbyterian church, several schools, a subscription library manufactures chiefly of tartan shawls, plaids, and Glasgow cotton goods and an important corn-market. Pop. 1805.

MILNGAVIE [generally pronounced Milway] a vil. Scotland, co. Berling, on the Alexander 8 m. N N W Glasgow. It is tolerably well built, and has a L. Presbyterian church, a subscription school and subscription library, a cotton factory, extensive calico-printing and bleaching establishments, and several corn-mills. Pop. 1433.

MILNTHORPE, a market in England, co. Westmoreland, on V. Bank Beba, which a little below, falls into the estuary of the Ken, and on the Preston, Lancaster and Carlisle railway, 7 m. S. by W Kendal. It consists of four short but tolerably well built streets, and has a parish church, in the centre of the town, with a spireless tower, a Scottish episcopal chapel, a national and two other schools, a flax mill, a ropery, and quarries of limestone and marble. Pop. 1634.

MILLO, or **MILON** [anc. *Melos* Greek, *Milae*] an isl. Grecian Archipelago, belonging to Greece, S. E. the gulf of Egeus in its S. W. part is Mount St. Elias, 2688 ft. high, in lat. 36° 40' N lon. 24° 38' S. E. [a.] about 14 m. N. E. to S. W., and 1 to about 4 m. broad. It is mountainous, of volcanic formation, has hot mineral springs, and ruins of antique and other remains. Its N. coast is indented by a deep bay which forms a safe and excellent natural harbour, about 14 m. N W to S. E. by 1 m. to 8 m. broad, with deep water. The island was once famous for its nobles, fertility, and population but, since the plague committed such ravages in it a century ago, it has gradually declined. The staple produce is cotton, which is extensively cultivated by the women. A sufficiency of corn is raised to furnish a supply to some of the neighbouring islands. Milo, the capital of the island, stands upon a plain, about 2 m. from the coast, at the bottom of the harbour, towards the S. E., and is now nearly in ruins, the narrow streets being almost choked up with the material of fallen houses. The inhabitants are either fishermen or sailors, and are reputed the best pilots in the archipelago.—**ANT-MILO**, an isl. about 1 m. long by 1½ m. broad, lies 6 m. N W; highest peak, 2180 ft. high, shores mostly precipitous.

100 II

MILOSLAW a tn. Prussia, prov. and 80 m. S. E. Posen with a church, manufactures of woollen and linen cloth, and several tanneries. Pop. 1418.

MILSON par. Eng. Salop, 1035 ac. Pop. 170.

MILSTEAD, par. Eng. Kent 1216 ac. Pop. 211.

MILSTON par. Eng. Wills 2243 ac. Pop. 133.

MILTENBERG, a tn. Bavaria, circle Swabia, capital at the junction of the Main with the Main 30 m. W. S. W. Würzburg. It is well built, and has two churches, a chapel, a Franciscan convent, a deaf and dumb institution, an ordinary and an orphan hospital building docks, several mills and carries on an extensive general and transit trade. Pop. 3050. Area of dist., 83 sq. ac. m. Pop. 8694.

MILTON several places England.—1 Berks 1431 ac. P. 448.—2, Cambridge 1878 ac. P. 544.—3 Northampton 1190 ac. P. 627.—4 (Abbot) Devon 6517 ac. P. 1243.—5 (Bryant) Bedford 1407 ac. P. 878.—6 (Clonmel) Somerset; 1231 ac. P. 347.—7 (Dunroth) Devon 4252 ac. P. 734.—8 (Evesham) Bedford 2070 ac. P. 445.—9 (East Gwentland) Kent; 858 ac. P. 927.—10 (Green) Oxford 4402 ac. P. 754.—11 (Kynard) Bucks; 1643 ac. P. 819.—12 (Lilbourne) Wilts, 8502 ac. P. 677.—13, (Lisle), Oxford, P. 418.—14, (South) Devon 1506 ac. P. 414.

MILTON a vil. and par. England co. and 15 m. S. S. E. Hants; with a church, Baptist chapel and school. Area of par. 6418 ac. Pop. (aggravated) 1811.

MILTON or **HUMMERTON**, a small vil. Scotland, co. Shiring 7 m. N N W Falkirk, on the Carron here crossed by a handsome bridge, leading to the village of Denny, inhabitants chiefly engaged in calico-printing. Pop. 761.

MILTON ABBEY, a tn. and par. England co. Dorset, 10½ m. N by W Wareham, with a church and school a brewery long celebrated for the quality of its beer and, near it, Milton Abbey the seat of the Earl of Portlinton. Area of par. 3490 ac. Pop. 315.

MILTON ABBEY, a market in and par. England, co. Kent on the Milton Creek, which gives a navigable communication with the Swale 6 m. E. by S. Chatham. The church picturesquely situated about 1 m. from the town is large and handsome, with an embattled tower built of square flints, and there are places of worship for the Wesleyans and Independents and a free court. The trade consists chiefly in agricultural produce, including flour, for which there are numerous corn-mills and ovens, clothed from extensive fisheries, and from the excellence of their quality in great demand in the London market. Area of par. 2556 ac. Pop. 2407.

MILTSCHIN or **MILTON** a tn. Bohemia, circle Taber 47 m. S. S. E. Prague, with a church, school, and townhouse. Pop. 1500.

MILTRIN a peak, Atlas Mountains (which see).

MILVERTON a market tn. and par. England, co. Somerset, at the W. extremity of Taunton Dean vale, 7 m. W Taunton. It has a spacious parish church, of the time of Henry VII. three dissenting chapels, an old house called the Parsonage, said to have been built by Cardinal Wolsey; a free school, manufactures of hales, and several silk-mills. Area of par. 5475 ac. Pop. 2146.

MILVERTON par. Eng. Warwick 1180 ac. P. 1061.

MILWAUKEE, a tn. U. States, Wisconsin, on both banks the Milwaukee, near its entrance into Lake Michigan. It contains a courthouse, a jail and eight churches. Some stone-ware, and great numbers of bricks, of light straw colour are made here. Steamboats ply to Buffalo. In 1846, the exports and imports amounted to \$21,181,400. Pop. (1840), 1700; (1850), 10,026.

MILWICH par. Eng. Stafford 9987 ac. Pop. 691.

MILZANO a vil. and com. Italy Lombardy gov Milan, prov. Bracale, 7 hunk Mellis, with two churches, and a chapel, corn, wine, and silk are raised. Pop. 1339.

MIMCINA, a considerable tn. Morocco, prov. Dar-el-Medina, 190 m. S. E. Morocco lat. 30° N lon. 5° W, beautifully situated among palms, and inhabited by Barbians, Moorish agriculturists, and some Jews.

MIMMS, two par. Eng. —1, (North) Herts; 4925 ac. Pop. 1738.—2, (South) Middlesex 5185 ac. Pop. 265.

MIN or **MYN-KIAN** a large river, China, prov. Fokien formed by the junction of several considerable streams, which

salts at Yen Ping about lat. 36° 42' N., lon. 118° 15' E. whence it flows N.E. to within about 10 m. of the embouchure, when it suddenly turns to the N.E., and falls into the N. Pacific at Hancast Bay; lat. 28° 0' N. lon. 119° 26' E. Total course, about 110 m. and owing to its regular depth, one of the most useful rivers in China.

MINAM, a vil. *See* MINAM.

MINARD par. Brazil 6056 sq. P. 799

MINAS-GERAES, a most populous, though not the most extensive prov. Brazil bounded N. by Pernambuco and Bahia E. Bahia and Espírito-Santo S. Rio-de-Janeiro and São-Paulo S.W. São-Paulo and W. Goyas lat. 14° 50' to 22° 50' S. lon. 41° 30' to 48° 50' W., area, 216,460 sq. m. Much of the surface is mountainous, an extensive chain traversing it N. to S., and sending out several ramifications, particularly one towards the W., which takes the name of serra Negra. This chain divides the surface into three distinct basins—the largest of all in the W. and N., belonging entirely to the São Francisco, which rises within it, and draining it both directly and by numerous affluents, flows N. into the province of Pernambuco and Bahia, a second, on the W. side of the chain, draining the whole of the E. side of the province by the Paraíba, Doce, and Jequitinhonha, which carry their waters E. to the Atlantic and the third, and least of all on the S.W., formed by the serra Negra on the N., and the serra Maniqueira on the E., drained by the Grande and its affluents, and belonging, through it, to the basin of the Rio-de-Plata. Though the province is within the tropics, its climate, greatly modified by the elevation of its surface, is both temperate and healthy. The only exceptions are the low tracts which are periodically flooded, and contain extensive swamps and stagnant pools. The original settlers of the province were attracted to it by its great mineral riches—its mines of gold, its diamonds, rubies and other precious stones—and for a long time the agricultural, and other important capabilities of the country were almost entirely overlooked. As population increased, the cultivation of the soil, much of which is of the greatest fertility, attracted attention, and considerable tracts were brought under the regular cultivation of sugar-cane, cotton, and millet. In more recent times, tobacco has become an important crop, and large coffee plantations have been formed. Many of the finer fruits of Europe also, have been introduced and no inconsiderable portion of surface is allotted to the ordinary cereals, so that the agriculture of this province, though still very imperfect, surpasses that of any other province of Brazil. Another important source of wealth is the vast herds of cattle and swine which graze the pastures or feed on the man of the forests. In the forests themselves are more sources of wealth. The timber and dye-woods are of the most valuable descriptions and numerous varieties of gums, balsams, and medicinal plants, grow spontaneously. The gold and precious stones of the province, though greatly diminished in productiveness are still very important but they by no means constitute the whole of the mineral riches of the country. Numerous other metals and minerals, of the greatest economical importance, have long been known to exist, and some of them have begun to be partially worked. In particular, saltpetre, iron-ore, and coal have been created in the neighbourhood of Ouro-Preto, and furnish many of the large cargoes used in the sugar-house, and numerous other staple wants of commerce. Among the other minerals, of which good account may yet be made, are silver, platinum, copper, lead, bitumen, manganese, sulphate, alum and sulphate. Manufactures are beginning to gain some footing in the province. That of iron has been already mentioned and both hats and cottons, though of a coarse description, are made to such an extent as to furnish important branches of export trade. The foreign trade, however, is of much more consequence. The principal exports are cattle, sugar, beans, cotton, tobacco, coffee, hides, skins and furs of wild animals, dye-woods, molasses, &c., the principal imports are the manufactured tissues and other fabrics of Europe, articles of luxury, wine, and wheat flour. For administrative purposes, Minas-Geraes is divided into 14 comarcas. It sends 30 deputies to the General Assembly, and appoints 10 senators. The Provincial Assembly, composed of 36 members, holds its sitting in Ouro-Preto. Pop. 300,000.

MINAS-NOVAS (formerly, *Vila do Paraíso*), a tn. Brazil, prov. Minas-Geraes, on a height between the small rivers

Boia-Succinea and Paraíso tributaries of the Aracuaí 350 m. N.N.E. Ouro-Preto. The three principal streets, in the form of a Y, are wide and well paved and lined with houses, which, though of earth, make a good appearance. The chief buildings are the town-house, four churches and three chapels, a Latin and two primary schools, and the Hospital of Mercy. The chief trade is in cotton, which is of excellent quality. Pop. 10,000; dist. 10,000.

MINAYÁ a tn. and river, Paria. *See* MINAYÁ.

MINAYÁ, a tn. Spain, New Castile, prov. and 84 m. N.W. Alharcia, on a plain, with a parish church, a court house and prison, a boys and a girls school, manufactures of various articles in seaport, and a trade in these and in agricultural produce. Pop. 1940.

MINCH (Tsu) the channel off N.W. coast, Scotland between the mainland and the island of Lewis it is above 80 m. wide, and, on either side, are numerous lochs or seas, numerous penetrating inland.—The LITTLE MINCH is the channel between the island of Skye and Long Island, its narrowest part is about 15 m. wide.

MINCHIN HAMPTON, a market tn. and par. England, co. and 12 m. S. by E. Gloucester. The town on an eminence E. of the vale of the Severn, has important manufactures of woollen cloth, which form the staple of the whole district. There are three established churches within the parish, besides four Dissenting chapels. To the W. of the town is a large tract of common, called Amberley, with a remarkable escarpment, supposed to have been made by the Duces A.D. 878. Area of par. 4695 ac. 1 top 4460.

MINCIO a river, kind of Italy, which issues from the S. extremity of Lake Garda at the town of Peschiera flows circuitously S. past Goito forms the boundary between Gova Verona and Mantua turning E. expands into a lake, and inundates the ground around Mantua, immediately below which city it again resumes the character of a river, flows S.E., and joins 1 bank Po about 9 m. below Mantua. Its whole course is about 42 m. and, with exception of the port town second Mantua, is navigable throughout for barges of the same size as those which navigate the Po.

MINDANAO or MASINDAGAN (Inhabitants of the lakes) an Isl. Indian Archipelago next to Luzon the largest of the Philippines, of which it is the most S. In shape it somewhat resembles an isosceles triangle, having the E. side for its base, and extending N. to S. from Point Bangan lat. 9° 50' N. lon. 126° 23' E. to Point Mindanao, lat. 5° 52' N. lon. 125° 23' E. and W. to E. from Point Allipapan lat. 7° 6' N. lon. 125° E., to Cape St. Augustin or Pandagan, lat. 6° 4' N. lon. 126° 15' E. From N. to S. it measures 300 m. and W. to E. somewhat less. Hiligay Bay on the N., and Davao or Illanao Bay on the S., nearly cut it in two. Washed by the Sea of Celebes on the S.W. by that of Mindoro on the N.W. and by the Pacific Ocean on the E., it is separated N. by the Strait of Surigao from the Island Leyte, and S. by that of Basilan from Island Basilan. Its line of coast is marked with many bays and headlands, which afford excellent shelter to ships during storms but strong currents make its W. side dangerous. Of the dependent islands, that of San Juan, which has about 50 m. off the E. coast, is the most remarkable. Although, by Dampier's account, 33 m. long and 24 m. wide, and represented as a full degree in length in recent charts, navigators have doubted its existence.

The Spaniards occupy the N. portion of Mindanao, divided into provs. Cagaya and Misamis, the former producing the most gold of all the Philippines and a small tract at its S.W. extremity on the Strait of Basilan formed into the presidio of Zamboanga. The W. coast, between the two portions of the Spanish territory, is under independent chiefs; and the remainder of the island, including the central portion, nearly all the S., and a considerable extent of the E. coast, is under the suzerainty of Mindanao—the Bay of Iligan being the peculiar haunt of the practical tribes named Ilanos, Ilanones, or Lamocnas.

The island itself is very imperfectly known in most respects. Its mountains are of immense altitude, and are clothed nearly to their summits with deep dense forests. Numerous volcanoes, some extinct, others in full ignition, occur among them; but Mount Calatan, near the source of the river Bataan, seems the only one known, by name, to geographers. So numerous are the lakes, that the island has

its name from this circumstance. Of these, the most important is that of Malano or Lano, near the centre of the island and around which the Lanoes, of practical celebrity, are said to have extensive establishments, and strong defences. Into this lake, when pursued by the Spanish gun-boats in the Bay of Illano, they transport their large pirogues, dragging them through the mangrove swamp. From Malano they transport them to the opposite side of the island, there to commence fresh operations, long before their pursuers can reach them by doubling the cape towards the W. Among many rivers of considerable size, the largest is the Batuan, which flows into the bay of same name, and which also is said to communicate by means of the lake from which it issues with the Bay of Illano. The vegetation resembles both that of the other Philippines, and of the Moluccas, the nutmeg, cinnamon pepper, and wild quinquina, being among its products. Like the other Philippines Mindanao has none of the larger psyllidæ and curculionids, but it has buffaloes, oxen, horses, deer, wild hogs, and goats. It abounds in monkeys of various kinds, including the orang-outang, civets and musk cats, and enormous snakes and bats. As a Spanish colony gold-dust and ship-lumber are the most valuable products, and, next to these, coffee, sugar and rice. One gold-mine is worked by a Frenchman in the province of Caraga. All else is obtained by washing the soil. Teak wood is said to grow on the mountains with other useful trees. Wax and honey are collected in abundance. Caraga exports a little pepper and musk. Pearl-oysters are said to be found off Cailien, a small islet to the W. of the fortress of Zamboanga. The various tribes of the surrounding islands seem all to have their counterparts in Mindanao, a Malay character is said to mark most of their dialects. Some of the mountain tribes are reported to be ferocious even to cannibalism, while others appear to be quiet and peaceable, too lazy to cultivate the ground, and with little enough of enterprise to collect gold dust from the soil underfoot and to take it to the Spanish settlements for sale. These primitive savages retain their old superstitions. The centre of the island, and the whole of the S. coast, with exception of a small territory attached to the fortress of Zamboanga, are occupied by the practical Ilanos or Illanos above-mentioned. These profess Mahomedanism, and are subject to the sultan of Mindanao, who, however, according to circumstances, finds it more or less convenient to accept the responsibilities of their lord paramount, when princes are complained of on the one hand and ravages expected on the other. This singular people are supposed to be a cross race between the Malays and the aboriginal tribes of the island. Brave enterprising, treacherous, and cruel, they form an isolated and distinct community subject to their own admirals alone under whom they sometimes number 400 sail. Their cruises have been traced quite round Papua on the E. and W., as far as the Malayan peninsula, the coasts of Java and Sumatra, and even to Ran-goon in the Bay of Bengal, as well as through the entire range of the Philippines, whose coasts they attack, carrying off boys and girls for slaves, and sometimes even kidnapping a pedlar for whom they demand a heavy ransom. They have even been known to board the Spanish ships in Manila Bay. Pop. Spanish portion, 75,298; no estimate has been formed of the number of the native states.—(Mallat, *les Philippines*, Rixens Oceanus, Sir E. Belcher *Voyage of the Samarang*.)

MINDOLHEIM (anc. *Nestorum Nemoris*) a tn Bavaria, circle Swabia, exp. dist. on the Mindol, 28 m S.W. Augsburg with three churches, a royal palace, Franconian monastery, Kaphal female institute, an hospital poor-house, and urban asylum a mineral spring with a bathing establishment numerous mills, and manufacture of tools and armour. It was the capital of a principality which the Emperor Joseph I. bestowed on the Duke of Marlborough as a reward for the victory of Blenheim, but which was restored to Bavaria by the peace of Rastadt. Pop. 1625 Aust. of dist. 80 geo. sq. m. Pop. 15,394.

MINDEN, a gov. Prussia, prov. Westphalia, bounded N. and N.W. by Hanover, W. gov. Münster S.W. gov. Arnsberg, S. principality of Waldeck, S.E. Hesse-Cassel, E. Lippe, Hesse-Cassel and Brunswick; area, 1631 geo. sq. m. In the E. the surface is hilly, being traversed by several ridges, the highest elevation which does not exceed 1700 ft. In all the other directions, it is undulating and finely diversified.

It is remarkably well watered, and belongs to no less than three independent basins—the Weser, Rhine, and Elbe; the first two receiving its waters both directly and by numerous affluents, and the last chiefly by the Lappe. The soil with a few exceptions, is remarkably fertile. All kinds of grain are raised in great abundance, and form important articles of export. After grain, the principal crop is flax generally of first-rate quality. In particular districts, tobacco is extensively cultivated, and almost every district, without exception, raises large quantities of excellent fruit. The pastures also are good, but the cattle which graze them, though numerous are in general of very indifferent breeds. The principal mineral is iron, which is found in a great variety of forms and in particular spots, though only to a very limited extent, coal is worked. Mineral springs are numerous and several of them are in high repute. Neither trade nor manufactures have acquired an importance entailing them to particular notices. The gov. of Minden is subdivided into 10 circles. Pop. (1849), 463,220.

MINDEN, a tn Prussia, cap. above gov. 1. bank Weser, here crossed by a bridge 600 ft. long and 24 ft. broad 35 m. W.S.W. Hanover. It is one of the oldest towns in Germany, is surrounded by water with six gates, otherwise strongly fortified, and has a garrison of 2113 men. It has a fine cathedral of the thirteenth century in the early pointed Gothic style, other six churches, a gymnasium and an orphan hospital, manufactures of woollens and flens cloth, leather, refined sugar and tobacco, and an important transit and general trade chiefly in corn, linen yarn, and brandy, and also a building-dock. Minden is the seat of several important courts and public offices, and possesses a historical and antiquarian society and several educational and benevolent establishments. It was the residence of several of the early German emperors, and many diets have been held at it. In 1759 the Duke of Brunswick defeated the French in the neighbourhood. Pop. (1846) 12,782.

MINDORO, one of the larger Philippine isls., Indian Archipelago, forming a prov. of the Philippines, lat. 12° 10' to 18° 30' N. lon. 120° 37' to 121° 45' E. It lies S. of Luzon from which it is separated by the Strait of Manila, about 6 m. wide, and on the W. and S.W. is separated from the Calabian by the Strait of Mindoro, about 40 m. wide at its narrowest part, and interspersed with numerous islets and coral reefs. It is about 110 m. long N.W. and S.E., by about 58 m. broad. It is little known, but is mountainous throughout, and evidently volcanic, and the peak of Calavite is 2000 ft. and the highest to the island 3000 ft. high climate hot and unhealthy rains incessant, vegetation rank. The mountain sides are covered with thick masses of timber trees abound in mineral springs, and are said to be rich in gold and copper. A vast number of streams flow from the interior into the sea. A little rice, cacao, wild cinnamon, and various trees of the palm family are among the products. Previous to the Spanish conquest of the Philippines, the inhabitants of Mindoro were the terror of the neighbouring islands, being noted for their practical boldness and ferocity. This character they still retain in so far as they dare to indulge their hereditary propensities. They are robust and well proportioned. The capital is Calapan (about sea) Pop. 28,060.—(Mallat, *les Philippines*.)

MINDORO, or *Boracoe* Sna. Indian Archipelago. That part of the N. Pacific bounded N. by the Mindoro S. by the Pannay, Negros, and Mindanao, S.E. the Bicoloe Archipelago S.W. Borneo and N.W. Palawan; about lat. 6° 30' to 15° N. lon. 117° to 122° 30' E. It is interspersed with numerous islets and coral reefs.

MINDRENT several places, Hungary particularly.—1. A tn. Hildesheim, on Goege, 19 m N. by R. Saale, with a church, and a trade in corn, cattle, and fish. P. 5004.—2. (JAMN) A vill. Hildesheim co. Alanyer 17 m. W. Kaasch. Near it are iron and copper mines. Pop. 1147.

MINDTOWN par. Eng. Salop; 906 a. Pop. 47.

MINEHEAD a seaport, market tn. and par. England co. Somerset. The town, on R. shore Bristol channel, 21 m. N.W. Bridgewater has a townhall, custom-house, a spacious and handsome church, a Baptist chapel, an almshouse, and a quay about 1 m. long of old-fashioned houses with a terrace towards the sea. Minehead, though formerly a place of considerable trade is now of little note. A few vessels only belong to the

poor, some of them trade with Bristol in grain, bark, timber, flour, and leather, others with Wales, whence they bring coal, salt, and limestone. Area of par. 4581 ac. Pop. 1542.

MINBO [see *Minne*] a town in the north and 36 m. S.W. of Canaan, on an embankment near a sulphurous lake, and possessing a college. Pop. 8000.

MINESOTA, or **MINNESOTA**, a territory, U. States of N. America; lat. 45° 30' to 49° N. lon. 99° 30' to 103° 15' W. bounded N. by British America E. Lake Superior and territory of Wisconsin S. Iowa, and W. unincorporated territories, length, N. to S., about 860 m. average breadth, about 250 m.; area, estimated at about 83 000 sq. m. The surface is generally level, consisting of a succession of plains, on which nothing deserving the name of mountains occurs, but to which their gradual depressions and elevations often give an undulating appearance. In some places the margins of rivers become lined with high bluffs, and the ground is much broken. The drainage belongs to three basins—Hudson's Bay, which receives its waters chiefly from Red River, which flows N. and discharges itself into Lake Winnipeg, Lake Superior which is fed by numerous streams from the E., and the Gulf of Mexico, into which the far greater part of the drainage is brought directly by the Mississippi, which has its source here, and numerous affluents but more especially St. Peter's and the Missouri. In addition to these rivers, and many tributaries which traverse the territory in all directions, and make almost every part of it accessible by water beautiful lakes some of them of large extent, and almost all supplied abundantly with fish, are profusely covered over the surface. The soil is generally fertile, and admirably adapted for agricultural purposes, though at present little else is seen than interminable forests or extensive prairies, rounded over by immense herds of buffalo, and numerous varieties of larger and smaller game. Notwithstanding the general features of the surface, its elevation above the sea-level gives it an easy and thorough drainage, keeping it in a great measure free from swamps and, at the same time, securing to it a salubrious climate. The chief settlements, yet made in the territory, are confined to the promontories between the Mississippi and St. Croix on the S. and the Red River on the N. by the census of 1850, the population belonging to them was 6077. All the rest of the territory is in possession of the Chippewas and Sioux Indians who are estimated at about 12 000, and have their principal hunting grounds on the vast prairies W. of the Mississippi. The legislature of this newly created territory met, for the first time, in the end of 1849.

MINEWITHEN one of the Solly isls. England area, about 16 ac.

MINIGALA, or **MINIGULAY** an isl. Scotland, on Inverness, one of the Hebrides, 2½ m. long by 1½ m. broad P. 118. See *BARRA HEAD*.

MINGLANILLA a vil. Spain New Castile, prov. and 44 m. S.E. Cuenca, with broad, but steep and irregular streets, and a primary school. Pop. (agricultural) 1948.

MINGOLSHIM a vil. Baden, circle Middle Rhine, 20 m. S.E.E. Mannheim, with a church, a mill, and a sulphur spring. Pop. 1840.

MINGRELLA, a Russian province, bounded N. by the Caucasus, E. Imeretia, S. Guria, S.W. the Black Sea, and N.W. Great Abkhazia area, 1705 geo. sq. m. The surface is generally mountainous, but slopes gradually S., particularly towards the Black, its principal stream. The mountains are generally covered with magnificent forests, and both the lower slopes and valleys are fertile, yielding good crops of millet and abundance of excellent fruit. A good deal of silk and honey are also produced. Mingrelia nearly corresponds with the ancient Colchis, it became a vassalage of Russia in 1803, but is governed by its own prince, who takes the name of Dushan. Pop. about 70 000.

MINHO, a prov. Portugal, bounded N. by the river Minho, which separates it from Galicia, in Spain, E. Galicia, and prov. Trás-os-Montes, S. Douro, and W. by the Atlantic, length, N. to S., 80 m., breadth, 52 m. The surface is generally mountainous, being traversed by ramifications of the Cantabrian chain, particularly Gervásio, Gerês, and S. Catharina. The principal rivers are the Minho, Lima, Covado, Ave, which fall into the Atlantic, and the Tago, an affluent of the Douro. The most important products are wine, millet, flax, cork, and oranges. Numerous herds of cows graze the

pastures, and the province has long been famous for its pork. Game, both large and small, and fish, are very abundant. The principal manufactures are linen, hats, and cordary. The most important export is wine. For administrative purposes, Douro is divided into five comarcas—Braga, the capital, Barcellos, Guimarães, Melico, and Ponte-de-Lima. Pop. 295 923.

MINHO, [see *Minho*, Spanish, *Miño*] a river of the Iberian peninsula, which rises in the sierra Mondancio, in the N.E. of Galicia in Spain, flows directly S. through a very mountainous country, passing the town of Lugo. About 6 m. above the town of Ormaiz, its volume is nearly doubled by the accession of the Sil, which joins it on the left. It flows thence S.W., passes the town of Ribadavia, forms part of the boundary between Spain and Portugal and falls into the sea by two mouths, between which a small island is formed, after a course of about 150 m. It abounds in salmon and lampreys.

MINIATO (Baz) or **SARMINIATO**, a town, Tuscany, 33 m. S.W. Florence, on the narrow ridge of a hill, near the confluence of the Arno and the Ercoli near the Arno. It is well built, is the see of a bishop, and has a court of first resort, a handsome cathedral, and several other churches, an episcopal palace, a spacious seminary, a lyceum, two monasteries, and a large hospital. Pop. (1853), 5464.

MININGSBY, par. Eng. Lincoln, 780 ac. Pop. 493. **MINIEN**, an isl. W. coast Irel. on Galway 14 m. S.E. of Lough, forming one side of Ard Bay. It is about 2 m. long and contains about 500 chiefly fishermen.

MINNAB a tn. Arabia. See *OWAS*.

MINNIGAFF, par. Scot. Kirkcubright 86,787 ac. Pop. 2054.

MINNYTHIVE, a vil. Scotland on and 17 m. N.W. by W. Dumfries with an ancient cross, and near it is a monument to the memory of the Rev. James Benwick, the last who suffered martyrdom for religious freedom in Scotland. P. 687.

MINORCA [Latin, *Balearia Minor*, Spanish, *Menorca*, French, *Minorque*, Dutch *Minorke*] an isl. Mediterranean belonging to Spain, and so called from being the second largest of the Balearic group; lat. 39° 17' to 40° 4' N. 4° 48' and 4° 50' E. greatest length, N. to S. 8.8 E. 35 m., average breadth, about 10 m.; area, 250 geo. sq. m. It is situated E.N.E. of Majorca from which it is separated by a strait of 27 m., and to the province of which it is administratively attached. The coast is very much indented on all sides except the S. and generally presents a succession of bold headlands, enclosing small creeks and bays, of which several form good harbours. Of these the best and most frequented is Port Mahon, the capital of the island. The surface is very much broken, and rises from all sides towards the centre, where it becomes mountainous, and in Mount El Toro attains the height of about 5000 ft. The soil is not generally fertile, still, in good seasons, the quantity of wheat and barley grown is sometimes equal to the consumption. The other principal products are all, wine, hemp, flax, oranges and lemons. Some good cheese is made, and a considerable number of horned cattle, sheep, mules, and asses, are kept. Considerable attention is paid to the rearing of bees. Iron, copper and lead, are found in abundance, but, owing to the scarcity of fuel for smelting and not much, and marble, porphyry, and alabaster, superior. It is said to be three of Italy, might be worked in several districts. The manufacture is limited to a few coarse articles of primary necessity, chiefly of hemp and flax, and the trade merely employs a few coasters, and an occasional vessel from abroad, loaded chiefly with hides and timber. The inhabitants have a good physical form, are by no means deficient in courage, make excellent sailors, and still use the sling with the dexterity for which they were so famous in ancient times. They are, however, very indolent, ignorant, and bigoted. The first possessors of Minorca were the Carthaginians, who drew from it, in common with the other islands of the Balears, a number of excellent sailors, who distinguished themselves during Hannibal's wars in Italy. It afterwards passed successively into the hands of the Romans, the Vandals, and the Moors. The last was expelled in 1585 by the Spaniards. During the greater part of the 18th century it belonged to the British, who finally ceded it to Spain at the peace of Amiens. For administrative purposes, it is divided into the four districts of Mahon, Alayor, Mercader, and Ciudadela. Pop. about 40,000.

MINORI, a. to Naples, prov Principato-Caro, dist. and 7 m. W. W. Salerno, near the Gulf of Salerno. It is the seat of a Greek bishop, suffragan of Amalfi. Pop. 2200.

MINQOW ISLANDS, a group, E. Africa, Mozambique Channel, of N. W. coast Madagascar, lat. (N point) 17° 40' 30" S., lon. 48° 29' E. They amount to about 27, and with exception of two or three which are low and of coral formation, are lofty and precipitous, presenting ranges of basaltic columns. In the Great Minqow, which is the largest of the group, and is of a peculiar shape resembling a pair of compasses, rather more than half opened, with one leg 44 m., and the other nearly 8 m. long these columns are slender, perfectly straight, and ascend unbroken about 60 ft. up the precipice, presenting a grand and imposing appearance while, from the base of the precipice, another mass of curved basaltic columns descends to the depth of 12 fathoms.

MINSHULL CHURCH par Eng Chester 2286 ac.

PO. 280.
MINSK, a gov. Russia, bounded N. and N. E. by gov. Vitsebsk, E. Mohilev and Osmolov, S. Kiev and Volynia, W. Grodno and Wilna. lat. 51° 20' to 55° 40' N., lon. 25° 20' to 30° 40' E. In shape it bears a considerable resemblance to an isosceles triangle, with its vertex in the N. and its base resting on the S. greatest length, N. to S. 290 m., average breadth, 160 m. area, 18,517 geo. sq. m. This government, though generally flat, is traversed in the N. by part of the great dorsal ridge which forms the watershed between the basins of the Baltic and the Black Sea. To the former basin the N. portion sends its waters by the Dvina (which, besides forming the N. boundary of the government, receives the Dniepr from within), and by the Mamel or Neman, which, together with its affluent the Vilia, runs in the government. To the latter basin the S. portion sends its waters by the Dnieper which, besides bounding the government on the S. E., receives from it the Beresina and the Pripiet, each augmented by numerous tributaries. In this S. portion large marshy tracts extend on both banks of the Pripiet, and in spring are generally under water, giving the whole country the appearance of one vast lake. In most circumstances, anything like a regular system of agriculture is altogether impracticable. Where the surface is more elevated, and less exposed to inundation, it is to a great extent covered with sand or with a poor sandy soil being only in particular patches that a fertile loam occurs. Barley and oats are grown in far greater quantity than might be expected in the circumstances, and fully equal to the consumption. Hemp and flax also are raised in considerable quantities, and hops and tobacco occasionally. The chief wealth of the country is in its forests, which occupy a large part of the surface, and, where the ground is dry, yield excellent timber. A great proportion of the inhabitants are employed in felling it, and preparing it for market. Neither manufactures nor trade have made much progress. The former are in a great measure confined to linen-weaving, the latter consist chiefly of wood, mats, potash, hemp, flax, honey wax, and some horses and horned cattle. The inhabitants are mostly Russians, of the orthodox or united Greek church. But E. Galicia is generally professed by the higher classes. For administrative purposes, Minsk is divided into 10 districts or droles—Minsk, the capital, Wilna, Dvina, Beresina, Igumen, Bobruisk, Slutsk, Pinsk, Moryt and Berezovitsa. Pop. (1850) 1,067,000.
MINSK, a. to Russia, esp. above gov., on the Svislitsch, 420 m. S. W. St. Petersburg. It is irregularly built with narrow streets houses generally mean, and of wood, but some fine edifices occur among the palaces of the nobility. It is the seat of a Greek bishopric, and of a S. Catholic bishop, and contains two castles, several Greek and S. Catholic churches, a Greek monastery, a synagogue, and a gymnasium. It has some manufactures of woollen cloth, hats and leather, and a considerable general trade. Pop. (1843) 23,502.

MINTO ISLAND, one of three islands, forming the Amphitrite or Antoon group of the Low Archipelago, in the S. Pacific Ocean lat. 21° 23' S. lon. 136° 57' W. It occupies the centre of the group, is low and wooded but has a heavy surf on the beach, and no appearance of harbours.

MINTY par Eng. Wiltshire, 8470 ac. Pop. 775.

MISDOGLANO or **GHARAPAWA** a vil. and com. Tuscany chiefly and 27 m. N. W. Lucca, in a narrow gullet inclosed by lofty mountains with a church. Pop. 2348.

MINVER (Scot.) par Eng. Cornwall 8688 ac. P. 1275.

MINWERE, par Wales, Pembroke 1957 ac. Pop. 94.

MIOGGLIA a vil. and com. Italy Padua, div. Alessandria prov. and S. Aq. near the Erio with a modern church, remains of an ancient strong castle, and a trade in corn, wine, and dairy produce. Pop. 1078.

MIG-VANO a lake, Norway, in the Fillefjeld at the N. foot of the lofty Mount Grindadalen, in the S. W. part of Christiania bail. Brudberg. It forms a narrow expanse, stretching W. to E. about 24 m. with a breadth of not more than 1 m., and is the principal source of the Balua.

MIOSEN, a lake, Norway, prov. and 86 m. N. E. Christiania. It is of a long irregular shape stretching N. W. to S. E. 65 m. with a breadth nowhere exceeding 9 m. It receives its chief supply of water from the Lognon, on the N. W. and discharges itself at the S. E. by the Warren, an affluent of the Glommen. A steamship plies upon it.

MIPITU, a m. Brazil prov. Rio-Grande-do-Norte, on the small river of same name and on the Lake Papari, 40 m. S. S. W. Natal, and 20 m. from the sea. It has a church and a primary school and raises, within the district, large quantities of rice, millet, manioc, tobacco, and sugar. The woods abound with fruit-bearing trees, and both the rivers and lake are well supplied with fish. Pop. 8000.

MIQUELON two is. belonging to France N. America, off S. coast Newfoundland at the entrance of Fort St. Pierre, and forming, with the neighbouring island of St. Pierre, a French colony, area, 100 ac. Pop. (1849) 2101.—Great Miquelon is in lat. 47° 4' N. lon. 56° 20' W. immediately S. of it is Little Miquelon. Both islands abound in wood, and the inhabitants, amounting in 1849, to 510, are principally occupied in fishing.

MIRA—1. A. to Spain New Castle. prov. and 43 m. S. E. Orense, indifferently built. It has a church, courthouse, prison school, and several hermitages, one of them in a beautiful stuccoed grotto manufactures of earthenware several mills, and a trade in corn, fruit, hemp, and silk. Pop. 1519.—2. A. to and par Portugal prov. Douro com. and 14 m. S. by W. Aveiro, on a small is. in the bay of the Atlantic inhabitants almost exclusively fishermen. Pop. 5080.—3. A. to Austria Italy gov. and 10 m. W. Venice, on the Brenta-Morla. Pop. 2800.

MIRABELLA a. to Naples, prov. Principato Ultra, dist. and 10 m. S. W. Arzano. Near it a great number of Roman antiquities have been found. Pop. 3350.

MIRABELLO a vil. and com. Italy Piedmont, div. Alessandria prov. Casale, near Oleggio, on the bank Grana. It has a church, a Capuchin monastery a castle, and a trade chiefly in wine. Pop. 2248.

MIRABELLO a vil. and com. Italy Lombardy prov. and about 8 m. N. Pavia where the battle of Pavia was fought, in 1525 when the French were defeated and their king Francis I. taken prisoner. Pop. 1678.

MIRAFLORES or **LA SIERRA**, a. to Spain New Castle, prov. and 80 m. N. Madrid, on the slope of the mountains which separate the two Castles. It has a church, courthouse, and primary school flour-mills and a trade in fine wool, fruit, and charcoal. Pop. 1542.

MIRAGENIL, a. to Spain See PORTUGAL.

MIRAMACHI a bay and river British N. America, E. coast, New Brunswick. The bay is 20 m. wide at its entrance, by 21 m. inland and contains several islands, of which Fox and Passage islands are the most considerable. The river falls into the bay after a N. E. course of about 80 m. of which 40 m. are navigable for large vessels. On its banks are the towns Chatham and Newmarket. A considerable quantity of timber is shipped from the river and bay.

MIRANDA, two places, Portugal.—1, (de-Carvo), A. M., prov. Douro 15 m. S.E. Coimbra, on the Douro, here crossed by two bridges. Pop. 3344. 2, (de-Carvo), (San. Contado) A. M., prov. Trás-os-Montes, 7 bank Douro, which separates it from Spila, 46 m. N.E. Moncorvo. Once a place of some importance, and the site of a bishop. It has still some ruinous fortifications, and makes as a city. Pop. 460.

MIRANDA DE ALBA a tn. Spain, prov. Navarra, l. bank Arga, here crossed by a bridge, 23 m. S.E. E. Pamplona. It has a church, with two towers and a fine facade, a court house, prison, primary school the remains of a Moorish castle, a large flour-mill and a trade in cattle and agricultural produce. Pop. 1250.

MIRANDA DE EUGO, a fortified vil. Spain, Biscay prov. and 41 m. N.E. Burgos, intersected by the Ebro. It has a substantial townhouse, a Latin grammar, and a primary school three suppressed convents a castle with barracks, on an eminence commanding the town an hospital for the poor, and three parish churches. Agriculture, and the manufacture of linen brown paper potteryware, and leather are the chief occupations. Pop. 1742.

MIRANDA DEL CASTAÑO a tn. Spain Leon prov. and 46 m. S.W. Valladolid. It is walled, has four gates, is defended by an ancient castle, and has a church, townhouse, and prison, a primary school an hospital manufacture of linen and a trade in agricultural produce. Pop. 1128.

MIRANDE (Latin *Miranda*) a tn. France, dep. Gers, l. bank Rasse 10 m. S.W. Auch. It is clean well built has walls still in good condition four gates, leading, by four large streets, to the centre of the town which is occupied by a square manufacture of leather and a trade in corn, wool, heavily quilts, &c. Miranda possesses a court of first resort. It was founded in 1239 by the third count and became the capital of the county of Armagnac. Pop. 3706.

MIRANDELLA (San. Coladour) a tn. and par. Portugal prov. Trás-os-Montes, 23 m. N.W. Moncorvo, l. bank Taa, here crossed by a magnificent bridge of 18 arches. It is surrounded with old ruinous walls, and contains an hospital. Pop. 1320.

MIRANDOLA, a tn. duhy and 18 m. N.N.E. Modena. It is walled and regularly fortified well built, the site of a bishop, and has a fine cathedral a venerable palace, long occupied by the Visconti when Mirandola was the capital of an independent duchy, several convents and hospitals, and several silk-mills. One of the sovereigns, known by the name of Pico di Mirandola, acquired a distinguished name in literature. Pop. about 4000.

MIRANO a tn. and com. kingd. of Italy gov. Venice, prov. and 13 m. N.E. Padua, on the Mazon at the commencement of the canal of Mirano. It lies in a plain has district courts and offices, a church, and three oratories. Pop. 2444.

MIRAYE a tn. Spain Catalonia, prov. and 80 m. S.W. Tarragona, with a church an ancient Moorish castle, and a primary school manufacture of earthenware, two distilleries, tanneries oil-mills and some transit trade, which employs a number of the inhabitants as militiamen. Pop. 1726.

MIRE a vil. France, dep. Indre-et-Loire, about 7 m. from Tours, famous for the great battle fought in its neighbourhood in 781, when Charles Martel gained a signal victory over the Saracens, and slew Adersma their leader.

MIREBALAIS, a district France, which belonged to the upper division of the former prov. Poitou, and is now included in dep. Vendée. Its capital was Martheim.

MIREBAU (Latin *Mirabau*) a tn. France, dep. Vienne, 17 m. N.W. Poitiers. It has a church, founded in 1217, and a trade in corn, wine, wool, and sheep. Pop. 2445.

MIRECOURT (Latin *Miracour*) a tn. France dep. Vosges on the Madon, 17 m. N.W. Epinal. It is poorly and irregularly built, has a court of first resort and commerce, and a small public library of 7000 volumes. Important manufacture of lace and silk, and is the central locality of a district famous for making all kinds of musical instruments above 6000 persons being so employed within the town and neighbourhood. It has some trade in articles of tinware, sheet-iron, denim, wine, and sheep. Pop. 5208.

MIREPOIX (Latin *Mirapois*) a tn. France, dep. Ariège, on the Lers, here crossed by a handsome bridge, 16 m. N.E. Foix. It is well built, and clean has a church, with a fine choir, surrounded by seven chapels; a well-kept-out cemetery,

a communal college, hospital, and several schools; manufacture of cotton linen, flannel, coarse woollens, varnished, and soap, and a trade in corn and poultry. Iron, jet, and coal are wrought in the neighbourhood. Pop. 2369.

MIRFIELD, a vil. and par. England, W. Riding of Yorkshire. The village, situated in a beautiful and fertile district, l. bank Calder near the Lancashire and Yorkshire railway about 3 m. S. by W. Dewsbury, is a large struggling place extending for a considerable distance along the river and has a neat and commodious church, Methodist, Independent, Baptist, and Moravian chapels considerable mansuaries, chiefly of coarse woollens, exported to Ireland and S. America; and cards for machinery some large flour-mills and maling establishments, and a trade in mineral produce. The village including the hamlets of Batsford and Hopton, has an area of 3890 ac., is finely undulated and contains several beautiful country seats among which those of Kirkstall Hall and Blake Hall are conspicuous. Pop. 6968.

MIRGOROD, a tn. Russia, gov. and 50 m. N.W. Poltava, l. bank Khorol. It is the chief seat of the ecclesiastical authorities of the government, contains three churches, and, besides carrying on an important general trade, has four yearly markets. Pop. (1851) 6419.

MIRIBEL (Latin *Miribel*) a tn. France dep. Ain, near 7 bank Rhone, 81 m. S.W. Bourg. It is supposed to occupy the site of a Roman camp. An old castle in the neighbourhood, and many other ancient remains, are supposed to belong to Roman times. Pop. 1983.

MIRIM, or *Mazun*, a considerable lake, S. America, in central territory, between Brazil and Uruguay, close upon the coast, N.E. extremity in lat. 32° 10' S. It is about 90 m. long by 25 m. broad at the widest part, and is connected with the Laguna de los Patos, a still larger lake, situated further N.W. by the river Mirim 30 m. in length, and navigable. Between it and the sea is a third lake, called Mangalica.

MIRITI a vil. and par. Brazil, prov. and 10 m. N.E. Rio-de-Janeiro. It contains a parish church built of stone and has brick and tile works, and some trade in rice, millet, and coffee. Pop. 3000.

MIRK (Cape), Africa, N.W. coast, lat. 19° 35' N. lon. 16° 25' W., a very low sandy point, near the S. termination of the great bank of Arguin, and by some of the charts of which it is represented by the approach of all large vessels. **MIROPOLE** a tn. Russia, gov. and 60 m. S.W. Koursk on the Psel. It is surrounded by an earthen rampart and a fosse and has seven churches inhabitants chiefly agriculturalists. Pop. (1849) 7651.

MIROTTI a tn. Bohemia circle Frachin, on the Lomnitz, 50 m. S.W. Prague, with a church, synagogue, town house, school and hospital manufacture of linen and potash, and some general trade. Pop. 1800.

MIROW a tn. Malabar Scilly, cap. hill and on a lake of same name, 11 m. W.S.W. New Bickley; with a church two cardus with gardens a normal school, manufacture of woollen cloth and tobacco, dye-works, and a mill. Pop. 1568. Area of soil. 60 sq. ac. m. Pop. 6607.

MIROWITZ, a tn. Bohemia, circle Frachin, 43 m. S.W. Prague with a church, school and townhouse inhabitants employed in agriculture and weaving. Pop. 1100.

MIRZAPORE, a tn. and dist. Hindoostan presid. Bengal prov. Achehab. The town, r. bank Ganges, 53 m. S.W. Benares, lat. 25° 10' N., lon. 85° 55' E. is large and flourishing, well built, consisting of handsome European houses, native habitations, and clusters of Hindoo temples crowding the banks of the Ganges. It is a place of extensive inland trade, and the principal cotton mart of the province. It is also noted for its manufacture of carpets, and various cotton fabrics, and has likewise some manufacture of iron. The population is remarkable for activity and industry. Pop. above 100,000. Area of dist. 6285 sq. m. Pop. 381,298.

MISCHKIN a tn. Russia gov. and 59 m. W. by N. Jaroslavl l. bank Volga, with a church some general trade, and several annual fairs. Pop. 1000.

MISERDEN, par. Eng. Gloucester 2484 m. P. 409.

MISINTO, or *Misinto*, a tn. Austrian Italy, prov. Milan, with a church and chapel, a singular charitable endowment, by which several sums are annually bestowed upon the poor and determined, not by the wants or merits of the individuals, but by lot. Pop. 1160.

MISSKE, several places Hungary particularly - 1. A vil. Hither Demeo, on Presb, about 55 m. from Baja with a church. Pop 1144. - 2. A vil. Thier Thier, on Arad on the Tis. 6 m. from Nagy-Zsened, with two churches, and a trade in cattle and agricultural produce. Pop. 1237.

MISSKEACE, a to Hungary esp. co. Bored 1 bank. Bowa, 34 m. N. E. Kila. It is well built, and has two public squares and a great number of handsome houses a fine parish church a Greek church with a tower faced with copper; two Protestant churches a Minorite convent with a church of modern construction, a synagogue, county-hall a R. Catholic and a Protestant gymnasium, a head, national, and several other schools. The inhabitants are chiefly employed in agriculture and have a considerable trade in fruit, and is a kind of wheat bread for which the town is famous. Besides the weekly market, there are five annual fairs which are important. Pop. (1846) 80 000.

MISSKEITZ, or **MISSKEITZ** a market in Austria, Moravia. circle and about 18 m. from Znojmo on the Taya. With a church and three annual fairs. Pop 1058.

MISSKEO or **MISSKEO** also **MISSKEO**, a to and par. Swit. near, on Grisons esp. dist. the residence of a judge. It has a parish church. Pop in and some. 838. dist. 16,944.

MISSKELEMBE a m. Nabis, peninsula of Bessar. S. of Kharsoo, about four hours W. from the Bahr-el-Azrek. It is situated on a bare plain, and consists of houses built of white stalks, in the form of a crescent, round a large square, with a deep wall in the centre. A few better houses, though only of mud, are occupied by upland slave-merchants. The market is very numerous attended, and is the resort of many merchants from Souakia, who barter cotton, spices and perfumes, for gold, while those from Abyssinia bring slaves and a few horses.

MISSKEBEND two par. Eng. Bucks. - 1. (Great) "731 ac. Pop 309." - (Little), 5173 ac. Pop 1141.

MISSIONES, a territory, La Plata, E. of Corrientes, between the rivers Parana and Uruguay, to the boundary line of Brazil. The surface of the country is undulating, and the soil fertile. The climate is moderately warm. Productions - rice, maize tobacco, sugar and cotton. It was the seat of the most famous missions of the Jesuits, who here endeavored, not without considerable success, to civilize the surrounding savages. When the order was expelled from S. America, this district contained 100,000 persons, inhabiting 80 towns, reduced, in 1825, to about 1000. Candelaria, the capital 1 bank Parana, had formerly a population of more than 8000.

MISSISSIPPI one of the E. States of N. America lat. 30° 10' to 35° 4'; lon. 85° 10' to 91° 25' W. bounded N. by Tennessee, E. Alabama S.E. the Gulf of Mexico, S and S.W. Louisiana, and N.W. Arkansas. length, N. to S. 325 m., greatest breadth, 122 m. area, 47,114 m. In shape it is very regular its N.E. and S.W. limits being defined by lines which are almost mathematically straight, while the Mississippi on the W. and the Gulf of Mexico on the S., give it the advantage of great natural boundaries, the former winding along its frontiers for 580 m., and the latter washing from 70 m. to 80 m. of coast. From the Gulf northwards, for about 100 m., is almost a desert flat, covered with pine forests cedar swamps, prairies, and humped marshes. More inland the ground rises, and becomes much broken by low hills, but nowhere becomes mountainous. Some ranges of bluffs follow the course of the Mississippi, at greater or shorter distances from its banks. This river receives the far larger part of the drainage, being augmented from within the state on its E. bank by the Yazoo, and its tributary the Sandoway the Big Black, the Homochitto and many minor streams. The other rivers of consequence are the Pearl and Pascagoula, which proceed directly to the Gulf and the Tombigbee, which, after watering the N.E. part of the state, quits it for Alabama. In the

N., where the thermometer ranges from 26° to 94°, the climate is tolerably mild and agreeable; but in the S., below lat. 35°, it is both extremely hot and unhealthy. The vegetation has corresponding diversities resembling that of the temperate zone in the N. and presenting among its trees several kinds of oak elm, maple, hickory walnut, dog-wood, and cotton-wood, while the vegetation of the S. is almost tropical. Throughout this region the pecanot abounds, and venomous snakes are very common and not confined to it, but over the whole state, the turkie-dove, mocking-bird, and humming-bird are seen. Where the pine forests extend, the soil is light and comparatively barren, in the N.W., on the borders of the Yazoo, it is composed of red brick mould in the lower alluvial districts it is of remarkable fertility but often suffers severely from inundation. The staples of the state are first cotton and next sugar the other crops cultivated are chiefly Indian corn, bananas, sweet potatoes, to beco and indigo. Manufactures and trade are of very limited extent. Few internal improvements have been made and the only railroads yet constructed are the Vicksburg and Brandon, 59 m. in the Mississippi, only completed between Natchez and Malone 23 m. long, and a small portion of the St. Francisville and Woodville. The most numerous religious denominations are the Methodists and Baptists the number of scholars at common and primary schools was (1850) 6236. By the constitution of 1817 when the state was first formed every free male white, 21 years of age, enjoys the suffrage. The legislature consists of a senate and house of representatives the latter not less than 36, nor more than 100 are chosen every second year, the former, not more than one third, nor less than one-fourth, of the representatives, are elected for four years but one half are renewed every two years. Pop. (1850) 806,555 of whom 808 898 are slaves.

MISSISSIPPI (Great waters), the principal river of N. America and wholly within the territory of the U. States, passing through more degrees of latitude than any other river in that continent, perhaps than any other on the globe. The source of this mighty stream is pretty generally believed to be Itasca Lake, the lac la Pêche of the French, a beautiful sheet of water, 7 m. or 8 m. in extent, lying among hills of glacial formation, near lat. 47° 10' N. on 95° 45' W. above sea-level. The stream which issues from it and which constitutes the head of the Mississippi is 20 ft. broad and 3 ft. deep. It first flows in a N. direction through smaller lakes to Lake Travers and, leaving the lake near the place of entrance, it turns to the E. through Cass Lake to Little Lake Winnepig, from which it takes that general S. course which it afterwards keeps to the Mexican Gulf into which it discharges itself about lat. 33° N., at the extremity of a long tongue of land which stretches 50 m. into the sea, by five narrow silted passes, with bars on which are 18 ft. to 14 ft. of water. It has formed a delta considerably larger than that of the Nile. The breadth of the river nowhere corresponds with its length, its greatest width not exceeding half a mile while, for 2000 m. from its entrance into the Gulf of Mexico, no perceptible difference in its breadth occurs. Its entire length is estimated at 1810 m. The Mississippi is a rapid, devastating torrent loaded with mud its violent floods, from the melting of the snow in the high latitudes, sweep away whole forests, by which the navigation is rendered very dangerous, and the trees being matted together in masses many yards thick, are carried down by the spring floods and deposited over the delta and Gulf of Mexico, for hundreds of square miles. The number of its tributaries of the first second and third class, are so numerous that it would be difficult even to name them. Amongst those of the first class are the Missouri, Arkansas, and Red River, joining it from the W., and the Ohio from the E. Before their junction, the Missouri is a stream much superior to the Mississippi, both in length and volume, and makes a delta much larger than the Rhine. It is sometimes considered the main stream of the Mississippi, in which case the length of the latter would be 4265 m. The Mississippi is navigable for 2240 m., and, together with the Missouri drains an area of about a million and a quarter of square miles. No tides enter the Mississippi, but it is subject to several inundations. Notwithstanding this, however, and other disadvantages, its trade and navigation are much greater than those on most rivers of the continent in the N. hemisphere 700 vessels, besides a large fleet of flat-bottomed boats, navigating its

vaters in 1852. The most important towns, close on its banks, are St. Louis and New Orleans.

MISSISSIPPI, a maritime str., Turkey in Europe, prov. Roumania, on the Black Sea; lat. 45° 38' N. lon. 27° 40' E. **MISSOULONGHII** a tn. Greece, Livadia, on an extensive flat, thickly wooded with olive-trees, and watered by the Acheolon and Arvenas, 23 m. W. Lepanto. It is small and otherwise defended, so as to be a place of considerable strength. It greatly distinguished itself during the war of independence, when it was besieged by the Turks, and though ultimately reduced by famine, caused an immense loss to the besiegers. The walls are washed by the sea, but, owing to a vast shoal, it is only accessible by sailing boats. Other vessels cannot approach nearer than from 4 m. to 5 m. Lord Byron died here in 1824.

MISSOURI, par Eng. Notis 6129 an. Pop 837

MISSOURI, one of the U. States of N. America lat. 36° 30' to 40° 30' N. lon. 89° 30' to 96° W., bounded N. by Iowa, E. the Mississippi, which separates it chiefly from Illinois, but partly also from Kentucky and Tennessee, S. by Arkansas, and W. by the Indian territory from which it is partly separated by the Missouri. Length N. to E. 315 m., breadth, 380 m., area, 67,431 sq. m. The surface, though nowhere so elevated as to become mountainous is traversed by numerous hills and swelling ridges, and is more diversified in its features than any other state of the Union. In the S. E. corner it is almost an alluvial flat. Among the most remarkable objects presented by the state are its two hills, situated in St. Francois co. to the W. of Fredericktown and composed of micaceous sand of iron, of which it yields about 80 per cent. The one rises 850 ft. above the plain, and is 1½ m. across its summit, the other called the Pilot Knob, has a base 1½ m. in circuit, and a height of 808 ft. Many other mineral treasures, including lead, copper and beautiful marble, are found in different districts. The most important rivers are the Mississippi and the Missouri, which here unite their accumulated volumes. The former as already mentioned, is continued without interruption, along the whole of the E. frontier the latter after bounding the state on the S. W. winds across it W. to E. dividing it into two unequal portions, and receiving various navigable tributaries—the Lamoine, Osage, and Gasconade, on the r., and the Grand and Chariton, on the l. The only other important streams are the Salt, which joins the Mississippi 86 m. above the Missouri, the Maramee, which joins it 18 m. below St. Louis the White and the St. Francois, in the S. E. and the St. Charles, in the S. W. The most fertile tract of country within the state, is that which is situated within the fork of the Osage and the Missouri, but the whole land to the N. of the latter river is equally remarkable for its picturesque scenery, and its agricultural and pastoral capabilities. The crops of Indian corn, oats, and wheat, are usually large. Flax, hemp, and tobacco, also form important staples and immense numbers of cattle, sheep, and swine, graze the pastures, or subsist on the meat of the forest. The only manufactures of any consequence have their chief locality at St. Louis, the foreign trade is limited, but there is a very large and increasing amount of internal traffic, for which the numerous navigable streams afford unobstructed facilities. No railroads have as yet been commenced, though several have been projected. The largest religious denominations are the Methodists and Baptists, but the Presbyterians and E. Catholics have also numerous congregations. Education, in its higher branches, has been well provided for by the Missouri and St. Louis universities and several colleges, but the common school system is still very defective. The legislature consists of a senate and house of representatives, both chosen by the universal suffrage of the whites. The former for four years, one half retiring every second year and the latter for two years. Jefferson city is the capital Missouri, originally a portion of the territory of Louisiana, acquired by the U. States in 1803, was created and admitted into the Union in 1820. Pop. (1850) 622,044, of whom 87,423 are slaves.

MISSOURI, a river, N. America, which is formed in the Rocky Mountains by the junction of three branches, called Jefferson's, Madison's, and Gallatin's rivers, about lat. 45° 20' N., and lon. 109° 30' W. It winds circuitously along the base of the mountains, then E., till it reaches the N. W. extremity of the territory of Missouri. Here it begins to flow

S. E. separating that territory the state of Iowa, and the N. W. of that of Missouri, on the E. from the unexplored and unsettled territories on the W.; then traverses the state of Missouri W. to E., and, on reaching the W. frontier of Illinois, joins the Mississippi on its r. bank, and more than doubles its volume. Its whole course, estimated from the highest point of Jefferson's river, is about 2600 m. For the first 500 m. it presents scenes of almost unequalled grandeur, forcing its way through narrow gorges, which rise perpendicularly from the water's-edge, and forming over stupendous cataracts; but, for the remaining 2000 m., there is no serious impediment to its free and uninterrupted navigation. Its affluents are very numerous on both banks, but by far the most important of them, the Yellow Stone, the Nebraska or Platte, and the Kansas, fall by the same mountain ranges in which it has its own source, and each, at least, 600 m. in length. At its junction with the Mississippi, the channel of the Missouri contracts, and does not exceed half a mile in width.

MISSISSIPPI (LAKES), British N. America, intersected by lat. 50° 30' N. and by lon. 71° 30' W. length, N. E. to S. W. 70 m. greatest breadth, 20 m. It is very irregularly shaped. The Humber flows from it W. into Jamaica's Bay.

MISTEK, a tn. Austria, Moravia, circle Friesen 10 m. W. S. W. Tschann; with a church a castle, and manufactures of woollen and linen cloth. Pop. 2620

MISFELBACH a tn. Lower Austria, on the Ennsbach 30 m. N. N. E. Vienna. It is one of the largest and best-built market towns of Lower Austria; has a church a Barnabite cloister, a hospital, and an important corn-market; inhabitants chiefly employed in agriculture and weaving. P. 2468

MISTERBLANCO a tn. Sicily prov. and N. W. Catania. It has thermal baths. Pop. 3000

MISTERTON, three parishes, England.—1 Leicester 3050 an. Pop. 589.—2 North 5420 an. Pop. 1748.—3, Somers 1417 an. Pop. 564

MISTLEY par Eng. Essex 2115 an. Pop. 1616

MISTRA a tn. Greece, in the Morea, and 27 m. S. by W. Tripolita. It rises in an amphitheatre, upon a mountain which faces the E. and is surrounded by walls in a very ruinous state, in which are two gates. It is intersected also by a stream, has narrow, dirty, and very uneven streets, but the houses, surrounded with cypresses, plane-trees, and orange-trees have a pleasing and picturesque appearance. On a detached rock rising about 500 ft. above the adjoining plain is the castle or citadel a Venetian fort of an octagonal form and surrounded with a regular crenelated wall, nearly in ruins. Within it are a mosque, some remains of marble, and some wretched habitations, built of the spoils of antiquity.

MISTRETTA (ann. *Assutro* or *Ayutro*), a tn. Sicily prov. and 65 m. W. E. W. Messina. It occupies a lofty eminence near 1 bank Egiziano, and in its vicinity is a petroleum spring. Pop. 8069

MISZLA, a vil. Hungary Thither Danube, so. and 10 m. from Temes with two churches Pop. 1379

MITA, a tn. Central America Guatemala, in the Department of Chiquimala. Pop. 3300

MITAU a tn. Russia. See **MIRAVIA**

MITCHEM par Eng. Surrey, 2998 an. Pop. 4641

MITCHEL par Eng. Monmouth, 3000 an. P. 360

MITCHELDEAN a market tn. and par. England, co. and 11 m. W. Gloucester with a church and some manufactures of leather Area of par. 690 ac. Pop. 683

MITCHELDEVER, par Eng. Hunts 9840 an. P. 1069

MITCHELMERSH, par Eng. Hunts; 8983 an. P. 1203

MITCHELSTOWN, par Irel. Meath; 973 an. P. 245

MITCHELSTOWN a market tn. Ireland, co. and 27 m. N. by E. Cork on the railway of a hill with a square, an elegant Gothic parish church a handsome cruciform E. Catholic chapel Kingston college, a benevolent institution for maintaining 12 Protestant gentlemen and 18 gentlemen a market and court house, barracks, and a bank trade is flour, linin and corn, sent to Cork, Youghal, and Limerick. Here it is flax and tacking mills a blanket manufactory, an extensive bleachfield, and Mitchelstown castle, the mansion of the Earl of Kingston. Pop. 8079.

MITFORD, par Eng. Northumbria, 9585 an. Pop. 700.

MITTIERO, or **MITTIANO**, one of Cook's ill., S. Pacific lat. 30° 1' S., lon. 157° 34' W.; length, N. to S., about 4 m., breadth, 1 m. It lies low, and is generally arid and sterile.

The inhabitants have a mean and wretched appearance, and, owing to famine, and the invasion of neighbouring islanders, have been reduced to about 100.

MITLA, a vil. Mexican confederation, state and 80 m. N. S.E. Oaxaca, formerly the burying-place of the Tzapotzotz monarchs. Pop. about 700.

MITIF ISLAND one of the Queen Charlotte isls. S. Pacific Ocean lat. 11° 55' S. lon. 170° 9' E. (n.) It is a barren uninhabited rock, with two remarkable promontories, one resembling a mitre, the other a steeple. It was discovered by Captain Edwards in 1791.

MITROVICA or **MITROVICA**, a to Anstris, Belavoua, dist. and 22 m. S.W. Petrovaradin near L. bank Save. It contains a E. Catholic and three Greek churches, a castle and two schools, and has a considerable trade in cattle and hides. Pop. 5200.

MITSOO ORR or **BIWAKO** a great lake, Japan Isl. Nippon, said to have been formed in one night in 235 n.c. by an enormous depression of the ground, which occurred simultaneously with the upheaving of the mountain Fum Yama, the loftiest of all the mountains of Japan. It is said to measure about 70 m. S. to N. and 21 m. E. to W. In its N. part is the lake of Tsubo-ho, which emerged from the bottom of the water in 82.

MITTAGONG RANGH, a range of hills in New S. Wales, co. Cumberland. It is the name also of a town in the same co. 56 m. S.W. from Sydney.

MITTAU or **MITAU** (*Latvia, Jelgava*) a to Ruzena, cap. gov. Courland, in a low flat, and sandy district on the Aa, over which is a bridge of boats, 20 m. S.W. Riga. It covers a very large space, of which, however, a considerable portion is occupied by gardens and is on the whole very indifferently built. Houses chiefly of wood, painted green or reddish-brown, many of the streets narrow and crooked, but some also wide, straight and regular. The most interesting building is the castle, the residence of the old Duke of Courland. It had almost become more ruin when in 1739 Marshal Miron the favorite of the Empress Anna, commenced a palace on the same site and completed it after his return from exile. It stands on an island surrounded by the canals of the Aa. Among the other buildings, may be mentioned four churches, a Greek, a E. Catholic, a Lutheran, and a Reformed, three synagogues, a museum, a library of 20,000 volumes, an observatory, a gymnasium with nine professors, an hospital, an orphan and a lunatic asylum, a casino, and a theatre capable of containing 3000 spectators. Its manufactures which are of little moment, include linen, hosiery, soap, and leather and its trade is very limited. Pop. (1859) 15,619.

MITTELBACH, a vil. Saxony, circle Zwicken, bail Chemnitz with stone quarries and two mills. Pop. 1219.

MITTELBERG, a vil. Austria, Vorarlberg, dist. Braunau with a parish church. Pop. 1447.

MITTEL-KATZACH a vil. Hesse-Cassel prov. Fulda, bail. Korbach. It has a church, and five mills. Pop. 1088.

MITTELWALDE, a to Prussia, gov. and 35 m. N.E. Breslau, on the Neisse, with two churches, an hospital and small theatre, manufactures of linen, hosiery and tobacco a brewery, distillery, bleachfield, a tile-work, and two dye-works. Pop. 1808.

MITTELZELL, a market in Bavaria Lower Franconia, dist. and near Würzburg on the Main over which there is here a ferry. It has a trade in wine and fruit. P. 1441.

MITTENWALD a market in Upper Hesse, 1 bail. near here crossed by a bridge, 50 m. S.W. Marbach, with three churches, manufactures of musical instruments and silk parades, and a trade in timber. Pop. 2000.

MITTENWALDE, a to Prussia, prov. Brandenburg, gov. and 23 m. S.E. Potsdam with a church, an hospital, and manufactures of linen. Pop. 1865.

MITTERBURG or **PIRNO**, a to Austria, Illyria, cap. circle, on the Flava, 80 m. S.S.E. Trieste, with a castle situated on a rocky eminence, a head school, an hospital, and a considerable transit trade, for which its situation at the point where several roads meet, gives it great advantages. Pop. 2212. — The citadel has generally a slim chalky soil but produces some good wine, olives, gail nuts, and silk. Area, 1877 geo. sq. m. Pop. 22,000.

MITTERTEICH, a market in Bavaria, circle Oberpfalz, 29 m. E. Baireuth, with two churches manufactures. Vol. II.

of linen and woollen stuffs, a saw and several flour mills. Pop. 1559.

MITTON, par. Eng. Lancaster 18,108 ac. P. 8316.

MITTON KOLE a to Punjab, near L. bank Indus lat. 28° 54' N. lon. 70° 25' E. surrounded with flourishing date-groves. The adjacent country is periodically inundated by the Indus the climate is then unhealthy. Pop. 4000.

MITTWEIDA two places, Saxony circle Zwicken.—1. A to 1 bail. Zschoppan 36 m. S.E. Leipzig. It has a handsome church, a house of correction, a town school and many features of linen, cotton, flannel, sailcloth, parchment, and leather a tile work two bleachfields a spinning and two other mills. Pop. (1849) 7012.—2. A vil., dist. Schwarzenberg, 54 m. S.S. Leipzig, with manufactures of fire-arms, a ropery a stamping and several other mills. Pop. 1083.

MITYLAE or **MYTILAE**, (*anc. Lesbos*), an Isl. Turkey in Asia, Grecian Archipelago off Anatolia, and in front of the Gulf of Adramythi greatest length, N.E. to S.W. about 45 m. greatest breadth about 30 m. It is deeply indented particularly on the W. by Port Ouloni and on the S. by Port Lero both of which form good harbours. The surface is generally elevated and is intersected by a long range of mountains, in which the most conspicuous summits are those of Olympus in the S., Ordymus in the W. and Lepethus in the N. Between the mountains are numerous plains and valleys, which are naturally fertile and having the advantage of an excellent climate and numerous streams for irrigation might easily be made remarkably productive, but are generally neglected. The latter districts are generally well worked, and furnish excellent timber, which is largely exported particularly for shipbuilding. The principal objects of culture are the vine and the olive, the socra season falls short of the expectation. The most important mineral is marble. The principal town is Castro on the S.E. coast, where it occupies the site of the ancient Mitylene, the other towns are Molvo on the N. and Caloni on the W. besides these there are numerous villages. The island suffered severely during the Greek war. Its population, previously about 60,000 has been diminished a half. Among the great number of distinguished individuals to whom it has given birth are Theophrastus the disciple and successor of Aristotle in the Peripatetic school. Plinius the first of the Greek writers, the poet Alcaeus, and the statesman Demetrius.

MIUS, a river Russia which rises in the S.E. of gov. Ekaterinodar flows first S.E. entering gov. Don crosses then S.W. and falls by a wide estuary into the Sea of Azov about 50 m. S.W. Taganrog after a course of about 110 m. Its chief affluents are the Krivka, which joins it on the right.

MIXBURY par. Eng. Oxford 2620 ac. Pop. 412.

MIXTAD a to Prussia, prov. and 80 m. S.S.E. Posen with a church. Pop. 1209.

MIXTACALAN, a table-land, Mexican confederation occupying the greater portion of the dep. Oaxaca, and extending from the plains of La Puebla and Mexico, S. and E. to the Isthmus of Tehuantepec, average elevation 5000 ft. above sea-level. Towards the Pacific it is indented by wide valleys, which stretch nearly N. to S. but even these are of very considerable height. The town of Oaxaca, which lies in the principal valley is 4800 ft. above sea-level and the ruins of the castle of Mitla stand on adjacent ground, 5300 ft. high.

MIZAN ILA, a ruined city Mexican confederation 80 m. N.E. Jalisco on an isolated plateau near the Gulf of Mexico.

MIZEN HEAD, a promontory, Ireland, co. Cork, forming the S.W. point of the Isl. lat. 51° 22' N. lon. 9° 45' W. MISFK or MISKINAK a market to Bohemia, circle Beraun about 17 m. S.W. Prague. It has a parish church, and a castle. Pop. 1000.

MOA an Isl. Indian Archipelago, Tonga group lat. 6° 20' S. lon. 128° 10' E. 24 to 100, and 12 m. broad. It has a mountain resembling the peak of Tenerife, but not so high, and is rich in buffaloes, sheep, pigs, goats, and poultry. Inhabitants partly Christian, partly heathen.

MOAR, a river peninsula of Malacca, which, rising in the mountains of Pahang, considerably to the W. of Mount Ophir, pursues a winding course in a S.W. direction, for above 100 m. and in a channel so deep that, but for the bar across its mouth, it might be navigated by vessels of the largest size, for 70 m. or 80 m. It abounds with large still-gators.

MOATE, a market tn. Ireland, co. Westmeath, 70½ m. S.E. Athlone, with a parish church a R. Catholic convent and chapel, a large school, a courthouse and a bridewell, a branch bank, and a medical dispensary. Pop. 1978.

MOBILE, a city and port, U. States, Alabama, 7 bank miles at its entrance into Mobile Bay, lat. 30° 18' 36" N, lon. 88° 04' 55" W. (n.) It is built on a beautiful and extensive plain 15 ft. above the level of the tides, and open to refreshing breezes from the bay. The principal public buildings are the courthouses, jail, customhouse, city hospital, a U. States naval hospital, and several other benevolent institutions. There are three banks, an academy, and 14 churches, including two Methodist and two Baptist for colored people, other three Methodist and a Baptist, two Presbyterian, two Episcopalian, and two R. Catholic, one of which is a cathedral. It has also a synagogue, a theatre, an amphitheatre, sundry markets, and gas and water works. It is defended by a fort, on a long, low sandy point, at the mouth of the bay, and 80 m. below the city. Vessels drawing more than eight ft. water pass up Spanish river, 6 m. round a nearly closed into the Mobile, and then drop down to the city. Next to New Orleans Mobile is the greatest cotton mart of the S. Its warehouses have accommodated for 202,000 bales of cotton. The exports of that article to foreign countries, in 1851 amounted to 430,846 bales, weighing 218,450,338 lbs. In 1851 the total foreign exports amounted to \$2,911,073 and the foreign imports to \$134,178, employing 209,000 tons of shipping. But the coasting trade, carried on chiefly with the Atlantic ports is much more extensive than the foreign. Pop. (1846), 12,672 (1850), 20,513.—The bay is about 80 m. N. to S. by 12 m. broad, and affords some of the best harbours in the Gulf of Mexico. It narrows inland and on the S. is protected from the sea of the gulf and from the wind by a narrow strip of land leaving an entrance at its W. end only about 3 m. wide. Except at the entrance, the bay is deep and the anchorage safe.—The rivers, which fall into the bay above the town, is formed in its S.W. by the junction of the Alabama and Tombigbee, two large rivers, which have each a S. course of several hundred miles.

MOCCAS par Eng. Hereford, 1163 ac. Pop. 207.

MOCCHE, a vil and com. Italy, Piedmont, div. Turin prov. and in the valley of Susa, 1 bank Dora Riparia with a handsome church, a charitable endowment and a considerable trade in dairy produce and cattle. Pop. 2301.

MOCCION a vil. and com. Spain, New Castle, prov. and about 7 m. from Tudela with two churches, townhouse, prison, and two primary schools, manufactures of chocolate, and a trade in wine, and in bread. Pop. 1620.

MOCHA or **MOCLA**, an important Arabian seaport, on the Red Sea, about 40 m. within the Strait of Isthm. of Mandeb, lat. 13° 20' N., lon. 43° 20' E. It lies in a bay formed by two low points projecting into the sea, about 5 m. asunder. On each of these points is a castle with a few guns. Between them extends the sea-wall, which protects the town and allows access to it only by a single gate opposite to which is a well-constructed sunna pier or jetty approachable by small vessels. The roadstead for large vessels is three or four miles from the shore, and has good holding ground in five or six fathoms, but little shelter. The town extends ¼ to ½ a mile and a half along the shore, with a general width of half a mile, and has a pleasing, impressive appearance. The houses next the sea are well built of stone, and lofty with stucco ornaments and brilliantly white. Beyond these are seen two mosques, four of them large, and one of great magnitude. Mocha is the chief port andemporium in the dominions of the Imám of Hama, and owes its importance, and perhaps its origin, to the trade, which has been always centred in it. It was hardly known in the beginning of the 16th century and was still so open though prosperous down at the commencement of the 19th. But from that time, the increasing demand for coffee in Europe continued to pour a tide of wealth into Mocha, until the cultivation of the coffee-plant in the W. Indies, and elsewhere, diverted the trade more or less into new channels. The country round Mocha is an arid, sterile plain without fresh water, a supply of which, for the use of the town is led by an aqueduct from the village of Maza, 20 m. distant, at the foot of the hills. The coffee,

MOCHA, from the North.—From Capt. G. P. Hauser's Memoirs and Egyptian Itinerary

therefore, which bears the name of Mocha, is not produced in the immediate neighborhood of this town, but on the wooded hills of the interior and particularly near the town of Beil-el-Fakhi, where the best kinds are collected and thence consigned to the merchants at Mocha. A large quantity of coffee is carried to this market from Harar also, at the S.E. foot of the Abyssinian Highlands, and is found to be fully equal, if not superior, to the produce of Arabia. In deed it is now admitted that the native country of coffee (in Arabic Kahva) is Kaffa on the S. confines of Abyssinia, whence the culture of the plant was introduced into Yemen. The intimate connection subsisting between the interests of Mocha, and the activity of the trade in coffee, is represented by the popular traditions respecting the tatarian saint of the place, Sheikh Shadeli, who is said to have taught the Arabs the use of coffee, and to have been also the founder of the town. The chief gate on the land-side of Mocha is called Bab Shadeli, the principal well in the town also bears the saint's name, and the mosque which covers his tomb still attracts many pilgrims. After being accessible at all seasons, huds fail to become the chief mart of Yemen as well as of the opposite or Somali coasts. Mocha at present, therefore, is a state of decline, and the population does not probably exceed 5000 souls.—(Niebuhr, *Travels in Arabia*, Valentinus Truvelo.)

MOCHA, an isl. 10 m. off coast of Chili, prov. Araucaria, lat. 38° 25' S., lon. 73° 55' W. (n.), about 7 m. long 3 m. broad, and rising 1250 ft. above the sea, anchorages indifferent landing bed, and no supplies, with exception of wood and water, the best of excellent quality. Previous to the 18th century, it was inhabited by Araucanian Indians, who were driven off by the Spaniards.

MOCKRUM, par Scot. Wigton, 20,000 ac. P. 946.

MOCKERY a tn. Prussia, prov. Saxony, gov. and 11 m. E. Magdeburg, on the Elbe, with a church, an hospital, and a distillery. Pop. 1685.

MOCKMULHL, a tn. Württemberg, circle Neckar, at the confluence of the Neckar with the Jact, 10 m. E. Neckarsalm with a church and a castle. Pop. 1624.

MOCLAN, a m. Spain, Andalucia, prov. and 20 m. N.W. Granada, 7 bank river of same name. It is poorly built, has a church, townhouse, prison, and school and a trade in grain and fruit. It was once a Moorish fortress, and so strong that it was called the shield of Granada. Pop. 2760.

MOCLINEJO, a vil. and com. Spain, Andalucia, prov. and 10 m. from Malaga, with a church, two primary schools, several mills, and a trade in ravine, sent to Malaga. P. 1068.

MOCONESI a vii and some Italy Piedmont, div Genoa prov Chivard, 9 m. from Clespau, near the Lavagna, here crossed by a stone bridge. It has two churches, and a trade in corn, wine, and oil. Pop. 2329.

MOCSA a to Hungary, Hither Danube, co. and 7 m. S. S. E. Komorn with a church. Inhabitants chiefly employed in agriculture, and in fishing in a neighbouring lake. P. 2187.

MODAIR, or **TAKKA KARA**, a vii Ashan Turkey, path and 32 m. S. Begrad, 1 bank Tigris occupying the site of the ancient Ctesiphon, and Seleucia, capitals of Assyria, and afterwards of Persia. Little now remains except part of the palace of Chosroes, called Takka Kara, which is seen from afar on the plain, presenting a front of 300 ft. in length, by 160 ft. in depth, having an immense vaulted hall in its centre. The city walls may also be traced to a considerable distance on both banks of the river.

MODENA (DUGUARDI) [French, *Duché de Modène*] a duchy Italy, bounded N. by Austrian Italy and the duchies of Guastalla, forming an isolated portion of the duchy of Parma. W. Parma, the grand duchy of Tuscany and the Sardinian States. S. the Mediterranean, the duchy of Lucca, and Tuscany and E. the Papal States lat. 43° 38' to 44° 57' N. lon. 9° 46' to 11° 21' E., cap. city Modena. The duchy thus bounded, consists of four distinct portions. Two of these, of small extent, are completely isolated—the one being situated wholly within a part of Tuscany, and the other enclosed on the N. and E. by Tuscany, and on the S. and W. by Sardinian States. The third portion, larger than the other two, though still comparatively small, is nearly enclosed by Sardinia, Tuscany, and Lucca, but reaches S. to the sea and towards the N. is connected by a long and narrow belt with the fourth and main portion of the duchy. This portion, constituting five-sixths of the whole, is very compact, and has a rhomboidal form having a length $\frac{1}{2}$ to S. of 55 m., and a central breadth of 30 m., area of the whole duchy about 1800 sq. m. The whole of the N. portion with the exception of a mere patch scarcely deserving of notice is situated on the E. side of the Apennines, which, within a narrow height of 975 ft. in Mount Cimone, and cover a great part of it with their ramifications. These however rapidly subside in proceeding N. and finally merge into fertile and beautifully undulating plains. The whole of this N. portion, with exception of the small patch already referred to, belongs to the basin of the Po, which forms a small portion of the N. W. boundary, but receives the far larger part of its waters by numerous streams, which, descending from the principal chain of the Apennines pursue their courses N. in lateral valleys. Of these streams, the most important are the Panaro, Secchia, and Crostolo. The other portions of the duchy lie on the S. side of the Apennines and are drained by the Magra and its tributaries, with the exception of a small portion which sends its waters directly to the coast. The geological structure of the duchy is very simple. The alluvial deposits, spread so widely and deeply over the plains of Lombardy are continued S. into Modena, almost to its centre where they are succeeded first by a narrow belt of tertiary marls and sandstone, and then by a considerable tract of the stratified rocks which form the upper extremity of the secondary formation. The smaller portions of the duchy are partly occupied by the Jura limestone. Towards the shore, alluvial and alluvial deposits again appear. The minerals are not of much consequence, but include iron marble gypsum, sulphur and petroleum. The climate differs considerably on the N. and S. sides of the Apennines. On both sides it is temperate and healthy but on the N. side the winter cold is sometimes keen, whereas on the S. it is scarcely felt, and the oranges and olives flourish vigorously in the open air. The soil is generally fertile, especially in the plains and is cultivated, if not with much skill at least with great industry very often on the metayer system. Besides the ordinary cereals, rice, maize and hemp are largely cultivated. Much attention is also paid to the culture of the vine, the olive, and the mulberry. By means of the last, large quantities of excellent silk are produced. Both manufactures and trade are insignificant.

Modena, after passing through the hands of a great number of masters, was finally erected into a duchy in 1453 and settled on a branch of the family of d'Este, which has given Europe so many of its sovereigns. This settlement was never

effectually disturbed till the French Revolution, when it lost its independence, and was merged successively into the Cisalpine Republic and the Kingdom of Italy. The duke who had been stripped of his possessions, resumed them in 1814. The government, unprovided with constitutional safeguards, is almost absolute. For administrative purposes, the territory is divided into four governments—Modena the capital Reggio Garagnana, and Massa di Carrara, to which should be added the *delegazioni*, governments of Frignano and that of Lomagna. Pop. 582 678.

MODENA (see *Modena*) a in Italy cap. above duchy, pleasantly situated in a somewhat low but fertile plain, between the Secchia and the Panaro, 35 m. S. S. E. Mantua. lat. (observatory) 44° 38' 58" N. lon. 10° 10' 30" E. (L.) It is walled, built with great regularity and has spacious and well-cleaned streets generally lined with porticoes, of which several are handiwork. It consists of three principal parts—the citadel, which, with its appendages, occupies about a third of the whole, the old town, and the new town. The last, the greater part of which has sprung up within the last half century, is in many parts elegant. The most remarkable edifices and establishments are the Duomo or cathedral a fine specimen of Romanesque, adorned in front with numerous carvings

MODENA CATHEDRAL.
From early Knight's Woodcut of Architecture of Italy

sculptures the church of San Francesco, a handsome Gothic structure, containing a fine group of the Taking Down from the Cross, in terra cotta, by Bagarelli, several other churches, the ducal palace, begun in the 17th century but enlarged by numerous modern additions, and now forming a splendid structure, with a large collection of paintings, several of them by the first masters, a museum, containing curious medals, val sculptures, and a library rich in MSS. the public library, of 80,000 vols., the theatre, the halls the college of law and medicine substituted for similar chairs in the university which was suppressed in 1832, several other important educational institutions and charitable endowments. The manufactures, which have lost much of the importance they once possessed, consist chiefly of silk goods silk twist, wools and hampden cloths, leather, and glass. The trade—notwithstanding the advantage of a canal which traverses the town, carries barges of 80 tons, and communicates with the Po—was very insignificant. Among the distinguished individuals to whom Modena has given birth, are the antiquary Sigismondo, the learned Muratori, author of the well-known dictionary which bears his name, the poet Molza and Tassoni, and the astro-

modist *Thalopus* Modone is the see of a bishop, and, as the residence of the court and the seat of government, both attracts a higher order of society than usual in a town of the same magnitude, and possesses many important public offices as well as scientific, literary, scientific, and artistic. It is situated under the Etruscan, and rises to such splendour under the Romans as called forth a eulogy from Cicero. It afterwards was repeatedly sacked by the N invaders, whose ravages have left few vestiges of its ancient grandeur. Pop. nearly 30,000.

MODANF a tn France, dep. Savoy, prov. Morvan. 1 bank Area 1" m S E E. San Giovanni di Moriana 3508 ft. above the sea with a handsome church manufactures of coarse woollens, and a trade in dairy produce. Pop. 1800.

MODBURY a bor market tn, and par., England, co. Devon 12 m. E. Plymouth. The town consists of four streets which descending declivities from the four cardinal points meet at the bottom of a valley. Many of the houses have slate fronts. It has an ancient embellished church, places of worship for Baptists, Wesleyans, and Society of Friends, and woollen-plain and hat manufactures, but not so flourishing as formerly. Area of par., 6798 ac. P. 1858.

MODERLIGO par. incl. Warford 7818 ac. 1 1758

MODERN *Modern* MADRA, or MODRA, a tn Hungary co. and 16 m N N E. Froeburg. It is walled has three gates, in front of each of which is a suburb. It is well built, has a Benedictine monastery and church with a lofty tower ad joining it faced with copper, R. Catholic, Bohemian, Lutheran, and Calvinistic churches governor's house and townhouse. Neither the trade nor manufactures are of much consequence though a good deal of linen is woven and bleached. 1 5010

MODESHILL, par. incl. Tipperary 3101 ac. P. 688

MODIA [see *Modj*] a tn. Sicily prov. and 81 m S W Syracuse cap dist. in a narrow craggy valley r bank beach. It is ill built, but has a large square and some handsome mansions a castle and several churches and convents. The valley of Ippica, in the vicinity is interesting from the number of troglodyte caves it contains. 1 7 500

MODIGLIANA [see *Castro Modugno*] a tn Tuscany 38 m N E Florence on a spur of the Apennines. It is walled, and has an old castle, several churches, a college, an hospital, and a trade in wine, oil, and silk. Pop. 1853, 3299.

MODJADIA a tn W Africa, Fouta, r bank Senegal lat. 15 55 N lon 18° 5' W. inhabited by Marabouts, of the Moorish nation of the Dewubies, who reserve valuable offerings from the faithful.

MODLING a market tn Austria. See *Modling*

MODON a small seaport in Greece, W coast Moria about 5 m S Navarino lat. 36° 48' N; lon 31° 41' E. It is ill constructed, and falling into decay but is walled, and defended by a fence. At its S. extremity is a lighthouse, and hence it is an ancient wall, including a port for small craft. Modon was nearly destroyed by the Russians in 1770.

MODOS, a vil. Hungary Thidher 1261a, co. Torontal, 27 m. S W Temeswar on the Theiss with two churches, and several flour-mills. Pop. 1089.

MODRENY, par. incl. Tipperary 12 165 ac. P. 3554

MODUM, a vil and par Norway prov. Agderhusien on the stream which issues from lake Tyri 27 m. W Christiansia. Pop. 4504.

MODLITVOE, or MALATVO, a maritime tn. Ceylon N E coast, on a river sufficiently deep at the mouth to admit small craft, lat. 8° 15' N lon 82° 45' E.

MODLMYNE, a seaport tn. India. See *Modlmyne*

MOEN, an isl. Russia. See *Moer*

MOEV a tn, and com. Belgium prov. W Flanders, about 6 m E E. Courtray. It has a brewery, two tobacco factories, and several mills. Pop. 7400.

MOEN [Latin *Moen*, *Mythen* Danes] an isl Denmark S E of Sweden, from which it is separated by a sandbank and a very shallow channel, greatest length, about 16 m in greatest breadth 13 m area, including the small dependent islands of Hyrd and Bogte 70 sq m. Its highest part is 480 ft. above sea level, and more than half of it is not over 160 ft high. The whole island belongs to the cretaceous formation, and generally consists of masses of fine white chalk, intersected by firms. The soil consists generally of alluvium with a mixture of marl and sand, composing a loam of great fertility. Most of the high grounds are covered with

beech wood and smaller trees, which, seen from the sea, have a striking appearance. There are no proper streams on the island, and only a few lakes, which are of small extent, but considerable depth. Moen belongs to bail Friesland. Its chief town is Stege. Pop. including Fjord and Bogte, 18,300.

MOERBEKE, two vila. and coms. Belgium, prov. E. Flanders.—1 18 m N E Ghent with five breweries, two tanneries, four bleacheries, several corn and oil mills, linen and cotton weaving and some trade in grain timber and hay. Pop. 5899.—2, 12 m N E Ghent with manufactures of linen, and a trade in agricultural produce. Pop. 1281.

MOERE, a vil and com. Belgium, prov. W Flanders, on the Moerdijkvaart 18 m W W. Brugge. It has two breweries, a bleachfield, an oil and a flour mill. Pop. 1160.

MOERIS (TAXI), or BIKRAT-KHAROU (Lake of the Horn) lake, Central Egypt 40 m. S W Cairo lat. (E. and) 29° 35' N lon 30° 58' E. about 25 m long, by 8 m broad, curved at its W end and 23½ ft. deep at its deepest part. A great portion of the shores is rocky the remainder is flat and sandy and encumbered with salt. It communicates, by two large branches, with the Nile, during the inundations of the latter. It abounds in fish.

MOERKEKE a vil and com. Belgium, prov. W Flanders, 5 m N E Bruges inhabitants chiefly engaged in domestic weaving and handiwork. Pop. 2910.

MOERKEKE, a vil and com. Belgium, prov. W Flanders, 19 m E Ghent, 1 bank Scheldt with manufactures of linen and hampen fabrics, two breweries, two flour and two oil mills. Pop. 5237.

MOFFAT a vil and par. Scotland co. and 20 m. N N E. Dumfries, pleasantly situated in the valley of the Annan, on a descent from three sides by lofty hills and much resorted to for its mineral springs. It has an established church with a conspicuous spire, a Free and a Presbyterian church, a market-house, branch bank and assembly room several schools, reading rooms and baths. The principal spring is saline-sulphureous inhabitants chiefly engaged in agriculture. Dr David Welsh, late professor of ecclesiastical history New College, Edinburgh was a native of the parish. Area of par. 88,400 ac. Pop. 2303.—Local Correspondent.

MOGADOR or BURNAN, a considerable seaport tn. Morocco, lat. 31° 30' 29° E lon 9° 47' 45° W, about 110 m N W by S the city of Morocco. It stands on a low sandy spit, which terminates towards the sea in rocks, among high-water syrtis, the sea flows quite round the town, leaving an extensive swamp behind it. It is of an irregular form, encompassed by a wall with flanking batteries at each angle, and a line of heavy guns on that portion of it which fronts the sea. The streets are straight but narrow, buildings chiefly in the old Spanish style, and of two and in some cases three stories, and mostly white-washed. The mosques are, some of them, splendid specimens of architecture. The streets are crowded with people—Jews, Moors, Egyptians, &c.—and with canals splendid Arab steeds, and asses, mules and oxen, some with riders, others coming in from the different gateways leading to the country, laden with jars and skins of water, and packs of fruits and vegetables. The Jews, who amount to about 4000, reside in a quarter appropriated to themselves, and separated, by a wall from that of the Moors, whose portion is called the citadel where, also the foreign merchants live. The whole of the laborious work in the town and port, is performed by Jews; and the domestic servants are all Jews or Jewsesses. The harbour which is formed by an island to the N of Mogador, 3 m long by 3 m broad, is suitable for vessels of 150 tons. The market is amply supplied with provisions of all sorts, including fish, poultry, and game, also fruit and vegetables, all at reasonable prices. The principal exports are wool, gum, wax, hides, skins, almonds, honey, ostrich feathers and gold-stuff imports, iron, hardware, and cotton goods, vessels entered in 1858, 100 of 23,576 tons; cleared 91 of 20,641 ton—value of cargoes, £209,324 and £285,068 respectively. Mogador was founded in 1760, by the emperor Soudy Malouet who was desirous of considering it the principal seat of commerce in the empire. With this view he gave the merchants ground to build upon, and allowed them to export produce free of duty. Pop. variously stated from 8500 to 30,000.

MOGADOURO a m and par Portugal prov. Tracoe-Moeste, 22 m N E. Moncorvo on a height. It is walled

defended by a castle, and contains a Franciscan convent Pop. 563

MOGAUAG, a tn. Burmah, at the junction of the Mogawing or Kungking and Nanyang rivers, 70 m. N.W. Bhamo. It extends about a mile E. and W. along the first named river. The town consists of about 800 houses, and is partly surrounded by a wooden stockade. Within the stockade the inhabitants are Shans, outside they are Burmese, Shwans, Arawans, and a few Chinese. The houses of the Burmese are large, comfortable, roofed with thatch, those of the Shwans and others are the same as the houses to be seen in all parts of Burmah Proper, but exhibit signs of great poverty those of the Chinese however are comfortable, and relieve the poverty stricken aspect of the place, which has no bazaar. — *Four Asiatic Soc. Bengal*, April, 1837

MOGELT two pars. Incl. Cork —1, 6430 sq. Pop. 2218 —2, 9709 sq. Pop. 1873

MOGEESHA par. Incl. Cork 8489 sq. Pop. 1925

MOGEL-TORNDEN, a vil. Denmark. See **TORNDEN**

MOGELSBERG, a tn. and par. Switzerland, can. and 19 m. W.W. St. Gall with a church, used both by Protestants and R. Catholics; several cotton factories, and a considerable transit trade in flour, leather, silk, beer &c. Pop. 2960

MOGENTE, a tn. Spain prov. and 48 m. S.W. Valencia. r. bank Cebico. It has a townhouse and prison, endowed primary school for each sex, a palace belonging to the Marquis de la Romana, a church, and a suppressed monastery, and, in the vicinity, are three hermitages, several fountains, and a planted promenade with some glass making and six flour-mills. 1 op. (agricultural), 3594

MUGGIO m. Borzo a vil. kingd. of Italy gov. Venice, prov. Friuli, 24 N. Udine, with several district courts and offices, and a church. Pop. 2793

MUGHYANI a tn. Uganda. See **KUMBAKAYA**

MUGI nas. Cebu, a tn. Brazil prov. and 38 m. F.N.E. São-Paulo, about 4 m. from 1 bank 1000. It has a handsome parish and three other churches, a Carmelite convent, a Latin and a primary school, manufactures of woollen cloth and a trade in sugar cane, cotton, and coffee, which are carried by mules to Santos or São Sebastião, and then shipped for Rio-de-Janeiro. Pop. dist. 9000

MUGI-GOAZO a vil. and par. Brazil, prov. and 170 m. N. São-Paulo, r. bank river of same name. It has a church and a trade in cattle and swine and good fishing in the river

MUGI-MUNST a tn. Brazil prov. and 116 m. N.W. E. São-Paulo, 1 bank river of same name with a handsome church, a Carmelite convent, and a trade in horses and cattle, poultry, cheese, millet, cotton, sugar and rum. P. dist., 6000

MUGILLET F. a gov. and tn. Russia. See **MOHILEV**

MUGILNO a tn. Prussia, prov. W. Prussia, gov. and 23 m. S.W. Bromberg cap. circle, on a lake with three churches, a synagogue, Bernardine cloister and hospital. Pop. 1505 Area of circle, 397 sq. m. 1 op. 34,513

MUGLINGEN, a vil. Württemberg circle Neckar bail and near Ludwigsburg, with a parish church. Pop. 1163

MUGORO, a vil. Isl. Sardinia, div. and about 34 m. N.W. Cagliari, on an elevated plateau of same name, with a church, a Carmelite convent, and a primary school manufactures of woollen and linen cloth, and a trade in corn. P. 2160

MUGUER a tn. Spain, Andalusia, prov. and 4 m. E. Huelva, 1 bank Tago 5 m. from its mouth. The streets are generally broad, straight, and paved and a considerable proportion of the houses are two stories high. It has three squares, in one of which stands the townhouse, an elegant dome edifice, with a gateway in the upper part, three schools, a custom house, a hospital, seldom occupied except by vagrants and a handsome church, of the Cordillan order, with a tower built after the model of the Giralda at Seville. Agriculture, flour-mills, brandy distilleries, and a few hand looms for coarse linen and hempen stuffs, are the chief means of employment

Op, wheat, &c. are imported, and wine, the principal production of the district, exported. Pop. 3487

MUGYORUD, a vil. Hungary co. and about 10 m. from Pesth; with a church. Pop. 1001

MOH or **MOCHER**, a vil. Austria, Transylvania, near Hermannstadt; with a Greek non-united church. P. 1185

MOHA, a vil. and com. Belgium, prov. and 19 m. S.W. Liège, on the Malmeigne. It has several quarries of paving stones, a tile-works, a brewery an oil, two hemp and four flour

mills. An inferior kind of coal (*terre-brûlée*) is worked in the vicinity. Pop. 1099

MOHACS, a tn. Hungary Thither Danube, co. Batsanya, cap. dist. on the Danube, 25 m. E.S.E. Zinkirkelen. It is the seat of a bishop, whose palace is the most handsome edifice of the town and has a R. Catholic, a Greek non-united, and a Protestant church, Franciscan monastery, post-office, county buildings, and gymnasium in active trade, at its gateway on the Danube, where considerable quantities of wine, agricultural produce of all kinds coal, wood and other articles, are weekly loaded and despatched, chiefly to Vienna. The annual fairs, five in number are much frequented and, at the principal one, 30,000 head of fat cattle are often sold

The steam boats on the Danube have a station here. Two famous battles have been fought in the neighbourhood of Mohacs—one, in 1526, when Rolyman at the head of 200,000 Turks defeated and slew Lova II., at the head of 30,000 Christians and the other in 1680 when the Turks were defeated with the loss of 20,000 men. Pop. 10,060

MOHALITZ, a tn. Asiatic Turkey. See **MINERALIK**

MOHAWK a river U. States New York. It rises near Lake Ontario and after a course of 126 m. first S. and then E. by 8 joins the Hudson 10 m. above Albany. It has two principal falls, which afford extensive water-power

MOHEDAS, two places, Spain—1. A vil. Llerena-shura, prov. and 30 m. from Ocaña, consisting chiefly of mean houses huddled together without any order. It has a parish church, courthouse, prison, and primary school several oil and flour mills, and a trade in oil and corn. Pop. 936—2. *Cele-Jaro* a vil. New Castle, prov. and 65 m. from Toledo: with a church, a courthouse, and primary school several oil and flour mills and a trade in corn, wine and cattle. Pop. 1059

MOHIL a gov. Russia, bounded N. by Vitebsk, E. by Smolensk S.E. Orel S. Chernigov and W. Minsk, lat. 53° 30' N. lon. 38° 45' to 39° 30' E. greatest breadth N. to S. 210 m. central breadth 113 m. It contains 14,000 sq. m. Though containing part of the watershed which divides Europe into two great basins, the surface is generally flat, consisting of a very extensive S. and a much smaller N. plain. The former belongs to the S. Drina, and sends its waters to it by two small tributaries, the latter to the Dnieper which, besides traversing a great part of it centrally and forming part of its S.W. boundary is also augmented within it by the Dvina, on the right, and the Sog with its tributaries Ostr and Bood, on the left. Besides these rivers, the government has several small lakes, and numerous large swamps

Much of the soil is fertile, and, though under very imperfect culture, produces good crops of rye, barley, oats, hemp and flax. In other parts, the soil consists entirely of a cold damp hungry clay or of a loose and almost sterile sand. A considerable portion of the surface is well wooded with oak and fir, and furnishes excellent ship-timber particularly maple.

All along the banks of the rivers are rich meadows, on which large numbers of fine cattle are fed. Sheep also, are numerous, and have been very much improved by crossing with the breed of Saxony. The rivers abound with fish, and the forests with game. Bog-iron ore occurs in extensive beds, and is worked to a very limited extent. The manufactures and trade are almost wholly in the hands of the Jews and very insignificant. The former includes a few coarse woollen, linen and cotton thence candles, soap, glass and leather the latter is chiefly in timber floated N. by the Dvina to the Baltic, or S. by the Dnieper, and its tributaries, to the Black Sea. There is also a small export of hemp, flax, yellow and peach.

The inhabitants are a mixture of Lithuanian, Russian and Jews and their circumstances are, for the most part, far from comfortable. For administrative purposes, the government is divided into 13 districts. Mohilev is the capital. Pop. (1860) 950,000

MOHILEV, a tn. Russia, cap. above gov. r. bank Dnieper, 212 m. W. S.W. Moscow. lat. (south collage) 55° 55' 45" N. lon. 30° 20' 25" E. It is compact, and forms the town, properly so called, the third, built on a height, forms the Kremlin or citadel, the fourth is a suburb. The town is tolerably well built partly of stone and partly of wood, and the streets are wide and paved. Near the centre is a large octagonal square, surrounded by handsome stone buildings, among others, the bazaar and the palace of the Greek arch

MOHILEV. The number of churches is 20, of which the R. Catholics have five, and the Lutherans one. The Jews, who are numerous, have two synagogues. There are also four convents, two ecclesiastical seminaries, a gymnasium, high school hospital, several poorhouses, and a prison. The staple manufactures are tobacco and an extensive trade is carried on with Riga, Memel, Danzig and Odessa, in leather, wax, honey, potash, oil, and grain. Mohilev besides being the residence of the principal authorities of the government, is the see both of a Greek and R. Catholic archbishop. Many of the Russian nobility reside here, and much of the ground in the vicinity is occupied by gardens. Pop. (1851), 18,568.

MOHILEV is a Russia, gov Podolsk, cap. dist. 1 bank Dniester, 60 m E.S.E. Kamenetz. It stands partly at the foot, and partly on the side of a lofty acclivity, and has several Greek and R. Catholic churches, a convent, a school, an active trade, and several well frequented fairs. P. (1842) 9304.—The numerous in the S.W. of the gov., well watered and wooded, has a fertile soil, producing rich pastures.

MOHILL, a market tn. and par. Ireland, cos. Longford and Leitrim. The town is on Cos. Leitrim, at the foot of a hill, 24 m. E. by S. Carrick-on-Shannon, has an Established church, a R. Catholic chapel and a Methodist meeting house, a dispensary, fever hospital, and tannery workhouse, and some trade in corn, butter and pigs. Pop. (agricultural) 1826. Area of par. 6697 ac. Pop. 11,539.—(Local Correspondent.)

MOHIL LA one of the Comoros isles, Indian Ocean, at the N entrance of the Mozambique Channel ist. (E. point) 13 20' S. lon. 44 4' E. (W. 15 m. S.E. E. Comoro). The coast is rocky with some landing-places here and there. In the interior it is high and mountainous, and thickly clothed with wood, but contains a good deal of fertile land, on which sheep and cattle are reared, and grain and fruits raised. Mohilla was, at one time considered the best of the Comoros for obtaining refreshments, but the preference has, for many years been given to Johanna, on account of the anchorage being safer than at any of the others. At the E end of the island are several small sales with a coral reef around them, behind which good anchorage is to be had. There is also an anchorage place near the shore, at the E. end of Mohilla, and one on the E side, where refreshments may be obtained. The principal town is Dongo situated close to the beach. It is walled and, along the sea-side, is a solid rampart or platform for a battery of guns. The queen's house, at the N.W. corner of the town, is built in the European style. The principal mosque is situated on the beach outside the town wall.

MOHIM or **MARIN**, a tn. Hindostan, presid. Bengal, prov. and 82 m N.W. W. Delhi. It covers a large extent of ground, and was once a place of importance, though now ruinous and almost deserted.

MOHILIN a tn. and par. Switzerland, cant. Aargau, 11 m. E. Basel with a church and school. Pop. 1972.

MOHILA, a vil. Baze-Mannig, on the Mohrloch with a parish church. It is the place from which Luther's family originally came, and where his parents lived before their removal to Eisleben; it possesses a statue of the Reformer.

MOHRIN a tn. Prussia, prov. Brandenburg, gov. and 37 m Frankfurt, on the Schippe, and a lake. It is walled; has a court of justice, a parish church, a mill and a trade in cattle. Pop. 1850.

MOHRING a tn. Bavaria. See **MEHRING**.

MOHRINGEN.—1 A vil. Württemberg circle Necker-tail and near Stuttgart, with a church and two mills. Pop. 2145.—2, A tn. Baden, Lake circle, on the Dumber, 29 m. N.W. W. Constance. It has a castle, manufactures of calico and hosiery, the works, and a trade in sheep. Pop. 1200.

MOHRUNGEN a tn. Prussia, gov. and 80 m S.W. W. Bamberger, cap. circle, between Lakes Mörking and Seeburg. It has a church, castle, and house of correction (arm. factory of linen, and a trade in yarn. Pop. 2770. Area of circle 856 gov. m. Pop. 45,911.

MOIDART, a loch or arm of the sea, Scotland, in a district of the same name, S.W. coast of Inverness-shire. It is about 4 m. long W. to E., and is comparatively shallow, a great part of it being laid dry at low water. In its mouth is the island of Shana, on each side of which the sea enters by narrow channels. It gives its name to a mountainous district, about 12 m. long by 8 m. broad, between Lochalsh, Loch Eyle, Loch Aylort, and the sea.

MOIE, or **Mora**, a vil. and com. France, dep. Haute Savoie, prov. Genevoise 5 m from Rumilly with a church, a charitable endowment, the remains of an old castle, and a trade in agricultural produce. Pop. 1888.

MOILAN, or **MOILIA**, a maritime vil. and fortress, Arabia Petros, on the Red Sea, about 45 m S.W. from the entrance to the Gulf of Akabah ist. 37 40' N. lon. 85° 29' E. (n.). It is one of the stations used as a depot for grain for Muscatine pilgrims. A small garrison of Turkish soldiers occupies the place. Excellent water and sheep are to be obtained here, but the anchorage is unfit either for ships or boats.

MOIMENTA DA BURA a tn. and par. Portugal, prov. Beira-Alta, com. and 31 m S.E. Lamego. P. 1250.

MOINES (lit. aux), a small ist. France, Gulf of Morbihan off the coast of dep. Côtes-du-Nord about 13 m. N. Lannion. It is the largest of the group called Sept Îles or Seven Isles, and the only one which is inhabited. It is surrounded by steep rocks, but has two good roadsides, both of which are defended by a fort.

MOIRA, a tn. and par. Ireland, on Down 14 m S.W. Belfast, near the railway thence to Armagh, with a handsome Established church, two Presbyterian meeting-houses, a Methodist and R. Catholic chapel, several schools, a handsome courthouse, and a market-house, mulla and exorbitant weaving, in which the inhabitants are chiefly employed. Area of par. 8096 ac. Pop. 3436.—(Local Correspondent.)

MOIREAC (Latin *Muenonius*), a tn. France, Tarn-et-Garonne, 8 bank Tarn, here navigable and crossed by a handsome bridge, 15 m W.N.W. Montauban. It is surrounded by a stony boulevard, occupying the site of the ancient ramparts, is well built has a fine old church, entered by a remarkable portal, on which numerous fantastic sculptured figures are engraved, a court of first resort and commerce, a communal college, and a considerable trade by the Tarn particularly in fine flour, exported to the Levant and the colonies, ad. saffron, wine, and wool. Pop. 6168.

MOJAGALI, a tn. Spain Andalusia, prov. and 40 m. N.E. Almería, and about 5 miles from the Mediterranean. It has two squares, a townhouse and prison, two primary schools, a religious castle once almost impregnable, a gymnasium, and three hermitages, a flour and three oil mills, a work for smelting argandite (iron ore, obtained from the Sierra Almagra, and some agriculture. It was wrested from the Moors by Ferdinand and Isabella in 1488. Pop. 4800.

MOJADOS, a tn. Spain Leon, prov. and 16 m S. Valladolid on a gentle slope above L. bank Caga. Here crossed by a bridge of six arches. It has two churches, a palace, courthouse, prison primary school, several flour mills, and a trade in agricultural produce. Pop. 1062.

MOJATSK, or **MOJATSKA**, a tn. Russia, gov. and 63 m W.S.W. Moscow cap. dist., on a height bounded on two sides by deep ravines, and on another by the Moskva, which is crossed by three bridges, and here joins the Moskva. It is defended by a fortress, was almost entirely destroyed after the battle of the Moskva, and has been rebuilt in a much less proved form. It has three churches of stone besides seven of wood; a convent, superior school and almshouse, and a considerable trade in corn, wood, and deals. Pop. (1850) 2883.—The fortress contains large tracts of forest and several extensive marshes, and is in general not very fertile. Area. 511 gov. sq. m. Pop. 51,550.

MOJGUKH, a tn. in K.W. Hindostan, presidency and 45 m S.E. Bahawalpur lat. 29° 1' N. lon. 72° 11' E. in the desert extending through the E. part of the State. It has walls about 50 ft. high, and 2½ ft. thick, with numerous bastions. A mosque conspicuously surmounts the gateway, and a little to the N. is a Mahometan tomb, with a cupola, profusely ornamented with coloured glazed tiles.

MOJOLA or **MOJOLONA** a vil. and com. Italy Piedmont, Prov. Cuni, about 4 m. from Doguente 1 bank Stura, with a church and a charitable endowment. Pop. 1028.

MOJSEAN, or **MOJSA**, a vil. Hungary Thäier, Thälis, on Maros, about 20 m from Balgath, with a Greek church and a monastery in its neighbourhood. Pop. 1768.

MOKCHA or **MOJCHA**, a river, Russia, which rises in the S. of gov. Pensa, a little N.E. of Tchembov. Flows S. to N across gov. Pensa, bends round to the W., enters gov. Tambour and flows W.S.W., and joins R. bank Oka, about 18 m. above Elabon. Total course, about 260 m.; principal

affluents, the *Iza* on the *r.*, and the *Yad* and *Tana* on the *l.* bank. It is well stocked with fish, but not navigable.

MOKHA a seaport, Arabia. See **MOGHA**.

MOKRIN a to Hungary, Thither Theres go Toronini, 20 m. from Seged. It has a Greek church and a trade in corn, fax, hemp, cattle, sheep, and swine. Pop. 5364.

MOKRIANKE, a to Russia, gov and 23 m. N N W Penza, esp dist., on the Moksha. It has six churches, all of wood, a Greek convent, a manufactory of woollen cloth and distinguished itself in 1717, by its valiant defence against an invasion of the Tartars of the Kaban. Pop (1851) 9103

MOLA, several places, Naples—1, (or *de-Berh*, Latin *Turris Judaea*) a to and seaport, prov and 12 m. E.S.E. Bari, on the Adriatic. It consists of an old and a new town, the former surrounded by a wall and ditch, and defended by a castle, but the houses poor and in bad condition, the streets narrow, irregular, and dark. The latter, lying along the seashore, is much better built. The harbour is insecure, and the roadstead though it has depth of water for the largest vessels, is quite open. Pop about 7000—2, (*di-Grota*), a to, prov Terre-di-Lavoro dist. and 4 m. N E Gela, on the Apennine way near the foot of the Apennines, inhabitants, fishermen. There had a villa in the vicinity, and is said to have met his death here from the assassins of Antony—3, a to in Sicily, prov and about 20 m. S.W. Messina, on a lofty summit, walled and defended by a strong castle.

MOLAHIFFE par Irish Kerry 9805 sq. P 3270

MOLABE, a vil Spain, New Castile, prov and 23 m. N Madrid with two small squares, irregular and ill-paved streets, a townhouse, prison, two schools a church and three hermitages, and near it some mineral baths. Pop., chiefly agricultural 1487

MOLABE or **MORABE** a in Italy, Piedmont, dir Alessandria prov and 10 m. E.S.E. Acqui in a beautiful valley 1 bank Orbe with a large and handsome church and a trade in corn wine and cattle. Pop. 1490

MOLABE or **MORABE** par Eng Kent 1449 sq. P 540.

MOLABANA a vil and com. Italy Piedmont, dir Cuneo, about 1 m. from Biagiano, near the Dugano, with a church, and a trade in corn and wine. Pop. 1871

MOLD, a par the market in and par N Wales, co. Flint. The town is pleasantly situated on a fertile plain 64 m. S. Flint, at a junction of the Chester and Holyhead rail way. The houses are for the most part, well built, generally of brick, amply supplied with water, and well lighted with gas. It has an elegant Established church, with a lofty tower, four Dissenting chapels, a national, British, and several private schools, and two commodious market-halls. There are several large collieries and lead-mines in the immediate neighbourhood, which employ a good many hands, but the inhabitants are chiefly occupied in agriculture. Mold unites with Flint, &c., in sending a member to Parliament. Pop. (1851) 5439 Area of par, 16.104 sq. P 10 998.—(*Local Correspondent*)

MOLDAU, **MOZAVA** or **MOZAVA**, a market in Hungary, co. Abaujvar, on the Bodva, 16 m. from Kacsaba. It was once a place of some importance surrounded by walls and entered by several gates, and has still a handsome courthouse, a large old church, manufactory of leather shoes, mills, and an extensive trade in corn. Pop. 2455.

MOLDAU (Bohemian, *Wienau*), a river Bohemia, which rises in the Schwarzwald belonging to the Schumwald, in the S. of the Prater Fräulein, on the frontiers of Bavaria flows first S.E. to Rosenburg, where it suddenly turns almost due N, and continuing to follow that direction, though, in a somewhat arduous course, passes Budweis, where, on the right, it receives the Maloh, and reaches Moldau Town, a few miles below which it receives also on the right, the Laseh mts, still proceeding N it receives the Wottawa on the left, near Klingenberg, the Sava on the right, near Dalrie, and shortly after, on its left, the most important of all its tributaries, the Beran. Having now become a noble river it traverses the town of Prague and ultimately, after changing its direction, and turning the E., joins 1 bank Elbe, 17 m. N Prague. Its whole course is about 230 m. It begins to be navigable at Rosenburg, where its N course commences, but at first only for shallow barges. Below Prague it floats vessels of 80 tons. It is well supplied with fish.

MOLDAU-TOWN, a to Bohemia, circle and 18 m. N Budweis on the Moldau. It has a church, chapel barracks,

townhouse, hospital and castle, built near the site of an ancient castle of the Tumulph. Over a chalybeate spring in the town a bathing establishment has been erected. There are several mills. Pop. 3351

MOLDAVIA (PRINCIPALITY OF) [German, *Moldau*; Turkish, *Beyler* or *Kere Eyalet*], a state of E. Europe, and one of the three Danubian principalities, under the suzerainty of Turkey capital city Jassy. It is bounded N and E by Russia, being separated from gov Bessarabia by the Pruth, Yalpuch, Kirsau, and Sarikau, S. Wallachia and Turkey and W the Austrian provinces of Transylvania and Bukovina, lat 44° 50' to 47° 18' N lon 26° 18' to 30° 12' E. It is 320 m. S.E. to N.W. and about 100 m. E. to W throughout three-fourths of its length, the remaining fourth abruptly diminishing to about 45 m. The general surface of the country, occupying the W. frontier, may be represented as composed of undulating plains of great beauty and vast extent, covered with luxuriant crops of grass. Towards the W. the plains are succeeded by hills and valleys formed by detached branches of the great Carpathian chain, which separates this country from Transylvania. It is watered by several considerable streams, the largest, the Sereth traverses it long tidally, nearly throughout its entire length. The other larger rivers are the Bistrica, Buhai, Moldava, Tiras, and Tsalna all affluents of the Sereth, in its turn a tributary of the Danube, and all flowing N to S. As already mentioned it has also the Pruth on its E. border, and, for a short distance, the Danube on its S. limit. It possesses considerable mineral wealth, of which, however little advantage has been taken. Rock-salt abounds in the vicinity of the Carpathian mountains, asphaltum is found in several parts, and a great quantity of sulphur is produced, chiefly in the N. part of the country while in the south of several of the rivers, particularly the Bistrica, small quantities of gold are found. Many parts of the country are poor, and uncultivated, and but thinly inhabited, while others support a numerous population, and are remarkable for their beauty and fertility, other portions, again are covered with extensive forests. The climate is warm in summer but frequently severe in winter. In hot seasons and in the neighbourhood of marshes, it is unhealthy. The principal products are wheat, barley, millet and maize, wine and tobacco are also produced in considerable quantity—some of the former of excellent quality, particularly the white wines of the mountains, which are much prized. Agriculture, however, is but indifferently understood, and the implements of husbandry of the worst and most rude description. But by far the greater portion of the country is in pasture, on which vast numbers of cattle, horses, sheep, and goats are reared. Large herds of hogs, also, are fed in the forests. The Moldavians pay considerable attention to their breed of horses great numbers of which are sent into Austria and Prussia for the service of the light cavalry. The cattle, in general, are superior to those of E. Europe, and are driven for sale as far as Vienna, and even to Breslau in Silesia. The wild animals are stags, wild boars, bears, wolves, foxes, wild goats, hares, and martlets. Bees also abound. The manufactures of the province are very trifling, and are calculated for home consumption alone. Its foreign trade, however, through its port of Galatz, on the Danube (*below* *ac*) is considerable and is increasing. The principal exports are wheat—large quantities of which are brought down the Danube from Hungary—maize and spelt, tallow, wine, planks and deals preserved heart bagging stuff, &c. Imports, manufactures and twist, angus, cotton, iron, all, dried fruits, lamons, tobacco, caviar salted fish, skins, alba, or coarse cloth, &c. But there is, besides this, a large internal or inland traffic, chiefly in cattle, with Russia, Austria, and Turkey. The great bulk of the people in Moldavia are employed more or less in agricultural pursuits, the poorer classes cultivating the lands of the richer and receiving payment in kind instead of money. They are a very intelligent and industrious race, quiet and harmless, and, though given to drinking yet quarrelling and fighting are almost unknown among them. They are also extremely hospitable to strangers; but it is said of the upper that they are harsh towards their inferiors, distrustful, and vindictive. The principal food of the peasantry consists of a kind of dough made of the flour of Indian wheat, sometimes mixed with milk. Their dress consists of a loose kind of pantalon, which is fastened to the waist by a light leather

holidays, and from the knee downwards with a tight waist and a short jacket over it. On their feet they wear sandals of goat-skin. The women are generally clothed from the neck to the ankles in a long gown of light-coloured thick cotton made tight at the waist. Under ordinary circumstances, the poorer classes go barefooted, and use no covering for the head excepting a handkerchief. The foundation of the Moldavian language is Latin, intermediate, however, with a number of Slavonic and Turkish words. Education is in a very low state. The established religion is that of the Greek church, although there are a great number of Turks, Armenians, Jews, and Gypsies, in the principality the last so numerous as to form a marked feature in the structure of its society. Moldavia is governed by a prince named the Hoepodar who is elected by the nobles of the first rank (*boyards*) delegates from the lesser nobility from the citizens of the town and the learned bodies, but this nomination must be submitted for the approbation both of Russia and the Ottoman Porte the latter of whom confers investiture. A diet, composed of nobles and clergy discusses all propositions made by the prince, and votes taxes, but all decisions require to be submitted for the sanction of Russia. Moldavia is divided into 12 districts, subdivided into 59 circles, and has 81 towns. Jassy the capital, and Galatz, the principal port, by far the most important. The army is organized on the Russian plan, and can be reinforced by a considerable number of peasant militia, but it has no cannons or fortresses. Moldavia has been tributary to the Porte since the 16th century. Its political state was ruined by the treaties of 1878 and 1879 (the latter that of Adrianople) between Russia and Turkey while maintaining the neutrality of the latter the country was placed under the protection of Russia. In 1834 Turkey recognized the right of Moldavia to display a national flag. P. (1839) 1 419 105

MOLDU, a small seaport, Norway W coast prov Bamsdal, on a bay of its own name. 83 m S E W Christianand. It has a church an hospital an active fishery and a trade in timber and pitch. Pop. (1855) 1454.

MOLDUVA two places Hungary.—1 (U) A tn. Thuree Thesse, on Krasova, 56 m E Belgrade with a R. Catholic church, and extensive open-pit mines, and several small farms in the neighborhood. P. 2800.—2 (O) A vil. Banat, and 55 m. E. by S. Belgrade, near the Danube, opposite an island of the same name with a church and school house, and the ruins of an ancient castle. 1 op 1578

MOLE, a river England, which rises on the border of co. Sussex, traverses Surrey and enters the Thames opposite Hampton Court. total course about 30 m

MOLEBAIX a vil and com. Belgium prov Hainaut, 80 m. N W Mons. It has manufactures of linen, and a trade in agricultural produce. Pop. 1598

MOLNEBELK (St. Amand) a tn. and com. Belgium, prov. Brabant, on the Senna, and partly traversed by the canal of Charleroi and Willebroeck. It is surrounded by elegant villas, and contains a handsome church, and the excellent geographical establishment of Philip Vandermaelen. There is also a musical society. It has a saw and a flour mill a large pottery a carriage-factory foundries, tanneries, breweries, and distilleries, and a good general trade. P. 7293

MOLESLEY or MOLLER two par. England, Surrey.—1 (East) 780 ac. P. 765.—2 (West) 850 ac. P. 480

MOLLEWORTH, par. Eng. Rutland, 1740 ac. P. 245

MOLLETTA, a tn. and seaport, Naples, prov. and 15 m. W N W Bari, on the Adriatic. It has a striking appearance, being approached from the sea, and a number of good houses, some of them built of a white stone resembling marble; but the streets are narrow, and by no means clean. It has a cathedral and several other churches, and a college manufactures of linen and salt-petre a harbour, well sheltered, except on the N, and provided with a building-dock and a considerable trade in corn, oil, and fruit. Pop. 15,000

MOLLIN BAZZANCA, a vil and com. Belgium, prov. Brabant, on a small stream, 6 m. N W Brussels. It has two flour-mills. The inhabitants are almost all employed in agriculture. Pop. 1000

MOLINA, two places, Spain.—1 A vil., prov. and 6 m N Merida on the Júcar. It is mostly scattered in groups of houses over a considerable extent of ground, and has a square, used as a market-place, a town-house, granary three primary schools, a church, two sacristies, a cemetery four

mills, some linen-weaving, a silk-work, and a pepper-mill. In the neighbourhood are three hermitages, and some productive salt-pools. Pop. 3086.—2 (de dragon), A tn. New Castle, prov. Guadalajara, 105 m. N E Madrid, on the Galleo or Molina, at the foot of a hill crowned with an ancient fortress. It has an old wall with seven gates five squares, a town-house prison, a primary and an advanced school, several monasteries, one of them converted into a theatre, another into a barracks, and a third into an elementary school-house an hospital, four hermitages, nine flour, four tanning, and two chocolate mills, potteries, a brick and tile work, some looms for domestic linen-weaving, and a tannery Agriculture and cattle-rearing are likewise carried on. Pop. 3458

MOLINARA a tn. Naples, prov. Principato-Ultra, dist. and 13 m N W Ariano. Pop. 3000.

MOLINETTO a vil and com. France, dep. Alpes Maritimes, 10 m from Bospelle with a parish church two monasteries an almshouse, and a trade in wood and cattle. P. 1000.

MOLINCH, a tn. Spain, Aragon, prov. Teruel 58 m. S. S. E. Saragossa with a church and primary school manufactures of linen, and a trade in wheat, oil, apples, and other fruit. Pop. 1379

MOLINS-DE-REY a tn. Spain, Catalonia, prov. and 6 m S. W Barcelona, 1 bank Llobregat, with a church, courthouse, primary school manufactures of plain and printed cottons and lace, and a trade in wine, hemp, and fruit. P. 1066

MOLIRAO, a vil. and par. Brazil prov. Rio-de-Janeiro, in the serras das Orgãos, between the sources of the Grande, an affluent of the Paraíba with a church and school-house chiefly Indians imperfectly civilized. 1 op. 1000

MOLISE, a prov. Naples. See SANITIO

MOLITCHNIA or MOLOCHNIA YONY a river Russia, gov. Taurida, which rises R. E. of Orskhov flows S. W., and after a course of about 70 m., expands into Lake Molotchne, which communicates with the Sea of Azof. Several German colonies have been established on its banks

MÖLK, or MALK (anc. Melchun) a vil. Lower Austria, r. bank Danube, 45 m. W Vienna, noted for its Benedictine abbey, ministered on a rock which overhangs the town, 180 ft. above the river. It has the appearance of a royal palace, a cloister, and occupies the site of an earlier edifice, in which the Habsburg princes of Austria used to reside. It is one of the richest establishments of the kind in Europe and, at the period of Bonaparte's invasion, 1805-9 when enormous contributions were levied upon it, supplied his army from its cellars with 50 000 phials of wine for several days in succession. The church of the abbey is gorgeously adorned within with gold and red marble, and is celebrated for its fine organ, and the library, which occupies a magnificent apartment, contains 20 000 printed volumes and 1600 MSS. There is also a good collection of paintings. MÖLK is one of the Danube steam boat stations. Pop. 1000

MOLL, a tn. and com. Belgium, prov. and 33 m. P. Antwerp, r. bank Moll-Deuse with a handsome church four chapels, an hospital, prison, two primary schools, two dyeworks, a brewery distillery some corn and oil mills, and manufactures of woollen fabrics, tobacco, hats, leather, and bricks. Pop. 5031

MOLLAND par. Eng. Devon, 8168 ac. Pop. 603

MÖLLEAAR, or MÖLLEAAR, a small stream, Denmark (el. Seeland). It rises a little S. E. Slingsborg forms several small lakes, and after a course of about 20 m. falls into the Sound about 9 m. N Copenhagen. It is of no navigable, but of considerable manufacturing importance, from the number of public works to which it furnishes water-power

MOLLEDA (San Esteban), a vil. Spain, Asturias, prov. and about 18 m. from Oviedo, on an uneven site, with a church primary school and numerous flour-mills. P. 1900

MÖLLEHAUSEN, a vil. Württemberg. See ESENHUSEN

MOLLINA, a tn. Spain, Andalusia, prov. and about 85 m. from Malaga (to which it well built, with a church, and two primary schools. Pop. (agricultural), 1771

MOLLIS, a vil. and par. Switzerland, cant. and 4 m. N Glarus, cap. dist., near r. bank Lunz, at the foot of the Frohnalpstock with a parish church, an old house, interesting as the place where some of the earliest Swiss confederates used to hold their meetings; manufactures of woollen cloth, and a trade in Schabziger cheese and in wine, which is partially grown in the vicinity. Pop. 1064.

MOLLN, or **MOLLAN**, a tn. Denmark, Slesvig Lauenburg, at a small lake of the same name, 13 m. E. Lübeck. Remains trace the chief occupation. P. 2720.

MOLLN a vil. Upper Austria, circle Traun, on a hill between the Steier and the Mollnsee. Building with a church, and manufactures of serfines, and Jews harps. Pop. 1846.

MOLOGA, a tn. Russia, gov. and 70 m. N.W. Jaroslavl cap. dist., in a marshy country, at the confluence of the Mologa with the Volga. It has two churches, a considerable trade, particularly in linen, corn, and provisions, which are purchased in the E. and find their markets occasionally as far as Petersburg. Many of the inhabitants are employed as pilots, bargemen, and raftsmen. P. (1843), 4345.—The district is partly of a marshy, partly of a dry and fertile soil. Wood covers extensive tracts, but is in general of small size, or indifferent quality. Pop. 68,671.—The river rises in N.E. of gov. Tver, flows W.S.W. to Makoussa, then suddenly turns N. easterly gov. Novgorod and flowing E., reaches Luga. Proceeding thence easterly, it ultimately turns S.E., forms part of the boundary between gov. Novgorod and Tver, passing Yagoroslavl, enters gov. Jaroslavl, and joins L. bank of Volga, a total course of about 300 m., but so very circuitous that the direct distance between one of its sources and its mouth, little exceeds 100 m. It is navigable for the largest barges from Ustjuga. Its principal affluents are the Sereb. river, Reboje Tobogoda, and Yana on the l. and the Klama and Lona on the r. bank.

MOLOKAI, or **MONOROI**, one of the Sandwich Islands. Pacific Ocean lat. 21° 9' N. lon. 156° 51' W. (n.). It is long and irregular, and is apparently formed by a chain of volcanic mountains, 40 m. long, and 7 m. to 9 m. broad. The mountains are lofty, and are broken by numerous deep ravines and water-courses, the sides of which are frequently clothed with verdure and ornamented with shrubs and trees. There is but little level land in the island, and consequently few plantations, but several spots repay the trouble of cultivation, although scarcely one-third of it is a barren waste, and but thinly inhabited. The inhabitants are very poor, and ill-provided with necessaries. Pop. (1840) 5900.

MOLOKAI, par. lat. 22° 39' N. 1826 ad. l. op. 431. **MOLEHIM**, a tn. France, Moselle, a tn. France, dist. Bas Rhin, on the Moselle, 11 m. W.S.W. Strasbourg. Its parish church, originally intended for a Jesuit college, contains an odd mixture of Gothic and modern sculpture, but is remarkable for the lightness of its bell-towers. It has manufactures of wire, sword-blades, files, scythes, cutlery, springs, tools, and general ironmongery, blacksmiths, dye-works, and a trade in corn and wine. Pop. 3380.

MOLTON (MORF), par. Eng. Devon 14,851 ad. P. 1899. **MOLTON** (MORF), a town, bar, market in and par. England, co. Devon. The town, on the small river Mele, 24 m. N.N.E. Exeter. Has well-paved streets, lighted with gas, a spacious market-place, a handsome townhall, and a fine old church with a curious stone pulpit richly sculptured. Places of worship for Independents and Wesleyans, several schools, manufactures of shalloos, serges, coarse woollen cloth, and lace, the last of recent introduction. Area of par., 6264 ad. Pop. 4423.

MOLUA, a nation in the interior of Africa, E. of Congo, with whom the Portuguese in Angola have had communication, with the view of establishing a commercial intercourse. It is governed by a prince, entitled Mada. Yawo or Muro-pue, to whom, in 1807, the Portuguese sent two native mercenary travellers, who reached the capital by a circuitous route of 77 days, from Pango Andongo (about 160 m. from Loanda). Our authentic information respecting this kingdom, is compressed in the following particulars.—The Molua (correctly Alua, the plural of M'lu) occupy the valley of the Lufia, a great river, the main branch of the Zambe, and which may be traced upwards, in a S.E. direction, to lat. 11° W. of the Lufia, and at no great distance from it flows another large river, the Lufia, not fordable. But the Lufia receives its chief accessions from the hills or mountains on its right or E. side, the road from the capital to the Luahala, a distance of 400 m. up the valley, being crossed by at least 100 streams, several of which are not fordable. The capital stands between two small streams, the Ingaba and Lufia, which, uniting lower down, flow W. into the Lufia. Its position is probably within the limits of lat. 4° 2' S.,

Vol. II.

lon. 19° 20' E. The S. boundaries of the kingdom are 34 days from the capital, being formed, on the W. side of the valley, by the desert ridge which separates the Lufia from the Congo, and on the E. by the S. Saburi, where begins the district of the mines (of salt and copper) which formerly belonged to the Kuropus, but is now annexed to the dominion of the Kambé.

MOLUCCAS (TAN), or **SPICE ISLANDS**, (Dutch, *Molukken*, French, *Molouques*), three groups of islands. Indian Archipelago, between Celebes and Papua, and lat. 8° N. and 5° S. —1, The Ternate islands, or Moluccas proper, consisting of Mol. Ternate, Gilolo, Sautian, Obi, Marau or Morai, and numerous islets.—2, The Ambon islands, including besides Ambon, which is the chief seat of government for the whole Moluccas, the isls. of Ceram, Boeroe, Amboina, and other smaller islands.—3, The Banda isls. (which are) They are nearly all mountainous, and some of them have peaks rising to a height of 7000 ft. or 8000 ft. mostly volcanic, and there are still several active volcanoes in the group. They are very subject to earthquakes, a serious visitation of this kind took place on November 23, 1852, the shocks continuing at intervals till December 22 following. Great loss of property and considerable loss of life were sustained by it in the Banda islands, where the volcanic action seems to have been strongest, but its devastating effects were also felt in Ambon and Ceram, where many lives were likewise lost. In Ternate, Sautian, and Gilolo. Cloves and nutmeg, and nut and ago, are exported to Europe and birds-nests, trepang, and sherk-shu, to China. A small quantity of gold, and some birds of paradise, are also exported. The whole number of islands amounts to some hundreds, but most of them are small and uninhabited. The Moluccas have been for centuries alternately in the possession of the Spaniards, Portuguese, and Dutch, but were taken from the latter by the British, in 1796, and restored to them in 1801. In 1810 they were again captured by the British, and in 1814 again given up to Holland, in whose possession they still remain. The general language on the coast is the Malay.

MOLUCCAS—GRANGE, Ireland, Antrim 929 ad. P. 786. **MOLVIEZAR** a vil. and coun. Spain, Andalusia, prov. and about 85 m. from Granada, agreeably situated among gardens, watered by mountain streams. It has a church, an episcopal convent, townhouse, prison, two schools, an oil and several flour mills, and a trade in fruit. Pop. 3303.

MOMBACARAO a vil. and coun. Italy, Piedmont div. Cune, prov. and N.E. Mondovì, on the Balbo with a church and the remains of an old castle and a trade in corn and cattle. l. op. 1080.

MOMBALAZO a tn. Italy, Piedmont, div. and N.W. Alessandria, on the Cervo, here crossed by a bridge with three churches, an old convent, the remains of a feudal castle and a trade in corn, wine, and wool. Pop. 1600.

MOMBAS or **MOMBASAN** (the former the common, the latter the literal Arabic form, in the language of the native race, M'pasa), an isl. and to E. coast, Africa, lat. 4° 8' S. lon. 39° 49' E. Two small rivers the Yumbo to the N. the Pemba to the S. each with a course of 15 m. or 20 m., run to the same estuary in the middle of which lies the island, about 8 m. long N. to S. and 2 m. wide. The channel separating it from the mainland on the W. is fordable in one place at low water, but the ford is dangerous, and cannot be said to present facilities to an enemy. The shores of the island are everywhere bold, the rock being a coral outcropping. When the Portuguese first arrived at this place, at the end of the 15th century, they found a large and well-built town, with a great deal of trade and the people apparently wealthy. In 1607 Almeida took Mombas, and destroyed it by fire. In 1683, the Portuguese again took possession of the island, and appear to have retained it till about 1770. During this period they erected the fort, castle, great tank, and other structures, which remain more or less dilapidated to the present day. The castle stands on a rock, not perpendicularly and is still capable of being rendered a strong-hold. Mombas, at the present day, is but a ruin. Its inhabitants are mostly sunk in abject poverty, and wretched hovels are now scattered among the crumbling walls of stately buildings. A few stone houses still remaining, are inhabited by Arab merchants. Immediately outside the walls of the town, on the N. side, is Jokili, a Raydali village, that is, a

43

suburb inhabited only by Mahomedan Africans. At the S end of the island the villages of mixed population, called Kikindini. The whole population of the island, probably, does not exceed 6000. The harbour of Mombasa is said to be quite perfect, secure, commodious, roomy and open to the sea-breeze. The Arabs of Muscat having sided in expelling the Portuguese in the early part of the last century, obtained the sovereignty of the place. But in the latter half of the century Mombasa recovered its independence, the defence of which it maintained on obstinate struggle with the Sultan of Zanzibar. Threatened by him, it placed itself under the protection of the British flag in 1823, was immediately filled with Europeans, and enjoyed for three years a return of marvellous prosperity. But the British government not accepting the cession of the place, the flag was struck in 1828 and the forces of Sultan Said Baid aided by an American adventurer with a heavily armed ship, obtained possession of the town soon after. The fall of Mombasa is regarded in E. Africa as a most interesting and celebrated event, and the place, so valiantly defended, has obtained a new name, and is now generally called by the natives *Vita*, that is, *Battle*.

The mainland, near Mombasa, rises gradually to the W for about 15 m. when it spreads into a plain having a general width, E. to W. of 20 m. S. along this plain, which has an elevation of perhaps 600 ft., rises a chain of hills, to a general height of 1000 ft. Waman Peak or Jumbo (lat. 4° 32' S) however attaining a height of 2500 ft. Numerous perennial streams rise from these hills and the elevated plain to the sea. Towards the interior the country makes to a sea-like plain of little elevation, and extending into the interior beyond our knowledge, but interrupted by several mountain groups, rising abruptly from it, and not connected in systems. Immediately W. of Mombasa, the high plain extends further and several hills as Kadaro, Masungu, &c. rise from it some of which are visible from the coast. Beyond these hills again, are the Ndara and Bura ridges, running N and S about 60 m. or 70 m. from the sea and called, collectively, the Taita mountains. They probably attain an elevation of 8000 ft. and are well wooded on their summits. The woods on their sides abound in bananas and sugar-cane, while the thorny thickets at their feet, where they reach the low and dry plain serve to protect the villages above.

But beyond these mountains and even visible over them from the hill of Kadaro, stands the giant of these regions, Kilimanjaro or Kilima Njaro [Mount Njaro], distant 120 m. perhaps from the coast. The missionaries of the Church Missionary Society residing near Mombasa, insist on crowning the summit of this mountain with perpetual snow but their evidence on the point, intrinsically weak and defective, is also directly opposed to the statements of the natives, who say positively that perpetual snow is unknown in E. Africa, and who, at the same time, celebrate Kilima Njaro for its great height, and for its corallines, agates, rock-crystals, and other precious stones, as they deem them for the sake of which it is much visited. From the hills on the side of Kilima Njaro, may be seen Jumbo or Waman Peak on the sea-coast, and Kadaro towards Mombasa. Towards the S.E. the isolated mountains of Ufigo and Firo rise abruptly from the level plain. At their N base is the long and narrow lake Iti. Beyond these, to the N, in the same direction, are seen the mountains of Usuhara, near the river Pangani. The Taita mountains, in the E., are followed towards the N.E. by some other smaller masses of similar height and character. The level plain is generally dry, with occasional tracts of thorny thickets, but no large trees. One or two small rivers run through it from the Taita mountains, whether to the coast or to Lake Iti is not evident. But several copious streams flow from the S. side of Kilima Njaro and probably serve to form the fine river which reaches the sea in lat. 5° 26' S. under the name of Pangani. From the same mountain runs the Tavo or Chava, N.E. to join the Ozi. From this rapid sketch the general drought of the country may be easily understood. For the sources of the Tavo running into the Ozi and of the Pangani are 120 m. from the coast, and these two best-named rivers are 300 m. asunder but of the extensive region encompassed by these streams, the greater part is destitute of running waters, and perhaps the slopes towards the sea-board is alone adequately watered.

To the N of Mombasa, the maritime region has the same

features as to the S, and slopes to the shore from hills, 15 m. or 15 m. distant, but the hilly tract increases in breadth towards the N, and towards the third parallel of latitude it becomes the haunt and home of Galla tribes, who spread devastation around them. At the small river Mduga, about 5 m. from Mombasa are extensive stone ruins of a remarkable character and the natives say that similar ruins of well-built towns occur every four or five miles along the coast, as far as Mas Gombini [Lower head], 80 m. from Mombasa. Among the ruins so described are those of the once celebrated Mombasa lat. 5° 18' S., which was destroyed in the last century by the Galla. Just beyond Mas Gombini begins the great bay named in the charts Formosa, and by the natives Panamua [Hippopotamus Bay]. At its S end is the mouth of the Sabaki, which rises among the hills of the Galla [at lat. N. that of the Ozi, a river of considerable magnitude]. If returning to the interior we cross the river Tavo, and advance N.W., we arrive in a short time at the river Adli flowing at the foot of a high bank or ridge through a break in which lower down, it turns N.E. and doubles its exception on the coast, under the name of Ozi. N. of the Adli and W. of the Galla country, are the plains of Ukamba. These are bounded on the N by the large river Dana, the course of which we know not, but suspect this to be the river which discharges its waters behind Pata Island. (See PATA.) N. of this river is another group of mountains, which are said (but the accounts are extremely obscure) to reach the limits of perpetual snow. They are called *Karus* or *Ndaukoni*, and stand probably in lat. 38°-39° E., and about a degree S. of the equator. The Dana and two other rivers flow from them.

The natives immediately round Mombasa are called by the general name of *Wahika* [sing. *M'Wika*] that is to say people of the bush or wilderness [shika]. They are tall and robust of a dark-brown complexion, but well featured, and not negroes. Their country (the maritime district) is extremely beautiful resembling a fine park, with noble trees, single or in groups, scattered widely over an undulating surface, and so productive, that its inhabitants live in abundance with little or no labour. The indolent *Wahika* cultivate only a little manioc, their villages are often large, and generally form a hollow square wherein the cattle are penned, which if left unprotected at night, would be quickly devoured by wild beasts, particularly hyenas. In the middle of the village, is generally a large and well-finished building, intended, perhaps, as a temple or civil palace, but ordinarily used as a place of coronation, where the men meet to intoxicate themselves with palm-wine. The *Wahika* do not bury their dead, but leave the corpse outside of the village at night, to be carried off by the hyenas. Though Pagans, they use circumcision. Their usual clothing is a blue cotton wrapper round the waist, and another thrown over the shoulder, their weapons are swords and poisoned arrows. One or two tribes of the people are distinguishable by their habits. The *Wahigo* close to Mombasa on the W and S, cultivate the soil with axes, and hold great markets of agricultural produce. They grow much tobacco, yet less than they consume. The *Waseggu*, further S. near Waman have the finest cattle and the largest herds in E. Africa. These are the *Mosequeque* of Portuguese history, the valiant and vigorous pastoral people, who saved Mombasa from the Zulus in 1820. They still retain the custom of wearing clay caps. There is reason to believe that the *Waseggu*, though now perfectly assimilated to their neighbours in language and manners, are of Abyssinian origin. The *Masingulu* [Water-Figs or Porpoises] a little farther S. on the coast, also an ancient tribe, white pastoral occupations with those of the coasters and fishermen, and are comparatively rich. These people are ruled in their several districts or villages by petty chiefs, without any permanent authority or political combination.

The great level plain behind the maritime chain of hills is a desert extending over some thousands of square miles, in which there is no fixed habitation, except on the summits of the mountains, rising abruptly from the plain, which are tenanted by parties of *Wahika* from the E. or of *Mokamba* from the N. The plain itself is left to the antelopes, of many species, *sebras* and *giraffes*, which take the dry open ground, relegating the *maras* and *sebras* to the elephants, and the tangled thorny thickets to the rhinoceros. But predatory bands of *Wahiki* a people of Abyssinian origin, of whom we have

no satisfactory account, occasionally sweep over it, and render it unsafe. The hilly country (Kilima) at the foot of Kilima Njaro, is regarded on the coast as a natural fortress or bulwark against the incursions of Galla and Wakwavi. It is called Chaga, which seems to be the name of the thornbush, used as a fence round villages. In Kilima or Chaga, the people do not live in loose republics as on the coast, but are united under an absolute king and all their social organization has a military character.

The Wakamba, who occupy the plains N. of the Ash N. W. from Mombasa, N. E. from Kilima Njaro, seem to be a peculiar race, although their language is akin to that of the coast. In Mombasa they are known under the name of Meremonggo. These people are much inferior to the Wakika in size and strength, but elegantly formed and though quite black, have fine features, without the least trace of negro coarseness. They are the traders and carriers of the interior but the extent of country over which their traffic moves, is prodigiously exaggerated by misconception. It has been said that their country is a two months journey distant from Mombasa whereas the truth is that the circuitous road ordinarily travelled by them does not exceed 250 m. in length. They convey to the coast the ivory and skins collected by the wild hunters of the interior. They themselves have a wild look. Besides a wrapper of cotton or grass cloth, they wear over the shoulder a loose and often handsome mantle of lynx or leopard skin. They treat brass-wire tightly round their arms at an early age, and as the wire is never removed the muscular development is hindered and deformed, and strength necessarily impaired by it. The Meremonggo have iron of the finest quality which is exported in small bars to Persia and India, for the manufacture of sword-blades. They themselves manufacture swords after the pattern of those of the Knights Templars, received probably from the Red Sea, where swords of that form have been long in vogue. The traffic of the Meremonggo all centres at present in Mombasa, but doubtless while Malindi flourished, its commerce was chiefly managed by that active nation whose plains are not above 120 m. from the site of that city—(Oswen Voppe, *Account of Mombasa* de by Lieut. Emery R. V., in the *Journal of the Royal Geographical Society* Miscellaneous volume 1-11.)

MOMBASIGLIO a vil. and com. Italy Piedmont div. Com. prov. and about 8 m. from Mondovì; r. bank Monza with a church and a trade in corn, wine and chestnuts. Pop. 1057.

MOMBELLO a walled in Italy Piedmont div. and N. W. Alessandria, with a church and a trade in corn and wine. Pop. 2861.

MOMBELTRAN, a m. Spain Old Castile prov. and 33 m. S. E. W. Avila. It is well built, has two squares, two churches a fine old castle, in the form of a pentagon, which belonged to the old Duke of Mombeltran, a large and commodious townhouse, hospital, two schools, manufactures of linen, earthenware copperware and brass several oil and flour mills and brick and tile works. Pop. 1193.

MOMBELLINI a vil. in Italy Piedmont div. and W. N. W. Alessandria; r. bank Tigliana here crossed by two bridges. It has a church and a trade in wine. Pop. 2440.

MOMBELLO DE TARRAGONA, a to Spain, Catalonia, prov. Tarragona, r. bank Salado; with a church a distillery and a trade in agricultural produce. Pop. 1106.

MOMELLANO or MOMENCLAN, a to France, dep. Savoie r. bank Isère here crossed by a stone bridge of 17 arches. It has an ancient church a Dominican convent barracks, as hospital and a trade in corn, wine, fruit, and honey.

MOMIGNIES, a to com. Belgium, prov. Hainaut 86 m. S. E. E. Mous. It has manufactures of woollen and cotton hosiery two breweries an oil and several flour mills. Pop. 2490.

MOMLING or MÖMMSING a vil. Bavaria Lower Franconia dist. Obernurg with a church, a chapel, and a mill. Pop. 1291.

MOMO, a to Italy Piedmont div. and 8 m. N. N. W. Novara, 1 bank Agogna. It has a court of justice, and two churches. Pop. 1297.

MOMPANTERNA, a vil. and com. Italy Piedmont div. Turin, prov. Susa, with a church, and some trade in wine. Pop. 1299.

MOMPIANO, a vil. and com. Italy, Lombardy gov. Milan, prov. and 3 m. from Brescia, in a fine vine and nut berry district. The hills around contain numerous springs, from which the fountains of Brescia are supplied. P. 3070.

MOMPOX, a to. New Granada, prov. and 140 m. S. by Santa Maria, 1. bank Magdalena lat. 9° 18' N. lon. 74° 30' W. The streets, which extend along the river for two miles are well laid-out but the houses are badly built. There are here a good quay and a custom-house, built very high, on account of the periodical floods of the river, which takes place in December and raise the waters 12 or 18 ft. higher than their usual level. Mompox is the depot of all the foreign goods destined for the consumption of the valley of the Magdalena. It is greatly infested with mosquitoes and alligators. Pop. 10,000.

MONA PASSAGE AND ISLAND W. India. The passage is the channel between the islands of Hayti and Porto Rico, about 20 m. in breadth. The strait, about 4 m. by 2 m. is situated at the S. entrance to the passage, and nearly in its centre lat. (E. point) 18° 5' N. lon. 67° 50' W. (N. point) It is low, and without promontories, has no trees of any considerable height, but is nearly covered with brushwood.

MONACHLOGDDU par Wales, Pembrokeshire. P. 503.

MONACO a principality Italy on the Gulf of Genoa enclosed on the land side by France dep. Alpes Maritimes (see same name, which lies about 7 m. E. Nice). Until early in 1861 it comprised the communes of Roccarubra and Mentone, besides the town and territory of Monaco. It had an extent of 10 m. by 5 m. pop. 7000, and by the treaty of Paris, 1815 was placed under the protection of the King of Sardinia, who was allowed to keep a garrison in it. By a treaty concluded in February 1861 the Prince of Monaco ceded to France the communes of Roccarubra and Mentone for an indemnity of 4,000,000 francs and by a treaty concluded November 9 1863, he gave up to France his customs rights for five years for an annual payment of 20,000 francs. The principality was founded in the 10th century in favour of a member of the house of Grimaldi, with which it has since remained. The territory is now restricted to the town of Monaco (anc. *Monaca Arx*) and its immediate environs, an area about 5 sq. m. The town is beautifully situated on a plateau which projects with a precipitous front into the Mediterranean, and is walled and defended by a castle, but is completely commanded by an adjoining hill. It is composed chiefly of old houses but has a fine esplanade, in which stands the palace of the prince. It has also a fishery and a harbour at which some trade, chiefly in oil and fruit, is carried on. Pop. in and principality 1787.

MONAGAG, par Ireland Limerick 22791 ac. P. 3681.

MONAGHAN an island co. Ireland, gov. Ulster bounded N. by Tyrone, E. by Armagh and Louth, S. by Monaghan and Cavan, W. by Fermanagh greatest length, N. to S. 87 m. greatest breadth, E. to W. 23 m. area, 500 sq. m. or 318,733 ac., of which 235,695 are arable. It is hilly in the N. W. and E. soil of every variety, that in the more level portion forming the N. part of the great central Fermanagh plain of Ireland, very fertile, but in the hilly parts composed of stiff clay difficult to work. It contains a number of rivers and lakes, but all of them are small. Agriculture, in which the greater proportion of the inhabitants is engaged was formerly in a very depressed state, but is now improving. The number of acres under crop, in 1851, was 164,068, more than a half of which was growing oats and about a seventh potatoes, the remainder distributed between wheat, barley, rye, beans, peas, turnips, mangel-wurzel, flax (14,902 ac.), clover, &c. The linen manufacture is reviving. In December, 1851 there were 140 national schools in operation, attended by 18,909 children. The county is divided into five baronies, and returns two members to Parliament constituency (1854), 4119. Principal towns, Monaghan, the capital, Ballibey, Clones, Castleblayney, and Carrickmacross. Pop. (1841), 300,449 (1851), 141,768—(Thom's Irish Directory).

MONAGHAN, a market in and par. Ireland, dep. above co. The town 10 m. N. W. Dublin, on the Ulster canal, has a spacious square or market-place, clean streets, the latter lighted with gas; a handsome courthouse, jail, infirmary, and cavalry barracks, a parish church, a R. Catholic and Wesleyan chapels, and two Methodist meeting-houses, a fever hospital, moon workhouse, and several schools. The river

manufacture is carried on to some extent; and there is a considerable linen market, but the principal trade is in gold and silver. Pop. (1851), 5494. Area of par., 13,548 ac. Pop. 9090. —[Local Correspondent.]

Catholic chapel and abbey, and several schools, a capacious marketplace, a large distillery and brewery and a medical dispensary. Area of par. 7142 ac. Pop. 2533.

MONASTERIO, a town, Spain, prov. and 63 m. S.S.E. Badajoz, on the Sierra Morena. It has small and generally ill built houses, a townhouse, a prison, an endowed primary school for each sex, a church, and a ruinous hermitage. Near it are mines of gold, silver, copper and lead, but none of them are now in operation also quarries of limestone, and two kasbahs. Pop. (aggricultural) 2410

MONASTERIO (p. Arqui) two places, kingd. of Italy Piedmont—1. A vil. and com. div. Alessandria, prov. and about 7 m. S.W. Arqui. 1. bank W. Bormida, here crossed by an ancient and magnificent stone bridge. It has a church a convent and an ancient tower a fortress and a large silk mill. Pop. 1894.—2. *vil. Mondovì*. A vil. and com. div. 1 m. S.W. and about 4 m. S. Mondovì. It has a church a convent and a trade in corn silk and fruit, particularly chestnuts. Pop. 1710

MONASTRILO (de Navacerrada) a vil. and com. kingd. of Italy Piedmont div. Cuni prov. and 8 m. E.N. E. Saluzzo on the Visone. It has a castle, converted into a private mansion, a church, a monastery and a trade in corn, wine, hemp, and agricultural produce. Pop. 1076

MONASTRIOLIS, a par. Irel. King's co. 15 762 ac. Pop. 4533.

MONASTIER, a town, France dep. Haute-Loire, r. bank Gersille, 11 m. S. Le Puy with a church. Pop. 2070.

MONASTIER or **BUTELLA**—1. A city, European Turkey cap. Macedonia, 400 m. W. Constantinople. It is built on the W. side of a fine plain in a room formed by two lofty mountains, and is intersected by a river crossed by numerous bridges. The streets are wide and well paved and the houses neat and clean the mosques and minarets, ornamented with cypress and willow foliage, give a picturesque appearance to the town and the well-frequented bazars are remarkably handsome, some of them entirely roofed over, and lighted from above, while others are only partially sheltered, or semi-roofed with thatching on poles. Being the central station for all military operations relating to Albania, Macedonia, Thessaly and Bosnia, it is a place of remarkable bustle and brilliancy. The majority of the inhabitants are Greeks and Bulgarians; the Turkish residents being mostly soldiers or officials. Pop. about 15,000.—[Laur's Journal in Albania and Thessaly].—2, (or *Monastier*) A seaport in N. Africa, on the Mediterranean seaport and 85 m. S.E. Tunis lat. 35° 45' 24" N. lon. 10° 49' E. (s.) It has some shipping trade and manufactures of woollen and camel fabric. Pop. 12,000.—3 (or *Monastier*) A vil. in Sardinia, div. and 8 m. N.W. Cagliari with several churches, a primary school, two charitable endowments; and a trade in silk, poultry, cheese, and honey. Pop. 1234.

MONASTYERZINA, a town, Russia, gov. and 60 m. E.N.E. Mohilev on the Dnieper. Pop. 3000

MONBELLARD (Cognac), an ancient dist. France, situated at the foot of the Vézère, between Upper Alsace and the old territory of Béarn. After having been long in the possession of the dukes of Burgundy, it passed, in 1419, to a branch of the house of Wittelsburg, and continued with that house till 1793, when it was ceded by treaty to France. It is now included in dep. Dordogne.

MONBÉ, a vil. Spain, prov. and 4 m. N. Valencia; with broad and rather clean streets, a square, used as a market place; a townhouse, four primary schools, a church, and a

hermitage; a silk and a flour mill, bookbinds and gymnasium. Pop. 2145.

MONCALIERI, a town kingd. of Italy Piedmont, div. and 5 m. S. Turin, on a fertile slope above r. bank Po. It was once walled and is still entered by two gates. It is built with considerable regularity has a large and magnificent royal castle occupying the highest site in the town, with a fine square two massive towers, and numerous chapels, a townhouse adorned with a fine colonnade two parish churches, both handsome structures; several convents a college, in an elegant edifice formerly occupied by the Franciscans; several public schools a small theatre, and an hospital manufactures of earthenware, cabinet work, and other articles in wood, numerous saw mills, tile works silk-mills, and a trade in cattle. Pop. 8609

MONCALI, a town kingd. of Italy Piedmont, div. and 21 m. W.N.W. Alessandria, on a height, in a mountainous district. It was once fortified, and still possesses the remains of a strong citadel has two handsome churches, a palace, townhouse communal college, ordinary and founding hospitals manufactures of woollen cloth and making tanneries, silk-mills, and a trade in corn, cattle, wine, &c. Pop. 8966

MONCKO, a town and par. Portugal, prov. Minho, 1 bank Minho, 84 m. N. Braga. It ranks as a fortress, but is only surrounded by ancient walls. There is a thermal spring in the neighbourhood. Pop. 1200

MONCAYO (Monte Guesas), a town, Spain, prov. and about 65 m. W. Buragosa, on the boundary the remains of a castle, 9800 ft. high, and next to the Pyrenees, the highest mountain in that quarter. It is a pebbled mass of red sandstone and limestone, dividing the basins of the Ebro and Duero. It contains mines of iron, and is supposed also to contain coal, as pieces of that mineral are found upon its surface. On its skirts, Titinius Beronius Gracchus obtained a victory over the Allobroges, which decided the fate of that warlike nation

MONCH or **ELMS EIDER**, a mountain Switzerland, on the confines of cantons Bern and Valais, 8 m. N.E. the Jungfrau. It is one of the loftiest summits of the Bernese Alps, height, 13,498 ft.

MONCHADO, or **MONTEBORDO**, a town, Portugal, nearly in the centre of the empire, W. bank Lake Nandadeo, 28 m. N.W. Ave. It is enclosed by a wall built of brick and mud about 20 ft. high by 12 ft. thick, and surrounded by a ditch. It is a regular square, of almost 1000 paces on each side, and is much renowned as having been the birthplace of the emperor Alphonso. Pop. estimated at 4000

MONCHBERG, a market in Bavaria, Upper Franconia, 31 m. W. Würzburg, with a church and a chapel a saw two oil, and four flour mills. Pop. 1838

MONCHEN-GLADBACH See GLADBACH

MONCHO a vil. and com. duchy and 31 m. S. by W. Parma with an ancient church and good pastures. 1. 2201

MONCHIQUE, a town and par. Portugal, prov. Algarve, 11 m. N. Lagos, in a narrow valley on the slope of a lofty mountain of the same name. It has thermal baths, which are much frequented, and is famous for its ham. The vicinity produces fine oranges and citrons. Pop. 3910

MONCHROGH, a vil. Bavaria, circle Swabia, 25 m. S.W. Augsburg, with a church, and an old Benedictine abbey, an iron and a flour mill. Many of the inhabitants are Jews. Pop. 1014.

MONCKTON, two par., Eng.—1. Pembrokeshire 4699 ac. Pop. 1645.—2. (Combs) Somerset; 720 ac. Pop. 1270

MONCORVO (Toukuz), a town and par. Portugal, prov. Trás-os-Montes, on the N. slope of Mount Bebarado, which excludes the sun from it for a considerable part of the day 23 m. E. Oporto. It is walled, flanked with bastions, and defended by a castle, which is in a very ruinous condition. Its church is particularly handsome, and it also contains a grammar-school, an hospital, and a fine fountain. In the time of the Marquis of Pombal, a marble soap-factory, on a very extensive scale, was established here but is no longer in active operation. The principal manufactures at present is confectionary and preserves, which are in great demand. P. 1700.

MONTE RIVELLO, a vil. and com. kingd. of Italy, Piedmont div. Novara, prov. and 11 m. W. Verelli on a hill above the Dora Baltea, here crossed by a bridge and on the canal of Jora. It has an old church, a Franciscan monas-

tery, with a church of modern construction, a Cistercian monastery, a charitable endowment, two schools, and a trade in corn, rice, fruit, and wine. Pop. 2300.

MONTECOCO, a vil and com. kingd. of Italy, Piedmont, *dir. Alacordia*, prov and 20 m N W Asti; with two churches and two castles, one of them in ruins gypsum quarries, and a trade in wine. Pop. 1811

MONTECOU or **MONTECOU**, a town, France, dep. Lot, 15 m S W Cahors. It stands between two valleys, on a conical spur, crowned by a square tower, which in early times served as a citadel, and commanded the district around. Pop. 1144.

MONDA, a tn. Spail, prov and 35 m W Malaga, it has a townhouse and prison a ruinous castle, three elementary schools, a parish church, a hermitage, and three brandy distilleries. Pop. (agricultural), 8904

MONDANIA, or **MONDANIA**, a maritime tn. and gulf Asia Turkey, S.E. shore of the Bosporus. The town stands on the S shore of the gulf, lat. 40° 10' N. lon 28° 53' E. It consists of about 1000 houses, equally divided between Turks and Greeks. There is no harbour, and a very high surf constantly beats against the shelving shore. It is nevertheless, the usual place of embarkation for Constantinople. The environs are singularly beautiful and highly cultivated.

The town extends 18 m E. of the town, and is enclosed by high mountains, the summits of which are clothed with pine and other shrubs, while the valleys are well cultivated and produce vines, figs, mulberries, olives, &c. The gulf runs inland, in a S direction, for 25 m. and has a breadth at its entrance of about 10 m.

MONDEGO (*Latin Mondego*), a river Portugal which rises on the N.W. side of the Serra Estrella, prov Beira-Baixa, about 6 m S.S.W. Guarda, flows easterly first N., then W.S.W., past Coimbra, and Montemor-o-Velho, and forming the harbour of Figueira and the small island of Murracena, where large quantities of salt are made, falls into the Atlantic, after a course of about 90 m. Its principal affluents are, on the right the Dão and Frio and on the left the Alva, Côa, and Azeite. It becomes navigable at the confluence of the Dão.

MONDEGO a river Brazil. See EUPORACIC

MONDEJAR, a vil. Spain, New Castle, prov Guadalajara, 30 m E. Madrid. It has a townhouse, a palace of the Marquis of Belzunce, an hospital for the sick poor two granaries, two endowed elementary schools, and a church, a flour and five oil mills, a soap and a chocolate manufactory Pop. (agricultural) 324.

MONDIE two places, Portugal.—1. A tn and par. prov Beira-Alta, 19 m S.E. E. Lamego, r. bank Tâmega. Its inhabitants spin and weave a good deal of silk. 1665 —2. (*de Basto*) A tn and par. prov Trás-os-Montes, 1665 Tâmega, 66 m S.W. Bragança. Pop. 1800

MONDIOEH, an isl., W Africa. See ANNOBIA.

MONDONEDO, a city Spain Gallia prov and 29 m N.E. Lago, built in the form of an amphitheatre, houses generally good streets paved and clean. It has a townhouse a treasury for theology philosophy Latin, and primary education various educational establishments, a prison an hospital for the sick, a foundling hospital a cathedral, built in 1840, a solid Corinthian structure an episcopal palace, a number of hermitages, a monastery and two suppressed convents, one of which is now used as a theatre Agriculture and cattle-rearing are the principal occupations of the inhabitants, but there are also 12 flour-mills, three tanneries, six potteries, a bell-foundry, and a hat manufactory. Pop. 7600

MONDOVI (*Latin Mons Hispani*) a tn. Italy Piedmont, *dir. Cour* dep. prov of same name, 59 m W Genoa. It is walled, flanked with bastions, and defended by a dilapidated citadel, is well built, has a fine square of a hexagonal form, lined with handsome edifices, adorned with arcades. It is the seat of a bishop, the seat of a court of law, and several important public offices, and has a cathedral and four other churches; a splendid episcopal palace, five convents, a royal college, diocesan seminary, a townhouse, superior elementary and infant schools, a theatre, an academy of music, literary society a foundling and several other hospitals manufactory of woollen hats, fanny and wax candles, confectionery, soap, and earthenware, numerous silk and worsted mills, dye-works tanneries, a trade in the above articles of manufacture, and in corn, wine, fruit, and ship timber. Pop. 15,921

MONDRAGON, a walled tn. Spain, Biscay, prov Guipuzcoa, 34 m S.E. Tolosa, on the Deva; with regular and straight streets, a townhouse, church and porchouse. In the neighbourhood are quarries of limestone and freestone, and mines of excellent iron. Pop. 2114.

MONDRAGON, a tn. Naples, prov Terra di Lavoro, dist. and 17 m S.E. Caserta with quarries of marble, and mines of sulphur. Pop. 2109

MONDREI, a tn. Upper Austria, N bank lake of same name, 15 m E.E. Salzburg, with an old church, and some palaces, hospital, gymnasium, manufacture of eyeglasses and iron pans and several mills. Pop. 1170.—The lake, about 6 m long, by less than 2 m. broad, is about 1400 ft. above sea-level and surrounded by mountains.

MONTEAH, a tn. Hindoostan, presid. Bengal prov and dist. Bahar, at the junction of the Sone and Ganges, 21 m W Patna lat. 25° 59' N. lon 84° 02' E; remarkable for a beautiful manufactory of freestone, one of the most elegant specimens of Mogul architecture to be met with.

MONTEGIA, a vil and com. Italy Piedmont, *dir. Genoa*, prov and 10 m E.S.E. Chiavari on the E shore of the Gulf of Genoa. It is flanked on the E and W by two old dilapidated forts, has two churches, a trade in wine and oil, and a productive fishery harbor very indifferent. Pop. 2300

MONPIN (*Latin Monces*), a tn. France dep. Basses-Pyrénées, 11 m W Pau, with a considerable trade in wine, and near it is a salt spring, and mines of copper iron, and lead. Pop. 1275

MONTEVASSIA, or **MONTEVASSIA** a maritime tn. Greece, E coast Morea, 13 m N Cape Matro, lat. 36° 41' N. lon 28° 2' E. It is built on an inlet about 4 m in length and less than 2 m in breadth, connected with the mainland by a bridge, 200 yds. long, the houses, many of which are of Venetian construction, are piled upon one another and intersected by narrow intricate streets. It has little trade, and no harbour. Pop. about 2000

MONTEGIGLIO a vil and com. Italy Piedmont, *dir. Cour*, prov and 17 m E.N. Mondovì r. bank W Bormida, here crossed by a stone bridge. It has a handsome church a Gothic castle, several silk mills and a trade in wine. P. 1400

beautifully situated on r bank Ganges 80 m E. Patna lat. 25 23 N lon. 86° 30' E. It is of considerable antiquity and was at one time a place of some celebrity as a military station, having been fortified by a high brick wall and round towers at the angles with a deep ditch in front. It is now little more than a mere assemblage of mud huts.

low brushlands. Wide trunks are fat, and covered with small, scaly bark; stems are hard, and widely separated from one another as in some deciduous trees. The general elevations of the low hills constitute of wood and water. The general elevation of this region is 4380 ft. above the sea. *Mangonia* is intercalated at various points by elms of lofty granite mountains, the summits of which are in many parts clothed with a variety of trees. The principal ranges are the Altai, and the various ranges of the Pamirs, extending E., under various names, and reaching as far as the banks of the Amur, where they are called the Altan-shan or Altan-choro, and the Altan-namur, particularly in the N. W. corner near the Bolegus, Orkhon, and Tola, which unite in the N. E. corner near the Selenge. Orkhon, and Tola, which unite their streams, and flow into Lake Baikal and the Kerlen and Onon, tributaries of the Amoor. In the S. are the Sira Mountains, and its branches, with several others in the region of Koko-nor. The chief lakes S. from the desert, are Kokonor or the Amur Sea, and the Olving and Dzsungar near the sources of the Yellow River. In the N. W. are the Upper, or Altan-Alak-say, and the Central, or the lower town of Gobi. All the plains of *Mangonia* are irregularly strewed with gravel, and broken up by ridges of sand, and in places the soil is composed of loose stones partly under ground, to avoid the inclemency of the seasons, the hills to the N. being too low to screen the country from the polar blasts. In summer again, the heat is so many parts so great that not even a blade of grass can grow. The space on the N. of Gobi, to the confines of Russia, about 160 m. wide, warmer than the desert, and supports a greater population than the S. side. The thermometer in winter falls to 80° and 40° below zero, and sometimes the greatest degree of cold is felt. Many large ponds, like Mondok, with E. and W. winds of the globe are usually fertile, and might be turned to good account by the natives, but for their preference of nomadism to an agricultural life, choosing rather to wander about with their herds and flocks, than to cultivate the soil.

Fir, fir, birch, ash elm, and white poplar grow on the mountains, and in the same region are found red currants, wild peaches and various shrubs. A little millet, wheat, and barley are grown, but the chief dependence of the people is on their cattle, and on the corn which they receive from China, in exchange for their sheep and other animals. The consequence is, that they are often reduced to great distress in winter bordering, frequently, on absolute want; their flocks, likewise, are suffering from extreme cold or disease. The principal animals of Mongolia are horses, bears, wild geese, foxes, marten, squirrels, wolves, larks, foxes, and shag. In the mountains there are also wild hares and goats. The birds comprise cranes, wild geese, ducks, moorfoots, quails, and swans. The rivers abound with fish.

THE POET OF MONSIEUR.—From *Woods' Unusual Poet*.

with exception of a few handsome houses and bungalows, belonging to Europeans, mostly situated within the enclosure of an extensive old fort and palace, now falling in ruins.

MONGIBELLO, the Sicilian name of ETNA.
MONGOLIA a vast region of N.E. Asia formerly

occupies a vast region of N. E. Asia forming, actually, a portion of the Chinese empire, and occupying the space between China proper and Asiatic Russia. Its precise limits, according to Chinese statistics, are lat 35 and 53° N., and lon. 63° and 133 E. bounded N by the Russian prov. Yakutsk and Irkutsk N. E. and E. by Manchouria, by provs. Chahle and Shansee, and the Yellow River, S. W. by Kamsa and W. by Codo and Il; length, E. by about 1700 m., greatest breadth, 1000 m., area, 1,400,000 sq. m. The central portion of this extensive tract is occupied by the great sandy desert of Gobi, having an area of 300,000 sq. m., interrupted only by a few spots of pasture

The Sunset occupy the country intermediate between that of the Kalkas and Thakher. They all claim descent from the celebrated Genghis Khan, who in the beginning of the 13th century united the different races under his sway and in the course of his devastating conquests, both westward and southward, made the Mongols of whom little had been previously heard, to occupy an important page in the world's history. The conquests of Genghis Khan were extended by his son Oghis, who subdued the whole of China, and overthrew the caliphate of Bagdad, while other hordes, under the khans Manku and Batu forced their way into Russia, devastated large portions of it, pillaged Moscow, entered Poland in 1240 and were threatening all Germany with destruction, when in 1241 their progress was arrested by their signal defeat at Walsbatt. After the death of Oghis in 1243, all further attempts on Europe ceased but nearly half a century longer the empire which he had established continued to flourish, and stretch from the Chinese Sea W to the frontiers of Poland, and from Hindostan N to the frontiers of Siberia. At a later period, under Timur or Tamerlane, the Mongol empire, which had been gradually crumbling to pieces, acquired new lustre. But the revival proved temporary, and at his death a complete disruption took place. The fragments, however, were so large as to be some instances to be sufficient to found new dynasties. One of the most important of them was that of the Sultan Baber who in 1519, founded the empire of the Great Mogul in Hindostan, and kept at Delhi a court of almost unrivalled splendour of which some faint traces are still exhibited by his descendants. The supreme administration of Mongolia is vested in the board or tribunal of foreign affairs at Peking.

MONGRANDO, a tn, Italy, Piedmont, 30 m N N E. Turns on the Elvo, with three churches, manufactures of hardware and a trade in wine and rice. Pop 5724.

MONHEIM, — a tn to Bavaria, circle Swabia, 86 m S S E Augsburg, with church, a chapel, manufactures of needles, a brewery, tin-works and a trade in cattle. Pop 1417. — a tn. Rheinhell Prussia, Prov and 10 m. S S E. Düsseldorf, on the Rhine, with a church, a castle, and manufactures of woollens, linens, and earthenware. Pop 1210.

MONIFIETH a vil and par Scotland, co Forfar, the former 6 m. E by R Dundee, on an eminence not far from the sea has an established and a Free church, two manufactures of machine, a flour-mill, and one for spinning flax. 1 sp. 803. Area of par 6044 ac. Pop 4267.

MONMOUTH or **MONMOUTHERING**, a maritime co. Eng. land bounded N by co. Hereford and Brecknock, W the latter and Glamorgan S and S.E. the estuary of the Severn and E. Gloucester, area, 818 720 ac. of which about 270 000 ac. are arable, meadow and pasture. Surface much diversified a considerable portion being mountainous and rocky the remainder consisting of fertile valleys and gentle slopes adorned with woods and pastures, and highly cultivated fields. The geological formations are the old red sandstone E of the Uak and the coal measures of the S. Wales coalfield, W of the Lsk, skirted by a narrow band of carboniferous limestone. The most important mineral productions are iron, coal, limestone, and various other kinds of stone valuable for building and other purposes, lead-ore is met with—and there are some quarries of brooks celebrated for making steel millstones.

The soil is generally good. Wheat, barley, and oats are the chief corn-crops, and small orchards are numerous. Flax is manufactured to some extent, as are also a few coarse cloths woollen stockings, and coarse caps. Monmouth returns two members to Parliament. Chief towns Monmouth (cap.) Aberavenny, Caerleon, Chepstow, Pontypool. P (1851) 157 418.

MONMOUTH a par. and town, border and market tn. England, cap above on a beautiful valley at the confluence of the Monnow and Wye the former here crossed by an ancient and the latter by a handsome modern stone bridge, and on the railway to Hereford, 21 m. W S.W. Gloucester. It consists of a spacious street, leading through an ancient arched gate at the Monnow bridge to the market-place, and of several other streets diverging in different directions, and has a parish church with an elegant spire 210 ft. high a district church, independent Primitive Wesleyan Baptist, and R. Catholic chapel, a free grammar, national, and infant schools a handsome range of almshouses, workhouse, and ten place iron works, paper and wool mills, a considerable trade favoured by the navigable Wye and a handsome new market-house. The castle of which some portions still remain, was the favourite residence of John of Gaunt, Duke of Lancaster and the birthplace of Henry V and was thrice taken during the last civil war. Monmouth sends a member to Parliament. Pop 5710.

MONNBRIGHT or **MONNBRIGHT**, a vil. Dutch Luxembourg, 8 m. S.W. Luxembourg; with a church and school. Pop. (ecclesiastical) 1300.

MONNICKELANDAM or **MONNICKELANDAM** (Latin, *Monnickendam*), a tn. Holland, prov. Holland, 9 m. N. E. Amsterdam, on the Zander Zee. It is surrounded by an arched wall planted with trees, affording a pleasant promenade; and has a townhouse, weighhouse, exchange, three churches; an orphan hospital, two public schools a soap-work, a ropery, two boat-building yards, and a corn and a saw mill but fishing and trading in staves are the chief occupations. Pop 2208.

MONNINGTON par Eng. Hereford, 1012 ac. P 87.

MONOK a tn Hungary, Elster Thuria, co Szeged, 90 m. S.E. Pesth with two churches. Pop 2663.

MONOMOZZI (perhaps more correctly, *Montomozzi*) generally written by the Portuguese of the 16th and 17th centuries, *Monomozzi*, or *Monmoez*, a great empire of E. Africa,

on the W side of the great lake called Nyasa or the son. The same name was given, by early writers, to the sovereign and to the country, though they state that it belongs properly to the former. At the present day Monomotani is no longer united under a single ruler but is divided into several kingdoms, respecting the relative importance of which we have no information. In the 16th century when the empire flourished it was said to extend S. to the Maroon (the union of Malde opposite to Monomotani) or the 12th parallel; others placed its S. limit at Mongala, lat. 10° S. In the N it was said to reach Garanga, in Abyssinia, or according to the maps of that day, the fourth parallel of S lat., on the W it had the lake and on the E. it was supposed to approach the coast in the direction of Kilwa. According to our recent information, the most S. kingdom of Monomotani is in lat. 9° where the lake is distant about 450 m. from Kilwa. The most N countries, Masaria and Pigea, are probably under the fourth parallel, and 600 or 700 m. from the sea. As to the E. frontier of Monomotani, we only know that, on the great caravan route from the coast, in lat. 6° 30', to Oha, in lat. 7° 30' it is reached in 46 days, the distance thence to the lake being 24 days more. But it is not improbable that, when the empire subsided in its vigour it occupied some stations down the Lufiji, to protect the caravans, and to exercise an influence on the coast.

Of the numerous countries included under the general title of Monomotani, six are said to constitute independent kingdoms, namely, Uruwa (the Eruanga of early writers) on a S. branch of the Lufiji, lat. 8° to 9° S. Uruwa, Ugiy, Oha or Lha, Uru and Canga. These kingdoms succeed, as here enumerated, from S. to N., the capitals being all apparently at the W side of the country next to the lake. The king of Oha is sometimes represented as the paramount sovereign of Monomotani but the truth seems to be, that his sway extends over the country ordinarily visited by the caravans from Kilwa.

The caravan for Monomotani assembles at Burumaji on the coast, opposite to Zanzibar in lat. 6° 32' S. The route goes a point S of W and in 10 days, reaches the Riva, the mouth of which is a few miles N of Burumaji. On the 15th day the same river in which the hippopotamus and crocodile are very numerous, is crossed a second time. So far the road lies through the country of the Zereba. Beyond the Riva, it goes over the Ngura Hills, and the country of the Ndeta. In about 30 days, the caravan arrives at Marora (Trade) in the country of the Waaqira. To this point all the roads from the coast converge, and the caravan from Burumaji is swelled by arrivals from the N. bank of the Riva, and from Kilwa, in the S.E. In the neighbourhood of Marora are several rivers, the Lufiji being the chief, which inundate the plains to a great extent during the rains. Beyond Marora, the caravan crosses the Kidji, soon enters the valley of the river a branch of the Lufiji, called Siwaha—a name probably derived from Wa, the people of Oha—and continues ascending it for twelve days, when the river disappears on the left and the road, passing through the country of the Etumba, leads in 14 days, to Unagwira, the frontier town of Oha, in Monomotani, and 20 days from the capital. The river Siwaha is again met with at Unagwira, six days from Oha. The mountains of the Wahala, S. of this river and E. of Monomotani are said to abound in salt and iron. The caravans reach Oha in 70 or 75 days. The lake is four days distant to the W, but there seems to be little or no traffic on it in this quarter and few of the Arab merchants who visit Oha ever set it.

The people of Monomotani are, collectively, Mwanazaga. This name, given to the race and language both in Monomotani and Monomotapa, signifies, native of Uruwa, and points out that country as the cradle of the widely-spread nation. It is remarkable that, in Monomotapa, while the empire existed in all its state the chief officers of the king's guards were entitled Mwanagwa, evidently in allusion to the N. and original home of the race. The natives of Monomotani are tall and well made, black but not with exaggerated negro features. They wear such a load of ornaments, rings, beads, &c., appended to their ears, that they are obliged to support them by means of a band over the head. They twist brass wire round the neck, and over the cheek and shoulders, so as to resemble a coat of mail. Their dress consists of a waist-

cloth and a scarf of cotton they weave and dye narrow cotton cloth themselves, but the richer classes prefer the manufactures of India. The superior civilization of the Monomotani is shown chiefly in the employment of beasts of burden; for the sea, here a fine animal carries all their necessaries to and from the coast. The journey between Oha and the coast takes about four months and a half and six weeks or two months are spent on the sea-side, so that the expedition down and back again occupies 11 months. The number descending annually is from 8000 to 10,000, of whom the great majority coast up the coast opposite to Zanzibar, round the mouth of the Riva a few go to Kilwa, and some northwards. The cyclone prevails in Zanzibar, but the kingdoms of Monomotani are now recovering their former prosperity and power.

MONOMOTAPA an empire E. Africa, of great relative magnitude and power at the time of its discovery, in the beginning of the 16th century, when, owing to the ignorance and exalted temper of the age, it was described in very exaggerated terms. It was said to have a circumference of 1000 leagues and, even at the present day, the estimated length of the river Zambezi, which gives the breadth of the empire, is double of the truth. The name Monomotapa, or more correctly, Moete Moete signifies the Empire or Kingdom of Moete; literally perhaps, Moete itself or himself. Of Moete we know little more say it was the capital of the kingdom, and otherwise called Moeteagan, others make it the metropolitan province. The empire appears to have been co-extensive with the diffusion of the Mwanazaga race, S. of the Zambezi, it reached, therefore, from this river S. to Inhambane, W. to Malawi, but did not go beyond the basin of the Zambezi. On the E. it extended to the sea in Sofala, but did not embrace the mouth of the Zambezi; its N. boundary on the sea-shore, being the river Tendaolo. The emperor of Monomotapa appears to have been the same person as the Quave or king of Sofala; but on this point the Portuguese writers are not clear. The capital of the Quave, called Zumbulo or the court, was said to be 10 days inland on the river of Sofala, and six days further in was the capital of Monomotapa. The missionary Gonzalez Sylveira, travelled to the latter by a circuitous route through Teff, which he estimated at 600 m. He baptized the king, queen, and 300 of the nobles, but soon after (1568) incurred the suspicion of being an executioner, and was put to death. About 10 years later Barreto led an expedition from Sofala, where the Portuguese had established themselves in 1505, for the express purpose of conquering the gold and silver mines. He advanced from Sofala, in a direction parallel to the Zambezi, on the S. side. In the mountains he met with an obstinate resistance from the Mungudi, and had great difficulty in reaching Teff. He concluded his pretended conquest by agreeing to pay the sovereign of Monomotapa an annual tribute, as it is ingeniously called by Don Santos and the Jesuit Thomas which consisted, in the time of the former (1600), of 200 pieces of cloth. In Thomaz's time (1704) it had dwindled into some cheap and shabby articles of European manufacture annually accorded to the native capital by a small band of soldiers, who remained as the emperor's body-guard till relieved the following year. In 1567, the emperor of Monomotapa, being distressed by revolts and civil dissensions, consented to cede to the Portuguese his mines and half of his domains, provided that they would secure to him the possession of the other half. Such is the account given of their title to Monomotapa by the Portuguese, whose dominion in these countries has never been much more than nominal. In the middle of the last century, the empire was dismembered, and its provinces became independent. The chief kingdoms which have sprung out of the ruins of the empire are those of the Quave (Sofala) the Mwanze (Quamaga), S.W. of the former, the Sedada (Madenda) further S. on the river Save, and the Changamira, whose seat seems to be in the interior, towards Malawi. The title of Moete Moete is not yet forgotten in the country, and we believe it is assumed by the Changamira. On the death of the Quave, in 1603, no male successor to him was elected, and the sovereign power was assumed by the queen, in whose hands it still remained in 1835 when our information terminates. Among the antiquaries of Monomotapa are usually mentioned the stone buildings on Mount Kilwa, near the gold-mine. The true form of the name has been preserved to us by Do Couto; while

De Barros informs us that these walls were of rough stone, without mortar. Subsequent writers, however, describe the buildings as of timber, stone, and mortar; they add, also, inscriptions in an unknown language, and, changing the name into Afar, conclude that this country was Ophir, and the buildings in question the towers raised by Solomon. However, it is not necessary to look so far back for the origin of these walls. The Arabs of Yamen and Hadramaut, who frequented Socatra as an early age, were excellent masons, and the natives themselves, in many districts, build rough stone walls without mortar as fences for their villages and cattle grounds. The word *Id-Idan* means in fact, walls of this destruction.—(De Barros Decades) *João do Santos*, *Asiatica Oriental*, 1809.)

MONONGA BA, a m. Madagascar cap. of the Vromine tribe, dist. Iboia, about lat. 23° S. lon. 48° E. It consists of about 500 houses, situated on an affluent of the Mesang-ha, and both well built and fortified.

MONONGABELLA, a river, U States, rising at the foot of the Laurel Mountains, Virginia, and, after a N course of 800 m. uniting with the Adgahany at Pittsburg, in Pennsylvania, to form the Ohio. It is navigable for large boats 60 m., and for small boats 200 m. from its mouth. Its principal tributaries are the Cheat and Youghiogony.

MONOPOLI a m. and seaport, Naples, prov. and 27 m. E S.E. Bari on the Adriatic. It ranks as a fortress of the third class being seated on an eminence, walled, and defended by a castle. It has two suburbs, consisting of well-built houses but the town itself is indifferently built, the houses being too lofty for the width of the streets, render them dark and gloomy. It has a cathedral and numerous other churches, two harbours, with great depth of water but imperfectly sheltered and a trade in woolen and cotton cloth (both externally manufactured in the town) wine, and olives. Pop. 18,000.

MONOR, a m. to Hungary. Hither Danube, co. and 30 m. S.E. Pesth with two churches. P. chiefly Protestant, 5,408.

MONOSTOR, several places Hungary particularly—
1 A vil., Hither Danube on Baranya, 27 m. S.E. Fünf kirchen with a church, and some trade in corn wine and cattle. Pop. 1245—2 A vil. Hither Theiss co. Temesvar with a Greek church. Pop. 1720—3 A vil., Hither Danube, co. Pesth, on an isle of the Danube with two churches. Pop. 900—4, (Apud) A vil., Hither Danube, co. Bekad. with a church, the ruins of an old monastery and four mills. Pop. 818—5 (Bach) A vil., Hither Danube co. Bacs, 1 bank Danube with a church the ruins of an old abbey and some trade in wine and cattle. Pop. 1179.

MONOSTORSZEG, a m. Hungary. Hither Danube, co. Bacs 1 bank Danube, with which a navigable canal here communicates 41 m. S.E. Fünfkirchen. It has some trade in corn wine, flax, wood, and cattle. Pop. 4249.

MONOFAR, a m. Spain, Valencia, prov. and 22 m. E.E. Albufera on the Ynclapo, defended by a castle and a fortified hermitage, which are perched on two eminences. It has some level and other steep streets, all kept very clean. Five squares, the largest of which is used as a market-place and a bull-ring, a townhouse, hospital, reading-room, small library, pretty theatre, convent, various educational establishments, a church, three hermitages, and a cemetery some wool-carding, distilleries of brandy and liquors, manufactures of soft soap, tallow, flour and oil mills, weaving of juncos, serge, muslin, blankets, and other woollen stuffs some of which articles are exported; but the chief occupation is agriculture. Pop. 7290.

MONQUETTES, par. Scot. Aberdeen, 20,000 ac. Pop. 3295.

MONREAL DEL CAMERO, a m. Spain, Aragon prov. and 34 m. N.W. Teruel, 1 bank Jiloca, with a church, a townhouse, primary school, and fine fountain; manufactures of woolen and linen cloth, and several flour-mills. P. 1516.

MONREAL, or **MONREALA**, a m. Sicily prov. and 3 m. S.W. Palermo, on a height commanding a magnificent view. It was founded in the beginning of the 15th century by the Norman prince William II. crowned the Good, who also founded its magnificent cathedral and the Benedictine convent, which possesses an excellent library. Monreal is the see of a bishop, and has a college. Outside the town, picturesquely situated among steep rocks is a royal summer residence, called *Reana*. Pop. 17,988.

Vol. II.

MONROE, a m., U States, Michigan, 37 m. S.E.W. Detroit, 1 bank Raisin, 24 m. above its mouth, in Lake Erie with a courthouse, jail, and seven churches. Flour, saw, and paper mills, a foundry, tannery, woolen factory, and two printing-offices. Pop. 1703.

MONROIG, a vil. Spain, Catalonia, prov. and 17 m. S.W. W. Barcelona, near the sea coast. It has an hospital, elementary school, and a parish church. Here it are quarries of limestone and gypsum and mines of antimony. P. 3668.

MONROVIA a seaport m., W Africa, cap. of Liberia, on the peninsula of Monrovia lat. 6° 18' N. lon. 10° 50' W. 1. bank of the Monrovia river. It is a thriving place, consisting of large commodious houses, has several churches and schools, is the residence of a British consul, and, being the chief port of the colony, carries on a considerable trade. Pop. above 1000.

MONROYO a m. Spain, Aragon, prov. Teruel 50 m. S.E. Saragossa with a church, primary school, manufactures of woolen cloth, hempen shoes and a trade in oil and wax. Pop. 1896.

MONS [unc. *Montes Hannous*] a fortified to Belgium, cap. prov. Hainaut, 27 m. S.E.E. Tournay on the railway from Brussels to Valenciennes, and intersected by the Trouille here crossed by three bridges. It has five gates, and is commanded by a castle, Chateau-Lies, built on the site of an ancient Roman camp. Two lanes interrupt the approach from the E., and from the facilities afforded for laying the whole circumjacent country under water by admitting the river, access to the fortress is rendered difficult. The town is clean, regular and has a flourishing appearance. Its principal streets are wide and straight, though occasionally somewhat steep and some of its eight squares are spacious, and lined with handsome houses and public buildings. It has five churches, those of St. Waudr and St. Elizabeth being beautiful structures. (Gothic townhall, civil and military hospitals, court house, arsenal, and theatre, a school of art, academy of music, mineralogical, architectural and horticultural societies; medical seminary, orphan asylum, a deaf and dumb institution, two lunatic asylums, a college and numerous public and private schools. Its manufactures consist of linen, woolen and cotton fabrics, muslin lace, fireworks, cutlery, unusual instruments, clay-pipes, soap, oil, candles, chimney, bricks, earthenware, vinegar, tobacco and sugar, it has also copper lead, and pewter foundries, several breweries and bleach fields, an saline trade in timber coal, extensively mined in the vicinity, building-stone, marble, horses estate and corn, the transfer of which is facilitated by a canal, connecting with the Scheldt. In 1625 Jean IV. Duke of Brabant aided by Philip the Good, Duke of Burgundy, besieged and took the town. It afterwards sustained several sieges, and was ultimately in the hands of the Austrians, Spaniards, and French till 1794, it fell to the latter, and was retained by them till 1814 when it was ultimately incorporated with Belgium. Pop. 20,617.

MONSANTO, a m. and par. Portugal, prov. Baixa Baza, com. and 41 m. S.E. Guarda, on a lofty and rugged steep. It is walled, and defended by a castle. Pop. 1230.

MONBARAZ, a m. Portugal, prov. Alentejo, com. Zizas, on a rock near 1 bank Guadiana, 27 m. S.F. Evora. It is walled, and defended by a strong castle. Pop. 1250.

MONBEA par. Ire. Tipperary, 5035 ac. Pop. 1164.

MONBELICK, a m. Italy, Venetia, gov. Venice, prov. and 13 m. S. by W Padua, on a lofty rocky eminence. It is walled, has four churches, an old castle, manufactures of hats, several silk-mills, and a considerable trade, facilitated by the canal on which the town stands. On the slope of Mount Colino, near the town, is a picturesquely-situated monastery where a temple of Jupiter is said to have stood; and in the neighbourhood a great many vipers are caught, from which the well-known Theriac or Troscio de Venice is made. P. 5400.

MONSERRAT, or **MONTSERRAT**, a mountain, Spain, Catalonia, prov. and 19 m. N.W. Barcelona, near 1 bank Llobregat. It is 3390 ft. in height, and consists of a great number of lofty, isolated peaks, between which the ascent is made with great difficulty. About midway up the E. side stands the famous monastery of the same name, in which Charles V. spent his last days. It possesses an image of the Virgin whose alleged marvellous powers were used to attract vast numbers of pilgrims and, perched on the surrounding rocks, are numbers of hermitages, several of which have been

emplified by the most distinguished saints of the Baschic calendar. As the mountain stands in the line of the royal road from Marone, across the Lohengau, advantage was taken of its strong natural position in the war of independence, and several fortifications were erected upon it.

MONSIEUR a vil Wittenberg, circle Rastatt bail and near Leuzberg, on the Kraenbach with a parish church. Pop. 1011.

MONSTER, a vil. Holland, prov. S. Holland 15 m. W. N. Rotterdam, near the dense close upon the N. Sea. It has a good communal house, two churches, and a school. Inhabitants engaged in agriculture, gardening, and shell-fish gathering. Pop. 1540.

MONT DE MARAZZ, (Latin, *Monte Marazzi*) a tn France, cap. dep. Landes, at the junction of the Douze and Miden, which here form the navigable Midouze, and are spanned by handsome bridges, 63 m. S. Bordeaux. The streets are, in general, clean and regular, and adorned with numerous public fountains, and, though once one of the smallest and least populous of the departmental capitals, has made considerable progress within recent years. It has a church, prefecture, courthouse, prison, hospital and barracks, a court of first resort, a society of agriculture, commerce, and arts, and a communal college. The principal trade consists in forwarding the wines and brandies of Armagnac to Bayonne. It has manufactures of common woollens, blankets, amieloth and leather. Pop. (1858) 4453.

MONT BLANC, the loftiest mountain of Europe, belonging to the Pennine chain of the Alps, and rising 15,723 ft. above the sea-level, is situated in the Savoyan States, on the frontiers of France, Savoy and Austria, lat. 45° 50' N. lon. 6° 52' E. In this latitude the snow lies 8000 ft. and, consequently 7700 ft. of the mountain are within the region of perpetual snow and ice. Its shape when seen on the N. or S., is pyramidal. On the S.E. it presents an immense wall of ice, on which, of course, no glaciers can be formed. These, of which 15 in all are counted, are chiefly on the N.W. slope where the glaciers Des Borecs, Bon, Talifra, and Mer de Glace, are seen. The mass of the mountain consists almost entirely of granite. Its summit was first reached by Balmat in 1755, but the ascent has since been made so often and with so few accidents, that it is perhaps less hazardous than has been commonly supposed, though much is unquestionably due to the precautions used by Government to ascertain the authenticity of the guides, and regulate the mode of ascent.

MONT CATHIN a mountain, Switzerland. See CATHIN.

MONT St. AUGUSTIN a vil. and com. Belgium, prov. Hainaut, 23 m. W. N. W. Mons. Pop. (agricultural) 1486.

MONT St. JEAN a vil Belgium, prov. Brabant, 11 m. S.E.E. Brussels. It was the centre of the British position at Waterloo, and is the name by which the French usually designate that battle.

MONT St. MICHEL, a vil France, dep. Manche, in the Gulf of Brittany 7 m. S.W. Avranches. It consists chiefly of an isolated rock, above 5 m. in circumference, and 400 ft. high, situated about 3 m. from the coast, among sandy flats, which are regularly covered by the tide, and was at one time strongly fortified, and is now used as a central state prison. It contains a church, and the extensive remains of an ancient abbey. Pop. 1063.

MONT SARRAZIN a vil and com. France, dep. Haute Savoie, div. Annecy and 7 m. S.E. Bonneville, on an elevated plateau of Mont-Sarrazin with an ancient church, and a trade in corn. Pop. 1308.

MONT St. MARC, a vil. and com. Belgium, prov. Hainaut, on the L'Esu d'Heure, 21 m. E. Mons. It has manufactures of iron and nails a brewery, tinsmith, and quarries. Coal is worked in the vicinity. Pop. 1874.

Mondovì, with an ancient church, a courthouse, mines of iron, and a trade in corn and fruit, particularly chestnuts. Pop. 1961.—2 (d'Asti) a vil. and com. div. Alessandria, prov. Alessandria with a church, quarries of alabaster, and gypsum, and a trade in wine. Pop. 1020.—3 (di Roero) a vil. and com., div. Cune, prov. and about 6 m. from Alba, with a church, a round tower, forming the only remains of an ancient castle, and a trade chiefly in wine. Pop. 1425.—4, (d'Alghero), a vil. and com., prov. Asti. It was once fort-

sed, but now only consists of a single street, with an ancient tower and a church. Pop. 1065.

MONTALEGRE, a tn and par. Portugal, prov. Trás-os-Montes, 32 m. W.S.W. Chaves. It stands high, and has an old castle, and a trade in wheat, corn and oil. Pop. 508.

MONTALBARE, or *Orta*, a tn. Brasilien, Guiana, prov. and 150 m. E.N.E. Para, on a height to an island of the Amazon, near the mouth of the Gurapira, with a church, a saw-mill, and some trade in sandalwood, cotton, coffee, and cloves. Pop. dist., 4000.

MONTALENGO a vil and com. Italy Piedmont div. Turin prov. and about 8 m. S.W. Ivrea, on the canal of Caluso; with a handsome modern church, a castle, finely seated on a height, an elementary school, manufactures of straw bonnets, and a trade in wine and fruit especially chestnuts. P. 1340.

MONTALTO several places. *Italy*—1. A vil and com., div. and 80 m. E.N.E. Alessandria, with a handsome church an old castle, and a trade in wine. P. 1932. —2. A vil and com. div. Nice (France) about 12 m. from St. Remus, with two parish churches an hospital and a trade in wine, fruit, and olive oil. Pop. 1000. —3. A vil and com. div. Turin, prov. and 2 m. N. Ivrea, on the Dora, and in the vicinity of three lakes. It has a church, tanneries, and quarries of building-stone. Pop. 1820.

MONTALTO, a tn. Italy. The Marches, dioc. and 8 m. N.N.E. Ascoli, near r. bank Aso. It is a bishop's see. Pop. 3125. V. was born here. Pop. 1500.

MONTALTO (Latin, *Adalis*), a tn. Naples, prov. Calabria-Citra, dioc. and 8 m. N.W. Cosenza. Pop. 3430.

MONTALVAREJO a tn. Spain, New Castile prov. and about 84 m. from Cuenca, indifferently built, with a church, a hermitage, a primary school and hospital, manufactures of woollen and linen cloth, and a trade in corn. Pop. 1189.

MONTALVO, a tn. and par. Portugal, prov. Beira-Beira, 16 m. S. Castelo-Branco, near the Severo an affluent of the Tagus. It is fortified, and has an annual fair. Pop. 1942.

MONTALVO, a tn. Spain, New Castile, prov. and about 30 m. from Cuenca, poorly built, with a church primary school, dilapidated townhouse the ruins of a Moorish castle, manufactures of salt-petre, with which the soil of the surrounding district is strongly impregnated and a trade in salt-petre and corn. Pop. 1811.

MONTANABO, a tn. Italy Piedmont, div. and 14 m. N.N.E. Turin near the Orco, tolerably well built with a court of justice, two squares a church an old castle, two Latin and two communal schools, and a trade in cattle and excellent tobacco. Pop. 4400.

MONTANCHEA, a tn. Spain, prov. and 20 m. S.E. Caceres with steep but paved and clean streets; a townhouse, prison two professorships of Latin and three elementary schools, a church and several hermitages, a tannery and several fountains; 50 flour and four oil mills. Many of the inhabitants are engaged in different kinds of traffic, exporting chiefly their rich laces and hangings, which are much esteemed as well as their wines, which formerly constituted one of the principal sources of wealth. Pop. 5087.

MONTARGIL, a vil. and par. Portugal, prov. Alentejo, 42 m. S.W. Portalegre. Pop. 1311.

MONTARGIS (Latin, *Mundusberg*), a tn. France, dep. Loiret, on the Loire, at the junction of the Loire and Briare canals, 29 m. N.E.E. Orleans. It stands near an extensive forest of the same name, and is tolerably well built, has manufactures of cotton cloth, leather, and paper, and a trade in corn, saffron, wax, honey, leather, wool, and cattle. P. 7272.

MONTATAIRE (Latin, *Mons Taurinus*), a tn. France, dep. Oise, 7 m. from Senlis; with a church, an old castle, forges, foundries, a paper, a saw and a rolling mill. P. 2226.

MONTAUBAN (Latin, *Albiense Mons*, or *Mons Aureolus*), a tn. France, dep. Tarn at Garonne, 342 m. S. by W. Paris, lat. 44° 05' N; lon. 8° 19' 45' W (C). It stands on a plateau, surrounded by the Tarn, the Tescou, and a deep ravine. The town proper which is surrounded by walls, and entered by several handsome gates, is not of great extent, but has extensive suburbs, which stand on the opposite bank of the Tarn, and communicate with the town by a bridge of black, composed of seven large arches. At the extremity of the bridge, near the suburbs, is a gate, in the form of a triumphal arch, and, at the other extremity, is the Hotel de Ville, a handsome square structure, with four turrets at its

angles. The town is well built, and has clean wide streets, and three fine squares. Among the public buildings are a handsome cathedral, in the form of a Greek cross, and of Italian architecture; a prefecture, public library, bishops' palace, and theatre. It has considerable manufactures of cotton woollens, known by the name of Montauban serge, corded, silk, hosiery, soap, cottons, drapery, brandy, and starch, also breweries, tanneries, worsted and filling mills and a trade in corn, for which Montauban is an entrepot to several towns of the S., flour, leather woollens, oil, goose-feathers, groceries, drugs, &c. Montauban is the see of a bishop has courts of first resort, and commerce, a consulting chamber of manufactures, a society of agriculture, velence, and bellows for a communal college, a diocesan seminary a secondary ecclesiastical school, and a Protestant theological faculty. It was one of the first towns which embraced the Reformation, and has, in consequence, been often subjected to the most cruel persecutions. Pop. (1859) 16,509.

MONTAUD, a tn. France, dep. Loire l. bank Farnet about 1 m. N. St. Etienne. Pop. 2863.

MONTAUK POINT, a lofty promontory, U. States, state and 115 m. E. New York, the most E. extremity of Long Island. On it is a lighthouse, 180 ft. lat. 41° 4' 12" N. lon. 71° 52' W (A).

MONTAZZOLI, a tn. Naples, prov. Abruzzo-Citra dioc. and S.W. Di-Vasto. Pop. 1927.

MONTAUD (Latin, *Mons Berrus*), a tn. France dep. Côte-d'Or on the Brenne, and the canal of Burgogne, 40 m. N.W. Dijon with an ancient church an old chateau is which the celebrated naturalist, Buffon, was born, manufactures of woollen cloth, drapery, laces, twist, and leather and a trade in hemp, wood, wool thread, &c. Pop. 3076.

MONTBELLARD (Latin, *Mons Albigerius*) a walled tn. France dep. Doubs 40 m. N.E. Besancon. It is generally well and regularly built has a court of first resort, a communal college and a public library of 10,000 volumes, a chateau, placed on a commanding height, now used partly as a lock-up house, and partly as a record office. Hotel de Ville, public markets, several churches, an hospital, account college, &c. manufactures of clocks and watches, about 4000 of the latter being annually finished; hosiery, various tanneries, agricultural implements, fish, sythes, Paris paint, a cotton-mill and numerous tanneries. Montbéliard is the centre of an important trade with Switzerland and has also a good deal of general trade in corn, groceries, cheese, linens, leather, &c. and oak deals, timber for carpentry and ship-building &c. The naturalist, G. Cuvier was born here. Pop. 5294.

MONTBLANCH a tn. Spain, Catalonia, prov. and 19 m. N.W. Tarragona, with a townhouse, five elementary schools several churches a prison, an hospital for the sick poor nine flour and seven oil mills several hand-mills, a tannery and some cotton manufactures. Wine, silberia, and other fruits are exported. Pop. 4214.

MONTBRISON (Latin, *Mundusberg*), a tn. France, dep. Loire, 37 m. W.S.W. Lyons; on general ill built houses low and of a mean appearance, streets irregular and narrow. It has however, spacious and finely-planned boulevards, formed on the site of the ancient fortifications, a Gothic cathedral, founded in 1225, a court of first resort, communal college, primary normal school, secondary ecclesiastical college, agricultural and commercial society; but both its manufactures and trade are insignificant. Pop. (1859) 5994.

MONTBROU, a tn. France, dep. Charente, 16 m. E. An goulême, on the Tardouze, with forges, an iron and a paper mill, and, near it, a lead-mine. Pop. 1385.

MONTCEL, a vil. and com. France, dep. Savoie 5 m. from Aix l. bank Serre; with a small church and a trade in potatoes, chestnuts, and cattle. Pop. 1115.

MONTDIDIER (Latin, *Mons Desiderii*), a tn. France, dep. Somme, on the slope of a hill, washed by the Doe, 21 m. S.E. Amiens, houses generally old, and almost all the streets walled and ill paved. It has a townhall, college, court-house, and church of St. Peter, manufactures of hosiery, the staple, employing about 45,000 persons within the arrondissement, serge, percale, stocking-loom, cotton mills, tanneries, and a trade in corn, cattle, coal, &c. Pop. 8774.

MONTDRAGON, or *Montmaison* (Latin, *Mons Dronensis*) a tn. France, dep. Vaucluse, r. bank Les, 20 m. N.W. Avignon. Pop. 1769.

MONTE-ALTO, a *ta* Brazil, prov Bahia, comarca Ubaia, with a church and a trade in corn, millet, and cattle.

MONTE-ARAZO, a *vil* Italy, prov and 8 m. W N W Girona, on an embankment, and long noted as a resort of bandits. Pop. 1000.

MONTE-CAYU, *See* ARAHO.

MONTE-CELSINO *See* CENSI (Mont).

MONTE-CHILAO, a *ta* and com Italy Lombardy, prov and 18 m. S E Brescia, 1 bank Chiese. It is surrounded by ancient walls, and was once defended by a strong castle, of which, however, only a single tower now remains. It has two churches, a new and beautiful hospital, an orphan asylum, and a rich charitable endowment (congregazioni di carità) an extensive transit trade and numerous silk and several other mills. Pop. 5790.

MONTE-CHERCHI a *ta* bay and river, N W coast, *Id* Ellyria, republic of Santo Domingo. The town is situated a few miles N W from the mouth of the river, and was formerly a place of some importance, but is now much reduced, having no other resource but the cattle raised in its territory.—The bay is in lat. 19° 58' N lon 71° 58' W. Opposite, are a group of small, low islands, covered with mangroves and called the Seven Brothers, situated on a shoal called the Boca or Bank of Monte Cherchi, which extends 14 m. to the W.—The river rises on the N E side of Mount Yague near the centre of the island, from which it flows N to near Santiago, about 20 m., when it bends round to the N W, and, after a further course of about 70 m. falls by two mouths into the Bay of Manzanilla.

MONTE-PALOMBO a *ta* Naples, prov Principato-Ultra, dist. and 31 m. N E N Avellino with an annual fair. Pop. 4000.

MONTE-PALOMBO a *ta* Naples, prov Salerno, dist. and 13 m. W N W Larino, with two annual fairs. Pop. 2450.

MONTE-PORTO, a *ta* Naples, prov Principato-Ultra, dist. and 5 m. W N W Avellino with two churches, and a glass-work. Pop. 8600.

MONTE-ROCCO a *ta* Italy deleg. and 6 m. N E E Macerata. Pop. 4021.

MONTE-ROCCO, a *ta* Italy, prov and 80 m. S E Palermo. Pop. 4000.

MONTE-MARANO, a *ta* Naples, prov Principato-Ultra, dist. and 10 m. W S N Angelo de Lombardi. It is the seat of a bishopric, and has an annual fair. P. 1800.

MONTE-MOA KOVO, a *ta* Portugal, prov Alentejo, com. and 53 m. S W Evora, near the source of the Guadiana. It is the native place of the celebrated traveller Mendez Pinto, whose supposed love of sloth and indolence in the marvellous has made his name the generic term for his class. The manufactures consist of leather and cotton-ware. Pop. 2747.

MONTE-MONTE-VIDEO a *ta* Portugal, prov Douro, bank Mondego, 14 m. W Coimbra. It is a very ancient place, surrounded by a wall in a ruinous condition, and defended by an old castle and less a number of antiquities, and an annual fair. Pop. 875.

MONTE-MOZZATE, a coastal mountain, Brazil, forming a promontory on the S. of the Bay of Espírito-Santo, prov of that name. In clear weather, it can be seen by vessels at the distance of 40 m., and is hence an important landmark.

MONTE-ROTONDO a *ta* Italy deleg. and 36 m. S E W Bari with a castle. Near it were alum and sulphur are obtained. Pop. 1000.

MONTE-SAN ANGELO, a *ta* Naples, prov Capitanata, dist. and 28 m. N E Foggia, defended by a strong castle

the son of a bishop, with a great number of churches, and the remains of a Roman temple. Pop. 11,500.

MONTE-SAN-GIULIANO, a *ta* Sicily, prov and 5 m. E N E Trapani, on a mountain suddenly called Eryx, covered by a strong barren castle. It has a great number of churches and convents, and an hospital. The mountain is 5400 ft. high, and was famous for its temple of Venus Erycia. P. 8600.

MONTE-SAN-SAVINO, a *ta* Tuscany 37 m. S E Pistoia. It is well built has a court of justice, two churches, a castle, and a trade in all wine, corn, and cattle. P. 4131.

MONTE-SANTO, a *ta* Brazil prov and 210 m. N Bahia with a church and a primary school. Limestone and ironstone abound in the district.

MONTE-SANTO a *ta* Italy deleg. and 11 m. E N E Macerata. It stands on a hill near the Adriatic, where it has a small harbour for fishing-vessels. Pop. 1600.

MONTE-SCHIAVONE, a *ta* Naples, prov Basilicata, dist. and 7 m. S. Matera. Pop. 5600.

MONTE-SODANO, a *vil* Tuscany, prov Pisa 23 m. S E Leghorn, with a church and a castle. Pop. 1053.

MONTE-VAPO, a *ta* Sicily, prov Girgenti, dist. and 19 m. N Sciacca. Pop. 2980.

MONTE-VETROLA a *ta* Tuscany, 21 m. W N W Florence, with a church. Pop. 1677.

MONTE-VIDEO, a seaport *ta*, cap. republic of Banda Oriental del Uruguay N W coast of the Plata lat. 34° 55' S.; lon 56° 15' W. (n.) 130 m. E E E Buenos Ayres. It is situated on a gentle elevation, at the extremity of a small peninsula, and is surrounded by a strong wall mounted with guns, and further defended by a citadel or castle, of indifferent construction with bulwarks and batteries. It is pretty well built, houses mostly of one story flat-roofed, and floored with brick. There are no public buildings deserving notice excepting the cathedral which is rather a handsome structure although awkwardly situated. There is also a

THE CATHEDRAL, MONTE-VIDEO.—From Valdivia, looking across the harbor.

townhouse and prison in one edifice. The harbour is shoal, having only from 14 to 19 ft. water, but the bottom being very soft, vessels receive no damage by grounding; it is exposed to the S W winds, which blow right into it, causing a good deal of sea. The chief trade is in hides, tallow, and dried or jerked beef: the first two are exported to Europe, and the latter is sent to the West Indies, especially to the Havana. The coarse copper from Chile, in square plates, is sometimes shipped here, as well as wool or less of Paraguay. The imports principally consist of British cottons, woollens, hardware, flour, wine, spirits, tallow, sugar, tobacco, boots, shoes, salt, &c. The climate is humid, and the weather in the winter months, June, July, and August, is, at times, boisterous; and the air keen and piercing. In summer, again, the heat is oppressive. The climate, however, is represented as being, on the whole, cheerful and healthy through winter; the soil is the neighbourhood fertile, and abounding in vegetable produce. Fish and fowl are cheap. Pop. 10,000 to 15,000.

MONTEALEGRE, a tn. Spain, Murcia, prov and 39 m. S.E. Albacete, with a townhouse, three elementary schools, a hermitage, a church, a flour-mill, and a brandy distillery. Pop. (agricultural) 5187.

MONTEBELLO, a tn. Naples, prov. Calabria-Ultra I, dist. and 10 m. S.E. Reggio. Pop. 1450.

MONTEBELLO, a vil. and com. Italy, Piedmont, div. and 25 m. N.E. Alessandria, 1 bank Ceva, with a church and a trade in silk and fruit, particularly apples, and pears. The French here in 1800 defeated the Austrians. P. 1486.

MONTEBELLO a tn. kingdom of Italy gov. Venice, prov. and 10 m. S.W. Vinesia, near the Chiampo. It consists of small but close-looking houses, and has an old castle and a church. A battle was fought here between the Austrians and French in 1812. Pop. 3600.

MONTEBELLUNA, a tn. kingdom of Italy gov. Venice, prov. and 14 m. W. V. Treviso. It is the seat of several district courts and offices and contains a church. Pop. 4069.

MONTEBOURG (Latin *Montis Burgi*), a tn. France, dep. Manche 16 m. S.E. Cherbourg; with the remains of a fine Benedictine abbey, manufactures of lace and tacking and some trade in sheep. Pop. 2855.

MONTECALVO a vil. and com. Italy, Piedmont, div. Alessandria, prov. Voghera, with a church, a castle, and a trade in white wine. Pop. 1150.

MONTECATALLO a vil. and com. Italy, Piedmont, div. and 4 m. N.E. Alessandria, 1 bank Tanaro with a magnificent castle, three churches, and a trade in wine. P. 1200.

MONTECATINI, two places, Tuscany.—1 (di Val di Cecina) Prov. and 25 m. W.N.W. Florence with a handsome church, copper mines, and a trade in honey. Pop. 1073.—2 (di Val di Nievole) A tn., prov. Florence, dist. and S.E. Pisa with an ancient and handsome church and mineral springs. Pop. 2732.

MONTECCHIO,—1 A tn. Italy, duchy Modena near bank Lenza, 24 m. W. Modena. Pop. 3300.—2, (*Magyore*), A vil. and par. Austrian Italy prov. and 7 m. S.W. Vienna with a church, and two annual fairs. Pop. 4137.

MONTECI (Latin *Monteque*), a tn. France, dep. Tarn-et-Garonne, 5 m. W.E. Montauban, on a lofty summit, and once strongly fortified. Pop. 1715.

MONTECHIARO Prov. and com. Italy, Piedmont.—1 A vil. and com. div. and 25 m. W. Alessandria with a court of justice, two churches, an ancient castle, some manufactures of woollen and linen stuffs and a trade in wine and cattle. Pop. 1900.—2 A vil. and com. div. Alessandria, prov. Aosta, 5 m. from Spigno once defended by a strong castle now in ruins. It has two churches and a trade in wine, fruit and cattle. Pop. 711.

MONTECHIARUGOLO a vil. and com. duchy and 10 m. S.E. Parma, 1 bank Enza, with a magnificent castle a public school, and manufactures of gunpowder. Pop. 3967.

MONTECRESTESE, a vil. and com. Italy, Piedmont, div. Novara, 5 m. from Domo d'Ossola with a very ancient church, and a trade in wine and dairy produce. Pop. 1816.

MONTEFALCONI, a tn. Papal States, Gales and 10 m. N.W. Viterbo, on a lofty eminence, near E. shore of Lake Bracciano. It is not well built, but is a bishop's see, and contains a cathedral, an imposing edifice. Near it is the church of San Flaviano, a Gothic building, founded in 1080, and preserving a strange mixture of round and pointed arches. Montefalco was long famous for mineral wine. In the vicinity is a sulphureous lake. Pop. 4509.

MONTEFRIO, a tn. Spain, Andalusia, prov. and 30 m. W.N.W. Granada. It is very irregular, and of unpleasant aspect with broad, and paved, but crooked streets. Besides the townhouse and prison, the only buildings and institutions worth mentioning are the granary, five elementary schools, an hospital for the sick poor, and three churches. It has also eight flour and seven oil mills, three manufactories of soft soap, a brandy distillery, and four fulling-mills. Pop. (agricultural) 500.

MONTEFURCO a tn. Naples, prov. Principato-Ultra, dist. and 3 m. N.W. Avellino. Pop. 6500.

MONTEGICAR, a vil. Spain, Andalusia, prov. and 30 m. N. Granada, with a townhouse, a beautiful fountain, two schools, two granaries, a church, and an oratory. Near it are quarries of limestone, gypsum, and freestone, and mines of lead and manganese. Pop. 2466.

MONTEGO-BAY, a seaport in N.W. coast, Jamaica, cap. co. Cornwall on a bay of same name, with a harbor protected by a breakwater, but still somewhat exposed to a heavy swell from the N. lat. (Gov.) 18° 29' 34" N. lon. 77° 56' W. (2). It is defended by a battery, has a customhouse, where the slaves are held, and carries on a considerable trade. Pop. about 4000.

MONTEGROSSO a vil. and com. Italy, Piedmont, div. Alessandria, prov. and 5 m. S.E. Asti, 1 bank Tigullio with four squares, two churches, a monastery, a school and a trade in excellent wine. Pop. 2250.

MONTEHERMO a vil. Spain, Extremadura, prov. and 47 m. N. Oseava with broad paved streets, and two squares, a townhouse, three elementary schools, and a church; manufactures of iron implements for husbandry, as well as domestic use and some traffic in grain and cattle. Pop. (agricultural) 8726.

MONTEJAQUE a tn. Spain, Andalusia, 48 m. W. Málaga, near the Guadara, indifferently built, with a church, courthouses, two primary schools, manufactures of white soap and cork, and a trade in corn and maize. Pop. 1685.

MONTELEONE, two towns, Naples.—1 (*anc. Hypocissus*) Prov. Calabria-Ultra II, on a height, 35 m. N.E. Nicotri. It ranks as a fortress of the fourth class, and is defended by a strong castle. Its houses are chiefly of wood, and most of the streets crooked and badly paved. It has four churches, a royal college, a court of commerce and several silk mills. Pop. 6630.—2, Prov. Capitanata, dist. and 7 m. S.W. Bovino with three annual fairs. Pop. 2440.

MONTELMARTE (Latin *Mons Adamari*), a walled tn. France, dep. Drôme, at the junction of the Rhône and Isère. It is generally well built, and on a rising ground within it stands the citadel or castle. It has a court of first resort, a communal college, manufactures of wrought silk, wicker-work, serge leather, cotton and morocco hosiery, &c. cotton-mills, tile-works and brickmaking and a trade in mouton (a kind of cake made of almonds and honey), corn flour and olive oil spun silk, cattle, and nine annual fairs. It was one of the first towns which embraced the Reformation, and makes an important figure in the civil wars. Pop. 6385.

MONTELI, a tn. Naples, prov. Principato-Ultra, dist. and 10 m. S.W. San Angelo de Lombardi. It has eight churches. Pop. 5900.

MONTELLANO a tn. Spain, Andalusia, prov. and 37 m. S.E. Seville with two squares, a townhouse, granary four elementary schools, a church, two soap manufactories, and 10 oil and 5 flour mills. Pop. (agricultural), 4257.

MONTELOVEZ COAHUILA, or MONTELOVA, a tn. Mexican confederation, state Coahuila, 123 m. W. Monterey Pop. 3500.

MONTEPMAGNO a tn. Italy, Piedmont, div. and 18 m. W.N.W. Alessandria, with a remarkably elegant church, in the form of a rosetta, with Ionic pillars supporting a dome a castle, a communal school, and a trade in wine fruit, and silk. Pop. 2538.

MONTEMALE a vil. and com. Italy, Piedmont, div. Cuni, in a mountainous dist. in the valley of the Grana, with a church, an old castle in ruins, a trade in corn wine, and abundance and quarries of limestone and alabaster. P. 1516.

MONTEMAYOR, a tn. Spain, Andalusia, prov. and 16 m. R. Cordova, with a square, in which stand the townhouse and the granary. It has also an ancient castle with three beautiful Gothic towers, an elementary school, a church, and four hermitages. Pop. 3180.

MONTEMIETTO a tn. Naples, prov. Principato-Ultra, dist. and 8 m. N.E. Avellino. Pop. 3000.

MONTEMILONE, a tn. Naples, prov. Basilicata, dist. and 18 m. S.E. Melfi, with three churches. Pop. 1400.

MONTEMOLIN, a vil. Spain, Extremadura, prov. and 60 m. S.E. Badajoz, with broad, straight, paved, and rather clean, but sometimes steep streets a townhouse, millstone, three churches two elementary schools, a house of refuge, and in the environs, two hermitages, and a fine old Moorish castle. Besides agriculture, the natives are employed in henequen, several oil and numerous flour mills; as manufactures of coarse woollens and flannels, soap, bricks, and tiles. The son of Don Carlos takes from this place his title of Count of Montemolin. Pop. 2320.

MONTEMOR, or *Alma de Passagem*, a tn. Brazil, prov. Paraíba, 1 hour from Recife, 15 m. from the sea, 10 m. S. S. Miguel with a church, and a considerable trade in maize, made of a straw or rush called *peripá*. Almost all the inhabitants are Indians.

MONTEMOR-NOVO, a tn. Brazil prov. and 60 m. S. Ceará, composed of a few detached hamlets built round the parish church, and chiefly inhabited by Indians, of very indolent habits. The district is sandy, but well watered, and grows some of the best cotton in the province. It has some trade also in rum and agricultural produce. Pop. dist., 2000.

MONTEMORRO, a tn. Naples, prov. Basilicata, dist. and 34 m. S.E.E. Potenza. Pop. 6000.

MONTENAKEN or *MONTENAKEN* a vil. and com. Belgium, prov. Limburg, 15 m. S.S.W. Hasselt. It is an ancient place, was once defended by a strong castle, and is memorable for a great battle fought in its vicinity in 1313, between the Liegeois and Brabantines, when the latter were defeated with a loss of 8000 killed, and 4000 prisoners. It has an annual fair, chiefly for woollens, cotton stuffs, ironware, pottery glass, &c. Pop. 877.

MONTENEGRO (Serbia, *Černogora*, or *Therapogora*, Turkish, *Kerakodagh*, Black mountain) a small territory, European Turkey practically independent, though tributary to the Ottoman Porte, lat. 42° 10' to 43° 56' N. lon. 18° 41' to 20° 22' E. bounded, W by Dalmatia, N Herzegovina and part of Bosnia, and E. and S. Albania. Area about 300 sq. m. It is divided into eight nahies or departments, with which their approximate population, are as follows:—

Name of Dep.	Pop.	Name of Dep.	Pop.
Katunina	24 000	Piport	8 500
Taranaka	21 000	Seretzka Moravica	8 100
Rutoka	11 000	Kutaka	16 200
Zamachanaka	4 800		
Slidopavitch	14 000	Total	91,000

In 1844 the population was estimated at 150 000

The general aspect of the country is that of a succession of elevated ridges and cliffs here and there by a lofty mountain peak, some of them attaining elevations of 5000 ft. or 6000 ft., and in some parts looking like a sea of immense waves turned into stone. The whole territory indeed is wild and rugged to the extreme but has also a few beautiful and verdant plains and valleys in which the soil is exceedingly fertile. Two of these favoured tracts are the department of *Theravica* and the valley of *Slidopavitch*, watered by several streams, the principal of which is the *Morava* or *Morava*, which falls into the lake of *Scutari*. The climate is healthy. Forests of valuable timber cover many of the mountain sides. The most common are oaks and holly, ash, beech, fir, walnuts, hazel, wild pear, poplars, willows, alders, and the *hothorn* (*Rhus Cotinus*) used for dyeing and tanning. The cultivated productions are Indian corn, potatoes, cabbage, cauliflower, and tobacco with several kinds of fruit-trees, including the peach, olive, pomegranate, mulberry and others. In the department of *Theravica*, already mentioned, apples, vases, carobs, almonds, figs, guinea, walnuts, &c. also grow in abundance. Agriculture is in a very rude and inefficient state, and though every village has its own land, even if only a few feet square, as planted with Indian corn, potatoes, or some other useful plant, yet there is no sufficiency of food for the population, which is on the increase. Sheep, goats, and pigs, are reared in great numbers, the two former affording a profitable supply of wool and cheese for exportation. Game is not abundant, but fish are taken in great quantities and are of excellent quality particularly the trout, which are celebrated, and some of them of immense size and a species called *Salmo*, are caught in large quantities and dried and called for export to Vienna and Trieste. Manufactures, with exception of a coarse woven stuff called *strucko*, used at once for cloaks and blankets, and a few other articles of wearing apparel, are unknown the women also endeavour with the needle; and the shirt-makers, and brewers of their cloth dresses are neatly worked in silk, and patterns of coloured cloth. The chief occupations of the inhabitants are agriculture and fishing; the latter carried on principally in the lake *Scutari*. The exports of *Montenegro* are muchal nutmegs, nutmegs, fish, wax, honey, hides, tallow, cheese, butter, dry-wood, fir-wood, charcoal, cattle, pigs, pork, wine, wool, tobacco, turmeric, shells, fruits, Indian corn,

potatoes, cabbage, cauliflower, and other vegetables. The chief imports are cattle, and some horses; tobacco from Turkey, salt, copper, iron, oil, salt fish, wax, candles, wine, brandy, coffee, sugar, arms, gunpowder, lead, flint, glass, shoes, needles, cloth, linen and cotton stuffs handkerchiefs, Pen cups, &c. The *Montenegrins* are generally of tall stature, and well proportioned, with singularly powerful voices, which enables them to carry on conversations at incredible distances; forehead good, face rather square, moderately aquiline, or straight nose, and sunken eyes. Both men and women are very robust; the latter are often beautiful when young, but soon lose their good looks by laborious and an unwholesome occupations, being the hosts of burden of *Montenegro*. The people, generally, are useful in manner extremely brave, and hospitable and courteous to all excepting the Turks, whom they hate with an excessive and enduring hatred, inspired by the sufferings inflicted on their country by their invasions, and which they eagerly seize on every opportunity of avenging by a sanguinary warlike retribution in war, they cut off the heads of their dead and wounded enemies, and of all taken with arms in their hands, and arms of those of their wounded comrades, which they cannot save from the hands of the enemy. The men go at all times fully armed, whatever be the occasion in which they are engaged. The *Montenegrins* mode of living is hardy and primitive, and their food simple, consisting of coarse unleavened bread, made of Indian corn, cheese, milk and vegetables. Meat and fish they seldom taste. The houses are of stone, generally with thatched roofs, but many are covered partly or entirely with wooden shingles. The total number of towns and villages in the country is between 700 and 800 but of this former there is not one deserving the name, the largest not having a population of 1200. None of them are walled, and few can be said to have any streets. The language of the *Montenegrins* is a dialect of the Slavonic, and is considered very pure. In religion they are all of the Greek church. Education is hardly thought of, many of the priests can neither read nor write and there are only two schools in the whole country—one at Cetinje, for 30 boys, and the other at Dobrovolesko, for 24, and both established so recently as 1841. *Montenegro* is governed by a *Vladika* or prince, who is at once a bishop, a judge, a legislator and a commander-in-chief. The office is hereditary in the family of *Petrovitch* *Montenegro* has been for nearly a century, in a sense, under the protection of Russia. The chief families have been educated in St. Petersburg, and appointed to grades in the Russian army and the annual tribute due to the Porte, about 240,000, has long been paid by a remittance from the emperor of Russia. In 1858 the Turks sent an army of 24,000 men against *Montenegro*, with the view of reducing it to complete subjection; but, after some sanguinary conflicts, the Turks were induced to recall their army without having accomplished the object of the expedition—(W. Litchman's *Dalmatia and Montenegro*, &c.)

MONTENEGRO, a tn. Naples, prov. Salerno, dist. and 11 m. N.N.W. Larno, with an annual fair. Pop. 3500.

MONTENOTTE, a vil. Italy Piedmont, div. and 26 m. N. Geneva. It is memorable as the scene of a victory which the French gained, in 1798, over the Austrians at the commencement of their conquests in Italy.

MONTEDORIBIO a tn. and com. Naples, prov. Abruzzo-Citra, dist. and 8 m. W. & W. E. Vasto. Pop. 1000.

MONTFAGANO, a tn. Naples, prov. Abruzzo-Citra, dist. and 16 m. E. Teramo. Pop. 2000.

MONTPELOSO, a tn. Naples, prov. Basilicata, dist. and 23 m. W. N. W. Matera. It is walled, and is the seat of a bishop. Pop. 4570.

MONTPELUSANO, a tn. Tuscany prov. and 51 m. S.E. Florence, on a lofty summit about 1800 ft. above the sea. It is the seat of a bishop, has a court of first resort, and other public offices a beautiful church, several palaces, manufactures of soap, oil-mills, and a trade in the wine of the district. Cardinal Bellarmine is said to have been born here. *Montepeluso* is an ancient Etruscan city, and has many interesting remains. Pop. (1853) 3040.

MONTREAL, a tn. Naples, prov. Abruzzo-Citra, dist. and 14 m. N. W. V. Agila. Pop. 5180.

MONTEBEAU, or *Montebello*, a tn. France, dep. Seine-et-Marne, 13 m.

2. Fontainebleau, at the confluence of the Yonne and the Seine, both navigable, and each spanned by a bold bridge, and on a branch of the Troyes and Lyons railway. It is surrounded by a steep hill, crowned by the chateau of Serrilly, a handsome modern edifice, and is generally well built; has a collegiate church, a considerable trade, chiefly for the supply of Paris with flour, timber, cattle, &c., and important manufactures of earthen and stone ware, in imitation of the English. In 1814, it was the scene of Bonaparte's last victory. Pop. 4826.

MONTEREGGIONE, a tn. and com. Tuscany, about 8 m. from Siena, on a low height. It is walled, and has a church, and a strong castle. Pop. 3581.

MONTEREY,—1, A city, Mexican confederation, cap. of New Leon, on the Tigris, at the head of a large and beautiful valley, 85 m. E. by N. Saltillo, lat. 26° N., lon. 100° W. It has well-paved streets, houses of stone, in the Moorish style, with flat roofs and is the most important place in N. Mexico. Near it are gold, silver and lead mines. Pop. about 15,000.—2 (San Carlos del) A seaport in U. States, Upper California, on bay of same name, 80 m. S.S.E. San Francisco lat. 36° 58' 24" N., lon. 121° 53' W. (h.) It is surrounded by wooded hills, and contains a fort, a guard-house, a church, and a custom-house.—The bay is about 85 m. wide at the entrance and stretches about 16 m. inland.

MONTERODUNI, a tn. Naples, prov. Samio, dist. and 4 m. S. Isernia. Pop. 1740.

MONTERONI, a tn. and com. Tuscany, 10 m. S.E. Siena, near r. bank Arbia with a church, and a trade in ears, cattle, and silk. Pop. 8807.

MONTERONI, a tn. Naples, prov. Otranto dist. and 8 m. W. S.W. Lecce. Pop. 1890.

MONTEROSSO a tn. Naples, prov. Calabria-Ultra II dist. and 10 m. E. N.E. Monteleone. Pop. 3000.

MONTEROSSO two small places, Italy. Piedmont, 1. A vil. and com. prov. Genova, prov. Levante 4 m. from Lavagna, partly fronting the sea. It has a church a Cyprian convent, and an ancient tower, on a lofty height: a tunny fishery and a trade in wine, olives, and lemons. Pop. 1189.—2, A vil. and com. div. Cui, in a mountainous district, on the Grana, here crossed by a wooden bridge. It was, in early times, defended by a strong castle, and had once mines of silver and iron. Pop. 1203.

MONTERUBIO a vil. Spain Extremadura, prov. and 14 m. S.W. Badajoz, tastefully and irregularly built, with a large square, a townhouse, prison granary three elementary schools, a parish church, a chapel several fountains, and a convent house for monks, a manufactory of common chairs, and numerous flour-mills. Pop. (agricultural), 2500.

MONTESA, a tn. Spain, prov. and 58 m. S.W. Valencia, on an eminence rising in the middle of a beautiful valley and possessing a magnificent and once strong and important castle, which was injured by an earthquake, March, 1748. It has a townhouse, hospital, two endowed schools, a church, and three hermitages. Pop. 1050.

MONTESAÑO a tn. Naples, prov. Principato-Citra, dist. and 11 m. S.S.E. La Sala, on a steep mountain. Pop. 7100.

MONTEARACHIO, a tn. Naples, prov. Principato-Ultra, dist. and 14 m. N.W. Avellino. Pop. 7800.

MONTEAQUEL VILLARRE, a tn. France, dep. Gers, 29 m. S. Toulouse with manufactures of woollen cloth and druggs, salt-petre, and tile-works. Pop. 2305.

MONTEAU-PO a vil. and com. Italy Piedmont, div. and 18 m. N.E. Turin, r. bank Po, with three churches, a public school the ruins of an old castle, brick-kilns, and a trade in corn, millet, wine, and hemp. Pop. 1070.

MONTEU Basso a vil. and com. Italy Piedmont, div. Cui, prov. Alba, 8 m. from Canale, with a church of blessed (feble), a large castle, silk-mills, and a trade in wine, wood, and chestnuts. Pop. 2600.

MONTEUX, or **MONTEUX** (Latin, Montis), a tn. France, dep. Vaucluse, 3 m. W. Carpentras. It is surrounded by walls, which are in a good state of preservation, and was the favorite residence of Clement V. A great deal of saffron and mulberry is grown in the vicinity. Pop. 2545.

MONTEVACHI, a walled tn. Tuscany, 24 m. S.E. Florence. It is regularly built, has a court of justice, and several public offices, a collegiate church, and a trade in wine, oil, and silk. Pop. 3487.

MONTEVERDE, a tn. Naples, prov. Principato-Ultra, dist. and 20 m. E.N.E. St. Angelo de Lombardi. It is a bishop's see. Pop. 2200.

MONTEVERDE, or **MONTEVERDE** in sense, in the N. Pacific Ocean, Caroline group lat. 3° 37' N. lon. 155° 48' E. They are of coral formation and consist of about 80 low islands arranged in the form of a circle, connected by reefs, and enclosing a lagoon about 30 m. long, by 15 m. broad. The shores are frequented in the season by hawk's-bill turtles, and the surface of each island is densely covered with coconut, bread-fruit, palm trees, and various kinds of wood. The inhabitants are tall, well made, and active.

MONTEFERRAND a tn. France, dep. Puy de Dôme; properly only a suburb of Clermont Ferrand.

MONTEFERRAT or **MONTEFERRATO** an ancient castle, Italy which was bounded N. and W. by Piedmont, S. the republic of Genoa, and E. the duchy of Milan and had Genoa for its capital. It is now included in the Sardian States, where it forms part of diva. Alessandria, Cuni, Genoa, Novara, and Turin.

MONTEFLANQUIN, or **MONTEFLANQUIN** a tn. France dep. Lot-et-Garonne, 25 m. N. Agen; the houses are tolerably well built, but most of the streets steep, narrow, and irregular. Pop. 1552.

MONTEFOET a tn. Holland, prov. and 9 m. S.W. Utrecht; 1 bank IJssel. It is well built, was formerly fortified and still has three gates, and is partially enclosed by a wall. has a townhall, two churches, an hospital, two schools and the remains of a once strong castle, now used as a school. Agriculture, the cheese trade, and rope-spinning, are the chief occupations. Pop. 1799.

MONTEFORD par Eng. Salop 2976 ac. Pop. 496.

MONTEFORT several places, France particularly—1 (San-Med), (Latin, Mons Fortis) a tn. dep. Ille-et-Vilaine, at the confluence of the May and Chaulnes, 14 m. N. Rennes. It is enclosed by ramparts, flanked with towers, and surrounded by a wide fosse, but a vast enclosed space to the W., N., and E. of the present town, indicates that it must at one time have had nearly ten times its present extent. It has fax mills, bleaching-works, and a very extensive tannery and carries on a considerable trade in butter tallow, hemp, wood, linen, common straw, cattle, agricultural implements, &c. Pop. 4056.—2, A tn. and com. dep. Landes, 11 m. E. Dax, chief manufactory of raincoat materials and a trade in cattle. Pop. 1644.—3, (L. Anzouy), (Latin, Mons Fortis Amaloricus) a tn. and com. dep. Seine-et-Oise, with the remains of a strong castle, of the counts of Montfort one of whom led the infamous crusades against the Albigenses. It has also a church, and a trade in corn, fruit, hay, horses, and cattle. Pop. 1760.

MONFORT, a vil. Detrol Limburg, near Maestricht, with the remains of an old castle, which has been restored and modernized. Pop. 886.

MONTEIN a tn. France, dep. Gard 19 m. N.E. Nimes; 1 bank Gard, here crossed by a suspension-bridge. It has manufactures of linen and some oil mills. Pop. 2321.

MONTGELLAFREY a vil. and com. France dep. Savoy, prov. Moriana, about 4 m. from La Chaux-de-Fort, with an ancient church and a trade in butter and cheese. Pop. 1000.

MONTGOMERY or **MONTGOMERY** an island on N. Wales bounded N. by Denbighshire, E. and S.E. Shropshire, S. Radnorshire, S.W. Cardiganshire, and W. and N.W. Merionethshire. Area, 491 500 ac. consisting mostly of wild, rugged, and sterile mountains, varying from 1000 ft. to 1800 ft. in height, the culminating point Pen-y-munt, of the Berwyn range, which occupies the N.W. part of the county, 2463 ft. high being just within the border of Cardiganshire. Notwithstanding the generally mountainous character of the county, it contains some fine and fertile valleys, the most extensive and fruitful of which is the Severn. The county is almost entirely occupied by the slate-rocks which overlie so large a portion of Wales; but granite, greenstone, conglomerate, and the new red sandstone, also occur in different places. Lead and zinc are procured, and also some copper. Little more than 60,000 ac. are under tillage, chiefly in the narrow valleys, and on the E. side of the county bordering on Salop. Wheat, potatoes, and mangold-wurzel, are the principal crops. Orchards and gardens are numerous in the vale lands on the E. side of the county. The quantity of produce

five grazing land is estimated at 360,000 ac., a great portion of which is appropriated to the dairy. In the hilly districts, the principal object of the farmer is the rearing of cattle, to be fattened in more fertile parts. The cattle of the upland are small, breeds of sheep various. Great numbers of very small and hardy ponies, commonly called *twines*, are reared in the hilly districts of the county. *Panades* are extensively manufactured, as are also what are called "Welsh plains" or "cassocks." The principal river is the Severn. The county towns send a member to Parliament; suggested electors (1831), 1886

MONTGOMERY (Welsh, *Ydd Yddwyl*), a par. border-market in, and par., N. Wales. The town cap. above is, is picturesquely situated, 53 m. W by N Birmingham, partly at the base, and partly on the lower declivities of a hill. It consists of two principal streets, and a market-place, which are well kept; and has a fine ancient cruciform church, in the early English style, places of worship for various Dissenting bodies, several private academies, and a free school. There being no manufactures, the people generally are employed in agriculture. In connection with Welshpool Newtown, &c., it sends a member to Parliament. Area, 2338 ac. P. 1248.

MONTGOMERY a n. U. States, cap. of Alabama, on a high bluff 7 bank Alabama, at the head of steam-boat navigation. It has seven churches and two academies 40,000 bales of cotton are shipped yearly. A railroad, 67½ m., connects this place with West Point, Georgia. P. (1840) 2350.

MONTGOMERY ISLANDS, a group of six small rocky isles, off N.W. coast Australia, at the entrance of Devil's Bay, the largest is 70 ft. high lat. 15° 45' S.

MONTHEI a vil and par Switzerland can Valais at the entrance of the valley of Lie, near r bank Rhone 21 m. W. Son, at the foot of a hill crowned with the ruins of an old castle. Cretines are very numerous here. P. 1623.

MONTHERMÉ a n. France, dep. Ardennes, l. bank Meuse, here crossed by a suspension-bridge 828 ft. long, 10 m. N. Monthermé. It has manufactures of earthenware, and extensive glass works at which fine flint and Bohemian glass are made. P. 1658.

MONTICELLI several places, Italy Lombardy particularly—1 A vil and com. prov. and S.E. Pavia, near l. bank Po; with a church. Pop. 1261—2 (d'Alba) A vil and com., prov. Brescia, near l. bank Olto with two churches a sanctuary and a chapel.

MONTICELLI several places, Italy particularly—1 A vil and com. Piedmont div Cune, near Alba, near the Tanaro, with two churches, two convents a very old castle, and has a little trade in wine. Pop. 1603—2 (d'Oronzo) a vil and com., duchy and 25 m. N.W. Parma, well built, with a beautiful collegiate church, a Jewish and several public schools, an hospital and numerous old castles, and a trade in corn, wine, and cattle. Pop. vil 1000, com. 2802—3 A vil and par. Tuscany, 5 m. N. Florence with a church. Pop. 1805—4 A to. Papal States, 19 m. N.E. Roma. P. 1035.

MONTICELLO several places, Italy Lombardy, particularly—1 A vil, prov. and 14 m. S.E. Como, with a church, and manufactures of glass. Pop. 1658—2 (d'Oronzo) a vil, prov. Brescia, dist. and 5 m. from Lago with two churches.

MONTICIANO a n. and com. Tuscany, 18 m. from Siena. It is walled has a church thermal sulphureous springs, and some trade in wine. Pop. 2028.

MONTIERI a n. Tuscany 10 m. S.W. Siena with two churches, a castle, iron-mines, and a trade in chestnuts. Pop. 1071.

MONTIGLIE a n. Italy Piedmont, div 27 m. W. N.W. Alessandria, near the Varre, here crossed by a stone bridge. It has two churches, a castle, and a trade in corn, wine, and hemp. Pop. 8063.

MONTIGNAC, several small places, France, particularly—1 A n. dep. Dordogne, or the Tendre, 24 m. S.E. Périgueux overlooked by the majestic remains of an ancient castle, which played an important part in the English and the civil wars. Pop. 2661.

MONTIGNON-LUCANNE, a vil and par. Tuscany, duchy Lucca, dist. and 3 m. from Massa-Ducale, with an ancient church and a castle, and some trade in wine and oil-cit. Pop. 1465.

MONTIGNY-LE-TALLON, a vil and com. Belgium, prov. Hainaut, r. bank Sambre, 24 m. E. Mons; with contri-

butions of iron-ware, two breweries, a flour-mill and lace-making machines. Pop. 1462.

MONTIGNY-LE-SAMER a vil and com. Belgium, prov. Hainaut, 2 m. E. Charleroi, l. bank Sambre; inhabitants principally employed in agriculture and the working of iron-mines. Pop. 3811.

MONTIJO, a n. Spain, Extremadura, prov. and 19 m. E. Badajoz, on the Guadiana. It has a town-house, a palace of the count of Montijo, a granary, an hospital, barnyards, six elementary schools, a sanctuary and a church, manufactures of sailcloth and fleece, flour-mills, and an oil-mill. Pop. (episcopal), 3560.

MONTILLA a city Spain Andalus, prov. and 19 m. S. Cordova, on two hills. The houses have a good appearance, being clean and extremely white. The streets are broad, clean, and very well paved; and there are three squares, a town-house, a prison, a palace, belonging to the duke of Medinaceli a palace and various private schools, an asylum for orphan girls, a poorhouse and fructifying hospital, an hospital for the sick poor, a parish church, formerly a mosque; a chapel of ease, seven hermitages in or near the town, three convents, and two cemeteries. Agriculture, numerous flour-mills, five potteries, three soap and three silk manufactories, and manufactures of linen, napery coarse cloths and fleeces, are the chief sources of occupation, and wine and oil are exported. Montilla was wrested from the Mussulmans by Ferdinand III, who peopled it with Christians. It was the native place of the great captain Gonzalo Fernandez de Cordoba whose family were the lords of this place. Pop. 15,324.

MONTILLANA, a vil Spain, Andalus, prov. and about 30 m. from Granada, with a church, court-house, primary school, a flour-mill, and a trade in wheat. P. 1057.

MONTIOTET or **MONTIOTET** a vil and com. Italy Piedmont, div Aosta, 5 m. from Yverre, l. bank Dora Baltea here crossed by a wooden bridge. It has a church and a chapel and a trade in corn and wood. Pop. 1400.

MONTIVILLIERS (Latin, *Montivilliers Villaris*), a n. France, dep. Seine-Inférieure, 6 m. N.E. Havre, on the eastern end of a pretty valley, watered by the Leveche. It has a cheerful aspect, a rapid stream circulating in its streets though a good many of the houses have an antique appearance. It has a church, manufactures of woollen cloth lace, and sells sugar-refineries, tanneries, bleachfields, paper and cotton mills, and a trade in corn, cattle, cloth, leather groceries, and ironmongery. Pop. 8036.

MONTJEAN (Latin, *Mons Johannis*) a n. France, dep. Maine-et-Loire, r. bank Loire, 10 m. N. Beaupré. Near it is an important coal-field which, passing under the bed of the Loire, communicates with that of Montevain. Pop. 1470.

MONTJOIE (anc. *Mons Jovi*) a n. French Franche, prov. and 13 m. S.E. Aix-Le-Chapelle, at the confluence of the Lanhech with the Roer, in a wild romantic district. It contains the ruins of a fine old castle, said to have been a hunting-seat of Charlemagne, two churches, an Ursuline convent, and superior grammar-school; has manufactures of linen cambrics, and coverlets, a dye work, and several cotton-mills. Pop. 5276.

MONTJOYE vil Gardin, see Montjoie.

MONTLUCON (Latin, *Mons Lucanus*) a n. France, dep. Allier, 59 m. S.W. Moulins on the slope of a hill crowned by the ruins of the old castle of the dukes of Bourbon, and washed by the Cher here crossed by a handsome stone bridge. During the Middle Ages, it was a strong fortress, and part of its massive walls, flanked with towers, still remains. It is tolerably well built, and has manufactures of linen, serge, bombazine, and cordons, and some trade in corn, wine, fruit, cheese, and cattle. Pop. 6105.

MONTMEL (Latin, *Mons Melii*) a n. France, dep. Ais, 28 m. W.S.W. Bourges; with manufactures of heavy clothing, peck-hatching sewing thread, and a trade in corn, rape, maize, woollens, hemp, and hemp-seed. P. 2880.

MONTMARTRE (Latin, *Mons Martia*), an extensive suburb on the N. side of Paris (which see).

MONTMÉRY (Latin, *Montemarius*), a fortified n. France, dep. Meuse, on the slope of a hill, washed by the Our, 35 m. W. Luxembourg, ranking as a fortress of the fourth class because mean, and sweet meadow and hill laid-out. It has manufactures of lacy and lacy, and of wool, and a trade in wine, hides, gloves, rails, and corn. Pop. 1648.

MONTMELLIAN, or **MONTMELLIAN**, a tn. France, dep. Hérault, on bank of the river created by a bridge, 7 m. S.E. Chabrier. It was once so strong as to be regarded as the bulwark of Savoy, and the key of its Alps. But, after standing several sieges, its fortifications were finally demolished by Louis XIV., in 1705, and its famous castle, which crowns a rock overlooking the town, now exists only in a few fragments overgrown with brambles and nettles. It has little trade, but a good wine, which bears its name, is grown in the vicinity. Pop. 1820.

MONTMIRAIL (Latin, *Mons Mirabilis*) a tn. France, dep. Marne, on a height near a bank Petit Morin, 89 m. W S.W. Châlons; with a fine chateau, manufactures of leather, and a trade in corn, wool, and cattle. It was the birthplace of Cardinal Retz. Pop. 7222.

MONTMORENCY, a river, Lower Canada, which joins the St. Lawrence, 7 m. E. Quebec, after a course, N to S., of about 15 m. It has a splendid current of 242 ft.

MONTMORENCY, or **FRÉZERY** (Latin, *Monsmorencium*), a tn. France, dep. Seine-et-Oise, 9 m. N. Paris, very irregularly built, with an old chateau and church. The forest of Montmorency which stretches over an extensive plateau above the town, is a great summer resort of the Parisians. One great object of attraction is a house called the Hermitage, in which Montmorency resided for some time. Montmorency has a considerable trade in vegetables and fruits, particularly chestnuts and cherries, for the supply of the Paris market. Pop. 1820.

MONTMORILLON (Latin, *Mons Maurillon*), a tn. France, dep. Yonne, on both sides of the Gartempe, 27 m. S.E. Pontiers. It was once a place of great strength, and was celebrated for an hospital of Malcom-Dieu, founded in the 11th century by Robert du Fm part of the ruins of which still exist. It has a court of first resort an agricultural society, and a secondary ecclesiastical school is famous for its biscuits, has fine paper-mills and bleachfields, and a trade in cattle. Pop. 1820.

MONTMORIND, a rd and can. near Lombardy, prov. Lomb. dist. and 6 m. S. C. Crema, on bank Savio, has crossed by a wooden bridge. It has a church with two cranes, and several old and other mills. Near it, in 1705 the Imperialists under Prince Eugene, were defeated by the Imperialists under the Duke of Vendôme. Pop. 2448.

MONTOR, two places, France—1 (Latin, *Aurens Mons*), a tn. dep. Lot-et-Garonne, 7 m. S.W. 26 m. N.W. Blois. It was once fortified, and immediately above it stands the old castle of St. Omer. It has manufactures of linen, woollen hosiery, and leather. Pop. 3475.—2 A tn. and com., dep. Lot-et-Garonne, 11 m. W. Savignac, with manufactures of various. Near it immense quantities of peat are annually cut, and cattle-rearing is extensively carried on. Pop. 4500.

MONTONA, a tn. Austria, Tllyria, gov. Istria, 31 m. S. Trieste; with a collegiate and deanery church, an elementary school, and a considerable trade in ship-stubber. Pop. 1100.

MONTONE (Imo, *Imo*), a river, Italy, which rises in the E. slope of the Apennines, in the N. of Tuscany, flows N.E. enters the Romagna, passes Forlì, where it receives the *Rebbio* passes Ravenna, 6 m. N.E. of which it falls into the Adriatic, total course, about 46 m.

MONTORÉ, a tn. Italy, prov. Syracuse, dist. and 8 m. W S.W. Modica. Pop. 4000.

MONTOPOLI, a tn. Tuscany 24 m. W S.W. Florence, walled with a church, a castle, and a trade in corn and silk. Pop. 2574.

MONTORIO, two places, Naples.—1 A tn., prov. Abruzzo-Ultra I. dist. and 6 m. S.S.W. Taramo, with two annual fairs. P. 1520.—2, a tn., prov. Saudio, dist. and 4 m. S. Larcio. Pop. 1500.

MONTOSÉ, a tn. Naples, prov. Principato-Ultra, dist. and 12 m. N. Caserta, with considerable manufactures of linen. Pop. 2700.

MONTORO, a city, Spain, Andalusia, prov. and 27 m. N.E. Cordova, on a rocky and uneven peninsula, formed by the Guadalquivir, here crossed by a fine bridge, houses crowded, streets narrow and generally steep, but tolerably paved, and provided with lamps. It has five squares, one of which is used as a marketplace, and another as a promenade on a hill of good architecture, one of the best institutions of the kind in Andalusia; a granary, a tavernhouse, a foundling

hospital, a college for young ladies, with a church attached, and various public and private schools for elementary education a parish church, with a Gothic facade, and a tower 150 ft. high, an auxiliary parish church, and, in the town and environs, numerous hermitages. There is no drinkable water in the city, and the inhabitants require to supply themselves from a fountain on the opposite side of the river. The neighbourhood abounds with quarries of calcareous limestone, rock-salt, and yadostone, as well as mines of antimony, copper, and cobalt, but these have been abandoned and there are several fine bridges over the tributaries of the Guadalquivir. Agriculture is the chief occupation, but there are seven fulling-mills, eleven flour and numerous oil mills. The principal article of export is oil, in great quantities, and about the best in Andalusia. Pop. 10,753.

MONTPELLIER, a tn. U. States, America cap. Vermont, about the centre of the state, 130 m. N.E. Albany; lat. 44. 18' N., lon. 71° 52' W. It has an elegant cathedral, a court-house, and several churches, an academy, several mills and manufactures, and six printing-offices. It became the capital of the state in 1800, and was incorporated in 1818. Pop. (1860), 4112.

MONTPELLIER (Latin, *Mons Trepulianus*) a tn. France, cap. dep. Hérault, finely situated on an undulating acclivity washed by the Lers, about 6 m. N. of the Mediter. ranean and 78 m. W N.W. Marseilles. It has been much celebrated for the brightness of its atmosphere, and the salubrity of its climate, and, in consequence, long continued to be recommended by British physicians as a proper residence for their pulmonary patients. A different opinion now prevails, and its variable climate, blowing sunshine, alternating with cold mistral blasts, and atmosphere, though clear, charged with impalpable dust, are considered positively hurtful to the lungs. One great cause of the mistake was the peculiar richness and beauty of the landscape of the vicinity, the whole district, for above 2 m. around, being studded with handsome country seats embosomed among trees, or surrounded by gardens, orchards, vineyards, and olive-woods. The town itself enclosed by an old wall in 1666, and defended by a citadel of no great strength, rises in the form of an amphitheatre, along a slope, the summit of which, 168 ft. above sea level, is occupied by the Place de Peyron, forming part of the splendid promenade of the same name, which, though its trees are somewhat stunted, and its grass not very green, has been laid-out at vast expense, and with much good taste, commands magnificent views and is boasted of—not without cause—as one of the finest promenades in Europe. At one of its extremities stands the Chateau d'Es, a kind of fortress, which receives its water from a noble aqueduct of 53 large arches and 2695 ft. in length, laid across the valley from an opposite hill, and sends down copious supplies to every quarter of the town. Montpellier has its greatest length from E. to W. It is irregularly built, the houses are, in general, of good construction, but most of the streets are steep and narrow, and the public squares were both extent and regularity. The buildings deserving particular notice are not numerous. The principal are the cathedral, a large edifice, in a confined position, and not of much architectural merit, seven older St. Catharine churches, and a Protestant church, the old episcopal palace, now occupied by the school of medicine, the theatre, exchange, with a fine Corinthian colonnade, Palais-de-Justice, and triumphal arch, of the Doric order, forming the gateway of Peyrou. The most important public establishments are the Ecole de Médecine, a medical school of great celebrity (said to have been founded by Arab physicians driven out of Spain), with valuable anatomical collections, and splendid amphitheatre, the botanical garden, an extensive establishment, well kept up, and containing, in an arched recess shaded by cypresses, the remains of St. Stephen, the first martyr, whose early death St. Paul is so impressively described in Young's *Night Thoughts*, the public library the Musée Fabre, a picture-gallery, remarkably rich in works of the best masters, several large and well-managed hospitals, particularly the general hospital and Hotel Dieu St. Eloi, central house of correction, &c. Montpellier is the see of a bishop, and the seat both of a high court, with jurisdiction over departments Hérault, Aveyron, Aude, and Pyrénées-Orientales, and of a court of first resort and commerce. It also possesses a commercial chamber and exchange,

a university, academy, college, diocesan seminary, and secondary ecclesiastical school facilities of medicine and science, special school of pharmacy, agricultural and antiquarian societies, &c. It has manufactures of woollen cloth, woollen covers, muslin, asphalts, verdigris, mineral acids, and other chemical products, cork, liqueurs, perfumes, several cotton-mills, tanneries, sugar-refineries, and numerous distilleries of brandy and spirits. The harbour of Juvenal formed by the Lez, and not a mile distant from the town, gives great facilities for trade: the principal articles of which are wines, brandies, spirits, olive-oil, fruits, leather, wool, copper, verdigris, &c. Pop. (1852) 37,611.

MONTPELLIER (Cont'd) an ancient dist. France, formerly dependent on the province of Lower Languedoc, but, previously, long governed by independent counts. It contained 220 parishes and four abbeys. It now forms part of dep. Hérault.

MONTPELIER, a vil. France, dep. Fay de Dôme, 9 m. N.E. of Lyon. It had a celebrated castle, which was demolished in 1633, and gave the title of duke to the youngest son of Louis Philippe. Pop. 640.

MONTPEZAT several places, France: parishes:—1. A tn. dep. Tarn-et-Garonne, 16 m. E.N.E. Montauban with a handsome church, some hosiery manufactures, and numerous fairs. Pop. 1099. 2. [Latin, *Mons Ponsatus*], A tn. and cum dep. Ardèche, 20 m. N.W. Largentière, in the midst of a volcanic district, a meanly-built, miserable place, with some manufactures of serges, and other woollen stuffs, shawl jackets, and cutlery silk-mills, and a considerable trade in corn, hay and timber. Pop. 2902.

MONTPEZAT, or **TRANCOS**, a vil. 1st Barrois on a plain at the base of a mountain range, about 80 m. S.E. Senlis. Lat. 48° 45' N. lon. 109° 15' E. It stands in a cultivated country ornamented with Chinese villas. It is of large extent, covering an area of about 8 m. long by 1½ m. broad and has a large and industrious population almost all Chinese who work the neighbouring gold-mines.

MONTREAL, a city and river-port British America, cap. of Lower Canada or Canada East, on the S. side of the

lon. 72° 25' W. It is the principal city and second port in Canada, and is favourably situated for intercourse with both provinces, as well as with New York and Boston, being at the head of the ordinary navigation from the Atlantic, and at the foot of the grand chain of canals which connects the great Lakes Ontario, Erie, Huron, and Superior, with the river and the ocean, the obstruction to the navigation of the river caused by the Lake St. Peter a broad shallow part of the St. Lawrence, about 45 m. N.W. from Montreal, having only a depth of 9 ft. to 12 ft., is now in process of being removed. Montreal

MR. PEARCE HARRIS, MONTREAL.—From a drawing by C. Krugger, Montreal.

occupies a low tract of land, about 2 m. wide, between a considerable and very beautiful elevation, called *Royal Mount*, and the river and is divided into the upper and lower town; in the latter the streets are narrow and ill paved, and the houses generally in the French style gloomy-looking having dark iron shutters. The upper town is much more agreeable, here the streets are wide, and the houses well built, large, and commodious, generally of a grayish limestone, and roofed with tin or sheet-iron which glittering in the sun, and combined with the effect of the lofty spires and towers of the town gives to the latter a very imposing appearance when viewed from a distance. The town is well supplied with water and the streets are lighted with gas. The more remarkable public buildings most of which are in the principal street, Rue Notre Dame, are the townhall, the seminary of St. Sulpice, the Hotel Dieu a large hospital for the reception of the sick poor, the convent of Notre Dame, designed for female instruction, the general hospital two convents English and Scotch churches, courthouse, new jail Government-house, Nelson's monument, the Quebec barracks, the new R. Catholic cathedral in the perpendicular style, and esteemed one of the finest buildings in N. America, and the market-house, a magnificent pile, fronting the wharf. The educational means of the city comprises a French college, a university, founded in 1821 with five professors, and open to persons of all religious denominations, a R. Catholic theological school, and several classical and scientific academies. There are also a library and reading-room, a natural history society, a mechanics institute, savings bank, and other useful associations, and the largest banking houses in British N. America have their head offices here, several of which are situated in the Place d'Armes. The harbour which is formed toward the St. Lawrence is secure, and the wharfs, more than 1 m. in extent, are large massive structures of wood, exceedingly convenient for loading or unloading vessels and, by the employment of steam-tugs, the difficulties attendant on the navigation of the St. Lawrence by the rapids, are entirely overcome. In 1852 there entered the port of Montreal 285 ships, ton. 259,901 of which 314 were from Great Britain, 105 were British colonial, and 5 from the U. States. There cleared the same year 521 tons. 259,900, of which 298

16 of Montreal in the St. Lawrence river, here above 5 m. wide, and on the site of the Indian village of Hochelaga, 140 m. S.W. Quebec, 600 m. from the sea; lat. 45° 30' N.,

vessels of 949,776 tons were bound for ports in the United Kingdom. But the amount of shipping affords an imperfect view of the trade of this increasing city, from the circumstance of Quebec angreasing the greater part of the timber trade, and, consequently, having a much greater amount of shipping and, also, from the obstruction of Lake St. Peter, already adverted to, causing a large quantity of goods to be sent to Montreal in lighters. Besides the shipping trade some business in furs is carried on by the Hudson's Bay Company, who have various stations at no great distance from Montreal and there are cut-tron foundries, distilleries, breweries, soap and candle works and manufacturers of hardware, including excellent cutlery, floor-cloth, and carriages, especially beautiful sledges or sledges, as they are more commonly called. Extensive conflagrations are of frequent occurrence, the most recent is that of July 8, 1862, when 1108 houses, of an estimated value of \$284,616, were destroyed. Montreal is connected by railway with New York and Boston, and in autumn 1863 the line to Portland will be opened. A bill has been passed for the formation of a line from Quebec to Montreal and thence to Kingston, Toronto, and Hamilton, where the Great Western railway begins, proceeding through London to Detroit. The climate in summer is hot reaching often 90° in the shade; and the winters are severe, the temperature ranging for weeks from zero to 10° below it. The French language is much spoken. The population consists of French Canadians, English, Scotch, Irish, and Americans, and is estimated at 50,000. The square of Montreal, on which the town is built, is situated at the confluence of the Ottawa with the St. Lawrence, it is 82 m long and about 10 m broad at the widest part, generally level, with exception of the mountain which rises N W of the town, and is watered by numerous small streams. The soil is for the most part fertile, and well cultivated and the climate peculiarly favourable to the growth of apples and pears.

MONTREAL, several places, France, particularly — 1. A town, dep. Aube, 11 m N Carcassonne with an ancient church, containing one of the finest organs in France. Pop. 2173.—2. A town and comm. dep. Gers, 9 m W Omond, on the Auzan with several mills, tile-works, ironworks, and distilleries. Pop. 2727.

MONTREUIL (Latin, *Mons Roubi*), a town in France, dep. Haute-Garonne, at the confluence of the Garonne and Neste. It is clean and well built, and has, in particular a handsome quarter on the Garonne, divided into two parts, which communicate by an elegant marble bridge of six arches. The knitting of stockings, and other worsted articles is carried on and there is a considerable trade in corn, cattle, mules, skins, and timber. Pop. 2648.

MONTREUIL, several places, France, particularly — 1. (near-Mr) (Latin *Montreuilium Ambianorum*) A town, dep. Pas-de-Calais, near bank Canche, 20 m S S E Boulogne, a fortress of the second class. It has a court of first resort, an agricultural society, and communal college a tall, slim boyan church, with towers, and a fine doorway, manufactures of black soap, a salt refinery, paper-mill, breweries, and tanneries and a trade in wine, brandy, groceries, and goods of business, which are largely exported to England. It is a strong fortress as early as the fifth century. In a large circular tower still standing, in the middle, Bertha queen of Philip I, endured a long and harsh captivity, which only terminated with her life. Pop. 8886.—2. (near-Bos or Montreuil-le-Fort) (Latin, *Montreuil*) A town and comm. dep. Seine, near Vincennes, about 7 m from Paris. It is a handsome, cheerful town, interspersed and surrounded by nursery and other gardens, in which great quantities of vegetables and fruit are raised for the Paris market. It has a large and handsome church, apparently of the 12th century, and manufactures of porcelain, and tile-works, and plaster-kilns. Pop. 8886.

MONTREUX, a vil and par Switzerland, can. Val, 40 m. ENE Geneva, N bank Lake of Geneva, and bearing the reputation of being its most sheltered spot, is much recommended to invalids who cannot cross the Alps. The proportion of deaths to the population is said to be the smallest in the world. About 2 m. from Montreux, is the celebrated castle of Chillon. Pop. 2000.

MONTREUIL (Latin, *Mons Treveris*) a town, France, dep. Lot-et-Garon, 17 m S S W Blois, on the Cher, and

surrounded by old walls, flanked with towers, still in good preservation. It has the picturesque ruins of an ancient castle, part of which fell in 1755 and crumbled a church; some trade in wine and wool, and manufactures of serge and leather. Pop. 1200.

MONTROSE a royal and par bar and seaport in par Scotland, co. Forfar. The town stands on a sandy peninsula, and is a large expanse of water, called the Bay, lat. 56° 42' 30" N, lon. 3° 38' 0" W; 70 m. N E Edinburgh, on the railway from Dundee to Aberdeen. The appearance of the town, altogether, is exceedingly pleasing, the streets, which are well paved, and lighted with gas, being, in general, spacious, open, airy and cleanly and the houses substantial and comfortable-looking, and, in some localities, elegant. The public buildings are the town hall two stories high, with a spacious arcade below, and containing a courtroom, newroom, public library, guildhall, and other public rooms, the Inn of the city, said to be the first institution of the kind in the kingdom; the infirmary, house of refuge, the museum, containing a valuable collection in every department of natural history, together with a variety of coins and relics of antiquity, the academy on the E side of the town, and a magnificent chamber, which crosses the S Eak. It has a parochial and two Free churches, two U Presbyterian, an Independent, an English Episcopalian, a Scotch Episcopalian, two Baptist, a Methodist, and a Glanite meeting-house. Montrose has long been celebrated for its educational institutions, the principal of which is the academy where all the more useful and some of the more elegant branches of learning are efficiently taught. There are also two Free Church schools, one for boys and one for girls, about 80 others, public and private, besides several free schools, and two infant schools. There are two principal libraries in the town—one containing 10,000 volumes, the other 3000 volumes also a library belonging to the town grammar-school several well-selected congregational libraries and a neat reading-room belonging to the Bazaar Society. The principal business in Montrose is flax-spinning and weaving. At present (1861), there are five spinning-mills, consuming, together, 6500 tons of flax, and employing 2150 persons. There are also three large flax spinning-mills and two bleaching-works, connected with the town, on the N Eak, which gave employment to 500 work-people. The number of persons engaged in weaving and manufacturing linen is estimated at 1400 the power looms at 130, and the hand looms at 400, together producing 1450 pieces of cloth weekly. Scarce of a superior quality is manufactured to a considerable extent there being three establishments in the town for making that article; also two iron foundries, a corn and flour mill, and a little ship-building is carried on. The harbour of Montrose is one of the best on the E coast of Scotland. It is formed by the entrance of the S Eak into the N Sea, near the S extremity of the Bay which, on a rocky promontory on the S. side of the river, a lofty white beacon is erected. The entrance, though somewhat narrow, is at all times easy, except during E. storms, and is quite accessible to vessels requiring large draughts of water there being 18 ft on the bar at low water of spring-tides. Two light-houses, one 45 ft, the other 55 ft high, were erected, in 1818, on the N E side of the river about 400 yards apart. The lights are visible in clear weather from the distance of 8 m. The quays and wet docks are about 1½ m from the entrance of the river, the latter is capable of accommodating 6000 tons of shipping. In 1851, there entered 47,490 tons of shipping 8463 tons of which were engaged in the foreign trade and there cleared 58,048 tons, of which 13,509 belonged to the foreign trade. The chief imports are flax and hemp, coal, and herring, and the exports—manufactured goods, grain, and cattle. James Graham, Marquis of Montrose, was born in the town in the year 1812. Andrew Melville and his nephew, James Melville, were born within a short distance of it. George Wishart studied and taught here and Sir Alexander Burnes, the traveller was born in the vicinity and studied here. Montrose unites with Arbroath, Brechin, Forfar and Bervie, in returning a member to Parliament. The parish extends, N to S, 8 m and E. to W 2½ m; contains some fine scenery, and is highly cultivated. Pop. of bar, 14,853, of par, 15,831. (Local Correspondent.)

MONTROUGE (Latin, *Mons Rubus*), a town, France, dep. Seine, about 4 m. S W Paris, divided into Grand Montrouge

and Petit Montrouge, the latter of which stretches almost to the Paris Barrière d'Enfer at the old entrance to the catacombs. It is a great holiday resort of the Parisians. P 1838

MONTBECCH, a range of mountains, Spain, Catalonia, prov Lerdia, stretches E. to W about 36 m., and intersected by the river Noguera Pallaresa.

MONTBERRAT, or **MONBERRAT**, one of the British West India Islands, Leeward group, nearly at equal distances (30 m.) from the islands of Navia, Antigua, and Guadeloupe, lat. (N point) 16° 50' N lon. 68° 15' W (a). It is of an oval form, 10 m. to 12 m. long, 7½ m. broad, and 54 m in circumference. Area, 80,000 ac., of which about two thirds are mountains and barres, the remainder is well cultivated about 5000 ac. are appropriated to sugar, 3000 ac. to cotton, 3000 ac. to provisions, and 2000 ac. to pasturage. The N side of the island has an uncultivated appearance, with high mountains, covered with cedar and other useful and valuable trees, but on the W the land slopes down towards the sea, and is clothed with beautiful plantations. The climate is on the whole healthful. The quantities of sugar, rum, and molasses, which form the chief products of the island, exported in 1843 and 1845, were—

	Thrs 37	650	—
	Barrels 864	2,012	—

(cotton, wool, arrow root, and tamarind are also among its exports)

The government of the island is vested in the Governor-in-chief of the Leeward Islands, who is represented by a president, assisted by a council and house of assembly. Plymouth, the capital, is on the S W side of the island, and is a small but neat and well built town, the houses constructed of a fine gray stone. On February 8, 1843, Montserrat sustained considerable damage from an earthquake. Pop. (1844), 7265, of which not more than 150 are white.

MONTU BENCARLA a ta Italy Piedmont, div Alessandria, prov and 10 m. E.N.E. Voghera on the Versa with two churches, and a trade in wine and silk. Pop 3650

MONTU DU GARS a vil and com Italy, Piedmont, div Alessandria, prov and 16 m. E.N. Voghera, on the Versa, near its confluence with the Po, with a church a large and splendid palace, and a trade in excellent wine. P 1963.

MONTUQU, a ta. Spain, lat Majorca, on a height in the centre of a plain completely encircled by other hills, 17 m. E. Palma. It contains a parish church, courthouse prison, and two primary schools, and has several flour-mills, a distillery, and a trade in corn, figs, and fat swine. From the numerous remains of houses and old sepulchres on the adjoining hills, Montuqu appears to have once been of much greater extent and importance than at present. Pop. 1967

MONTZEN a vil and com Belgium, prov and 21 m. N.E. Laige, on the Ourthe, with a limestone quarry, lime-kilns, a fulling, a worsted, and a flour mill. Pop. 1070

MONVILLE, a ta France dep. Seine-Inférieure, at the confluence of the Orne and Cailli 10 m. N. Rouen. It has manufactures of muslin, cotton-mills and some trade in cattle. Pop. 2606.

MONXON, par Eng. Hants, 1141 ac. Pop. 260.

MONY, a ta France, dep. Oise, about 6 m. S.W. Clermont, with manufactures of broad cloth, serge, molasses, and surinase and worsted and fulling mills. Pop. 2283

MONYMUKE, a vil and par Scotland, co. and 18 m. W by N Aberdeen. It has a square, a very ancient Established church, and a small Episcopal chapel. Area of par, 12,600 ac. Pop. 585

MONZA [anc. *Mediolan* or *Mogontia*] a ta. Italy Lombardy gov and 9 m. N.E. Milan, on the railway to Como, and on the Lambro, which divides it into two parts, and is here crossed by three bridges. Its site is somewhat elevated, and its air remarkably pure and healthy. In early times it was surrounded by walls, flanked with bastions, and defended by a castle, but these have almost entirely disappeared, and great improvements have been made by levelling and planting the ramparts. The town is of great antiquity, and has a quiet, venerable air, the houses are, for the most part, substantially and often elegantly built and the

streets are regular, and paved with flints. The most remarkable edifices are the cathedral of St. John Baptist, originally founded in the beginning of the 7th century by the celebrated Lombard queen, Theodelinda, subsequently repaired

THE CATHEDRAL OF MONZA.—From Enns, Lombardy Photom.

and enlarged, and now forming a beautiful structure, surmounted by a lofty spire, adorned by numerous sculptures and paintings, and so rich in various and interesting gifts bestowed by the queen and others, as to be a kind of medieval museum; the church of San Gerardo, recently finished in the form of a rotunda, and several other handsome churches the Broletto or townhall, an Italian Gothic structure attributed to Frederick Barbarossa, and annexed to it a fine campanile, with forked battlements; the palace, in which the vicerey of Milan usually resides in summer situated immediately outside the town, the Barnabite college, diocesan seminary, gymnasium, handsome theatre, penitentiary house of industry, work-house, and hospital. In the town and immediate neighbourhood above 5000 looms are employed in weaving cotton goods of various descriptions, but especially flannels. There are, also, manufactures of hats, leather, bricks, tiles, and muslins, for which the town has long been famous. Under the Romans, Monza made some progress, but did not attain its highest prosperity till the time of the Lombards, who fortified and embellished it, and made it the capital of their kingdom. After their fall it was for a time independent, but afterwards became a dependency of Milan. Pop 18,134.

MONZAMBANO a vil and com Italy Venezia, prov and N.W. Monfalcone, a bank Mincio, with a church and two chapels. The Austrians were here defeated by the French in 1800. Pop. 2739

MONZE CAPE, or **RAS MOANKEE**, a sharply-projecting headland, forming the W extremity of the coast of Selinde, and the E. frontier of Belopontistan lat 24° 51' N; lon. 86° 37' E. (a) It is of moderate height, but is rendered dangerous by the shoals, which extend 3 m. from the shore. On the N.W. of it is the island of Chittory or Churna, with a channel 4 m. wide and 6 to 7 fathoms deep.

MONZIE a vil and par Scotland, co. and 15 m. W Perth; the former, a collection of thatched stone cottages. It has an Established church, and about 1 m. distant is a Free church. Area of par, 60,000 ac. Pop. 1199

MONZINGEN, a vil Rhensish Prussia, gov and 29 m. S. Coblenz, on the Nahe, with a Protestant church, and two mills. Pop 1065

MOONON-PAU, a garrison in Spain, Aragon, prov Huesca, 62 m E. Saragossa, on a hill, crowned by a castle, and washed by the Cinca and Baga. Of its ancient fortifications, there are only some slight remains. It has a town-house, an hospital, four elementary schools, two churches, a military hospital, and a nursery. *F* (agricultural) 2607.

MOODHILL, a tn. Hindoostan, presid. Bengal, prov and 46 m. S.E.W. Duplepur.

MOODKEE, a vil. Punjab, 65 m. S.E. Lahore, where, in November 1849, the first action, or rather series of actions, took place between the Sikhs and the British forces, which terminated in the former being compelled to retreat the Sutlej.

MOOFARAD, a tn. Hindoostan, prov and 40 m. E.N.E. Ajmer; with a mosque, several temples, the largest of which belongs to the Jains, and some good gardens. The Jains, who are numerous, engage a large proportion of the trade, consisting of banking and general traffic.

MOOLA, or **GURDAYA PANA**, Beloochistan, leading, by a strait route, from Kalat to Gush Gundava. It commences near the source of the Mulla, lat. 28° 10' N; lon. 68° 12' E, at the height of 5250 ft., proceeds S.E. for 50 m. near the course of the river, through a succession of deep and rocky gorges, then turns suddenly N.E. and keeps N. for 50 m. to its termination, near Kotree, in Cutch Gundava. In 1889, the Anglo-Indian detachment, under General Willshire, marched through this pass to Seinde, after storming Kalat. The road is better, and the ascent easier, than in the Bolan Pass; water and fuel are abundant, and some supplies may be obtained.

MOOLKIER, a tn. Hindoostan, prov Candahar, on the Mooran, which here forms a cataract, 82 m. E.S.E. Burek. It is in a very dilapidated and almost desolate state, but has ruins of many handsome edifices. The fort, about 1 m. S., crowns a steep and lofty rock.

MOOLOOPETIA, a tn. Hindoostan, on the Carnatic coast, 90 m. N.E. Cape Comorin, famous for its salubrity and hence much resorted to by invalids in March and April.

MOOLTAN, **MOULTAH**, or **MULTAN**, an ancient city Punjab, 154 m. S. Lahore. 1 bank Chenab, from which it is distant about 8 m. lat. 30° 8' N. lon. 71° 28' E. It is upwards of 3 m. in circumference, and is surrounded by a dilapidated wall, and overlooked on the N. by a fortress of some strength. The houses are built of burned brick, have flat roofs, and sometimes rise to a height of 6 stories; their lofty mass giving a gloomy appearance to the narrow streets. The houses are extensive, but are also inconveniently narrow. They are, however, abundantly supplied with articles of traffic, as are also the shops, of which there are between 4000 and 5000. The principal manufactures are silks, cottons, shawls, lozenges, brocades, and tawees, the last four hold up particular estimation. Mooltan has besides, an extensive foreign trade with the countries W. of the Indus, and a large banking business is carried on by its merchants, who are considered extremely wealthy. The fortress already alluded to, built in 1649, on the site of the old city, stands on a mound of earth, and is an irregular figure of six sides, the longest of which, towards the N.W., extends for about 400 yds. It is surrounded by a wall, externally built of burned brick, about 40 ft. high outside, but not more than four or five inside, in consequence of the accumulation of the materials of other buildings, and surmounted by 80 towers. The vicinity is covered with a vast quantity of the ruins of tombs, mosques, and shrines. Many of these have been substantial edifices, and all tend to show the former extent and antiquity of the city. The gardens around are numerous, and well stocked with fruit-trees, as mangoes, oranges, almonds, limes, &c. Its date-groves also yield much fruit, and vegetables are grown in great abundance. Mooltan is one of the most ancient cities in India; it was taken by the Mahometans at the close of the 8th century, again at the commencement of the 11th, and a third time by Tamerlane at the close of the 14th. Lastly it fell into the hands of the Sikhs, from whom it was taken by the British in 1849. Pop. estimated at 50,000.

MOON, or **MUN**, a small ill. Rinde, in the Baltic, in the N. entrance of the Gulf of Riga, and N.E. lat. Oesel, from which it is separated by a narrow channel, greatest length, about 9 m.; breadth, about 6 m. It contains some arable and pasture land, but is almost destitute of trees. A great portion of the inhabitants live by fishing and not a few trust for maintenance to the wrecks cast upon their shores.

MOONDER, or **MOORANA**, a tn. Bundel, 30 m. N.N.W. Sehwan, on the road to Larkhana, of considerable extent, and in a level, fertile, and well-cultivated district.

MOONE, par. and tn. Ire. Kilbarr 7281 ac. *P* 1078.

MOONZIE, par. and tn. Ire. Kilbarr 7281 ac. *P* 1078.

MOOR, a market in Hungary, Thither Danube, co. and 17 m. N.W. Stuhlweisburg is a valley on a small stream of the same name. Many of the houses are handsome, and it contains two castles, two churches, a Capuchin monastery, a county hall and barracks, with a riding-school. It has a considerable trade in corn, horses, and cattle. *P* 7000.

MOORBURG, a vil. Germany belonging to, and 5 m. S. Hamburg, 1 bank Elbe with a church and two mills. *P* 1817.

MOORBY par. Eng. Lincoln 950 ac. *P* 159.

MOORCHURCH, par. Ire. Meath, 5291 ac. *P* 898.

MOORDRECHT, a vil. Holland, prov S. Holland, 11 m. N.E. Rotterdam, on the IJssel. It has three churches and a school, rope spinning, boat building and other employments therewith connected, and a considerable trade in hemp. *P* 5101.

MOORE par. Ire. Roscommon 26,728 ac. *P* 8770.

MOORE POINT, W. Australia, forming the S. extremity of Port Grey, lat. 38° 4' S. lon. 134° 37' 40" E.

MOORFAGAGH par. Ire. Mayo, 1769 ac. *P* 294.

MOORGHUAH a river Afghanistan, rises near Girawan; lat. 35° 27' N. lon. 65° 28' E. flows nearly due W. for about 100 m., when it takes a N. and N.W. direction, and is subsequently lost in the sandy deserts of Khiva, about lat. 38° N. after a course of 370 m.

MOORLEY, a tn. British India, prov Bengal cap. of dist. Jessore, 60 m. N.E. Calcutta lat. 23° 1' N. lon. 89° 15' E.

MOORLING par. Eng. Somerset 9153 ac. *P* 2489.

MOORSELE, a vil. and com. Belgium, prov W. Flanders, 26 m. S. Bruges, 7 bank Hante. Weaving, brewing, and the manufacture of thread, ropes, and oil, are carried on. *P* 4328.

MOORSEL, a vil. and com. Belgium, prov E. Flanders, 18 m. E.S.E. Ghent with a church, two chapels, a castle, a townhall, two distilleries, three breweries, an oil and two flour mills. *P* 2807.

MOORSHEDABAD a city Hindoostan, presid. Bengal, and cap. dist. of same name, 7 bank Bagmati one of the most sacred effluents of the Ganges lat. 24° 11' N. lon. 88° 15' E. The town extends 8 m. along both sides of the

GRANT AT MOORSHEDABAD. — From an Original Drawing by Capt. R. Smith, 40th Regiment.

river. The houses, though many of them are of brick, have a mean and dilapidated appearance. There are several public buildings but with exception of the palace of the Nawab, rather a handsome structure, they are all in a ruinous con-

dition. The houses, though many of them are of brick, have a mean and dilapidated appearance. There are several public buildings but with exception of the palace of the Nawab, rather a handsome structure, they are all in a ruinous con-

dition. There is here a giant, the stage of which are cut in the hard clay and propped with wood and though thus altogether wanting in the sound elegance of these structures, has an interesting appearance, from the picturesque forms of the buildings near it, and from the sombre shade of a venerable banyan-tree, by which it is overhung. Notwithstanding the generally mean aspect of the city, being little more than a vast assemblage of mud and straw huts, without the smallest attempt at order in arrangement, the height of the banks of the river on which it stands, the numerous domes and minarets, with tarred houses, rising from amid the surrounding trees, combine to present some delightful views of Indian scenery. Being a place of great traffic, the river displays a very animated scene, being covered with boats, while the shores on each side are lined with merchant vessels. There are considerable manufactures here of silk and other fabrics. Moorshahad is the seat of one of the six courts of circuit under the Bengal presidency and of a British college founded in 1826. Pop. estimated at 165,000.—The district of Moorshahad has an area of 1856 sq. m. Principal products, silk, rice, and indigo. Pop. 1,045,000.—The district of Moorshahad includes the districts Moorshahad, Bagurhat, Bangura, Rajshahi, Palna, and Beerboom, area, 17,506 sq. m. Pop. 4,816,876.

MOORSELEDE, a vil. and com. Belgium prov. W. Flanders, 13 m. S. by D. Brugue with six breweries, a tobacco and two chocolate factories and several corn and oil mills. P. 6469 **MOORWISTOW**, par. England Cornwall 79.6 ac. Pop. 1094.

MOOSBURG a to. Bavaria, circle Upper Bavaria, r. bank Isar, 29 m. N.E. Munich, ancient but well built with three churches, a town hall, a castle, a foundry and two other hospitals, and a trade in corn and cattle. Pop. 1759.

MOOSE.—1 A river Upper Canada, issuing from Lake Minicou, to the N.E. of Lake Superior and, after an E. course of 800 m., falling with the Abnottinto into James's Bay.—2 A small ill. Bahamas, 20 m. S.E. the Great Bahama.—3 (Azo) A lake, U. States, Maine, 40 m. long, and 10 m. to 16 m. broad, the source of the E. branch of the Kennebec.

MOOSH, a to. Asiatic Turkey. See *Moss*.
MOOTA MOOTA a river Hindoostan, pres. Bengal prov. Arracanah, formed by the junction of the Moota and the Moota, at the town of Poomah. It abounds with the Beemah, one of the main elements of the Kutta, and in this way furnishes a route by which a light canoe might in the rainy season, pass from within 75 m. of the W. coast of India to the Bay of Bengal.

MOQUEGUA or **MOQUEGUA** a prov. Peru cap. same name, W. of the Cordillera lat. 16° 50' to 17° 35' S. fertile towards the sea. It has many large vineyards, which produce great quantities of wine and brandy and abounds in fruits, among which are olive of excellent quality.—The river is situated in a pleasant and fertile valley 1 bank. lat. 17° 25' S., and has a good church, and several convents. P. 10,000.

MORA.—1 Par. Irish. Tipperary, 3623 ac. P. 898.—2 A to. and par. Portugal, 35 m. W. Estremoz, on the Olyvor or Duro. Pop. 905.—3 A river Moravia which rises in circle Otavilla, flows first S.E., then N.E. and, after a course of about 50 m., joins r. bank Oppa, 2 m. above Troppan.

MORA.—1, A vil. Spain, Aragon, prov. and 22 m. S.E. Teruel, with narrow and irregular streets a townhouse, an hospital, a Latin and a primary school, a Gothic collegiate church, and three hermitages. Near it are thermal baths, Pop. (aggregated) 1955.—2 A to. Spain, New Castile, prov. Toledo, 18 m. S.E. Madrid, built of earth, the streets, though broad are for the most part unpaved. It has three squares, used as market-places a townhouse, prison, four elementary schools, a church, and an oratory. Near it are two hermitages, and a castle, which was formerly a state prison Agriculture, export manufactures, 11 oil and 7 flour mills, and 16 manufactures of soap, which is its main export at Madrid, are the chief sources of employment.—The town is in the civil war, in 1821, set fire to the parish church, in which 2000 persons of all ages and both sexes perished. P. 5094.

MORA a to. Central Africa, Sudan, cap. of Mandara, lat. 10° 20' N. lon. 14° 45' E. It stands in a hollow, enclosed by lofty hills, and is a place of considerable importance, though only founded in 1814. The palace of the chief, the principal edifice, is situated at the extremity of a large square.

MORA DE RENO, a to. Spain, Catalonia, prov. and 82 m. W. Tarragona, r. bank Ebro. It has a townhouse and prison, a castle, built by the Carlists on the foundations of an ancient Moorish one; two schools, a church, and six oil and two flour mills. Pop. 8421.

MORAD, or **MORAD**, a river, Asiatic Turkey, the E. head-stream of the Euphrates. It has its source on the N. declivity of the Argat-Dagh mountains, pass. Erzerum lat. 39° 10' N., lon. 45° 40' E. from which, after making a N. bend, it flows W. and N.W. to its junction with the Euphrates, which occurs near Kaban, lat. 39° N. lon. 50° 10' E. total course, 280 m. to 270 m. **MORADABAD** a to. Hindoostan, cap. dist. of the name, prov. and 100 m. N.E. Delhi, lat. 28° 51' N. lon. 78° 48' E. r. bank Yamuna. It is a populous and flourishing town, though mostly built of mud, however, a spacious bazaar or market-place.—The district has between lat. 28 and 30° of N. lat. Its principal produce is sugar, cotton, and wheat.

MORAGY or **MORAZZ**, a vil. Hungary Thaur Denab, co. Tolna, 4 m. from Batszaky, with a church, and a trade in corn, wine, and cattle. Pop. 1468.

MORAL DE CALABRATA, a to. Italian, New Castile, prov. and 17 m. S.E. Ciudad Real, in the skirts of the sierra of San Cristobal, with generally low houses, a church, townhouse, granary, prison, small hospital, three elementary schools; numerous flour-mills, and oil-presses and mills, and manufactures of cloths and bales. Pop. 4120.

MORALLAJA, numerous places, Spain, particularly—1 A to. Extremadura, prov. and 48 m. N.W. Caceres, poorly built once fortified, and still covered by two gates. It has a bull stream, a church, a courthouse, a prison, and primary school. manufactures of soap, and several flour and oil mills. P. 1814.—2, (de Menedo) A to. New Castile, prov. and 13 m. S.W. Madrid, with a church, courthouse, prison, primary school, and a trade in charcoal and wheat. P. 544.—3, (del Vico) A vil. and com. Leon, prov. and about 14 m. from Zamora, with a church, townhouse, prison, primary school, several distilleries, and a trade in wine and brandy. P. 929.

MORALEA, several places, Spain.—1, (de Toru) A to. Leon, prov. and 28 m. E. Zamora, with a church, primary school, hospital, and a trade in corn, wine, and brandy. P. 907.—2, (de Zamora or del Vico) A vil. old com. Leon, prov. and 4 m. S. Zamora, with a church, courthouse, prison, primary school, and a trade in corn and wine. P. 1060.

MORANNES, a to. France dep. Maine-et-Loire, l. bank Sarthe, about 20 m. N.N.E. Angers with a paper-mill. Pop. 1238.

MORANO a to. Naples, prov. Calabria-Citra, dist. and 5 m. W. N. W. Castellibari, with manufactures of silk and woolens. Pop. 8352.

MORAY, a vil. and com. Sarbanen States, div. Alexandria, prov. and 5 m. N.W. Casale, l. bank Po, with three churches, and a trade in corn, rice, and dairy produce. P. 9204.

MORANT.—1, A town S.E. coast, at Jamaica, 20 m. S.E. Kingston, on the bay and at the mouth of river of same name. It has a considerable and increasing trade. Pop. about 7000.—The river has a S. course of 14 m.—The bay is exposed to S. and W. winds, but sheltered from all others.—2, A port or harbour, at Jamaica, about 5 m. E. from the bay. It is a good one, but the road extends to the distance of 1 m. from the shore, on each side of the entrance, and the breadth of the channel between is only a cable's length and a half, lat. 17° 55' N.; lon. 78° 21' W. (a).—3, A point, Jamaica, the extreme E. point of the island; lat. 17° 55' 45' N.; lon. 78° 11' W. (a). In 1843 a cast-iron light-house, made in London was erected on this point. The light is revolving.

MORAY, a lake, Scotland, co. Inverness 16 m. N. Fort William, about 10 m. long and 1 m. to 3 m. broad.

MORARD-DE-CHALANZ, a cape, B. Australia, lat. 36° 35' S. lon. 139° 52' E.

MORAT (German, *Murtel*), a to. Switzerland, can. and 8 m. N.W. Fribourg, E. shore lake of same name. It stands on a steep height, is partly surrounded by old walls, and partly overlooked by an old castle. In 1476, an immense Burgundian host, led by Charles the Bold, was defeated under its walls by comparatively a handful of Swiss, and left 15,000 dead on the field, in addition to the thousands who perished in the lake. Pop. 1650.—The lake (German, *Murtelsee*),

about 5 m. long and 3 m. broad, and 60 fathoms deep, is separated by a narrow strait from the Lake of Neubothal, into which it discharges itself by the Rroya. Steamers ply between Morat and Neubothal.

MORATA, a vil Spain, New Castile, prov and 19 m S E Madrid, on the Tago, with unpaved but level streets, a townhouse, prison, small hospital, house of refuge, granary, two elementary schools, a police, belonging to the count of Alaman, a church, fulling-mill, brandy stillery, two flour-mills, and an oil-mill. Pop. (agricultural), 3485.

MORATA-DE-JALON, a tu Spain, Aragon, prov and 31 m S W Saragosa, r bank Jalon, with a church, a palace, belonging to Count Morata, a townhouse, prison, primary school, an oil and two flour mills and a trade in oil, wine, hemp, flax, and fruit. Pop. 1425.

MORATALLA, a tu Spain, prov and 47 m N W Murvia. It has generally narrow, crooked and irregular but paved streets, two squares, townhouse, and prison, several elementary schools, an hospital, a large and substantial church, and a cemetery, with a hermitage, manufactures of coarse cloths and soap, a fulling mill, three brandy stilleries, and numerous flour and oil mills. Pop. 8080.

MORAU (Klam) a vil Austria, Moravia, circle Troppau, had Treudenthal with manufactures of iron wire, a paper and two tin mills. There are several mines in the vicinity. Pop. 1317.

MORAVIA [German, *Mähren* French, *Moravie*], prov Austrian empire, including the margravate of Moravia, properly so called, and Austrian Silesia. lat. 48° 40' to 50° 23' N. lon. 15° 18' to 19° E. bounded, N by Prussia, N E Galicia, E and S E Hungary, S Hungary and Austria, and W Bohemia, greatest length, E N E. to W S W, 190 m. greatest breadth, 118 m. area, 7973 geo. sq. m., of which 1467 geo. sq. m. belong to Austrian Silesia, forming the N E part of the province, and 6506 geo. sq. m. to the margravate.

Silesia and Moravia Proper though now incorporated, have a very marked nature. In the Sudetes, which stretch between them N W to S E, and form the watershed between the basin of the Vistula and Oder on the N. and that of the Danube on the S. The boundary on the W is formed by a low mountain range, which gradually ascends as it proceeds N. and finally unites with the Sudetes, the boundary on the E is formed by the Carpathian chain and hence Moravia Proper consists of a large basin, surrounded by mountains on the N E and W. and open only on the S, towards a central point to which all its slopes converge, and all its drainage is carried. In physical conformation, it thus bears a considerable resemblance to that of the neighbouring kingdom of Bohemia. With this difference, that the basin of Bohemia is on a much larger scale, and, with its converging slopes, follows an opposite direction. In this respect, Moravia has a considerable advantage, being completely sheltered in the directions from which frosts and storms are most to be feared, and enjoying the full benefit of a S exposure. Its climate accordingly is milder and more genial than that of most European countries under the same latitude. In the immediate neighborhood of the more elevated districts, the cold is occasionally severe, but the average height is not so great as seriously to affect the annual temperature. Few of the sum mits exceed 1000 ft. and only the two culminating points of Schönblick and Glatteberg, both in the circle of Olmitz, approach 1500 ft. Moravia Proper belongs wholly to the basin of the Danube, being drained by the March, which traverses it circuitously N to S. and by its tributaries the Thaya and Iglaue, and other minor streams. Both the Oder and Vistula take their rise in the Sudetes, on the borders of Silesia, and directly or by unimportant tributaries, carry off its whole drainage. In both divisions of the province lakes are numerous, but none of them are, individually, of great extent. The minerals are of considerable importance and include gold, silver, lead, copper, iron, coal, graphite, alum, opopanax, porcelain clay, and marble. The precious metals, however, have ceased to be worked, and even iron and coal are very much neglected. The soil is generally fertile, and all the ordinary cereals, leguminous, and root crops, are raised in abundance. The mode of farming, however, is very defective; and several of the worst rations, which have long been imported from all quarters where the art of agriculture is properly understood, here prevail. Flax & excellent

quality is extensively grown in several districts, and fruit is so abundant that many parts of the country have the appearance of one great orchard but the favourite culture is that of the vine, for which both the soil and exposure of the province seem admirably adapted. It occupies a large extent of surface, and probably would have occupied much more, had not Government begun to fear that it was supplanting more necessary, if not more lucrative crops, and issued an edict limiting the extent to which it will allow it to be carried. The pasture, in general excellent, occupies a large extent of surface, and the rearing of cattle, sheep, and horses is extensively practised, and well understood. The sheep in particular, have been much improved by judicious crossing with the merino, and furnish a wool, to the excellence of which the woollen manufactures of the country owe no small portion of their prosperity. The horses, too, are of a strong, hardy variety bred and are much used, in the Austrian service, for heavy cavalry. Manufactures, however, have made great progress within the present century and in all the great branches of industry, in iron and ironmongery, leather, linen, cotton, and woollen textures, particularly the last, Moravia is inferior to none, and takes precedence of almost all the provinces of the Austrian empire. Other manufactures deserving of notice, are silk, glass, paper, potash, and beet-root sugar. The trade, in most of these articles, is of considerable importance. The means of transport were formerly deficient, the March being the only navigable river; but the addition of railways by which a considerable part of the country has recently been opened up, has already done much, and promises to do still more for its prosperity. The far greater part of the inhabitants are of Slavonian extraction. The proportions have been estimated at two-thirds Slaves, and only one-third German. The language chiefly spoken, and called Moravian, is merely a Slave dialect German, however, is generally understood by all classes. The religion professed is E. Catholic. Elementary education is generally diffused, and numerous gymnasia furnish education of a very superior order. Professional studies are successfully prosecuted at the University of Olmitz. For administrative purposes, Moravia is divided into eight circles, of which six belong to Moravia Proper namely, Brünn, the capital, Olmitz, Hradisch, Iglaue, Prarau, and Zosim and two to Austrian Silesia, namely, Troppau and Teschen. It has both a civil and a military governor and possesses some of the forms of a free constitution in its Assembly of States, whose powers, however, are extremely limited. The total amount of taxation is fixed at Vienna, and all that the States do in regard to it is to fix the proportion of the amount to be paid by each. Pop. Moravia Proper (1842) 1,764,890, Austrian Silesia, 458,833; total (1846) 2,250,594.

MORAVICZA, two towns Austria:—1, Croatia, co. and S.W. Carlsbad, with a Greek church. Pop. 2088.—2, Hungary, Thibaur Thaus co. and 33 m. S. Temesvar; with a E. Catholic church. Pop. 1170.

MORAWA a river Austria. See March.

MORAYSHIRE, a co Scotland See Elgin.

MORAZON, a vil, and com. Austrian Italy, gov. Milan, prov. Como, with a church. Pop. 1230.

MORBEGNO a tu in Austrian Italy, gov. Milan, prov. and 13 m S W Sondrio, on the Berio, near its confluence with I bank Adia. Its site is so unhealthy, that it is said to owe its name to the diseases engendered by the stagnant marshes in its vicinity. It is, however, well built, and has a church, an hospital, manufactures of silk, hats, and refined wax, several silk-mills, and a trade in cheese. P. 8160.

MORBELLO, or **MURZELLO**, a vil. and com. Sardinian States, div. Alessandria, prov. Aquis 4 m. from Ponsone, with a church, a castle, an old tower, a salubrious spring, and a trade in electrical charcoal, and dairy produce. P. 1000.

MORREYA [Moravia, (from *mor* = sea)] a river, Morocco, formed by the junction of several head-streams, that have their sources in Mount Atlas about lat. 28° 30' N., lon. 8° 30' W. The junction of all the head-streams occurs at lat. 28° 30' N., lon. 8° 30' W., from which point the river flows N W., and falls into the Atlantic about 36 m. N E of N Cape Blanco, total course, about 190 m.

MORBIHAN, a machine dep. France, lat. 47° 37' to 48° 15' N. lon. 12° 8' to 14° 48' W. head, N by up Cote-de-Nord, E. Finistère, S. the Bay of Biscay, S. E. dep.

regards edible production, but contains some valuable timber — (*Lang's Cyclopedia*, Martin's *British Colonies*.)

MORETON HAMPTHEAD a market tn. and par England, co. Devon. The town on the verge of Dartmoor forest, 10 m. W. B. W. Exeter, consists chiefly of houses in the cottage style, many of them thatched. It has a spacious ancient church with a lofty tower, several dissenting chapels, a national school, a literary society and a farmers' club. Area of par. 7658 ac. Pop. (agricultural) 1859. — (*Local Correspondent*.)

MORETON-LE-FRANC-MANER, a small market tn. and par England, co. Gloucester the former, 38 m. E. N. E. Gloucester has a church and school. Area of par. 900 ac. Pop. (agricultural), 1812

MORETTA a tn. Italy Piedmont div. Coni, prov. and 8 m. V. Balizzano, r. bank Po. It has two squares three churches, a palace, townhouse, old castle and a trade in corn, wine, cattle, and dairy produce. Pop. 5000

MORETTES, a tn. Brazil, prov. São Paulo on the Nhandiquara, near its mouth, in the Bay of Paranaguá, and to the S. of the mountains of Curitiba, principal trade in Paraguay tea and ram, shipped at the port of Paranaguá.

MOREUIL, a tn. France, dep. Somme, on the Avre, 12 m. S. E. Amiens. It has manufactures of woollen and cotton heavy stocking-loom, paper-mills, and naileries. P. 2319

MOREVIE, a tn. Hindustan, p. m. of Gajner, sep. dist. Muzoo-Kanika, on the Muzoo, lat. 29° 59' N. lon. 70° 55' E. Both the town and district are held by a younger branch of the Gajner, whose ancestors obtained it from the Emperor Akbar, as a reward for surrendering the unfortunate Sultan Mansur of Gajner.

MOREZ (Latin, *Moricum*) a tn. France, dep. Jura, 27 m. S. E. Lons-le-Saulnier, on the Blaine, in a long and narrow gorge, which is scarcely wide enough to admit a street and the two rows of houses which line it. It has several mills, forges, manufactures of clock-work, dials, telescopes, Paris point wire, and numerous taverns. Pop. 2804

MORFASO, a vil. and com. Parma, i. bank Lariano 28 m. S. Piacenza, with a handsome church, and some trade in cattle and timber. Pop. 3599

MORFELDEN, or *MORFELDEN* a vil. Hesse-Darmstadt, prov. Starkenburg, dist. and 8 m. W. W. Langen, with a church and a mill. Pop. 191

MORGANS, par. Irel. Limerick 1215 ac. 1 op. 316.

MORGARTEN, a mountain slope, Switzerland on the confines of cant. Solvay and Zug, 6 m. N. Solvay, near the N. shore of Lake Eggen, and memorable in Swiss annals as the scene of the first victory gained over their Austrian oppressors. A force of 30 000 regular troops, having allowed themselves to be here cooped up so as to render their men hardy, were equally defeated, in an hour and a half, by 1800 mountaineers. A chapel was erected at the time to commemorate the event, and service is annually performed in it on the anniversary of the victory.

MORGES (German *Morres*) a tn. and par. Switzerland, cant. Vaud, on the lake, and 26 m. N. E. Geneva. It has spacious parallel streets, lined with well built houses, a handsome church, an old castle now used as an arsenal, a harbour on the lake, at once spacious and secure, and a considerable transit trade. Behind the town rises the old castle of Willkomm. Pop. (1850), 3941

MORGEZ, a tn. kingd. of Italy, Piedmont div. and 15 m. W. W. Aosta, i. bank Dora Baltea, here crossed by a wooden bridge; with a church, a Capuchin convent, two ancient castles, an elementary school, slate and limestone quarries, and a trade in wine and fruit, particularly nuts. Pop. 1210

MORGOBEJO, a tn. Spain, prov. and 41 m. N. E. Leon, i. bank Cea, with a church, a primary school, and a trade in corn, fax, fruit, and cattle. Pop. 1869

MORGONDA, or *MORGONDA* a vil. Austria, Transylvania, 18 m. from Sibiu, with two churches. P. 1079

MORHAM, par. Scot. Haddington; 1540 ac. P. 349

MORI, a market tn. Austria, Tyrol, about 2 m. from Novaredo, on the Adige, at the confluence of the Comerio with a church, a marble quarry, and a trade in oil, silk, tobacco, wine, and chestnuts. Pop. 4090.

MORIALME, a vil. and com. Belgium prov. and 17 m. S. W. Namur, with important iron-mines, which here supply two blast-furnaces. Pop. 1100

Vols. II.

MORIANA (San Giovanni di) or *MAURIMEN* (St. Jean des), a tn. Ardman States, div. Savoy, cap. prov. of same name, i. bank Arc, near the confluence of the Arve, at the opening of a beautiful valley, 53 m. S. E. Chambéry. It is, in general poorly built, streets steep and narrow, and has a cathedral, an hospital, gymnasium, convent, and fine triumphal arch, and an extensive transit trade. Pop. 8064

MORITZ, a tn. Prussia, bounded, E. by Upper Silesia and the Transilvania, W. Saver Proper, S. W. Prussia, S. France and Silesia, and E. Turin and Tyrol, consists chiefly of a valley, traversed, E. to W., by the Arc, a tributary of the Isère, and hommed in on the N. S., and E. by lofty ranges of the Alps. It rears great numbers of cattle, sheep, and goats, and yields marble, and beautiful rock-crystals. Pop. 63 344

MORITZFELD a vil. Hungary, Thaur Thelau, co. Temeswar, with a R. Catholic church. Pop. 1480

MORINGEN, a tn. Hannover, Hildesheim, gov. and 10 m. N. W. Göttingen entered by three gates. It has a court of justice, and several public offices, two churches, an hospital, and a trade in corn. Pop. 1585

MORKOWITZ, a market tn. Austria, Moravia, circle Hradisch, 12 m. from Wischau, with a church a castle, and a trade in cattle. Pop. 1302

MORLAIX (Latin, *Moricum*) a tn. France, dep. Fini stère, at the confluence of the Jorlen and Kerlon, which uniting their streams as they fall into a small estuary, form a harbour extremely difficult of access, though secure when entered, 34 m. N. E. Brest. It is picturesque situated in a valley so narrow as only to admit the streets, the quays which line it, and two streets, one on each side, compound in part of quaint, antique houses with steep, wooded hills rising behind the one, and gardens, intermingled with rocks and wood behind the other. The principal square is of great extent, and adorned with some fine mansions, but the only public edifices, deserving of notice, are the large and elegant buildings occupying the site of the ancient Hotel de Ville, and containing the municipal offices and law courts, the town and sea walls, and the churches of St. Matthew and St. Martin.

The manufactures are linen, silk, cordage, and especially tobacco for which the Government has a splendid factory, in which from 800 to 400 persons are employed. The trade is in butter, corn, oil, seeds, tallow, honey, wax, leather, oases, skins, sheep, horses, linen, thread, bleached and raw paper, flax, hemp, wine, and brandy. Pop. 8961

MORLAND par. Eng. Westmorland, 15,380 ac. P. 1943

MORLANWELZ a vil. and com. Belgium, prov. Namur, 16 m. E. Mores with manufactures of woollen stuffs, linen ties, black soap, oil and lime. Near it are rich coal pits. Pop. 1995

MORLEY, three pars. Eng. — 1 Derby, 8513 ac. Pop. 1090 — 2, St. Botolph Norfolk, 760 ac. Pop. 291 — 3, (St. Peter) Norfolk, 950 ac. Pop. 147

MORLEY a vil. England, co. York, W. Riding 4 m. S. W. Leeds on the railway to Huddersfield. It has a church several dissenting chapels, four schools, and a mechanics institution. The staple trade is the manufacture of cloth in which most of the inhabitants are employed. Pop. 4321

MORMANN, a tn. Naples, prov. Calabria-Città, dist. and 18 m. N. W. Catanzaro. Pop. 6800

MORMENTZEL, a hill, Austria, Transylvania, in the narrow pass of Bocca, on the Great Sannos, above which it rises about 1800 ft. In 1846, an immense mass dipped from this hill into the river here about 800 ft. broad, and, chok ing it up, laid the valley of the Sannos above under water.

MORMOIRON (Latin, *Mormiron*) a tn. France, dep. Vaucluse, 7 m. E. Carpentras, r. bank Arasse with manufactures of sulphate of iron, and coal-mines. Pop. 1648

MORNESE a vil. and com. Italy, Piedmont, div. Genoa, prov. and 5 m. from Novi, with a church, an ancient castle in a very elevated site, and a trade in wine. Pop. 1102

MORNICO, a vil. and com. Italy Lombardy gov. Milan prov. Bergamo near i. bank Chiese with two palaces, and several churches. Pop. 1992

MORNING-TWAZER, par. Eng. Norfolk 1001 ac. P. 140

MORNINGSIDE, a vil. Scotland, about 1 m. S. W. Edinburgh, of which it may almost be considered a suburb. It contains many handsome villas, an established extensive, and a Free church, and two schools, and is remarkable for the mildness and salubrity of its air. Near it is the Royal

St.

Edinburgh Lunatic Asylum, and the nursery of St. Margaret.
Pop. 1785.

MORNINGTON a vil Ireland, co. Meath, on the Boyne, 8 m. N E Drogheda. It gave the title of Earl to the father of the Duke of Wellington. Pop. 138.

MORNINGTON ISLAND, N Australia, Gulf of Carpentaria lat. (N part) 16° 24' S., lon. 139° 27' E. (n.) about 30 m. long N E. to S W. and 10 m. broad, rocky, with some patches of vegetable soil, producing bush and trees. It is inhabited.

MOROCCO, an empire and city, Africa. See MAROCCO. **MORON**, or **MORON DELA-FRONTERA**, a tn. Spain, Andalucía, prov. and 22 m. N E. Seville, near the Guadaira. The houses vary much in height, and the streets are, some of them, regular, spacious, dry, and elevated, while others are narrow, irregular, low and damp. In the principal square stands the small townhouse. It has also a prison, granary, eight primary schools, a Latin grammar-school, three hospitals, a fine church, with three naves and several convents and nurseries. On a hill E. of the town are the ruins of the ancient castle, for several centuries one of the most important strongholds in Spain. It was blown up by the French in 1812. Agriculture is the prevailing occupation, but there are also four manufactures of hair, one of soft soap, several of linen and cyprusine fire potteries, numerous flour and oil mills, and a few looms for linen. Moron has been long the head-quarters of gangs of robbers, who have infested this part of Spain. Pop. 10,192.

MOROS, a vil and com. Spain, Aragon, prov. and about 60 m. from Saragossa, with a church, townhouse, hospital, primary school, two four-mills, four distilleries, and a trade in wine. Pop. 1125.

MOROZZO, a tn Italy, in the val di Comi prov. and about 7 m. from Monza, 1 bank Bioglio, here crossed by a wooden bridge, with two churches, a palace, a monastery, and a trade in corn, silk and dairy produce. Pop. 1600.

MORPETH, a par. bor., market tn. and par. England, co. Northumberland. The town is situated in the midst of a fertile and highly cultivated district, 14 m. N by W New castle, on the railway to Berwick. It has two principal streets, paved, and lighted with gas, a townhall on elegant bridge of three arches over the Wansbeck, at the E. end of the town, a prison and courthouse, an old market-cross, a fine old parish church in the decorated English style, at a short distance from the town, a handsome chapel of ease, several dissenting places of worship, and a R. Catholic chapel, a grammar and several other schools, a mechanics institute, a dispensary. The woollen manufacture, and tanning, are carried on to some extent, especially the latter. Dr. Morrison, the Chinese scholar and missionary, was a native of Morpeth, and it also gives the title of Viscount to the family of Howard. The borough returns a member to Parliament. Registered electors (1851) 415. Pop. 10,013. Area of par., 6177 ac. Pop. 5020. (Local Correspondent.)

MORPETH, a tn. and river-port, New S. Wales co. Northumberland, at the head of the navigable part of the Hunter River 78 m. N E. Sydney. It has an Episcopalian church, a Wesleyan chapel, several schools, a steam flour-mill, a soap and candle manufactory. Steamers and sailing vessels constantly ply between this place and Sydney.

MORRA a tn. Italy, Piedmont, div. Comi, prov. and 6 m. S W. Alba, on a hill, above r. bank Tanaro. It has a handsome church, two monasteries, a townhouse, hospital, public school, and a trade in wine, cattle, and chestnuts. Pop. 3600.

MORRA a tn. in Naples, prov. Principato-Ultra, dist. and 3 m. N E. St. Angelo de Lombardi, with two annual fairs. Pop. 3500.

MORRISTOWN, a vil, U. States, New Jersey, 27 m. W. New York, on a plateau which commands an extensive view. It has a central public square, a courthouse, with a jail; a bank, four churches, and an academy, paper, grist, and all mills, iron-works, and several weaving factories. P. 5000.

MORRISTOWNBILLER, par. Ireland, Kilmore, 9672 ac. Pop. 1233.

MORRO DE-SO PAULO, a vil Brazil, at the foot of a promontory on the N. extremity of the Isl. of Tinian, S. of Bay of All Saints, prov. and 60 m. S W. Bahia. It is defended by a battery, and contains a church and a primary

school. The promontory, crowned by a cask of cannon, is a conspicuous object at a great distance, and is an important trade landmark.

MORRO-GRAVO, a vil and par. Brazil, prov. Minas-Geraes, 15 m. S E. Chibata, with one of the most beautiful churches in the province, inhabitants almost all miners or labourers. Pop. 5000.

MORRO-GRAVO, a mountain range, Brazil, which after forming part of the boundary between provs. Goyas and Minas-Geraes, enters the latter, becomes the base of the chain known by the name of Pyrenees, stretches W. till near Matagorda, and then turns S E. W. It here forms the watershed between the waters of the N. and S., and gives rise to some of the great rivers of Brazil. It is almost everywhere covered with forests, and, from May to September is enveloped in mists.

MORRONE a tn. Naples, prov. Sanio, 10 m. S W. Lerno, with an annual fair of eight days. Pop. 2500.

MÜRS, a tn. Rhenish Prussia. See MATHIS.

MOES, an Isl. Denmark, prov. Jutland, in the Limfjord, cap. Nykjøbing. In the centre it rises to a height of 383 ft., and, with exception of a few sandy and stony tracts, where heath is the only vegetation, it is all fertile, but almost destitute of wood. It makes some figure in the early history of Denmark, particularly in the war between Harold Blaaud and the emperor Otto II., in 975. Area, 104 geo. sq. m. Pop. 13,500.

MORSEBURG, a tn. Baden, See MENSINGEN.

MORSCH a vil. Baden, circle Middle Rhine bail Ealingen with a church. Pop. 1209.

MORSHANK or **MORSHANK** a tn. Essex gov. and 60 m. N. Tambor cap. dist. r. bank Tame. It contains one stone and two wooden churches; has manufactures of mill-cloth, a vitrol work, several tallow melting establishments, paper falling and sawmills, and a considerable trade in corn, honey and cattle. P. (1851) 10,683.—The new yields good crops almost without manure, has rich pastures and more wood, both for timber and fuel, than its own consumption requires. Area, 1430 geo. sq. m. Pop. 104,681.

MOLSTON par. Eng. Norfolk, 3295 ac. Pop. 149.

MORTAGNE, several places, France, particularly — 1. (*see-Elaine*), (Latin, *Mortuorum*), a tn. dep. Orne, 22 m. E. N. E. Alençon, in a commanding position on the top and E. slope of a hill. The principal square, on the top of the hill, is surrounded by a series of steep steps, but most of the other streets are either horizontal, or have only a gentle declivity, and are lined with good houses. The chief public edifices are the church, *palais-de-justice*, extensive well-stored prisons, and several fountains, supplied with water by a steam-engine, which sends it up from the valley. The staple manufacture is linen, both strong and slight, intended for export to the colonies, and for wrappers, and it has other manufactures of denture and leather, and a trade in linen, grain, hemp, sheep swine, horses, and cattle. P. 4892.—2. (*see-Elaine*), A tn. and com., dep. Vendée, 25 m. N E. Bourdeaux. Vendée supposed by some to be the Roman Segora. It is situated on a series of slopes, washed by the Bédouze, and has uneven, narrow, badly paved streets, and ill built houses, standing amid heaps of ruins, the effect of the fearful devastation inflicted on the town by the war of La Vendée. It has manufactures of linen, paper, and leather, and a trade in linen, leather, horse, and sheep. Pop. 1690.

MORTAGOA a tn. and par. Portugal, prov. Beira-Alta, 20 m. N N E. Coimbra. Pop. 840.

MORTAIN (Latin, *Mortuorum*), a tn. France, dep. Manche, 84 m. S. S. W. St. Lo, on the Canche. It is a decayed lifeless town. Near it are the finest, and almost only cascades in Normandy. Pop. 1614.

MORTARA, a tn. Italy, Fishport, div. and 34 m. S E. E. Novara, cap. prov. Mortara or Lovellina, on a height above r. bank Arrogna, here crossed by a bridge. It is walled has a court of law and several public offices, three churches, a theatre, several primary schools, an hospital, and a trade in rice, corn, and silk. Pop. 5816.

MORTEK, or **MORVENA**, an Isl. Austria in the Adriatic, off the coast of Dalmatia, north about 25 S. E. Zara. It is about 6 m. long, and nearly 2 m. broad; contains a parish church, and has some trade in wine and oil. Pop. 1100.—On it is a vil. of same name, supposed to occupy the site of the ancient Colchester.

MORTES (Rio das), two rivers, Brazil.—1. A river, which rises in prov. Minas-Geraes, among the mountains E. of Barbacena, flows W., is crossed by the road from Rio-de-Janeiro to Ouro-Prato, at some distance below receives the Mortes Pequena, on its left, and joins a bank Grande, near the small village and port of Moeda, after a course of 180 m.—2. A river, which rises in prov. Mato-Grosso, on the W. slope of serra Calapo, flows first N.W. then E. receiving a number of small rivers, the largest of which are the Roncador, and the two outlets of Lagoa-Grande and, after a navigable course of about 400 m. joins the arm of the Araguaia, which flows to the W. of the isl. of Bensaul or Santa Anna, in lat. 12° S.

MORTHOE, par Eng Devon 4621 ac. Pop 387

MORZINE, a vil. and com. France dep. Haute Savoie, prov. Chablais, 12 m S.E. Le Blot, on the Dranse, here crossed by a stone bridge with a church a public school and quarries of roofing slate. Pop 2070

MORALESE, a tn. Russia. See MAMALAK

MOMAMBUQUE, or **MOAMBUQUE**, an Isl. and city E. coast Africa, lat. 18° 12' S lon 40° 49' E, and the metropolis of the Portuguese possessions in that quarter. The harbour to which this place owes all its importance, is an inlet of the sea in the mainland, 5 m. deep and 5½ m. wide. Three small rivers flow into it at its head, while across its entrance

extend three small islands, which, with reefs and shoals, break the swell of the ocean, and render the anchorage within perfectly safe in the worst weather. On the middle island, which is about 1½ m. long N.E. to S.W. and hardly ½ m. wide, stands the city. The other two islands St. George on the N., St. Jago on the E., are both uninhabited. All three are low coral banks covered with sand. The uninhabited islets are clothed with trees and verdure, while the sandy area of Moambique, in the middle, is entirely covered with the city and its defences. When Vasco da Gama touched here on his first voyage to India, he found the place in the possession of the Arabs and that it had been long distinguished as an excellent boat harbour may be inferred from its native name, which is properly Moambicoe the plural of Mambico, a boat or canoe. Within two years from that time it was taken by the Portuguese, who then at the height of their fame and power, announced vigorously the erection of their E. African capital. The fort of St. Sebastian at the N. end of the island, however was not built till the beginning of the 18th century. It is a great work, mounting 80 guns, and although, at the present day neglected and in disorder, it is still strong. At the other end of the island is fort St. Lorenzo. The governor's palace is a very large and regular edifice, the custom house, the churches, ten in number, besides five chapels, and the quays and wharfs, are all constructed in a style of solidity and grandeur far beyond the present importance of the place.

The streets are narrow, but the houses are lofty and well built, with flat roofs made to hold the rain-water as the water drawn from the wells in the island is brackish. But, notwithstanding the solidity of its structures, Moambique is now sinking rapidly into decay. Its trade and political importance are gone, and it has nothing to expiate but poverty and desolation. The city covers about half of the island, on the remainder are huddled together the huts of the free coloured people. This black town is a busy place, being all a retail market. good meat is hardly procurable at any price. Of the 6000 inhabitants of this island, not quite 400 are free. Of these about 30 are Portuguese, the remainder being Canzombos (Portuguese Crochets from Goa), Arabs, Banyans, and blacks. There is but little morality in Moambique. The slave-dealing so long carried on here, the liberal and restrictive commercial policy, which gives rise to a system of smuggling, and various other causes, have produced an unusual depravity of manners. The deadly nature of the climate, perhaps, is not without its influence in inducing men to make the most of the present by abandoning themselves to the unscrupulous love of gain and unbridled dissipation. The chief merchants in the island are Banyans, through whose hands passes all the trade with the interior. As the island of Moambique is quite incapable of producing anything for the support of its inhabitants, these procure the requisite supply of cattle, grain, &c., from Madagascar or the Comore Islands. Fresh vegetables and fruit are obtained from the adjacent mainland. The peninsula on the N. side of the bay belongs to the Portuguese. On the isthmus which joins it to the continent, at the head of the bay stands the village of Meneur, where the trade is carried on with the natives, who come down from the interior at certain seasons, bringing ivory, skins, wax &c. nearer to the island is Cabeceira Grande where the Portuguese officers and merchants have their villas and gardens, and, at the end of the peninsula, the village of Cabeceira Pequena receives the Arab and other Mahometan inhabitants of the place. The Banyans reside at Lumbo a village between the latter two. But the Portuguese dominion does not extend beyond this narrow territory, and even the safety of Moambique—the metropolis of the capiteiny-general of E. Africa—has been threatened more than once by the petty chiefs in the neighbourhood—Mithane at the N.W., and Samulo at the E. side of the bay.

Moambique is the seat of a bishopric, subordinate to Goa, but religion is little thought of in the place, and the conversion of the natives is not even attempted. The clergy are chiefly Canzombos. Until 1759, the governor of Moambique was subordinate to the viceroy of India, but in that year the Captain-general of E. Africa was stripped from India, and placed immediately under the crown. The territories really embraced under this high-sounding title were scarce great and, at the present day, next to nothing. The Portuguese claim of possession in E. Africa extends at

present, from the Bay of Loango Marques (Delagoa Bay) is lat. 30° S. to Namuli or the Brooks, about 40 m. S. of Cape Delgado. At Namuli there is an Arab fort, bearing the flag of the sultan of Muskat. The settlements on this long line of coast are at Delagoa Bay, Inhambana, Sofala, Quilmanas, and Moimbeque. The factory in Delagoa Bay is on a small scale, and does not contain, perhaps, six Europeans. In none of these settlements is there any actual occupation of territory beyond the protection of the fort. Besides these the settlements on the river Zambezi, extending up about 500 m. (according to Portuguese estimates, 700 m. or over 1500 m.), and comprised under the title of Ilhas de Sena, are nominally included in the government of Moimbeque. These settlements are Sena, about 100 m. W of Quilmanas (150 m. by the river); Teté, 180 m. higher up to the N W; Zumbo, 150 m. still further up the river; and Malilica, the source of the gold, probably 250 m. S.W. by W of Teté. But, in reality there have never been any settlements at the latter two places, but only occasional campments, where the trade with the natives has been carried on through native agents. At all events, it is understood that, since 1885, the Portuguese have abandoned all claim upon, and ceased to resort to, Zumbo and Malilica. Sena, once an important place, has now hardly 100 inhabitants, among whom there are not, perhaps, six Europeans. Teté, though not so completely fallen is but a poor place, and is constantly threatened with the hostility of the natives. The growing power of the sultan of Muskat, residing at Zanzibar and the commercial activity fostered within his rule, and also the advance of the emigrants from the Cape Colony to Malilica (it is said that some have even reached the Zambezi), have contributed to divert the native trade from its old channels and the Portuguese settlements. Ivory is the staple production of these countries, and about 350 000 lbs. weight of it are exported from Moimbeque annually, chiefly to India. Color ore, and minerals, are also collected along the coasts. The coffee of Sena is said to be excellent, but is little known in commerce. The gold-trade of Sofala is now reduced to a trifling quantity.

(F. A. de Meyer, *Contemporary Africa as Presented by Portuguese*, 1889, 1890, 1891, 1892, 1893, 1894, 1895, 1896, 1897, 1898, 1899, 1900, 1901, 1902, 1903, 1904, 1905, 1906, 1907, 1908, 1909, 1910, 1911, 3166, 3167, 3168, 3169, 3170, 3171, 3172, 3173, 3174, 3175, 3176, 3177, 3178, 3179, 3180, 3181, 3182, 3183, 3184, 3185, 3186, 3187, 3188, 3189, 3190, 3191, 3192, 3193, 3194, 3195, 3196, 3197, 3198, 3199, 3200, 3201, 3202, 3203, 3204, 3205, 3206, 3207, 3208, 3209, 3210, 3211, 3212, 3213, 3214, 3215, 3216, 3217, 3218, 3219, 3220, 3221, 3222, 3223, 3224, 3225, 3226, 3227, 3228, 3229, 3230, 3231, 3232, 3233, 3234, 3235, 3236, 3237, 3238, 3239, 3240, 3241, 3242, 3243, 3244, 3245, 3246, 3247, 3248, 3249, 3250, 3251, 3252, 3253, 3254, 3255, 3256, 3257, 3258, 3259, 3260, 3261, 3262, 3263, 3264, 3265, 3266, 3267, 3268, 3269, 3270, 3271, 3272, 3273, 3274, 3275, 3276, 3277, 3278, 3279, 3280, 3281, 3282, 3283, 3284, 3285, 3286, 3287, 3288, 3289, 3290, 3291, 3292, 3293, 3294, 3295, 3296, 3297, 3298, 3299, 3300, 3301, 3302, 3303, 3304, 3305, 3306, 3307, 3308, 3309, 3310, 3311, 3312, 3313, 3314, 3315, 3316, 3317, 3318, 3319, 3320, 3321, 3322, 3323, 3324, 3325, 3326, 3327, 3328, 3329, 3330, 3331, 3332, 3333, 3334, 3335, 3336, 3337, 3338, 3339, 3340, 3341, 3342, 3343, 3344, 3345, 3346, 3347, 3348, 3349, 3350, 3351, 3352, 3353, 3354, 3355, 3356, 3357, 3358, 3359, 3360, 3361, 3362, 3363, 3364, 3365, 3366, 3367, 3368, 3369, 3370, 3371, 3372, 3373, 3374, 3375, 3376, 3377, 3378, 3379, 3380, 3381, 3382, 3383, 3384, 3385, 3386, 3387, 3388, 3389, 3390, 3391, 3392, 3393, 3394, 3395, 3396, 3397, 3398, 3399, 3400, 3401, 3402, 3403, 3404, 3405, 3406, 3407, 3408, 3409, 3410, 3411, 3412, 3413, 3414, 3415, 3416, 3417, 3418, 3419, 3420, 3421, 3422, 3423, 3424, 3425, 3426, 3427, 3428, 3429, 3430, 3431, 3432, 3433, 3434, 3435, 3436, 3437, 3438, 3439, 3440, 3441, 3442, 3443, 3444, 3445, 3446, 3447, 3448, 3449, 3450, 3451, 3452, 3453, 3454, 3455, 3456, 3457, 3458, 3459, 3460, 3461, 3462, 3463, 3464, 3465, 3466, 3467, 3468, 3469, 3470, 3471, 3472, 3473, 3474, 3475, 3476, 3477, 3478, 3479, 3480, 3481, 3482, 3483, 3484, 3485, 3486, 3487, 3488, 3489, 3490, 3491, 3492, 3493, 3494, 3495, 3496, 3497, 3498, 3499, 3500, 3501, 3502, 3503, 3504, 3505, 3506, 3507, 3508, 3509, 3510, 3511, 3512, 3513, 3514, 3515, 3516, 3517, 3518, 3519, 3520, 3521, 3522, 3523, 3524, 3525, 3526, 3527, 3528, 3529, 3530, 3531, 3532, 3533, 3534, 3535, 3536, 3537, 3538, 3539, 3540, 3541, 3542, 3543, 3544, 3545, 3546, 3547, 3548, 3549, 3550, 3551, 3552, 3553, 3554, 3555, 3556, 3557, 3558, 3559, 3560, 3561, 3562, 3563, 3564, 3565, 3566, 3567, 3568, 3569, 3570, 3571, 3572, 3573, 3574, 3575, 3576, 3577, 3578, 3579, 3580, 3581, 3582, 3583, 3584, 3585, 3586, 3587, 3588, 3589, 3590, 3591, 3592, 3593, 3594, 3595, 3596, 3597, 3598, 3599, 3600, 3601, 3602, 3603, 3604, 3605, 3606, 3607, 3608, 3609, 3610, 3611, 3612, 3613, 3614, 3615, 3616, 3617, 3618, 3619, 3620, 3621, 3622, 3623, 3624, 3625, 3626, 3627, 3628, 3629, 3630, 3631, 3632, 3633, 3634, 3635, 3636, 3637, 3638, 3639, 3640, 3641, 3642, 3643, 3644, 3645, 3646, 3647, 3648, 3649, 3650, 3651, 3652, 3653, 3654, 3655, 3656, 3657, 3658, 3659, 3660, 3661, 3662, 3663, 3664, 3665, 3666, 3667, 3668, 3669, 3670, 3671, 3672, 3673, 3674, 3675, 3676, 3677, 3678, 3679, 3680, 3681, 3682, 3683, 3684, 3685, 3686, 3687, 3688, 3689, 3690, 3691, 3692, 3693, 3694, 3695, 3696, 3697, 3698, 3699, 3700, 3701, 3702, 3703, 3704, 3705, 3706, 3707, 3708, 3709, 3710, 3711, 3712, 3713, 3714, 3715, 3716, 3717, 3718, 3719, 3720, 3721, 3722, 3723, 3724, 3725, 3726, 3727, 3728, 3729, 3730, 3731, 3732, 3733, 3734, 3735, 3736, 3737, 3738, 3739, 3740, 3741, 3742, 3743, 3744, 3745, 3746, 3747, 3748, 3749, 3750, 3751, 3752, 3753, 3754, 3755, 3756, 3757, 3758, 3759, 3760, 3761, 3762, 3763, 3764, 3765, 3766, 3767, 3768, 3769, 3770, 3771, 3772, 3773, 3774, 3775, 3776, 3777, 3778, 3779, 3780, 3781, 3782, 3783, 3784, 3785, 3786, 3787, 3788, 3789, 3790, 3791, 3792, 3793, 3794, 3795, 3796, 3797, 3798, 3799, 3800, 3801, 3802, 3803, 3804, 3805, 3806, 3807, 3808, 3809, 3810, 3811, 3812, 3813, 3814, 3815, 3816, 3817, 3818, 3819, 3820, 3821, 3822, 3823, 3824, 38

of defense. The enclosed space, forming the nominal site of the city, though a considerable portion of it is unoccupied by buildings, has an uneven, undulating surface and is traversed by the navigable Moskva, which, entering near the middle of the W side of the wall, makes a series of remarkable serpentine windings, and quits it at the S.E. corner. Within the city the Moskva receives a small tributary called the Jaozsa, which joins it from the N.E. The most remarkable prominence within the enclosed space, is the hill of the Kremlin, which is situated near its centre, and rises suddenly up from the N or E bank of the river. It is nearly of a triangular shape, and surrounded by an immense white wall 90 ft. high, and about 1 m. in circuit. This wall is flanked by embattled towers, and given access, by several gates, to the interior which formed the original nucleus of the city and is still the site of its most important and characteristic edifices. The part not built upon is occupied by well-kept-out gardens. Immediately to the E of the Kremlin is the second quarter the Kitai Gorod, or Chinese city, fenced round by a wall which is flanked with towers and buttresses. Around the Kremlin, as centre, two large circles have been drawn—the inner one, with a radius of 7 m., and the outer with a radius of 14 m. in length. The circumference of each circle consists of a wide belt of finely-planted boulevard. The inner circle stops short at the N bank of the river. The outer circle is completed proceeding across the river, and enclosing a considerable space on the S. bank. The zone enclosed between the Kremlin and the Kitai Gorod, and the inner boulevard, is called the quarter of the Beloi Gorod or White City, while the other zone, included between the two boulevards so far as it lies N. of the river, is called the quarter of the Zmosnoi Gorod. All the enclosed space beyond the four quarters now described, whether situated on the N or the S bank of the Moskva, is regarded as suburbs. Those in the former direction are formed into regular streets which extend to the very barrier, but in the latter direction the streets are mostly confined within the outer boulevard. The strange irregularity with which Moscow is built, is one of the first things which force itself on the notice of the visitor. This might have been expected to be remedied by the great conflagration of 1812, but though the incongruities are certainly fewer than they were, enough still remains to give the city its old characteristic features. The streets in general continue uneven and tortuous, numerous paltry lanes open all at once into magnificent squares and long rows of little yellow wooden houses abut on vast colossal structures. In order to describe the principal edifices, we must again return to the

crowded with numerous epulas of glittering gold and silver, and presenting one of the most striking views of which any European city can boast. Entering by the Spass Vorota, or Gate of the Redeemer, over which is a picture of our Saviour, the object of the deepest reverence, and through which, in consequence, none must pass without being uncovered, we are at once introduced to the most interesting and important buildings of Moscow. The first we notice is the Terema or old palace of the Cæsar, it consists of four stories, which diminish in ascending till the uppermost contains only a single room, and is surrounded by balconies, with stairs both within and without, leading to each separate terrace; the lowest floor contains the throne and audience chambers; the highest was the residence of the Cæsar and their children. The walls are richly and almost grotesquely decorated, and covered with portraits of the Cæsar, ancestral breakings, &c. The main body of this palace was so much injured by the French, that repair was impossible, and its place has been supplied by the Bolshoi Dvorets or Large Palace, built by the Emperor Alexander and sometimes called after him, the Alexanderski Dvorets, an immense pile and not without an imposing effect, but its modern style and decorations are in bad keeping with the venerable structures with which it is associated. The same may be said of the Maloi Dvorets or Little Palace, built by the Emperor Nicholas, containing some interesting pictures by Bernardo Belotto de Canaletto, and a collection of all the works that have been written concerning Moscow in French, Russian, and German. The Baburoi Ploshchad, or Cathedral Square, situated on the summit of the Kremlin and enclosed within a magnificent iron railing, contains the Uspenski Sakral or Cathedral of the Assumption, and two churches—the Arkangel'ski Sakral or Church of St. Michael and the Lady of the Cave. The cathedral in which the emperors are crowned bears no resemblance, either without or within, to the cathedrals of W. Europe. It is a clumsy building with heavy pillars which support five apses, and like the walls glittering with gold from top to bottom, the golden ground covered over with grotesque frescoes of sacred subjects, it was founded in 1226 and rebuilt in 1472. Immediately behind the cathedral is the Bykofski Dom or House of the Holy Byrod, so called because a section of the Byrod has its office in it, and contains the Mir or Holy Oil, which is used in the baptism of all Russian children, and is prepared at intervals of about two years with many mysterious and fantastic ceremonies in two large silver kettles. A much more valuable treasure of the Holy Byrod is a library, remarkably rich in rare manuscripts. The church of

St. Michael is a sombre building lighted by windows so diminutive, as to do little more than make darkness visible. Almost all the Russian sovereigns, from Ivan Danilovitch, down to Peter the Great, are buried here; their figures, natural size, are painted in fresco round the walls each over against his own tomb, where he sits wrapped in a white mantle. Immediately adjoining is an odd looking church, with walls of immense thickness, said to be the oldest in Moscow, and constantly

MOSCOW. THE GENERAL VIEW OF THE KREMLIN.—From David R. Falconer's *Planchette et Archéologique en Russie*

Kremlin, previously stopping to view it from the most favourable spot—the S. side of the bridge Moskva Raksa. Here it seems to rise out of the water, picturesquely adorned with turf and shrubs; while above its snowy wall and verdant foliage palaces and churches rear their majestic heads

plunged with devotees. The church of the Assumption is paved with fine pebbles of Jasper agate, and surmounted. Within the Kremlin also, is an immense pile of building, lining the sides of a triangle, one side being occupied by the senate, which contains the offices of the various local de-

parapets, and the other two by the treasury and arsenal. The chief attraction here is the upper story of the treasury containing the crowns of the early Cæsars, arranged in regular succession; several thrones, warlike trophies, and miscellaneous curiosities. The arsenal contains 100,000 stands of arms, the cannon taken from the French during their disastrous retreat, and numerous other military trophies. Nearly in the centre of the buildings of the Kremlin, now described, and far overtopping them all is the famous Ivan Veliki, or tower of John the Great, which rises without ornament of any kind, to the height of 209 ft., and is surrounded by a gilded dome, on which, as on the other gilded domes of the Kremlin, the cross is displayed above the crescent. It is ascended by a good staircase, and empty rewards the toil of ascent by the magnificent view which it commands. It consists of several stories, in each of which hangs a stupendous bell one of them weighing 64 tons. Another bell, nearly tripling this enormous weight, called *Our Kolokol* or the Master's, stands at the bottom of the tower on a pedestal of granite, to which it was raised in 1837, by the Emperor Nicholas, after having remained for a century buried on the spot into which it is said to have fallen when the tower, in which it was suspended, was burned down. A huge fragment was broken from it by the fall. Its height is 213 ft., diameter 22.5 ft., and least thickness 5 inches. Immediately to the E. of the Kremlin, within its walls and those of the Kitai-Gorod, stands, in the Kremlin Ploshad or Red Place, the cathedral of St. Basil one of the strangest specimens of architecture anywhere to be met with: it has no less than 20 towers and domes of all different shapes and sizes, and coloured over with the most varied hues—some green, spread like net-work, over a yellow ground one red with broad white stripes, and a third gilded. The whole is a perfect baffle, and through different accounts of its origin are given, the most credible seem to be that it was a whim of Ivan the Terrible, to try how many chapels could be erected on the same spot, and under the same roof where religious services could be simultaneously performed without mutual interference. The architect was an Italian, and so pleased his employer that the savage despot put out his eyes, in order that he might never be able to build another like it. It is impossible to state the number of churches in Moscow, some making them 1500, and others reducing them to 250. The smaller number, if proper churches only are included, is probably the more accurate: but it is scarcely possible to traverse a street, in which clustering domes and minarets do not meet the eye. The number of monasteries, also, is very great. Those most deserving of notice are the *Donskoi*, situated near the S. barrier surrounded with ancient walls, painted in broad stripes of white and red, surrounded by battlements like those of the Kremlin, and containing, within its enclosure, six churches and chapels, several courts, a plantation of birch wood, and dwellings for the Archimandrite and monks, the *Semenuvskoi*, at the S.E. corner of the wall, near where the Moskva quits it, and with more of the appearance of a fortress than a monastery its lofty battlemented walls being notably mounted with a few small pieces, and the *Devichii court*, at the S.W. corner, with walls, flanked by 16 towers several churches, one of them containing the tombs of several Cæsars and princesses and a churchyard beautifully laid-out with shrubs and flowers, and containing a great number of fine monuments. Close to this convent is the *Devichii-fell* or *Nadamo's Field*, where the emperor, on their coronation, entertain their subjects. The Emperor Nicholas here, on that occasion, died 50,000 persons.

Among educational establishments, the only one deserving of particular notice is the University whose jurisdiction is not confined to the city or government of Moscow, but extends over gov. Tver Jaroslavl, Kostroma, Vladimir, Riazan, Tambov, Orel, Kula, Kaluga, and Smolensk. It was established by the Empress Catherine, in 1755, consists of four faculties, and is attended by about 900 students. Its scientific collections are poor, compared with the best of those in the W. of Europe, but it is tolerably rich in anatomical preparations; in connection with it is a gymnasium, a library of 50,000 volumes, an observatory, botanical garden, &c. Among benevolent establishments are the *Alexander Hospital* and *St. Catherine's Hospital*, both near the N. barrier and another hospital of St. Catherine, near the N.E. corner:

two military hospitals in the E., a widow's hospital in the W., and St. Paul's Hospital and the *Gallien's Hospital* in the S. Another hospital, the *Foundling*, situated on the N. bank of the Moskva, a little to the E. of the Kitai Gorod, has acquired more celebrity than all the rest: but whether it is entitled to be ranked among benevolent establishments, is questionable, its encouragement to vice being palpable and notorious, as all children up to a certain age, are received on presentation, and no questions asked. The number actually in the house, or supported in some way or other by the institution, is upwards of 25,000. Moscow possesses two theatres—*one*, where the performances are in French and the other, or other buildings or places worthy of notice, are the great riding-school, to the W. of the Kremlin, supposed to be the largest building in the world unsupported by pillar or prop of any kind the principal bazaar, or *Gostinny Dvor*, in the Kitai Gorod, a colossal building of three stories, where wholesale merchants, to the number of more than 1000, regularly carry on their trade the *Klad*, an open space in the same vicinity occupied by narrow streets of shops, the *barsack*, along the E. side of the four boundaries and the race-course, a large oval amphitheatre N. and S., and almost touching the S. barrier. The number of open and planted spaces throughout the city is very great. Several of these, including the boulevards, have been already mentioned; and we may now add the *Princess Gallitzin's gardens*, stretching along the bank of the Moskva, and beautifully laid-out, but now partly occupied by the Empress's villa and the *Sparrow hills* to the S.W. Manufactures of various kinds are carried on to a great extent within the city; but bear only a small proportion to those which are carried on at its extremity in the surrounding towns and villages. The principal establishments are for textile fabrics, chiefly woolen, cotton, and silk, in all of which, much steam power and the most improved machinery, are employed the other principal articles are hats, hardware, leather chemical products, beer, and brandy. From its central position, Moscow is the great entrepot for the internal commerce of the empire. Great facilities for this commerce are given by water communication, which extends, on one side, to the Baltic on another to the Caspian, and on a third to the Black Sea and by the railway to St. Petersburg. In winter, the traffic over the snow in sledges is enormous as many as 2600, loaded with goods for Tylin alone, have been known to leave the city in a single year.

Moscow for administrative purposes, is divided into 21 districts; and is under the immediate charge of a general and military governor. It is the seat of important civil and criminal courts and of various superintending boards of police, manufactures, trade, &c., and has several literary scientific, and other societies; among which, one of the most prominent is the *Bible Society* established in 1818. The foundation of the city dates from 1147. Its nucleus was the Kremlin which, at first, was nearly surrounded by a palisade, and formed an important military station. For a long time it continued to be a dependency on the principality of Vladimir, and in 1238, when the cruel *Batou-Khan* devastated Russia, it was both sacked and burned. In 1533, it was again sacked, and the inhabitants were dragged away into slavery by Khan Nagai. It afterwards became a prey to intestine dissensions—several princes disputing the possession of it, but at last Dmitrii, surnamed *Donskoi*, became sole master, and died in 1389, after having done more for its prosperity than any one into whose hands it had previously fallen. From this time its prosperity continued to advance, though not without repeated interruptions by fire, pestilence, famine, and war. It now became the capital of Moscow, and afterwards of the whole Russian empire, but was deprived of the honour in 1708 when *Petersburg* was founded, and became the royal residence. It still, however, possesses all the grandeur, and many of the other features of a capital. Many of the nobility reside in it, and, both in salubrity and central position, it possesses natural advantages which no political preference can ever confer on St. Petersburg. The principal event in the history of Moscow, is the burning of it in 1571, for the purpose of dislodging the French from their winter quarters. The damage those fires had been long since repaired, and Moscow has risen from her ashes more beautiful than she ever was before. Pop (1850), 575,800.

MOSDOK, a tn Russos prov Caucasus, esp. dist., 65 m. K.S.P. Georgievsk, on a height above the Terek. It is strongly fortified by nature, being only accessible on two sides, and has been considerably strengthened by art. It has generally spacious and straight streets, lined by very unill-furnished but and gloomy-looking wooden houses a Greek, an Armenian, and a E Catholic church an hospital, merchant-house, and quantitative establishment and manufactures of morocco leather and brandy Pop. MORÉ, or **MOOT**, an isl., Indian Archipelago, Banda Sea, N from Tumor Laut; lat. 6° 30' S.; lon. 121° 30' E.; 20 m. in circumference

MORIRAH or **MALIRA**, an Isl. Arabia. See **MAMAZA**
MORILLÉ, an E. dep. France lat. 48° 51' to 49° 53' N., lon. 6° 30' to 7° 45' E.; bounded N by Rhénish Prussia, German and Belgian Luxembourg, E. Rhénish Prussia, S. depts. Bas-Rhin and Meurthe, and W. Moselle It is of very irregular shape, terminating in the E and W in more points, which are 107 m. distant from each other, while it bulges out toward the N and S, till it attains a breadth of 41 m. area, 2084 sq m. The surface is very much broken in the E. by ramifications of the Vosges, and in the W by those of the Ardennes. None of them, however, attain a height exceeding 650 ft. The greater part of the heights are covered with fine forests, in which, though larger game is becoming scarce, the smaller varieties of it abound. They are generally of a round shape, and descend by gentle slopes, often clothed with orchards and vineyards. In their last descent, they do not merge into extensive plains, but form long withdrawing valleys, drained by numerous streams. The largest and most beautiful of these valleys is that of the Moselle, which traverses the department centrally from S. to N. and by itself, or its tributaries drains nearly the whole of it. The soil is many parts, in light, and much better adapted to cereals and vines than the properties which the arable bears to the waste land is very great—the former occupying three-fourths and the latter only about one-eighth of the whole surface. Considerably more than one fifth is in wood. The cereals raised leave a considerable surplus for exportation. The principal crops, after these, are beans and peas, lentils, vetches, millet, roots, and flax. A few hops are grown. Various kinds of fruit are raised extensively and in great perfection. Many steep slopes are covered with vineyards, but though the culture is careful, the wine produced is, in general, indifferent. The domestic animals are almost, without exception, of very inferior breeds; and dairy produce is so much neglected, that neither the butter nor cheese of the department can find any market beyond its limits. Mari, gypsum, and limestone, abound. The only metal of economical importance is iron, in the form of oxide. It is extensively worked open cast, and more partially by shallow pits. Interesting fossils are of frequent occurrence, particularly in the calcareous acclivities which line the valleys of the Moselle and its tributaries. Manufacturing industry is largely developed, and embraces almost all kinds of textile fabrics, iron, and ironmongery, embryonic porcelain glass, beer liquors, furniture, &c. The trade includes almost all the articles of manufacture, with the addition of agricultural produce and timber. After falling under the power of the Franks, this department was included in the kingdom of Austria, of which Metz was the capital. In the 9th century it changed its name to Lotharing, and continued with the emperors of Germany till 1652 when Henri II., by conquest, secured it to France. It is divided into four arrons dissements—Metz the capital; Reims, Sarreguemine, and Tolonville subdivided into 27 cantons, and 631 communes. Pop. (1852) 460,694

MOSLE (German *Mosel* Latin, *Mosella*) a river of Europe, which rises in France, S.E. of Remurmont, dep. Vosges, across which it flows N.W. into the centre of dep. Meurthe, whence it proceeds N.E. past Metz, and across dep. Moselle, into Rhénish Prussia, and after passing Treves, in a remarkably winding course, falls into the Rhine, at Coblenz total course, about 240 m., of which 220 m. commencing at the junction of the Meurthe, are navigable. Its principal affluents are, in France, r. bank Yalogue, Meurthe, which joins it below Nancy, and Sella, which it receives at Metz, l. bank Medon, Mâch, Orne; and, beyond France, a bank, Sarre, which joins it above Treves; and l. bank Euro,

Kill, and Elz. Of these affluents, the Meurthe, Sarre, and Elz, are navigable.

MOSNAIS, a tn Russia. See **MOSAN**
MOSKÖR or **Moskora**, an isl. off N.W. coast, Norway the most S. of the Lofodens N.E. is Isl. Flagerö, and S.W. the celebrated wharfed of Milderö.

MOSKONISI, an Isl. Asiatic Turkey, pash. Anadolu, Gulf of Aden lat. 39° 20' N. lon. 36° 40' E. about 4½ m. long. It is mountainous, and is connected with the mainland by sands. On the S. side is the village of Mosko, which has some trade in fruit and cotton.

MOSKVA, or **MOSKWA**, a river, Russia, which rises in gov. Smolensk, flows E., enters gov. Moscow passes near Mojaisk, and entering Moscow on the W., winds through it, and, on quitting it at its S.E. corner turns S.E., and keeping this direction till it reaches the S.E. corner of the gov., joins l. bank Oka at Kolomna, total course, about 210 m. A little above Moscow its navigation is interrupted by a cataract, but, from the city downwards, it is navigable to its mouth.

MOSKICA, a vil. Hungary Thaur. Thaur. S. and 2 m. from Tumesvar, with a Greek church. Pop. 1170

MOSQUERELA a walled tn Spain, Aragon prov and 26 m. E.N.E. Teruel with a church an old palace in which King Jaime I. of Aragon used to spend the hot season. A grammar and a primary school, manufactures of serge, and a trade in timber. Pop. 2136

MOSQUITIA, or **Mosquito Territorio** an extensive but not well-defined country, occupying the N.E. portion of Central America, between lat. 11 and 18° N., and lon. 88 10' and 86° W. and bounded N and E. by the Caribbean Sea, S. Costa Rica, from which it is separated by the river San Juan, S.W. Nicaragua, and W. Honduras. Area, including some contested portions claimed by Costa Rica and Nicaragua, 54,000 sq m., and, excluding them about 28,000 sq m. The surface is very mountainous in the W., being traversed by a lofty chain, which stretches across the country in a N. direction, and furnishes the sources of all its important rivers, which following the general slope, flow either N. or E. The largest of these rivers are the Roman or Aguan, forming the boundary of Mosquitia on the N.W. the Tinto or Wac, and the Escondido or Begovia. The soil is in general remarkably fertile, and has a most luxuriant tropical vegetation producing in abundance all the staples of the West Indies, large quantities of mahogany and other valuable timber, medicinal drugs, &c. The climate though in the whole healthy as very trying to European constitutions. Valuable minerals are said to abound in the interior and along the coast great quantities of tortoise-shell of the finest quality are obtained. The Mosquito Indians, the native, and almost the only inhabitants, are an active and daring race, tolerably expert in the use of firearms. Their chief assumes the title of King of Mosquitia, but they have considered themselves under the protection of the British Government, and have, in fact, long enjoyed its protection. Its capital is Blue-Fields or Bluefield.
MOSSE, a seaport in Norway, prov. on the bay, and 82 m. S. Christiansa traversed by a stream, on which a great number of saw and iron mills have been erected. It has a good harbour at which there is a considerable export of deals and iron. Pop. (1855) 4599

MÖSSINGEN, a tn Württemberg circle Schwarzwald, 7 m. S.E. Rottenburg. It is a stirring, industrious place, with a church, a distillery and a considerable trade P. 3744.

MÖSKILLH, a tn Baden, Lake circle, on the Ahr, 23 m. N. Cosanzheim with a church and a castle. The Ahr was under Krey, were here defeated, in 1800, by the French, under Moreau. Pop. 1638

MOSSE (*Santa Maria*), a vil. and com. Italy Piedmont div. Turin prov and 11 m. N.E. Biella, near the Broca, here crossed by a stone bridge. It has several churches, a gymnasium, manufactures of woollens, and a trade in peaches, walnuts, cherries, cattle, and dairy produce. Pop. 1426.

MOSOCZ, or **Mosocza**, a market tn. Hungary, Elber Dunab, co. Thurocs 17 m. S.E. Neuzsch, with two churches and three chapels. Pop. 3765

MOSTOWN par. Irel. Louth, 3818 a. m. Pop. 1027

MOSTRIM par. Irel. Longford, 10 844 a. m. P. 8168.

MOSTAGANEM, a tn. Algeria, prov. and 471 m. E.N.E. Oran, about 1½ m. from the Mediterranean. It is composed of two towns, which have each an enclosure, and are separated

from one another by a rock valley covered with gardens. It possesses strong military works, and ample accommodation for troops. The men are all artisans, agriculturists, or merchants. It has manufactures of carpets, coverlets, woollen cloaks, and jewellery, and a considerable trade with the interior. Pop. (1849), 6495, of whom 3577 are Europeans.

MOSTAR (108 before), a town, European Turkey, capital of Herzegovina, on both sides the Neretna, here crossed by a beautiful Roman bridge of a single arch, 65 ft. 3 inches span. It lies in a plain about 6 m. long, by 2½ m. broad, 73 m. N.W. Cazaro; lat. 43° 30' N. lon. 17° 55' E. occupies a large space than is needful, has generally unpaved streets, a visir's palace, a number of mosques and two extensive well-supplied bazars, and carries on a considerable trade in cattle, corn, wine, fruit, wax, and tallow. Pop. 7800—(Wilkinson's *Eastern and Montenegro*).

MOSTARDAS a vil. and par. Brazil, prov. São-Pedro-de-Rio-Grande, in a sandy and infertile district, between Lagoa Patos and the Ocean 56 m. S.S.E. Alegre with a church. It raises millet, barberries, and excellent melons. Pop. 3000.

MOSTERTON, par. Eng. Dorset, 558 ac. Pop. 246.

MOSTOLER, a town, Spain, New Castile, prov. and 10 m. S.W. Madrid, in a plain near the Guadara, here crossed by a magnificent stone bridge. It is in general poorly built has a church, a handsome tobacco-house, prison, and primary school, and a trade in corn and fruit. Pop. 1550.

MOSTYN a vil. and township, Wales, co. Flint, on the estuary of the Dee, and on the Chester and Holyhead railway, about 4 m. N.W. Holywell. The inhabitants are chiefly employed in the coal-pits in the neighbourhood. Steamers ply regularly to Liverpool. Pop. 2097.

MOSUL, or **MOSUL**, a large in Asiatic Turkey cap. seat of same name, 220 m. N.W. Bagdad pleasantly situated on bank of the Tigris, near which are extended to be the ruins of Nimrud. It is situated on a considerable elevation in the middle, and is surrounded by wall but is in a state of decay and ruin. Its principal ornaments are a college, the tomb of Sheikh Abdul Kader, and the remains of a beautiful mosque, with a fine minaret. The coffee-house, baths, khans, and bazars, are also handsome buildings. The city has declined in commerce as in everything else. At present its bazars are small and inferior in appearance, and its streets thronged with poor. In point of trade, it is chiefly a thoroughfare for the traffic between Bagdad, Syria, and Constantinople. It has, however, considerable commercial intercourse with the interior of Mesopotamia. Its principal manufactures are rapies and other cotton stuffs such as shawls for turbans, and caftans. It was formerly celebrated also for its machine hance the name of that description of fabrics, the manufacture of which was carried on to a great extent. The wine, bread, and cheese, sold here, are all of excellent quality. The climate is extremely hot in summer, and the winters mild, although there is sometimes a fall of snow which continues on the ground for a day or two. In the vicinity there are several warm sulphur springs, also some extensive quarries of marble as soft in quality that it can be cut and hewed like wood, and is much used in building for particular purposes. The city has been repeatedly devastated by famine and plague. On one occasion of this kind, where both were combined or quickly followed each other it is said that 100,000 persons were cut off. Pop. estimated at 40,000.—(Southgate's *Travels in Turkey and Persia*, Chenevix-Trenchard's *Expédition to the Euphrates and Tigris*).—**THE HARBINGERS** lies in the W. part of Kurdistan, between lat. 35° 30' and 37° 55' N., lon. 42° and 43° 50' E. length N to S, about 140 m.—mountainous, 100 m. raised by the Tigris, and its affluents the Great and Little Zab. In wet seasons the crops are abundant, but a long period of drought is invariably followed by famine.

MOGLAVINA, a vil. Austria, Slavonia, co. Varcon, on the Drava, about 20 m. from Etkice with a church. P. 1850.

MOTA-DAS-CURATO, a town, Spain, New Castile, prov. Cuenca, 66 m. S.E. Madrid, with a townhouse, granary, two primary schools, an hospital, a church, manufactures of earthenware, soap, coarse woollens, and numerous flour and oil mills. Pop. 2765.

MOTAGUA, a vil. Spain, Leon, prov. and 37 m. W. Valladolid, with a townhouse, a magnificent palace of the Duke of Alba, an elementary school, Latin school, and two churches. Pop. (chiefly agricultural), 1822.

MOTAGUA or **MATAGUA**, a river, Guatemala, which flows in the mountains of Dept. Solola, about lat. 15° 30' N., and lon. 91° W. flows first S.E. for about 80 m., then E. 120 m., and finally, N.E. 20 m., falls into the bay near the W. limit of the State of Honduras. Its mouth is encumbered by a dangerous bar. The principal affluents, which all join it on the r., are the Piscoy, Sacatepeque, Platanos, and Chiquimal.

MOTALA a market in Sweden, lin. and 35 m. W.N.W. Liphoping, on bank Motala, near its mouth in the N.E. shore of Lake Wetter. The Göta canal, which connects Lake Wetter with the Baltic, has here its terminus in a fine haven and docks.

MOTCOMBE par. Eng. Dorset 4841 ac. Pop. 1555.

MOTHE-DE-HAUTE, a town, France, dep. Deux-Sèvres on bank Sèvre-Niortaise, 9 m. N.E. Niort. It contains one of the finest châteaux in the department has a trade in cattle and mules manufactures of coarse goods, tanneries, and flour-mills. Pop. 2026.

MOTHALL two pars. Ire. 1., Waterford, 30741 ac. Pop. 3288.—3., Kilkenny 7092 ac. Pop. 1583.

MOTHERS AND DAUGHTERS, or **STAFFA**, a group of islets, Norway not far from the North Cape, and off the W. coast of Magdalen. They consist of a central island, rising precipitously to a great height, and other more precipitous, but much less elevated, grouped around it. They form a conspicuous mark to vessels coming from the White Sea, and their peculiar arrangement has caused them to receive from English mariners the former of the above names. They are frequented by immense numbers of the guillemot, and every spring are visited by the Laps in search of eggs.

MOTHERWELL, a vil. Scotland, co. Lanark, 12 m. S.E. Glasgow on the Caledonian railway. Inhabitants chiefly employed in the extensive iron and coal works of the locality.

MOTHEBY, or **MYSTAD**, par. Wales, Carmarthen, 11,914 ac. Pop. 1069.

MOTTERS, or **MOTTERS-TRAYERS**, a vil. and par. Switzerland, cant. and 15 m. W.S.W. Neuchâtel, beautifully situated in the valley of Travers, among fertile, well-cultivated fields. It is well built, and contains, on an isolated height, an old castle, now used as a prison. The chief manufactures are lace and watches. Houseless, after quarrelling with Paris and Geneva, lived here for three years. P. 700.

MOTILLA DEL-PALANCA, a town, Spain, New Castile, prov. and 85 m. S.E. Madrid. It is tolerably well built, and has a commodious church, a cathedral, and a prison, a primary school, manufactures of woollen and linen cloth several oil-mills and a trade in corn and saffron. Pop. 7748.

MOTIR, or **MOTIR**, a vil., Indian Archipelago, Moluccas, off W. coast Gilolo, lat. 0° 30' N., lon. 137° 20' E. It is a volcano, and is fruitful, yielding palm, sugar, cotton, and coconuts. Its inhabitants manufacture large quantities of excellent coarse potteryware, whence the island is frequently named the Potter.

MOTOLA (Latin, *Motola*), a town, Naples, prov. Otanto, dist. and 16 m. N.W. Naples. It is the seat of a bishop.

MOTRICO a vil. Spain, Biscay prov. Guipuzcoa, 81 m. N.W. Tolosa, on the Bay of Biscay, and W. bank of the estuary of the Deva. It has two squares, several palaces, two townhouses, and two small prisons, two primary schools, and a handsome church. It was a place of considerable commercial importance, and there are traces of its having been walled in 1603, it was almost entirely burned by accident. P. 2900.

MOTRIL a city, Spain, Andalusia, prov. and 88 m. S.E. Granada, about 1 m. from the Mediterranean lat. 36° 45' N., lon. 5° 34' W. It is irregularly built, in some parts the streets are narrow and crowded, in others open, unlighted, dirty, and neglected while in others again they are broad and straight, and the houses of a better description. It has a townhouse, granary, and ill proportioned collegiate church all in the great square a barracks, a fish-market, a nursery, with a pretty church, several suppressed convents, whose churches are used as chapels of ease, various schools for primary and advanced education, and a neglected hospital. In the neighbourhood are several hamlets. By the port of Motril is generally understood that of Cádiz, distant two leagues, and the roads of Granada, where vessels under 50 tons load and unload, and which are defended by a castle. The anchorage at the latter is only safe from some winds.

Motul is the depot for the exports and imports of the provinces of Granada and Jena. On an average of the two years 1844 and 1845, 244 vessels, of 8160 tons, entered this port, and 232, of 5699 tons, cleared; the chief articles of import being rice, salt cod, sugar, cinnamon, cacao, coal, shoes, matches, iron, and cotton and woollen tissues; and the chief exports, oil, figs and raisins, oranges, wine, brandy, corals, carpets, lead, salmtery, dry-wood, &c. Agriculture employs the greatest portion of the inhabitants. There are two sugar manufactories—one of rum, made from honey or sugar-cane, the former being the best—two soap-works—nine potteries, about 120 looms for coarse cotton, 18 hakebones, four flour and four oil mills. Pop. 18,170.

MOTSONAK, a market in Hungary, co and 8 m. S.W. Munkacs; with a handsome summer residence of the bishop of Munkacs, to which the whole place belongs. Pop. 1746.

MOTTA, numerous places kingdom of Italy particularly—1, a tn. gov and 26 m. N.W. Venice, r bank Lagoon, the seat of several district courts and offices, with a parish church, two sanctuaries and an oratory manufactures of linen and hats, and dry-works. Pop. 1800.—2, (Visconti) prov and N.W. Parma, near l. bank Terno, with two churches, and several industrial establishments. Pop. 3350.

MOTTA, several places, Naples, particularly—1, (San Giovanni) a tn. prov Calabria-Ultra I., 7 m. S.E. Reggio. P. 1140.—2, (St. Lucia) a tn. prov Calabria-Ultra II., dist. and 6 m. N.W. Nicotri. P. 8150.—3, (St. Anna) a tn. dist. prov and 6 m. W. N.W. Catania with a remarkable basaltic rock in its neighbourhood. P. 1450.—4, (Coronata) a tn. dist. prov and 86 m. S.W. Messina, near the N.E. side of Mount Etna. P. 1390.

MOI TA-ALATA a vil and com. Italy, Piedmont, prov and about 7 m. from Biella, with three churches a castle, and a trade in corn, wine, and wool. Pop. 1434.

MOTTA D'AFFRERO a vil and com. dist. and 4 m. W. N.W. Mistrata. Pop. 1554.

MOTTA DE-CORRI, a vil and com. Italy, Piedmont, prov Novara, prov and about 9 m. from Verelli with an ancient Gothic church, a small castle, and a trade in corn and maize. Pop. 1280.

MOTTE-SHEVOLEX a tn. Franco dep Savoie 4 m. N.W. Chambéry situated partly on a hill and partly on an unhealthy plain, with a church, and a trade in cattle and dairy produce. Himestone quarries, and seams of lignite. Pop. 8711.

MOTTEFOAT, par Eng. Hants; 2739 ac. Pop. 556.

MOTTISTON, par Eng. Hants 1107 ac. Pop. 143.

MOTTING or **METONA** (Latin, Motenae) a tn. Austria, Illyria, duchy Carinthia, 48 m. S.E. Laybach, near the Kalja; with a castle and a church. P. 1000.

MOTTRAM or **LOMBARDIA**, a tn. and par. England, co. Chester. The town, 8 m. E. by S. Manchester is built chiefly of stone has a spacious court-room, an Established church, three dissenting chapels, two extensive print-works, and several large cotton factories in which the great body of the inhabitants are employed. Pop. 5247. Area of par, 23,979 ac. Pop. 23,354.—(Local Correspondence.)

MUTZENING a vil. Württemberg, circle Schwarzwald, 5 m. S.W. Heersburg; with a church and a small castle. Pop. 1028.

MOUDON, or **MUDER** (Latin, Moudunum), a tn. and par. Switzerland, cant. Yverdon, on the Broye, crossed by a stone bridge, 14 m. N.E. Lausanne, overlooked by the old castle of Chaux. It has a church, townhouse, and a square tower, which once formed part of a castle, built in 1105, by Count of Eclusey. Several markets, and a considerable transit trade. P. 2357.

MOUGHTREY par Wales, Montgomery 5025 ac. P. 519.

MOUKDEN, or **FUENYANG**, a tn. China, pop. Manchuria, and prov. Liao-Tung or Shikling, on a branch of the Han, about 500 m. N.E. Peking; lat. 41° 50' N.; lon. 123° 27' E. It is surrounded by an external wall about 10 m. in circumference.

to circum, and has also an inner wall 3 m. in circuit, enclosing the emperor's residence, the government offices, courts, and other buildings connected with them, which are all arranged on a plan similar to those of Peking. In 1631, the Manchou monarchs made Moukden the seat of government, and succeeding emperors have done much to enlarge and beautify it. Its port, Kinchen about 45 m. S., near the Gulf of Liao-Tung in the Yellow Sea, has a considerable trade in cattle, pulse, and drugs. See LIAO-TUNG.

MOULE (Lia) a tn and port, lat. Grande-Terre, N.E. coast, div. Grande-Terre, r. bank, and at the mouth of a small river; lat. 16° 21' N. lon. 61° 27' W. Pop. 10,000.

MOULIN, par Scot. Perth, 16 m. by 7 m. P. 2023.

MOULINS, numerous places, France, particularly—1, (near-Allier) (Latin, Bona Gergova), cap. dep. Allier, in a fertile plain, r. bank Allier, here crossed by a handsome bridge, 164 m. S.E. Paris. The streets, in general are neither regular nor wide, but they are clean, tolerably paved, and lined by good houses, built of brick. It has some good squares, numerous fountains, a cathedral, a college occupying the buildings of a convent, founded by the duchess of Montmorency; the remains of the once famous castle of Moulins, the barracks, public library, Hotel de Ville, and general hospital, a court of first resort and commerce a consulting chamber of manufacturers, society of rural economy agricultural society, college, primary normal school, and gratuitous school of design, manufactures of excellent cutlery, hosiery, both in silk and cotton, eight, articles in ivory, woollen and cotton covers, worsted and cotton mills, rope works, and a tannery; a trade in iron, wood, charcoal, coal, wine, salt, cattle, swine, &c. Pop. (1852) 14,781.—2, a tn. dep. Nord, properly only a suburb of Lille. Pop. 4317.—3, (en-Gilbert) a tn. dep. Nord, at the confluence of the Oise and Guisgnon, 82 m. E. Nord, with the remains of a strong castle, a spacious and handsome church, manufactures of coarse woollen cloth, serge, linen, bombazine, and leather, and a trade in corn, wool, leather and cattle. Pop. 1542.

MOULMAIN MAGLAMAS, or **MOULMAIN** a seaport tn., India—beyond the Ganges, Tanasserim coast, lat. 16° 30' N., lon. 97° 37' E. (s.), at the mouth of the great river Salween or Shanly, with the island of Salu directly opposite. It

MOULMAIN.—From the Illustrated London News.

is about 200 ft. above the level of the river, has a good harbour and a considerable trade. Its chief exports consist of teak-timber, rice, tobacco, stick lac, betel-nut, ivory, coconuts, and livestock. The imports consist mostly of European cotton goods and marine stores. The principal trade is with Calcutta, Madras, Rangoon, and Penang, but a portion has of late years been directed to London. It was founded in 1825, by the British, as a military station, but, being equally well situated for trade, has become a flourishing seat of commerce. Pop. 10,000.

MOULLEY, par England. See MOLNEY.

MOULSFORD, par Eng. Berks; 1489 ac. Pop. 163.

MOUNT —1, a par. Eng. Monmouth 407 sq. Pop. 67.—2, a par. Wales, Pembroke 880 sq. Pop. 23.

MOUNT RATH, a decaying market in Ireland, Queen's co. 59 m. W. & W. Dublin on an affluent of the More, surrounded with extensive bogs on the one side, and on the other by the Ballylin mountains. It has a market-house, a courthouse, and a school; a parish church a R. Catholic, and a Methodist chapel; and several schools. Inhabitants chiefly employed in cotton and worsted weaving and carding wool. Pop. 5079. —(Local Correspondent).

MOUNTS BAY, in the English Channel, on the S.W. coast of Cornwall, formed by two large promontories, of which that on the E. terminates in Lizard Point, and the other, in the Lizard Head. The most remarkable object within the bay is St. Michael's Mount, from which it takes its name.

MOUNTS BERRILL, a market in England, co. and 7 m. W. Leicester with two Established churches, Methodist and Baptist chapels, national, free, and infant schools considerable manufactures of stockings, and, near it, extensive and valuable quarries of granite. Pop. 795. —(Local Correspondent).

MOUZA, a walled tn. Portugal, prov. Algarve, 22 m. E.N.E. Beja, about 2 m. E. the Guadiana. It has some manufactures, and carries on a considerable trade with Spain. Pop. 2660.

MOURO, a tn. and par. Portugal, prov. Alentejo, com. Elvas, not far from L. bank Guadiana, 83 m. S.E. Beja. It has a handsome square, several spacious streets, and is defended by a castle. Pop. 1400.

MOURCOURT a vil. and com. Belgium, prov. Hainaut, 33 m. S.W. Mons, with a trade in corn and cattle. Pop. 1788.

MOURNEABBY par Ire. Cork; 11,456 ac. P. 3463.

MOUREZOUK, MAMOUR, or MAMOUR, a vil., N. Africa, cap. of Fezzan lat. 25° 50' N; lon. 14° 10' E., in a low sandy, and unhealthy situation, subject to the effects of neighboring sea salt lakes, and, at times, to the intolerable heat of 131° to 139° in the shade. It appears to have been anciently built of stone, but now consists principally of Arab wattage or huts of earth and sand. It contains extensive ruins of ancient buildings and is surrounded with a high wall, constructed here for purposes of defence than for levying duties upon all commodities which enter the city. It is well supplied with water, a small stream passing the walls, and there being besides, numerous springs. It was once one of the greatest seats of the inland commerce of this part of Africa, and the emporium of most of the intercourse between the N. and E. regions of that continent. A great part of this traffic is now transferred to other places, but it still maintains an important commercial position being the last place in the caravan route from Tripoli to Bornou where proper supplies of food, camels, &c., can be obtained. Pop. 8500.

MOUREZOUK or MOUREZOUK a vil. and com. Belgium, prov. W. Flanders, 5 m. S. S.W. Courtrai, near the junction of the railways from that town to Lille and Tournay. It is well built, and has a large college and manufactures of woollen and cotton stuffs, tobacco, ropes, mustard, refined salt, bricks, hats, chocolate, candles, culinary leather, oil, &c. Pop. 5672.

MOUSEHOLE, a vil. England, co. Cornwall, at the foot of a hill on the sea-shore opposite to St. Clement's Isle, about 3 m. S. Penzance, and, though now an insignificant place, poorly built is one of the oldest in the country, and was of some importance, till destroyed by the Spaniards during the reign of Elizabeth, in 1595. Its only public edifice is a Wesleyan chapel. The inhabitants are chiefly employed in the pilchard and mackerel fisheries. The port is defended by two batteries. Pop. 1014.

MOUSE, a tn. Asiatic Turkey. See MICE.

MOUSEL, a tn. Asiatic Turkey. See MOUL.

MOUSTIER, a vil. and com. Belgium, prov. Hainaut, on the Rome 25 m. N.W. Mons with manufactures of linen and hosiery, breweries, a flour-mill, and a trade in agricultural produce. Pop. 1582.

MOUT a tn. Asiatic Turkey. See MICE.

MOUTA, a tn. and par. Portugal, prov. Alentejo, on a creek formed by the mouth of the Tagus, 10 m. S.E. Lisbon. It has an annual fair. Pop. 1900.

MOUTAFILLY, or MOUTAFILLY, a tn. Hindoostan, at the E. extremity of the Coromandel, 180 m. N. Madras, with an extensive coating trade.

MOUTIER-GRANVILLE, or MOUTIER, a vil. and par. Switzerland, can. and 33 m. N. Bern, 1 bank Rhodan in a valley of great beauty, and said to derive its name of Moutier from the ancient Minister of St. Germaine, founded in the 7th century, and occupying a height in its neighborhood, but fast falling to ruin. A good many of the inhabitants are employed in weaving ribbons, and spinning silk and cotton. A number of curious petrefactions have been found here, and form an interesting private collection. Pop. 1298. See MONTREUIL.

MOUTIER, a tn. France, dep. Savoy, formerly cap. prov. of same name, on both sides of the lake, here crossed by two bridges, at the point where four valleys meet, 55 m. S.E. Chambery. It is the see of a bishop, the seat of a court of law, and several important public offices, and has two churches, one of them a cathedral; an episcopal palace, two seminaries, a diocesan seminary, a royal college, hospital, prison, and barracks, important salt-works, and a trade in horses, cattle, and wool. Pope Innocent V. was born here. Pop. 2580.

MOUEAUX, a tn. France, dep. Nord, 6 m. N. E. Lille, with manufacture of calico, satin, gremble, and best-rot sugar. Pop. 2149.

MOUY, a tn. France, dep. Oise, 5 m. S. W. Clermont-on-Thérain. It is the centre of important woollen manufacture consisting chiefly of fine broad-cloths and coarse serge, mouseline, merino, &c., and has several worsted and felling mills. Pop. 2292.

MOUZON, [Latin, *Mosmagnus Remorum*] a tn. France, dep. Ardennes, 3 m. S. E. Sedan, pleasantly situated among meadows, 7 bank Meuse, here crossed by a stone bridge, and on the canal of Mouline. It is a very modest and ill-built place, and has an old and interesting parish church. Manufactures of woollen cloth and cotton hosiery several tanneries, distilleries, and fulling-mills, and a trade in honey. Pop. 1835.

MOUZANGAIE, a tn. Madagascar, N. W. coast S. side the Bay of Bombastak lat. 16° 10' S.; lon. 45° 40' E. It is an ancient place, and was, in 1594, a place of some consequence, possessing a population of 10,000 but has been since pillaged by the Hovas, and left almost in ruins. It has still seven mosques, of which three only are used, and a trade in silk, imported by the Arabs and Moors of the Persian Gulf. Pop. about 1000.

MOVIDDY, par. Irel. Cork, 6188 ac. Pop. 1547.

MOVILLE, two par. Irel. —1 (Lower) Donagall, 15 950 ac. P. 5208 —2 (Upper) Donagall, 19,922 ac. P. 4418.

MOVILLE a small market tn. in favourite sea-bathing resort, Ireland co. Donagall, beautifully situated W. shore Lough Foyle 9 m. N. E. Londonderry. Pop. 778.

MOW, a tn. Hindoostan. See *Mow*.

MOWAH —1, A tn. Hindoostan, presid. Bengal, prov. Behar, 7 m. E. Patna lat. 25° 34' N.; lon. 79° 7' E. —2, A tn. Hindoostan, prov. and 90 m. W. N. W. Agra with a large mud fortress, and on a hill about 2 m. distant, another, and more formidable one.

MOWEE, one of the Sandwich Isls. See *MAUI*.

MOWNKY, par. Irel. Tipperary, 1522 ac. Pop. 880.

MOXOS, a large prov. in N. of Bolivia, dep. Beni, having T. Smith, N. and W. Peru, and E. provs. Chuquitos and Santa Cruz. It extends on each side of the Mamore which passes nearly through its centre. The Beni also traverses its W. skirts, and numerous other streams intersect various points. It has also many lakes, all surrounded to considerable distances by swamps. The country is inundated for more than four months in the year namely, from December to April. The climate is hot, moist, and unhealthy. Excepting along the banks of the streams which are higher than the intervening surfaces, there are, in general, no woods, while the flat tracts depressed below the general level, of which there are many, are covered with impenetrable reeds and rushes. The territory is chiefly inhabited by warlike and wandering tribes of Indians, who forbid access to its interior.

MOY, a river Ireland, rising in co. Sligo, and after flowing N. and W. through that co. and Mayo, enters Lillishan Bay after a course of about 40 m. It is navigable to Ballina, or 6 m. from its embouchure.

MOY, a market to Ireland, co. Tyrone, 5 m. S. by E. Dungannon, on the Blackwater; with a handsome market-place, a courthouse, an elegant church, a large R. Catholic chapel, places of worship for Independents, Methodists, and Wesleyans, and several schools; manufactures of linen, and a little trade in coal, corn, timber, and slate. Pop. 857.

MOY, and **DALLASGARR**, par. Cork. Inverness; 26,000 ac. Pop. 957.

MOYA —1, A tn. Spain, Catalonia, prov. and 28 m. N. Barcelona. It consisted of 500 houses prior to 1808, when it was burnt by the Carlists; now it contains only 850, some of them unoccupied, primary and grammar-schools, a church, and an hospital. It has manufactures of woollen and cotton fabrics, and three flour-mills. Pop. 2649 —2, A tn. composed of a multitude of villages, Isl. Grand Canary, with two primary schools, an elementary two hamlets, and a church. The inhabitants are a peaceable and industrious by engaging, and providing the capital of the island with game, such as wild pigeons, rabbits, and partridges, of which there are great abundance. It has several mills for grinding toasted millet, which, after undergoing that process, is called *gofa*, and constitutes the chief article of food. Hundreds of the

inhabitants sometimes emigrate to America, to avoid perishing of hunger. Pop. 8700.

MOYACOMB, par. Irel. Caidow, Wicklow, and Wexford 17,485 ac. Pop. 8616.

MOYALIFF, par. Irel. Tipperary, 8022 ac. P. 2429.

MOYANA, par. Irel. Conn's co., 8824 ac. P. 1289.

MOYARTA, par. Irel. Clare, 16,818 ac. Pop. 5227.

MOYBOLGUE, par. Irel. Meath and Cavan 5761 ac. Pop. 2104.

MOYDOW, par. Irel. Galway, 82 566 ac. P. 5067.

MOYDOW, par. Irel. Longford, 4626 ac. Pop. 1218.

MOYGAWNAGH, par. Irel. Mayo 20,289 ac. P. 1181.

MOYGLAKE, par. Irel. Meath 4594 ac. Pop. 299.

MOYLAGH, par. Irel. Meath 7467 ac. Pop. 1938.

MOYLAHORE, par. Wales, Pembroke, 2442 ac. P. 458.

MOYLSKER, par. Irel. Westmeath 1726 ac. P. 259.

MOYLLOUGH, par. Irel. Galway 23,387 ac. P. 5149.

MOYMET, par. Irel. Meath 2225 ac. Pop. 490.

MOYNE, two par. Irel. —1, Par. and tn. Tipperary; 5314 ac. P. 1758. —2, Par. Wicklow 8463 ac. P. 772.

MOYNE RIVER, a river S. Australia, Portland Bay Dist. It falls into Port Fairy at the town of Belmont, lon. 143° 15' E.

MOYNOE, par. Irel. Clare, 9860 ac. Pop. 1055.

MOYOBAMBA, a tn., N. Peru, dep. Trucillo; a bank river of same name, 56 m. E. by S. Chacayayta lat. 8° 40' S. Cotton, sugar, and tobacco grow in great abundance in the vicinity and fruit is plentiful. —The river is an affluent of the Huallaga, it rises in Ecuador, prov. Maynas, lat. 0° 50' S. and, flowing S. E. falls into the Huallaga, in lat. 7° 8' S., total course above 140 m.

MOYRE, par. Irel. Galway, 100 982 ac. Pop. 8058.

MUDA, a tn. and par. Portugal, prov. Trás-os-Montes, 6 m. E. Maceira. Iron is mined in the neighbourhood. Pop. 420.

MOZ-GHAN, a tn. Hindoostan, principality and considerably S. W. Bahawalpur. It is defended by a lofty fortress built of kiln-burnt bricks.

MOZ (Pomro de), a tn. Brazil, prov. and 230 m. W. S. W. Para, r. bank Xingu, about 16 m. above its junction with the Amazon, with a handsome church, a prison and a port, where the canoes halt on their way from Para to prov. Goias. Pop. 4000.

MOZAMBIQUE, E. Africa. See *MOZAMBIQUE*.

MOZDOK, a tn. Asiatic Russia, gov. Caucasus, r. bank Terek, 148 m. N. W. Tiflis. It is very indifferently built, most of the houses being of wood, plastered with clay covered with straw, and only one story high, but has rather a cheerful appearance, in consequence of the beautiful and well-stocked gardens which everywhere surround the houses. The best edition is a R. Catholic chapel; there is also a Russian church. The inhabitants live chiefly by the products of their gardens and vineyards, and by the manufacture of morocco leather, and a kind of spirit prepared from grapes. There is also some trade, Moudok being a small emporium between Russia and the Caucasus and Georgia. Pop. (1849) 10,869 chiefly Armenian, Georgian, and Circassian.

MOZET, a vil. and com. Belgium, prov. and 4 m. E. Namur, on the Sambre. It has manufactures of copperware, a blast-furnace, and other iron-works as well and three flour mills. Iron and pipe-clay are mined in the vicinity, and many of the inhabitants are employed in hewing timber. P. 1781.

MOZET, a tn. Bohemia. See *Bohemia*.

MOZTE, or *MOZTE*, a tn. Russia, gov. and 145 m. S. E. Kinsk, on the Enpat. Pop. 8000.

MOZZATE, a vil. and com. Italy Lombardy, gov. Milan, prov. Coma, near r. bank Sesia, with a church. P. 1611.

MBICHA, or *MBICHA*, a vil. Bohemia, circle Blatnou on a small stream, 2 m. from Starokostov, with the remains of an old castle, and a mill. Pop. 1171.

MBIN, a tn. Russia, gov. and 80 m. S. E. Chernigov, r. bank Oos. Pop. 1800.

MBOCKEN, a tn. Prussia, prov. Posen, gov. and 20 m. W. N. W. Bromberg on the Middle Rhine and a lake, with two churches, a synagogue, and some manufacture of woollen and hosiery. Pop. 1084.

MSCHEHO, or *MSCHAY* (German, *Wesschen*), a tn. Bohemia, circle Bunzlau, 72 m. N. N. E. Prague; with a

church and an hospital. The chief employment is weaving. Pop. 1814.

MESLA, a tn. Algeria, in the Sahara, 119 m. S.E. Algiers. It is divided into two quarters, is intersected by the wady Malla, and has some jewellers, dyers, and wool-carders, all Jews. Pop. about 1500.—(Druze).

MSKET, a tn. Russia, Georgia, in the angle formed by the confuence of the Aragvi with the Kur, 10 m. N.W. Tiflis. It is said to be one of the oldest towns in existence, tradition asserting it to have been inhabited by some of the earliest descendants of Noah, and, when formerly the capital of Georgia, was 30 m. in circuit, and contained 80,000 men capable of bearing arms. It now consists of mean houses, many of them half, and some of them wholly underground, but has, among other remains of ancient magnificence, a spacious and beautiful cathedral, built in the form of a cross, with many walls, arches, and cupolas, and still used for service after the Greek ritual, but in the Georgian language. Other objects of interest are the ruins of the ancient palace of the Georgian princes, and an old castle. Msket is supposed to be the Artaxan and Miletia of Pompey and Herodotus of Flavi.

MSSETZ, a market tn. Bohemia. See KORNBAUM.

MSTA, a river Russia, which rises in Lake Matina, governs N enters gov. Novgorod across which it purchases a crooked course N.W. and falls into the N. shore of Lake Ilmen, about 7 m. S.E. Novgorod, after a course of 240 m. It is encumbered with cascades but is naturally navigable, and has been much improved by means of sluices and extensive cuttings. One canal gives a communication between Lake Matina and the Tverian, an affluent of the Volga, while another canal, by uniting the Msta and Volkhov, avoids the dangerous navigation of Lake Ilmen.

MATISLAWA, a tn. Russia, gov. and 55 m. E.N.E. Mskov, r. bank Volga. It has six churches, three convents, a college, formerly belonging to the Jesuits and a synagogue, some manufactures of linen and a considerable trade with Riga, in flax, hemp, and corn. Pop. (1851) 6675.

MZENESE, a tn. Russia, gov. and 85 m. N.W. Orel, at the confuence of the Mzena with the Zouche. It is tolerably well built, has 11 churches and 2 convents, and a considerable trade in flax and hemp. Pop. (1851) 14,770.

MUCH (MUCHANAKA and MUCHONAKA) two nearly contiguous vils, Dalmatia, circled 9 m. from Spalato, near the Dobrats, with a court of justice and a church. Pop. 1550.

MUCH WENLOCK England. See WENLOCK.

MUCHAMILL, a tn. Spain, Valencia prov. and 4 m. N.E. Alicante, r. bank Castalla or Morogrove with a town house, prison, several elementary schools, a church, and four hospitals. Near it are numerous country houses with fine gardens belonging to the wealthy inhabitants of Alicante. Pop. (agricultural) 8254.

MUCHELL a tn. Prussia, prov. Saxony gov. and 10 m. W.S.W. Merseburg on the Gieselsbakh. It has a parish church, a school house manufactures of woollen cloth, and a worsted-mill. Pop. 1086.

MUCHELNEY par Eng. Somerset 1068 ac. P. 340. **MUCHEROVAN** a tn. Asiatic Russia, Georgia, on a lofty height with a number of minarets or houses half underground. It is the head-quarters of a regiment, and generally the station of a battalion and has barracks, an hospital and, in the vicinity, an old church, hewn out of the rock, which has been converted into a powder-magazine.

MUCK, one of the Hebrides, Scotland, on Argyll, 3 m. W.S.W. Is. Egl., about 2 m. long by 1 m. broad shores in general, low and rocky, but rise, in some parts, into cliffs of considerable size; soil of the interior generally fertile. P. 68.

MUCKAIREN par Scot. Argyll, 9 m. by 8 m. P. 788. **MUCKALEN**, two par. Ir. Kilkeny.—1, 8706 ac. Pop. 815.—2, 800.

MUCKAMORE GRANGE, par Ir. Antrim; 3922 ac. Pop. 1540.

MUCKART, par Scot. Perth; 4800 ac. Pop. 685.

MUCKING par Eng. Essex; 2631 ac. Pop. 239.

MUCKLESTON par Eng. Salop and Stafford; 3651 ac. Pop. 1736.

MUCKRANOVA, or **MURKANA**, a tn. Hindoostan, prov. and 85 m. N.W. Ajmer; with marble quarries, which are extensively worked.

MUCKROSS, a small peninsula, Ireland, co. Kerry, between the middle and lower Lakes of Killarney, containing the ruins of an abbey founded in 1440.

MUCKTUN, par Eng. Lincoln; 1025 ac. Pop. 108.

MUKUDDAKA, a vil Hindoostan, prov. Malwa, 113 m. N by E Oolha, in a circular basin, enclosed by steep hills, and accessible only by a N and S opening, each closed by a wall and gate. This opening is the only pass, for many miles, through a mountain ridge separating prov. Malwa from the Harowaty country, in Ajaier.

MUCKWANPOOH, or **MACWANPOHA**, a tn. Hindoostan, Nepal, cap. dist. 20 m. S. Kathmandoo, a place of considerable strength.—The surveyor found a belt, about 20 m. wide, immediately S. of the Nepal valley and the river of Ban Coo, and connects partly of a rugged, hilly country, and partly of a level country called the Terai, which, with some poor, contains a large proportion of rich land.

MUCURI, a river, Brazil, which is formed by several small streams in the E. of prov. Minas-Geraes flows E. receiving the Todor-de-Bantos in the Cordillera-de-Almoraes; skirts the town of Porto-Alegre, and falls into a channel between the reef of Parades and the mainland m. lat. 15 S., about 80 m. N. of the São Mathias town course, 160 m. Canoes can mount up as far as the Cordillera-de-Almoraes, and sloops take in their cargo at Porto-Alegre.

MUDFORD par Eng. Somerset 2030 ac. P. 429.

MUDGUL, or **MUSTUL**, a tn Hindoostan Khasm's dominions, 88 m. S.W. Hyderabad, cap. dist. It is an ancient place, which, as early as 1512 was ravaged by the Mahometans. It is still a place of considerable extent, and an important military station. The district belongs partly to the Nizam and partly to the British.

MUFF par and to Ir. Lond., 15,080 ac. P. 8256.

MUGA several places Spain particularly:—(San Lorenzo de la Muga) A villa in, Catalonia, prov. and 21 m. N. Girona. It is indifferently built, has a church the ruins of an old castle a primary school, two flour-mills, and a trade in corn oil and wine. Pop. 1207.

MUGAIDOR, a seaport to Spain, Galicia, prov. and N.E. Coruña, on the S. shore of the r. or bay of Ferrol. It is a struggling, irregularly built place, with a church, a mill, manufactures of linen and coarse towelling, an active fishery particularly of sardines, and a trade in fresh and salted fish. Pop. 1782.

MUGL, a tn and par Portugal prov. Estremadura, 11 m. S. Santarem, on a stream of the same name, an affluent of the Tagus. Pop. 1070.

MUGLÉN, a tn Saxony circle and 80 m. S.E. Leipzig, on the Döllnitz with an ancient church, a chapel, castle, manufactures of linen a brewery, and three mills. P. 2165.

MUGGENDOERF, a vil Bavaria, Upper Franconia, 37 m. N.E. Nürnberg. Near it are several remarkable stalactite caves in what has been named the Franconian Switzerland.

MUGGENSTURM a vil Baden, circle Middle Rhine, ball and near Hastedt, with a church. Pop. 1584.

MUGOLA, a tn and seaport, Austria, Illyria, gov. Istria, on the gulf and 5 m. S.W. Trieste, with a church, an elementary school and a small harbour which enables it to carry on some trade in wine, oil, and fish. Above the town stands the castle of Altunza. There are extensive salt-mines in the neighbourhood. Pop. 1437.

MUGGINTON par Eng. Derby; 5234 ac. P. 719.

MUGLITZ, or **MOKELITZ**, a tn Austria, Moravia, circle and 30 m. N.W. Olmitz, r. bank March, on the railway to Prague. It has a church and poorhouse, manufactures of woollen cloth, and four mills. Pop. 4000.

MUGNANO, a tn Naples, prov. Terra di Lavoro, dist. and 8 m. E. Nola. Pop. 8060.

MUHALITCH, **MOKALITZ**, or **MOKALITZ**, a tn Asiatic Turkey, Armenia, at the confuence of the Bagrat and Edzoon, about 15 m. above their mouth, in the E. of Macrom, and 85 m. W.S.W. Brum, lat. 40° 15' N., lon. 28° 58' E. It consists of about 2000 houses, and, though possessed of few manufactures, carries on a considerable trade, particularly in silk, which is extensively reared in the surrounding districts. In 1840, the product of silk raised by Mahalitch, and its vicinity, amounted to 32,925 lbs. It has also a considerable trade in melons, and other vegetables,

raised on the E. side of the Lake of Apollonia, and transmitted directly by water to the capital. Pop. about 11,000.

MÜHLBERG, two places, Prussia.—1 A. tn., gov. and 53 m. E.N.E. of Merseburg, on the Elbe with a castle, three churches, an hospital and a law court; inhabitants employed in agriculture and fishing. In 1547 the Protestants were expelled and a famous defeat from the Emperor Charles V., and their leader Frederick John, elector of Saxony was made prisoner. Pop. 8548.—2 A. vil., gov. and S.W. Erfurt, on the Weidenebach, with a church, a tile-works, limekilns, and two mills. Pop. 1145.

MÜHLBURG, a tn. Baden, circle Middle Rhine, about 1 m. W. Karlsruhe. It is an old place; with two churches, and manufactures of sherry and madder. Pop. 1450.

MÜHLDORF, a tn. Upper Bavaria, cap. dist. on the Inn, 44 m. E.N.E. Munich, with a castle, four churches, two chapels, an hospital, and orphan asylum; and some trade, particularly in corn. Pop. 1599.

MÜHLENBACH, Mühlbach, or Saale, Saxony, a tn. Austria, Transylvania, and the Saxons, 80 m. W.W. Hermannstadt. It consists of the town proper, surrounded by walls, with two gates, and of two suburbs; is defended by two forts, and built with considerable regularity. It has several churches, a Lutheran gymnasium, and a Franciscan monastery; manufactures of woollen and linen cloth, and a trade in wine. Pop. 4300.

MÜHLHAUSEN two tns. Prussia.—1, A. walled tn., gov. and 29 m. N.W. Erfurt, cap. circle, in a fertile district, on the Unstrut. It has four churches, of which that called the High Church is the finest; a gymnasium, three hospitals, an orphan asylum, workhouse, and an institution for the education of neglected children; manufactures of linen and woollen cloth, leather and tobacco, and several breweries, distilleries and oil mills. Copper and iron are worked in the neighbourhood. Munster the famous Anabaptist, who collected a deluded host of 30,000 men, and reduced the Thuringian peasants to ruin in revolt, in 1524, had his head-quarters here. Pop. 49,728.—The circle is generally flat, well wooded, and fertile. Area, 163 sq. m. Pop. 46,123.—2, A. tn., gov. and 15 m. S.E. of Königsberg on the Dvina, with a Protestant church and chapel. Pop. 1688.

MÜHLHAUSEN, or Mühlhausen (ann. *Moldenhusen*), a tn. Bohemia circle Tabor, 45 m. W. Prague with a castle, two houses, two churches, three chapels, a school, manufactures of woollen cloth and earthenware and a beet-root sugar factory. Pop. 2194.

MÜHLHEIM two places, Germany.—1 A. vil. Hesse-Darmstadt, prov. Starkenburg, dist. and seat Seligenstadt, on the Rodenbach, near its confluence with the Main. It has a church as ancient tower, tile-works, and numerous mills. Pop. 1298.—2, A. tn. Württemberg, circle Schwabwald hall and 6 m. N.E. Tuttlingen, on the Danube. It has a church and two castles. Near it are iron-mines. Pop. 560.

MÜHLTRUFF or Mühltruff a tn. Saxony, circle Zwickau, hall and 10 m. W.W. Plauen with a court of justice, a castle, situated on a precipitous height; manufactures of linen and hosiery, tile-works, a brewery and four mills. Pop. 1702.

MÜLL, or Mura, a river Austria, which rises near a village of same name, in the N. slope of the North Alps, doubly Salzburg, flows E.N.E. then S.E. through Styria into Hungary, passing Judenburg, Bruck, and Gröden and joins 1 bank Drava 35 m. E. Warasdin total course, 240 m. Its principal affluents are, on the left, the Liesing, Mura, and Lendra, and on the right, the Sulm. Its current is very rapid, and unlike it for proper navigation, but it is much used for floating, and is well supplied with fish.

MÜLLINGEN, a vil. Württemberg, circle Schwarzwald, hall Hoch, with a church and a castle. Pop. 1140.

MULDEN, a tn. Holland, prov. N. Holland, 7 m. S.E. of Amsterdam, at the mouth of the Vecht, in the Zuider Zee. It is intersected by the Vecht, which is here crossed by a bridge, and has an old castle, two churches, an orphan hospital, and a boat-building yard, but the chief occupation is fishing, and trading in cattle from Friesland, Denmark, &c., which are landed here. Salt-boiling, formerly carried on, ceased in 1845. Pop. 1116.

MULRAYSONDE, prov. Scotland, co. Strirling; area, 7000 ac. Pop. 2647.

MUIRKIRK, a vil. and par. Scotland, co. and 21 m. E.N.E. Ayr, on a branch of the Glasgow, Dumfries, and Carlisle railway. It has a neat and substantial parish, Independent, and two U. Presbyterian churches, important schools, blast-furnaces, and mill-mills and other iron-works. In the parish are three 'martyr stones,' one of them that of John Brown of Priesthill so atrociously murdered by Claverhouse. Area of par, 30,000 ac. Pop. 2423.

MUKALLAH, a tn. Arabia. See MAKALLAH.

MUKALLAH, a tn., cap. of the country of the Bagri Patana, in the N.W. of the Punjab; lat. 33° 10' N.; lon. 77° 50' E. about 20 m. above Kalahugh, at the apex of the angle formed by the junction of the Bandawala with the Indus, and as close to the steep banks of the latter, that, during its periodical rise of about 50 ft., it washes the lower story of some of the houses.

MUKRAN, a prov. Beloochistan. See MUKHRA.

MULA, a tn. Spain, prov. and 31 m. W. Murcia. It is the principal square of some of the parish churches, the town-houses, prison, and clock tower, and a square where markets are held, is a *plaza*, with arcades of stone and portico. Besides the above the only public buildings and institutions are five primary schools, a grammar school for the sick poor, a theatre, built in 1846, the parish church of St. Domingo, a picturesque and beautiful monastery and a hermitage. Agriculture is the principal occupation, but there are two copper-mills, nine potteries, four brandy distilleries, a soap manufactory, and various looms for woollen, linen, and hemp fabrics. Pop. 3210.

MULAYNE, a vil. Hindostan, kingdom of Orissa N.W. Lucknow. It is a large place, composed almost entirely of mud huts, huddled together in the most irregular manner.

MULBARTON par Eng. Norfolk, 1848 ac. P. 57.

MULDE, a river Germany which rises in the Eger-lunge, on the frontiers of Bohemia, flows N.W. across Saxony passing Zwickau and Grunna, enters Prussia, and joins 1 bank Elbe at Dessau in Anhalt, total course about 130 m. affluents the Boden and Fröhberg Mulde.

MULGRAVE, a caps and port, N.W. coast, Russian America, Behring's Strait. Area, 59, 549 N. lon. 158° 43' W. [a] has anchorage for large vessels.

MULGRAVE ARCHIPELAGO an extensive archipelago, Pacific Ocean, extending between lat. 11 N. and 10° S. lon. 165° and 180° E. and comprehending the Radak, Radik, Mulgrave, Krusenstern, and Gilbert islands.

MULGRAVE ISLANDS, a group, N. Pacific Ocean above archipelago, about lat. 6° 14' N., and lon. 171° 56' E. They are of coral origin, and form a chain of atolls of a quadrilateral shape, which, on the E. side, has a double bell of islands. They are connected with each other at low water, and appear to have only two entrances—one for boats, and another for large vessels. The space within is navigable by every description of vessels, having generally a depth of 22 to 27 fathoms. The islands themselves, covered with coco-nut and bread-fruit trees, &c., have a very pleasing appearance.

MULHACEN a mtn. Spain. See NEVADA (SINERA).

MULHAUSEN (French, *Mulhausen* ann. *Arishhausen*) a tn. France, dep. Haut Rhin, 61 m. S.S.W. Strasbourg, on the railway to Basel. It is divided into the old and the new town. The former stands on an island, formed by the Ill, which here divides itself into several branches, and is crossed by four bridges. It is in the shape of an irregular oval, very much elongated. The streets are generally winding, but tolerably wide, well paved, and clean, and lined with well-built houses. The principal buildings are the Reformed and R. Catholic churches, Hotel de Ville, and college. The new town S.E. of the old, extends from r. bank Ill to the Rhine and Rhine canal, which has here a spacious basin. The streets are spacious and regular. Till the middle of the last century, the only manufacture of any consequence in the town was woollen cloth but the manufacture of cotton prints and muslins having been introduced, has made much rapid progress, that Mulhausen now ranks as one of the most important manufacturing towns in France. In addition to the branches already mentioned, others have been introduced, particularly flowered silks, damask, and other linen, hosiery, straw hats, stained paper, starch, parchment, and chemical products. There are also numerous woollen, flax, and cotton mills; printworks, bleachworks, extensive engine-works, and tanneries.

ries, both for common and morocco leather. The trade is very important, and, in addition to the articles of manufacture, includes corn, wine, brandy, groceries, and raw cotton. MULHAUSEN possesses a court of commerce, consisting of chamber of commerce, conseil de prud'hommes, industrial society, and communal college. For many centuries it was the capital of a small republic belonging to the Swiss Confederation. But, in 1798, it dissolved its connection with the Confederation, renounced its independence and became incorporated with France. The celebrated mathematician, Lambert, was born here, and a column has been erected to him in one of the squares which bears his name. Pop. 28,716.

MULHAUSEN, two places, Württemberg, circle Neckar. The one is situated on the Rhn, in bad. Villingen and has a church. P. 839. The other, on the Neckar head, Cannstadt, has a church and a castle. P. 907.

MULHEIM, several places Germany, particularly—1, (near-Rhein) A. in Rhinisch Prussia, gov. and 3 m. N.E. Cologne, esp. drule, on the Rhine, here crossed by a suspension-bridge. It has two churches and a synagogue. manufactures of silk, cotton, cambrics, tallow and wax candles, soap, leather vinegar and brandy and a trade, both general and transit, particularly in corn and timber, both sold and in plank. Pop. 3542. The canal is lively in the E, where it is traversed by the Sauerland Mountains but is well watered, and generally under cultivation. Area, 113 geo. sq. m. Pop. 39,724.—2, (near-Ruhr) A. in Rhinisch Prussia, gov. and 15 m. N.E. Düsseldorf on the Ruhr which here becomes navigable, and is crossed by a chain bridge. It has three churches, a synagogue, and various manufactures of woolsens and linen cloth, paper tobacco green soap, starch, and gun powder, a large factory at which steam-engines are made, an extensive cotton spinning mill and building yards, and an important trade, particularly in coal, which is worked in the neighbourhood. Pop. 10,181.—3, (near-Mulhausen) A. in Baden circle Ober-Rhein, esp. dist., 16 m. N.N.E. Basel on the railway to Freiburg. It possesses a superior burgher school a casino, and a bathing establishment. Pop. 2592. Area of dist., 72 geo. sq. m. Pop. 20,979.

MULHOUSE, a town, France. See MULHAUSEN.

MULHODDANT, par. Irel. Dublin 4067 sq. m. P. 030. MULL, an isl. Scotland, one of the Hebrides, on Argyle open to the Atlantic on all sides except the E. where it is separated from the mainland by the Sound of Mull. lat. (N. W. point) 56° 58' N. lon. 6° 20' W. (a). It is so irregular in shape that it is scarcely possible to specify its average length and breadth. Measured a little N. of its S. shore, from W. to E., it has a length of about 23 m. whereas, near its centre, where it is deeply penetrated by Loch na Keal on the W., and less deeply by the Sound on the E., the whole distance from shore to shore is reduced to an inch of scarcely 4 m. Its greatest width, diam. N. and S., is about 21 m. area, 201 sq. m. It is the third in magnitude of the inner Hebrides, and belongs to what Dr Macculloch has given the name of trap islands, the whole of its rocks being composed of trap, with the exception of a narrow belt of limestone stretching for a considerable distance, but not continuously along its S. shore and of the larger tract in its E.W. extremity forming the promontory of Rann, and composed, on its E. side, of quartz rock and mica slate, and, on its W. side, of granite and gneiss. But below the upper trap rocks a tertiary sandstone bed has been discovered, resembling on an earlier trap formation. The irregularity of form already referred to as characteristic of the shore, is displayed over the whole surface, which is broken throughout by mountain ridges, often rising by successive stages towards the interior. The culminating point is situated in Bannoch, which has a height of 2168 ft. Its great elevation makes it a very conspicuous object along the W. shores of Scotland, and more especially to vessels coming from the N. into the Sound of Mull, but, owing to the rounded form which the mountains generally present—there sometimes covering the lower beach, and the absence of deep and well-defined valleys—it would be difficult to find an equal extent of mountain land so deficient in grand or romantic scenery. Its most remarkable natural objects are its caves,

several of which formed, apparently, by the decomposition of trap veins, are of great size, and its basaltic cliffs and arches, remarkable instances of which are seen at Carraig, on the S.E. coast. The soil, however, as might be anticipated from its constitution, is of great natural fertility.

THE GARRAN ARCHES AND BASALTIC CLIFFS MULL
From a Sketch by H. B. Graham, Esq.

and few parts of Scotland can boast of possessing better pasture, or rearing finer cattle. The extent of arable land is very limited and chiefly confined to the low grounds along the shore. The climate, though mild, is extremely humid, and the weather is subject to sudden variations. Strong gales and violent storms are of frequent occurrence. The greater part of the island is divided into stock farms, and great numbers of cattle, sheep, and horses are reared. The last have long been noted for their hardiness. At one period, the most of the surface is said to have been covered with wood from neglect or mismanagement, it had almost disappeared but a better spirit now prevails, and plantations of larch, fir, and other trees, have recently been formed. The inhabitants not employed in pastoral or agricultural operations, are engaged in fishing particularly during the herring season. The coasts are also well supplied with white fish, and both salmon and sea-trout are found in the mouths of most of the streams, but, notwithstanding the encouragements both by Government and individuals, the fisheries have not proved so successful as was anticipated and, from the absence of fall and regular employment, the circumstances of many of the inhabitants are not very comfortable. Ecclesiastically, Mull is divided into three parishes. It contains a number of villages, but the most important place is Tobermory near the N.E. extremity of the island. Pop. 8390.—THE SOUND OF MULL connects Loch Linne, and Loch Sunart separates the island of Mull from the district of Morven. It is about 17 m. long, by 1 m. to 3 m. broad, and contains several islands.

MULLACREW, a vill. Ireland, on Louth 8 m. S.W. Dundalk, with several fairs. Pop. 627.

MULLAGH par. and in Irel. Cavan 19 872 ac. P. 4437.

MULLAGHBRACK, par. Irel. Armagh, 7901 ac. Pop. 4694.

MULLARY par. Irel. Louth 8637 ac. Pop. 885.

MULLETT, a peninsula, W. coast, Ireland, on Mayo united to the mainland by a narrow isthmus formed between Black Rod Bay and Broadhaven.

MULLIGAUM a town and strong fortress Hindoostan prov. Candahar, on the Moei, 75 m. N.W. Aringabad lat. 31° 51' N. lon. 74° 56' E. It was surrendered to the British, after an obstinate resistance, on June 14 1818.

MULLINACUFF par. Irel. Wicklow; 6616 ac. P. 1320.

MULLINAHONE, a market town, Ireland, on and 26 m. E. Tipperary, with a church, a Catholic chapel, and the remains of an ancient monastery. Pop. 1506.

MULLINAVAT, a vill. Ireland on and 30 m. S. by E. Killybeggy, with a church, a Catholic chapel and several fairs. Pop. 529.

MULLINGAR, a market town, Ireland esp. co. Westmeath, finely situated on the Broom, 44 m. W. by N. Dublin, on the

Royal Canal and the railway to Galway. It consists of one principal street about 1 m long with several subordinate ones diverging from it; houses, for the most part, are well built of stone, and slated. It has a handsome courthouse, jail infirmary, an extensive union workhouse, and barracks capable of accommodating 1000 men. A parish church with tower and spire a beautiful and spacious R. Catholic chapel, and places of worship for Presbyterians and Wesleyans, a convent of presentation nuns, connected with which is a school, where 500 poor girls receive instruction; diocesan, national, and Protestant schools, two tanneries, a brewery, and a trade in wool and other articles. The remains of ecclesiastical buildings which flourished here at an early period attest the antiquity of the town. Area of par, 21 005 ac. Pop. 11 499

MULLINS (Sw.) a par. Ireland, Cahir and Wexford 21,161 ac. Pop. 5078.

MULLION par Eng Cornwall: 4786 ac. Pop. 746

MULLROSE, or **MURKROSA** a m. Prussia, prov. Brandenburg, gov. and 9 m. S.W. Frankfurt between two lakes, on the S. side of a canal of same name, and traversed by the Schlaub, by which the lakes are connected. It has a church, and a trade in cattle. Pop. 1818

MULLEWAIN par Irel Wexford 2433 ac. 1 1235

MULBOY BAY, a deep inlet, N. coast, Ireland, co. Down, between Lough Beg and Lough Beg about 10 m long. Its shores are remarkable for their beauty.

MULSEN, two places, Saxony.—1 (St Jacob), A vil. cirila Zwilck, about 8 m from Glauch, well built with a church, manufactures of calico several blacksmiths, tile-works, and cotton, saw oil and flour mills. Pop. 3149.—2, (St. Nicolas) Near the former with a church manufactures of embroidery, and several mills. Pop. 2055

MULLEN a city Pennab. See **MURRAY**

MULTEO a vil. and com. Italy Piedmont, div. and about 6 m from Ganzo, with an ancient church a religious castle, manufactures of paper and cotton stuffs, a brass foundry and a trade in wine and chestnuts. Pop. 1895

MUMBLES HEAD a promontory, England N. side Bristol Channel, coast of Glamorgan forming the W. entrance of Swansea Bay. lat. (high) 51° 34' N. lon. 8° 58' 16" W. (L.) Its height is a height of 144 ft.

MUMBY par Eng. Lincoln 3620 ac. P. 829

MUMBLEWELL, a vil. and par. Switzerland, can. and 12 m. N. N. E. Solers, with manufactures of paper and playing cards, and a considerable trade in cheese. Pop. 1381

MUNASSA, a tn. Hindoostan, prov. Ajmer 97 m. E. Odeypoor 1440 ft. above sea-level. It consists of upwards of 1000 houses, and has a good bazaar. lat. 24° 29' N. lon. 75° 16' E.

MUNCASTER, par Eng. Cumberland 5166 ac. P. 693

MUNCHBERG a tn. Bavaria, circle Upper Franconia, cap. dist. on the Palmbach, 18 m. N. E. Bamberg. It has two churches, some linen and cotton manufactures, and four mills. Pop. 2260. Area of dist. 124 sq. m. Pop. 21,859

MUNCHBERG, a tn. Prussia, prov. Brandenburg, gov. and 20 m. N. W. Frankfurt, between lakes Fante and Kirehe. It has two churches, and manufactures of bombazine. P. 264

MUNCHEN cap. Bavaria. See **MUNICH**

MUNCHEN BUNDOOR a tn. Germany, duchy Saxony-Wesmar. 26 m. from Weimar, with a church, an hospital, and a mill. Pop. 1293

MUNCHENBUCHSEE a vil. and par. Switzerland, can. and 6 m. N. Bern with an old castle, now converted partly into a granary and partly into a parish church. The inhabitants are chiefly employed in agriculture, rearing cattle and digging peats, of which large quantities are annually sent to Bern. Pop. 3216

MUNCHEGRATZ, a tn. Bohemia, circle Banauk 49 m. N. E. Prague, on the Isary with a large and handsome mill, three churches, and an hospital. A congress was held here in 1818. Pop. 900

MUNCHEHAUSEN, a vil. Hesse Cassel, Oberhessen 45 m. S.W. Cassel with a church, and five mills. P. 1150

MUNCHEINGEN, a vil. Württemberg, circle Neckar, 8 m. N.W. Stuttgart with a church, and a castle P. 1498

MUNCHEIN (Sw.), par Irel. Clare and Limerick 4564 ac. Pop. 3787

MUNDACA, a tn. and com. Spain, Biscay. I. bank river of same name, near its mouth in the Bay of Biscay, 30 m. N. E. Bilbao. It has a small square, in which the public buildings stand, an ancient but handsome church, a courthouse, a public primary, and two private schools; manufactures of fish-lugs, and a fishery, which gives employment to most of the inhabitants. Pop. 1883

MUNDATTA, a small tn. Hindoostan, prov. Malwa S. side of gal. in the Nerbudda, and famous for the sanctity of its pagoda, dedicated to Siva; lat. 22° 14' N. lon. 78° 17' E. The island, on which the town is built, is of modern height, and was formerly fortified. The Nerbudda does not here exceed 100 yards in breadth but is extremely deep

MUNDEE, MUNDE, or **MUNDI** a m. Punjab, 160 m. E. Lahore, lat. 31° 40' N. lon. 75° 53' E. near the confluence of the Sakti with the Beas. It contains the rajah's palace, surrounded by a beautiful garden containing a profusion of the finest fruit-trees and flowers, a large and well-stocked bazaar, and has near it, productive mines of iron and salt, whence the greater part of the prince's revenue is derived

MUNDELSHEIM a vil. Württemberg, circle Neckar, bell and N. Marbach, on the Neckar, in an excellent wine district, with a castle and a fine old church.

MUNDEN two par. Eng. Here.—1 (Great) 3362 ac. Pop. 554.—2 (Little) 2204 ac. 1 pop. 628

MUNDEN a walled town, prov. Hildesheim at the confluence of the Fulda and Werra, whose united streams form the Weser, 14 m. W. S. W. Göttingen. It has two churches and a chapel a synagogue, gymnasium, industrial school and an old castle, where the residence of the Guelph ancestors of the royal family of Great Britain and now used as a magazine, manufactures of leather beer and brandy and a harbour, at which an important trade, both general and transit, once was carried on. Münden used to be one of the greatest linen marts in Germany, the annual sale within it amounting to the value of above £100,000. Pop. 4001

MUNDEHEIM, a vil. Bavaria, Palatinat, dist. Multerstadt. It has a church, and an active trade in agricultural produce. Pop. 1340

MUNDELN, a tn. Hanover, principally Kalenberg, near the source of the Hamel. It is an old place, and has an hospital and several salt springs. Pop. 1936

MUNDEINGEN a walled town, Württemberg, circle Danneberg, 18 m. S. W. Ulm, with three churches, manufactures of linen, mulin embroidery and wick yarn a blacksmith, and several mills. Pop. 2000

MUNDESOR, or **MUNDUSON**, a tn. and fort, Hindoostan, prov. Malwa, 85 m. S. E. Odeypoor, lat. 24° 6' N. lon. 75° 8' E. The interior is in a ruinous condition but the walls and gateways are still good. The fort is a square of nearly 130 yards.

MUNDPOOD, par Eng. Norfolk 2050 ac. Pop. 885

MUNDLAH a tn. and fort, Hindoostan, prov. Guntur, I. bank Nerbudda, lat. 22° 43' N. lon. 81° 2' E. The town and fort are separated by an artificial ditch, and, though formerly very strong, are now going to decay

MUNDLEYH, a tn. Hindoostan, prov. Malwa on the Nerbudda, here crossed by a ferry 5 m. E. Mithapur. It is enclosed by a mud wall defended by a wall built stone first, and carries on a considerable trade, being the great commercial, as well as military thoroughfare between Hindoostan Proper and the Deccan.

MUNDO a river Spain which runs about 15 m. S. E. Alcanas, in La Mancha flows S. E., and falls into the Segura in the district of Llor, total course about 60 m

MUNDON, par Eng. Essex 4295 ac. Pop. 387

MUNDLEY, par Eng. Norfolk, 674 ac. Pop. 451

MUNKEPOOK, or **MUNKPOOK**—1, A prov. India. See **CAMAY**.—2, A m. India, E. of the Ganges, formerly cap. of Camay in an amphitheatrical hill; lat. 24° 30' N. lon. 94° 30' E. It was once a place of importance, though it now presents few indications of former greatness, except two broad and deep ditches, occupying the sites of the ancient palace of the rajahs, and the residence of their principal officers, and still containing some small brick temples. It was taken by the Burmese in 1774, and wrested from them by the British in 1825.

333 ft. high; St. Michael's or the Jesuits church, a handsome Italian structure remarkable for its wide roof unsupported by pillars, and containing a fine monument to the Duke of Leuchtenberg, by Thorwaldsen, the church of the Theatiner, another Italian structure, beneath which are the burial vaults of the royal family; the church of St. Lewis, a modern building of brick, faced with white marble, decorated externally with statues by Schwanthaler and internally by the finest frescoes of Cornelius, and lighted by windows of magnificent painted glass, in which the newest art, supposed at one time to be lost, is outstripped the church of All Saints, less massive and ambitious than the former, but thought to surpass it in elegance, the Royal Palace, consisting of an old central building of vast extent, but little architectural merit, and two splendid modern wings, the Gallery of Sculpture, or as it is somewhat pedantically styled, the Glyptothek, a church and classical modern edition of the Ionic order, by Von Klenze, containing an admirable series of the finest ancient and modern sculptures, formed entirely by the late king, out of his own private purse, and then given up to the public the Pinakothek or picture-gallery, another beautiful edifice by Von Klenze, possessing the additional merit of being admirably adapted to the end for which it was erected, containing one of the richest collections of pictures in the world to the greatest possible advantage. The Jesuits college, the buildings of which now furnish accommodation for the museum of natural history and other cabinets, the university, the only one in Bavaria, attended by about 1400 students, and the library of 640,000 vols. including 16,000 MSS. the theatre with a lofty Corinthian portico, and the Odéon, a handsome edifice, devoted to musical entertainments. In addition to the public edifices, properly so called, Munich is rich in monuments, which adorn its squares, gardens, and public promenades. Several of these are in the Hofgarten, a large square enclosure, near the palace, finely planted, and surrounded by an open and richly ornamented arcade.

The manufactures are numerous, and in some particular branches, have acquired a high name. Among others may be mentioned mathematical, optical and surgical instruments gold and silver lace, jewellery glass, carriages, bells, musical instruments, iron and copper ware, leather and paper there are also numerous breweries, employed in making a beer which is famous over Germany, and forms a most important branch of trade. Munich having all the usual appendages of a capital, is the residence of ambassadors and ministers from all the different courts of Europe, the seat of the high courts of legislature and of law, and of all the more important offices of the state, and possesses numerous societies for the promotion of science, literature, and the fine arts. Its celebrity is almost entirely of recent creation and there is nothing in its annals deserving of particular notice. It is said to owe its origin to some salt warehouses, erected as entrepôts for the salt brought from Salzburg and Rachensthal, and to derive its name, München or Münden from the monks to whom the warehouses belonged. Pop. 95,581.

MUNICHOF, or BAKSYATAVA, a vil Hungary about 9 m. from Parodorf with a trade in corn, wine, and timber. Pop. 1123.

MUNIESA, a tn. Spain, Aragon prov and about 50 m. from Teruel, with a handsome church, a townhouse, prison, and primary school. Pop. 1143.

MUNII LA, a vil. Spain, Old Castile, prov and 38 m. N. E. Logroño. It has regularly built houses, but steep, narrow and crooked streets, a townhouse, prison, hospital two elementary schools, two churches, and three handloom manufactures of coarse cloth, falling-cuffs, and dyeworks. Pop. 1738.

MUNIPPOOR, Ind. see MURKPOOR.

MUNKACS or MUNKACH, a tn. Hungary. Higher Thaus, on Beregh, esp. dist. in a plain on the Latorca, here crossed by a long bridge, 75 m. E. S. E. Kaschau. It has a Protestant, a Greek, and a R. Catholic church, a Basilian monastery a synagogue, and an old castle manufactures of hooley important iron works, one of the largest sulphate-works in the monarchy, stone quarries, and a trade in wheat and wool. About 3 m. E. from the town, in a low and marshy plain, an isolated rocky steep suddenly rises to the height of 200 ft., and is crowned by the remains of the celebrated strong castle of Munkacs, from which the town derives its name. Pop. 3223.

Yon. II.

MUNKZWALM, a vil and com. Belgium, prov. E. Flanders, on the Swalm, 16 m. S. Ghent; with a brewery, an oil and flour mills. Pop. 1241.

MUNNESTADT, a tn. in Bavaria, circle Lower Franconia, esp. dist., on the Lauer 87 m. N. E. Würzburg. It has a court of justice, three churches, two chapels a gymnasium, a Latin school, an Augustinian monastery, an hospital and other mills, and a trade in wine and hops. Pop. 1579. Area of dist. 64 geo sq. m. Pop. 12,743.

MUNO a vil and com. Belgium, prov. Luxembourg, 82 m. W. N. W. Arlon. Pop. (agricultural) 1587.

MUNSINGEV a tn. Württemberg, circle Dambach, on the rough Alp, more than 3000 ft. above the sea, 30 m. S. E. Stuttgart; with a church, and an old castle. Pop. 1600.

MUNSINGEN, or MÜNSEN, a vil and par. Switzerland, cant. and 7 m. S. E. Bern, supposed to occupy the site of an old Roman town. It is noted in more recent times, for the great meeting held at it in 1831, when a new constitution was adopted, and the rule of the oligarchy overthrown. Pop. 4928.

MUNLEY, par. Eng. Hereford 1828 ac. Pop. 186.

MUNBLOW, par. Eng. Selw. Pop. 5604 ac. Pop. 867.

MÜNSTER, a gov. Prussia, prov. Westphalia, bounded N. by Hanover E. gov. Minden, S. gov. Arnheim and Düsseldorf, and W. Holland. Area 2115 geo sq. m. The surface in the N. W., and particularly in the N., has extensive tracts of sand and heath, only occasionally broken by low ridges and isolated hills. It is more hilly in the N. E., where it is traversed by some of the most distant ramifications of the Teutoburger Wald. In other directions, sand, heath, and fertile plains alternate with each other, and are sometimes intersected by forests none of which, however are very extensive. The principal rivers are the Rhine and the Lippe. The principal minerals are iron and coal. The soil is, on the whole, only of indifferent fertility, and the corn produced, though generally equal to the consumption, in some districts falls far short of it. Potatoes are the most valuable and prevalent crops are hemp and flax. The pastures also are very extensive, and in the lower grounds, of rich feeding qualities, running great numbers of live stock of all descriptions. The chief manufactures are iron, woollen, linen cotton and silk stuffs worsted and cotton yarn, hosiery, leather oil, lime, and earthenware. The government is divided into 10 circles. About six-sevenths of the whole inhabitants are R. Catholics. Pop. (1849) 451,886.

MÜNSTER, a tn. Prussia, esp. prov. Westphalia, and above gov. in a wide plain on the Aa, 78 m. N. E. Cologne, with which and with Hanover, it is connected by railway. It was once fortified, and is still entered by eight gates, though the fortifications have been levelled and planted, and now form agreeable promenades. It is in general tolerably well built the principal edifices are the cathedral an ancient Gothic structure, the three other churches of Oberwasser, St. Leger and St. Lambert, all in the purest Gothic, particularly the last, on the tower of which the iron cage in which the Anabaptist leaders were suspended previously to their execution, still hangs, the townhouse, also a beautiful apical men of Gothic, with a colonnade running round its lower story, and a fine hall called the Frieden Saal, because the peace of Westphalia, in 1648 was signed in it; the exchange, museum, theatre, house of correction, and an old castle, formerly the bishop's palace, and now occupied by the commandant. As capital of the province, it is the seat of several important public establishments, particularly courts of law, one of which has jurisdiction over the whole province. It is also the seat of a R. Catholic bishop, and possesses a R. Catholic high school, with philosophical and theological faculties, a gymnasium deaf and dumb institution, veterinary school, school of design, normal seminary and society for the encouragement of domestic history and antiquities. The manufactures consist chiefly of woollen, linen, and cotton goods, leather starch tobacco, and refined sugar. The trade, which is considerable, includes, besides the above articles of manufacture, wine, bacon hams, &c.

Münster was long governed by independent bishops, in whose warlike was often much more complacent than a Christian spirit but the most memorable events in the history of the town, occurred in 1585-86, when it fell into the hands of the Anabaptists, John of Leyden, Bernhard Knipperdolling, and

42

Bernhardi Knechtling, who, under the pretext of Christian freedom, taught the wildest doctrines, and practiced the grossest Socialist abominations. Pop. (1849) 54,864.

MUNSTER, a tn. France, dep. Haut-Rhin, in a narrow valley enclosed by hills, 10 m. W. S. W. Colmar, near the Pech. It has one of the largest cotton print-works in France, employing about 1200 hands; manufactures of calico, cotton and paper mills, and a trade in cheese, cherry brandy, butter, and cattle. Pop. 5525.

MUNSTER, the largest of the four provs. into which Ireland is divided, occupying the N. W. portion of that kingdom bounded N. by OConnors and L. by the S. St. George's Channel and W. the Atlantic Ocean. Greatest length E. to W., 143 m. greatest breadth, N. to S., 131 m. Area, 6,064,579 sq. m., of which 5,874,618 sq. m. are arable the remainder uncultivated land, plantations, towns, and water. It comprises the counties of Clare, Cork, Kerry, Limerick, Tipperary and Waterford. Its S. W. coast is extremely rugged, being deeply penetrated by bays and inlets, the most noticeable of which are Dingle Bay, the estuary of the Kenmare, Bantry and Donaghadee Bays, all of which enter the land from 15 m. to 20 m. Pop. (1841) 2,396,161 (1851) 2,014,811.

MUNSTER, a vil. Hesse Darmstadt prov. Starkenbach near Offenbach with a church Pop. 1886.

MUNSTER-THAL, two valleys, Switzerland. The one in the E. of can. Grisons, gives its name to a juradiction, is surrounded with very lofty mountains, and traversed by the Rhine. The other, which is also called Val Moutser, is situated in the N. W. of can. Bern and is among the most interesting and romantic valleys of the Jura, consisting of a series of narrow and rocky defiles, covered with black forests, and alternating with open basins, covered with verdant meadows and cultivated by villages. It is traversed by the Rhine, and an excellent road from Basel to Neuchâtel.

MUNSTERBERG a walled tn. Prussia, prov. Saxony, gov. and 57 m. S. Breslau esp. circle, r. bank Ohlau. It has several courts and offices two churches, a chapel, synagogue, and hospital. Some manufactures of tobacco a dye-works, and several mills. Pop. 4501. Area of circle, 103 sq. m. Pop. 31,772.

MUNSTERFELDE, a tn. Rhénish Prussia, gov. and 20 m. S. W. Cologne, on the Rhr. and Eschweilerbach. It has five churches and chapels a gymnasium manufactures of linen leather and potash, a dye-works, and numerous mills Pop. 1926.

MUNSTERHAUSEN a market tn. Bavaria, circle Swabia r. bank Main, 23 m. W. Augsburg with two churches and a castle. Pop. 1270.

MUNSTERHAGEN, a vil. Baden circle Middle Rhine, 10 m. S. W. Coblenz. It has an ancient church, adorned with several statues two chapels manufactures of linen and leather, and a weekly corn market. The Roman emperor Caligula was born here. Pop. 1620.

MUTTE, a vil. and com. Belgium, prov. E. Flanders 9 m. S. Ghent with a brewery an oil and two flour mills. Pop. 1095.

MUNTENDAM, a vil. Holland, prov. and 15 m. S. E. Groningen, with a church and school. P. (agriculture) 1225.

MUNTERONNAUGHT, prov. Ireland. Census 6467 at Pop. 2214.

MUNTOK Muntok or Muro a tn. Indian Archipelago esp. at Banca with a Dutch fort, government offices, a small trade, and a pop. in 1845, of 4000.

MUNZENHEIM, a vil. Baden circle Middle Rhine, 10 m. S. W. Coblenz, with a church. Pop. 1145.

MUNZIFAT (Latin, *Mons Fagi*) a tn. Bohemia, circle Rakonitz with a townhouse and hospital. Pop. 1845.

MUNZKIRCHEN, a vil. Upper Austria, circle Inn, dist. and near Vöcklabruck. It is an ancient place, and has two churches. Pop. 900.

MUONJIO a river in N. of Europe, forming part of the boundary between Sweden and Russia. It issues from Lake Älvsjö on the confines of Plämar in Norway, flows S. E. E., and after a course of about 170 m. joins the bank Tornet, at Paulo-Kangas. At the village of Muondjio, it forms a magnificent cascade, more than 100 ft. in height.

MUONIONEN a vil. Russia, Finland, dist. and 212 m. N. Uusikaupunki r. bank Mänsä, of which there is here a cascade, 100 ft. in height.

MUOTTA THAL, a lofty secluded valley, Switzerland, can. Schwyz, traversed by the river and having for its chief place the village of Muotta, 4 m. E. S. E. Schwyz. The river furnishes water-power to several saw-mills, at which, among other articles, sounding-boards for pianos are cut. In this valley a sanguinary struggle took place, in 1799, between the French, under Lecourbe, Mortier and Massena, and the Russians, under Suvwarow. The latter was nearly humbled in on all sides, but valiantly cut his way and made a most masterly retreat. Pop. 1535.

MUR, a river Austria. See MURRA.

MURAD a river Asiatic Turkey. See MORAD.

MURAFFA, a market in Russia, gov. Podolia, on a river of same name, 87 m. N. Jampol. Pop. 1800.

MURANO, a tn. and par. Italy Venetia, gov. and 1 m. N. Venice, on ist. of its own name the largest of those which are situated in the lagoons of Venice. It contains several remarkable buildings, among others the cathedral of San Donato, built in the 15th century and forming a fine specimen of the Byzantine style the church of San Pietro e San Paolo, and the palace of Trevisano. Murano was a place of importance in the beginning of the 15th century when it had acquired great celebrity particularly for its manufacture of glass, long regarded as the finest in Europe. This manufacture is still carried on but to a very limited extent, the principal articles made being beads of which there are two large factories. Pop. 2000.

MURANYALLA, a vil. Hungary Hither Thesau, on Gonic 40 m. from Bessenau. It has a church, paper and saw mills and a trade in hemp, flax, and cattle. In the vicinity are iron-mines and iron-works, and there, also, fine crystals and garnets are found. Pop. 1213.

MURASKINA, a tn. Russia, gov. and 51 m. S. E. Nijnei Novgorod with 14 churches and manufactures of soap, leather gloves, and articles in tin, silver and iron. P. 6000.

MURAT a tn. France, dep. Cantal, r. bank Allagnon, 24 m. N. E. Aurillac, near the foot of Mount Cantal. It is a hill built, steeply rising steep, paved with slippery basalt, and dirty. It has a parish church, convent of Benedictines, now used as an hospital manufactures of coarse woollens and lace and a trade of some importance in wine and Cantal cheese. Pop. 2394.

MURAU or **MURAU**, a tn. Austria, Styria, circle and 61 m. W. by N. Grätz, on the Mur at the foot of a hill crowned by the castle of Ober-Murau. It has a Capuchin monastery poot-house, hospital and extensive iron-works. Pop. 1500.

MURAVERA MURERA or MORERA, a vil. Isl. Sardinia, div. and 18 m. N. E. Cagliari with several churches, a primary school manufactures of woollen linen and lampas cloth and a trade in corn, fruit, wool, and alum. P. 1980.

MURAZZANO a tn. Italy Piedmont, div. Coni prov. and 12 m. E. Mondovì. It has a court of law three churches, a lofty square tower, forming part of an old strong castle, an hospital several schools, silk mills and a trade in wine, cattle, and dairy produce. Pop. 2550.

MURÇA DE PARAGUAI, a tn. and par. Portugal, prov. Beira-Alta, 15 m. E. N. E. Vila Real near 1. Louco Thelena. Amaranth, a species of amaranth, is found in the neighbourhood. P. 800.

MURCIA a prov. Spain, forming part of the ancient kingdom of same name and bounded on the N. by prov. Albacete, W. Almería, E. entirely and E. partly by the Medi terranean, and partly by prov. Alicante; area, 5970 sq. m. A considerable portion is composed of ranges of hills, reaching an elevation of 2800 ft. producing oats and pines, and containing much of copper iron, lead, and silver, and quarries of marble. There are also extensive plains, which are rendered amazingly fruitful by irrigation, and producing wheat, maize, oats, flax, pepper, oil, wine, kidney beans, and all sorts of vegetables, rice, oranges, lemons; the mulberry-tree, the cork-tree, the palm &c. but where water is wanting, the country is thinly peopled, and almost a desert. The littoral plains, especially about Cartagena and Alicante, are much subject to earthquakes and are rendered unhealthy by salt marshes. Its principal rivers are the Segura, and its tributaries the Thyella, Mundo, Quipar, and Guadalupe. Among the products of Murcia are likewise included sulphur, Armenian bole, salt, alum, barilla, and esparto grass. Agriculture

is the main occupation of the inhabitants, but considerable numbers are also employed in the lead and silver mines in the manufacture of silk, serape, ribbons, satin, plush, serges, baes, cotton, linen, hemp, paper, etc. The principal towns are now provided with regularly-trained teachers, but, as yet, not more than one in fifty of the population receives instruction in the schools. This province is regarded as the Bética of Spain, having produced very few men who have attained distinction in any way. The hotter classes vegetate in a monotonous, unusual existence, their chief pursuits being the cigar and the siesta. Pop. 400,000.—The ancient kingdom was bounded N. by La Mancha, E. Valencia, S. the Mediterranean, and W. Granada, and included what is now prov. Murcia, the greater part of prov. Albacete, and portions of provs. Jaén and Alicante. After passing through the hands of the Romans and Goths, it was conquered by the Moors in 712, and continued with a slight interruption to be subject to the Kaliphs of Cordova, till 1089. In that year it was seized, for the first time, by Mohammed ben Ali (called by Christian writers Hualid) the dignity of a kingdom, but in the following year, when the Infante Don Alonso, son of king San Fernando, was proceeding with a formidable army against Andalus, ambassadors from Murcia met him at Toledo, gave in their submission and declared the kingdom of Murcia a dependency of that of Castile. In 1284 Hualid endeavored to make it again independent, but failed in the attempt, and was finally destroyed by Alonso and James I. of Aragon. It has ever since been united with Castile.

MURCIA, a city Spain cap. of ancient kingdom and modern prov. of same name, lat. 38° N. lon. 3° 10' W., 80 m. N. E. Cartagena, on the Segura, which divides the town into two unequal portions, connected by a handsome bridge of two arches. The city is surrounded by a brick wall erected during the late civil war, and is entered by three principal gates. The streets are generally broad, straight, and well paved, and the houses mostly two stories high, are painted in pink and yellow colours those of the nobles, some of which are lofty and spacious have pretty gardens attached. Among the public buildings, the most important is the cathedral, whose principal facade, a combination of Corinthian and composite architecture, produces a fine effect, while the interior although it contains some objects of interest, rather disappoints. It was begun in 1308 and altered in 1521

St. Fulgentius and St. Isidore, which form one range of building. The other public edifices and institutions consist of the college of St. Leandro, which is an academy of music connected with the cathedral, the hospital of St. John, with spacious apartments for the sick, and a magnificent staircase; an hospital for convalescents, in connection with the preceding; a house of refuge, a foundling hospital, the townhouse, granary town seminary an institute for advanced education, founded in 1837, with chairs of Latin, Greek, mathematics, mental philosophy, morals, theology natural history, physics, geography and history which were attended, in 1847 by 328 students; a normal school, numerous private elementary schools in which are educated about 10,000 boys, and 600 girls; a school of design, with four professors, and about 180 pupils; eleven parish churches, the best of which are those of St. Lorenzo St. John and St. Bartholomew with several numerous hermitages, oratories, and numerous suppressed convents, a bull-ring and a good botanical garden. Agriculture employs a great proportion of the inhabitants, silk, pepper, maize and barley being the chief products, but there are also manufactures of coarse cloth and baes of different colours, of silk stuffs, especially taffety and plush, linens, hats, gloves, salt-petre, also, silk spinning-mills, dye-works, potteries, tanneries, soap-works, and 21 flour-mills. On considerable commerce is carried on in raw, spun and dyed silks, and in some of the other manufactures above mentioned, as well as in grain and fruits.

The first undoubted mention of Murcia occurs at the division of Spain into provinces by Yusuf in 747, and it soon after figures as one of the principal Moorish cities in Spain under the name of Murrach. It was wrested from the Moors by St. Ferdinand in 1240. It was sacked by the French during the peninsular war, and plundered of its wealth and works of art. Pop. including the suburbs 55,000.

MURDER ISLAND, an Isl. Montserrat Channel. See FOUNT ISLAND.

MURRI (La) a tn. France, dep. Isère, on a hill top, 80 m. S. Grenoble. During the civil war it was well fortified, and defended by a citadel and stood repeated sieges. It has manufactures of coarse linen, wools and leather, and a trade in cows, cattle and coal, which is worked in the neighbourhood. Pop. 9333.

MURELLO a vil and com. Italy, Piedmont div. Coni prov. and about 7 m. from Saluzzo, with an ancient church a mon.atory with a church attached a ruinous castle, a communal school two silk mills, and a trade in vegetable and cattle. Pop. 1682.

MURRET (La), Murillon, a tn. France, dep. Haute-Garonne at the confluence of the Louge with the Garonne, which is here crossed by a suspension-bridge, 11 m. S. S. W. Toulouse. It is well built of brick, and famous for the siege which it stood in 1213, and the bloody battle fought under its walls between Simon of Montfort and Peter II. king of Aragon, aided by the Count of Toulouse, when the latter was signally defeated and the king lost his life. The manufactures are coarse woollens, leather, and white stone-ware, in

MURCIA.—From Chapter I. Espagne.

The valley began in 1593 and failed in 1766, rises in compartments like a drawn-out telescope, and is crowned with a dome. It commands an extensive view of the fertile plain of Murcia, studded with farms and drooping palm-trees, as well as of the city, with its flat, bluish roofs and cane-pigeon houses. The cathedral suffered much in the earthquake of 1829, when the tower, facade, and dome of the transept were cracked. The seat of the bishop, who is excommunicated to Toledo, was transferred to Murcia from Cartagena, from which latter he still takes his title. In the plaza stands the capacious episcopal palace, built in 1759 one of the finest edifices of its class in Spain; and in close proximity to it, the college of

Isidore of English. Pop. 2320.

MURFREESBOROUGH a t. U. States, Tennessee, on a commanding eminence, above an affluent of the Cumberland, 28 m. S. E. Nashville. It was once the capital of the State, is neatly built of brick, and has a Presbyterian church, a courthouse, jail and market-house. Pop. 1500.

MURKIN, par. Ire. Kerry; 10,669 ac. Pop. 2422.

MURKIN—1, A vil, and par. Switzerland, cant. Argau, 11 m. S. W. Zurich. It contains a richly-endowed Benedictine monastery, seated on an eminence about 1500 ft. above the sea, and possessing an extensive library and a good cabinet of coins. The inhabitants of Mur are chiefly employed

in agriculture, and have also some manufactures of silk goods. Pop. 1808—3, 2 vii, and 2 S. E. River, where the lands XVIII of French, when Comte d'Artois, resided for some time.

MURIAHE, a river, Brazil, which rises in the Serra do Poco, near Rio-de-Janeiro, and flowing S.E. for about 46 m., joins the bank Parahiba. One of its affluents is the muddy stream of the Morro, whose waters are said to be poisonous, and on its banks grow a tree called *paracatiba*, the roots of which are also said to be poisonous.

MURIALDO, a vil. and com Italy Piedmont prov and 16 m. W Savona, 1 bank W Roncole, here crossed by a bridge. It has two churches, limestone quarries, and beds of fine pottery—south. Pop. 3078

MURIELLO, several places, Spain, particularly —1, (de Gallego) A to Aragon, prov and 44 m. N Bergasosa, r bank Gallego, here crossed by a stone bridge of three arches. It is one of the oldest towns in Aragon is poorly built, and has a church, townhouse, two primary schools, and two prisons. Manufactures of linen, several flour-mills, and a trade in corn and wine. Pop. 648—3, (de Rio de Leon) A to Old Castile, prov and 7 m. S. E. Logroño, r bank Leon, with a church, townhouse, prison, and two primary schools, and some trade in agricultural produce. Pop. 1163—8 (de Frías), A to prov Navarra, on a height above the Aragon 41 m. S. E. Pampeluna with a church an ancient tower, a townhouse, prison and primary school a flour-mill, and a trade in cattle. Pop. 554.

MURISGNO, a vil and com Italy Piedmont, div Alessandria, prov and about 14 m. from Lascio, r bank E. S. S. with a church, a castle, blue and grey granite, and a trade in corn, wine, and hemp. Pop. 3000

MURITIBA or **PANDE** a vil and prov Brazil prov Bahia 4 m. S. W Cachoeira with two handsome churches, and a primary school. It raises tobacco, of excellent quality also sugar-cane, coffee, and oranges in great abundance. Indigo, and other valuable plants grow spontaneously

MURITZ, a lake in the S. E. of Mecklenburg of very irregular shape greatest length N to E 18 m., central breadth about 9 m., 59 sq. m. It is the largest lake in Germany, and communicates on the N with Lake Fehmeln belongs to the town of the Baltic.

MURLO or **VEZCOVANO** a vil and com Toscana 18 m. from Siena, with a church, a castle, and a trade in oil, silk, cattle, and dairy produce. Pop. 2449

MURNAU, a market tn. Upper Bavaria, between Lakes Staff and Rieg 86 m. S. W Munich. It has two churches, a castle, an hospital, manufactures of articles in leather glass-work, cast iron, and a trade in corn and cattle. P. 1497

MURO two places, Naples —1, A to, prov Basilicata dist. and 16 m. S. W Melfi, supposed to occupy the site of ancient Firmistia, where a battle was fought between Marcellus and Hannibal. Jean I. queen of Naples was strangled here in 1832.—2, A vil prov Terra d'Otranto, dist. and E. N. E. Gallipoli. Pop. 1500

MURO, a tn Spain, ul. Majorca, 24 m. N E Palma with a church, primary school, suppressed monastery a marble quarry and a trade in corn, wine, and cattle. Pop. 3016

MURORI, a tn. Russia, gov. and 75 m. S. E. Vladivostok, 1 bank Okla. It is one of the oldest towns in Manchu country a cathedral, and 16 other churches, and has manufactures of linen, leather, soap, and tiles, and some trade in leather and corn. Pop. (1840) 9109

MUROS, a tn. Spain, Asturias, prov and 20 m. N N W Oviedo, 1 bank Nalon near its mouth, with a church, three hermitages, and a primary school, and a trade in cattle, wine, &c. Pop. 1076

MUROS, a seaport to Spain, Gallecia, prov and 56 m. S. W Coruña, on a bay of the same name. It consists of two principal streets and three small squares, and has a handsome collegiate church, a fine old belfry, a primary school, court-house, and prison, manufactures of linen, a fishery, several mills, and some trade. Pop. 4792

MUROWANA-GOMIZ a tn. Prussia, prov and 15 m. N. E. Posen, circle Obornik. It has a Protestant and a R. Catholic church and manufactures of linen, leather, and tobacco. Pop. 1611

MURRACH, par Incl Cork; 8785 ac. Pop. 1864

MURKAY, a inland co. New S. Wales, 89 m. N W to S. E., breadth, 10 m. to 40 m. Area, 1,458,080 ac.

Cap. Queenbeyan, on the Queenbeyan river —2, A co. W Australia.

MURRAY, a large river, S. E. Australia. Its source is uncertain, but believed to be in the Australian Alps, near Mount Wallington or Kosciusko about lat. 36° 30' S., from which it flows in a N W direction to lat. 36 S., when it proceeds W, though not without some pretty wide deviations, to lon. 144 35' E. where it again takes a N W direction to Mount Lookout about lat. 34 10' S. lon. 141° 50' E., from which it flows W, but following a singularly devious course, to Elbow, lat. 34 S.; lon. 148° 46' E. and there suddenly bends round, and runs S. S. W. to Lake Victoria, into which it falls at Wallington, lat. 35° 30' S. Its course is so tortuous and eccentric, as to render it difficult to give its development but it cannot be under 700 m. Its principal affluents are the Murrumbidgee and Darling, the former joining it at lat. 34 46' S. and the latter at 34 6' S. The sea-month of the Murray which is at the head of Encounter Bay, Lake Victoria, by which it is interrupted, communicating with the former by a short and narrow passage, called the Goodwin Channel, is about the third of a mile in breadth, and when the river is flooded a strong current runs out of it with such rapidity that the tide setting in at the same time, causes a short and huddling sea. The difficulty and danger of approaching it is further increased by the tremendous swell that rolls into Encounter Bay the breakers rising to a height of 15 ft. or 16 ft., before they burst in one unbroken line, as far as the eye can see, it is only during the summer season, and after several days of W wind that the sea subsides, and the roar of breakers ceases for a time.

MURRAYSHIRE, a co. Scot. See ELKIN

MURREHARDT a tn. Württemberg, circle Neckar, 7 m. N. E. Backnang, with a church, a Latin school an old Benedictine abbey salt-works, and a colliery P. 2400

MURREN, par Scot. Forfar 4600 ac. Pop. 648.

MURRUMBIDGEE, a district of New S. Wales between lon. 144 and 147 10' E. having the river Murray on the N. and the Murrumbidgee on the S. It is one of the largest districts in the colony containing 18,000,000 a. **MURRUMBIDGEE**, a river of S. E. Australia, rises in the W. ridge of mountains, situated to the S. of the parallel of 35° S. and under the meridian of 149° E. at a distance of about 80 m. from the sea. It flows in a N W direction and is joined by the Lachlan at lat. 34 25' S. laterally taking a S. W. course and falling into the Murray, at lat. 34° 45' S. Its whole course is upwards of 400 m. direct distance about 300 m. It is navigable up nearly to its sources, but is rendered difficult and dangerous by snags, and occasional rapids and shoals. Much of the land traversed by this river is of excellent quality

MURSLIFY par Eng. Bucks 2840 ac. Pop. 538

MURSTON, par Eng. Kent, 1482 ac. Pop. 191

MURTAS, a vil Spain, Andalusia, prov and 48 m. S. E. Granada, divided into two portions by a deep stream. It has a square townhouse, prison, two elementary schools and a church. Inhabitants employed in mining and in agriculture some common linen is woven and hampens sandals and soap are made, and there is a brewery distillery. Pop. 2970.

MURTEN, a tn. Switzerland. See MOYAT

MURU, a small tn. Japan, ul. Nippon, situated on the strait of Matsushima-nada, opposite lat. Shikof. It contains only about 600 houses. Its harbour is much frequented by coasting vessels, being very secure and well sheltered by a lofty mountain. Horso-hiden are tamed here in the manner of Russian leather

MURUT, a tn in N W Hindooistan, princip. and S W Bahawalpore. It is surrounded by mud walls, strengthened with numerous towers, and is a place of importance, being both a military station, and the emporium of a large trade in grain, though of very indifferent appearance.

MURUTSI or **MORUTSI**, an African tribe to the W of Delagoa Bay, near lat. 25° S. and lon. 28 E. They have made much more progress in civilization than their neighbours, have stone fences encircling their houses, which are plastered and painted yellow, and often ornamented with pillars, carved mouldings, and wall-painted figures. They manufacture large quantities of iron and copper, converting the former into excellent cutlery, and even castings, and the latter into fine wire, out of which they make beautiful elastic

chests. They are also ingenious workers in wood, cultivate tobacco and sugarcane, in addition to the ordinary crops of beans, corn, millet &c. and have immense droves of cattle. They sell their manufactures to the Baileys and other Italian, obtaining in return alum, ivory &c., and thus carry on a trade which is supposed to extend from 400 m to 500 m. Their capital is Murviedro.

MURVIEDRO [see *Saguntum*]; a town, Spain, prov. and 16 m. N Valencia, 7 hank Palencia, at the foot of a hill crowned by the citadel, and about 4 m. from the sea. The present wall is altogether Moorish, and girdles the irregular eminence like that of Alhambra the key to Seville as this is to Valencia. The citadel with the towers San Fernando and San Pedro, is placed at the extreme height. Murviedro is a struggling, miserable place. The streets are lighted, and in general paved but narrow and crooked. Besides the custom house, warehouse, and prison, there are a small theatre, savings-bank, hospital, various schools, a solid Corinthian parish church, a chapel of ease, a convent, and seven hermitages. Agriculture and wine-making are the prevailing occupations, but there are also four brandy distilleries, flour and oil mills. Saguntum was founded, a.c. 1884, by the Greeks of Sicyonia (Zante). It was then a seaport, but the land has since gained upon the sea, which is now above 5 m. distant. Being the first frontier town, and allied to Rome and being also extremely rich it was attacked and destroyed by Hannibal a.c. 219. It was rebuilt by the Romans, and became a municipality. Of its former grandeur but few and slight traces remain, as it has been ever since used as a quarry by Goth Moor and Spaniard. The famous theatre is placed in the slope above the town, commanding delightful scenery, it was much destroyed by bushes, who used the stones to strengthen the castle. Pop. 6349.

MURZIK a town in Africa. **St. MONTBROUX** **MURZUSCHLAG** or **MARSDENSLAG** a market town, Austria, and 23 m. N. E. Bruck on the Mura, and the railway from Vienna to Trieste. It has a parish church, a Franciscan monastery, a school, a burgher hospital, many factories of soythes and articles, iron mills and other iron-works, a trade in cattle, and two annual fairs. Pop. 967. dist. 3388.

MURBA a populous village in Arabia, prov. Yemen about 80 m. E Mecca. lat. 18° 30' N. lon. 43° 21' E. It was in former times the seat of the trade which is now transferred to Mecca, which it still supplies with fruit and fowls.

MURBURY par. Eng. Devon 1718. as Pop. 206.

MUSCAT, **MASNAH** or **MASCAT** [French *Mascate*], the chief city of Oman, cap. of the State of the Imam or Sultan of Muscat and a seaport of great commercial importance, on the Indian Ocean, near the E angle of Arabia; lat. 23° 34' N. lon. 56° 50' E. The cove of Muscat, as the harbour is called is an inlet of the sea about three-fourths of

circumference of weather which render it difficult to enter the cove of Muscat. This is the Bay of Matrah. The town of Muscat stands at the S. side of the cove, in a hollow, under cliffs 400 ft. or 500 ft. high, and debarr'd even from the view of the sea by the surrounding high rocks. Its appearance by no means corresponds with the wealth and importance of the place. A few good houses, in the Persian style, occupy the narrow space at the water side. Int large and stately buildings are few, and the Sultan's palace (a plain edifice) the governor's house, and a few minarets, alone rise above the humble mass of flat-roofed huts or houses. The streets are extremely narrow so that a few palm-leaves laid across between the houses above, completely screen them from the sun. The situation of Muscat, at the foot of high cliffs and nearly surrounded by bare rocks, renders it one of the hottest places in the world. The thermometer in the shade, rarely descends below 90° the land breeze, at night, is hot and suffocating. To Europeans the climate is insupportable. But, on the other hand, the excellence of the port and its convenient position near the entrance of the Persian Gulf, will always make it important as a station for shipping. It is also naturally strong and, in European hands could be made impregnable. Of water a sufficient supply is obtained from wells about 40 ft. deep. At the bottom of the bay, on the W. is the town of Matrah, distant, by land about 3 m. from Muscat, of which it may be considered as a suburb and little, if at all, inferior to it in population. Here are the docks for building and repairing shipping. Matrah has the character of a large fishing village, a large proportion of its population being fishermen, boatmen and pilots. As it stands in an open plain exposed to the sea breeze it is cooler than Muscat, so that many of the wealthier merchants of the latter place have their dwellings at Matrah, and spend only the hours of business in the neighbouring city. The combined population of Muscat, Matrah and intervening villages has been variously estimated at 25,000 and at 40,000. The latter estimate is probably excessive but the place is eminently prosperous, its foreign imports are for an Arab town very large, and therefore it may be inferred that its population is on the increase. The causes of this prosperity demand a few words of explanation, which naturally finds its place in the historical review of the State in question.

In the latter half of the last century Muscat had already attained under a ruler who bore the religious title of Imam the eminence to which, as a seaport it is entitled for its security and convenient situation. In 1806 Said Sultan, the present (1850) ruler succeeded to the sovereignty, having removed his cousin Badr, who had a prior title by assassination. Badr was the favourite of the Bedowin and like them, inclined to the doctrines of the Wahabites. These fanatical reformers had advanced to the very borders of Oman and made an alliance with the piratical tribe of the Jowdani, who occupied the rocky coasts on the N. of Oman, W. of Ras Masqudum. The British in Bombay had, in the mean time resolved on the complete suppression of piracy in the Persian Gulf and the subjugation of the Jowdani. Under these circumstances, an alliance was readily formed between Bombay and Muscat for the prosecution of the war against the common enemy on the W. and N. W. of Oman. In 1819, the parties were reduced to make unequalled submission and, two years later, a British expedition marching into the interior of Oman from Ras el Hadd, humbled the insurgent Bedowin and effectually restored tranquillity in that quarter. Thus Said Sultan owed his firm establishment in power to his alliance with the British, and he appears, fortunately, to have been quite aware of the advantages derivable from a continuance of their friendship, so that, to his docility under the wise and kindly counsel offered him by the Government of Bombay, may be fairly ascribed the great progress which the countries embraced in his dominions have, in a few years, made in political strength, productive and satisfactory physical improvement, and general civilization.

MUSCAT. — From Zephania, Campaigns in Chiriqui, Navigation de la Baye de l'Arabie.

a mile long, with half that width, spanning N. W. and consequently completely sheltered from the prevailing winds or monsoons. Immediately W. of this inlet is a more capacious bay facing N. E., and therefore exposed to the winter monsoon but capable of affording shelter to shipping under those cir-

Said Said's system of government is distinguished by careful abstention from any violent exercise of arbitrary power by request for his and property complete religious toleration, moderate imposts, and no monopolies, and by the prohibition of foreign slave-trade. Great numbers of Indian slaves, fleeing from the rapacity and oppression which they experienced in Syria and the peninsula of Bagdad, have settled in Muscat, where they may live unmolested by any mark of separation. The Banyans in Muscat are allowed to worship Kalf Devi in their own temple, and the Brahmins to keep a herd of sacred cows. Persians, Syrians, Afghans, and Baluchians, with their variety of beliefs, elsewhere the sources of bitter animosity here coexist, under the influence of general toleration, to live in harmony together. The liberality of Said is, happily, equalled by his intelligence and enterprise as a merchant prince. His dominion is somewhat singular in its nature, and almost wholly maritime. It commences on the E coast of Aden, at the river Moosimbu, about 50 m. S. Cape Delgado, and continues N as far as the equator. This, however, does not imply any territorial possession beyond what is necessary to secure the trade of the coast. In like manner a large portion of the coast of the Persian Gulf is under the influence of the British and the African islands, Zanzibar, Mafia, and Pemba included the coast ruled by him, for the most part only commercially cannot have an extent of less than 3000 m. For the administration of this widely-extended empire, he has provided a naval force unsurpassed in the East. He possesses an 84 gun ship two "4s, several frigates, and, altogether, 100 or 90 square-rigged vessels carrying guns and most of them built at Bombay after European models.

It must be observed that Sultan Said Said has never assumed the religious title of Imam which is often arrogantly bestowed on him, nor does he style himself Sultan of Muscat. Indeed the word of Zanzibar has now become the seat of his central government his chief source of revenue, and principal residence. It is the point, also whence his mild influence, borne along by commerce is likely to render the greatest service to humanity. See ZANZIBAR.—Robert's *Embers of the E. Coast Muscat de Zanzibar* by George Kappell's *Personal Narrative*, *Wellsted Voyage to the City of the Calicut*.

MUSKOBOS, a vil Spain prov and 6 m N Valencia, about 3 m from the sea with a church, townhouse prison and primary school and a trade in agricultural produce. Pop. 1011.

MUSGRAVE (GREAT), par Eng. co. Westmoreland 4060 ac. Pop. 175.

MUSI Moson, or Moson, a to Asiatic Turkey, pass and 75 m S S E Erzerum finely situated on a round and conical hill, at the foot of the ridge of Jebel Nimrod or Niphaz, has fifty uneven streets, seven mosques, and four churches, large and well-supplied bazars, exhibiting articles of Persian manufacture and Glasgow shawls, which many of the middle class of inhabitants use for turbans and girdles. The chief trade of the place is in the hands of the Armenians. The vine is much cultivated in the vicinity and excellent wine made. Grain and tobacco are also amongst its principal products. Pop. about 5000 of which the greater portion are Armenians, the remainder Armenians.

MUSHAKH, a group of the Atlas, off E coast Abyssinia lat. 11° 45' N lon. 43° 19' E. They are situated on a coral reef extending N E to S W., for 7 m., are elevated at most 30 ft. above the sea, are covered with a few mangrove and other trees, and afford tolerable anchorage in a gap of the reef, but have not a drop of water. They were purchased, in 1840, by the British Government, from the Sultan of Zanzibar.

MUSHED-ah-Bah, a maritime Is. Persia, prov Musander, on the Caspian Sea, 10 m. N Baluchistan, lat. 36° 45' N lon. 51° 50' E. It consists of about 300 houses.

MUSKAU or Muszkau, a m. Prussia, prov Silesia, par and 56 m W. W. Leignitz, on bank Laba. It has a Protestant church, porcelain, extensive pottery, and four granges and two wool farms. Pop. 2387.—Several fine farm dependencies of the town. One of them contains a fine castle, with two towers, and is provided with a library of 9000 volumes, and some good collections of antiquities, another has a large park, contained one of the finest in Germany with a bathing establishment adjoining, and a third an alum-works.

MUCKERRY, a mountainous district, Ireland, in the centre of co. Cork. It is divided into the baronies of E. and W. Muskerry. Area, about 211,000 ac. P. (1841), 90,511. MUSKATAM, two m. Mus. Mus. Mus.—1 (North), 2190 ac. Pop. 877—2 (South), 2631 ac. Pop. 805.

MUSKILLO, HAZOU or ODA an Isl. group, N Poind, belonging to the Malgrava Archipelago about lat. 6° N and lon. 168° E. They consist of a number of small islands, distant 1 m. to 6 m. from each other apparently connected by reefs and ledges, and more especially by a narrow isthmus, which divides them into two distinct portions extending for about 30 m. N W to S E. They are very low and dangerous, but are well covered with trees, and densely peopled.

MUSKINGUM a river U. States, formed in State Ohio by the junction of the Tuscarawas and White Women at Coshocton. It flows circuitously S S E and joins a bank Ohio at Marietta. It is navigable by barges to Coshocton, and, being connected with the Ohio canal gives a continuous communication N to Lake Erie and W to the Susquehanna.

MUSONF two rivers, Italy.—A river Venetia, which flows S S E past Castelfranco, divides into two branches, the one of which is contained, and joins a bank Brenta, while the other flows E, and falls into the lagoon opposite Venice, total course, about 40 m.—3 rivers, The Marches, which flows circuitously N F past Macerata, then S S E, and falls into the Adriatic, 3 m. N E Loreto total course, 38 m.

MUSEBACH a vil Bavaria, Palatinat, 10 m. N. Neustadt in the midst of vineyards. It has a parish church and a trade in wine. Pop. 2069.

MUSELBURGH a borough of royalty Scotland, on Edinburgh, on a bay of same name at the mouth of the Leith in the North of Scotland and on the N British railway 6 m. S Edinburgh. It consists of the town proper and a suburb on the opposite bank called Fisher-row with which it communicates by three bridges—one of them elegant, and another as ancient as to be supposed of Roman origin, is irregularly, but substantially built, and has, besides the parish church, seated on a commanding height, at some distance above the town Free U. Presbyterian Episcopal and Independent churches a grammar and other schools, a neat townhall with a curious old tower attached to it, which was built in 1590 out of materials from the ancient chapel of Loreto, manufactures of millcloth, hosiery, salunguina hats, and leather, an extensive pottery for coarse ware, several tanneries, a very ancient harbour at which coals are exported, and some other trade carried on, on which race are annually held and an annual fair which lasts two days. A large number of the inhabitants live by fishing. The battle of Pinkie, in 1547, was fought in the vicinity. Muselburgh unites with Leith in sending a member to Parliament. Pop. 7092.

MUSENDOM (Great) Arabia, the N extremity of a remarkable promontory called Ras al Jebel, projecting into the Persian Gulf, forming the point of separation between the latter and the Sea of Oman or Arabian Sea lat. 36° 24' N lon. 56° 34' E, separated from the Persian coast by the Strait of Ormus. It is the termination of a mountainous tract, and is much indented on its E. side.

MUSOMELIO a m. Sicily prov and 18 m N W Calanica. It has an old castle, and near it are found iron, rock-salt, and a variety of fine pebbles, agates, Jasper &c. Pop. 8300.

MUSON a vil and coe Belgium, prov Luxembourg, 11 m S S W Arlon, with a trade in agricultural produce. There are iron-mines in the vicinity. Pop. 1455.

MUSTAPHA (Pasha) two m. European Turkey.—1, Rommelia, 18 m N W Adrianople 1 m. bank Mariza, here crossed by an elegant bridge, built by Mustapha Pasha.—2, (Poland), Servia, 1 m. bank Niava, 18 m E by B. Nissa, on the road from Belgrade to Sophia.

MUSTAR a m. Switzerland.

MUSTON a par. Eng.—1 Leicester 1693 ac. P. 411—2 York (E. Riding) 2225 ac. P. 899.

MUSTUNG.—1 A m. Baluchistan, 65 m N E Kalat, 5700 ft. above sea-level, lat. 29° 46' N lon. 66° 47' E. It contains about 400 houses, surrounded with a walled street wall and has a rich district, producing the finest fruits in abundance, besides grain, madder, and tobacco.—2, A m. Tibet near the supposed source of the Gandak, lat. 29° 53' N lon. 36° 5' E.

MUSEYNA, a tn. Austria, Galicia, circle and 18 m. S.E. Szepes, on back Poprad; with a church, and a trade in linen. Pop. 1700.

MUTEODU, a tn. Hindoostan, Mysore, 80 m. N N W Seringapatam; with an extensive manufacture of the glassings worn by the native women round their wrists.

MUTFORD, par Eng Suffolk 1874 ac Pop. 485

MUTHILLI, a vil and par Hindostan, co and 17 m. S.W. Porth, on a slope above the Kara. The villas consist of a single wall built and well kept street, and has a very handsome parish, a Free, and an Episcopalian church, and three schools. A few of the inhabitants weave cotton goods for Glasgow but the far greater number are employed in agriculture. Area of par 28,800 ac Pop. 2975.

MUTHINEE, a river Hindoostan See IMPAL.

MUTIGNANO, a tn. Naples, prov Abruzzo Ultra II dist and 31 m. S.E. E. Teramo Pop. 1500

MUTOVA, or MATRA, one of the Karle islands. N Pacific lat. 43° 4' N, lon. 155° 12' E. It rises to the height of 4500 ft. is a volcano, but of doubtful activity.

MUTHI, a vil. Hungary Thüder Danube, co. Tolna about 14 m. from Bexard; with a handsome church and a trade in corn, wine, and cattle. Pop. 1619

MUTTERSCHOLTZ, a tn. Prussia, dep. Bas-Rhin, 4 m. W N W Schalkelt on the Zemba. It has a manufacture of indigo-plant, and a trade in cattle. Pop. 1980

MUTHIERSDORF, a market tn. Bohemia, circle and 27 m. W N W Elstau, on the Goldgrubenbach with a parish church, a north-west, a cattle, manufactures of lace, glass-works, and several mills. Pop. 994

MUTTERSTADT, a market tn. Bavaria, Palatinat, on the Rhingraben, here crossed by a bridge, 30 m. N E Landau. It has a trade in corn, and in tobacco, which is extensively grown in the vicinity. Pop. 3746.

MUTTOA ISLAND, a fortified islet, Ireland, Galway Bay 1 m. S. Galway. It has a light house, with fixed light, 33 ft above sea-level lat. 53° 15' N, lon. 9° 3' W

MUTTRA or MATANAH, a tn. E Arabia. See MOCRA

MUTWAL (Mukundapuram) an isl. Hindoostan, Gulf of Mannar, separated from Calcutty by a narrow strait. It is about 10 m. long and 2 m. to 3 m. broad, soil sandy but favorable to the growth of coco-nut trees, great numbers of which are raised here, fishing, and making chinam (lime) by burning shells, are carried on.

MUTZSCHEN, a tn. Saxony circle, and 22 m. F S E Leipzig, with a castle, and manufacture of linen. Rock crystals, known under the name of Mutzsch diamonds are found in the neighbourhood. Pop. 1689

MUTZIG, a tn. Prussia, dep. Bas-Rhin, 14 m. S.W. Straßburg, with an old castle of the bishops of Straßburg, now converted into a manufactory of fire-arms. Pop. 3564

MUT (Lm) (Latin, *Centurus de Mochus*) a tn. Prussia, dep. Var, 6 m. S.E. Derlingau, near the confluence of the Argues and Narbonne. It contains a famous tower, in which seven Provencals, after killing in an attempt to assassinate the Emperor Charles V., shut themselves up, and defended themselves against his army till five of them were mortally wounded. The remaining two surrendered, and were hanged on the spot. Le May has saw-mills, driven by water, and tanneries. Pop. 1899

MUTREN a vil and com. Belgium, prov. Brabant, on the Dyle, near the railway from Louvain to Malines, 12 m. N Brussels. Pop. (agregatival) 1700

MUZAR, a tn. Bohemia, on the oval and 12 m. S.E. E. Hahk. It consists of about 500 houses, can muster about 1000 horse, and is famous for its tomb, which was built nearly four centuries ago, consisting of two lofty cupolas, and the object of numerous pilgrimages. Trebeck, the last of Moorcroft's unfortunate party, died here

MUELLAC, tn. France, dep. Morbihan 15 m. S.E. E. Vannes, near the mouth of the Vilaine; with manufactures of linen. Pop. 1218

MUZZA, a tn. New Granada, dep. Boyaca, 55 m. N N W Bogota. It has a tolerable church, three convents, and a poor population of about 300 families.

MUZAFFERNAGUR, a tn. Hindoostan prov and 65 m. N.E. Delhi; lat. 29° 27' N lon. 77° 40' E. It is populous, has two considerable bazars, a large proportion of brick buildings and an old fort.

MYAONDA, or MYONDA, a tn. Hindoostan, prov Mysore, 22 m. N W Chitildroog. It is protected by a fort, which defends an important pass W into the valley of Chitildroog.

MYCENE, an anc. city Greece Morea, near the modern village of Karleia, 16 m. S.W. Corinth. It was founded by Perseus, a.c. 1800, is famous in Grecian history as the capital of Agamemnon, the chief leader of the Greeks at Troy, and was destroyed by the Argives after the Persian war, a.c. 466. It stood on a rugged height, in a recess between two lofty eminences and was defended by a citadel the entire circuit of which is still visible, with walls in some places, from 15 to 20 ft. high.

MYCONE, or MYCOS, a small isl. Greece Archipelago lat. 37° 29' 18" N lon. 25° 21' 21" E. It is of a triangular form, nearly 8½ m. E to W and 6 m. S to N, and mountainous but none of its summits are of any great elevation. The soil is dry but fertile producing barley figs and an excellent species of white beans also orubia, and a good red wine, of which 500 pupas are made annually. Game, of all kinds is abundant but water is scarce, the only description obtainable being rain water, which is regularly preserved in cisterns. On the W side are the towns of Kamezaki and Fort Korfo, and on the N W side the town of Mycone. Inhabitants mostly sea-faring men and considered the best in these seas. The roadstead before the town of Mycone is well sheltered from winds at N N E but S W and W winds blow directly in. Pop. abt 6000 of whom about 5000 are m. to Mytina.

MYDRECHT a vil Holland See MIDDRECHT

MYDRIM par Wales, Carmarthen; 6905 ac. 1 op. 996.

MYER or MYNNA, a tn. Hindoostan, prov. Bengal prov and 105 m. S W Allahabad. It is enclosed by a mud wall and defended by a small but strong fort, occupied as a residence by the independent chief to whom the town, and an adjoining tract of country belongs.

MYLAI, a tn. Saxony circle and 12 m. S.W. Zwickau near the railway thence to Hof with a castle and a chapel, manufacture of linen, bobinet, and screw-plate an alarm work supplied from a manufactory of whom steam in the neighbourhood two cotton and several other mills. Pop. 1849 3028

MYLEMSLOWY par Ireland Kildare 4845 ac. P. 787

MYLOS, a vil Greece Morea, 4 m. S.W. Argos, near the Lernean marsh, where Hercules is fabled to have destroyed the Hydra. Demetrios Tzani, with 600 men here defeated twice that number of Egyptian troops.

MYNIFHMORE, a small isl. Ireland, co. Mayo, in Clew Bay 6 m. W Newport-Point. It is about ½ m. in length is uninhabited and is a coast-guard and fishing station. Immediately S. of it is a smaller island, called Myrnahy.

MYNYDDELWYN, a par England, co. Monmouth about 6 m. S W Pont-y-Pool. It contains the three hamlets of Glanrhyf, Mynyddelwyn, and Penmaen and has a spacious and handsome church, with a tower. places of worship for Baptists, Independents, Welsh and Wesleyan Methodists, and extensive coal mines, iron-works, and sandstone quarries. Area 15 838 ac. Pop. 5994

MYOO or MYOU, a river, Aracan having its source in or near the Esagong Hill 2230 ft. high lat. 21° 30' N from which it flows S and falls into the Bay of Bengal, about lat. 21° 15' N, 20 m. W from the mouth of the Aracan, total course, about 90 m.

MYOS-HOMOT, an anc. seaport, Egypt, now deserted and uninhabited, on the Red Sea lat. 27° 20' N lon. 33° 43' E., once famous as the emporium of Arabian and Indian merchandises, from whence 120 vessels annually sailed to India. The situation is a flat, marshy plain, extremely unhealthy. The port is a small bay protected from the violence of the sea.

MYROES, par Ireland Cork 4119 ac. Pop. 2270

MYTHALIA, par and tn. Ireland Carlow 9460 ac. P. 1932

MYSELENICE, a tn. Austria, Galicia, 16 m. S. W. Cracow on the Raba. It is surrounded by lofty hills and has a small square market place and two schools. Pop. 2141

MYSELOWITZ, a tn. French, prov. Silecia, gov. and 57 m. E.S.E. Oppeln on the Fromme, here crossed by a wooden bridge, 480 ft. long. It has a R. Catholic church and school; a synagogue, and a townhouse. Pop. 1763.

MYSOLE, a large isl., Indian Archipelago, Pitt's Passage, between Ceram and the N.W. extremity of Papua; lat. [W point] 1° 57' S. lon. 129° 41' E. (a). It is 50 m. long E. to W. and 15 m. average breadth. The sea-coast of the island is indented by bays, creeks, and the interior by the original natives. At certain seasons of the year, herds of parades frequent the island in great flocks and are caught with bird-lime, when they are dried with the fish on, and exported. Trepan, nutmeg bark, ambergris, pearls, pearl-oyster shells, to a limited extent, are exported and coarse piece-goods, cutlery, beads, iron to hars, chinaware, looking-glasses, and brass-ware, imported. The channel between the E. and of Mysore, and the W. point of Papua and Salawaty is about 30 m. broad. On the E. side of the island is the village and harbor of Sifa.

MYSOBE, a prov. of peninsular India, in the Deccan, great Madras; lat. 11° 25' to 15° N. lon. 74° 45' to 78° 40' E. greatest length, N.W. to S.E. 280 m., greatest breadth, 240 m. area, 80,898 sq. m. It consists, wholly of an elevated table-land, the base of which as it is indeed of all the Deccan, is granite, with many syenite and trap rocks. It is enclosed on the E. and W. by the Eastern and Western Ghats and on the S. by the Nellore mountains. The soil consists of vegetable mould, 100 ft. thick on most fertile sources of fertility. The elevations by which the level of the table-land is interrupted, are often large masses of syenite or granite, rounded in their outlines and standing naked and detached, or in clusters together upon the plain. Much of the country is overgrown by jungle. The principal rivers are the Vaidavati, Cavery, Toombodra, Bhadr, Arka, and Ponnar Palur and Ponnar but, excepting the Cavery none of these streams attain any magnitude until they have quitted the limits of the province in which, excepting the Cavery, the sources of them all lie. There are no lakes in the N. parts of Mysore, but many large tanks and artificial reservoirs in the high grounds. The climate is salubrious, the air temperate and bracing and moisture abundant, without being in excess. The province, though judiciously cultivated (arising as part from the inferiority of the cattle and implements used), produces rice, raggy wheat, and other grains sugar beet, cotton, castor-oil and various other articles. Raggy or ragge, a kind of millet, is the grain principally cultivated, as it forms the food of all the poorer classes. The W. forests

yield large supplies of sandal and other valuable woods. Sheep are very numerous—red, white, and black; and there is, also, an inferior breed of horses. Mysore abounds in iron ore, which is worked by the natives but in a very imperfect manner. Principal manufactures—black and white muslins, woollen carpets, and shawls. Cotton manufactures are few and of inferior quality. The inhabitants are chiefly Hindoos, and are generally stouter and taller than the people of the Carnatic. There are also considerable numbers of Mahomedans dispersed through different parts. The general language is the Kanarese or Kanarasi. The principal towns are Mysore, Seringapatam, Chittidrog, Nagpur and Bangalore. The province is divided into three great districts, namely Chittakul or Chittidrog, Nagpur or Bednora, and Puttur or Seringapatam. The government is nominally in the hands of a native prince, but actually vested in the British resident at Mysore, appointed under the Madras presidency. Pop. estimated at 3,000,000.

MYSOBE, a tn. S. Hindoostan esp. above prov. 10 m. S. Seringapatam lat. 12° 19' N. lon. 76° 42' E. It is large and populous; and is enclosed by a wall of red earth. The streets are regular and the houses intermingled with towns and temples. The fort, which is separated from the town by an esplanade, is built in imitation of the European style. It contains the rajah's palace and the dwellings of the principal merchants and bankers and many other private edifices. To the E. of the fort, and about 5 m. from the city is Mysore hill, a conical mountain, about 1000 ft. high, on the summit of which is the British residency.

MYSOBE ISLAND. See SCHOUTEN ISLAND.
MYTHOLMOYD, a vil. England, co. York, W. Ridg. 6 m. W. Halifax, a station on the Lancashire and York shire Railway. It is well built of stone, has a church, chapel for Wesleyans and Primitive Methodists; a national school, and two cotton and two worsted mills, wool-combing and hand-loom-weaving are also carried on.—(Local Correspondent).

MYTILENE, an isl. Greece Archipelago. See MYTILENE.
MYTON (from MYTON) par Eng. York (Riding), 1480 ac. Pop. 114.

MYZUM or **MYTUM**, a vil. Amtricia, Galicia, corral and about 40 m. from Stry with iron-mines, a blast-furnace, malleable iron works, and manufactures of articles in iron.

MYZLANOWA, a tn. Russian Poland, 30 m. S.W. Warsaw with two churches. Near it is the old castle of Radziewiczow pasturesquely situated on a lake. It figures much in early Polish history. Pop. 1050.

MYZENSK, in Russia. See MYZENSK.

N

NDIANGUI, a vil. W. Africa, Wallo country. I bank Senegal lat. 16° 25' N. lon. 15° 50' W. This rapidly-rising village was formerly the capital of Wallo and is a landing-place for ships ascending the river.

NTIAGAR, a vil. W. Africa, Wallo I. bank Senegal, lat. 16° 25' N. lon. 15° W., of considerable size, but thinly inhabited. It has some trade in mats, millet, and dried fish. N'YASSA, a lake, Africa. See NYASSA.

NAAGHI, a vil. of N.E. Afghanistan, 30 m. S.W. Bazar lat. 34° 15' N., lon. 71° 15' E. supposed to be the scene of the histories of Alexander, the capture of which was one of the most arduous exploits of that conqueror.

NAALDWIJK, a vil. Holland, prov. S. Holland, 18 m. W. N. Rotterdam with a large old townhouse, a Calvinistic and a R. Catholic church, almshouses for old men, a school, and numerous market-gardens, in which the inhabitants are employed. Pop. 2183.

NAARDEEN, a tn. Holland, prov. N. Holland, 12 m. E.S.E. Amsterdam, near the Zuider Zee, fortified by Vauban and Coehoorn. It is entered by two gates; has a beautified town-house, two bomb-proof watch houses, a arsenal, magazine, two churches, a synagogue, two hospitals, and two schools. Agriculture, wood-cutting in the neighbouring forests, and some calico-weaving, employ the inhabitants. Pop. 2155.

NAAS, a tn. Ireland, co. Kildare, 17 m. S.W. Dublin on the railway to Limerick. It is a very ancient place, was once the residence of the kings of Leinster and surrounded by walls, of which only some fragments now remain. It now consists of a principal and two other streets, indifferently built, and has a parish church, a handsome R. Catholic chapel, an old castle, finely situated, and now used as the vicarage, a diocesan, parochial, and national schools, barracks, a large poorhouse, a jail, and some trade in corn and poultry. Pop. 2071.

NAAST, a vil. and com. Belgium, prov. Hainaut, on the Sambre, 10 m. N.E. Mons with silk-works, a distillery, and a trade in corn and cattle. Pop. 1453.

NAB, a river, Bavaria, formed by the union of the Wald Nab and Hald Nab, which both have their sources in the Fichtelgebirge, and, proceeding S.E.E. in parallel directions, gradually approximate, and join at Ludw. The united stream, now navigable, takes the common name of Nab, and flows easterly S.E.W. to its mouth in the Danube, 5 m. W. Ratibon, total course, about 100 m.

NABAJOA, a river, U. States, Utah, an affluent of the Colorado, which it joins at 87° N.; lon. 111° 45' W. after a W. course of about 200 m. It rises in the sierra de los Minibres.

NABAL, a tn. agency and 48 m. S.E. Tunis, on a small peninsula in the Gulf of Syden, near the ruins of the ancient Naxos. It is famous for the pottery.

NABBURG, a tn. Bavaria, prov. Palatinat, on the Nab and the Hutenbach, 80 m. N. Ratibon with three churches, manufactures of linen a brewery and a fluor spar quarry. Pop. 1860.

NABOQ, or **NABED**, a river and cape, Persia, prov. Laristan. The river has its sources in the province of Fars near Firozabad about lat. 28° 40' N., lon. 52° 48' E., from which point it flows S.E. to lat. 27° 41' N. lon. 56° E. when it bends to the S.E. and falls into the Persian Gulf a little S. from the cape of same name, which is in lat. 27° 23' N. lon. 52° 59' E. (N.) About 8 m. inside this cape, lies a small town of the same name, on the S. side of the bay formerly a lurking-place for pirate vessels.

NABULUS, **NAMOUS**, or **NAMLOON** [anc. *Nabulus*, *Nabopolis*, and *Napopolis*, a city, Asiatic Turkey, Palestine cap. Samaria, pers. Acre. 30 m. N. Jerusalem, lat. 32° 13' N. lon. 35° 25' E. It is most beautifully situated principally along the E. base of Mount Gerizim, surrounded with fertile soil and well watered fields and gardens of flowering and fruit trees. In form, it is long and narrow consisting of but two streets. The houses are of stone, lofty and well built particularly in the Samaritan quarter. It has several mosques and bazars, and a Greek church, manufactures of soap which is of superior quality, and cotton fabrics and a considerable trade. It is also frequented by caravans from Egypt, and other neighbouring countries. A little N. from the town at the foot of Mount Elbal there are many sepulchral excavations, and on the summit are other ruins. The chief objects here venerated and visited are the tomb of Joseph and of Joshua, and Jacob's well—the last 3 m. on the road to Jerusalem. Pop. estimated at 8000.

NACHAR, a vil. of N.W. India, state Bhammer dist. Kanawur on a hill, sloping down towards r. bank Barlet about 7000 ft above sea-level, 50 m. N.E. Simla. It is a large place, containing many good houses and has much cultivated ground, cropped chiefly with millet and buckwheat and numerous of fine fruit-trees among which walnuts, apricots, and mulberries, were common, and the vine, though not in a thoroughly suitable climate, ripens its fruit. About 8 m. above the village, the Barlet is crossed by a singular wooden bridge.

NACHOD, a tn. Bohemia, circle and 10 m. N.E. Küngráz, on the Mettau. It has two churches, an old castle an hospital and some linen weaving. Pop. 2163.

NACIMENTO a tn. Spain, Andalusia prov. and about 24 m. from Almería with uneven, uncommodious streets, a church, chapel-house, prison and primary schools several oil and flour mills and a trade in corn maize oil, wine and silk. Pop. 8000.

NACKENHEIM, a vil. Hesse-Darmstadt, Rheinhessen, circle Mainz, near Oppenheim, with a church, townhouse, school and numerous mills. Pop. 1123.

NACKINGTON par. Eng. Kent 906 ac. Pop. 140.

NACOGDOCHES, a tn. U. States, Texas cap. dist. lat. 31° 40' N. lon. 94° 55' W. on one of the upper branches of the Neches. It was formerly a military establishment of the Spaniards. In 1819, it was entirely broken up and abandoned but it has since recovered and may now contain between 8000 and 8500 inhabitants.

NACTON par. Eng. Suffolk 1983 ac. Pop. 810.

NACUNDI, a tn. Ind. Andhra, one of the Pledge group, on a stream, about 30 m. above Rawa. It stands among beautiful scenery embellished by clumps of noble trees but has suffered much from wars with the people of Amban. Pop. about 600.

NADAB, a vil. Hungary Thither Thes on Arad on the White Hron with a church several flour-mills, and a considerable trade in cattle. Pop. 1347.

NADAE, two places, Hungary.—1 A vil. Thither Thes, co. Arad, with a church. Inhabitants chiefly occupied in rearing horned cattle, swine, goats, and bees. Pop. 1124.—2 A market tn. Hither Danube, co. Presburg with a church synagogue, and distillery. Pop. 1422.

NADARD two places, Hungary.—1 A vil., Thither Danube, co. Banya, dist. Mohacs with a church and a handsome summer palace of the bishop of Fünfkirchen. Pop. 11.

Near it is a good quarry. Pop. 2314.—3 (or *Nadose*) A vil. Hither Thes, co. Abanyur on the Hernad, about 16 m. from Kacsan with a handsome church, three churches and a large mill. Pop. 1136.

NADINDAL, a tn. Russia, Finland dist. and about 12 m. N.W. Abo on a lake with a church, manufactures of woollen woary and a trade in cattle and provisions. P. 600.

NADZEGGI, or **NACZEGGI**, a vil. Hungary Hither Danube co. Presburg about 80 m. from Tyrna, in a well wooded district, with a church and extensive manufactures of baklava, and other articles of taste. Pop. 1969.

NADIVAR, two places, Hungary.—1 A market tn. Thither Thes, co. Szabolcs, 30 m. W.S.W. Delmezin. It has a Protestant and a Catholic church a synagogue, and a considerable trade in all kinds of agricultural produce. Pop. 6171.—2 A vil., co. Pesth with a Catholic church. Pop. 1648.

NAFLE a tn. and par. Switzerland, cant. and 4 m. N. Glarus, near 1 Bank Luth. It stands at the foot of the Rausberg contains a handsome church and a Capuchin monastery occupying a height on which an ancient castle formerly stood and has manufactures of pottery. In 1588 a handful of Swiss peasants here signally defeated their numerous horde of Austrian troops. Pop. 1847.

NAFERTON par. Eng. York (E. Riding) 4330 ac. Pop. 1260.

NAGAMANGALAM a fortress, Hindoostan prov. Madras, prov. Mysore lat. 12° 49' N. lon. 76° 48' E. It has a square citadel in which are two Hindoo temples, and all the public granaries and storehouses.

NAGAL—1 A small tn. or vil. Central Ass., principal place of a petty state, also called Naga, on the banks of an affluent of the Ghight defended by a fort.—2 A considerable walled tn. Afghani tan on the plain of Dainow W. of the Indus, and at the foot of the Salt or Kala Dagh range of mountains. It is a commercial place, and has a good bazaar. The surrounding country is fertile and well cultivated.

It has a considerable trade in silver, brass, and other goods, sold chiefly to the Chinese. The deer are hunted in herds, and taken with alkali cords, and afterwards killed 50, 60 and even as many as 100, are sometimes taken at one time.—2 A river, Banjermaasin an affluent of the Banjar which it joins about 85 m. N.E. the town of Banjermaasin after a S.W. course of above 100 m. through a fertile and populous district.

NAGARANU a tn. Hindoostan kingdom of Ondé, dist. Bainswara, about 70 m. E.S.E. Lucknow. Pop. 5000.

NAGREKE a military station and fort, Hindoostan principal city Sikkim 87 m. N.W. Purneah lat. 26° 68' N. lon. 86° 8' E. It is a place of great strength naturally and is considered the key to the hills in this quarter.

NAGOLD a tn. Württemberg circle Schwabenzell on the Nagold 26 m. S.W. Stuttgart. It contains the ruins of an old castle and a bathing establishment, erected over a mineral spring and has manufactures of woollen and linen cloth tanneries, dye-works, and worsted mills and a trade in wood. Pop. 2397.

NAGONE or **NAGORA** a large vil. Hindoostan, prov. and 100 m. S.W. Allahabad, composed of mud houses, roofed with tiles lat. 24° 57' N. lon. 80° 25' E.

NAGORE several places Hindoostan.—1 A tn. prov. Bengal 63 m. W.S.W. Moorshabadi lat. 23° 55' N. lon. 87° 20' E. of great antiquity having been a celebrated fortress as early as 1244 when it was esteemed the bulwark of the Bengal provinces against the incursions of the W. mountaineers. An area of 10 m. in diameter round the town, was formerly enclosed by a mud rampart and crenelated, which is still in tolerable preservation. The ruins of a palace, belonging to former rajahs, seated on the margin of the sea tank, with several mosques, are all the vestiges that now remain of this ancient town.—2 A walled tn. prov. Rajpootana, 68 m. N.E. Jaipur famous for its manufactures in brass and iron. Water source. Pop. about 40,000.—3 A seaport in coast of Coremandel lat. 10° 49' N. 4 m. N. Negapatnam. It is populous has several good streets and well-stocked bazars, and a considerable number of trading vessels, some of 200 and 300 tons burthen. There is here a curious mineral.

150 ft high and several white pagodas, that form excellent sea-marks, erected at different times by the nabobs of the Carnatic. A considerable trade is carried on in piece goods, rice, &c. with Sumatra, Malacca, &c. The harbour is formed by the Nagore, and has 6 ft. on the bar at high water. The anchorage is 3 or 4 m. off the entrance. In 5 or 6 fathoms. The coast is low and at times indented near the mouth of the river.

NAGOTAMA a tn Hindoostan, prov Arracanah, 57 m. S.E. Bombay lat. 18° 30' N. lon. 78° 16' E. with a remarkable stone bridge of admirable masonry.

NAGPOOR or **BERAR** (Kondoon cr), India. See **BERAR**. According to the parliamentary report on the trigonometrical survey of India, printed in 1851 the area of Nagpoor is 76,452 sq. m. and the population 4,650,000.

NAGPOOR or **BERAR**, a large tn. Hindoostan, up above kingdom, 440 m. N. N. E. Bombay lat. 21° 9' N. lon. 79° 11' E. It occupies a low situation, is of very irregular figure and 7 m. in circumference. The principal streets, with one exception, are narrow mean and dirty intersected by many lanes and water courses, which last during the rains swell to torrents frequently impassable. The principal building is the rajah's palace but it has no pretensions to either beauty or splendour being completely choked up by mud and cluttered from close under the walls. Some of the principal streets and bankers have large houses of brick and mortar with flat roofs, but most of them are old and dilapidated. It is a military station and contains some missionary schools. Pop. about 115,000.

NAGY ALMAJ, two places, Austria, Transylvania — 1. A vil. co. Hódos, near Klausenburg, with a Greek church. Pop. 1248. — 2. A vil. co. Havrad on an affluent of the Maros, 26 m. from Sibot with a Greek church. Pop. 950.

NAGY APOLJA a vil. Austria Transylvania, 6 m. from Beszter, with two churches. Pop. 1401.

NAGY ASZON, a market tn. Hungary, co. Eszseg, on the Unga, 42 m. W. N. W. Fodorshon with a Franciscan monastery and a trade in cows and cattle. Pop. 1066.

NAGY BALON a vil. Hungary co. Bistegh about 10 m. from Maros with a trade in cattle and wine. Pop. 2054.

NAGY BETHA a market in Hungary co. Trenschin r. bank Waag about 9 m. from Silem with a l. Catholic church a synagogue an ancient castle manufactures of earthenware and a trade in timber. Pop. 2980.

NAGY BOGOS, a vil. Hungary, co. Kermaros on the Theise, 5 m. from Sength with a Greek church, and salt-works. Pop. 2355.

NAGY BUS a vil. Austria, Transylvania, near Szent Martony with a Protestant and a Greek church. Pop. 1494.

NAGY CSEZ, or **SCHEZ** a vil. Transylvania, near Her monstadt with a Protestant and a Greek church. Pop. 1680.

NAGY DIBON, a vil. Austria. See **HETAU**.

NAGY VABAD a tn. Hungary. See **KOMARNDOR**.

NAHAN a tn. Hindoostan, cap of principality Burmoor 128 m. N. by E. Delhi, lat. 30° 35' N. lon. 77° 16' E. 3247 ft above sea level. It is a neat and open town, built of stone, and a place of considerable strength.

NAJLA, a river Germany which rises in an isolated district of Oldenburg in the S. of Rhenish Prussia. flows N. E. then E. separating Rhenish Prussia from the House Hamburg district of Meissenburg and Rhenish Bavaria and finally N. between Rhenish Prussia and House-Darmstadt, to its confluence with L. bank Rhine, at Bingen. Its principal affluents are on the r., the Glan, Alsea, and Appel and on the l., the Iron Har Flech, and Simmer total courses, about 75 m. of which 25 m., commencing at the confluence of the Glan are navigable.

NAHR-EL-AST a river Syria. See **AST**.

NAJAD a group of low coral isls. N. Pacific. Caroline Is. lat. 5° 35' N. lon. 153° 52' E. They are connected by coral reefs, forming a lagoon inside occupying an area 15 m. in circuit are covered with coconuts and bread-fruit trees and appear to be well inhabited. Between this group and that of Young William there is a clear passage, 5 m. wide.

NAJALA a tn. Bavaria, circle Upper Franconia, l. bank Selbitz, 39 m. N. E. Bamberg with a church, and woolen and cotton manufactures, alum, vitriol, iron and copper works a quarry of green marble, several mills, and some trade in cattle. Pop. 1619.

NAILEEA par Eng Somerset, 2771 sq. Pop. 2543.

NAILEEA a vil and par England, co. Somerset, a station on the Bristol and Exeter Railway, 6 m. S. E. W. Bristol with an ancient parish church, surrounded by a lofty embankment, and planned to form, Independent and Wesleyan chapels an extensive manufactory of brown glass, numerous collieries and quarries of building and paving stone. P. 2850.

NAILEONE, par Eng. Leicester; 8508 sq. P. 668.

NAILESWORTH a vil England co. Gloucester, on the road from Bath to Cheltenham 2 m. W. S. W. Minchin Hamp-ton; with an Episcopal chapel places of worship for Independent Baptists, Wesleyans and Friends, a philosophical institution, and several woollen cloth factories, in which almost all the inhabitants are employed. Pop. 1121.

NAIMAN a tn. Central Asia, Khanat and 17 m. S. E. Khiva on a canal from the Amoo. It lies high is surrounded by a well-kept wall, and has a fertile soil the cultivation of which is the chief employment of the inhabitants.

NAIN a tn. Hindoostan kingdom of Oude, dist. Seion, about 45 m. N. W. Allahabad. Pop. 10,000.

NAIN, a tn. Palestine mentioned in the New Testament as the place where our Saviour performed one of the most remarkable and interesting of his miracles, by restoring the widow a son to life. The locality has never been lost sight of but the town, now called Nain and about 3 m. S. by W. Mount Thabor has dwindled into a small hamlet.

NAIRAI one of the Feroe Isls. S. Feroe, famous for its manufactures of mats, baskets, &c. in which a large ex-change trade is carried on with the other islands of the group.

NAIRN or **NAIRNBERG**, a small N. co. Scotland, bounded by the Moray or Murray Firth. L. by co. Elgin or Moray S. E. by a detached portion of co. Inverness S. by a detached portion of Ligon and W. by Inverness, cap. Nairn. It is about 22 m. long N. to S. and 15 m. broad S. to W. area 300 sq. m. or 128,000 ac. of which about 20,000 ac. are under cultivation. The S. part of the county is hilly and composed of granite and granite rocks the lower valleys are occupied by the old red sandstone and are of a more fertile nature. Marl and freestone are found—the former in abundance. The principal rivers are the Findhorn, along which much beautiful and picturesque scenery occurs and the Nairn both having their sources in the co. Inverness and flowing in nearly parallel courses, S. E. W. to N. N. E. There are a few small lakes, the largest in the N. part of the county. The soil is various along the coast. It is generally a rich loam on a sandy or gravelly bottom or a stiff red clay. Considerable attention has been paid to the improvement of the breeds of cattle. There are about 8000 ac. of natural wood remaining, and about 4000 ac. of plantations the latter said to be, generally in a thriving state. The only manufacture is a little woollen cloth. The chief trade consists in the export of timber cows sheep cattle, and salmon. P. (1851), 9906.

NAIRN a royal burgh and seaport Scotland, cap above co. l. bank and near the mouth of the Nairn. It is a clean healthy little town and consists of one spacious, and several narrow and irregular streets lighted with gas. It has a jail and a courthouse a handsome academy an Established and a Free church, several dissenting chapels, and an elegant Episcopal chapel. Coal lime, groceries, &c. are imported and timber, fish, stones, and grain exported. This harbour is formed chiefly by a pier at the mouth of the river but, from the accumulation of sand it is not accessible to vessels of large size. The cod and haddock fisheries are very extensive. Nairn is fast rising into repute as a watering-place for which all the usual conveniences and amusements have been established including bathing, &c. The environs are pleasant and finely varied. Pop. burgh (1851) 8430.

NAJAG, a tn. France, dep. Aveyron, l. bank Aveyron, here crossed by a handsome stone bridge, 80 m. W. S. W. Rodez. It is commanded by an old castle whose masonry walls resisted the wild attempts of the revolutionists of 1793 to overthrow them, and has manufactures of serge and peak sheeting and a trade in flax for which the town is famous, linen, cattle, prunes, and hemp. Pop. 1368.

NAJADASS, a vil. Hungary, forming a Walschitz-Illyrian regimental district about 20 m. from Walschitz, on the Nairn with a Greek non united church. Pop. 1735.

NAJERA a tn. Spain Old Castile, prov. and 6 m. W. Logroño l. bank Najerilla, streets generally dark, dirty and

indifferently paved. It has a courthouse a large and substantial prison two primary schools, three small hospitals, three parish churches, two convents, two promenades, two tanneries, seven flour-mills and a few looms for ordinary linens, wine, garden stuff, and fruits, are exported. Although a place of little importance now, Najera was once the residence of the kings of Navarre and here St. Ferdinand was crowned. Some traces of its former splendour may be found in the Benedictine monastery of St. Mary, which has contained 85 bodies of the royal families of Castile and Navarre. Pop. 2590.

NAJERILLA, a river, Spain, Old Castile, prov. Logroño. It flows N. and joins the Ebro 8 m N by E. Najera toll course, about 20 m. It abounds in excellent trout, barbel and eels.

NAKAB-AT-HAJAR, a ruined city in S. Arabia, Hail-mant, lat. 14° 40' N. lon. 41° 35' E., on a hill, which stands out in the centre of an extensive and fertile valley, called by the natives Wadi Mafah. It presents nothing but a mass of ruins, surrounded by a wall. Its history is unknown but it is supposed to date from a very remote period.

NAKEL, or **NACKEL**, a tn. Prussia, prov. Posen, gov. and 16 m. W. Bromberg, r. bank Netze, and at the commencement of the Bromberg canal. It has two churches and a synagogues manufactures of woollen cloth hats and leather and some trade in corn and cattle. Pop. 2138.

NAKHITSCHIEWAN, two places, Russia.—1 A tn. gov. Ekaterinodar dist. and 7 m N. E. of Rostov r. bank Don. It stands on a height, has wide, regular and well cleaned streets and is built of good houses, generally in the Oriental style. It contains three churches a convent school and printing-press, all Armenian, and a large bazaar well supplied with all kinds of merchandise from Persia and India has manufactures of cotton and silk stuffs, and morocco leather soap-works and brandy distilleries and carries on an extensive trade both with the inhabitants of the neighbouring districts and the more distant Tatars, Nogais and Circassians. It also has relations with Astrakhan and Constantinople. One of the most lucrative branches of its trade is pearls and precious stones. The inhabitants are almost all Armenians, the town having been originally the one of an Armenian bishop, and being now the residence of the Armenian Patriarch. Pop. (1803) 14,105.—2 A tn. Trans-Caucasia, on an elevated plain near r. bank Aras, 175 m S. Tiflis said to have been founded by Noah. It consists of regularly formed streets and near, well built houses, mostly of freestone, but partly of wood plastered with mortar and all covered with tiles and has a considerable number of well-stocked shops, three churches, and a townhouse, manufactures of morocco leather earthenware, &c. tile works, and a considerable trade with the adjoining districts. Pop. (1842) 1993.

NAKHODLI, a tn. Persia, prov. Azerbijan S. S. W. Lake Urmiah. On a height overlooking the town is a quadrangular fort with eight bastions.

NAKILLO, a maritime tn. Persia, prov. Laristan lat. 28° 38' N. lon. 55° 30' E. with a fort and a detached tower for its protection. Near the shores are regular sand-dunes, but the anchorage is exposed to N. W. winds.

NAKO, a vil. Tibet, dist. Piti or Suti among the W. Himalayas, 12,000 ft. above sea-level and on the shoulder of the great mountain, Porgyal, which has an additional height of 10,000 ft. 108 m N. E. Simali. It contains a Buddhist temple, surrounded with full-sized figures of the different incarnations of Buddha, and, though too high for fruit-trees, grows crops of grain, particularly barley. The inhabitants have the pure Tibetan physiognomy.

NAKO NAKO, a group of small isles. W. coast, isl. Sumatra, W. from (a) Nias lat. 0° 50' N. governed by a rajah **NAKOFALVO**, or **NAKOLDA**, a vil. Hungary Thierthel, co. Torontal, 37 m. E. by N. Temesvar, in a fertile gran district. It has a church. Pop. 3205.

NAKSEKOV (Latin *Naxos*) a tn. Denmark, the largest and most important on isl. Laaland on a fford of same name. It was at one time fortified, and exports a great deal of corn. Near it, finally situated on the fford, is the old castle of Asilholm or Christiansholm, once a place of great strength, which figures much in the early history of Denmark. Its extensive garden possesses the richest collection of exotic plants of any private garden in the kingdom. Pop. (1841) 2355.

NAL, a small walled tn. Baluchistan lat. 27° 30' N. lon. 65° 50' E. with a fort, and supposed to be of great antiquity.

NALABU or **AKALABU** a seaport tn. Sumatra W. coast kingdom of Aceh lat. 4° 30' N. lon. 96° 5' E. It has a considerable trade in pepper gold dust, &c. Provisions abundant, and moderate in price anchorage in 5 to 7 fathoms, tolerably sheltered by a reef from N. W. winds.

NALB (Osses and Usses) two places, nearly contiguous Lower Austria, near the Bohemian frontier, about 5 m. from Tetschendorf in a district covered with vineyards. They have a parish church, and a trade in wine. Pop. 21 145.

NALCHA, a tn. Hindostan prov. Malwa, Indore 2000 ft. above sea-level lat. 22° 25' N. lon. 75° 29' E. It is an ancient place mostly ruined but partly rebuilt in 1830. Among its remains are a palace mosque, and a fine artificial lake and the whole country for some distance, attests the former magnificence by the ruins of mosques and other public buildings.

NALDA, a tn. Spain, Old Castile, prov. and 6 m. S. S. W. Logroño, r. bank Tago. It has a church, a townhouse an old castle, primary school, and suppressed Franciscan convent manufactures of common linen two distilleries, several oil and flour mills, and a trade in fruit, vegetables, and wine. Pop. 4731.

NALINVES, a vil and epm Belgium prov. Hainaut 27 m E. Mons between two breweries a bleachfield, two corn-mills and a trade in corn. Pop. 1519.

NALLIERE, a tn. France, dep. Vendée, about 17 m. W. Fontenay-le-Comte with a large manufactory of oil from rapeseed a tannery and some trade in corn. Pop. 1040.

NALON (name *Nadon*) a river Spain, Asturias, prov. Oviedo. It rises about 27 m. S. E. Oviedo flows W. N. W. through a coal country, receives the Candul, Trubia, Pignua and Nora, and falls into the Bay of Biscay at Naves, total course, about 60 m. It is well supplied with fish.

NAMALOUK **ISLANDS**, a group of several islands, Pacific Ocean Caroline, lat. 5° 55' N. lon. 151° 10' E. (a) they are low, 3 m. to 10 m. each in circumference, and almost entirely covered with cocoa-nut and bread-fruit trees, numerously inhabited, and all surrounded and connected with a coral reef which furnishes trepang and pearl-oyster.

NAMAQUA (**IRPAT** and **LITTLE** **See** **HOFFENROT**).

NAMAQUA (**ALAND**) **See** **HOFFENROT**.

NAMAQLAS **See** **HOFFENROT**.

NAMENY two places, Hungary.—1, (Kis) A vil. Thierthel, co. Bacs-Bihar 9 m. from Kacs-Bihar-Nemethy with a Protestant church. Pop. 1811.—2, (Vasáros) A market tn. co. Bergh, 1 bank Thierthel, 62 m S. E. Kacs-Bihar with a Protestant church a synagogues, and an old castle. Pop. 809.

NAMESZLO a market to Hungary Thierthel Danube, co. Arva on the White Arva 55 m. N. E. Kremnitz with a church, synagogues, handsome manor-house and a considerable trade in iron with Transylvania. Pop. 1068.

NAMIBSCHU, two places Austria, Moravia.—1, A market tn. circle and 27 m N. Naim on the Olava, here crossed by a stone bridge of seven arches. It has a church and manufactures of woollens and casimires. On a rocky eminence, on the opposite side of the river is an old castle, in which one of the most extensive cloth factories in the empire has been established. Amethysts and topazes are found in the vicinity. Pop. 3200.—2, A market tn., circle and 10 m W. Olmitz, on the Olava with a church and an old and a new castle. Pop. 800.

NAMONOLITO a coral at. group, 1 seile Ocean Caroline, lat. 8° 30' N. lon. 159° 10' E. to 160° 31' E.

NAMOURA one of the Friendly Islands. **See** **AKRA**.

NAMOURA.

NAMBLAU a walled tn. Prussia Silesia, gov. and 31 m E. Breslau 1 bank Wozla. It has a castle, two churches, an hospital and infirmary a courthouse, and provincial and city courts manufactures of woollens flannels, and ribbons, and a trade in cattle. Pop. 5924.

NAMUR, a prov. Belgium bounded, N. by Brabant, N. E. by Liège, E. by Luxembourg, S. and S. W. France, and W. Hainaut greatest length, N. to S. 27 m. greatest breadth, 37 m. area, 1418 sq. m. The surface of this province is greatly diversified, exhibiting alternately mountain and valley wide level plains, and wooded heights. In many parts, particularly

on the banks of the Meuse and Sambre, the scenery is very picturesque so much so, that part of the road from Namur to Dinant, has been named Little Switzerland. Almost the whole province belongs to the carboniferous system, and is characterized by its usual strata of limestone, sandstone, shale, coal and iron. The only varieties of coal worked within this province are a pure subbituminous coal or splint, not interstratified enough to caking and an earthy coal, called *terre houille*. Iron also, and lead and sulphur are found and building stone slate, marble, porcelain and pipe-clay abound. The province is well watered by the Meuse, with its tributary Liese, proceeding from the E. and the Sambre from the W. uniting at Namur, and then flowing E. These rivers abound in fish. About one-half of the whole surface is cultivated, one-third in wood, and somewhat more than one-eighth is waste. The chief vegetable productions are the ordinary cereals, clover, clover, fruit, medicinal and dye-plants. In some places the vine is cultivated. The extensive forests furnish good timber and fuel for the iron-works and shelter large numbers of game and various. The industry of the province, both manufacturing and commercial, is largely developed. Its capital is particularly famous. For administrative purposes, Namur is divided into three arrondissements—Namur, the capital Dinant, and Philippeville subdivided into 16 military and 15 civil cantons. Pop. (1849), 268,143, nearly all of whom speak Walloon.

NAMUR (French, *Namur*, German *Aachen*, Latin, *Namurcum*) a town in Belgium cap above prov at the confluence of the Sambre and Meuse, 35 m. S.E. Brussels. It is surrounded by walls, and is a place of great strength being defended by good fortifications on both banks of the Meuse and Sambre, and also by a citadel seated on steep rocks, rising up at the confluence of the two rivers. It is entered by four principal and seven minor gates, and maintains a communication between its different quarters by means of two bridges—one of three arches across the Sambre, and another of nine arches across the Meuse. The town is beautifully situated

NAMUR.—From St. Lambert's Station on the Meuse.

and is, on the whole, well built, with clean and spacious streets, and several handsome squares. Frequent sieges and bombardments have despoiled the town of almost all its ancient buildings. Among those of more recent times are the cathedral one of the most handsome modern churches of Belgium, the church of St. Louis, the church of Notre Dame, and the churches of St. Nicolas, St. Joseph, and St. Jean Baptiste. The Hotel de Ville, and the belfry tower. Namur is the seat of a bishop, the seat of a court of assizes and of courts of first resort and commerce and possesses a chamber of commerce a royal academy, a Jesuit college, an academy of painting a school of design and architecture, a public library a museum and philosophical cabinet, a chemical laboratory an agricultural society, a seminary, an episcopal normal and various other schools, a penitentiary a deaf and dumb asylum and several other benevolent institutions, an arsenal, and barracks.

Namur is the Belgium Sheffield, and is famous for military tunneling, which occupies nearly a tenth of the population, in

the other great staple. The export trade is considerable, and is greatly favoured by two navigable rivers. Other means of communication are ample. Steamers ply daily on the Meuse, and railways give easy access to Brussels, Mons, and the French frontier. Namur dates from the seventh century, under the name of *Namucina*, *Namurum*, *Castrium*, and *Namoun*. It was taken by Louis XIV. in 1692, and retaken by William III. of England, in 1693. Its fortifications were demolished by Joseph II. of Austria, in 1784 and restored in 1817. Pop. (1846) 22,218.

NAN CHANG, a city China, cap prov Kiangsu, r bank Kan-Kiang lat. 38° 40' N lon. 115° 40' E surrounded by a wall 8 m. in circumference. It is accessible by water from all sides. Barrow estimates the shipping he saw before the place, independently of innumerable small craft, at 100,000 tons.

NAN LISS, a mountain range, China, which separates the basins of the Yangtze kiang and Kan-kiang and provs Quangtung and Quangsi from Hoonan and Koonchow.

NANA numerous places, Hungary particularly — 1, (Also) Thither Danube co. Tolna with a Greek church. It stands in a well cultivated district, in which a good deal of wine is produced. Pop. 1057 — 2 (Also) La Tolna with a Protestant church. Excellent tobacco is grown in the district. Pop. 1875 — 3 (Also) Thither Theiss, no Hercei, in a marshy district, on the Theiss, 29 m. S.E. Eria with a court of justice, and a Calvinistic church. Pop. 2847.

NANAN, a town Hungary Thieria, co. Szabolcs, Hasznok dist. on the borders of a very extensive morass, about 50 m. E. Eria. It has a Protestant and a R. Catholic parish church, and a considerable trade in cattle and agricultural produce. Pop. 7787.

NANGHE a town China, prov Chekiang beautifully situated in a valley of some name, at the confluence of a stream with the Hsuey-chow about 40 m. W. Yangchow-foo. It has a neat and clean appearance, much resembling that of an English town, and consists of houses, generally of two stories ranged along the banks of the river with a picturesque hill behind. It appears to be about 8 m. in circuit and to carry on a very extensive trade, the river being covered with boats, which are constantly plying between it and Yau-chow, Hangchow and many other places both above and below. Pop. about 200,000. — (Furstenau's *Ten Districts of China*.)

NANCOWRY one of the Nicobar islands Bay of Bengal, lat. 7° 57' N lon. 93° 45' E, about 25 m. in circumference soil rich, yielding great quantities of coconuts and other fruits, including plantains, limes, tamarinds betelnut, and molli, a species of bread fruit. Between this island and two adjoining islands, there is a spacious anchorage, in which vessels may lie in perfect security.

NANCY (Latin, *Nannecium*) a town France, cap. dep. Meurthe, finely situated in a fertile plain, near L. lake Meurthe, 177 m. E. Paris on the railway to Strasbourg. It has been styled the prettiest town in France, and the praise, though somewhat extravagant, is not altogether undeserved. It is divided into the old and the new town. The former is, for the most part, irregularly built, streets narrow and winding but several of the buildings are elegant, and not a few of them compensate, by their antiquity for the want of uniformity in their structure. The new town is remarkably elegant, streets straight and spacious, intersecting each other at right angles and the houses, almost without exception, handsome. The Place Royale, surrounded by six or seven fine public buildings, and communicating by a triumphal arch, with the Place Carrière, has seldom been surpassed. The principal edifices are the cathedral, a modern structure in the Italian style the church of St. Eptore with a lofty tower and a fine portal; the church of the Cordeliers, built in 1484, and containing the

tombs of several dukes of Lorraine, the ducal chapel, entered from the church of the archbishops, and built in the form of an octagonal mausoleum; the Hotel de Ville, the university royal college, theatre, barracks, museum library, and several hospitals. In the Place Royale is a fine statue of Stanislas Leszczynski king of Poland, who passed the latter years of his life here as duke of Lorraine, and bestowed upon the town many of its finest modern embellishments. The Cours d'Orleans, occupying the highest part of the town, and finely planted is the principal promenade. Nancy is the seat of a bishop, possesses courts of first resort and commerce a flourishing chamber of manufactures, a university an academy a central agricultural society, an academy of sciences, a second ducal school of medicine, a botanical garden, a school of design and a theological seminary, &c. The manufactures consist of broad-cloth, and other woollen stuffs, hosiery, lace, all kinds of embroidery, stamped paper, oil, liquors, chemical products, &c. There are also numerous cotton-mills, dye-works and tanneries. The trade is in corn, wine, brandy, leather wool, &c., and there are three fairs—two of two days each, and one of twenty. The most memorable event, in the annals of Nancy, is the battle fought under its walls, when the duke of Burgundy (Charles the Rash), was signally defeated by René II. duke of Lorraine and lost his life. Pop. (1859) 88,706.

NAADAN SAR, a small lake, Cashmere, held in high reverence by the Hindoos, and visited by them in pilgrimage, lat 33° 21' N, lon 74° 20' E.

NANDERE, or **NANDANA**, a tn and dist Hindoostan, Decan, Nizam's dominions. The town on L bank Godavery 136 m N N W Hyderabad. lat 19° 2' N lon 77° 55' E. contains a good fortress, built of stone and is a place of general pilgrimage to the pilgrims of the Sikh religion.—The distance is about 150 m long by 85 m broad fertile well watered and capable of being much improved.

NANDRAG, a vil Hungary. Hither Thelma, co. Gömör at the foot of Mount Zelenik about 30 m from Tornallya with a Protestant church, several distilleries, and a transit trade, as well as a trade in iron. Pop 851.

NANEE, a tn Afghanistan 10 m S Ghuznee lat 33° 26' N lon 69° 12' E. near the W extremity of the extensive plain of Shikhar, on the bank of an affluent of the Ghuznee. Elevation above the sea, 7508 ft.

NANFIO on Isl Granian Archipelago. See **AWATIFI**.

NANGASAKI or **NAGASAKI** one of the five imperial cities of Japan and the only place in the empire open to foreigners and that only through Desima (wharf sec). It is situated on a peninsula formed by the deep bay of Obomura, W coast, Isl Kiusiu, lat 32° 45' 52" N lon 129° 45' 53" E. The harbour of Nangasaki is deep about 4 m long, and 1 m broad, affords safe anchorage is sheltered from all winds, and defended by numerous batteries on its shores and islands. The town and its suburbs contain 92 streets, 11,451 houses spreading up the side of one of the hills by which the harbor is skirted. The houses, being constructed of wood, with a mixture of clay and chopped straw and paper windows are very inflammable, and conflagrations are frequent. Each house is enclosed by a verandah, and has a garden behind, invariably laid-out, however small, with the greatest effort at the picturesque rockeries, water falls, lakes, and a family chapel, are amongst the most frequent of the ornaments. The houses contain two government palaces, those of the princes of Fien and Takuma, who furnish alternately the supplies of the port the offices of the charges d'affaires of the princes of Satsuma, of Tamsima, and of the other provinces of Kiana. a college of interpreters for the Dutch and Chinese, a Dutch factory on the artificial island of Danian and a Chinese factory called To-shin-jacki forming the S. suburb. It has, likewise, a prison a house for the insane, an arsenal a botanical garden, several theatres, and a great number of tea-houses and other places of amusement, and is the rendezvous of merchants, learned men, and idlers from all parts of the empire. Its port is filled with ships and its shops and warehouses, for the sale of porcelain—of which there is here an extensive manufactory—spices, cotton, silk, and China goods, are very numerous. There are 61 temples within a short distance of Nangasaki. Like the private houses, these temples are plainly built, and unconsumed, always encircled by a verandah, and surrounded by many smaller temples, like

chapels, and enclosed in a garden. The larger ones are called *yamato*, the smaller ones *myasa*. The Japanese and Dutch assert to the gardens as places of amusement. In most of the temples are large rooms, appropriated to the service of the gods, used for the accommodation of travellers or let out as banqueting rooms. Pop (Siebold) 38,127 exclusive of military and about 6000 priests, monks, and others, in the employment of the Shogun. Some estimates raise it to 70,000.

NANGIS [anc. *Nangasa*] a tn France, dep Seine-et-Marne, 17 m. E N E Melun with a somewhat clumsy Gothic church, the remains of a strong castle, manufactures of leather and a trade in cattle corn, Brils cheese, poultry &c. P 1919.

NANJINGODE a vil Hindoostan, Decan, prov and 15 m S. Mysore, on the Kappla, which, in the vicinity, is crossed by a native bridge, consisting of a long series of tall pointed arches, each about 5 ft wide and remarkable for the solidity of the architecture. The village contains a celebrated temple of *Shiva*.

NANKA a group of three small Isl Indian Archipelago, in the Strait of Banca. They possess good water.

NANKA ISLANDS, three Isl. Indian Archipelago, Strait of Oeapa, between Isl Billon and Banca, 4 m or 5 m from the Banca shore. Great Nanka, the largest, about 1½ m in extent, in lat 2° 25' S, lon 105° 48' 30" E. is moderately elevated as is also Little Nanka, but the middle island is low. Ships in want of wood or water frequently touch here to procure a supply, which may be got conveniently on the largest island.

NANKIN [officially *Kiangning*, a celebrated city China cap. of prov Kiangnan r bank Yang-tse-Kiang 640 m S. by E. Peking, lat 32° 2' N lon 118° 49' E. (N). It is 18 m in circumference, and is surrounded by a wall generally above 40 ft high. The river opposite the city, is 1½ m broad 25 fathoms deep, with a rocky bottom, and an current of 3 m to 6 m an hour. The city lies 3 m S. from the Yang-tse-Kiang, but a part of its walls approaches within 700 paces of the water. The principal streets are of moderate breadth, clean, well-paved and lined with handsome shops, but the houses are in general mean, and only one story high. The view of the city from the porcelain tower is said to be exceedingly pleasing, the whole interior of the city being visible, and the houses so closely packed that the streets can scarcely be traced, while the large trade-like roofs of the temples and the curious gable-ends of the pawnbrokers shops alone out in their various gaudy colours, and the sea of houses which surrounds them. The part of the city occupied by the Man chow is separated by a cross wall from the Chinese town. The great extent of the wall renders the defence of the city difficult besides which it is overlooked from the hills on the E. On that side there are three gates the land towards the river is marshy and the gates are approached on stone cause ways. A deep canal of fresh runs up from the river directly under the walls, on the W. serving to strengthen the approaches on that side. The most remarkable structure now existing in Nankin is the porcelain tower called by the Chinese, the Recompensing Favor Monastery built in 1411, pre-eminent above all other similar buildings in China for its completeness and elegance. It is of an octagonal form, 361 ft high and consists of nine stories each adorned with a cornice and gallery and covered with a roof of green tiles, with a bell at each corner which sounds when agitated by the wind. On the top is a pavilion in the shape of a pine-apple, surmounted by a golden bell. A spiral staircase in the middle of 190 steps, carries the visitor to the summit. In the interior are some apartments richly gilt, and otherwise elaborately adorned. There are, in the city, extensive manufactures of fine *tsun* and *craps*, and the cotton cloth which foreigners call *Nankin* derives its name from this city, paper and ink of fine quality and beautiful artificial flowers of fifth paper are produced here. Nankin is celebrated also for its scholars and literary character, as well as manufactures having many large libraries and book-stores. It is the residence of the governor-general of three provinces, and, consequently the centre of a large concourse of officials, educated men, and students seeking for promotion.

Nankin was, at one time, the most celebrated city in the Chinese empire, and capital of S. China. But, since the seat of Government was transferred to Peking, it has lost its importance, and a great part of its population about a third

of its area being it is supposed, now unoccupied. The ancient wall of the city can be traced for 35 m., but all its ancient palaces have disappeared, and the only remarkable remains of royalty now extant are some sepulchral statues, situated near the walls. It was at Nankin that the British compelled the Chinese to assent to their terms of peace in 1842. Pop. estimated at 400,000.

NANERCH, par Wales, Denbigh and Flint. P. 231. **NANOUKI** and Pacific lat. 0° 11' N. lon. 178° 59' 30" E. 64 m. long, and 8½ m. wide at the E. and diminishing to 2 m. at the W. end, it is of coral formation. It affords neither wood, water nor refreshments. It is, however, thickly inhabited and contains several towns.

NANOUKI or **STONKHAM ISLAND**, S Pacific Ocean, Bishop's Islands; lat. 0° 45' S. lon. 174° 31' E. (s.), 19 m. long, and 8½ m. wide, of coral formation, and partially covered with coconuts, pandanus, and other trees.

NANT, a tn. France, dep. & rayon, 52 m. E.S.E. Rodez. The limestone rocks in the neighbourhood contain a number of very remarkable caverns. Pop. 1628.

NANTOWILL, par Wales, Cardigan 4603 ac. Pop. 783.

NANTERRE (Latin *Nemetodurum*) a tn. France, dep. Seine, near the Seine 6 m. N.W. Paris, on the railway to St Germain en Laye. It is generally well built and being the reputed birthplace of St Genesien, contains a chapel which has long been a noted resort of pilgrims. It has manufactures of glass, wax, cloth and chemical products, is famous for its cakes, and sends a vast number of dishevelled swine to the Paris market. Pop. 2538.

NANTES (Latin, *Condominium Venetiarum*) a tn. France, dep. Loire Inférieure, 7 bank Laire, where it receives both the Erdre and the Sèvre-Nantaise, 269 m. N.W.

between the different parts of which is kept up by at least 18 bridges, several of them handsome. The situation, on an important navigable river within 60 m. of the ocean, is most advantageous for commerce; and the whole town is so well planned, and so regularly and, in some parts, so splendidly built, that it justly ranks as one of the finest towns in France. It has a number of elegant squares, which have little by comparison with some of the best in the capital. The quays, which line the banks of the river, are particularly magnificent and form a promenade of almost unequalled variety and beauty. They extend nearly two miles, are spacious,

THE CASTLE AND CATHEDRAL, NANTES.—From Tour de la Cathédrale, La Loire.

well planted, and adorned with elegant mansions, while the shipping which crowds the harbour of La Fosse, and the number of vessels which are ever in motion on the surface

of the stream give great animation to the scene. The public edifices most deserving of notice are the cathedral externally an unthoughtful pile, from its unfinished towers not rising much higher than the roof, but possessed of a fine portal richly sculptured, the castle, an enormous mass of irregular buildings, flanked with round towers the castle of Bonifay, with a very lofty polygonal tower the Hotel de la Préfecture, with two fine facades of the Ionic order and regarded as the handsomest edifice of Nantes the exchange with a peristyle of 10 Ionic pillars supporting an entablature adorned with 10 statues, each corresponding to a pillar the theatre museum of natural history picture-gallery old mint, now occupied by the courts of justice public library containing 30,000 volumes and several valuable MSS the chapter-house and Hotel Dieu or general infirmary Besides the promenade of La Fosse already mentioned, those of St. Peter and St. Andrew opening into each other, of Henry IV and of the people, are deserving of notice. Nantes is the see of a bishop, and possesses courts of first resort and commerce, a chamber of commerce and exchange a *conseil de prud'hommes* a mint, college, diocesan seminary, and secondary educational school a secondary school of medicine, a hydrographic school of the first class, an agricultural, a horticultural, and an industrial school. The manufactures consist of woollen cloths, serge, damask printed stuff, canvas, varnished lute, marine cordage, chemical products, glass, ship biscuits, &c. there are also

Paris, with which it is connected by railway. The Loire here forms a number of islands, two of which constitute among the finest quarters of the town, the communications

city. The manufactures consist of woollen cloths, serge, damask printed stuff, canvas, varnished lute, marine cordage, chemical products, glass, ship biscuits, &c. there are also

between. The interior may be generally characterized as mountainous, being traversed by the Apennines, which, entering it from the Papal States, proceed through it first in E. and then in a S. direction till they reach it extremely near the Strait of Messina, at the same time throwing off numerous branches, which intersect the country in all directions. Several of the loftiest summits of the Apennines are situated in Naples, among others, Mount Corvo, the culminating point of the whole range, 9619 ft. Mount Amaro, 9181 ft. and Mount Vellano, 9174 ft. But the surface is not always mountainous. Even between the highest ridges, valleys, generally narrow, but often of great length, intervene. Among the lower ramifications, where the hills assume rounded forms, large undulating tracts, equally distinguished by beauty and fertility are found, and towards the coast, both on its E. and W. side, the hills altogether disappear, and are succeeded by extensive plains. The largest of these is on the E. side, the plain of *Apulia*, in prov. Capitanata, Bari, and Otranto, but the most celebrated is in Terra di Lavoro, where it forms a deep alluvial flat, stretching N. from the capital along the shore for 40 m., with an average breadth of nearly 30 m.

Rivers.—The rivers of Naples are very numerous, and carry their waters either to the Adriatic or the Mediterranean. They generally take their rise in the Apennines, at no great distance from the coast, and hence are seldom of great magnitude. To the Adriatic belong the Volturno, Pescara, Sangro, Trigno, Riforma, Portora, Candelara, Cervaro, Carpelle, and the Ofanto, to the Mediterranean, the Garigliano, Volturno, Teleso, Baccaro, and Irredento. The principal lakes are the Colano or Fusaro, in A. Bruttio (Ugento), and the lagoons of Luni and Yaccari in prov. Leporosa, near the shores of the Adriatic.

Climate.—With a surface so greatly diversified the climate necessarily varies much according to locality. In the mountainous districts, where the loftiest summits begin to obtain a covering of snow towards the end of October and retain it for nearly six months thereafter the cold is severe, and makes it impossible to cultivate many plants which grow vigorously under the same latitude, in more favorable circumstances. Even in lower districts, which have a northern exposure the effect is nearly the same, though snow falls seldom, and never lasts long. A very different climate prevails when the surface is low and the hills only serve to protect it from the northern blasts. In such circumstances the summer heat often becomes extreme, but the rigours of winter are unknown, and both spring and autumn are delightful. In the plain of Terra di Lavoro, already mentioned, and several other favoured spots, the climate is of this description, and vegetation, subjected to no check, is always luxuriant, yielding for the slightest exertion of labour the most abundant returns.

Geology.—In geological structure, the E. of Italy bears a considerable resemblance to the N., though the direction of the strata is nearly reversed. In the N., the primitive rocks of granite and gneiss are situated on the frontiers, and the secondary and tertiary formations come successively to the surface in proceeding S. In Naples, granite, gneiss, and mica schist are the predominating rocks in the S. extremity, and are connected N. with few interruptions, occupying the greater part of the toe of the boot. Patches of Jura limestones appear in the same quarter, but the prevailing strata are molasse, and consist chiefly of the marls, travertine, and sandstone, of the tertiary formation. The same formation is largely developed on the shores of the Gulf of Otranto, from which it proceeds N. W. covering a great part of the shore of the Adriatic. It is overlain by arcaceous strata, which form a long, narrow belt on the W. side of it, and are succeeded by the Jura limestones. This formation occupies two very extensive tracts—one extending over a large space in the S. part of the kingdom, and the other stretching along the W. coast, between the Gulfs of Polignano and Salerno. Another tract covers the greater part of the province of Bari. A different formation, not yet mentioned, though in some respects more interesting than all the others, is the volcano, which stretches along the Gulf of Naples, and part of that of Otranto, and covers a large part of the province of Terra di Lavoro with the decomposed lavas, to which it owes its remarkable fertility. There can be no doubt here as to the centre of the volcanic agency, which still continues active, and especially within the Christian era, has burst forth and overwhelmed celebrated cities.

Vegetation, Zoology, &c.—In the northern and southern provinces of the kingdom, the rugged and mountainous nature of the surface, in a great measure, excludes the operations of agriculture. A considerable proportion of it is, accordingly occupied by forests, on which magnificent timber is grown, and the remainder, consisting of extensive tracts of natural pasture, is devoted chiefly to the rearing of horned cattle, sheep, and goats. In the central parts of the kingdom, the general but occasionally oppressive warmth of the climate, secures a large amount of produce, though, with a few rare exceptions, the system of agriculture pursued is wretched in the extreme. The crops follow each other without any regular rotation and the implements are of the most antiquated and inefficient description. It is not uncommon to see oxen employed in threshing out the corn by treading upon it. Wheat, barley, maize, and rye form the principal crops, and, on the finer soils are remarkable both for abundance and quality. On the lower flats, rice is frequently grown. The mulberry and the olive, also, are generally cultivated on a large scale, yielding silk and oil in such quantities as to form important articles of export. Cotton, liquorice, and tobacco form leading crops in particular districts, and many varieties of fruit, especially figs, lemons, and oranges, are very abundant. But the culture which seems to be regarded with most favour and in which most skill is displayed, is that of the vine, which though seldom seen in extensive vineyards, covering large, continuous tracts to the exclusion of other crops, is so generally intermingled with them in all parts of the kingdom, that the aggregate produce must be very great. Several of the wines bear a very high name. Among others may be mentioned the well-known Lacryma Christi and the wine grown like it, on the slopes of Vesuvius. There are few countries in which irrigation might be turned to better account, but it appears to be imperfectly understood, and is confined within the few narrow limits. Among domestic animals, by much the most numerous are sheep, to the rearing of which considerable attention is paid. Among horned cattle are several good native breeds and large herds of buffaloes wander over some of the marshy plains. The horses of Calabria, though dissimilar to none, have long been famous for activity and spirit, and those in the neighbourhood of Naples were at one time so highly esteemed, as to be in considerable demand in other countries. They have, latterly been allowed to degenerate and the export has all but ceased. The most common beasts of burden are mules and asses. Numerous herds of goats are kept among the mountains and hills, almost in a wild state, are left to seek their food in the forests. There, too, game, both large and small, is very abundant and wolves are not uncommon. Various reptiles, and other animals, many of them venomous, infect the more S. parts of the kingdom, and stinging insects exist in such numbers, during the warm months, as to make residence there at that season anything but desirable. Fish abound both in the rivers and on the coasts. On the latter, the tunny and anchovy fisheries are carried on to a large extent, oysters, also, continue to be so celebrated as they were in ancient times, and in many places fine coral is fished up. The minerals of the kingdom have not been properly explored, there are few indications of metals, but beds of rock-salt are found chiefly in Calabria, sulphur in the volcanic region, and alum sulphate, and sulphate in several districts; the quarries furnish excellent marble and lava, which are extensively used both for building and pavement.

Manufactures and Trade.—Manufactures have not made much progress. In some places large factories exist; but, in general, artisans work at home. The most important industrial product is silk, which is not only spun to a large extent, but woven into excellent fabrics. The other principal articles are woolens, flannels, hosiery, straw hats, caneage, and muscades. Trade, which, if left to its natural resources, might soon become important, is cramped and almost destroyed by barbarous regulations. Under the pretext of affording protection to native industry the most important foreign products are excluded by enormous duties; and then, in order to secure a revenue, even home products are heavily burdened. In such circumstances, competition with countries where a more enlightened policy prevails is impossible, and trade is necessarily confined to the import of those articles of necessity or luxury which the inhabitants cannot or will not want.

and the export of those in the production of which their native superiority is sufficient to overcome all other disadvantages. The latter consist principally of agricultural produce, wine, oil, liquors, coral, lamb and kid skins, mace, rags and bones. In 1850, there arrived in Neapolitan ports, 23,364 vessels, of which 3371 were foreign aggregate tonnage, 500,807, and there cleared the same, 23,160 vessels, of which 3286 were foreign, tonnage, 507,959. In 1851 the mercantile marine included 10,538 vessels, tonnage 221,749, being an increase, over 1850 of 3565 vessels, and 65,228 tons.

In carrying on this trade, Naples has the advantage of a great number of excellent harbours but is greatly hampered by the want of sufficient means of internal communication. The only railway yet completed is in immediate communication with the capital—one line stretching from it, in a S. E. direction, close to the coast, and as far as the town of Salerno, and another stretching N. to the town of Capua. There is also a branch line to Nola. In Naples, accounts are kept in ducaia which are nearly equal to 8s. 6½d. Sterling. The principal coins are gold pieces of 30 15 and 5 ducaia, and silver pieces, called carlini, each of which is ½ of a ducaia. For minor fractions, the carlino is subdivided into 100 grani. For weights, 1 lb. of 12 oz. = 11 oz. avoirdupois, and the rotolo = 81 oz. avoirdupois are used; larger weights are the cantaro, of 100 rotoli, and lesser weights, the oncia and the ottavo, the former being ½ and the latter only ¼ of the lb. For dry measures, the tomolo = 1 45 Winchester bushels, and the corvo = 88 bushels, and for liquid measure, the barto = 8½ imperial gallons, the barto = 12 barto, and the corvo = 2 barto, are the standards. The principal linear measure is the palmo = 10 98 English inches. 8 palmi make a canna, and 7000 palmi a Neapolitan mile = nearly 1½ in English. The standard square measure is the pascetto containing 7½ square palmi: the grasso = 30 pascetti, and the meglio = 30 grasso. The meglio is equal to 4 rodis 12 porches.

The Government of Naples is a hereditary monarchy, which, from the absence or inefficiency of constitutional checks, makes a very near approach to despotism. A nominal parliament holds its sittings regularly at Naples, but its privileges are so restricted that all power, legislative no less than executive, virtually centres in the Crown. Numerous courts ascending gradually to a supreme court of cassation, have been erected for the administration of justice and are said to administer it with commendable impartiality, when the questions to be decided are strictly private, but when they happen to have a political bearing the judges are too apt to become mere tools of the court, indeed it is beyond a doubt that, in regard to political liberty and political justice, no country of Europe stands lower in the scale than Naples. The total number of criminal offences in 1850, was 16,628. Of these, 4016 cases involving 5805 accused, were brought before the high court, when 1799 were liberated and 4518 condemned. The number of accused in 1850, was 5617 being larger in proportion to the population than in 1850. The E. Catholic is the established religion, and is nominally protected by almost all the authorities. Education is nominally respected, the gross ignorance and misery, overall, and all the thoroughfare swarm with mendicants. It would seem, however, that the natural advantages of the country are so great as to cause a continued increase of population, in circumstances where it might almost be expected to retrograde. In 1835, the population, N. of the Straits of Messina, was 5,946,000. In 1845, it was 6,288,618. The revenue, obtained partly by indirect taxes, but chiefly by an enormous land tax amounting to a fourth of the rent, was estimated, in 1849, at £2,329,935. The army, raised partly by conscription and partly by voluntary enlistment, numbered 64,287 men. The navy consists of one ship-of-the-line of 80 guns, 11 frigates, six of them with steam-power, and a number of smaller vessels, numbering, in all about 500 guns. The total number of persons—sailors, marines, officers, &c.—employed in immediate connection with the navy, is 5582.

History.—Continental Naples corresponds nearly, in its N. part, to Campana and Samnium, and, in its S. part, to Apulia, Lucania, Messapia, and Bruttium. The last four are often comprehended under the name of Magna Græcia, given to them because long occupied, if not originally peopled, by colonies from Græce. The frugal lives, and independent and

warlike spirit of the natives, have been celebrated by classic historians and poets, but their resistance to Rome proved ineffectual, and, shortly after the defeat of Pyrrhus, they were annexed to the Roman republic, and long formed one of its most valuable provinces. On the breaking up of the Roman empire, the country was overrun by hordes of barbarians, and passed successively under the domination of Goths, Lombards, Arabs and Normans. In more modern times, also it has been subjected to numerous vicissitudes. In the early part of the 16th century it came into the possession of Spain, which retained it for nearly two centuries, and governed it by viceroys. In 1734, it was erected into an independent monarchy, in favour of the Infanta Don Carlos, or, as he is sometimes called, Charles of Bourbon. His reign was not without vigour and much good was done, but on his accession to the throne of Spain, in 1759 he was succeeded by his son Ferdinand IV, then only in his eighth year. A regency was accordingly established, and the nation experienced all the evils of a long minority. The king himself, raised even after he became major showed little inclination to exercise his rights and the Marquis Farnese who had long been at the head of the regency continued virtually sovereign. Ferdinand, though not devoid of natural talents gave himself up to the pleasures of the table and the chase, pursuing a course which, to say the least of it, was very unkingly. His queen was animated by a very different spirit and, having succeeded in obtaining Farnese's dismissal, took the reins into her own hand, and managed them with great talent, though too often in a capricious tyrannical and vindictive spirit. The French revolution soon broke out, and extending its conquests in all directions ultimately established its ascendancy even in Naples. The king who had at first shown symptoms of reviving spirit, soon relapsed into pusillanimity and fled across the Straits, leaving his Neapolitan subjects to their fate. Strange to say, the strongest resistance which the enemy experienced proceeded from a quarter where it might least have been expected. Within the court and the greater part of the nobility had fled, and the great body of the upper and middle classes were either treacherous or cowardly, the lower classes of Naples, composed of the very dregs of society, became wretches, who could neither gain nor lose by political changes, raised the patriotic standard and fought like heroes or rather demons for as may be supposed, the atrocious of the warfare were hideous. Napoleon ultimately succeeded in placing first his brother Joseph, and, on Joseph's removal to Spain, his brother-in-law Murat, on the throne of Naples. During Napoleon's reverses, Murat sought to secure his crown by abandoning him, but by subsequent proceedings forfeited both the crown and his life. Ferdinand regained his throne and made many liberal promises, which were not fulfilled. His successor Francis II continued the abuses of the old regime. The discontent of his subjects broke out in 1820, on the arrival of Garibaldi in universal rebellion. The king was deposed and Naples declared part of the kingdom of Italy. December 17 1860.—(See *Cor del Risale*.)

NAPLES (Italian, Napoli; Latin, Neapolis; German, Neapel; Spanish, Neapolé), the cap. city of the above kingdom, and of prov. of same name, on the W coast of Italy, 117 m. S. E. Rome in lat. (observatory) 40 51 49 N., and lon 14 15' 30" E. (n) Its site is one of the most magnificent on which can well be imagined, on the N. side of a nearly semicircular bay, partly stretching along the shore, and partly climbing the adjacent heights, bounded on the W by the picturesque heights of Posillipo, and on the E by the lofty spire of Vesuvius, while the surrounding country, rich in natural beauty derives additional attractions from the numerous villas and other objects with which human art has embellished it. The best distant view of Naples is obtained in approaching it from the sea, and on passing the beautiful islands which guard the entrance to its bay. A favourite and most picturesque view is obtained from the Vomero, a rising ground, covered with fine villas, to the W. of the city the fort of St. Elmo comes into the foreground on the left, the city and the bay studded with sails, form the centre of the picture, while the vista is terminated by the smoking crater of Vesuvius. Naples is further surrounded by walls, so regularly fortified, but is protected by three forts or castles—St. Elmo, the largest of the three, occupying a hill on the N. W. side, and containing excavations and other works built on

of the rock. Castello Nuovo, almost close to the sea; and Castello dell' Ovo, on a rocky islet, connected by a jetty with the land. Immediately adjoining is a large arsenal and cannon foundry which has the appearance of a fortification, being

NAPLES, from the Vomero.—Drawn from Nature, and in Water by W. L. Lockhart.

streaked with bastions. The great mass of buildings of which the city consists, forms an irregular oblong the greatest length of which from N to S is 3 m. the breadth from E. to W., about 1½ m. and the circuit nearly 8 m. By including the suburbs, which encroach so closely upon the town that they can hardly be distinguished from it, the circuit will be nearly doubled. Of the gates, some of which are now near the centre of the city, that of Capua, with reliefs

and attended with the worse effect of enclosing both light and air. The best street is that of Toledo, which, opening from the market-place, on the N extremity of the city, traverses it centrally throughout its whole length, and terminates at the palace not far from the shore.

It forms the principal thoroughfare, but both in its buildings and its shops, is far inferior to the leading streets of most other European capitals. The squares are numerous, though generally of small dimensions, irregular in form and lined by buildings in which uniformity of design appears to have been altogether forgotten. The largest and most handsome are the Largo di Palazzo, chiefly occupied by the palace, which gives it its name, and a large modern church, intended to imitate that of St. Peter at Rome; the Largo di Castello, planted with trees, and the Piazza di Mercato or Market-place, already mentioned. Many fountains well supplied with excellent water, and often ambitiously but not very tastefully ornamented, are

scattered over the different quarters of the city and fine promenades are furnished by several of the quays along the shore. Among others may be mentioned those of Santa Lucia, and Spaggia di Chiaja. The latter which is of great length, is adorned with numerous marble statues, and in fine evenings is crowded with equipages, often of an elegant, and often also of a very grotesque description, every Neapolitan who can muster any sort of conveyance deigning to appear on foot.

The public edifices are not very remarkable, and suffer much in the estimation of strangers who have come from the N of the peninsula, from being contrasted with much more noble structures. The most deserving of notice are the cathedral, a large Gothic building erected on the site, and supported by 100 granite pillars, originally forming part of a temple of Apollo, much injured by the overloading of incongruous ornaments, but held in high veneration in consequence of possessing the relics of St. Januarius or Gennaro; among others, the phial of his blood, the annual making of which, on the 19th September is one of the few public miracles with which the church of Rome still ventures to delude its votaries the church of San Gennaro, said to have been originally founded by Constantine the Great, on the site of a temple of Mercury, and, though subsequently rebuilt, still very ancient the church of St. Paul, a handsome edifice, internally faced with marble, the churches of St. Maria del Parto, San Saverio, St. Philip de Neri, and other churches, to the number in all of nearly 300, several of them of architectural merit, and almost all of them richly decorated the Palazzo Reale (Royal Palace), an immense building of three stories each, of a different order of architecture, only partially completed according to the original design, but richly fitted up, and adorned with good paintings, the palace of Capo di Monte situated in the N outside the town, on an eminence of that name, and forming the usual summer residence of the king, commanding magnificent views, adorned with fine sculptures, paintings, and articles of vertu, belonging to the celebrated Parthenon gallery and surrounded by beautiful gardens the old palace, where the court of Naples now hold their sittings the Palazzo degli Eminentissimi, originally built for the university, and occupied by it till 1790, but now converted into the Museo Borbonico, a museum,

NAPLES, PORTA CAPUANA.—Drawn from Nature, and in Water by W. L. Lockhart.

by Benedetto da Majano, is the only one deserving of notice. The streets are tolerably regular, generally clean, and admirably paved with square blocks of lava, so exactly fitted that not the least inequality can be discerned but they are for the most part narrow in fact, and still narrower in appearance, both from the number of booths and other obstructions which are allowed to encumber them, and from the general construction of the houses. These are large, substantial, and lofty averaging not less than five or six stories, with flat roofs, covered with a composition of puzolana; and by the number of plants crowded upon them, converted into a kind of domestic shrubbery, to which the inmates often resort to enjoy the breeze. Though generally displaying little architectural taste, the houses are abundantly provided with balconies and other projections; crowded, like the roofs, with plants and shrubs,

of which any nation might be proud, containing not only a valuable library of 160,000 volumes, and many rare MSS. but an unequalled collection of gems, bronzes, vases, etc., chiefly obtained from the excavations of Pompeii and Herculaneum, seven theatres, of which that of San Carlo is remarkable for its magnificence, and is said to be the largest in existence, though its claims in this respect are disputed by that of Milan.

The principal educational establishments are the university, which, since its removal from the Palazzo degli Studi occupies the buildings of an old convent, and is attended by about 1500 students, but does not possess much celebrity; the royal lyceum, military navigation, veterinary, musical, medical and other schools male and female. Among literary and scientific institutions are a royal society of arts, sciences, and antiquities, an observatory, a botanical garden, an agricultural society, and physical, chemical, and mineralogical cabinets. The benevolent endowments include several large hospitals, particularly the De Boncompagni and Della Annunziata, the latter partly for foundlings; the Reclusaria or Albergo dei Poveri, an orphan asylum or house of refuge, on a very extensive scale, a *monte-de-piété*, and a deaf and dumb institute.

The manufactures are much more numerous than important. At the head of these stands that of macaroni and vermicelli constituting the principal food of the great body of the people. Next to it are silk stuffs, and especially Grosse de Naples, which owes its name to the extent and superiority of its manufacture here. The other leading articles

are fire-arms, porcelain, tobacco, castings, lace, gloves, soap, carriages, violins, and other musical instruments, hair, woollen linen, and cotton stuffs. Notwithstanding the large extent of the bay, the actual harbour is of small dimensions, consisting of a mole, which projects nearly from the centre of the city and at which the water, though deep at its outer extremity, shallows so much near the town as to float only small vessels. It seems, however, to suffice for all the trade which is carried on. In 1868 there entered 5424 vessels of 828,184 tons and cleared 5314 vessels, 811,083 tons. The exports consist chiefly of boxes, crates of tarrar, hoops, linseed, hemp, wheat, figs, gloves, liquorice, madder, coral, macaroni, oil, wine, wool, tallow, rags, and silk, raw dyed, and manufactured.

Naples, at first called Parthenope, because the arena of that name was said to have been buried here, is of very ancient date, and was founded by a colony of Greeks, who had settled at Cumæ. It afterwards took the name of Neapolis, and is said to have retained strong traces of its Grecian origin to a late period of the Roman empire. It was inhabited by the emperors Adrian and Constantine the Great for numerous embellishments, and became a luxurious retreat, to which many of the wealthier Romans were accustomed to resort. In 596 it was pillaged by Belisarius, and a few years after when it had been rebuilt, the same disaster again befell it, at the hands of Totila. It was afterwards successively under the sway of the Normans, the emperors of Germany, and the kings of France and Spain. Under the latter it became the capital of an independent kingdom, but, having been brought

within the vortex of the French revolution, was handed over by Napoleon, first to his brother Joseph, and then to his brother-in-law Murat. The Congress of Vienna having re-

stored the legitimate sovereignty Naples received its former masters. After a long period of misrule, they were ousted by Garibaldi in 1860 and the whole of their dominions were then incorporated into the kingdom of Italy. F (1862) 447 065

NAPLES (BAY OF) [anc. *Crater Stens*], an indentation W coast, Naples, in the Tyrrhenian Sea, having at its entrance between Cape Misenum on the W and Cape Campanella, on the S.E., a width of about 30 m., and penetrating into the coast for nearly the same distance. At its entrance are the islands of Ischia and Procida, and at its S entrance the island of Capri within, as its N shore, the city of Naples rises like an amphitheatre, while, on the E, the view is terminated still more magnificently by Mount Vesuvius. Both ancient and modern writers celebrate the beauty and grandeur of its scenery.

NAPO (Rue) a large river Bonador meanders W Andes, near the mountain Andes, from which after a slight curve, it flows S.E. and falls into the Amazon, lat. 5° 25' S., lon. 71° 35' W.; total course, about 530 m. It has numerous large tributaries the principal of which is the Cunary which joins it on the right, nearly as large as the principal stream, and whose sources are not far distant from those of the Napo and the Cuen, and Alvarado, both on the left. Its banks are inhabited by various tribes of savage Indians. The river abounds with fish.

NAPOLI DI MONTEVAPOLA, a to. Greece. See MOKEN

NAPOLI DI ROMANIA See NAUPLIA

NAPOLI or **NAUFIA**, a gulf, Greece, in the Archipelago on the S.E. of the Morea, about 85 m. long by 30 m. wide, named from the town of Napoli on its N. shore. It contains several islands, of which that of Spetsa, near its entrance, is the largest.

NARAU, a m. Hindooon Onle 5 m. S.W. Rajpoot and almost surrounded by the British territories P 6000

NARBETH a tn and par Wales, co and 12 m. N. E. Pembroke. The town, situated on an acclivity consists of four principal streets straight and well built, but badly kept and has a parish church of indifferent architecture. Baptist, Independent, and two Methodist chapels, a national and three other schools, and the ruins of an old castle. Pop 2612

NARBOLIA, or **NURBOLIA**, a vil. 6½ fardina, prov. Banchi, with several churches, and a convent manufactures of woollens, and a trade in corn, fruit, and dairy produce. Pop. 1069

NARBONNE [Latin *Colonia Decernorum*] a n. France, dep. Aude in a beautiful plain, surrounded by lofty hills, 33 m. S. Carcassonne. It is enclosed by walls, and entered by four gates has dark winding streets generally lined by ill-built houses, and is traversed by the Rhodan canal. It is well supplied with provisions, one is farmed by the episcopate situated near the centre of the town and another called l'Allée des Soupirs, is particularly agreeable, having everywhere the appearance of a fine garden. The principal edifices are the cathedral a Gothic structure founded in

and forming a conspicuous object from all directions; the old seminary now used as barracks; three hospitals, a small theatre, library, &c. The manufactures consist of verdigris, common linen, gray woollen houses, and leather. There are, also, distilleries, dye-works, and numerous brass and tile works. The trade is in corn, wine, brandy oil, wax, silk, saltpetre, and excellent honey produced in the district, and well known in commerce. Narbonne possesses a sort of first resort and commerce, a hydrogeological school of the fourth class, and a secondary ecclesiastical school. It is one of the oldest towns of Gaul, and was the first colony which the Romans founded beyond the Alps. It became the capital of Gallia Narbonensis but, though as such, it must have contained many splendid Roman edifices, it is very poor in Roman remains. One great cause of this was the barbarous procedure of Francis I., who employed the ruins of ancient buildings in constructing the present walls which accordingly, in many parts, exhibit battlements, filices, and inscriptions Pop 1578.

NARBOROUGH, par Eng. Leicester 2057 sq. P 1288. **NARBOROUGH'S** ISLAND, a group, S. Pacific, off the entrance Strait of Magalhães, about lat. 52° S. and lon. 78° E., consisting of 6 or 10 principal islands, and, apparently hundreds of smaller ones, and besides having a very barren and channel leak, extremely dangerous

NARBURGH par Eng. Norfolk, 3645 sq. Pop 875

NARCISSUS, CLERKE ISLAND or TAPAOTO S. Pacific, Low Archipelago lat. 17° 20' S lon. 138° 28' W. It is about 4 m. long by 1 m. broad, and very low enclosing a lagoon. Its S. part is a mere reef, but its N. is well wooded with ocean-reef trees. The inhabitants, supposed to be about 200 appear to be of a fierce and warlike disposition

NARCONDAM an isl. Bay of Bengal about 80 m. E. from the Great Andaman, lat. 13° 28' N lon. 94° 18' E. (a) It is small of conical form, about 3500 ft. high, and may be seen from a distance of upwards of 50 m. It is uninhabited and covered with wood.

NARDO, a tn Naples, prov. Otranto 9 m. N. V. E. Gallipoli in a beautiful plain well built and well paved. It is the see of a bishop, has nine churches, an hospital, and manufactures of linen cloths. Pop. 8500

NARBONA or **NARDONA**, a river, S. Europe, which rises on the W. side of the mountains of Pindus, flows to the E. frontier of Herzegovina, flows first N. W. along the base of the mountains, then turns suddenly round flows circumlocutally S. S. W. enters Dalmatia, and falls, by three branches, into the Adriatic, opposite to the peninsula of Rabbonio, after a course of about 170 m. Its principal affluents are, on the r., the Dretuniza, Josanica and Pehist and on the l., the Drinovack and Krupa.

NAREW, a river Russia, which rises in dist. Volkovsk, gov. Grodno, flows W. N. W. across Bialyok, enters Russian Poland turns S. S. W. and joins r. bank bag at Sierock total course about 200 m.

NARFORD, par Eng. Norfolk 2896 sq. Pop 116.

NARBEN an isl. Russia, Gulf of Finland opposite to, and 12 m. N. W. Ravel. It is well wooded and having deep water around it, admits vessels to its shores. There is a lighthouse upon it

NARI a river, Beloochistan, has its origin on the E. slope of the Hila mountains Serwan, about lat. 20° N, lon. 66° E. and holding a general S. direction for about 50 m. is joined by the Kanber or Bolan, at lat. 22° 25' N, lon. 67° 28' E. The united stream continues to flow S., and is finally lost in the arid plain of Dutch Gundera. When heavy rains fall it has a large body of water, but for many months in the year it entirely disappears.

NARNI [anc. *Narnia*] a tn Italy Umbria, deleg. and 21 m. S. E. W. Spoleto l. bank Terna, on a lofty hill. It is visible from a great distance, and has a very striking appearance, but it is badly built, and has narrow, dirty streets; a castle, now used as a prison, Gothic cathedral, seven other churches, seven monasteries, and five nunneries. The great object of interest connected with Narni, is a ruined bridge in the neighbourhood, supposed to have been built by Augustus, and bearing his name. It originally consisted of three arches, but one only remains. Its height is upwards of 80 ft., and the width of its piers nearly 30 ft. Taken in connection with the beautiful scenery around it, it is one of the

THE CATHEDRAL, NARBONNE

From Voyage Pittoresque dans l'Industrie France: Sotheby Taylor & Co.

1272 feet undisturbed remarkable for the height of its ceiling (150 ft.) its light and graceful pillars, finely-painted glass, high altar and various monuments, particularly a magnificent one, of the 18th century, in white marble, the archbishop's palace, which has much the appearance of a fortress, and has immediately adjoining it a lofty square tower, of a yellow tint, rising up from the centre of the town far above all the houses,

noolest and most interesting remains of imperial antiquity. The emperor Narva, and Pope John XVIII, were born here. Pop. 8000.

NARNOUL, a tn. Hindoostan, prov. Agra, on an affluence of the Jumna, 85 m. S. W. Delhi. It is the frontier town of Jeypore rajah, a place of considerable antiquity, and, though greatly reduced in size, still about 1 m. long.

NARNOUL, a tn. Solly prov. and 15 m. E. Gurgum, near 1 bank Nara (anc. Nyræ). It stands on an eminence in a strong and picturesque position and has a college and a house of refuge. Near it a great deal of sulphur is obtained and in it, and in wine and oil, the trade is considerable. Nara is supposed to occupy the site of ancient Motyura, and numerous remains of antiquity have been found in it. Pop. 10 740.

NAROVICH, a tn. Russia, gov. and 52 m. N. W. Pensa, on the Moksha, with a stone and two wooden churches, some general trade, and several annual fairs. P. (1842), 3967.

NAROWA, a river, Russia, which issues from Lake Peipus, and forming the boundary between gova. Revel and St. Petersburg traverses the town of Narva, and falls into the Gulf of Finland, a little below its course, first S. E. and then N. W., to a distance of 50 m.

NARVA (NARVA and NARVA) two large branches of the Indus, in Sindh. The E. Narva separates from the main stream on the E. side, a few miles above Roree, lat. 27° 44' N. lon. 68° 58' E. Taking a S. course it passes by the ruins of Alora, where it is crossed by a bridge and thence continues to flow in the same direction until its water in the dry season is absorbed or evaporated in the desert of E. Sindh. During the low season of the Indus, it ceases to be a stream but when the foundation is at its height, it generally carries a very large body of water. The W. Narva separates, as its name implies, from the W. side of the Indus, about 25 m. below Sukkur, lat. 27° 40' N. lon. 68° 54' E. and takes a S. course nearly parallel to the main stream till it falls into Lake Manchar, in lat. 26° 55' N. The direct distance from the point where the Narva diverges from the Indus, till it reaches the lake, is about 100 m.

NARRAGANSSETT BAY an inlet of the Atlantic, U. States, almost wholly in Rhode Island state penetrating 25 m. inland with a breadth of about 12 m. The entrance is between Point Judith, lat. 41° 40' N. lon. 71° 40' W. on the W., and Point Quaker, on the E., a distance of 15 m. It receives the rivers Providence, Pawtucket, Tannock, and Pawtuxet is considered the best naval station of the Chesapeake, and is accessible at all seasons. It contains 15 islands, the principal of which are Rhode Island, Conanicut, and Prudence.

NARRAGMORE, a par. Ireland, Kilmore 12 270 ac. Pop. 2164.

NARRAINGUNGE, a tn. Hindoostan, prov. Bengal 1 bank of a branch of the Brahmaputra, called the Sital 8 m. S. E. Dacca, lat. 23° 37' N. lon. 90° 30' E. This is one of the most considerable inland trading towns in the province, and is remarkable for the bustle and activity that prevail in it. The inhabitants are nearly all commercial and carry on a great trade in salt, of which it is the grand mart grain, tobacco and lime. Pop. 15,000.

NARIMAN or **NARIMAN**, a tn. Asiatic Turkey, cap. senjak of same name about 12 m. S. W. Olt. near the W. frontiers of Georgia. It is very ancient and was once a place of great importance, but has fallen into decay, and consists only of a few houses, and a venerable old castle, seated on a steep rock. Pop. about 3600.

NARVA, a tn. Russia, gov. and 80 m. S. W. St. Petersburg, 1 bank Narova, about 9 m. above its mouth, in the Gulf of Finland. It is divided into the old and the new town—the former, occupied by Germans, and the latter, by Russians. The old town is defended by a castle, so built of stone and contains two churches, townhouse, exchange, and German school, it communicates with the castle of Iva Gerd on the opposite bank of the Narova, by a large bridge, built upon piles. The new town is of wood, and contains a Lutheran church, but is, on the whole, a very miserable place. The chief manufacture is sails and there are also extensive saw mills, put in motion by the river. The fishing is productive, and Narva has long been famous for its smoked salmon. The trade, which once filled the harbour with shipping, has greatly fallen off, but a good deal of business is still done in timber

hemp, and flax. Narva once ranked among the Hanseatic towns, and suffered much during repeated sieges. The most memorable event in its history is the battle fought under its walls, in 1700 when 8000 Swedes, under Charles XII., defeated 80 000 Russians, under Peter the Great. Pop. 5500. **NARVA**, or **NARVA**, a tn. Hindoostan, prov. Agra, 1 bank Sind 40 m. S. by W. Gwahar, lat. 26° 40' N., lon. 77° 51' E.

NARVM a riv. Asia, which rises in the N. of the Albat mountains within the Chinese territories flows first N. and then W. into gov. Omak and, after a course of about 50 m. joins a bank Irish.

NARZULL, a vil. and com. Italy, Piedmont, div. Coni, prov. and about 15 m. N. Mondovì, 1 bank Tanaro, with an ancient parish church, and a monastery and a trade in corn, wine, and silk. Pop. 3659.

NARVALY or **NARVAL**, a vil. Hungary, co. Komorn on a canal not far from Tata and near the road from Yennea to Peeth. It has a Protestant church, a mill, a trade in cattle, corn and fish, particularly crabs. Pop. 1111.

NARVA, or **NARVA**, a small seaport, to Peru, dep. Lima, at the mouth of a river of same name, lat. 14° 57' S. lon. 78° 35' W. (r). The harbour is good, but the town is in a state of decay. The surrounding country is fertile producing abundance of vines and sugar-cane.

NARFBY, a vil. and par. England, co. Northampton 3 m. E. S. E. Welford, at the source of the Nene and Avon. Both these rivers take their rise in the village, which is nearly in the centre of England and must also be on the line of water-shed between the German and the Atlantic Oceans. The Nene flowing E. to the former and the Avon W. to the latter. Narsby also gives its name to the decisive battle fought in its vicinity in 1845 between the royalists, commanded by the duke and the parliamentary army, commanded by General and Fairfax. A beautiful pillar commemorates the event. Area of par. 3690 ac. Pop. 848.

NASH, two para. Eng.—1 Monmouth 5053 ac. Pop. 811.—2 Wales, Pembroke 1019 ac. Pop. 165.

NASHUA, a manufacturing in U. States, New Hampshire. 51 m. S. by E. Concord r. bank Merrimack at the confluence of the Nashua. It was formerly called Dracut. It has six cotton-spinning and weaving mills chiefly propelled by water power, and manufactures of steam engines, looms, guns, tools, shuttles, &c. By railway it is connected with Lowell, Worcester and Concord. Pop. 5320.

NASHVILLE, a tn. U. States, cap. state Tennessee, 1 bank Cumberland, where its steam boat navigation ceases and on the Nashville and Chattanooga railway 500 m. W. S. W. Washington. It is pleasantly situated partly on the sides and summit, and partly along the base of a limestone height, consists of the town proper, and suburbs now almost equalling it in extent and includes besides a number of well built streets, and a handsome public square. The principal buildings are the statehouse, finely placed on a commanding height, with spacious legislative halls and other convenient offices; the courthouse, a large and elegant structure, crowned by a dome, and supported by four pillars; a university, occupying commodious buildings and well supplied with apparatus library, &c. from 12 to 14 churches, some of them beautiful and costly structures; numerous schools and academies, a lunatic asylum, with accommodation for 100 patients and a penitentiary or state prison a very complete establishment, with cells for 300 convicts. The trade carried on both by the river and the railways is very extensive and the vessels belonging to the town, and some composed of steamers, some of them magnificent passenger boats of 400 tons had in 1850 a tonnage of 5797. Pop. (1840), 6939, (1850), 17,502.

NASHLEK, a tn. Russian Poland 77 m. S. W. Warsaw. The works which the Russians had thrown up here in 1806, were forced by the French. Pop. 1257.

NASHIRABAD, or **NASHIRABAD**, a tn. Hindoostan, kingdom of Oude, 65 m. S. E. Lucknow. Pop. 8000.

NASO (anc. *Agathyrus*), a tn. Sicily, prov. and 45 m. S. W. S. Messina, on a height, above a stream of same name. It is walled has a number of handsome buildings and carries on a considerable trade, for the accommodation of which there are some storerooms on the shore below. Near it are ferruginous springs, said to be efficacious in nervous and

climate decides they have the property of drying black whenever it throws into them. Pop. 8000

NASSAU, a town and port, Bahamas. See NEW PROVIDENCE.

NASSAU (Duchy of), the fourteenth state in the German Confederation, cap. Wiesbaden, bounded, N and W by Rhenish Prussia, S. Hesse-Darmstadt, S.E. territory of Frankfurt and a small corner of Hesse-Cassel, and E. by detached portions of Hesse-Darmstadt and Prussia.

greatest length, N to S, 66 m. average breadth, 43 m. area, 1856 sq. m. It is of a very compact form, and is all consequently, with exception of the small patch of Reichelsheim within Hesse-Darmstadt. The surface is divided into two nearly equal portions by the Lahn, which traverses it E to W. Both portions are more or less hilly, and almost mountainous—that to the N., which has the least extent, but is, on the whole the more elevated of the two, being traversed by the Westerwald, by which it is so broken as to be chiefly covered with wood or devoted to pasture, and that to the S. being traversed by the Taunus or Hain, where the general elevation is much less, and almost the whole surface is probably occupied by corn-fields, meadows, and vineyards. The average height of the duchy above the sea is about 1400 ft. The culminating point is the Feldberg 5720 ft. The whole duchy belongs to the basin of the Rhine, which drains a large portion of it directly, forming a considerable portion of its S. and W. boundaries. The other principal streams are the Main and the Lahn with their numerous affluents. The lakes are comparatively small. The climate in the S., is generally mild. In the N., somewhat cold, but throughout salubrious. The climate on the W. and S. slopes of the Taunus consists generally of state, almost all the rest of the duchy is covered with trap. The soil when arable, is generally fertile and well cultivated, and, in addition to the ordinary cereals, produces excellent hemp, flax, tobacco, root crops and fruit. The vine is extensively cultivated along the banks of the Rhine; and the vintage of Nassau is reckoned the best in Germany. The finest wines are those of Johannisberg, Rüdesheim, Assmannshausen, Geisenheim Hochheim, Markelbrunn, and Stouberberg. The forests occupy a large extent of surface, and furnish an excellent timber. The duchy is rich in minerals, and still more so in mineral springs. Among the metals are iron and manganese, worked to a large, and silver to a moderate extent. The slate quarries are extensive and valuable and there are excellent beds of potter-clay. Some lignite also is obtained. Manufactures have not made much progress, and trade, though of considerable importance, and very greatly facilitated by navigable streams, is chiefly in the hands of foreigners. The principal exports are corn, wine, fruit, mineral waters, cotton and iron wares. The government of Nassau is a constitutional monarchy hereditary in the male line. As part of the German Confederation, it unites with Brunswick and has the 13th vote but in the plebiscite vote is the 14th, as already mentioned. Its contingent of men to the Confederation is 8028. The founder of the reigning family was Otto, brother of the Emperor Conrad I. Two separate lines having been formed in 1225, the younger ultimately succeeded to the throne of Holland, the elder remains in possession of the duchy. For administrative purposes, Nassau is divided into 26 ams or bailiwicks. Pop. 421,775

NASSAU, a town, duchy Nassau v. bank Lahn, here crossed by a chain bridge, 13 m. S.E. Coblenz. It is chiefly remarkable for its old and picturesque castle, seated on the opposite bank of the river, on the summit of a conical rock, and the cradle of the reigning families of Nassau and Orange. A little below is the castle of Stol, possessed by a family of which the celebrated Stein, the patriotic Prussian minister who so much distinguished himself by his reforms happily introduced into the army previously to the last European war was a member. Pop. 1000.

NASSERBAD v. Baluchistan, 25 m. S.W. Kadj, on the route to Gwadar, lat. 26° 18' N. lon. 61° 57' E.

NASSERREIT, a vill. Tyrol, circle and near Innsbruck with a church, a school, manufactures of cotton goods, and iron mines. Pop. 1206.

NASSINGTON, a par. England, Northampton 1600 as Pop. 795.

NASSOQUE, a vill. and com. Belgium, prov. Luxembourg, 84 m. N. Arlon; with manufactures of articles of

sereny, which supply the greater part of the inhabitants, and a trade in wood. Pop. 1000

NASSUCK, a large town and place of pilgrimage, Hindostan, prov. Aungmyethar; lat. 19° 56' N. lon. 78° 56' E. It has two palaces belonging to the Pathwa, and some handsome buildings with gardens and vineyards. In the vicinity are some Buddhist excavations. They extend round a high conical hill, 5 m. from the town. Pop. 20,000.

NASTATTEN, a town, Nassau on the Moselle, 16 m. N.W. Wiesbaden, with two churches, and a celebrated spring. Pop. 1567.

NARZOD, a vill. Austria, Transylvania, on the Szamos, about 18 m. from Blatna; with a Greek united church, and a German normal school. Pop. 1000

NARZVAD, a vill. Hungary, Thirther Danube, co. and 7 m. N. Komorn, on the Nytra, with a church. Pop. 3049

NATAL, a British colony S.E. coast of Africa, between lat. 27° 40' and 30° 40' S. lon. 28° 40' and 31° 10' E., bounded, W by a lofty mountain range, designated by the different names of the Quthambuk, Kachibamba, and Draken mountains, N and E by the Buffalo or Umamayi, an affluent of the Tugela river separating it from the Zululand country E and S.E. by the Indian Ocean, and S by the Umamkulu, and its affluent Umzimkulu separating it from Kaka's territory. greatest length N.N.W. to S.E.E. 210 m. greatest breadth, measured from the mouth of the Tugela westward, 110 m. area, about 18,000 sq. m. The coast-line, which has a length of about 150 m., contains the mouths of numerous streams, but is so destitute of creeks and bays, that there is no spot where sheltered anchorage can be obtained except at Port Natal a fine circular bay near the centre of the coast, completely land locked, spacious enough to contain whole fleets, and deep enough within to float the largest vessels but unfortunately encumbered at its entrance by a bar on which the water occasionally but very seldom, exceeds 11 ft. The surface is finely diversified rising by successive terraces from the shore towards the lofty mountains on its W. frontiers. These, forming the great reservoir of the numerous streams which traverse the country in an E. direction, often through precipitous ravines and rocky gorges, are loftiest in the S., where they attain the height of at least 8000 ft. and retain a covering of snow for above four months, towards the centre their height seldom exceeds 5000 ft., and towards the N. descending to descend gradually, present only the appearance of hilly ridges and elevated plains. From the main chain, numerous transverse branches proceed nearly at right angles, and form a series of minor water-sheds, separating the basins of the different streams. The mountains descend very gradually on the W. and may be regarded as the elements of a very elevated table-land, but present very precipitous fronts to the E., and are so broken by chasms and ravines that they were at one time regarded as impassable. A more careful examination has discovered several traces across which horses and cattle can proceed but the only pass fit for waggons is that of De Ruyter in lat. 28° 20' S. and lon. 28° 02' E. The prevailing stratified rocks are sandstone and slate, often thrown into confusion and pierced by igneous rocks, particularly basalt, gneiss and porphyry which assume the form both of continuous ridges and isolated hills, and often cover extensive areas. No minerals of value except some anthracite and slightly bituminous coal, have yet been discovered. One seam of the latter is said to be 6 ft. thick. The colony has a great advantage over most of the districts of S. Africa, in an abundance of perennial streams which, though generally too shallow to be navigable, may easily be made available for irrigation. The most important rivers are the Tugela or Umtke, which, with its tributary Buffalo or Umamayi in the N., has a total course of about 150 m.; the Umvoti Umgeni, and Umkomasi near the centre and the Umzimkulu, which forms, as already mentioned, part of the S. boundary and has a course of about 80 m. The climate, on the whole, is extremely salubrious, and by no means trying to European constitutions. On the coast, the range of temperature is from 47° to 58° giving an average in summer of 76°, and in winter of about 55° in the interior at the town of Pieter-Maritzburg, the mean temperature of July, the coldest month, is 55° of February, the hottest, 80½ and of the whole year 57°. The number of rainy days at the same town, in 1849, was 107, of which no fewer

than 96 were between October and March, while only 17 days were left for the 6 months from April to September—the greatest number of rainy days in one month was 22 in November. During the rainy season thunder showers are almost daily occurrences; but hot blasts are rare, the winds from the interior being greatly modified by passing over the Drachenberg ranges. Long droughts are almost unknown. Under such a climate, and with a soil of considerable fertility, vegetation must obviously be vigorous. Timber-trees every where exist in sufficient numbers for the wants of the colony, and, both on the W and N frontiers, form considerable forests, for the most part unencumbered by the underwood which prevails in Cape Colony and has there proved so obstructive to military operations. The soil on the banks of the river is generally rich and strong and well adapted either for agricultural or grazing purposes. On the higher forest and table land, cattle thrive well for at least nine months in the year and in the more level districts of the interior wheat, barley, oats, beans, and vegetables, of almost every description have been largely and successfully grown even two good crops of maize can be raised in the year. In many parts, the vine and fruit trees thrive well, and in several places along the coast, more especially in the vicinity of Port Natal, cotton yields a superior and abundant produce. In the same locality tobacco, indigo, sugar-cane, and coffee grow well. The inhabited districts are now seldom visited by wild animals, but in the least frequented parts of the interior herds of elephants, though greatly thinned in numbers, are occasionally seen. The lion and leopard are not uncommon, and hyenas, antelopes, jackals, wild dogs, and porcupines, are numerous. The more remarkable birds are the vulture, rock eagle, and Kaffir crane. The hippopotamus has still its haunts in several of the rivers, and numbers of small crocodiles frequent the Tzibula. In 1862 the value of imports was £445,469 and of exports £127,228, the three chief articles of produce being ivory 101,016 lbs, sugar 10,916 cwts., and wool, 906,838 lbs. In 1851 the imports were £38,544, and the exports £2607.

Natal, which was recognized by the British Government as a colony in 1840 is under a lieutenant-governor assisted by an attorney-general, an auditor-general, a collector of customs, a surveyor-general, a crown prosecutor, and a government secretary, who form a legislative and executive council. The first emigrant settlers of Natal were the Dutch Boers, who left Cape Colony in 1806, and by a treaty with Dingaan, the chief of the Zooloos tribe, obtained a territory nearly identical with that of the present colony. A treacherous massacre of part of the Boers by Dingaan, in 1838 led to hostilities, in which Dingaan was ultimately defeated and driven beyond the frontiers. In 1859 the Boers removed to Fort Natal, and proclaimed themselves an independent republic formally renouncing their allegiance to Great Britain and declaring their determination to establish diplomatic relations with European powers. The establishment of a hostile sentiment at the only port between Algoa and Delagoa Bays, and at the only proper entrance from the coast to the interior of S. Africa, was so obviously incompatible with British interests, that a small force was despatched from the Cape in 1841. The Boers permitted it to land, but shortly after commenced open hostilities, and finally shut it in within an entrenchment, consisting of a rude breastwork of waggon wheels and a earthen breastwork. Here the British succeeded in maintaining themselves till additional assistance arrived from the Cape. The Boers, completely defeated after a formidable resistance, retired for the most part beyond the Drachenberg range and the sovereignty of Britain was finally established. For administrative purposes, the colony is divided into six districts or magistracies, of which that of Pieter-Maritzburg, centrally situated in the interior, contains a town of same name, which is considered as the capital, but the only seaport is D'Urban, cap. of the dist. of same name, situated on the shore of Port Natal, and rapidly rising in importance. Pop. of colony, about 840,102, of whom only 18,990 are white, and the remaining 326,112 Zooloos, Kaffirs, who have renounced allegiance to their own chiefs, and have now the privileges of British subjects.

NATAL, a Malay tr. S.W. coast of Sumatra, dist. of Ayer Bangs, lat. 0° 18' N. lon. 99° 5' E. formerly a place of considerable trade. The anchorage is about 3 m. off the

shore, in five fathoms water and is one of the worst roads on the W coast of Sumatra, having numerous shoals in it, and often a heavy sea running.

NATALIA, a tn. Brazil, cap. prov. Rio-grande-do-Norte, 1 bank Potengi or Grande river, about 4 m. from its mouth in the Atlantic, 170 m N by W Pernambuco. It is irregularly built and has narrow unpaved streets but the houses, though only of earth, have a showy appearance. Five churches, a governor's palace a Latin and two primary schools, a custom house, and a large building in which cotton is inspected before embarkation. The harbour has in a kind of bay, between the town and the fort of New-Magos and might be one of the most important in Brazil were due attention paid to it. The roadstead affords excellent anchorage, and the harbour which is now almost silted up might easily be deepened out and made accessible to ships of considerable burden, bringing many things which the province wants, and taking in return cotton, Brazil wood, drugs, and other produce. Pop. dist. 10,000.

NATCHEZ, a city, U. States, Mississippi on a bluff 1 bank Mississippi, 150 ft above the level of the stream lat. 31° 50' N. lon. 91° 25' W. 809 m by the river from New Orleans. A portion of the city is built on the margin of the river. It is laid out in the form of a parallelogram, with streets intersecting each other at right angles but the site is very uneven. Some of the houses are elegant but the most of them are of wood, and only one story high. Almost every house has a piazza and a balcony and many of them have gardens, finely ornamented with shrubbery, and well stocked with fruit trees. The public buildings are a courthouse, jail, several churches an academy a female seminary an hospital, orphan asylum a museum hall and theatre. Nathech is a great cotton mart, and has oil mills, and an extensive and increasing trade. Pop. 1850 2259.

NATLI Y two pers. Eng. Hants —1 (Gosse) 1004 ac. Pop. 245 —2 Uo 1019 ac. Pop. 115.

NATHUDORA a tn Hindoostan prov Ajmer 34 m N Odyspoor lat. 25° 8' N. lon. 74° 11' E. celebrated for a Hindoo temple of great sanctity which is endowed with large estates.

NATHLASH (Str) par Irel Cork 1024 ac P 503. NATIVIDAD an isl. Mexico, off W coast, lower Cal. form, near lon. 93° N. and lon. 121° W. It lies between the island and the promontory of San Engeline, forming the W entrance to the Bay of St. Sebastian. Its surface is about 4 m long NE to SW of moderate elevation, and has a barren and dreary aspect. The passage between Natividad and the mainland is from 7 m. to 8 m wide, with a depth of 17 to 26 fathoms.

NATIVIDADE a tn Brazil, prov. and 890 m N E Goyas. It is built with great regularity and has spacious streets, contains three handsome churches, a Latin school, school of mutual instruction for boys and primary school for girls and a trade in sugar tobacco millet, and cotton. Near it several mines are worked. Pop. dist. 2000.

NATOLIA, Asiatic Turkey. See ASYATOLIA. NATRON LAKES, several lakes, Egypt, in a valley of same name, about 50 m W \ W Cairo. There are eight lakes which contain water all the year. The largest and most S. called On Khishi produces only murres of soda, or common salt. In the lakes that yield natron and murres of soda the two salts crystallize separately, the latter above, in a layer of about 18 inches thick, and the natron varying in thickness, according to the form of the bed of the lake, the thinnest being about 27 inches. All the lakes contain murres of soda, though few produce natron. The water in the lakes varies much in height at different seasons of the year. The largest of the lakes is about 24 m long, and 1 m broad. Most of the others vary from about 12 m. to 3 m in length, and 3 m. in breadth. The length of the Wady Matruh, or valley of the Natron Lakes, is about 23 m, and its breadth about 54 m. It produces no trees, but abounds in the bulrushes used for making the well-known mats of Egypt.

NAT'AM, a considerable tn. Hindoostan, Carnatic, 68 m S. K. Cape Comorin lat. 10° 14' N. lon. 78° 18' E. NATTORE a tn Hindoostan, prov Bengal, 45 m N E. Moorshabad; lat. 24° 25' N. lon. 86° 55' E. is, a few miles from r bank Atli. In its vicinity are numbers of mulberry-trees. Nattore is the cap. of Rajshahy district, the headquarters of the judge and collector, and site of the jail.

NATSCHERADETZ, or **NACHSRADETZ**, a market in Bohemia, circle Kamenitz, 45 m. S.E.E. Prague, with a church, founded in 1440. A castle, with fine gardens, a school, an hospital, manufactures of linen, and five mills. Pop. 1850.

NATUNAS ISLANDS, a series of isles, China Sea, extending from the W. coast of Honan, near Point Daitso, a great way to the N. W. They are divided into three groups—the N. Natunas, the Great or Great Natunas, and the contiguous isles and the S. Natunas, near Borneo. The N. Natunas consist of one considerable island, and several islets and rocks. Their N. extremity is in lat. 4° 51' N. lon. 108° 2' E. They are of moderate height, producing coconuts, and some other fruits, and are inhabited by Malays. The Great Natunas, lat. (N. extremity) 4° 30' N.; lon. 108° 14' E. is about 25 m. to 30 m. long N. to S. and about 20 m. broad E. to W. The interior is mostly high, and on the N. part of the island are two mountains of considerable elevation, one being 1890 ft. above the sea. The S. group consists of several high isles, the most southerly being in lat. 3° 34' N. lon. 108° 15' E.

NATUNAS, a vil. Austria, Tyrol circle Bozen in the valley of the Etsch or Adige, with a church, and a castle. Pop. 1450.

NATURALISTE CAPE, W. Australia, co. Sussex, of which it is the extreme N. W. point, forming the W. side of Geographe Bay. lat. 33° 31' 45" S.

NAL, or **DELLA COGNATA**, anc. **Lacumna Promontorium**, a cape, Naples, N.E. coast of Calabria-Ultra. lat. 39° 6' N. lon. 17° 14' E. (s.) It was crowned by a celebrated temple of Juno Lacuna, and near it, Hannibal embarked on finally quitting Italy.

NAUDAUN, a small in Fynbik, 1 bank Bess. lat. 31° 48' N. lon. 76° 18' E. occupying a delightful situation, and celebrated for its fine gardens. The Bess here is a deep, rapid, and clear stream, 150 yards wide, and running at the rate of 34 m. an hour. Near Naudaun is celebrated Illis-See, a large lake, surrounded by a richly wooded roof, and making a fissure in the rock from which issue jets of inflammable gas, which, when lighted are soundered the breath of the tutelary deity. Naudaun was once a flourishing place, but has fallen into decay.

NAUDERS, a vil. Austria, Tyrol circle and 27 m. S.E.W. Innsbruck. It lies high in an amphitheatre of hills, and has a church, an hospital, and manufactures of iron and steel. Pop. 1908.

NALEN, a tn. Prussia, prov. Brandenburg, gov. Potsdam 23 m. W. W. Berlin, on the Havelbach. It is entered by two gates. Has a church, townhouse, and hospital, manufactures of linen, a brewery, and a distillery. Pop. 4320.

NALGARD, a tn. Prussia, gov. and 28 m. N.E. Stettin, between two lakes. It is walled, and entered by two gates. Has provincial and city courts, a church, hospital, and portulinary manufactures of muslin and tobacco, and several tanneries. Pop. 8587.

NAUGHEON, par. Eng. Suffolk 854 ac. 1 op. 134. **NAUBERG**, a tn. Hesse-Cassel, prov. and 20 m. N. W. Hana, in a beautiful valley of the Ubr. It is an ancient place, has two churches, several distilleries, and thermal saline springs, from which a great deal of salt is made. Pop. 1424.

NAUL, par. and tn. Iral Dublin 2628 ac. Pop. 597.

NAUMBURG, a tn. Prussia, prov. Saxony, gov. and 19 m. S.E.W. Merseburg, beautifully situated in the valley of the Saale, in an amphitheatre of hills, covered with gardens and vineyards. It consists of the town proper, the freedom, (Herrlichkeit) and three suburbs. The town is surrounded by walls. The principal buildings are five churches, one is old cathedral, partly Gothic, and partly Romanesque, with lofty towers and a double choir; while two of the others deserve notice from the statues and pictures which adorn them: a townhouse, gymnasium, industrial school, and two hospitals. The manufactures consist of carriages, playing-cards, woollen cloth, hosiery and leather. The trade is in these articles, and in oil, wine, wool, horse-hair and feathers. Naumburg possesses a savings-bank, and a bathing establishment. Pop. (1845), 15,391.

NAUMBURG, several places, Germany particularly—1. A tn. Hesse-Cassel, Hesse-Cassel, 16 m. W. S. W. Cassel, with a church, and the ruins of a strong castle, and several mills. Pop. 1768.—2. A tn. Prussia, prov. Silesia, gov. and

W. Liegnitz, r. bank Queis; with a court of justice, two churches, tile-works, and a walk and a flour mill. Pop. 1701.—3. A tn. same prov. gov. and N.W. Liegnitz, r. bank Bober, with a Protestant church, and a castle; a brewery, distillery, tobacco factory, snuff-works, and a trade in cattle. At the foot of the hill on which the castle stands, a bathing establishment has been erected over two chalybeate and sulphureous springs. Pop. 873.

NAUNDORF, a tn. Hindostan, prov. Caudah; lat. 21° 22' N. lon. 74° 18' E. on a small stream which becomes dry in the hot season, and causes a great deficiency of water. It consists of about 500 inhabited houses, and a much greater number in ruins; and possesses, in its vicinity the tomb of Sird Baddat Poir, a Mahometan saint, built nearly 800 years ago, finely situated on a rocky height, and much visited by pilgrims. It was ceded by the Peshwa to Holkar, and suffered severely from the ravages of the Pindaris.

NAUNDORF, a vil. Saxony, circle and 80 m. N. Dresden. It has manufactures of woollen stuffs. Pop. 1187.

NAUNHOF, a tn. Saxony, circle and 11 m. S.E. Leipzig on the Parde. It has manufactures of linen, a spinning-mill, and a trade in cattle. Pop. 1042.

NAUNTON, two pars. Eng.—1, Gloucestershire, 8106 ac. Pop. 568.—2, (Boscawen), W. Greater 1025 ac. Pop. 144.

NAUPLIA, or **NAUPLIA**, or **NAUPLIA**, a seaport, Greece, Morea, near the head and on the E. side of the Gulf of the same name. lat. 37° 35' 58" N. lon. 22° 48' E. (s.) occupying the site of the ancient Nauplia, one of the most ancient cities in Greece. The modern town stands upon the N.E. side of a height, with a tabular summit which projects from a steep ridge at the S.E. angle of the Bay of Argos. The principal street divides the town into two equal parts connecting two squares one of which is spacious and is principally occupied by barracks, restaurants, and coffee-houses. The streets are narrow but straight, and were formerly excessively dirty, but they have been recently cleared of rubbish, and the entire appearance of the town much improved. Nauplia, in short, from being one of the most wretched, dirty, and ruinous towns in Greece has become one of the neatest and most cleanly with tolerable shops and good looking houses. Some of the latter are spacious and even comfortable, but the new houses built in the European style, are, generally speaking ill constructed and ill arranged. In all of these, the lower story is appropriated to the horses, and from this a spacious staircase leads to the upper inhabited apartments. The houses, however, are, as a whole, exceedingly small, and the population so crowded, that in every room are found three or four inhabitants. The town is enclosed by Venetian fortifications with several batteries, and has two fortresses one of which is on the summit of a lofty and precipitous rock, 720 ft. above sea-level and inaccessible on all sides but one. The Bay of Nauplia has excellent anchorage all over it, and there is a good harbour for small vessels. Nauplia had at one time an extensive traffic in silk, oil, wax, wine, corn, cotton, and sponge. But this has of late years much declined and at present its trade is confined to the mere necessaries of life. The climate is extremely unhealthy and the town much subject to visitations of the plague. Pop. estimated at 15,000.

NAUTA, a tn. Ecuador on the Amazon, a little above the confluence of the Ucayali, about lat. 4° 30' S.; lon. 72° 40' W. It was founded in 1850, and consists of about 500 houses, most of which are large and rest on pillars, which support an immense roof covered with palm leaves. The principal edifice is the church, which is built of adobe whitened with lime. The chief employment is the growth of sugar-cane, and manufacture of sugar, almost every house having a small sugar-mill attached. Earthquakes are almost of annual occurrence. Pop. about 5000.

NAUTHPOOR, a tn. Hindostan, prov. Bengal, lat. 26° 17' N. lon. 87° 8' E. During the floods, the Cool river approaches it, but in the dry season, very extensive banks intervene between it and the navigable stream.

NAUVOO, a tn. U. States, Illinois, l. bank Mississippi, 124 m. N. W. Springfield. It was a settlement of the Mormons, and occupied a large space covered, at intervals, with white-washed log-cabins, and some frame and brick houses. Its public buildings were a spacious hotel, called Nauvoo house, in which Joe Smith, the Mormon leader, had a suite of apartments; and Nauvoo temple, with a baptistry, and a

be modelled on the houses of Solomon. During the residence of the Moriscos, the population was about 7000 but has been greatly diminished by their expulsion.

NAVA DE LA-ARUNCON, or **NAVA DE COO**, a tn. Spain, New Castle, prov. and 38 m. N. W. Segovia. It is tolerably well built, has two squares, a beautiful fountain, a church, courthouse, prison, and primary school; and a trade in corn, wine, fruit, and cattle. Pop. 1769.

NAVA DEL-REY, a tn. Spain Leon prov. and 23 m. S. W. Valladolid, in an extensive plain. It has a handsome granary and hospital, a college, for classical literature, a theatre, six primary schools, a beautiful church, in the Roman style, and manufactures of cloth, plain linen, serges, razors, chocolate, bricks, tiles, earthenware, and exquisite butter-cakes, sent not only to Valladolid but to the court. In the vicinity is a tract of wildish clay, which possesses the property of clarifying wines with great rapidity and at the same time without injury to their quality. A considerable quantity of it is used for this purpose not only in this province, but in those of Salamanca and Santander. Pop. 4824.

NAVA DEL-MANERO, a vil. Spain New Castle, prov. and 23 m. N. W. Segovia. It consists of mean houses of a single story with a church, courthouse, prison, two primary schools, and a trade in agricultural produce and charcoal. Pop. 1907.

NAVACONCEJO, a tn. Spain, Salamanca, prov. and 14 m. E. Cáceres, near the Tago, here crossed by a wooden bridge. It has a church, townhouse, with prison and primary school, oil and flour mills, and a trade in oil, wine and chestnuts. Pop. 1096.

NAVAMERMOA, a vil. Spain New Castle, prov. and 24 m. S. W. Toledo with a townhouse, small prison two schools, a church, and two flour-mills. The preparation of charcoal is carried on. Pop. 2151.

NAVAL, a tn. Spain, Aragon prov. and E. Huesos, on a lofty height with level, straight, and well paved streets. The inaccessible steep on which the centre of the town is situated makes it a kind of natural fortress. It has a church a courthouse prison primary school hospital, and the ruins of an old Moorish castle. Manufactures of excellent linens, confectionary, hempen shoes, and soap, several distilleries and a considerable trade, chiefly contraband. In the vicinity are extensive salt-works, which are considered the best in Spain. Pop. 1650.

NAVALCAB, a tn. Spain New Castle prov. and W. Toledo between the Tietar and the Guadalupe. It has a church, a townhouse, prison, primary school, and a trade in corn, wine, silk, and cattle. Pop. 1599.

NAVALCARNERO, a tn. Spain New Castle, prov. and 19 m. S. W. Madrid. It has a good townhouse a prison, an hospital and several elementary schools; a church and several chapels and hermitages. Pop. (agricultural) 1158.

NAVALMORAL, a tn. Spain, New Castle, prov. and about 17 m. from Avila, indifferently built with two churches, a courthouse, prison, primary school, numerous flour-mills, and a trade in corn, cattle, and fruit. Pop. 1435.

NAVALMORAL, a tn. Spain, Extremadura prov. and 50 m. E. Cáceres, with crooked irregular streets, mean-looking houses, a townhouse, several schools, a church, and manufactures of linen cloth, leather, rush-chairs, wax candles and torches, oil, and soap. Pop. 2835.

NAVALMORAL DE PENA, a tn. Spain, New Castle prov. and 38 m. S. W. Toledo with 11 smaller and larger squares, regular streets, all paved and clean, a townhouse, prison, public granary, bakery, hospital, several schools, a church, with an octagonal belfry, and adorned with several good paintings; a fine ruinous Capuchin convent, and manufactures of serge, coarse cloth, goats' hair, earthenware, tiles, and leather. Pop. 2180.

NAVALUCILLOS, a vil. Spain New Castle, prov. and 38 m. S. W. Toledo; near which is an iron-works, employing 300 men and boys, and about as many horses and mules. Several tanneries, oil and corn mills, and the elaboration of wax, give employment to many of the inhabitants. Pop. including the hamlets of Alaraz and Robledo-del-Buoy, 1919.

NAVAYILLAR-DE-PENA, a tn. Spain, Extremadura, prov. and 67 m. E. Cáceres, not far from the Guadiana. It is well and regularly built, has a church, townhouse, prison, and school, oil and flour mills, and a trade in corn, beef, and oil. Pop. 2220.

Vol. II.

NAVAN a market tn. and par. Ireland, co. Meath, agreeably situated on an acclivity at the junction of the Boyne and Blackwater 56 m. N. W. Dublin, on the railway and canal to Drogheda. It consists of three principal streets, tolerably straight, but indifferently built, and badly kept and has a very handsome parish church with an ivy-clad tower, a large R. Catholic chapel, an endowed and several other schools, a county infirmary, cavalry barracks, workhouse, and bridge, a distillery, brewery, pepper flour, and wax mills, a considerable and increasing trade in corn, and two weekly markets. Adjoining the town is the splendid ruin of Athlumney castle. P. 3979. Area of par. 3845 ac. P. 6822.

NAVARINO a fortified seaport in Greece, Moravia, coast, lat. 38° 54' 36" N. lon. 21° 41' 45" E. (a.) It stands on the S. E. side of the harbour, is divided into an upper and a lower town, and is surrounded by a wall without any fosse or ditch. The citadel on upper part is on an eminence, but has no rampart, nor any outworks. The houses near the harbour are tolerably well built, the streets narrow steep uneven and dirty. Here are the remains of an ancient aqueduct, a fountain, and several marble pillars, which now support the facade of the grand mosque. The harbour is one of the best in the Morea having the long narrow island of Sphaghi in front, which extends in a S. W. direction for nearly 8 m. The principal entrance is to the S. of the island, the passage being nearly 1 m. broad, but when in, the harbour widens to 2 m. and its general depth, with exception of two shoal spots, are 26 to 13 fathoms. Here the British, French, and Russian fleets gained a victory over the Turks and Egyptians, October 20, 1827, and here, also the Spartan navy was defeated by the Athenians.

NAVARR (Spanish *Navarra*) a prov. Spain between Aragon Old Castle, and Biscay, cap. Pampeluna bounded N. by France W. by Guipuzcoa and Alava, E. by Bascoas, and S. by Saragosa and Logroño and forming an irregular oblong square, extending N. to S. about 140 m. and E. to W. 50 m. area, 2448 sq. m. Its N. boundary is a very mountainous being composed of the W. slopes of the Pyrenees, which dip down towards the ocean and, by their numerous straits, supply the Ebro and Bidassoa, its principal rivers. Notwithstanding its proximity to the Pyrenees, the climate is rather temperate, as well as healthy: the thermometer ranging from 25° to zero in winter and 86° to 93° in summer. As Navarre has both a lowland and highland district, it combines all the means of subsistence the latter supplying fuel and timber for building and the former wheat maize good vines especially those of Tx. de la and Peralta. Oil fish, hemp and all sorts of lacustrine plants as well as abundant pastures for cattle of every description. It also possesses mines of iron copper and lead; salt springs and rocks, and quarries of Jasper marble, and slate. The rivers abound with trout, barbel and eels. Essentially an agricultural province Navarre has but little commerce its exports consisting chiefly of wool hempen sandals, ware, salt, hides, liquors, wheat, combs, and box wood species; brandy, fruit, hogged cattle, and swine, and its imports of flour, sweeter and silk fabrics. Cacao wax tanned leather oil, almonds, soap glass cast hemp &c. The Navarrese live very much by themselves, each in his valley which is to them the whole world. Their bane is the all-corrupting habit of smuggling which their intricate frontier favours. The scenery is Alpine and picturesque, but the mountains are not so high as those of Aragon although the Aneto reaches 5880 ft., and the An. 5215 ft. In the N. portion of the province, the Basque language is chiefly spoken. The bird-sanders of Navarre are remarkable for their light nature, physical form, their temperate habits, endurance of hardships and privations, individual bravery and love of perilous adventures—qualities which have always rendered them formidable as guerrilleros. As regards education, Navarre is in a very backward state. Pop. about 280,000.—The ancient kingdom of Navarre comprised both the modern Spanish province, sometimes called Upper Navarre and also French or Lower Navarre, separated from the former by the Pyrenees, and included in the ancient prov. of Bearn, now dep. Basses-Pyrenees. The wild and broken glens of this region become the natural fastnesses of the ancient inhabitants when retreating before the Romans and Moors. They made common cause with the highlanders of Aragon, until about 843, when Infio Arista was chosen king of Navarre at Pampeluna, while the

national liberties were guaranteed by the celebrated *Fuero de Alfovet*. Navarre was annexed to Castile, in 1519, by Ferdinand the Catholic, partly by force, and partly by fraud. Jean d'Alret, the rightful heir, being abandoned by his French allies, who professed by his ruin, as the territory was partitioned. Ferdinand, calling all 8. of the Pyrenees, while the N. portion ultimately passed, with Henry IV to the crown of France.

NAVARRÉS, a tn. Spain, prov and S.S.W Valencia, on a height, in a plain called the Canal de Navarres. It has a church, townhouse, two primary schools, and a trade in corn, silk, wine, and fruit. Pop. 1668

NAVARRÉTTE (called sometimes *de Raje*), a vil. Spain, Old Castile, prov and 7 m W Logroño, near r bank Ebro, in the centre of Rioja Castellana. It has two squares, a parish church, an hospital, private elementary school, manufactures of earthenware, oil and some mills, and heneidy distilleries. It is entirely undermanned by large vine-vastils, into which some of the houses sunk a few years ago. Pop. 2002

NAVARRÉS, several places, Spain, particularly—1 (*de Jorquero*), A vil and com. Murcia, prov and 18 m from Albalade with a church, courthouse, primary school, manufactures of woollen and linen cloth, and a trade in these and in agricultural produce. Pop. 876—2 (*de San Antonio*) A vil and com. New Castile, prov and 20 m from Segovia, houses of one story, 111 houses, with a church, a primary school and some transit trade. Pop. 890—3 (*de San Juan*) A tn., Andalusia, prov and 35 m from Jacon near i bank Guadarrama, with a church, townhouse, primary school, manufactures of linen and hempen cloth, and a trade in corn, fruit, and cattle. Pop. 1450—4 (*Frua*) A tn. Leon, prov and 8 W Salamanca, poorly built with a church, townhouse, prison and primary school, and manufactures of woollen and linen cloth, and hats. Pop. 620.

NAVARRÉS, MAZOUZ, a tn. Spain, Extremadura, prov and 1 m. N W Cáceres. It has no town, but level and well paved streets, and well-built houses, a townhouse, green public primary two elementary schools, and a church. Oil-pressing, weaving cloth and linen, grinding corn, soap-boiling, brick baking, and spinning and dyeing black thread, are the chief employments. Pop. 4101

NAVARRÉS, DEL MARQUE, a tn. Spain, Old Castile, prov and 25 m. E.S.E. Avila, indifferently built with a church and old Moorish office, belonging to the duke of Medinaceli, a courthouse, prison and primary school, manufactures of coarse woollen, and some trade in wool and timber. P. 2000

NAVARRÉS, DE TOROS, a small vil. Spain, Andalusia, prov and 29 m N Jacon, on the high road from Madrid to Cadiz. Here a great victory was obtained by the kings of Castile, Aragon, and Navarre, over the Moors, who were commanded by Mahomet Ibn Abdallah king of Morocco. The Spaniards claim the whole merit of the victory, although they were assisted by 110,000 foreign crusaders, chiefly English and French. It is said that 200,000 of the mudears were slain, and only 725 Christians.

NAVARRÉS, a small isl. Caribbean Sea, off W point Haiti, at S.W. extremity to the Whitewater River, lat. 18° 35' N. lon. 75° 2' W (a). It is about 3 m. in length 13 m. broad, and consists of a flat level rock, apparently of volcanic origin, 300 ft. in height, and covered with small shrubs. Every part, excepting a small space on the N. side presents a rocky perpendicular cliff. It is frequented by vast numbers of sea-fowl, and fish abound in its immediate vicinity.

NAVER, a vil and com. Italy, Lombardy gov. Milan, prov and 3 m. N N.E. Brescia, near the junction of the Piave with the Garda. It has a church and a manufactory, and manufactures of serge, bracks, and tiles. Pop. 3058

NAVILLI, a tn. Naples, prov Abruzzo-Ulter II, dist. and 18 m. S.E. Aquila. Pop. 1100

NAVENVY, par Eng. Lincoln 2110 a.s. P. (1651), 1057

NAVER (Loon), a lake, Scotland, near the centre of Netherlandshire, in a very mountainous district, length S.W. to N.E., 7 m., greatest breadth, 2 m., greatest depth, 80 fathoms, area, about 9 sq. m. Its banks are tolerably well wooded, chiefly with birch, and the scenery around is very interesting. It receives several tributary streams, of which the Mole and Strathvay are the chief, and discharges itself by the Naver, which, born 18 m. circuitously N. into the Atlantic, and is the largest stream in the country.

NAVETOCK, par Eng. Essex; 4229 ac. Pop. 983.

NAVIA (SEA MAMA), a tn. Spain, Asturias, prov and 44 m. W N W Oviedo, on a height above i bank Navia, near where it falls into the Bay of Biscay and forms a harbour. It has a church, townhouse, custom house, primary school, manufactures of linen, several saw-mills, and a trade in charcoal, iron and steel, and salt provisions. It is a very ancient place, and afforded an asylum to many distinguished Spaniards, while the country was in the hands of the Moors. Pop. 884.

NAVIA, a river, Spain, which rises in the mountains of Cebreiro prov Lugo, Galicia, down N N.E., and falls into the Bay of Biscay, near the town of Navia, after a course of about 85 m.

NAVIGATORS or **SAMOA** IN AMER, a group, Pacific Ocean, N.E. of the Friendly Islands, lat. 13° 30' to 14° 30' S. lon. 169° to 175° W. They are eight in number—the principal being Savaii, Upolu, Titiilla, and Manua, area, 1450 sq. m. They are of volcanic structure, having coral reefs, within which their harbours are usually situated. The climate is variable, and there is much bad weather, particularly during the winter months, when long and heavy rains, attended, at times, with high winds and northerly gales, are frequent. The soil of all the islands is rich, and is chiefly formed of decomposed volcanic rocks, yielding bread fruit, of which there are four twenty varieties, bananas, rice, paper-mulberry, tacao, from which arrow root is made, sugar-cane, coffee, sweet potato, pine-apple, yams, papaya, and tobacco. Tree-ferns, bayon trees, pandanus, several species of palms, the cocoa-nut, and the wild orange, are also found in greater or less plenty. Battans, 90 ft. in length may be seen running over the trees, bamboo, wild sugar-cane, wild ginger, and wild nutmeg also abound. There are no native quadrupeds on the islands, but swine, cattle and horses, have been introduced, and are rapidly increasing. Poultry is plentiful. Snakes are found on one of the islands Upolu, and sea-serpents are said to have been seen off the islands. Fish are taken in great abundance. In personal appearance, the men of the Samoan group are in general superior to the women, there being among the former many specimens of manly beauty while the latter are rather ill-formed and stout, though, when very young, they are both lively and pretty. In disposition, the Samoans are kind, good humoured, intelligent, fond of amusements, desirous of pleasing, and very hospitable. Both sexes are much attached to their children and exert a profound respect for age. Like most other savages, however, they are indolent, covetous, false, and faithless. Their language is soft and smooth, and is the only one of the Polynesian dialects in which the sound of S is found. Nearly all the foreigners resident on these islands are subjects of Great Britain, and the conduct of the natives towards them in the highest degree kind and respectful. The whole of the population of Manua, and nearly all that of Titiilla, have embraced Christianity. The natives are beginning to have a good notion of the value of money and of trading and supply fruit, vegetables, and hogs to the shipping. Their only staple, however, notwithstanding the islands seem fit for growing every tropical production, is coconut. The quantity produced in any year has not, however, exceeded 100 tons, although two times that quantity could be easily manufactured from the present trees, as immense numbers of cocoanuts are left to perish. A few small vessels trade from Sydney, but the wants of the people are principally supplied by American whalers, conveying to them lime, white, and unbleached cotton, printed calicoes, hardware, muskets, fowling-pieces, powder, shot, axes, &c.—(*Wilkes' U. S. Exploring Expedition, Natural Magazine, &c.*)

NAVY, DAY, FRANCE, see MANANILLA

NAKOS or **NAXOS** an isl. Greece, in the Grecian Archipelago, the largest of the Cyclades, S. from Myconos, lat. (N. point at Cape Stauron), 37° 12' 30" N. lon. 25° 58' E. It is 18 m. long, 14 m. broad area, 170 sq. m.; hilly but extremely productive, yielding fruit, wine, oil, cotton, silk, wheat, and barley while the higher grounds afford pasturage for cattle, cheese, honey, and wax, are also exported. There are quarries of granite, marble, and serpentine, and on the W. coast is a mass of emery. Abundance of marcoria, or sulphur of iron, is also found. When polished, it has for a time almost the lustre of real brilliants, and was formerly much used in the manufacture of ornaments in England.

Pop. 19,912 — The chief town is **NAXIA**, near the N W part of the island, on a small bay, with a harbor and roadstead, the latter rather insecure. It occupies the site of the ancient **Naxos**, and is inhabited by a **mariti**. **Pop. 4000**

NAY, a tn. **France**, dep. **Bassee-Tyrénées**, on the Gave de Pau 9 m. S. E. **Pau**. It has several interesting ancient buildings, particularly a parish church, a manse, a school of woodens and other wooden stuff, and a trade in these means, cheese, iron, and wool. **Pop. 8028**

NAYLE, a vil. W. Africa, **Senegal**, 1. bank **Faldé** lat 14 36' N, lon 18 18' W. It is inhabited by **Sarracoles** and **refuge** **Kassonés**

NAYLAND, a tn. and par. **England**, co. **Suffolk**, in a fertile valley on the **Stour**, which is here navigable 6 m. N by **W Colchester**. It has a handsome parish church situated in the centre of the town, with some ancient monuments, an independent chapel, a national school, a silk and several large corn mills, and a considerable trade in flour. Area of par. 941 ac. **Pop. 1183**

NAYATVOE or **HAARLEN** an isl. **Palk Strait**, off N W extremity of **Ceylon** about 4 m. in circumference, partially cultivated. It has a small **Hindoo** temple, sacred to **Naga** **Tambiram** or the god of serpents, in which are a number of cobra de capello, that are daily fed by the **Pandaras**. **Pop. about 300**

NAYOH or **NAYOO**, a group of four or five small islands in the **Indian Archipelago**, N. of **Celebes**, off the Bay of **Menado**. **NAZAIRE** (St.) several tns. **France**, 1. in **Loire** **Deux-Port**, A. tn. and seaport, dep. **Var**, about 9 m. W. **Toulon** at the bottom of a spacious roadstead where vessels of any size find good anchorage. It has a small harbor formed by two moles, admitting vessels of 150 to 200 tons, and a square tower about 130 ft. high on which a few cannon have been mounted. The entrance to the harbour is defended by three batteries. The coasting trade carried on chiefly with **Marseilles**, is considerable. **Pop. 1542** — 2. tn. and small seaport, dep. **Loire**, **Indre-et-Loire**, about 13 m. W. **N. W. S. W. S. W.** **Loire**, a bank situated of the **Loire**. The large vessels which cannot get further up the river usually discharge here, where there is a spacious wet-dock, varying in depth from 14 ft. to 24 ft. The trade is chiefly in corn and salt. Almost all the pilots for the estuary of the **Loire** reside at **St. Nazaire**. **Pop. 8774**

NAZARETH a vil. and com. **Belgium**, prov. **E. Flanders**, 5 m. E. W. **Ghent** with some linen-weaving two distilleries, two breweries, four flour and three oil mills. **Pop. 5584**

NAZARETH (Arabe, **Nazareth**) a small tn. in **Asia** **Turkey**, **Palestine** path and 20 m. S. E. **Acra** and 65 m. N. **Jerusalem**, celebrated as the residence of our **Saviour** during his youth. It is beautifully situated in a little dell or basin, surrounded on all sides by hills. The houses are of stone, well built, with flat roofs. The principal edifices are the conventual buildings of the **Franciscan** monks, including the **Latin Church** of the **Annunciation**, with their different enclosures, surrounded by strong walls the **Casa Nova** or house built by the convent for the accommodation of travellers and the **Mohammedan** mosque. There is also a **khan** of considerable size at the entrance to the town. Near it, in the valley of **Belsharon**, the **French** signally defeated the **Turks**. **Pop. about 3000**

NAZARETH, a tn. **Brazil**, prov. and 30 m. W. **Bahia**, 1. bank **Jaguape**, 24 m. from its mouth in the **Barra Falsa**. It has a church, and two primary schools, brick and tile works, and some trade in the produce of the district. **Pop. 2000**

NAZE or **LANDMARK**, a cape, forming the S. extremity of **Norway** lat. 67 57' 48" N lon. 7° 15' E. (2.) It consists of a long and sterile peninsula of a somewhat oval shape, connected with the land by a narrow isthmus. A light, 105 ft. above the sea, and of great importance to vessels entering the **Skager Rack**, has been erected upon it

NÄRING par. **Eng.** **Lincoln** 3730 ac. **Pop. 824**

NE (Latin, **Nes**), a vil and com. **Italy** **Piedmont**, div. **Genoa**, prov. and about 8 m. from **Chiavari**, on the **Gravaglia**, here crossed by a bridge of two arches. It has several churches and several towers, a trade in wine, oil, chestnuts, and dairy produce, and several mills. **Pop. 5563**

NEAFU, a vil. **Isl.** **Vanu**, one of the **Friendly** **Iles**, about lat. 16° 4' E, lon. 174 36' W. It consists chiefly of

a number of houses belonging to the missionaries, and forming a kind of street; and a number of cottages, clustering round the church, which is a neat building; a large school-room, and the king's house. The missionaries have a good printing-press, at which the Testament, prayer-books, and school-books are printed, and distributed over the neighbouring islands.

NEAGH (LOWRY), a lake, **Ireland**, and by far the largest in the **British Isles**, having a length, N. to S. of about 18 m., a breadth of 11 m. and an area of above 150 sq. m. It lies between co. **Antrim** on the N and E., **Armagh** on the S., and **Tyrone** and **Londonderry** on the W. and, notwithstanding its great extent is a very uninteresting expanse, having low, moorland shores, often flooded or swampy and ill provided with wood and being almost destitute of islands to enliven and diversify its surface. Its principal feeders are the **Upper** **Bann** **Blackwater** **Blane** **Six Mile** and **Bellinerry** and it discharges itself at its N. extremity, through **Lough Beg**, by the **Lower Bann**. It is only 45 ft. above the level of the sea, and it has been estimated, that by deepening its outlet, about 20 000 ac. of land now annually flooded might be made available for culture. The want of shelter on its shores and the frequent and sudden squalls to which it is subject make its navigation dangerous for sailing vessels, but a considerable traffic is carried on by means of steamers. Its waters are celebrated for their purifying properties

NEATH (CAPELL **NEATH**), a port and municipal bor., market tn., and par. 5. Wales, on **Glamorgan** 1. bank **Neath**, here crossed by a bridge, 7 m. E. N. E. **Swansea**, on the rail way to **Cardiff**. It is irregular and ill built but has been of late much improved, some of the streets having been widened and paved. It has a townhall, occupying the centre of the market-place, with a covered market underneath, a spacious and ancient church places of worship for **Independents**, **Wesleyans**, **Baptists** **Calvinistic** **Methodists** **Society of Friends**, and **Unitarians** a national, six day and two infant schools, various charitable bequests for distribution among the poor, and a reading-room. It exports coal, iron, copper, iron, iron-castings, spelter fire-bricks, oak timber and bark, and imports copper, iron, and zinc ore, corn flour, foreign timber and general shop goods. The port is a creek to that of **Swansea**, and vessels of 300 tons can come up to the town but the trade of the place is principally carried on by large communication with **Bristol** **Ferry** which is about 24 m. below the town. There are many extensive copper iron, and tin works in the vicinity. Near the town are the remains of **Neath** castle and abbey both erected in the 12th century. The bor. unites with **Swansea**, &c. in sending a member to **Parliament**. Area, 1131 ac. **Pop. par. 578**

NEATH (VEDD) **UPPER** a vil and township **Wales** co. **Glamorgan** pleasantly situated in the vale of **Neath**. The **VILLAGE** called **Glyn-Neath**, is a small but well built place, containing a day school and two Sunday schools. **Pop. 1953**

NEATH (VEDD) a vil and township **Wales** co. **Glamorgan** pleasantly situated in the vale of **Neath**. The **VILLAGE** called **Glyn-Neath**, is a small but well built place, containing a day school and two Sunday schools. **Pop. 1953**

NEATH (VEDD) a vil and township **Wales** co. **Glamorgan** pleasantly situated in the vale of **Neath**. The **VILLAGE** called **Glyn-Neath**, is a small but well built place, containing a day school and two Sunday schools. **Pop. 1953**

NEATH (VEDD) a vil and township **Wales** co. **Glamorgan** pleasantly situated in the vale of **Neath**. The **VILLAGE** called **Glyn-Neath**, is a small but well built place, containing a day school and two Sunday schools. **Pop. 1953**

NEBRASKA a territory U. States N. America, between lat. 36° 23' and 43° N lon. 96° and 110° W, bounded N. by the unappropriated territories beyond the parallel of 43° W. Utah from which it is separated by the **Rocky Mountains**, S. New Mexico, Texas, and the **Indian** territory, and E. Missouri and Iowa, area, estimated at 138 700 sq. in. The whole territory is still in a state of nature, and little more is known of it than that its great features are, on the W. the eastern of the **Rocky Mountains**, which rise up majestically, forming the water-shed between the **Atlantic** and the **Pacific Oceans**. In the centre, an apparently unrelaxable wilderness, belonging to what may be termed the **Great American Desert**, and in the E. extensive tracts of prairie, which may yet be turned to good account. The principal rivers are the **Missouri**, which forms the boundary on the E. Its great affluent, the **Nebraska** or **Platte**, which, formed by two main forks, a N and a S, both from the **Rocky Mountains**, traverses the territory in an E. direction the **Arkansas**, which, rising within the territory, traverses it also in an E. direction, and forms part of the boundary between it and the **Indian** territory and the **Kansas**, which forms part of the S. E. boundary, after

being augmented from within it by a number of allotments, under the names of the *Smoky Hill*, the *Grand Saline*, *Solomon's*, and the *Republican Forks*. The Indian is still in complete possession of the territory, and roams over it in quest of game or plunder.

NECESSIDADES or **SANTO ANTONIO**, a vil and par Brazil, prov Santa-Catharina, 6 m. E. Desterro, with a church and a primary school and considerable exports of molasses, manioc, sugar and rum, for the last of which it has 30 distilleries. Pop. 3000.

NECHANTITZ or **NETO-NACHANTITZ**, a market tn. Bohemia, circle and 34 m. E. Budweis on the Bistritza. It has a church and a school. Pop. 1054.

NECHOW, a tn China, prov Chekiang advantageously situated on the main road between Hway-chow and Ningpo. It is a busy place, carrying on an active trade with Hway-chow, Yuen-chow and Hang-chow. Pop. 10,000 to 20,000.

NECHALOVA or **NIKHALOVA**, a tn and town, one of the Friendly Is. It occupies an elevated height on the S.W. coast, about 100 yards from the water's edge, and covers an area of 4 or 5 ac., surrounded by a deep, broad ditch, now partly filled up, and a strong wall or fence of reeds, like wicker-work, about 9 ft high. The houses, about 350 in number are of an oval form and have large pillars supporting a roof also oval. Each house has a court-yard, enclosed by a neatly interwoven reed fence, and containing bread fruits and coconuts, trees, and other useful plants and shrubs. The most conspicuous objects are two churches—one a neat, plain building, occupying a great plot on the highest summit of the island. Both churches are under the direction of the Wesleyan missionaries who have long had a station here. P. 2000.

NECKAL, a river, Germany, which rises about 2000 ft above sea-level, on the E slope of the Black Forest, Württemberg, near the source of the Danube and the frontiers of Baden, proceeds S N E, traversing the N W corner of Hohenzollern, E N E to Esslingen, where, on crossing the Rhine, it takes a circuitous course N through Württemberg, and enters Baden. On reaching the S frontiers of Hesse-Darmstadt, its course through craggy, becomes almost due W past Heilbronn and it joins r. bank Rhine at Mannheim. Its principal affluents are, on the l., the Isar, and on the r. the Fils, Rems, Murr, Kocher and Jaxt, total course 270 m. of which about 120 m. commencing at Cannstadt, are navigable.

NECKAR-GRÜNDER, a tn. Baden circle Lower Rhine at the confluence of the Elsenz with the Neckar 16 m. E. S. E. Mannheim with three churches, building yards, manufactures of leather and cardewave, and some shipping. Pop. 2150.

NECKAR-STRICKON, a walled tn. Hesse-Darmstadt, prov Starkenburg on the Neckar 5 m. E. Heilbronn, with some shipping, a tobacco-factory, and a trade in wood. The steep hills in the neighborhood are crowned with four feudal castles. Pop. 1521.

NECKARAU a vil Baden circle Lower Rhine, on an isl. in the Rhine, S. Mannheim. It contains a Protestant and a Catholic parish church. Pop. 1631.

NECKARBUHL, a tn. Württemberg circle, and on the Neckar 30 m. N Stuttgart, with an old castle of the knights of the Teutonic order, a Latin school, manufactures of leather, and some trade in wine. Pop. 2403.

NECKARTENZLINGEN, a vil. Württemberg, circle Schwarzwald, on the Rhine, near Nürtingen. Hard by it is the plateau of Neckar on a height above the Neckar, formerly occupied by an ancient castle of same name. Pop. 1018.

NECKARTHALFINGEN, a vil. Württemberg, circle Schwarzwald, 4 m. S.W. Rüdningen, l. bank Neckar here crossed by a bridge, on the road to Reutlingen. It has a church and a market. Pop. 1040.

NECKER, an isl. Pacific lat. 28° 34' N; lon 154° 27' W (a), a mere rock, about 500 yards long, and 360 ft. high without a single tree on it, but vegetation abundant towards its summit, shores steep as a wall; the sea breaks with fury against it at all points. It was discovered by La Perouse, November 1, 1788, and was covered with guano.

NECKTON, par Eng. Norfolk; 2749 ac. Pop. 1020.

NECEPAL or **NECEPAL**, a tn. Hungary, Hübner-Danube, co. Thurco, at the foot of Mount Ciel, on a small stream of same name, 23 m. N W W. Neusiedl with a Protestant and a R. Catholic church, a Protestant school, four chateaux, and a paper-mill. Pop. 1823.

NEDA (San Nicolas del), a tn. Spain, Galicia, prov Coruña, r. bank Ferrol, here crossed by a bridge, at the confluence of the Jubia, 5 m. E. Ferrol. It is tolerably well built, has a substantial church, a courthouse, two primary schools, and an hospital; manufactures of woollen and linen cloth, a trade in agricultural produce, and bread, sent chiefly to Ferrol, and numerous mills. Pop. 1804.

NEDDANS, par Ire. Tipperary 2885 ac. Pop. 605.

NEDÉCZ or **NEDECS**, a vil. Hungary, Hübner-Thälis, co. Zips, in a valley near the Danube, in a very mountainous district, about 45 m. from Lenteau, with a church and an old castle. Pop. 1011.

NEDELICS or **NEDOWICS**, a vil. Hungary, Thälis-Draube, co. Szabolcs, near the Drave, 4 m. N. W. Szabolcs, with a R. Catholic church. Pop. 1001.

NEDENES or **NEDENES**, a tn. Norway, prov Christendom bounded N.W. by prov S. Bergenhus, W. Stevanger S.W. Mandal, S. and E.E. the Skager Rack, and E. and N.E. Bragaberg, greatest length, N.N.W. to S.E.E., 180 m. mean breadth about 30 m. area, 3488 sq. m. The surface is mountainous in the N and N.E., where summits of the Hingfjeld exceed the height of 4000 ft., but lowers gradually S. towards the shore. The principal river is the Torredal, which traverses the hillwork centrally N. to S. the other rivers, descending of notes, are the Silt, Topdal, and Mancel. There is much fine scenery in the valleys watered by these streams. Chief town, Arendal. Pop. (1855) 69,112.

NEDERBEEKEL, a tn and com. Belgium, prov E. Flanders, 16 m. S. Ghent with several breweries, a salt-refinery, two bleachfields, two dye-works, and oil, mustard, and flour mills. Pop. 2763.

NEDERHASSILT a vil and com. Belgium, prov E. Flanders, on the Molenbeek, 22 m. S.E. Ghent. Weaving of linen and agriculture are the chief employments. P. 1517.

NEDERLANDEN Kingdom of Europe. See NETHERLANDS.

NEDERWEET a vil. Holland, prov Limburg, 13 m. W. W. Roermond, with a church and school. Pop. 540.

NEDDING par Eng. Suffolk, 837 ac. Pop. 183.

NEDJED, a dist. Arabia. See NAJD.

NEDRIGAILLOW a tn. Russia, gov. and 104 m. N.W. Kharkov l. bank Soula with three churches, and a coal

dearable trade, particularly in tobacco which is extensively grown in the neighborhood. Pop. (1843) 2676.

NEDUNTIVO Isl. Ceylon. See NAUNT.

NEEDP, a vil. Holland, prov Gelderland, 43 m. E. N. E. Arnhem, in a rich corn country. It has had streets, rendered disagreeable by numerous dung-heaps, a good-looking old Calvinistic church, a Catholic chapel and a school. P. 864.

NEEDHAM par Eng. Norfolk 1127 ac. Pop. 235.

NEEDHAM MARKET, a tn. England, co. Suffolk, 6 m. N. W. Ipswich, on the railway to Bury St. Edmunds with a large chapel belonging to the Establishment, an Independent chapel, and a Friends meeting-house a free grammar and other schools and several charities, malt and glass are made in the town, and, near it, are brick and tile works. Pop. 1268. See Local Correspondent.

NEEDLES (Tn), a cluster of remarkable rocks, England, off W. extremity Isle of Wight, and so called from their pyramidal and pointed shape lat. (light) 50° 59' 54" N; lon 1° 54' W (a). They are five in number, though only three of them now stand boldly out of the water. They are composed of chalk, and though white, are curiously streaked with black dots from the alternating strata of flints. The fragile nature of their component parts, and the violence of the waves, are continually making changes on their form and disposition, and about 60 years ago, the one to which, from being so sharp, and thin, the name of needle was most applicable, and which measured about 100 ft. in height from low-water mark, fell down and almost entirely disappeared. A lighthouse, called the Needle light, was situated near the edge of the alff, on the W. extremity of the Isle of Wight, has a height of 449 ft.

NEELHERRY, mountains, India. See NEELHERRY.

NEEMABHERA, a tn. Hindooon, prov Malwa, 17 m. N. W. Neemuch lat. 24° 35' N; lon 74° 50' E.

NEEMBUCU a tn. Paraguay, in a marshy tract, near l. bank Paraná, 100 m. W. S.W. Assumption, with a saw-mill, at which a considerable trade is carried on. Pop. about 1720.

NEEMLA, a small tn. Afghanistan, in the plain of Jalalabad, 8 m E Gushanuk; lat. 34° 18' N; lon. 70° 8' E. Near it is a fine market.

NEEMUTCH, a tn Hindostan, prov Ajmeer 36 m S. by E Chittor; lat. 24° 37' N lon. 75° E 1476 f. above sea-level. It contains a good bazaar to the N.W. of which is a British cantonment.

NEEN two pars. Kog Salup—, (Savage) 8779 ac. Pop. 446.—2 (Savage) 1779 ac. Pop. 218

NEEVON par Eng Belg; 1140 ac. Pop. 118.

NEER, a vil. Holland, prov Lumburg 5 m N Boersmond on the Meer, near its junction with the Meuse. It has a church and school. Pop. (agricultural), 678

NEELHUYLSM, a vil and com. Belgium prov S Brabant, on the Little Geste 31 m S.E.E. Brussels. It has a brewery and a mill but the chief employment is agricultural. Pop. 1314

NEERLINTER, a vil and com. Belgium, prov S Brabant on the Great Geste 80 m E Brussels. It has two mills. Pop. (agricultural), 1888

NEERHOUTEREN, a vil and com. Belgium, prov Lumburg on the canal for Houtveldt in Herengracht 60 m N.E. Hasselt. It has two oil and four flour mills, and a trade in agricultural produce. Pop. 1275

NEERPEL, a vil and com. Belgium, prov Lumburg on the Demmel, 55 m N Hasselt with a brewery and a flour-mill. Pop. (agricultural) 1150

NEFRWIVIEV, a vil and com. Belgium, prov and 24 m W.W.N. Lige on the railway to Tirlemont famous for two great battles fought on its plains—the one in 1698, in which the French, under Marshal Luxembourg defeated the allies, under William III of England, and the other in 1702, when the Austrians, under the prince of Coburg defeated the French under Damour. Pop. 824

NEERYSSCHE, a vil and com. Belgium, prov Brabant, on the Yacche, 6 m S.W. Louvain, with a brewery a mill, and a trade in agricultural produce. Pop. 1225

NEFTA, a tn N.W. Africa, regency and 217 m S.W. Tunis lat. 34° 12' N lon. 7° 55' E, close by several extensive salt lakes. It is rather a collection of villages separated from one another by gardens, than a town. Both the position of the place and the services are extremely poor.

The houses are generally built of brick, some of them with taste. It is divided into three quarters each of which has a mosque and school and in the centre of all is a square, which serves for a common market-place. It is the entrepot of the merchandise sent from the metropolis into the Sahara. Some Jewish artisans are tolerated here, on the known conditions of wearing a black handkerchief on their head and not mounting on horseback. The inhabitants are represented as strict observers of the Mahometan law, and as very hospitable. —(Dumas, Sahara Algérie)

NEFTENBAACH, a vil and par Switzerland, can and 18 m N.W.E. Zürich. It has a vine district in which some of the best wine of the canton is produced, and contains the ruins of an old castle. Pop. 1452

NEFYV, a par in, and par Wales. See NEFV

NEGAPATAM, a seaport in Hindoostan coast of Coromandel, prov Carnatic 20 m S. Tranquebar, lat. 10° 46' 30" N lon. 79° 50' E, once a place of great importance, but now much decayed and depopulated the remains of some old fortified Dutch houses the obelisks and ruins of an extensive burying ground, and the ruins of a fort is the centre of the town, alone remaining to give some idea of its once flourishing condition. Negapatam was originally a small village, but was fortified and improved by the Portuguese. It was taken from them by the Dutch in 1686, who strengthened its fortifications, erected public offices, and established a mint. By degrees its trade increased and the town was resorted to by merchants from different parts of the world, and became the capital of the Dutch settlements in Hindoostan. Since 1763, when it was formally ceded to the British, its fortifications have been destroyed, and most of its trade transferred to other places. A few soldiers however still frequent it, and ships often stop there for provisions and water.

NEGOMBO, a seaport tn. Ceylon, 34 m N Colombo, near the mouth of the Kaywel. It is a place of some trade, but is resorted to by coasters only. It contains several places of worship, and is the residence of an assistant Govern-

ment agent, who collects the revenues and customs. Negombo is famous for its fish, kid, poultry, eggs, and bread-fruit, vegetables, also, may be obtained in plenty at moderate prices, and game is abundant. It was formerly the place of residence of several respectable Dutch families, whose gardens were celebrated for their exotic fruits, originally introduced from Java, and the Malay peninsula. The country around abounds in excellent pasturage. Very fine mushrooms are found here during the rainy season, and from the care with which the country is irrigated, a great deal of paddy is produced.

NFGHAIR, a dist. lat. lat and mapo Bernah. The district is situated at the S.W. extremity of Pegu, area, 9000 sq m. surface low and, except where cleared for culture, overgrown with jungle and forest. Rice is the principal grain cultivated but maize, yams, sweet potatoes and furmaceous roots are also raised. Bulk and cotton coarse goods are manufactured in the province. The objects of internal trade are rice, salt, salted and dried fish, sent inland from Bassein for which the returns are salt goods, lacquered ware, tobacco, opium, tamarind, cotton lac, lacquer petroleum, oil, dammer, iron sulphate and sulphur. Large quantities of salt are manufactured on the sea-coast.—The Malays, situated at the mouth of the W. branch of the Irawadi. lat. 14° 2' N, lon. 95° 19' E. is small and has a harbour the most secure in the Bay of Bengal. The Madras Government established a small settlement here in 1657, but it was subsequently relinquished. In 1751 it was again occupied by the British and again abandoned. Six years afterwards it was ceded to the British by the Burman emperor Alompra. and in October 1759 it was attacked by the Burmese, and all the British soldiers who could not effect their escape, were murdered. Latterly it has been almost entirely deserted and is overgrown with jungle, and intersected by salt-water inlets.—The CAVE, forming the S.W. extremity of the district, is in lat. 16° 1' 30" N lon. 94° 12' E (N).

NEGRAR, a tn and par Italy Venetia, prov and N Verona with numerous lawns, villas, three churches, and 11 mills. Pop. 3476

NEGHEPELISSEL (Latin *Argus Pellicionis*), str. France, dep. Var-et-Garonne 10 m N.E. Monteban. The inhabitants early distinguished themselves in the cause of the Reformation, and it has still a Calvinistic consistorial church. It suffered dreadfully during the religious wars, and was ultimately almost entirely destroyed by Louis XIII, who ordered an indiscriminate massacre of its inhabitants. It has some manufactures of cotton, cantery, and leather and a trade in corn. Pop. 1234

NEGRILO PUNAS, two remarkable capes or headlands Jamaica, forming the most W. points of that island they are called, respectively N and S Negri, the former lat. 18° 23' N lon. 78° 23' W (N), the latter lat. 18° 16' 45' N lon. 78° 22' W (N) they are about 8 m apart, the intermediate space forming a semicircular bay called Long or Negri Bay in which is a small island named Booby Island.

NEGRO, a cape W. Africa W. coast Bights lat. 15° 45' S lon. 11° 49' E. It consists of a precipitous mass rising at the extremity of a low projecting point and hence, at a distance presenting the appearance of an island. It is composed of red sandstone and horizontal strata of different colours, abounding with varieties of fossil shells. On its summit, when seen by Bonster was a small marble cross, erected by the early Portuguese.

NEGRO (Iro) a large river S. America constituting, throughout its whole length the boundary line between the Republic of La Plata and Patagonia. It is formed by the junction of two principal head streams, called respectively Catapichie and Encarnacion, or Limay Leuba (river of leeches) according to the natives. The former flows from the N, along the base of the Cordillera, having its sources on the E. slopes of the Chilian Andes, near the volcano Villarrica. lat. 33° 10' S lon. 71° 10' W the latter flows from the S.W. issuing from a lake called Nahuelmapi lat. 41° 6' S. These two head streams unite at lat. 40° 5' S. lon. 71° W. From this point, the Rio Negro proceeds N.N.E. under the Indian name Limay Leuba, to about lat. 30° 50' S, where it is joined by the Nequimen, whence it flows nearly due W, to lon. 66° W when it takes a S.E. direction, and falls into the Atlantic N. from the Gulf of San Matias; lat. 41° S.

lon. 62° 50' W. The entire length of its course is between 500 m. and 600 m., exclusive of windings, during the latter part of which it is known by the name also of the *Cuen Lander*. In nearly the middle of its course, or about lat. 25° S., there occurs a large island or group of islands, formed by a diverging branch of the river, called *Islands* or *Chibichil*. Above this, the river is studded with innumerable small islands, which greatly obstruct the navigation. Further up, it is bounded by steep rocky escarpments rising 500 or 600 ft. above the stream, which runs with great violence. Towards its mouth, the river is about a third of a mile wide, and flows in a broad and still current. The entrance into the Rio Negro is obstructed by a bar, on which there is only 0 ft. at low water and generally speaking, 11 ft. is the utmost draught that may enter it without incurring risk. The river was ascended nearly to its source by Villarica, a Spaniard, in 1773. It runs nearly parallel with the Colorado, at a distance of from 50 m. to 60 m., for about 270 m.

NEGRO (Rio) or **GUATIMA**, a large river, S. America one of the greatest affluents of the Amazon, mostly in Brazil, but having its source in New Granada. It is formed by the junction of two head streams, the *Jatun* and *Tacopi*, which unite at lat. 2° N. lon. 70° 25' W. whence it flows N. E. and E. to Maraca, lat. 2° 40' N., in Venezuela, when it suddenly turns S., holding on this course till it reaches 0° 10' S., when it proceeds E. to large 63° 45' W., whence it flows S. E. and E. subsequently falling into the Amazon at lat. 2° 16' S. lon. 69° W. In whole course is about 1000 m. The principal tributaries from the left or N. are the *Casiquari*, *Cababari*, *Palavari*, *Branco*, *Jansary*, and the *Anavellhana*. From the right or S. and W. the *Aguio*, *Toma*, *Xis*, *Isaana*, *Hampas* or *Gupapas*, the largest affluents of the Negro, and about 30 smaller but many of them considerable streams. In the lower part of its course the Rio Negro has rather the appearance of a succession of lakes, united by comparatively narrow channels that of a river, starting in some places, for a width of 15 m., 15 m., and 30 m. and sometimes narrowing to 1 m. at its mouth it is about 1½ m. wide. The waters are lowest in March, in April they begin to rise and attain their highest level in August and in September they begin to fall; the difference between the highest and lowest level is about 30 ft. The upper stream of the Rio Negro is connected with that of the Orinoco by the river or natural canal of *Casiquari*. The junction takes place with the Negro at lat. 2° N. and with the Orinoco at lat. 3° 10' N., the distance between the two rivers, at these points, being about 120 m. **NEGRO (Rio)**, a large river Uruguay. It rises in the *sera Chabota* on the N. E. frontier of the State, about lat. 32° S., lon. 54° W. from which it flows generally N. W. and S. W. and falls into the *Lugrany* at lat. 33° 25' S. lon. 56° 25' W. total course, about 300 m. Its principal affluents are the *Tuvini*, from the N. or right; and the *Yac*, from the E. or left. It derives its name from the *maripilla* plant, which grows on its banks in abundance, and, falling into the stream as it decays, discolors the water at the same time communicating to it medicinal virtues, which attract invalids to the village of *Marceda*, near its mouth. Its navigation is interrupted by numerous obstacles.

NEGRO (Rio) several small rivers, S. America.—1. New Granada, an affluent of the *Magdalena*, flows from the N. E., and falls into the upper part of that stream at lat. 2° 55' N. lon. 70° 25' W.—2. New Granada, an affluent of the *Meta*, which it joins a little below its source, at *Perio Marayal*, lat. 4° 8' N., lon. 74° W. It flows from the N. W. and consequently enters the *Meta* from the left.—3. Paraguay, an affluent of the *Taquari*, a tributary of the *Paraguay*, having its source near *Thipari*, lat. 25° 36' S.; and, flowing S. S. W., joins the *Thipari* at lat. 25° 36' S.

NEGROPONT an isl. and m. Greece. See *EUROPE*. **NEGROB**, an isl. and prov. Indian Archipelago, one of the Philippines, separated by narrow channels, from *Pasey*, on the N. W., and *Zabo*, on the S. E., and extending from lat. 9° 8' to 10° 58' N., lon. 123° 35' to 125° 20' E.; length 120 m. average breadth, 35 m. The W. coast is sandy and safe, but strong currents make the E. dangerous. A range of mountains, with several lofty peaks, runs N. to S., from which numerous rivers descend to the sea. The centre of the island is thickly as at known. Earthquakes frequently occur, the climate is healthy, janitors, the only common

inulety, arises from the temperate use of palm-wine. Baidet animals common to Negroes with the other Philippines, it has some kinds of monkeys peculiar to itself, and also civets (*Viverra*). The rivers swarm with fish and crocodiles. The forests abound in cabinet woods of great beauty and fine quality. The cochineal insect is found in the S., but no one gathers it. The wild tribes of the interior cultivate coffee and cacao trees, and traffic with the more civilized inhabitants of the coast, to whom they are dangerous only when provoked. The latter cultivate rice in the sugar palm, for cordage the abaca, cacao, and tobacco. They weave to some extent, and are devoted to fishing. Negroes produce, also, wax and honey palm-oil, chalk, rock-crystals sulphur, adithia beads, nests, and pearls. It derives its name from the *Negritos*, a small race of negroes, who, with the *Igorrotes*, occupy the interior. The province contains 28 pueblos or townships. The governor resides at *Tinsamulan*, on a creek on the W. of the island, where small brigas only can enter. The place is so poor that even the governor's house and the church are made of nipa. Pop. prov. 50,000, savage tribes unknown.—(Mallat, *Les Isles Philippines*).

NEGYYHD, a vil. Hungary, Either *Dunabo*, so and 80 m. from *Nemira*, on the *Wag* with two churches. White coils and animals are cultivated on a large scale, in the district P. 2326.

NEHAVENT or **MAHAWUND** a town, Persia, prov. *Irak Ajlani*, cap. dist. in an angle at the junction of two streams which unite in forming the *Arax* 60 m. S. E. *Kermanshah*. It stands on the side of a hill, covered by a stand, and, though partly ruinous, has a number of good houses, and well-supplied bazars, and carries on a considerable trade with the mountaineers of *Luristan*. Its vicinity is covered with gardens, stocked with the finest fruits. *Nehavend* is famous for a battle fought, in 641, in which the Arabs signally defeated the *Parthians*, and overthrew their monarchy.

NEHEIM a town, Rhineland Prussia, gov. and 6 m. N. W. *Arnsberg*, at the confluence of the *Miffina* with the *Ruhr*. It has a church and three mills. Pop. 1464.

NEHEREN, a vil. W. *Bismarck*, circle *Schwarzwald*, near *Tibingen* with a church. Pop. 1404.

NEHRUNG, a long and narrow belt of land, Prussia, stretching along the S. E. shore of the *Baltic* near the form of an arc of a circle and separating it from the large lagoon of the *Cursche-Haff*, length nearly 60 m.; breadth nowhere exceeding 3 m. It is composed entirely of sand, which has been gradually raised so that vegetation is in a great measure destroyed, and several heathlands have been barred.

NEIDENBURG, a vil. Baden circle *Middle Rhine*, bail *Dresden*, with a church. Pop. 1213.

NEIDENBURG, a walled town, Prussia, gov. and 95 m. S. by W. *Königsberg* cap. circle, on the *Nemka*. It has two churches, and manufactures of woollen cloth, leather, and hats. Pop. 2742.

NEIGHERRY HILLS, *NEIGHERRIES*, or *NEIGHERRIES*, a mass of mountains in S. *Rhinodonta*, partly in prov. *Comtat* about lat. 11° 10' N. at the E. extremity of the *E* and *W* Ghats, and, at its W. end, a connecting link between them, extending E. to W., about 54 m. and, N. to S., about 16 m. culminated point, 9041 ft. high. They form a plateau, have peaks 5000 to 8500 ft. high, and several stations, resorted to by Europeans for the salubrity of the climate. The higher parts are often frosty even in summer, and in winter they are covered with snow. Lower down, the surface is a fine pasture like much of our downs, and the wild fruits of our own country are found in abundance. The deeper valleys are occasionally narrow and marshy, but the usual character of the less elevated portion is like the S. of Europe.

NEILSTON, a vil. and port Scotland, on *Benbow*, on the *Leven*, 9 m. W. S. W. *Glasgow*. It has an ancient parish church, Free and U. Free-schools, three dissenting schools, a mechanics' institute, several cotton-mills, printworks, and blacksmiths, and four annual cattle fairs. Area of par., 24,820 ac. Pop. 10,577, of vil. 13,238.

NEIRAI, *NAIRAI*, or *NIRAI*, an isl. S. *Pacific*, *Togoo* group, E. of *Koro*. At *Vamamoto*, on the W. side, there is a harbour, with good shelter from the N., and anchorage in 15 fathoms, about ½ m. from the shore. The bay itself is of a circular shape, having all the appearance of an old crater, and, from having a shallow entrance, becomes in a manner isolated at low water, so as to form a beautiful lake. The

inhabitants are famous for the manufacture of mats, baskets, &c., and carry on a considerable trade in them by means of barter with the neighbouring islands.

NEIBONE, a vil and com. Italy, Piedmont, div Genoa, prov Chiavari, 4 m. from Cignone, with two churches, and a trade in wine and olives. Pop. 3015.

NEIBSE, a co. Prussia, prov. Silésie, gov Oppeln and on a river of same name, 47 m. S.E. Breslau, with which it is connected by railway. It is a place of considerable strength being surrounded by walls, and otherwise fortified. It is divided into three parts—the town proper, Frederick's town, and Fort Prussia. It is tolerably well built, contains two Protestant and several R. Catholic churches, a synagogue, several courts and public offices, a gymnasium, high school, an hospital, orphan asylum, institute for superannuated R. Catholic priests, arsenal and other military establishments, and manufactures of fire-arms; a powder, walk, cotton and several other mills and a trade in woollen and in building-stones, extensively quarried in the neighbourhood. It came into the possession of Prussia in 1741, when, after a valiant defence, it was taken by Frederick II. Pop. (1816), 8541; (1849) 17,194.

Ni. 1882, two rivers, Germany, which both have their source in Bohemia, their principal course in Silesia, and fall into the Oder. The one rises in the Riesengebirge near Reichenberg, traverses the E. corner of Saxony past Erlau, enters Prussian Silesia, and, flowing in a N. direction past Görlitz, Muskau, and Guben, where it becomes navigable, joins the bank Oder at Schiedlo, after a course of about 180 m. The other Nadme rises in the Schneeburg, belonging to the Prussians, which here form the boundary between Bohemia and Prussia. It flows through Silesia, first N. past Gits, then W. past the town of Neuses, and lastly, in a direct direction, N. E. past Schunberg, joining the bank Oder about 4 m. below its whole course, which is rapid, is about 100 m.

NEIVA, a river, Russia, gov. Perm, which rises in the E. slope of the Ural Mountains, circumscribes the N. W. Ekaterinburg. It flows S.E. past Alapaevsk and Irbit, and, after a very winding course of nearly 300 m., joins the bank Tura at Nizhnik. Its principal affluents are the Irti and the Irbit, which both join it on the right.

NEIVS, a vil and com. Italy Piedmont div Coni prov and 4 m. N. E. Alba, near the Tanaro with a church, a communal school, and a trade in corn and wine. Pop. 2,550.

NEJD (the elevated country) the general name of the central portion of the Arabian peninsula. Some Arab writers use the name in an abstruse sense, and speak of the Nejd al Hajja or al Yemen that is to say, the inland and elevated region of Hija or Yemen; but ordinarily the word Nejd is employed without an epithet, to signify the country in the interior, enclosed by Hija, Yemen, Hadramaut, Oman, El Ahsa and the Syrian desert. The country in question has been traversed but once by a European on the route from El-Katif, through El Ahsa to Medina and Yumbo, and probably it is not known perfectly to even the most experienced of its wandering occupants. The utmost that can be done, therefore, in the way of describing it, is to indicate the oases, so far as they are known, which give it importance, and the routes connecting it with surrounding countries. 1 On the N. W. frontier of Nejd, and on the road to Damascus, lies Jéf or Jéf al Bikhra a rocky tract, embracing probably some well-watered valleys, and with the towns or villages Belake and Dûmah or Dûmah the latter generally called by Arab geographers Dûmah al-Jadid. The approximate position of this oasis is lat. 29° 40' N; lon. 41° E. 2 About 150 m. S.E. of Jéf is the mountainous district of El-Shamir commonly known also by the general name of El-Jebel (the mountain) in which there are many villages, of which Hasd appears to be the most important. The names of Belmah and Aja also frequently recur in Arab history and legend. With respect to the height of the mountains at this place, we only know that Arab travellers compare them to Lebanon (9000 ft.) At all events, it is certain that El-Shamir is elevated enough to reach a humid region of the atmosphere, and to possess copious fountains and cool pastures, so as to have been always a chief centre of Arab life. As it is about half way between Basorah and Mecca. It is the chief halting-place of the pilgrim-caravans from Persia and central Asia. In the early

and flourishing ages of Arabian commerce, it served in like manner to facilitate the communication between the Persian Gulf and the Mediterranean Sea. 3 Kasim lies to the S. of El-Shamir, probably about 100 m., and N.E. by E. of Medina. It extends between three and four days' journey to H. and two days N. to H. In 1519, when Capt. Salazar passed through this country, he called it was El-Haz, the former capital, Amsoh or Amush, which was El-Haz is a large town, surrounded by corn fields and plantations. The villages of Kasim are numerous and well supplied with provisions. 4 Adjoining Kasim towards the S.E., extends, for five days, El Wessem. A tract affording good pasture. Then follows El Arod, which appears to be divided into two districts. 5 Derayah, the chief town of which with the same name acquired a temporary celebrity as the capital of the Wahab and El Kharij. The town of Derayah stood on the banks of a constant stream and could be approached only through narrow defiles the country around was populous and productive. 6 El Kharij lies half way between Derayah and El Ahsa, all three being probably near the parallel of 26°. This oasis is also called Hailah, and resembles El Ahsa in its abundance of water and immense production of dates. 7 N. of Derayah, five or six days' journey, is Sodeir respecting which we have but little information. The country called by Arab geographers El-Yemadma, seems to have embraced El Kharij and Derayah. From this stretch of Nejd it will be apparent that the chain of wadies or oases which yield food for a comparatively dense population lie chiefly on the road between Bahran and Medina while the populous districts towards the N. are situated on the hills which lie at the intersection of the caravan routes from the Persian Gulf to the coast of Syria, and from the Euphrates to Mecca. There is said to be S. of El Ahsa, on the road to Oman, an oasis named Yabrin or Jabrin which is seldom visited on account of its insalubrity in the air, winter, and dates being almost all the produce. But it really there seems to be no temptation to penetrate into that quarter. 8. of Nejd there extends an immense desert of deep, fine sand the accumulation of ages, under the influence of predominating W. winds, and which completely cuts off all direct intercourse by caravan with the countries in the S. The more elevated tracts of Nejd are celebrated for their pastures and feed immense droves of camels which browse on the bushes and thorny plants of the desert. In former times this paradise of the Bedowin was exclusively enjoyed by the Amsoh the most powerful of all the Arab tribes. But they did not hold it undisturbed for the Meccan another great tribe encamping between Kasim and Medina, habitually contended for a share. These founts were at length completely suppressed towards the close of the last century by the rulers of Derayah who then permitted all Bedowin without distinction of tribe, provided they were Wahab to find their camels in the plains of Nejd. Hence this country is popularly called 'the Mother of Camels', it annually supplies thousands of these animals for the use of the Syrian caravans. The camels of Nejd are swift and hardy, but not so large or strong as those of Egypt. The best breeds of Arabian horses also belong to Nejd. They have speed, symmetry and good constitution, but rarely exceed fourteen hands in height. Great numbers of them were sent to India at the beginning of the present century. The settled inhabitants of Nejd are chiefly Beni Yaza with these are mingled mercantile sojourners from various quarters, who buy up the camels and also or overcoats made by the natives and supply the wants of the Bedowin.—(Barthelme, *Revue des Arabes*, Florent, Description, &c., *Journal de Manira*, *Hist. de l'Egypte*, &c. vol. 1.)

NEJIN or NEMAN, a co. Russia, gov. and 37 m. S.E. Orenburg cap. circle, 1 bank Oder. It is surrounded by an earthen rampart, and defended by a castle. 1 m. well built, has manufactures of silk stuffs soap, leather, perfumes, confectionary, and especially liqueurs, which are in great demand in Russia, and a considerable trade, being an entrepot between Leipzig and Danzig on the one hand, and Moldavia, Wallachia, and the Crimea on the other. Pop. 16,000.

NEKORZ (ONNA AND UZUR), two congeneric villages, Bohemia, circle Kladsko, about 4 m. from Starebohrz on the banks of the wild Adler. They have a church, a school, a quarry, and a mill. Pop. 1460.

NELSEER or **NELIDURAN**, a tn. Hindoostan, prov. Malabar 50 m. S.E. Margalore, with which it was formerly connected by a chain of large, and eighteen small forts, intended to defend the numerous inlets and anchorages for small vessels on the coast. These forts, since the British ascendancy have been allowed to decay.

NELIOR a tn. S. Hindoostan, prov. Madras, cap. dist. 7 m. from the Pannar near its mouth in the Bay of Bengal, 110 m. N by W Madras lat. 12° 49' N, lon 80° 1' E. It is surrounded by a mud wall, with some towers of stone at intervals, but without the walls there are also extensive suburbs. It is a populous place, and carries on a considerable amount of business. The principal street, which is three-quarters of a mile long, is composed of well-furnished shops, but there are no buildings worthy of notice in the town. The perimeter area 7930 sq. m., lies between the 14th and 16th degree of N lat. Some copper-mines have been found in it, but not under circumstances that would admit of their being profitably worked. A considerable quantity of salt is made for the government, on the coast, near the town of Neliore. Pop. (1859) 328 726 (1851) 935,690

NELSON a tn and settlement, New Zealand N end of Middle Island, or New Munster, finely situated on a flat, hemmed in by rugged hills, at the S.E. extremity of Blind Bay and the mouth of a small river, called the Matau. The beauty of the site scarcely compensates for the serious disadvantages of having a harbour which only admits vessels of about 500 tons at high water and is left dry at ebb, and of being surrounded by a district much more remarkable for its romantic beauties than for its agricultural capabilities. The progress of the settlement has consequently been slow and the town though founded in 1841 and as well planned in circumstances would permit, continues to be little better than a straggling village. It consists of several streets surrounding a square raised about 40 ft. above them, and containing in its centre an Episcopal church, built of wood, in the form of a cross. There are also a Wesleyan chapel neatly built of brick a literary institution with a small library an agricultural and horticultural society, a brewery and several saw and flour mills. The importance of Nelson, as a seaport, would be greatly increased by the formation of regular docks, which have been projected, and might, apparently from the soft muddy bottom of the haven, be effected at comparatively moderate expense. It consists of several streets surrounding a square raised about 40 ft. above them, and containing in its centre an Episcopal church, built of wood, in the form of a cross. There are also a Wesleyan chapel neatly built of brick a literary institution with a small library an agricultural and horticultural society, a brewery and several saw and flour mills. The importance of Nelson, as a seaport, would be greatly increased by the formation of regular docks, which have been projected, and might, apparently from the soft muddy bottom of the haven, be effected at comparatively moderate expense.

NELSON,—An old Chap. Archipelago Indian Ocean lat. 5° 40' 30" S lon 72° 22' E on the N and E. verge of the Great Chagos Bank, about 1½ m. in length, by 400 or 500 yards broad is low and rocky, and about 12 ft. above the sea.—2 A cape, S. Australia, forming W. side Portland Bay lat. 38° 26' S. lon. 141° 26' E (n)—3, A port (Carreage Bay) N.W. Australia, between Brunswick Bay and Prince Regent river lat. 15° 6' S. lon 125° 4' E (n)—4, An isl. S. Atlantic, one of the New S. Shetland group, lat. 68° 15' S. lon 35° 50' W

NEMBRU (anc. *Nimbru*) a tn and com. Italy, Lombardy prov. and N.E. Bergamo on the Serio with several churches, numerous milk-mills, tins and lime kilns, and several smelting-furnaces. Pop. 3539

NEMEA a place in Greece anciently celebrated for its games, in the N.E. of the Morea, 10 m. S.W. Corinth. It consisted of a sacred grove, which contained the stadium, theatre, temple, and other monuments. Of the temple, which was dedicated to Jupiter a portion of the cella, three standing, and several prostrate columns, almost entire, and a great deal of the entablature remain. The form and decorations are Doric. At a small distance S. from the temple are other remains of the Doric order and traces of the Nemean theatre are to be found at the foot of a hill not far distant. The plain or valley in which Nemea stands is surrounded with barren hills, of a dark and melancholy hue, giving to the place a singularly gloomy aspect.

NEMEDI two nearly contiguous villa. Hungary — 1 (Mio) Co. and about 12 m. from Pesth, with a R. Catholic church, a monastery, and a trade in corn and wine Pop. 1946 — 2 (Kis) with a church, and a trade in wine. Pop. 706.

NEMER-BIX, a vil. Hungary, Hither Tholes, co. Borsod, on the Sajó, 25 m. from Miskolc, with a Protestant church, and a trade in wood. Pop. 1107

NEMET a vil. Hungary Thither Tholes, co. Tyrnau, on the frontiers of Temes near the Bega, 8 m. from Kis-Bacsok. It has two Greek un-nited churches. The inhabitants are Walachians. Pop. 1148.

NEMET Fm., a vil. Hungary, Thither Tholes, co. Hoves, on the frontiers of co. Borsod, 1 m. from Eria. It has a parish church and a trade in corn and wine. Pop. 1166.

NEMETH HOLY or **BOVA** a market in Hungary co. Baranya, cap. dist., 6 m. from Molnár. It has a R. Catholic church, a handsome chateau, and a trade in corn and wine. The inhabitants are Germans. Pop. 2038.

NEMETH UYVAR, a tn. Hungary. See GEMER.

NEMETHI SZABVARS, a tn. Hungary. See SZABVARS.

NEMETHY numerous places, Hungary, particularly— 1 (Heres), A vil co. Zemplen, on the Harnad, 8 m. from Miskolc, with two churches a mill and a trade in agricultural produce. Pop. 1510.—2 A market tn, co. Honth, dist. and 15 m. S.E. Szemmit, on a stream of same name, here crossed by a bridge, with a church, and a trade in corn and wine. Pop. 702

NEMEEZ, a vil. Austria Sclavonia, generalship Peterwardein, 1 bank Donau, 9 m. from Orof. It has a parish church, and is the head quarters of a frontier regiment. Pop. 1315

NEMI a tn. Papal States, 17 m. S.E. Rome, on the margin of lake of same name. It contains an old feudal castle with a round tower. From the hills above a most magnificent view is obtained. Pop. 1100 — The lake is evidently the crater of an extinct volcano, the sides of which are formed partly of basalt and partly of consolidated scoria. It stands 1022 ft. above the level of the sea, and has a circuit of 5 m. It is of great beauty and is most celebrated by the Latin poets under the name of Lacus Neronianus, or Speculum Diane

NEMIROV, a tn. Russia gov. Podolsk, in a fertile district, 1 bank Dug 104 m. E.N.E. Kamenets with four churches and manufactures of linen and leather. Pop. 3000

NEMOURS (Lat. *Nemosa*, a tn. France, dep. Seine-et-Marne, 10 m. S. Fontainebleau almost surrounded by the canal and the river of Loing here crossed by a handsome bridge. It is situated in a picturesque valley, surrounded on all sides by rocky eminences, is generally well built, with spacious streets and contains a handsome church and the remains of the old castle of the duke of Nemours. It has vinegar-works, breweries extensive vineyards, marble-works brick, tile, and lime kilns, and a trade in corn, flour, wood, iron, and charcoal. Bignon, in the vicinity, was the birth-place of Mirabeau. Pop. 8762

NEMPNETT THURSWELL, par. Eng. Somerset 1772 ac. Pop. 284

NEMSOVA, or **NEMSOVCE**, a vil. Hungary Hither Tholes, co. 2 m. from Trenčian on the Slava, here crossed by a bridge, with a church a chapel and a trade in salt. Pop. 625

NENAGH, a tn and par. Ireland co. Tipperary. The town is picturesquely situated on a bright commanding a fine view of the Devil's-bit mountains 23 m. N.E. Limerick. It consists of a principal street, crossed nearly at right angles by four minor streets, is substantially built, and has an elegantly parish church, Wesleyan Methodist, and R. Catholic chapels, a national and other schools, a courthouse, and jail barracks, an old castle, the ruins of a Franciscan monastery, with some manufactures of woollens, tobacco soap, and candles, and a trade in bacon, butter and eggs. Pop. 5618 Area of par. 3395 ac. Pop. 11 665

NENDAZ, a vil. and par. Switzerland, com. Valais 8 m. S.W. Sion in a beautiful district, covered with corn-fields, meadows, and vineyards. It stands high, and has a fine, clear atmosphere, but the number of cretins is very great. On a hill in the neighbourhood, is an alum spring, which is much resorted to. Pop. 1459

NENE, or **NAY**, a river, England, formed by two streams in Northamptonshire one, which rises near Arbury Hill, S.W. Daventry and flows W., and another which flows S. from the village of Naseby on their junction at Northampton, the Nene becomes navigable, flows N.E. forms part of the boundary between co. Northampton and Huntingdon, and after a course of about 90 m., falls into the Wash. Important improvements have recently been made in its channel

NEBKUR, a vil. *Solunda*, 5 m. N. *Schwanz*; lat. 26° 24' N., lon. 67° 54' E. The surrounding country is fertile, but little cultivated.

NEKOKAKK, a small seaport, *Bassia*, gov. and 40 m. W. *Arhangal* at the mouth of a stream which falls into the bay of the same name. It has the most extensive salt-works in the government.

NENTESHAUSEN, a vil. *Hesse-Cassel*, *Niederhessen*, circles and 9 m. from *Rottenberg*, with a church, an infirmary, and three mills. Pop. 1003

NENTHORN, par. *Seot. Berwick*, 8400 ac. P. 441

NENZING, a vil. *Anstria*, *Tyrol*, *Vorarlberg*, dist. *Senenberg*, 3 m. E. by *S. Feldkirch* with a church, manufactures of linen, and a cotton-mill. Pop. 1137

NEOGHAD a co. *Hungary*, bounded N. by co. *Sohl*, W. *Hond*, S. *Peuth*, E.E. *Maves* and N.E. *Gömör* area 12466 sq. m. In the N. the country is traversed by rapid sections of the *Carpathians*, but the surface towards the centre, and the S., becomes flat or undulating. It is well watered by the *Tisza* or *Ipoly* the *Zagyva*, and several other streams. The *Dunab* only forms a small portion of its S. boundary. In the mountainous districts, which are well wooded, and abound with game, almost all the available surface is employed in feeding cattle, sheep, and swine, but the lower lands are fertile, and yield rich crops of corn and flax, superabundance of fruit, and much excellent wine. Tobacco also is extensively grown, and some silk is produced. Manufactures have made considerable progress particularly in woolens and castmores, and the trade in the natural products of the country is extensive. It is divided into four districts—*Lozsonc*, *Fülök*, *Becsevar*, and *Kiskölk*. The capital is *Bellene Gyarmath*. Pop. 201,000

NEOGHAD or *Neoghad* a market in *Hungary* *Hitler* *Dunab*, co. of same name 37 m. N. *Buda*, with a church, a paper-mill, and on hill above the town, the ruins of an old castle to which both the town and county owe their name. Pop. 1600

NEOZELL, a vil., in *Sardinia*, prov. *Busachi*, on a hill beautifully situated but poorly built, consisting of several narrow, winding, and unpaved streets. It has a church and a primary school the remains of an old castle, and a trade in wine, corn and cheese. Pop. 1028

NEOTS (32) two places England.—1. A market in *Stafford* co. *Huntingdon*. The town is built on a hill, across which there is here a stone bridge 9 m. E. by *W. Huntingdon* consists of three respectable streets with some smaller, and as for the most part well built. The market-place is spacious and convenient. It has a handsome church, with a fine tower, places of worship for Baptists and Wesleyans, and a free school. Paper is manufactured here to a large extent. Pop. 2951 Area of par. 4750 ac. Pop. 3167.—2. A vil. and par. England, co. *Cornwall* is a beautiful and picturesque valley watered by a stream of same name, 5 m. W. *W. Liskeard* with an elegant parish church, ornamented with 16 windows of finely painted glass, a ruined chapel, and vestry of a college or monastery founded in honor of St. Neot, brother of King Alfred. Area of par. 13 997 ac. Pop. 1628

NEPAUL, a kingdom of N. *Hindustan*, N. of *British India*, lying between 26° 30' and 30° 18' N. and lon. 80° 15' and 86° E. length, 615 m. breadth about 100 m., bounded N. by the *Himalaya* mountains, which separate it from *Tibet*, E. *Bikim*, E. *Bengal*, *Bihar*, *Oude*, and *W. Kanton*. Area, about 45 000 sq. m. The lower part of the country, lying along the borders of *Oude* and *Bihar*, and which is called the *Turkey* [low lands] consists of a long belt or strip of low, level land, about 20 m. broad. Beyond this is a strip of nearly the same width, of small hills, rising like terraces, till they gradually unite with the *Himalayas*. In several places, however, some fine valleys intervene between the latter and the former, but in general, no distinct boundary separates them. Among the mountains of *Nepal* are some of the highest summits on the globe, namely, *Dhaulagiri* 28,863 ft. above sea-level, *Jumnotri*, 25 600 ft., *Dhaulagiri*, 24,740 ft. and *Am Peak*, 23 799 ft. The entire alpine region of the kingdom on the N. is from 30 m. to 40 m. in breadth, and throughout this space are scattered immense peaks covered with perpetual snow. Between these peaks there are narrow valleys, some of which admit of cultivation, Vol. II.

but by far the greater portion of this region consists of vast rocks, rising into sharp peaks, and the most awful precipices, wherever not perpendicular, covered with perpetual snow and almost constantly enveloped in clouds. This rugged territory consists in many parts of granite, and contains much iron, lead, and copper, with some zinc, and a little gold found in the channels of rivers. Mines of sulphur are said to be numerous, but little is known about them.

Nepal is intersected by numerous large rivers, but most of them have their sources on the table-land of *Tibet*, beyond the *Himalayas* through which they force their way by narrow channels of the most appalling depth. Of these rivers, the principal are the *Gogra* or *Kanar*, *Gunduck*, *Treool*, *Gogra* and *Arun*. Numerous small streams also traverse the low lands or tract called the *Turkey* which not only serve for watering the crops in the latter end of the dry season but, when they are swollen by rain, become navigable, and enable the farmer to send the produce of his fields to a good market, and also serve to float down the valuable timber that abounds in the forests by which the hills are skirted.

Magnificent forests of oak, alder, and yew trees stretch along the declivities of the lower hills into the adjacent plains. The forests higher up exhibit a greater variety, gradually assuming more and more of an alpine character. Excepting at the summits of the mountains the trees are uncommonly large, and the vegetable productions generally of most remarkable sturdiness, beauty and variety. Everywhere, and at all seasons, the earth abounds with the most beautiful flowers, partly resembling those of *India*, but still more those of *Europe*. In the higher regions, the trees consist of various oak, pine, fir, walnut, chestnut, hornbeam, yew, laurel, larch, birch, &c. The greater portion of the low lands (*Turkey*), is covered with long grass or reeds, which once a year are burned in order to keep the country clear, and to improve the pastures. The grass, however, seems to be of a very bad quality as the cattle that feed on it are in miserable condition. Both pastures and forests are in general common, and any person that pleases may use them. But some forests are reserved for the court. The principal object of cultivation is rice to which grain nearly one half of the cultivated lands is appropriated, the remainder being occupied by maize, cotton several kind of legumes, wheat, barley, sugar-cane, and two species of madder. In the mountainous parts, a valuable article of cultivation is a large species of cardamom, and in other places ginger is grown to a considerable extent.

None of the fruits of *Nepal* are good, excepting the oranges and pine-apples, but both of these are in great perfection. The peach grows everywhere wild, and is also raised in gardens but it does not ripen till long after the rainy season has commenced, and is generally half rotten before it becomes soft. There are few culinary vegetables, and these are of indifferent quality. Pasturage is generally speaking, scarce and insufficient a great portion of it positively bad, and hence the number of cattle and buffaloes is small. Considerable flocks of sheep, however are reared by some of the tribes on the mountain pastures the herbage of which, though not good, is less harsh and watery than that of the low country. Some of the sheep are of great size, have fine wool, and give a great quantity of milk, from which cheese is made. Horses are imported from *Tibet*, none being bred to the E. of the *Himalaya*. The wild animals are elephants, tigers, leopards, bears, foxes, and jackals. Amongst the more remarkable birds are the *Mandal* and *Dumphy*, two of the finest birds known, whose constant abode is the fringed regions of *Nepal* and the shaker, known as the fire-eater from its reported power of swallowing fire, and pecking at ignited specks. The woods are inhabited also by vast numbers of a peculiar sort of birds which are tamed by the natives, on account of their singing or imitating the human voice. Fish abound in the streams of the *Turkey*.

The manufactures of *Nepal* are confined chiefly to two kinds of coarse cotton cloth, called *khad* and *changa*, of which the dress of the middle and lower classes of the people is made. The whole dress of the higher ranks is imported, and consists chiefly of Chinese silks, and of the low country muslins and calicoes. The military alone wear European broad-cloth. Articles in copper, brass, and iron, are also manufactured in various places, likewise bells, of a kind of bell-metal, called

plant, but considered inferior to those of Tibet; and also a very strong paper, remarkably well fitted for packages, made from the bark of a shrub. The trade of Nepal consists chiefly in the exportation to British India of elephants' teeth, timber hides, ginger, catechu, turmeric, wax, honey, oranges, long pepper, ginseng, barbed cinnamon, and large cardamoms, and the importation of those of Bengal cottons and muslins, silks of various sorts, raw silk, gold and silver lace, carpets, English cutlery, saffron, spices, sea-shell, quacksilver, cotton, tea, zinc, lead, soap, camellia, tobacco, pepper and coral, and in importing from Tibet, sheep, mules, skins of the most dark shaggy tails quacksilver, borax, sal-ammoniac, Chinese silk stuffs, paper, drugs, gold and silver, and exporting in return, rice, wheat, oil, iron, copper, cotton-cloth, catechu, juniper, boards, pepper, spices, indigo, tobacco, other skins, sugar, &c.

The people of Nepal are chiefly of the Tartar or Mongolian family divided into numerous tribes but they are, in some cases, considerably mixed with Hindoo stock, and profess the Brahminist faith though none still are Brahmins. The aboriginal mountain tribes have Chinese or Tartar faces. The Nepews occupy the more fertile part of what is called Nepal Proper pursue agriculture and commerce, and are far more advanced in the arts than any other mountain tribe. They are of middle size, with broad shoulders and chest, flat faces, small eyes, and spreading noses, with a sallow complexion. The mountain Hindoos, occupying the E. dominions of Nepal, are represented as deceitful and treacherous, cruel and arrogant towards those in their power and objects mean towards those from whom they expect favour. They spend their nights in debauchery their mornings in sleep and the day in the performance of religious ceremonies. The principal food of the lower classes consists of rice, garlic radishes, and lentils. All classes drink spirituous liquors to excess. Most of the domestic creatures are slaves. The country was formerly possessed by numerous independent rajahs, and then extended W. to the Butley; but about the middle of the last century the rajah of Gorkha began to extend his dominions by conquest in which he and his successors were so successful that in less than 50 years they had conquered the whole of Nepal and made themselves kings of that territory. Subsequently a large portion of the kingdom was cut off by the British, who reduced its W. limits to the river Kalce, which now forms its V. W. boundary instead of the Butley. The ordinary language of Nepal is the Prabhrya or mountain Hindoo dialect but the Nepews have a language peculiar to themselves. Pop. estimated at 2,000,000.

NEPEAN W.—1. An isl., E. Pacific Ocean, lat. 29° 2' S. lon. 107° 48' E. (a) about 4 m. from Norfolk Island, formerly used as a place of transportation for the refractory convicts from the former island, but now abandoned.—2. A bay N. Australia, at the N.E. part of Kangaroo Island, about lat. 35° 33' S., lon. 137° 41' E. It is sheltered from all winds except the W.—3. A small isl. Torres Strait lat. 9° 34' S., lon. 148° 43' E. (a)—4. A rocky projection, S. coast, Australia, forming the E. point of entrance into Port Phillip lat. 38° 18' 30" S.; lon. 144° 42' E.—5. A river N.W. Wales, rises in the Gleneden whence it flows N. mark the V.E. and E.W. boundaries respectively, of the east Canada and Cumberland, to lat. 58° 52' S. where it unites with the Werra-gambler, so forming the Hawkebury.—6. A bay, on the W. coast of British N. America lat. 53° 52' N. lon. 127° 30' W.—7. A large steep bluff, Baseline America, on the S. coast of Admiralty Island, lat. 87° 10' N. lon. 158° 54' W.

NEPI (anc. Nepete), a town Papal States, dioc. Viterbo, on the edge of a deep glen, 25 m. N.W. Rome. It is surrounded by old Gothic walls with towers and bastions, built in the middle ages, and partly resting on ancient Etruscan foundations. has several churches, three monasteries, two nunneries, a seminary, a splendid modern aqueduct, and a number of Roman ruins. Its bishopric is one of the most ancient in Italy. In 1799, Nepi was taken by the French, and almost entirely burned down. Pop. 1798.

NEPOMUK or Poutek, several places, Bohemia, but the only one deserving of notice is a town, circled Khetitz and 35 m. S.W. Prague, with a handsome deanery church, built on the site of the burning which the celebrated St. John Hadil Nepomuk was here a superior school, townhouse, and hospital.

tal. On a rocky and well-wooded eminence above the town, stands the old castle of Grubenberg. Pop. 1485.

NEPTUNE ISLANDS, a group of small isls., S. Australia, at the entrance into Spencer's Gulf, lat. 35° 25' 15" S., lon. 136° 7' 45" E.

NERA, or NAR, a river Italy, Umbria, which rises in the S. side of Mount Sibilla, one of the summits of the Apennines, discharges Epilato, flows first W. S.W. and then almost due S., discharges the Valle, coming from V.N.E. and forms the celebrated falls called Cascata delle Marmore, near Terni (which see). It shortly after passes the town of Terni, and, proceeding S.W., joins the bank Tiber, a little below Orta. Its whole course, through a most romantic valley, is about 70 m.

NERAC (Latin, *Nervacum*) a town France, dep. Lot-et-Garonne on the precipitous banks of the Baïse, 16 m. W.S.W. Agen. The old town is a dull, ill-built place and communicates by two stone bridges with the new town, which occupies a kind of plateau, and is both large and handsome than the old town. The church, of modern construction is large and well decorated but the most interesting building is the old castle, now a mere ruin. Henri IV. spent part of his youth here, and here, too, at an earlier period, Calvin, and several other distinguished reformers, found an asylum from persecution at the court of the celebrated Margaret of Valois, queen of Navarre. It has manufactures of coarse woollen cloth, ship-biscuit, and cork for the wine merchants of Bordeaux; starch-works, tanneries, and numerous flour-mills and a trade in linen, hemp, flax, corn, flour, starch, cork, wine, hair, and partridge feet, which have long been famous. Nera is a very ancient place, and several interesting Roman antiquities, particularly baths, a temple and a palace, have been brought to light by excavation. Pop. 5900.

NERBUDDA (anc. *Narmada*), a large river, Hindoostan, having its sources in the hilly district forming the N.W. confines of Gundwarah, about lat. 23° 40' N. lon. 81° 51' E. 2463 ft. above sea level. It flows at first W. and N.W. through a high table-land to about lon. 73° E., where it takes a W. direction with a slight inclination to the S., and finally falls into the Gulf of Cambay in about lat. 21° 40' N. lon. 73° 5' E., the whole length of the course being about 600 m. It is obstructed by rocks, shallows and cataraacts; but is navigable for boats as far up as the falls of Dase, about 250 m. from its mouth. In the wet season it rises, in some places 25 ft., and in others 70 ft. above its level in the dry season. In Malwa it has its channel excavated through columns of basalt, above which are beds of marl, impregnated with salt. The upper of these marls is of a light colour and from 30 to 60 ft. thick and rests horizontally on the lower bed which is of a reddish colour. Both appear to be tuff, composed of the materials of volcanic eruptions, and forming a covering from 60 to 70 ft. deep, overlying the basalt. Forests of deep jungle extend on both sides, and rise to the tops of the hills. It has no affluents of any considerable size.

NERLHINSK, a town Austria Russia. See NERZCHIK.

NERLKHITA, a town Russia, gov. and 27 m. S.S.W. Kostroma, L. bank river of same name with seven churches, and manufactures of linen in which also is native on a considerable trade. Pop. (1851) 2893.

NERSENHEIM, a town Wurtemberg, dioc. Jaxt, at the foot of the Ulmberg, crowned by an old Benedictine abbey, 16 m. S.E. Ellwangen; with a church, and manufactures of woollen cloth, carpets, and earthenware. A battle was fought here between the French and Austrians in 1776. Pop. 1010.

NERESI, a market in Austria, Delmatia, dioc. and 19 m. from Spalato, near the centre of the island of Braza. It is the seat of a court of justice and several public offices, and has a parish church and a considerable trade. P. 1556.

NERIS (anc. *Agro-Neris*) a town France, dep. Allier, 38 m. S.W. Moulins, near the Canal du Cher with an hospital, natural thermal baths, of a temperature of 83 to 121° Fahr. In the times of the Romans, Agro-Neris was a place of considerable importance. Roman remains, including an extensive amphitheatre, aqueduct, baths, temples, palaces, mosaic pavements, statues of marble and bronze, and many medals and coins, have from time to time been discovered here. P. 1483.

NERJA, a town Spain, Andalucia, prov. and 15 m. S. Malaga, near the Mediterranean where it has a small harbour. It is tolerably well built, has spacious, commodious, and paved streets, three regular squares, a parish church, a

modern townships, three schools, and manufacturers of common linen; two sugar-worcs, a paper and four flour mills, and a trade in sugar, fish, oil, and corn. Pop. 4585

NERI (Great and Little), two small rivers, Russia, which both take their rise in dist. Pereslavl, gov. Vladimir, at a short distance from each other. The Great Neri issues from Lake Pustobere, flows N.W. enters gov. Tver, and joins r. bank Volga a little below Mvidvitsk. The Little Neri flows E. about 8 miles S. of Jaroslavl, and then, bending round to the S., joins I. bank Klazma below Vladimir.

NERO, NERA, or ROZOVY, a small lake, Russia, in S. of gov. Jaroslavl, about 10 m. long, N.E. to S.W. and nearly 5 m. broad. The town of Rozov stands on its N.W. shore.

NEROLA, a vil. Papal States, on a small affluent of the Tiber 25 m. N.E. Rome, with an old feudal castle of the Barber family, and supposed to occupy the site of Regillum, the place from which Appius Claudius migrated to Rome. P. 260

NERONDES, a tn. France, dep. Cher, 17 m. S.E. Bourges; with two annual fairs. Pop. 1298.

NEROUSA, a river, Russia, which rises in gov. Orel, about 9 m. N. Dmitrovsk; flows first W. and then N.W., and, after a course of about 80 m., joins I. bank Dnava opposite to Trubitzsk.

NETICHA, a river, Siberia, which rises in the S.E. of a magnificent of the Steamer Mountains, on the E. frontier of gov. Irkutsk, flows circuitously S. along the E. part of that government, and, after a course of about 140 m., joins I. bank Selinka at Netschumsk. Its principal affluent is the Ulunga, which joins it on the right.

NETSCHINKO or NACHUMSK, a tn. Siberia, gov. and 540 m. E. by N. Irkutsk, cap. circle, on the Netiche, near its confluence with the Selinka. It is surrounded by outworks, and is poorly built of wood. It contains a stone and two wooden churches, and has a considerable trade in furs. Owing to its low situation, it suffers much from inundation. Pop. (1851) 4993.—The mineralogical text is generally mountainous, but has good pastures and includes, among its minerals, gold, argentiferous lead, iron, and precious stones. Pop. 118,000

NERVA, or NERVION [commonly, *Neuse*], a river, Spain, prov. Biscay. It flows N.W. past Bilbao and falls into the Bay of Biscay near Portugalete. Its total course is about 50 m.

NERVI a tn. Italy, Piedmont, 477 and 6 m. S.E. Genoa on a slope of Mount Mario, where it descends to the Gulf of Genoa. It has a court of justice, a handsome church, with very beautiful marbles, a number of fine villas, belonging to the Genoese, several public schools, and a considerable trade in fruit, particularly lemons and oranges. Nervi has no proper harbour, but is visited by a considerable number of vessels, which, if large, lie in the roads, about 1 m. off. Pop. 4089

NERVIANO a tn. and com. Italy, Lombardy prov. and 10 m. N.W. Milan, on the Olona, with two churches, an educational institute, a charitable endowment, and several silk and other mills. Pop. 2555

NEB, two vills. Holland, prov. Friesland.—1, lat. Ameland. It has several churches and two schools, and is inhabited chiefly by sea-faring people. Pop. 570.—2, 23 m. N.E. Leeuwarden, with a church, a school, and a corn-mill. Pop. 588

NEBSCHIN, a tn. Russia, gov. and 95 m. S.S.E. Cour-nigov, cap. dist. on the Oster. It is surrounded with an earthen rampart, well built, and contains a castle, 15 churches, several convents, and almshouses, an atheneum, and a Greek school. It has manufactures of silk, soap, leather, and perfumes, is famous over Russia for its confectionery and liquors; and has a considerable trade in the articles of its manufacture, and in wine. Pop. 16,000.—The river is sandy and poorly wooded, but raises a good deal of hemp, and a large number of cattle.

NEBSCHIN, a vil. Austria, Slavocow, co. Syrmia, on the Danube, over which there is here a ferry, 4 m. from Illok. It has a parish church. Pop. 1437

NEBB (Canav), par. Eng. Salop, 5379 ac. Pop. 618

NEBB (Lucan), a lake, Scotland, Inverness-shire, in the line of the Caletian Canal, and, after Loch Lomond and Awe, the largest in the country. It forms a long and narrow expanse, stretching, between S.S.W. and N.N.E., about 22 m.

with a breadth varying from 1½ m. to 3 m., and a depth of from 100 to 180 fathoms, though much less at the extremities. It occupies the centre of the valley of Glenmore, and is enclosed by rugged and barren mountains, averaging about 1000 ft. in height, and composed chiefly, on the N. side, of gneiss of a reddish-coloured granite. Several fine valleys are seen opening transversely on the lake and on the S. side, a level tract, of a fertility and beauty not common in the Highlands, is seen, but there is generally a considerable want of wood, and the scenery is not very striking. It receives several streams, of which the Oich, which enters it on the S., the Morrison on the W. and the Foyers and the Farinagh are the largest, and discharges itself by the Ness, into the Moray Firth.

NEBBP, or **NEBBA**, a river, Germany, which rises a little W. of Erfurt, in Prussian Saxony, flows first W.W. and then W.S.W. and, after a course of about 45 m., joins r. bank Werra near Eisenach.

NEBELAU, a tn. and par. Switzerland, can. and 16 m. S.S.W. St. Gall, in a beautiful valley near the Thurgau, with a handsome Protestant and a R. Catholic church, and several schools. A good deal of saltpetre is obtained here. P. 3028

NESSO, a vil. and com. Italy, Lombardy prov. Como, on a hill near E. shore Lake Como in a wild and romantic ravine where the Latis, a tributary of the Lecco, forms a magnificent waterfall, nearly 200 ft. high. It contains a very ancient church, and was once defended by a strong castle, which figures in the early history of Italy. Pop. 1018.

NESTB, or **NESTRE**, a river, France, which, formed by the junction of the Nestas and Neste de Lourdes at Arrens, after descending from the S. slope of the Pyrénées, in dep. Haute-Pyrénées, flows first N. and then E., and joins I. bank Garonne, near Mazades, after a course of about 45 m.

NESTING par. Scot. Shetland 20 m. by 4 m. P. 2430

NESTON (Great) a tn. and par. England, co. and 11 m. N.W. Chester. The town is pleasantly situated on a slope above the estuary of the Dee, and consists of two principal streets, has a spacious church with a fine baptismal font, and a tower, placed of worship for Primitive and Wesleyan Methodists, Calvinists, Independents, and B. Catholics, a court-house, national and other schools, and is frequented for sea bathing. Some coal is worked in the vicinity. Pop. 1701 Area of par., 15,293 ac. Pop. 8578

NESTVED a tn. Denmark, at Esboed, hal. J. ratle, I. bank Slesane, 44 m. S.W. Copenhagen, with two churches, a small garzone, and connected, by a bridge over the Slesane, with Lille or Little Nestved, which thus forms a kind of suburb. Its haven, which now admits only small vessels, enables it to carry on a little trade. But in olden times, when the Slesane floated large ships, it was a place of considerable importance. Pop. (1851), 5785.

NESVIJ or **NIETWICKE**, a tn. Russia, gov. and 60 m. S.W. Minsk, on the Usshe, with fortifications, in a very dilapidated state, and a Benedictine abbey. It is the capital of a duchy belonging to Prince Radvisl. Pop. (1847) 4730

NESZMILLY or **Neszed**, a vil. Hungary, Thither Danube, co. and 12 m. E. Komorn on the Danube, with two churches. It produces a wine well known in commerce. The emperor Albert II. died here in 1489. Pop. 1547

NETHE (Kanaar), a river, Belgium, which rises in the N. of Limburg near Hecker, and flows E., enters prov. Antwerp, and, turning W.S.W., passes Westerlo; then turns round, and, by a winding course, reaches Inghem, where it first becomes navigable. On reaching Laere, where it receives the Little Nethe, it turns S.W., and joins I. bank Dyle. The united stream takes the name of Ruppel. Its whole course is nearly 50 m. Of these, about 15 m. are navigable.

NETHE (Lutetia), a river, Belgium, which rises in the E. of prov. Antwerp near Forest, and proceeds W.S.W. to Hensel, where it meets the Great Northern Canal from the E. From this point W. to Liere, where it joins the Great Nethe, a distance of about 15 m., it has been made navigable. Its whole course is about 20 m.

NETHEN a vil. and com. Belgium, prov. Braabant, on a stream of same name, 18 m. S.E. Brussels. It has a paper-mill, and a trade in agricultural produce. Pop. 1235.

NETHER-EXE, par. Eng. Devon, 450 ac. Pop. 108

NETHERAVON, par. Eng. Wilt; 5160 ac. P. 551

NETHERBURY, par. Eng. Dorset, 6235 ac. P. 2066

NETHERLANDS (THE KINGDOM OF THE), [Dutch, *Het Koninkrijk der Nederlanden*; English, *Holland*; French, *Pays-Bas*; or *Néerland*; German, *Niederlande*; Spanish, *Países Bajos*; Italian *Olanda* or *Paise Bassi*]. It embraces, at the present day the N and smaller half of the numerous provinces formerly combined under the same denomination, and lies between lat. 51° 15' and 53° 30' N. and lon. 3° 30' and 7° 30' E. On the W and N it is bordered by the North Sea, on the E by Hanover and Prussia, and on the S. by Belgium. The river Ems marks the boundary towards Hanover; but between the Netherlands and the Prussian province W of the Rhine, the collimatory line is fixed rather by conventions than by nature, on the S. also, the boundary towards Belgium from the left bank of the Meuse or Mosse to the sea, though defined accurately by the treaty of November, 1831 to which the chief powers of Europe were parties, is not marked out by any natural feature.

General Description.—The Netherlands (or Low Countries, as the same language form the most characteristic portion of the great plain of W and N Europe. From the middle of Belgium a few miles N of Brussels, the country N.E. becomes a dead level, extending in monotonous sandy flats, through Hanover, Jutland, Holstein and, with little inter-ruption, through Prussia into Russia. But the lowest part of this immense level, and that which has most recently emerged from the sea, is undoubtedly the country lying between the mouths of the Scheldt and Ems, within the distance the Rhine joined by the Meuse (Isel) and other rivers, enters the sea through a number of arms and sluggish winding channels which by no means represent the magnitude of the main stream as it flows higher up. The delta of the Rhine may be conceived to have been in early ages liable to perpetual change of form, as new mud-banks were deposited blanketing up the old channels, and leading to the formation of new ones. Besides, it is obvious that the river floods in forming a mass of alluvial deposits that are contended with the sea, which washed away the accumulations of mud or covered them with sand, according to the vicissitudes of weather and season. The soil of the Netherlands shows everywhere the proofs of this struggle between the ocean and the river, in the alternation of salt and fresh water deposits. It also bears evidence to the fact that these changes, effected by the floods of the Rhine, or by eruptions of the sea occurred frequently long after the country had become inhabited. Remains of forests now lie buried under the waves of the German Ocean, paved roads, traces of villages and of cultivation, are found beneath the mosses on the banks of the Fens, and many similar proofs can be adduced of great physical changes, respecting which history is silent. It must have been the first object, therefore, of the early occupants of this country, to secure the natural permanence of their territorial possessions. For this purpose they had recourse to embankments, high and strong enough to protect them under ordinary circumstances from the waves, and, placing wind mills on the embankments, as joined to the breast, they watched the pumps which drained the enclosed lands. But this drainage had a consequence which was doubtless not foreseen in the first instance, namely a general subsidence of the land, which with the gradual elevation perhaps of the beds of the rivers has made it necessary to increase the original embankments, and to continue the system of embankment to an unparalleled extent. The required skill grew with the gradually developed necessity. The art of the engineer in contending with floods, in constructing dikes and forming beaches, has attained the greatest perfection among the Dutch, who know how to secure important nodes by simple means, such as baggots matting the growth of rushes. In short, the Netherlands present to our view, at the present day, an artificially constructed country, some portions of which are 15 ft. below the surface of the sea, and nearly all too low for natural drainage. The whole country is divided by dikes, some of them 60 ft. high, which protect portions of land from the sea, lakes, or rivers. These enclosed lands are called *Polders*. On the oldest dikes are roads and canals also joining the rivers and generally large enough to be navigable. The facility of communication was an advantage which the Netherlands formerly enjoyed in an eminent degree above the rest of Europe.

There are no mountains nor rocks in the Dutch Netherlands, which are popularly described as a country without mountains, trees (growing wild) or running waters (springs). The only heights are the sand-hills, about 100 ft. high, along the coast of Holland, and a chain of low hills of similar origin passing through the middle of the provinces of Utrecht and Gelderland. In the absence of mountains and hills, there are of course no valleys; whatever portion of the surface is not marsh, river or canal, must fall under the denomination of sandy waste, dikes, or polder. The work of reclaiming the waste is constantly going forward, in the provinces of N and S Holland alone about 50 lakes have been drained. The drainage of the Sea of Helder begins in 1839 was completed in 1852 and the same year extensive operations were commenced in province Zealand, island S. Zealand under the auspices of Sir John Kenna, having for their object the reclamation of 35,000 acres, which are covered several feet deep at high water yet still the waste lands are to and exceed a fifth of the whole area. The polders probably form one-half of the whole territory, and the extent to which this is subdivided by dikes may be conceived from the fact, that the local bodies charged with the management of the polders and the repairing of the dikes, exceed 300 in number.

Extent, &c.—The country thus described has an extent, from N to S. of 150 m. with a breadth, from W to E, of 120 m. throughout, area, 8866 sq. m. Its chief features are—the wide estuaries W and E. of the Scheldt, and of the Meuse, which latter bear off also the waters of the Rhine N of the Meuse, the Zuider Zee, which was formed by an intrusion of the sea in the beginning of the 13th century and now covers an area of 1200 sq. m. Between the mouths of the Meuse and the entrance of the Zuider Zee, a distance of 75 m. the coast is chiefly formed of sand-hills or dunes, frequently 180 ft. high dreary and sterile to the last degree, and separating, with their broad land of irreclaimable waste, the few fertile meadows on the one side from the waves of the ocean on the other. In a line with these dunes, beyond the mouth of the Zuider Zee, runs a chain of islands, namely Texel, Vlieland, Schelling, Ameland, &c. which seem to indicate the original line of the coast before the ocean broke in upon the lands. The coast of Friesland, opposite to these islands, depends for its security altogether on artificial embankments. The Lauwer Zee a deep bay on the coasts of Frisland and Groningen also owes its origin to an intrusion of the ocean and again the Dollart a gulf near the mouth of the Ems N of Groningen, was formed about half a century later than the Zuider Zee, and by a similar convulsion, which is said to have swept away 70 villages and 100,000 people. From the left bank of the Ems, the Bourgtang morass an irreclaimable peat marsh, extends about 40 m. S.W. towards the Zuider Zee; the Peat, a marsh of like nature but less extent, lies near the left bank of the Meuse, on the E side of N. Brabant.

Political Limits and Divisions.—The kingdom of the Netherlands is, at the present day, reduced to nearly the original limits of the Seven United Provinces in the 16th century. The provinces now composing the Netherlands, properly so called, are the first ten given in the accompanying Table—

THE PROVINCES OF THE NETHERLANDS, Their AREA AND POPULATION IN 1815 AND 1852

PROVINCE.	Area in sq. m.	Population, 1815.	Population, 1852.
N. H. Brabant	1400	251,174	414,086
Gelderland	1478	275,231	411,947
South Holland	825	462,982	644,658
North Holland	727	488,454	554,121
Zeeland	827	250,340	3,3540
Utrecht	490	189,498	16,681
Friesland	103	261,078	378,184
Overijssel	984	217,096	341,352
Groningen	652	128,360	214,486
Drenthe	774	80,782	109,600
Linzburg	948	201,000	326,775
Total	9439	3,075,146	3,610,346
Grand Duchy of Luxembourg, 1840	796	186,486	303,713
Total	10,235	3,261,632	3,914,059

But the king of the Netherlands holds also a portion of Luxembourg with the title of Duke, and of Luxemburg with the title of Grand Duke, these domains, however, though annexed to the crown, are not incorporated in the kingdom of the Netherlands, but are held under a separate administration, and are regarded as such by virtue of which the king is considered a member of the German confederation.

In addition to her European territories, the Netherlands possesses a wide extent of colonies and dependencies in Asia, Africa, and America, with which she carries on an extensive commerce and which contribute materially to her greatness. They are enumerated, with their area and population, in the following Table:—

COLONIES AND DEPENDENCIES OF THE NETHERLANDS, THEIR AREA AND POPULATION

	Area in Sq. m.	Pop. at 1890
ASIA —		
Java and the adjacent islands, 23 provinces	89,118	13,640,080

Asia	415,108	19,193,100
Africa	8,000	120,000
America	44,778	60,000
	4-0,061	20,800,800

Rivers and Canals.—The chief rivers of the Netherlands are the Rhine, Maas, Scheldt, IJssel, Vecht, and Hems. The Rhine is above half a mile wide where it enters the Netherlands. It soon divides, the S and principal arm taking the name of Waal, and uniting with the Maas, while the N arm, communicating with the IJssel, takes the name of Lek, a branch from it, named the Kromme (crooked) Rhine, winds by Utrecht to the Zuider Zee, while another very diminished stream, called the Old Rhine, flows from Utrecht by Leyden to the sea at Katwijk. The Old Rhine was formerly choked with sand a little below Leyden its present channel to the sea is recent and artificial. The Maas, Meuse, or Moselle, entering the Dutch Netherlands from Belgium, receives the Ezer of the Scheldt, only the mouth, the S and the W, or Old Scheldt, lie within the Dutch boundary. The IJssel and Vecht, flowing from Germany, both enter the Zuider Zee at no great distances asunder, the former being navigable up to Drenthe, the latter to Zwolle. The Hems, rising in the Bourgas marsh, flows through Groningen to the Lauwer Zee. The canals of the Netherlands are collectively more important than the rivers, on which indeed they depend, but they are so numerous as to defy detailed description—every little village has its canal. It will be sufficient, therefore, to mention only the chief,

namely, the N Holland canal, a wonderful work, constructed between 1819 and 1823, and which allows the largest ships to pass between Amsterdam and the Helder a distance of 40 m., so as to avoid the intricate navigation of the Zuider Zee. The Winckles canal also for ships, 18 m. long connects the Dollart with Groningen the Damster-Diep, of equal magnitude, runs from Groningen to the sea at Delfzijl. Hartingen, on the Zuider Zee, is also connected with Groningen by a great canal which passes by Franeker and Leeuwarden. The Nieuwe Rijn unites Utrecht with Amsterdam, while the latter city communicates with Rotterdam by a canal which touches at Haarlem, Leyden, and Delft, passing also near the Hague. The Dutch canals are all navigable, and the aliveness of the Trevelchyts or boats is compensated in some measure by their punctuality. In winter their frozen surfaces offers convenient roads to skaters, and are then travelled over with greater speed.

Climate.—The climate of the Netherlands is, from the maritime exposure and originally marshy character of the country, extremely humid, changeable, and disagreeable. violent winds with varying temperature, frequently blow from S.W. or V.W. and heavy sea fogs are driven in, which insure vegetation. The mean temperature is not lower than in like latitudes in the British islands, and the quantity of rain (28 inches) is somewhat less but the winter is much more severe, and the sky is almost always overcast and troubled. The bright days hardly exceed 40 in the year. Iow fogs visit the marshy districts in autumn but the dry cold of winter restores the peasant's health and although the climate of the Netherlands is to strangers cheerless and distressing, yet its noxious qualities are unable to cope with the countervailing influence of good food and clothing and habitual cleanliness, the Dutch pay particular attention to these domestic safeguards, and, notwithstanding the ungainly climate in which they live, longevity is not rarer among them than elsewhere.

Zoology.—The natural kingdoms are, as might be expected very confined in a country which in its present condition may be considered as the work not of nature so much as of art. The various alluvial strata of heath and fresh water deposits offer no mineral of any value, except little bog iron ore brick clay, which is in great demand, and some impure potter's clay occur in the 1 and S provinces. Wild animals are few and unimportant—rabbits in the extensive sand-dunes, and hares on the wastes extending from Utrecht to the Bourgas marsh. Feathered game—partridges snipe, &c.—is not abundant. Migratory water-fowl visit the Dutch rivers and lakes, at certain seasons, in great numbers but the duck protected by the popular feeling in its favour, is the only undomesticated bird so frequent as to be a charge to the country. A swan fair is held annually at Alkmaar, and attracts buyers from all parts of Europe. Fish of various kinds is taken in the rivers lakes, and on the coasts of the Netherlands, in sufficient but still declining quantity and the home fisheries are now of little commercial value.

Vegetation and Husbandry.—The flora of the Netherlands is equally limited. Nature has given nothing in the way of woods, or rank thicket, or flowery fields. But art on the other hand has done wonders, and as if to show how care and industry triumph over natural disadvantages, this naturally sterile country exports garden seeds and choice flowers in large quantities to soils and climates more capable of producing them. Gardening and agriculture have attained in the Dutch Netherlands a high degree of perfection. Yet the latter holds a subordinate place in rural industry. Wheat of excellent quality is grown only in favoured portions of the S provinces. Rye oats, and buckwheat, with horse-beans, beet, madder and flax, are more common crops; and tobacco, as cultivated in provinces Gelderland, Holland, and Utrecht. Culinary vegetables are cultivated on a much larger scale, not merely for the sake of supplying the internal demand, but also for the exportation of the seeds, which form an important article of Dutch commerce. Dutch seeds, particularly flax, cauliflower, and cabbage-seeds, are everywhere preferred, their superiority being attributable probably rather to the habitual attention and neatness of the Dutch husband man, than to any advantage to be derived from the sun, the shelter, or acquired richness of the soil. The flowers,

sheep, of Holland and adjoining provinces, enter into the foreign trade. But it is in stock and dairy produce, in particular that the rural industry of the Netherlands shows its strength. The Dutch have herein displayed their good sense, that in a humid climate, with only moderate summer heat, they are content to buy wheat, that they may be at liberty to employ their land in a manner adapted to its capabilities. Their horses are remarkable for size and strength, and much sought after; but in the number and excellence of their horned cattle the Dutch are quite unrivalled. The following Table exhibits the quantity of stock possessed by Holland in 1851:—

QUANTITY OF HORSES, HORNS CATTLE, SHEEP AND PIGS IN EACH PROVINCE IN 1851

Pro. name.	It size	Horses	Cattle.	Sheep.	Pigs.
North Brabant ..	27,965	144,080	85,870	88,281	
Guelderland ..	25,408	123,759	64,858	89,820	
South Holland ..	25,261	178,104	44,124	87,472	
North Holland ..	17,286	1,249,890	140,350	82,805	
Zeland ..	21,283	64,277	30,683	18,545	
Utrecht ..	16,678	73,181	39,931	18,575

Limburg ..	14,767	126,672	12,978	27,726	
Total ..	174,967	1,246,899	811,615	68,667	

The poultry yard and every object of husbandry which demands care is to the Dutch farmer a source of wealth. Bee-culture is likewise actively carried on the quantity of honey produced in the province of V. Brabant alone in 1851, was 476,854 lbs. The quantity of cheese and butter brought to market is amazing. The butter sold annually in the markets of Leyden and Delft which have the largest reputation for that article, amounted in 1849 to above 19,000 cwt. The enormous quantity of cheese annually brought to market, and its increasing quantity will best be learned from the following Table

QUANTITY OF CHEESE BROUGHT TO THE SEVEN PRINCIPAL MARKETS OF HOLLAND EACH YEAR, FROM 1814 TO 1851

Years.	Altena.	Utr.	Permerend	Exhibition.	Edam.	N. other towns.	Matsumb.

Industry Commerce, &c.—Placed round the estuaries of great rivers, and on the shores of a sea abounding in fish, the Dutch soon became a sea-faring people, and as productive industry developed in the more favourably situated Friesland provinces, the population of the coast gradually engaged in the occupations of commerce. This reacted as a powerful stimulus, directing the efforts, and calling forth all the energies of the people. In the extraordinary development of industry which characterizes the Netherlands, there is nothing more remarkable than the harmonious blending of the several interests. Tillage there cheerfully took the subordinate place which nature assigned it, and agriculture felt under the power of industry in the presence of trade and manufactures. Indeed, the bold outlay of capital necessary to make the land, as we may say, was clearly due to the spirit and genius of commerce for Great Britain, in the 19th century with its network of costly railroads, is not a more wonderful spectacle than were the Seven United Provinces in the 17th, with their dikes, canals, and quays well lined with shipping. In such a country, manufactures flourish of course, though they never affected to be a predominant interest. The linen and the paper of the Dutch Netherlands have long held the first rank—the principal flax-growing are at Haarlem, the paper-mills at Zierikzee. The manufacture of woollen cloth centres in Leyden, Gouda, and Utrecht, which last-named place is famous also for its silk velvet. The stilleries of Schiedam are well known. Goods supplies tobacco-pipes, the best of their kind, and the same pipe may

be bestowed on the leather, the refined sugar of the Dutch, and many other articles intended for continental use; for, in case-nomine commerce, the Dutch, in general, do not affect to compete with the British. Yet the commerce with the Dutch possessions in the E. Indies, particularly Java, is of great and continually increasing importance. The manufactured goods exported annually to the E. amount to the value of £10,000,000 while the imports from the same quarter are probably worth £3,000,000. The following Table exhibits the present state of the trade of the Netherlands—

PRINCIPAL EXPORTS AND IMPORTS IN 1851

	Imports.	Exports.
Baltic ..	£ 874,643	£ 162,309
Europe ..	£ 370,081	£ 347,844
Cotton Yarn and Thread ..	£ 20,113 4	£ 19,043,080
Wool ..	£ 1,007,900	£ 174,429
Iron ..	£ 1,026,10	£ 89,100
Barley ..	£ 1,087,600	£ 70,000
Buckwheat ..	£ 670,000	£ 100
Leg Iron ..	£ 847,761	£ 214,835
Iron Manufactures ..	£ 1,005,200	£ 1,016,000
Wool ..	£ 1,005,200	£ 1,016,000
Chemicals ..	£ 1,013,881	£ 40,900,246
Cotton, unspun ..	£ 772,707	£ 4,438,844
Coffee ..	£ 11,073,711	£ 101,677,94
Silk Cotton, &c. Manufactures ..	£ 1,763,888	£ 173,749
Wool and Cloth ..	£ 1,010,023	£ 100,000
Oil (Vegetable) ..	£ 12,380	£ 38,117
Wine ..	£ 61,046,400	£ 54,74,303
Cardis ..	£ 874	£ 60,607
Rice Sugar ..	£ 5,200	£ 167,004
Refined Sugar ..	£ 100	£ 1,013,888
Wine in Cask ..	£ 8,103	£ 3,200

TOTAL EXPORTS AND IMPORTS 1850-51, with the AVERAGE of 1846-50

	Exports.	Imports.
Total ..	£ 2,710,752	£ 19,166,829
Total ..	£ 25,754	£ 2,013,724
Average 1846-1850 ..	£ 27,174,494	£ 16,645,917

Of the imports, a fourth part are from Great Britain, about a fourth part from Germany and rather under a fourth from Africa and Asia, after these localities. For large amounts of the exports above a fourth part are to Great Britain, above two-fifths to Germany, and Africa and Asia, are the regions to which the Netherlands send the largest quantity of goods.

The internal trade and communication give employment to 6000 telegraphists or packet boats and 1600 barges. And facilities for the transit of goods, &c., are afforded also by a railway proceeding from Rotterdam through the Hague and Haarlem to Amsterdam, and continued thence through Utrecht to Arnhem, and ultimately intended to join the Prussian line on the Rhine.

The maritime navy of the Netherlands numbers about 2000 ships, averaging 160 tons. The movement of vessels in her ports, in the years 1842-51, is shown in the following Table—

NUMBER OF VESSELS, and their TONNAGE, that ENTERED and CLEARED at the PORTS of the NETHERLANDS in the years 1840-51

Years.	Netherlands.				Colonies.

Government, Economy, &c.—The kingdom of the Netherlands, as now constituted, is a constitutional monarchy. The executive power lies wholly with the king who shares also the power of legislation with the States-General. These consist of

two chambers—the upper with 22, and the lower with 65 members—who assemble, for deliberation and despatch of business, at the Hague (The Hague), the capital of the kingdom, or, more correctly, the royal residence. The members of the upper chamber are named by the king for life, the others are elected by the Provincial States whose principal functions are of a local nature. The government is strong, though it rests on a popular basis; and the administration, in every department, is simple and economical. Dutch India is ruled by a Governor-General residing at Batavia, under whom are the governors and residents at the various island settlements. The debt of the State amounts to £102,459,881. The annual expenditure is about 29,000,000 Sterling to meet which, the prospective revenue of Java now contributes £1,300,000. The army maintained consists (1861) of 20,488 men with a reserve of 29,000, and 21,000 in the E., while the navy reckons 85 vessels, carrying 714 guns, besides an Indian fleet of 20 vessels, manned chiefly by natives.

Manners.—The Dutch provinces, taken collectively, form the most civilised portion of Europe, for what they want in social brilliancy and attraction, is amply made up by the general diffusion, among all classes, of good habits and sufficient instruction, and, among the wealthier classes, there is no want of solid and extensive learning. There are (1861), 8285 schools for popular instruction attended by 861,015 pupils, being equal to above a half of the total population, between the ages of 5 and 10 years (see Table, page 437).—and three universities—at Leyden, Utrecht, and Groningen, attended by 1113 students—besides numerous academies of an intermediate character. The majority of the population are Protestants of various sects—Lutheran and Calvinistic—the latter predominating, the Mennonites (Anabaptists) also form a numerous body above a third part are R. Catholics, and there are a large number of Jews. All religious sects and persuasions are, politically on a perfectly equal footing. It is worthy of remark, that the R. Catholic archbishop of Utrecht and the bishop of Haarlem and Deventer are both Janesists and administer their sacred offices without the sanction of the Pope. In their charitable institutions, also, the Dutch are exemplary, and in the management of their poor they have shown equal wisdom and liberality. The relative proportions of the Protestants R. Catholics, and Jews in the Netherlands exclusive of Luxemburg, are exhibited in the accompanying Table.—

POPULATION OF THE NETHERLANDS according to RELIGIONS

	1860.		Proportion in 1860.	
	1860.	1860.	1860.	1860.
Protestants	1,704,876	1,532,683	59%	600
Roman Catholics	1,100,810	1,164,143	38%	381
Jews	28,846	28,818	1%	1
Unsettled	5,314	1,569		
Total ..	2,840,000	3,006,613		

Language, Literature, &c.—The language of the Netherlands or Dutch, as we call it, is derived from the Platt Deutsch of N Germany which never received any literary cultivation, for Luther and the Reformation turned the scales against it and German or Hoch Deutsch [High Dutch] gained the ascendancy in Germany just when the popular language began to be employed as the ordinary vehicle and instrument of thought and learning. Thus, the Platt Deutsch disappearing from the field of view, a very wide chasm remains between the kindred languages of Germany and Holland—the High and Low Dutch. From the latter has branched off the Flemish, differing little, yet cultivated now as if it were quite distinct from the popular tongue. The Frisian, also, has a peculiar dialect, resembling, in some respects, the Anglo-Saxon. The Dutch is softer in sound than the High German, and possesses fully the immense resources of that language, in its natural copiousness, flexibility, and the facility of forming new terms from native roots. There is no European language which borrows so little from Greek or Latin as the Dutch. The literature of the Netherlands reaches a long way back, many chronicles exist in it of the 12th and 14th centuries; and as to the value of that literature, it will be sufficiently warranted by pointing to the names of the great writers which the country has produced, as Erasmus, Grocius,

Swammerdam, Boerhaave, Heynsen, &c. Hooft and Van den Vondel, in the 17th century, cultivated the drama with great success. Gals, an amusing and intrusive poet of the greatest genius, acquired and maintained a popularity like that of La Fontaine. The last century produced many Dutch authors of great eminence—Fetich, Biddelyck, Huisman, Steendam, Van Kampen, Van Hall, and Van Loonp; and the present age is no less prolific. Dutch literature, at it gives expression to the sentiments of an orderly, practical, and well educated people, has generally a sober and solid character, but it is not deficient in the grace, novelty and vivid colouring which render even the gravest themes attractive.

History.—The Batavi were already known to the Romans, in the time of Julius Cæsar, as a *various nation*. Their neighbours, the Belgæ, seem to have been distinguished, even in that early age, for that inclination to commerce which afterwards exerted such an influence on the history of the Netherlands. It was in the year 9 a.d., that Drusus joined the Rhine and IJssel by a canal (now called the New IJssel) and set the example of those great works which have changed the face of the whole country. Under Adrian and Septimius Severus, the Batavians shared the imperial favour, and probably advanced in civilization by contact with the Romans. About the beginning of the fourth century they united with the Frisians, a people of kindred origin. The sixth century witnessed their subjugation by the Franks, and, in the middle of the ninth, they were incorporated in the empire founded by Charlemagne. Soon after this, the whole country was parcelled out into small principalities in accordance with the feudal spirit of the age. These principalities were as follows—The dukes of Guelders, Brabant, Luxemburg, and Limburg; the marquises of Anvers (Antwerp) the counts of Holland, Zeeland, Zutphen, Flanders, Artois, Hainaut, and Namur with the lordships of Utrecht, Overijssel, Groningen, Friesland, and Malines. Such was the origin of the Seven United Provinces afterwards grouped together as the Netherlands, 1 says Bar, or Seven Countries. Among these petty States Flanders held the foremost rank; and when, in the 14th century the estates of the count of Flanders passed, by matrimonial alliance, to the house of Burgundy, the paramount authority in the Netherlands passed with them. In like manner, these estates passed from the house of Burgundy to that of Austria, and Charles V. inherited the sovereignty of the Seventeen Provinces. But his son and successor Philip II., having deeply offended the people by an attempt to establish the Inquisition among them and by various oppressive acts, even of the States namely, Holland, Zeeland, Utrecht, Gelderland, Overijssel, Groningen, and Friesland united in defence of their liberties, and formed a federal republic at the head of which they placed with the title of Stadtholder [Stadtholder] William of Nassau prince of Orange. Their cause proved successful. The merchants of Antwerp at that time the greatest commercial city of Europe, fled before the hostilities of Philip, and took refuge in Amsterdam, which soon became an important of the first importance. In the 17th century, the Dutch were the most prosperous of European nations. Their first great reverse was the consequence of the French revolution; their country was then invaded by the republican army, and was subsequently incorporated with the French empire, their commerce, in the meantime was annihilated, and their colonies seized by the British. On the downfall of Napoleon in 1814 the prince of Orange, who had fled in 1805 returned and resumed his authority and, in 1816, was, by the act of the Allied Powers, elevated to the rank of king of the Netherlands, with increased territories, extending over the present kingdom of Belgium. At the same time, restitution was made of the colonies, with exception of the Cape of Good Hope, Ceylon, Demerara, Resenburgh, and Bourbon. In 1830, immediately after the revolution which expelled the elder branch of the Bourbons from France, a revolt took place in Belgium, the inhabitants of which never willingly submitted to the sway of their Dutch neighbours, and, after a short struggle, the latter were compelled to evacuate the country. Belgium was then erected into a kingdom, and the present limits of the kingdom of the Netherlands were defined by treaty in 1839.—*See* *Grat. Hist. Stat. Beschryving van Holland*, Amst. 1801. *Motestueus, Friesland in Holland*. Rot. 1809. *Obert's Voyage Pittoresque dans le Pays des Pays* 1827, Van der Aa, *Landryland*

Woonduch der Nederlanden, Banden en Boek-Almanak, 1833, Staatkundig Jaarboek voor het koninkrijk der Nederlanden. 1832. See SICR

NETOLITZ a tn Bohemia, circle Pisek, 70 m. S. by W. Prague, with a church, townhouse, school and hospital, two saw and several other mills. Pop. 3212

NETRO a vil and com. Italy. Prefecture, the Turin prov. Biella, between the Ingauna and the Araz. It has two churches, manufacture of ironware, ribbons and lace; and a trade in cattle, millet, and chestnuts. Pop. 2123

NETSCHETIN or **NETSKY** a market in Bohemia, circle and 19 m. W. Pilsen with a church, chapel, townhouse, two mills, and a trade in corn. Pop. 971

NETTESWILL, par Eng Essex. 1821 ac. Pop. 865, NETTLOW a tn Prussia, prov. Silesia, gov. Legnica, on the Oder with a Protestant church, tile-works on oil and several other mills. Pop. 1125

NETTLINGEN a vil, Hanover principality and 9 m. E. Hildesheim with a church and a manor-house. P. 1056

NETTITAI, a tn and par Switzerland, can. and 1 m. N. Olaraz, 1 bank Linth. It is well built. Has two churches, three paper-mills, a straw hat factory and several other industrial establishments. Pop. 2026

NETTINO a tn and seaport, Papal States, 31 m. S. E. Rome, on the Tyrrhenean Sea, supposed to derive its name from a celebrated temple of Neptune, the remains of which still exist. Balthus is the birthplace of the painter Andrea Sacchi, born 1800 and Paolo Regneri, called the flower of Italian eloquence, born in 1824. The situation is very unhealthy and there is scarcely any trade. P. 1000

NETZE a river Prussia which is formed by several lakes in the h. of prov. Posen, not far from Inowrazlaw flows W. & W. joins r. bank Warta 8 m. E. Landsberg, total course about 140 m. By means of a canal, which leaves it at Nakel and joins the Brda at Bromberg, it gives a navigable communication between the Vistula and the Oder

NETZSCHEN a tn Saxony, circle Zwettan 9 m. N. N. E. Plauen, on the Golsch with a castle, a church, tile-works, a paper and a flour mill. Pop. 1908

NEU BISMARCK or **BISMARCK** a vil Hungary on Temeswar about 1 m. from Kus-Bismarck with a considerable trade in agricultural produce. Pop. 1998

NEU BIERZAN, a tn Bohemia. See BIERZAN

NEU BUCKOW a tn Meklenburg-Schwerin, circle Meklenburg, with a Gothic church, townhouse, manufactures of lace, and several tanneries. Pop. 1643

NEU CHURCHWZ, a market in Bohemia, circle Tabor, about 8 m. from Pilgram with a church, a school, a saw and two other mills. Pop. 1021

NEU DOMAGNICH, a tn Bohemia, circle Kaurzin with a church, a school, a townhouse, and a distillery. P. 1093

NEU HOLITZ, a tn Bohemia. See HOLITZ

NEU KALBE, a vil in Meklenburg-Schwerin, cap. bail., on a height above Lake Camow 55 m. E. N. E. Schwerin. It has a church, an hospital, and several mills. Pop. 1150. Bail. area, 37 geo. sq. m. Pop. 3416

NEU KOLN, a tn Bohemia. See COLN

NEU KUSNA, or **NEU KUSNA**, a tn, Austria Turkey 120 m. N. E. Rome, lat. 58° 37' N., lon. 34° 37' E. It stands at the height of 8940 ft. above sea-level with a bold ravine in front, and a background of high cliffs of volcanic rock, and is a clean, well built town of considerable extent containing about 3000 houses, two large mosques, a Greek church, and a quadrangular castle, with round towers at the corners. Its trade is much more extensive than that of most towns in the interior of Asia Minor. Pop. about 15,000

NEU-SCHWARTZ, the top of the grand duchy of Meklenburg-Schleswig, between lakes Tack and Glumbach, 67 m. N. Berlin. It is surrounded by walls; is regularly built in the form of an octagon, with several good streets and squares; is the seat of government, contains several superior courts and offices; and has a large and handsome ducal palace, partly in

the Dutch, and partly in the Italian styles, with a library of 50,000 vols., and some good collections, a number of palaces, belonging to Prince Ernest; two churches, a college, gymnasium, and several superior schools, two hospitals, a posthouse, a theatre, and a bathing establishment. Most of the inhabitants are connected with the court or the military service, but there are manufactures of soap and tobacco, two breweries, and three mills. Neu-Schwartz occupies the site of the ancient fort of Lunin or Lunke which was demolished in the beginning of the 16th century. Pop. 8464

NEUBERG a vil and par Styria, circle and N. N. E. Bruck. It is the seat of a mining district and has two churches, an old Cistercian abbey on hospital, important iron-works raw and other mills. Pop. 1459

NEUDOLG, (Lusatia, *Neues Dargow*), a tn, Prussia, dep. Euro, 13 m. W. W. Krossen. It early acquired considerable importance and was long in the hands of the English. In its castle, the remains of which still exist, the marriage of Henry II of England with Margaret, daughter of Louis VII., was celebrated. The parish church is an interesting Gothic structure and in an extensive forest adjoining the town is a large chateau, called Champ-de-Bataille. The manorhouse consists of linen cloth making, fustian, &c. Pop. 1868

NEUBUNN a vil, Bavaria, Lower Franconia, dist. Homburg with a church, a castle in ruins, and a mill. Pop. 119

NEUBURG a tn, Bavaria, circle Swabia, cap. dist., r. bank Danube, here crossed by two bridges, one of wood, and another very handsome of stone 45 m. W. N. W. Muench. It is a place of great antiquity, and very pretentiously situated, and consists of the town proper divided into the old and new town, and partly surrounded with old walls, and of two suburbs, is the seat of several provincial courts and offices, contains an old fortified castle of the dukes of Bavaria, on a commanding height with a collection of old armours, three churches, a convent of the order of Mercy, an old Jesuit college, townhouse, gymnasium Latin school, seminary, infantry military barracks and arsenal and has manufactures of porcelain, cloth, and salt-petre numerous breweries and distilleries. An active salubry is carried on. On an island, formed by the river are the ruins of the castle of Altenburg. Pop. 6350 Area of dist., 96 geo. sq. m. Pop. 17,014

NEUBURG or **NEUBURG** 1 or DEN WALL a tn, Bavaria Upper Palatinate, on the Schwarzach 27 m. N. N. E. Regensburg. It has a court of justice, seven churches, two castles, a conventual nunnery for female manufactures of woollen and linen cloth numerous breweries, several mills, and a trade in lace. Pop. 2636

NEUCHÂTEL See NEUCHÂTEL

NEUDAMM a tn, Prussia, gov. and 29 m. N. Frank fort on the Netzel. It is enclosed by walls and a fosse has a church and poorhouse manufactures of woollen and linen cloth hats and hosiery a paper and two corn mills, and a trade in wool. Pop. 3172

NEUDEK (anc. *Neudamm*) a village in Bohemia, circle and V. Elbogen with two castles, a blast-furnace, and several other iron-works manufactures of lace, ribbons, and paper and four flour-mills. Pop. 3000

NEUDENAU a tn Baden, circle Unterzahrn, r. bank Jaxt, here crossed by a bridge, 39 m. E. S. E. Mannheim with a church and chapel, an iron-mill, linen manufactures, and several fairs. Pop. 1250

NEUDORF, a tn Hungary See IDO

NEUDORF, numerous places, Austria, particularly — 1 A tn, Lower Austria, 6 m. S. Vienna, on the railway to Gratz. It contains one of the finest country churches in Austria, adorned externally with an Ionian colonnade, and within with several fine paintings a posthouse, and a castle. Pop. 2020 — 2 A vil Moravia, circle Hradisch, with a church. Pop. 1660 — 3, A vil Moravia. See KÖNIGSBERG — 4, A vil Bohemia, 42 m. S. by E. Olmitz, with a church, a school, and numerous mills. Pop. 917

NEUDORF, numerous places, Germany, particularly — 1 A vil, Anhalt-Bernburg, near Harburg. In the vicinity are the Pfaffenburg and Wiedburg, the two most important strongholds of the Lower Harz. Pop. 819 — 2, A vil, Moravia, circle Brün, with a church, a castle with a park, and two mills — 3, (or *Waldendorf*) A vil, Moravia,

single brick with a church. Pop. 1610.—4, (Stratford), A. vii. Prussia, prov. Silesia, gov. Breslau, circle Warthenburg, with a church, a mill, and two mills. Pop. 867.—5, A. vii. Saxony, circle Gotha, bail. Weisenthal. P. 1616.

NEUDORF, a vii. Bohemia, circle Böhmisch, in a valley on the Popelka, about 9 m. from Gitschin, with a church, a school, 4½ mills, and manufactures of linen and linen yarn. Pop. 1194.

NEUDORF several places, Hungary.—1, A. vii. Hungary on Freuburg, between Bar-Bent-Gyurgy and Hunne-ness, 6 m. from Ecsen-Jacob, with a church. Pop. 1290.—2, A. vii. Banat of Temeswar, between Allibunar and Panova, at the extremity of a large sandy tract. It has three Greek non-united churches. Pop. 1800.—3, Co. Kips. See Lato.

NEUBURG a. ta. Württemberg, circle Schwarzwald, on the Ezer, 37 m. W. Stuttgart. It is well built, has two castles, one in ruins, and a Latin school, manufactures of sayches, spoons and leather, and several saw-mills. Iron-mines are worked in the neighbourhood. Pop. 1554.

NEUBURG several places Germany, particularly.—1, A. vii. Prussia prov. W. Prussia, gov. and 11 m. S. W. Marienwerder on the Vistula with a castle, three churches, a Barnardian cloister, manufactures of linen a brewery and distillery, and a trade in cattle. Pop. 607.—2, A. vii. Oldenburg, with a castle. Pop. 481.—3, A. ta. Baden, circle Ober-Rhein, r. bank Rhine, 18 m. S. W. Freiburg. It is a very old place, surrounded by walls, and has some shipping, and a trade in cattle. Pop. 1120.

NEUBURG, Switzerland. See NEUCHÂTEL.

NEUDORF a. ta. Rhénish Prussia, gov. and 3 m. N. Coblenz on the Rhine, over which there is here a regular ferry. It has a church. Pop. 1222.

NEUBURG, a. ta. and par. Switzerland east and 7 m. S. W. Bern; in a valley traversed by the Glarus, and not far from the bridge which crosses it. It contains an old church, in which a league was sworn in 1271 between the cantons of Bern and Fribourg. In 1798 the Bernese here repulsed an advanced guard of French.

NEUBURGH numerous small places, Germany particularly.—1, A. ta. Hanover, gov. and 47 m. W. N. W. Osnabrück, on the Dinkel which is here navigable. It is an ancient place, and has a Protestant and a R. Catholic church, and a graving dock. Pop. 1423.—2, A. ta. market in Basse-Mainburg, about 1100 ft. above the sea, E. S. E. Coburg, with a church, and a manufactory of the stone-ware and tile-works, and a large establishment for the manufacture of rail way bars. Coal is worked in the neighbourhood. Pop. 610.

NEUNKIRCHEN, numerous places, Germany particularly.—1, A. vii. Hanover, gov. and 17 m. S. E. Osnabrück with a church. Pop. 1144.—2, A. vii. Prussia, prov. West-phalia, gov. and 18 m. S. E. Minden with a R. Catholic church, and a trade in cattle. Pop. 1149.

NEUNRADE, a. ta. Rhénish Prussia, gov. and 30 m. S. W. Arnsberg, with a church, manufactures of linen, a bleachfield, and iron-mill. Pop. 1130.

NEUNSTADT a. ta. Koenigsberg, a. ta. Württemberg, circle Neckar at the confluence of the Frothach with the Neckar, 5 m. N. E. Neckarstadt, with a demerit church, chateau, and old ruined castle. It sometimes takes the name of Neuen-stadt-a-der-Linde, from a lime-tree of extraordinary dimensions growing beside it. Pop. 1421.

NEUNSTEIN, several places, Germany, particularly a. ta. Württemberg, circle Jaxt, on the Eppach, 81 m. N. N. W. Ellwangen with a church, an old castle, now used as a hospital and work-house, and manufactures of linen. Pop. 1480.

NEUBURG a. ta. Rhénish Prussia, gov. and 26 m. N. W. Treves, on the Moselle. It has a church and chapel, manufactures of woollen and linen cloth, several tanneries, and a trade in cattle. Pop. 1600.

NEUBERN (Ossan and Urtz) or HORNY NEUBERN, a. ta. Bohemia, circle Klatzau, 50 m. N. W. Passau. It consists of two distinct portions and has two churches, a paper, and two other mills. Pop. 1250.

NEUBERHACH or NEUBERHACH (Lat. Brissacum), a. ta. France, dep. Haut-Rhin, 10 m. S. E. Colmar, on the canal of its name, near 1 bank Rhine. It is made as a fortress of the first class, being fortified by Vauban, in the form of a regular octagon. All the houses are of one height, and rather low, so that they are not visible from the outside, and are laid out

with the utmost regularity. In the centre of the town is a large square, or place d'armes, surrounded with trees from which its four gates are seen, and the ramparts afford a fine promenade. The only edifice deserving of notice are the church, and extensive barracks. Pop. 1778.

NEUFCHATEAU (Lat. Novus Castellum), a. ta. France, dep. Yvelles 26 m. W. N. W. Epinal on the Moselle, near its confluence with the Meuse. It is an ancient place, but tolerably well built has a court of first resort, a communal college, and a small public library of 8000 volumes manufactures of woollen covers, Paris foot and wicker-work and some trade in linen, silk, iron &c. Pop. 2598.

NEUFCHATEAU a. vii. and com. Belgium, prov. and 60 m. S. W. Liège, on the Berwina with a brewery a flour-mill and a trade in agricultural produce. Pop. 1003.

NEUFCHATEAU a. ta. Belgium, prov. Luxembourg on the Viere, 28 m. N. W. Arlon. It has a church, a communal house, a palais de justice, and barracks, also quarries, bark oil, meal, and saw mills some manufactures of woollen stuffs and a considerable trade in corn and cattle. Pop. 1643.

NEUFCHÂTEL or NEUCHÂTEL (German Neuenburg), a. ta. can Switzerland bounded N. by can. Bern and France, W. can. France, S. can. Yverdoy and Bern, length, N. E. to S. W. about 23 m. mean breadth, about 11 m. area, 255 sq. m. It is traversed throughout by the chain of the Jura, and partly occupied and partly bounded by the extensive lake to which it gives its name. The principal summits of the Jura, within the canton—the Chasseron, 5262 ft., Chasseron, 5283 ft. and Creux de Vent, 4990 ft. high. The intervening valleys are—the Ruz, Travers, Fages, Bravine, Lochs, and Chaux-de-Fonds, each taking its name from the principal stream by which it is drained. These valleys are longitudinal following the direction of the principal chain of the Jura, from N. E. to S. W. In addition to the streams which give the valleys their names the only others of any importance are the Doubs, which forms the N. W. boundary of the canton, and the Thielle or Zihl, which forms the communication between the Lakes of Neuchâtel and Biel. Almost all the strata belong to a calcareous formation, called Jura limestone. The only mineral of any importance contained in it is iron, often in the form of bog iron ore. In the valley of Travers, a considerable mass of asphalt occurs there is also a little coal and a little lignite. Gypsum abounds everywhere abundantly, according to an estimate which has been made, the whole surface may be thus divided—arable land, not quite one-sixth forests, nearly one-fifth, natural pastures and artificial meadows, above one-half vineyards, little more than one-fiftieth and waste, one-thirtieth. The corn raised is confined to the more level portions of the lake district and a few of the plains and falls far short of the consumption, for which large additional supplies are drawn from cantons Bern and Basel.

The culture of the potato is extensive, and carried far up on the mountain sides. Immense numbers of geese and swans are fed in the higher valleys, and on the mountain pastures; and the dairy is perhaps the most important branch of rural economy. The wine made, both white and red, is extensively exported to the neighbouring cantons, orchards of apples, pears, plums, and cherries are numerous and, in a few favoured spots, the almond and fig thrive in the open air. Immediately above the vine slopes extensive plantations of all kinds of nuts are frequent. Higher up oak becomes the principal timber. Higher still at an elevation of 500 ft. to 1000 ft. fir, larch, and beech forests commence, and, continuing to ascend crown many lofty mountain tops. In these forests, bears, wolves, wild swine, and deer have their haunts, though their numbers have diminished as the population has increased. Smaller game is still very abundant, and both lakes and rivers are well stocked with fish. The great staple manufacture of the canton is watches and clocks, and the various kinds of mechanism in which great ingenuity and manual dexterity are required, as mathematical and optical instruments, &c. All of these find markets in every part of the world, and more especially in France, which, notwithstanding of her efforts to prevent it, annually receives vast numbers of contraband. Lace and printed cottons, once most important branches of manufacture, have greatly declined, but still continue to employ numerous hands. The language of the inhabitants is French, and the prevailing religion Calvinistic.

R. Catholics forming not more than one-third of the population. Neuchâtel holds the twenty-first place in the Swiss Confederation, to which its contingent is 960 men, and an annual payment of about \$1800, but belongs in sovereignty to the king of France, who appoints to the principal offices, and reserves an annual tribute of nearly \$4000. His powers however are fixed by the constitution, on which no change can be made without the consent of the cantonal parliaments, a representative body, partly nominated by the king, but chiefly composed of members elected by a kind of universal suffrage. Pop. (1849), 70,679.

NEUCHÂTEL or **NEUCHÂTE**, [German, *Neuchâtel*] a town Switzerland, cap. of same name, 24 m. W. Bern, on a steep slope above N.W. shore of lake Neuchâtel and traversed by the Broye, which falls into the lake immediately below. The scenery of the lake here is not much distinguished by grandeur, but the whole site is fine below, a wide expanse of water, which has sometimes been compared to the Bay of Naples, around, rich fields and vineyards, dotted over with numerous villas, plunging in the sea, and habited, piles of black forest, which climb the mountain sides, and are overtopped at last by the magnificent wall faces of the Jura. The town itself rises in the form of an amphitheatre, and is well built containing several good streets, particularly the Rue de l'Hôpital and Rue de Fambour. The principal buildings are the castle an ancient, open building, of considerable extent, originally the residence of the prince of Neuchâtel now partly occupied by the French governor, and partly converted into government offices, the old Gothic church adjoining the castle, built in the 13th century containing several carvings, ancient monuments, and surrounded by a magnificent terrace, on which William Farel Calvin's favourite colleague at Geneva, was buried, though the actual position of the grave has somehow been lost, the new church, a handsome edifice, in modern style the townhouse a large building, with a Grecian portico used

original locality. The transport, nearly 60 m., is well served by Agassiz to have been by glaciers no longer existing. Pop. (1850), 7737.

NEUCHÂTEL (LAKES OF), [German, *Neuchâtel*], a lake, Switzerland, surrounded by and partly belonging to cantons Neuchâtel, Vaud, Fribourg, and Bern; greatest length, N.E. to S.W., 25 m.; average breadth, 4 m.; about 1340 ft. above the sea, and 190 ft. above the Lake of Geneva; greatest depth, 400 ft. Its W. bank is lined by the range of the Jura in the E., the Jorat forms the water-shed between it and the Lake of Geneva. It receives the Broye, charged with the surplus waters of Lake Morat, on the E., the Orbe on the S.W., and the Rance and Seyon on the N.W., and discharges itself, by the Tancs or Zihl, into Lake Biel. The scenery, in many places, is fine, but much tamer than that of most Swiss lakes. It is well stocked with fish, particularly salmon and trout, and the traffic on it is important, though the navigation is dangerous, from sudden gusts of wind. A steamer plies regularly on it, visiting the most important places on its banks.

NEUCHÂTEL EN BAAR [Latin *Dreconia*] a town, France, dep. Seine-Inférieure, 27 m. N.E. Rouen near bank Belneuve with a court of first resort, an agricultural society manufactures of woollen and cotton stuffs, harness, bonnets, glass, leather and beer and a trade in flour, wine, brandy, cider, perry, butter, and particularly cheese, which is extensively made in the surrounding districts the fine quality, a kind of cylindrical cream-cheese, is famous. P. 3990.

NEUFEN, a town Wurtemberg, circle Schwabmühl, in a beautiful valley 10 m. N.E. Reutlingen. It has a Latin school the ruins of an old castle and manufactures of stained paper. Pop. 2000.

NEUFRA a market in. Hohenzollern-Sigmaringen, on the Pöhl. It has a church and two mills. Pop. 1250.

NEUGEDLIN or **KOTVA**, a village Bohemia, circle Klatzka, 27 m. S.E.W. Pilsen with a church school, townhouse and one of the most important steam woollen factories in the kingdom two dye works, and several mills. Pop. 1612.

NEUGLEN or **NEUGE**, numerous, river La Plata. See **DIAMANTE**.

NEUHAUS, numerous places, Germany, particularly—1 A town Hanover, circle Nord24 m. N.W. Stade, on the Oese, with a small harbour, manufactures of woollen and linen cloth, an ironworks, a sawmill, a brewery, a distillery, a paper mill, and some shipping. Pop. 1512. —2 A town Prussia, prov. Westphalia, gov. and 28 m. S.E.W. Minden, with an old castle, now used as barracks, a church and some trade in cattle. P. 1897.

NEUHAUS [Latin, *Novus*], a town Bohemia, circle Pilsen 20 m. N.E. Budweis, on the Neuzka. It has a ruinous old castle, with a large dargen tower three churches, a townhouse, a church, barracks, gymnasium, hospital, and manufactures of woollen stuffs. The high table land, in this neighbourhood, forms the water-shed between the basins of the Elbe and the Danube. Pop. 7604.

NEUHAUSEL, or **EMMER UJVAS**, a town Hungary, either Danube, co. and 22 m. S.E. Neutra, in a plain a bank Neutra. It has a church, normal school, and Franciscan monastery, a townhouse, large swimming-school, and a considerable trade in corn, wine, and cattle. Pop. 6760.

NEUHAUSEN, several places, Württemberg, particularly—1, (confusion of *Neiden*), a town Neuchâtel, S.E.W. Reutlingen; with two churches and a castle. P. 2170. —2, a village, circle Schwabmühl, on the Enns. P. 1901. —3, (confusion of *Neiden*), a village, circle Schwabmühl and 6 m. E. Reutlingen, with a church. Iron is worked near it. Pop. 1061.

NEUHOF a village and par. Hesse-Cassel, on the Pfaffen, 6 m. S.E.W. Fulda. It properly consists of three distinct places—Wunders, Ellers, and Opperg—and contains a castle and a church. Pop. 1731.

NEUCHÂTEL, looking towards the lake. —After Th. de Moët.

among other purposes, for the meetings of the Grand Council the gymnasium with an interesting museum, and a celebrity almost European in consequence of the distinguished labours of Agassiz, a native of the town, and one of its professors. Ferry's hospital, so called after its founder, David Ferry a native, who assumed a fortune of about \$160,000 and left the whole to the town for its general improvement and benevolent purposes; and the Fourcils hospital so called because founded by another benevolent native. Neuchâtel is the entrepot for the manufactures of the canton, and carries on an extensive trade, for which both good roads and water communication afford great facilities. Boatsmen navigate the lake, and communicate with Morat, Yverdon, &c. On the slope, a mile above Neuchâtel, is the largest building in the town, 14,000 cubic ft. of granite. There is no granite in situ in the Jura, and the granite thus resembling this building is found on Great St. Bernard. The inference seems fair, that that was its

lower three churches, a townhouse, a church, barracks, gymnasium, hospital, and manufactures of woollen stuffs. The high table land, in this neighbourhood, forms the water-shed between the basins of the Elbe and the Danube. Pop. 7604.

NEUHAUSEL, or **EMMER UJVAS**, a town Hungary, either Danube, co. and 22 m. S.E. Neutra, in a plain a bank Neutra. It has a church, normal school, and Franciscan monastery, a townhouse, large swimming-school, and a considerable trade in corn, wine, and cattle. Pop. 6760.

NEUHAUSEN, several places, Württemberg, particularly—1, (confusion of *Neiden*), a town Neuchâtel, S.E.W. Reutlingen; with two churches and a castle. P. 2170. —2, a village, circle Schwabmühl, on the Enns. P. 1901. —3, (confusion of *Neiden*), a village, circle Schwabmühl and 6 m. E. Reutlingen, with a church. Iron is worked near it. Pop. 1061.

NEUHOF a village and par. Hesse-Cassel, on the Pfaffen, 6 m. S.E.W. Fulda. It properly consists of three distinct places—Wunders, Ellers, and Opperg—and contains a castle and a church. Pop. 1731.

NEUBERG, numerous small places, Bohemia, particularly, a. in, circle and N. England, with a magnificent castle, surrounded with fine gardens, and possessing a library of 25,000 volumes; a church, high school, and hospital. P. 791

NEUBUTTEN, a vil. Bohemia, circle Rakowitz, at the confluence of the Odra with the Misa. It has a castle, and very complete and extensive iron-works, belonging to the prince of Stolberg. Pop. 938

NEULLY-LES-SEIGES (Lahn, *Neulium*), several places, France, particularly a. in, dep. Seine, finely situated near r. bank Seine, on both sides of a magnificent avenue, which crosses the high road to Paris. Its principal building is the chateau, a magnificent residence, to which Louis-Philippe was very partial. Near it the Seine is crossed by a bridge of five arches, each with a span of 180 ft. The fine grounds in the vicinity are a favourite holiday resort of the Parisians. The manufacture consists of water-proof articles, fustia, and chemical products. Pop. 9451

NEUKIRCH, four small vils and pure Switzerland, the largest in can. Luzern. Pop. 2364

NEUKIRCH (Kirkow and Osea), a. in Prussia, gov. and S. W. Legnica, with two churches and a castle, several mills, and hospital. Pop. 1113

NEUKIRCHEN, numerous places, Germany, particularly, 1. a. in. Hesse-Cassel circle Oberhessen 84 m. S. W. Cassel, on the Greif, with a chapel, hospital and manufactures of lace. P. 2067.—2. (Lower *Heiligen-Blut*), a market in Lower Bavaria, N. W. Passau with two churches, a townhouse, a monastery and several mills. Pop. 1510.—3. A vil., Upper Austria, circle Traun with a church. Pop. 1005.—4. A vil. Rhenish Prussia, gov. and 13 m. S. Düsseldorf with a church manufactures of woollen linen, and cotton goods, silk-works, and several distilleries. Pop. 972

NEULAND, a vil. Prussia, prov. Sillesia, gov. Oppeln, circle Neisse. It consists of three several parts, and has a R. Catholic church. Pop. 1048

NEULEHNEFELD, a vil. Lower Austria, as near Vienna as to be properly only one of its suburbs. It has a house of invalids, and several manufactures. Pop. 4700

NEULIE, a. in France, dep. Loire, about 7 m. S. E. Roanne. Pop. 1033

NEUMAGEN, a. in Rhenish Prussia, gov. and 13 m. N. E. Trier, on the Moselle, with a church, synagogue, extensive tanneries, building-yards, and some shipping. P. 1817

NEUMARK, 1. (Polish *Nowomark*), A. walled town, W. Prussia, gov. and 55 m. S. E. Marienwerder. A bank driven with a court of justice, two churches, and a trade in cattle. Pop. 1255.—2. (or *now-Jew-Wald*) A. in. Bohemia, circle Klattau, 31 m. S. S. W. Pilsen, with a church, townhouse, school, and synagogue manufactures of linen and earthen ware. Pop. 1133

NEUMARKT, several places, Austria, particularly—1. (or *von der Oden*) A market in Styria, S. W. Judenburg, with an old castle and a hospital. Pop. 1195.—2. (Italian, *Novi*), A market in Tyrol, circle and 13 m. S. by W. Bressan, on the Adige, with a church and a monastery. Pop. 1548.—3. (or *Truppi*) A market in Styria, Carinthia, 24 m. N. W. Laybach, with a handsome church, two chateaux, and important manufactures of ironware and cutlery, horses, leather and linen. Pop. 1440

NEUMARKT—1. A walled town, Bavaria, circle Oberpfalz, on the Rube, and on the Main and Danube Canal, 30 m. S. E. Nuremberg. It has a church, castle, townhouse, institute of the Sisters of Charity, a Latin school barracks, and hospital, numerous blacksmiths, a tobacco-factory and a trade in coco horses, and cattle, and a bathing establishment, in connection with chalybeate and sulphurous springs. It was once an imperial free town. Near it are many ruined castles, of which the most remarkable is Wolfstein. Pop. 3055.—2. A walled town in Prussia, gov. and 16 m. W. N. W. Breslau, cap. circle. It has several provincial and town courts, Protestant and R. Catholic churches, numerous tobacco-factories, a bank and several other mills, tile-works, and a corn market. The rearing of bees is an important branch of rural economy and there are several saw refineries. Pop. 4098

NEUMUNSTER, a vil. Denmark, dusky Holstein, hill and near Kiel, with a gymnasium, a bank, oil and flour mill, in the last, which is very extensive, the whole town of Kiel, and many of the surrounding villages, are thirled. P. 804

NEUMUNSTER, a vil. Denmark, dusky Holstein, 17 m. S. S. W. Kiel, on the railway to Altona. It is a large, well-built manufacturing place, has a church, in the Italian style; and important manufactures of linen, one factory employing 900 hands. Pop. 4700

NEUMBURG-VOYNA-WALD, a. in. Bavaria, Oberpfalz, 27 m. N. E. Ratibon with seven churches, two castles, a townhouse, manufactures of woollen and linen cloth, and several mills and breweries. Pop. 2080

NEUNDORF, several places, Germany, particularly—1. A vil. Bohemia, circle Bunsauz, with a church, a castle, and a mill. Pop. 1093.—2. (Gross), A vil. Prussia, prov. Sillesia, gov. Oppeln, circle Neisse, consisting of several distinct portions, with a church and two tile-works. Pop. 1024

NEUNKIRCH, a. in, and par. Switzerland can and 6 m. W. Schaffhausen. It is walled, and tolerably well built, but miserably dirty, and has two churches, one within the town, and another in a suburb, consisting chiefly of modern houses, and an excellent school-house. Pop. 1400

NEUNKIRCHEN, a. in Prussia, gov. and 37 m. S. E. Treves, on the Rhine; with a Protestant and R. Catholic church, manufactures of ironware, and a trade in cattle coal and iron are worked and there are several blast-furnaces, and other iron works, in the neighbourhood. Pop. 1693

NEUNKIRCHEN AN DER EISENBAHN, or **NEUNKIRCH**, a market in Lower Austria, 33 m. S. S. W. Vienna, on the railway to Gritz with a large church, Minorite convent, manufactures of needles and screws, a large cloth and calico printfield, and two cotton-factories. Pop. 2162

NEUPAKA, or **PAKAU**, a. in Bohemia, 67 m. N. E. Prague with two churches, a chapel townhouse, school and hospital. Pop. (agricultural and weaving) 2483

NEUQUEN, a river La Plata. See DIAMANTE

NEUEISENGAU, a. in Bohemia, circle and R. Tabor, with a church, school, cattle tax-gathering, manufactures of linen, and a saw-mill. Pop. 1047

NEUREUSCH or **HOWAKES**, a market in Austria, Moravia, circle Igau 6 m. from Schellerau, with a church and a *Protestant* school. Pop. 1240

NEURODE, a. in Prussia, gov. and 44 m. S. S. W. Breslau, on the Walditz. It is well built, has four churches and a chapel, a castle, an hospital manufactures of woollen and linen cloth, a tobacco-factory, and walk mills. Pop. 1840

NEURALA, a. in Prussia, prov. gov. and 45 m. N. W. Legnica, a bank Oder. It has two churches, provincial courts and offices manufactures of articles in enamel and pasteboard, thread, leather, and sundries, building-yards, shipping and an extensive trade on the Oder. Pop. 8440

NEUSATZ, a. in Saxony, dist. and S. S. E. Bautzen, with a townhouse, manufactures of calico, and a trade in woollen and cotton yarn. Pop. 1019

NEUSANDER, or **HOWK BAKING**, a. in Austrian Galicia, circle Sandomir, r. bank Danube, in a marshy valley, hampered on all sides by lofty hills, 47 m. S. E. Cracow. It possesses a gymnasium and high school. Pop. 4465

NEUSATZ, or **UJ VODKA**, a. in Hungary, Risher Danube, on Bacs, on the Danube opposite to Futurarduin, with which it communicates by a bridge of boats. Till the late (1849) Hungarian war, when it was almost completely destroyed, it was a large fortified town of 17,400 inhabitants, irregularly but substantially built, with a number of handsome public edifices and enjoying on an important trade, being a common entrepot for Germany, Hungary, and Turkey

NEUSCHLOFF or **NEUSCHLOFF**, a. in Russia, Finland, dist. and 80 m. N. Wiborg, on two islands in Lake Harjavesi. It communicates with the mainland by a bridge, is defended by a strong castle, and has many handsome and cheerful looking houses, separated by small gardens and painted fences a spacious church, and other public edifices.

NEUSE, a river, U. States, N. Carolina. It rises in the centre of the State, near Hillsboro lat 36° 5' N., lon. 79° W., from which it flows S. S. E., and falls into a branch of Pamlico Sound, at Newbern, lat. 36° 5' N. lon 77° W. Whole course, about 180 m.

NEUSIEDL, numerous places, Hungary. The only one deserving of notice is *Neusiedl am See*, on Wieselburg, on N. shore, lake of salt water, 37 m. S. E. Vienna. It possesses a quarry of the stone, which is sent both to Fiume and

Vienna; and has a weekly market, and five annual fairs, at which large quantities of corn are sold.

NEURIDIOLER SEE (see *Lacus Prius*).—Lakes in W. Hungary, between Cos. Oedenburg and Weissenburg, and the *Mari* and the *Laytha*; greatest length, N. to S., 23 m; average breadth, 5 m.; aerial, about 60 m. It is salt, very shallow throughout greatest depth, seldom exceeding 15 ft. on the S. It is lost in the great morass of Hungary. Large quantities of salt crystallize on the shores in summer, and consists of a mixture of common and of glauber salt. Carp and pike are caught. Its inundations, which were frequent, used to occasion great damage, till a canal was cut, in 1800, of 12 m. length, by which the water is carried off into the Danube, and discharged there into the *Rabnitz* or *Little Leitha*. The stream of *ayg* consequently which falls into it in the *Walla-*

NEUBOHM (L. *Neubohm*) is located 14 miles
Hibbs Dam, up on the bank of the 70 N. Hwy.
It has a square well in the center, facing the place in
which is a statue of St. Martin. A Catholic church, St.
R. Catholic church, an old castle now used partly as a town-
house, and partly as a gymnasium; husband's place, chapter
house, overthrown, some, infirmity high school, school of
danger, and several other educational establishments man-
ufactures of woolen and linen cloth, leather hats, copper, iron,
textiles, and paper, several dry works, and extensive
best root sugar factories. Near it, copper and iron are mined,
sweet, and, to some extent, manufactured. Pop. 12,000

NEURS, a st. Prussia, gov. Düsseldorf, cap. circle, on the Rhine, near its confluence with the Rhine. 11 m. N W Cologne. It is walled, flanked with towers and ditches, indifferently built like a Protestant and two R. Catholic churches, a synagogue, gymnasia, savings bank, lunatic asylum, ord. military and orphan asylum, manufactures of woollen cloth, calicoes, muslins, ribbons, cotton stuffs, calicoes, hats, starch and gulls, woveed and cotton mills, oil and flour mills, tanneries, dye works, and vincent works. Pop. 15,667

NEUSTADT numerous places, Bavaria particularly
1. (near *Landshut*) A walled in circle Middle Franconia,
cap. dist. 21 m. W. N. Nürnberg It has two castles,
two churches, a *Wohnhaus*, Latin school, hospital, and bar-
racks, manufactures of woollens, cotton goods, nails, and
iron. Pop. 1,000. 2. (near *Landshut*) A circle. *Finke*,
cap. dist., on the *Hegebrühl*, 14 m. W. Spitz. It has a
justice-of-peace court, four churches, three of them Protestant;
a Latin school, and hospital; manufactures of cloth
and paper and chemical products, iron, oil bark, powder and
sulfur mills, and an important trade in wool and wood.
Pop. 1,000. 3. (near *Landshut*) A circle. *Lein*,
cap. dist. 42 m. N. E. W. Würzburg with two
churches, a chapel, Latin school, posthouse, hospital, old
Carmelite monastery, manufactures of damask, cotton goods,
red and white leather, a dye-works, and several mills. Pop.
1,450. 4. (near *Landshut*) A circle. Oberpfalz, 14 m. S. E.
of *Landshut*, with two churches and a ruined castle, a trade
in cattle. Pop. 1,000. 5. (near *Landshut*) A circle. *Landshut*,
Dumbe, here crossed by a wooden bridge, 21 m. S. W. *Landshut*,
circular walled, flanked with towers, well fortified, with
several streets, many of houses, many of which, though old, are
handsome, two fine churches, an infirmary, a potash-
factory several breweries, and a trade in wool and hops. Pop.
1,000. 6. (near *Landshut*) A circle. *Waldshut*, in the Upper Palatinate,
cap. dist. 14 m. S. W. *Landshut*, with two churches, a school,
and near it ruins of a citadel and a castle. Pop. 1,500.

NEUSTADT, several places. Prussian province of Pomerania.
1. **Neustadt, (or Wodgertshagen)** A tn.; gov and 24 m. N.W. of
Damm, cap. circle, on the Blau. It possesses provincial
and town courts, a Protestant and E. Catholic church,
a grammar school, a hospital, and has back and walk mills, and a
trade in cattle. Pop. 2054-23. (or *Frudenz*). A walled town,
gov and 29 m. S.W. Oppeln, cap. circle. It is tolerably
well built, has a Protestant and three E. Catholic churches,
a synagogue, two hospitals, and a convent of the brothers of
St. John, provincial and city courts; manufacture of cloth,
textiles, leather, and shoes, several mills. Pop. 10,000.
2. **Neustadt, (or Lauenburg)** A tn.; gov and 32 m. S.E. Posen,
1. bank Warta with five churches, a synagogue, and many
features of cloth and leather. Pop. 2546-4. A tn., prov
and 83 m. W.W. Posen, on the Warta; with a church

synagoga, and extensive tanneries. Pop. 1904, 5, 549. *Shwartzwald*, A. 124, 300. *Pöschwald*, on the Pflow Canal and the Elbe. Schvartz, 28 on E. Berlin. It is built in the form of an amphitheatre, divided into three parts—*Elbeshwartz* an *Elbeshwartz*, *Walden in der Ebene*, and a suburb called *Ruhlar*. *Kleinewitz* or *Kleinewitz*. It has two churches, and a bathing establishment supplied by a chalybeate spring, manufacturer of woollen and linen cloth, iron and steel wire, delft and stoneware, copper and iron mulls, a considerable trade in the above articles, and also in wool and rattan. Pop. (1840) 5561.

NEUDART, numerous places, Germany—1, (Weidenau),
A in Meaurio, See MIMICUS—2, A in Saxony, circles
and 32 m. E. Dresden, on the Polzow with several pulp
offices, two churches, an hospital, manufactures of cutlery
and woollen, cotton, and linen cloth, several *ex-works*, a
bleachfield, a brewery, granite quarries, a trade school,
a technical school, a gymnasium, a school of agriculture,
Schwernin, on the Elbe 15 m. S.E. Schwerin, with two
castles, a church, and picture-gallery several tobacco-
factories, a spinning mill, and cutlery. Pop. 1771—4, A in
Dresden, Lake circle, exp. bal on the Watzsch 17 m. S.E.E.
Freiburg It contains an industrial school and has many
factories of cloaks, straw-pipe, woollen and silk goods,
and a large paper mill. Pop. 1710—18, 1710—18, 1710—18.

work, machine factory, copper saw and oil mills. Pop. 3110.
— 5 A to Hems-Caval, circle Oberhausen dist. and 910.
E.N.E. Kircheln with two churches and a courthouse.
Pop. 1787 — 6, a market tn. Brunswick, circle Wolfenbittel
r bank Roden, at the terminus of the Harzburg railway
It has a church, three mills, and salt-pie common to Brunswick
and Hanover Pop 900 — 7, (c. *den Rinkenberge*), a tn. Hanover,
circle Nienburg, on the Harz, 10 miles S. of the city.

principality Coblenz can diet on the Leine, here crossed by two bridges, 16 m N.W. Hanover with a townhouse, church, bathing establishment; manufacturers of linen and limestone quarries. Pop. 1451—90. (*see Der-Heide*). A to. Saxe-Coburg, principally and 8 m N.E. Coburg on the Rothe with a castle, three churches, tobacco a schenke, a brewery, a distillery, in actual course a highway station. Saxe-Coburg warw. Pop. 2219—90. (*see Der-Heide*). A to. Saxe-Weimar, cap. erdie, 34 m E.E. Weimar, with a castle, two churches, a savings bank, and hospital; manufacturers of woollens, linses and leather, and a trade in books. Pop. 4250.—10. (*see Der-Mechan*) [Latin. *Nunc Civitas ex Novoburgio*.] A to. Soehma, principal and 18 m N.E. Kuegring, a factory district, and also a small town, 17 m S.W. after it is well wooded with a castle, and has a castle, tavern, mill, and some trees, a linen. Pop. 1750.

NEUSADT, a town and seaport, Denmark, daily Holstein, E. bank of a little fiord of its name, 17 m N N E. Lubeck, once strongly fortified. Its harbour, formed by the channel of the fiord, which here narrows, so as to assume the appearance of a stream, is a good winter haven of the third class, with 14 ft. of water. The principal export is corn, but its trade is much less than once it was in 1800.

NEUBADT or **WIESEN-NEUBADT** [see *Neubadtsch* or *Fogelshausen*]. A town in Lower Austria, at the commencement of the canal of same name, and on the Vienna and Gratz railway, 26 m. S. Vienna. It is surrounded with a detached ditch, and a wall flanked with towers, is nearly in the form of a square, built with tolerable regularity; many of the streets are both shadowed, well paved and well lighted. The most striking edifice are the old castle, a large quadrangular edifice, with a tower, enclosed by a fosse, containing, among other objects of interest, a beautiful Gothic chapel, with fine painted windows and rich reliquies, and the New Kaiser Kirche, with an admirably carved monument of Eleonora of Portugal, wife of Emperor Frederick IV. Numerous are also to be seen several other buildings, especially worthy for their antiquity, but in 1858, a great conflagration laid the town almost in ashes. The manufactures consist chiefly of silk and velvet cloth, ribbons, paper, porcelain, and refined sugar. The trade is principally in wine, brownware, silk stuffs, leather, sugar, rum, and vinegar. Pop. (1848), 13,846.

NEUSTÄDTTEL a tn. Prussia, gov and 88 sq. N W
Loegnitz; with two churches, manufactures of linen, leather,
and earthenware; a dye-work, bark and flour mill, and a trade
in cattle. Pop. 1868.

NEUSTADTEL-AM-SCHNABBERG a tn. Saxony, circle
and 11 m. S.E. Zwickau; with a church, two schools in
which the making of lace is taught; manufactures of lace

and subsidiary. Near it is a small, particularly that of coal, is extensively carried on. Pop. 1770.

NEUSTADT, or **Neustadt**, several places, Austria, particularly—1, (*Neustadt* or *Neustadt*) A. in P. Tyrol, district Carinthia, cap. circle, 1 bank Gurk, 48 m S E. Laybach; with a church, Franciscan cloister and gymnasium. Pop. 1761—2, (*Neustadt*), A. market in Bohemia, circle and 26 m W by S Pilsen, with a church, school, townhouse, and hospital, and two mills. Pop. 1837—3, (*Neustadt*), A. mining to Bohemia, circle Bunsau, 70 m N N E Prague, on the Lomnitz; with a linen bleachfield. Tin-mines are worked in the neighbourhood. Pop. 2495—4, (*Neustadt*) A. in Moravia, circle Igau, with a parish church. Pop. 1940—5, (*Neustadt* or *Neustadt*) A. market in Hungary, co. Neutra, 53 m. N. E. E. Pressburg, cap. dist., on the Waag with a church, and some trade in wine. P. 5500.

NEUTEICH, a N. Prussia, gov and 21 m S E. Danzig, on the Schwenta, with two churches, two schools, and a trade in horses and cattle. Pop. 1838.

NEUTITSCH, or **Neutitsch** a N. Austria, Moravia, circle Pressburg 56 m S E Olmütz. It has a district criminal court, several public offices, three churches, one of them an ancient chapel in the Baroque style; an old castle, a townhouse a high, a female industrial, and a primary school, an infirmary, almshouse, burgher hospital, and asylum for widows, extensive manufactures of woollen stuffs, which form important articles of trade. The principal spring of Sommerau is in the neighbourhood. Pop. 9000.

NEUTRA, a N. Hungary bounded N by Moravia and on Transylvania, N W Moravia, W and S W co. Pressburg, S Komorn, E. Bohl, and N E. Thuroos area, 1936 gen sq m generally mountainous, lying traversed in the W by the principal chain of the Carpathians, and in other directions by minor ramifications, watered by the Waag, Eszék-Tyres, March, Neutra, Elva, Blava, and Dnubag, all belonging to the basin of the Danube, soil, in general, of great fertility; yields large crops of grain, fruit in vast quantities, wine, and tobacco; woods extensive, principal mineral iron. Mineral springs occur in many quarters. Manufactures of woollen linen, and cotton goods, leather hats, glass, paper and articles of wood, straw, and rush, are carried on. The country is divided into six districts—Ober-Neutra, Unter-Neutra, Vag, Ubeli, Elava, Begmeo, and Bock. The capital is Neutra. Pop. 583,500.

NEUTRA a N. Hungary cap above co. 70 m N W Buda, intersected by the Neutra river. It has a castle, seated on a height, and containing, within its enclosure, the cathedral, the bishop's palace, immediately adjoining the cathedral, the county hall a handsome structure, roofed with copper, post-office, Fariet college, seminary, lycæum, and gymnasium. The chief employments are agriculture, weaving, and general trade. Pop. 4090.

NEUTRA, or **Neutra**, a river, Hungary, which rises in the N. E. extremity of co. Neutra, flows circuitously S W past the towns of Neutra and Erek, and at Komorn, after a course of above 100 m. joins the bank Waag, immediately above its confluence with the Danube.

NEUVÉ-ÉLÉAC [*Neuvé, Neuvé-Éléc*] a vil and com. Belgium, prov W Flanders, 8 m S. by W Ypres, r bank Douve, with several breweries, a dye-work several corn and oil mills, and manufactures of cloth and table-linen. P. 2745.

NEUVILLE, or **Neuviller**, a N. and par. Switzerland, can. and 18 m N W Bern W end Lake Biel. It has several educational establishments, which have acquired some celebrity. Many of the inhabitants are weavers. P. 1411.

NEUVILLÉ, several places France, particularly—1, Dep. Vienne, 10 m N N W Poitiers. Pop. 1140—2, (*Neuvillé*) A. N., dep. Loiret, 15 m N N E. Orleans with manufactures of woollen fabrics. Pop. 1238—3, (*Neuvillé*) A. N. and com, dep Rhone, about 9 m. N Lyons, r bank Saône, here crossed by a handsome suspension-bridge. It has manufactures of printed calicoes, bleaching a lead-roll tag and a silk mill, and a chalybeate spring. In a plain, N E. of the town, was fought the great battle between Septimius Severus, and his competitor Albinus, which left the former in undisputed possession of the Roman empire. Pop. 1788.

NEUVILLÉ, a vil and com. Belgium, prov Hainaut, 10 m N Mons, with manufactures of linen and yarn, three flour-mills, and a trade in horses and cattle. Pop. 1941.

NEUVILLY, a N. France, dep. Nord, about 13 m. E. E. Cambrai. Pop. 8082.

NEUWALDE, a vil Prussia, prov Silesia, gov Oppeln, circle Netze, consisting of three distinct parts; with a church. Pop. 1847.

NEUWARI, a vil Prussia, gov and 23 m N W Stettin, on a tongue of land projecting into a lake of same name. It has a Protestant church, some shipping, and a trade in wood and cattle. Pop. 1821.

NEUWEDLE, a N. Prussia, gov and N E. Frankfurt, on the Drageus with a church, manufactures of cloth and hats, and an iron-mill. Pop. 2174.

NEUWEIER, a vil Baden, circle Middle Rhine, bail Buhl, with a church, a small castle, and a trade in excellent wine, grown in the vicinity. Pop. 1018.

NEUWIED a N. Prussia, gov and 7 m N by W Coblenz, cap. circle r bank Rhine, here crossed by a flying bridge. It is built with great regularity, in the form of a square, the streets crossing each other at right angles; and contains a palace, surrounded with extensive gardens and possessing a collection of Roman antiquities chiefly obtained from the buried city of Victoria, 2 m N of the town; and a library of 10 000 volumes. Three Protestant churches, one of them belonging to the Moravian brethren, a E. Catholic church a synagogue, a building called *Famernum* (Panthéon), containing a museum of natural history, a casino, with a musical society, a progymnasium, normal, industrial, infant, ragged and numerous other schools and private educational establishments. It has manufactures of tobacco, chibory articles of seric, furniture, soap, candles cotton goods, pipes, mineral colours, piano-fortes, bells, lacquerware, morocco leather, and clay stoves and a trade in wine, iron, ironware, potash, and pipe clay. Neuwid was founded in 1549, by a prince of the name thus independent, who invited settlers of all religious persuasions, with the assurance of perfect toleration. The state of this town made the terms valuable, and the town, accordingly soon attained considerable importance. A variety of sects now live together in harmony. The most interesting establishment of all is that of the Moravian brethren who here amount to about 400 individuals. They have excellent schools which are attended by many English children. Pop. (1846) 6885.

NEUZEID *Neu-Neu-Neu*, a N. Holland, prov Zealand, 15 m S. E. Middleburg. It is strongly fortified and has a townhouse, two churches a school, bomb-proof arsenal, barracks and magazines, an hospital, and two watch-houses. Agriculture, retail trade, and shipping are the chief sources of employment. Pop. 1178.

NEUZINA, a vil Hungary Thutth Thamus, co. Torontal on the Theiss, with a church. Pop. 2398.

NLYA a river Russia, which rises from the S W extremity of Lake Ladoga, at Solbushburg, flows first S W, then N W, and traversing the city of St. Petersburg, where it divides itself into several branches, and forms various islands, falls, by several mouths, into the Gulf of Finland. Its whole course is only about 40 m. but it is very wide, has a depth varying from 3 to 5 fathoms, and, as forming part of the great water thoroughfare of the empire, is of vast commercial importance. It is liable, particularly at the breaking up of the ice towards the end of April to sudden inundations, which often lay the greater part of St. Petersburg under water and have repeatedly proved most disastrous.

NEYADA (Neyada).—1 A mountain-range, Spain, extending from Pailin, 19 m. S. Granada to the frontiers of that part of Murcia now forming the province of Almería. Here it joins the Sierra of Baza, which afterwards under the name of Filabres, runs out into small ramifications near the Mediterranean. It receives its name from the perpetual snow which covers its summits among which the most elevated are those of Malabacra, 11,878 ft., and Yelita, 11,878 ft. This Sierra is composed of foliaceous granite, schistose gneiss, mica slate, quartz, and hornblende and, on the N side, there is a large bed of fine hornblende. Iron, asbestos, and there are several mines in operation in the neighbourhood of Granada, near which are also found zinc, argentiferous lead, and antimony. Copper is also found. The principal streams which derive their origin from this chain are the Guadalquivir, Utiar, Genil, Dílar, Monachil, and Darro. From E. to W, the Sierra

Myra, extends 60 to 70 m., and 55 to 40 m. N to S.—A mountain range, U States, America, stretching through California from S to N for above 600 m., between lat. 34 and 43° N and forming part of the immense chain, which, under different names, extends almost without interruption, from the peninsula of California to Eastern America. Among its most remarkable features are several grand volcanic peaks, which reach high into the regions of perpetual snow, and have altitudes varying from 10,000 to 17,000 ft. above the sea. The E. side bounds the vast and inhospitable desert of Utah, while the W bounds the long and beautiful valley, which is traversed from S to N by the San Joaquin, and from N to S by the Sacramento, and has recently attracted universal attention by the richness of its auriferous deposits. These deposits must have had their original seat within the range, and numerous indications of them are found in the quartz veins, by which its other rocks are traversed. The only other mineral of value, yet discovered in the sierra, is quicksilver. The loftier peaks are, of course, destitute of vegetation; but both the plateaus, from which they rise, and their lower slopes, are generally covered with magnificent forests. Still lower down, towards the valley, the surface becomes almost clear of timber, the soil is of great fertility, and all the productions of an Italian climate are obtained in abundance.—A branch of the Colombian Andes New Granada, dep. Magdalena, prov. Sta. Maria, which attains a height of about 17,000 ft.

NEVEL, or NEVEL, a village, in Russia, gov and 60 m. N Vitebsk, on a small lake of same name, at the mouth of the Esmecha, with six churches and a synagogue. P (1851) 4456.

NEVELLE, a village and coal-mining prov. E. Flanders, 7 m. W Ghent with a church, chapel and two schools. Inhabitants engaged in weaving and agriculture. Pop. 3669.

NEVEDON, par Eng. Essex, 991 ac. Pop. 189.

NEVERA, a village and par. Wales, co. Pembroke, beautifully situated near Newport Bay, 8 m. W Newport. It has a very ancient Norman church with some interesting inscriptions, Baptist, Independent and Calvinistic Methodist chapels, and a day and several Sunday schools. Area 14 537 ac.

Pop. 1649.

NEVES (Latin Augustonensis), a town in France, cap. Nivernais, built on a hill, at the confluence of the Nivère 153 m. S.E.E. Paris. It is built in the form of an amphitheatre, on the slope of a hill, and has a very picturesque appearance when viewed across the river. Its interior however is by no means prepossessing, its streets being narrow and irregular, and very dirty. It is the see of a bishop, and has a cathedral, a somewhat heavy building the church of St. Etienne, in the Romanesque style is an old castle, now used by the courts of justice. A Hotel de Ville, formerly the residence of the dukes of Nevers in the Flamboyant style, a college, founded in 1525 public library barracks, and prefecture, a court of first resort and commerce a cotton spinning chamber of manufactures, a central society of agriculture, science, and art a diocesan seminary, secondary ecclesiastical school, and communal college, manufactures of coarse woollens, metal buttons, and other articles in metal, violins strings, articles in beads, vinegar, glass, and candles, numerous potteries, producing ware which has been famed for many centuries bottle-works, breweries, numerous ropewalks, machine-works and an extensive shell industry, at which, in addition to other earnings, about 275 pieces of ordnance are annually made. The trade includes most of the above manufactures, and also timber wine, salt, &c. P (1857) 14,327.

NEVIANO-CONTE-ASTORI, a village and com., duchy and 16 m. S. by E. Parma, on a lofty hill with a trade in chestnuts, cattle, wool, and sheep. P 3609.

NEVIGES, a village, France, gov. and E. Düsseldorf, with three churches, and manufactures of woollen and linen stuffs, alum, and blue vitriol. Pop. 1385.

NEVILL (Dover), a small town, British N. America, N. Gulf of Georgia, lat. 55° 57' N. lon. 123° W. about 7 m. W of the W end of Hecate's Island. Its entrance is about 3 m. wide, and it penetrates about 8 m. into the land. In its centre, at the entrance, the water is only 4 fathoms but increases to 5, 6, and 7 fathoms, affording good anchorage, and a very commodious and well-sheltered port.

NEVIN or NEVIN, a market town and par. Wales, co. and 20 m. S.W. Carmarthen, on Nevin River. It is very beautifully built; has a neat, plain, parish church, several Dissent-

ing chapels; a national and five Sunday schools; and some trade in agricultural produce with Liverpool, with which a communication is kept up by steam-packets. Pop. 1344.

NEVIS (Italian, Lame), a town in Austria, Tyrol, about 10 miles from the Ahr. The white sulphur is extremely cultivated here to feed silk-worms. Pop. 1968.

NEVIS, a small island, British W. Indies, one of the Leeward group off S.W. extremity of St. Kitts, from which it is separated by a narrow channel 2 m. broad, full of shoals, and navigable only by small boats, lat. 17° 14' N; lon. 63° 8' W. It consists almost entirely of one single conical mountain, of volcanic origin, rising with a gentle ascent from the sea to a height of 2500 ft., surrounded at the base by a level border of extremely fertile and highly cultivated land. The whole island is about 24 m. in circumference area, 24,640 ac.; of which about 6000 ac. are capable of cultivation, the high parts being rocky and barren. The climate has the reputation of being fully as healthy as the average of the W. Indies, but instances have occurred which would render this questionable. The exports are sugar, molasses, and rum. The island is governed by a lieutenant-governor, who is assisted by an executive and legislative council and a house of assembly. Nevis is divided into five parishes and contains six Protestant churches, three Dissenting places of worship, eleven public and private church schools, and seven Wesleyan. Banishment is said to be advancing satisfactorily. The seat of government is at Charlestown, the principal town in the island, near its S.W. extremity. It lies along the shore of a wide cove, having on its eastern side some good public buildings, and a good roadstead. Nevis was first colonized by the English, in 1628. Columbus is said to have given the present name to the island from the mountain of Nevis in Spain. P 10200.

N. W. ABBEY, a village and par. Scotland, stewartry Kirkcubright, on the Fow near its junction with the Nith, 7 m. S. S.W. Dumfries. It has a number of good houses an ancient parish church, a R. Catholic chapel, several schools, and the beautiful remains of a Cistercian abbey. On a hill near it is a granite column, 40 ft. high, intended to commemorate the victory of Waterloo. Extent of par., 8 m. by 2½ m. 1 1098.

N. W. ALBANY, a city, U States, N. York, on the bank of the Hudson, lat. 42° 20' N. lon. 73° 50' W. It is the largest place in the state, and is regularly laid-out, has numerous public buildings, including a courthouse, jail, and nine churches; several schools, a lyceum, a theological college, and extensive ship-building yards. Pop. (1840) 4225 (1850) 9785.

NEW BEDFORD, a town, U States, Massachusetts, on a slope, rising rapidly from a bank Ansonia, which is here crossed by a bridge and falls, about 4 m. below, into Buzzard's Bay, 52 m. S. by E. Boston. It presents a commanding and beautiful appearance, is well built, containing many elegant buildings and has a large and handsome townhall, of granite, a commodious custom-house, also of granite a courthouse, several handsome churches, a library a Friends academy, and several other schools. The manufactures consist chiefly of oil and candles, cordage, articles of cooperage, Prussian blue, &c. Ship-building is also carried on to a great extent and the trade, greatly facilitated by a spacious, safe, and deep harbour, is very important. By far the most important part of it is connected with the whale fisheries, in which New Bedford holds so prominent a place, that about one-third of the whole tonnage of the U States, engaged in these fisheries, belongs to its port. In 1850, the total tonnage of the district was 127,960 and the number of vessels which entered and cleared at the port was, respectively 118 (82,637 tons), and 124 (83,154 tons). Pop. (1850) 7592, (1850) 16,464.

NEW BRITAIN, a British colony (New)

NEW BRUNSWICK, a British colonial territory E. coast of N. America, lat. 40° 5' to 45° 40' N, lon. 65° 50' to 65° W, bounded, W. by the State of Maine, N. W. by Lower Canada, from which it is separated by the river Saguenay; N. by Chaleur Bay; E. Gulf of St. Lawrence and New Brunswick Strait, the latter separating it from Prince Edward's Island, and S. the Bay of Fundy and part of Nova Scotia; length, N to S, 215 m., breadth, 190 m.; area, 25,000 sq. m. or about the same extent as the mainland of Scotland. Its coast-line is about 500 m. in length interrupted only at the point of junction with Nova Scotia, where an isthmus of not more than 10 m. in breadth connects the two territories, and separates the waters of Northumberland Strait from those

of the Bay of Fundy, and which it is proposed to unite by means of a canal. The most remarkable bays and harbours are Baillart Bay, on the N coast Miramichi Bay on the E coast Passumpsquoddy Bay, and St. John Harbour on the S coast. There are, besides these larger indentations, numerous smaller harbours, particularly on the S portion of the E coast.

The general surface of the country presents a series of bold undulations, sometimes rising into mountains or continuous ridges of high land. The latter are seldom of any considerable height but their precipitous acclivities, sharp outlines, and deep ravines give them an alpine and picturesque character, that finely and strikingly contrasts with the rich valleys and sheltered plains which alternate with the more rugged scenery.

The shores of the Gulf of St. Lawrence and Northumberland Strait, however, present different and far less pleasing features. There the land, for about 12 m. inland, is low and sandy covered with trees of a stunted growth, and skirted with extensive marshes large deep meadows, and long sand beaches. New Brunswick is watered by numerous rivers, the principal of which is the St. John (which see), navigable for vessels of 40 tons to Fredericton. The next river in importance, is the Miramichi, which rises near the W limits of the territory, whence it flows N E, and falls into Miramichi Bay, on the E coast, about lat. 47° 5' N, lon. 64° 53' W, its whole course is upwards of 110 m. It is navigable for nearly 40 m., and admits vessels of 500 or 700 tons. The Restigouche is the next considerable river. It forms the S W limit of the province, and falls into the head of Chaleur Bay after a course of about 100 m. There are a number of small lakes in New Brunswick, particularly in the N part of the country but none of any considerable size. In the S, there are a few somewhat larger than the most important of which are Grand Lake, 20 m. long by about 5 m. broad and Washademoak Lake, about 30 m. long by 2 m. broad, both lying between St. John and Fredericton. Along the shores of Chaleur Bay and the Gulf of St. Lawrence, gray sandstone and gray clay slate predominate, with detached rocks of granite, quartz, and ironstone on the S coast, limestone graywacke, clay slate, with sandstone, interrupted occasionally by gneiss, trap, and granite. Specimens of amethyst, carnelian, Jasper &c. have been picked up in various places. Coal is plentiful, and more abundant, the former is said to extend over 10 000 sq. m., or above one-third part of the whole area of the province. Copper and manganese also abound. A large deposit of the former has been discovered on the banks of the Nepigon river which falls into Baillart Bay and another of plumbago, within ½ m. of St. John. The supply of the latter is said to be inexhaustible, the surface of the earth being, for 2 m. coated with it. Gypsum limestone, freestone, and granulations abound. Salt springs, strongly saturated, are numerous and some sulphureous springs have also been discovered. The climate of New Brunswick, like other portions of the N American continent, is subject to the extremes of heat and cold, the thermometer sometimes rising to 100° Fahr. during the day and falling in the forest, during the night of the same day, to 50°. The severest cold of the winter usually continues from December 21 to March 21. The prevailing summer winds are from the W S W and S, when from the S W, dense fogs are often produced on the shores of the Bay of Fundy, and stretch 1½ m. to 20 m. inland. In the interior, the climate is said to have been greatly ameliorated, in consequence of the clearing away of the forests, by which the sun's rays are permitted to reach the surface of the earth, where the heat thus absorbed is again diffused by radiation. It is stated, as a result of this process, that the winters are reduced to nearly half their former duration. The climate is, on the whole healthy, and the autumn, as in other parts of the N American continent, is a season of exceeding beauty, the air being dry and clear, and the woods glowing with innumerable tints of the richest and most brilliant hues.

The chief vegetable product of New Brunswick is timber, of which there is the usual variety found in N American forests but the pine is the chief timber exported. Indian corn is grown in the S. parts of the province. Rye, wheat, and other cereals, and good potatoes are raised. The wheat of New Brunswick is of the very best quality, and is said

to be much heavier than that of the U States. Turbidity cultivation has been introduced, of late years, with great success. The great extent of its coast, with its numerous deep bays, coves, and inlets, affords great scope for the pursuit of the fishing trade, which has not, however been pursued with the vigour its importance merits the colonists having, in this respect, allowed themselves to be outstripped by the fishermen of the U States, whose vessels, employed in the deep-sea fishing, greatly exceed in number those belonging to the inhabitants of New Brunswick. Ship-building is carried on to a considerable extent, chiefly at St. John. The principal articles of export are fish, iron, salt, salt-water, dials, lanterns, planks, boards, shingles, staves, timber, and other sorts of wood, amounting in 1863 to £208 440 of which £229,298 were timber. Imports best pork, beer, ale, books, brass and copper manufactures, bread, biscuit, cider, coffee, copper, cutlery, corn, grain, wheat, flour, Indian and other meal, cotton, linen, silk, and other manufactures, earthenware, fishing tackle, glassware, gunpowder, haberdashery, hardware, hemp, hides, iron, leather, medicines, oil, muscadine, paint, paper, colours, rice, soap, rum, spirits, sugar, tallow, tea, snuff, to bacco, wines, &c., to the amount, in 1863 of £1,291 604 of which £260 704 were for British textile fabrics, and £28 907 for British iron.

The chief part of the inhabitants of New Brunswick are British settlers, and their descendants. There are a few inhabitants of French stock who are principally settled on the Bay of Chaleur, and there is a small number of Micmacs, Malisees, and other Indians in the N part of the province. New Brunswick is divided into 13 counties in each of which are several schools—grammar and parish. The Church of England the Established and Free churches of Scotland, Reformed Presbyterians, Wesleyan Methodist, Baptist, Congregationalist, and R. Catholic churches, are all more or less extensively represented. The affairs of the province are administered by a Lieutenant-governor aided by an executive council consisting of eight members, a legislative council of 17 members and a house of assembly of 39 representatives of the people. The judicial department comprises a supreme court, with a chief and three puisne judges, a court of chancery, one of marriage and divorce, and one for the trial of offences committed at sea, over these three courts the lieutenant-governor presides. New Brunswick was first settled by the French in 1639 and it continued, along with Nova Scotia, to form part of Acadia or New France, till it fell into the hands of the British, after the conquest of Quebec. The first British settlement in New Brunswick, was founded at Miramichi, in 1764 and, in 1784, New Brunswick was separated from Nova Scotia, and formed into a distinct province. In 1826, the standing timber in the district around Miramichi Bay took fire and enveloped an area of 9000 sq. m. in flames, consuming four thriving towns, many large vessels lying in Miramichi river and destroying 500 human beings. Pop. (1861) 282 047.

NEW BRUNSWICK, a N U States, New Jersey on the Maritime which here becomes navigable, the Delaware and Raritan rivers, and the New Jersey railroad 39 m. S W New York. It consists of an older portion situated on a flat along the bank of the river and composed of narrow, crooked streets, and of a more modern portion, occupying a declivity, regularly and sparsely built, and presenting a handsome appearance, many of the houses being surrounded with gardens, and commanding beautiful views. The principal buildings are Rutgers college, possessed of a library of 10,000 volumes, and attended by about 60 students the theological seminary of the Dutch Reformed Church, with a library of 7000 volumes, and 34 students; nine churches, several schools, a court-house, and jail. The manufacturing establishments include several large factories and the trade of the port, which admits vessels of 100 tons, is considerable. Pop. (1830) 7381 (1850) 15,587.

NEW CALEDONIA, see CALEDONIA (New)

NEW ENGLAND, the name commonly given to the N E portion of the U States, comprising the states of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut.

NEW GALLOWAY, Scotland. See GALLOWAY (New)

NEW GRANADA, S America. See GRANADA (New)

NEW GUINEA, in the Pacific Ocean. See PAPUA.

NEW HAMPSHIRE, U. States. See HAMPSHIRE (New).
NEW HAVEN, an Isl., S. Pacific Ocean, near lat. 3° 50' S., and lon. 150° E., to the N. W. of Pagan, and separated from New Ireland, on the E., by a narrow channel. It is still very imperfectly known, but, according to Thomson, stretches, W. to E., for about 80 m. The surface is elevated, and well covered with trees.

NEW HAMPSHIRE, a tract of territory, W. coast, British America, belonging to the Hudson's Bay Company, lat. 50° 30' to 60° N.; and bounded, N. by the Russian possessions, and S. Vancouver's Island. The coast is lined by an immense collection of islands, of all shapes and dimensions, and penetrated by arms of the sea, and deep creeks, so as to form a complete chain of island navigation. The Bebrine Ness, and Skikine, are the only streams of any navigable importance, though they can only be ascended to a short distance, and not without considerable difficulty and danger. The prevalence of W. winds makes the climate at once extremely moist and mild, so that, even in the coldest months, the natives use very little clothing. They subsist chiefly by fishing, but also considerable indications for agriculture, and, being of more sedentary habits than the Indians E. of the mountains, have made more progress in some of the rudimentary arts. One remarkable feature in their social system, is the prevalence of slavery. About one-third of the whole native population are in this degraded state, being either prisoners taken in war or their descendants. They are as much their masters' property as dogs, and being treated accordingly, are in the most helpless and abject condition.

NEW HAVEN, a seaport in U. States, one of the caps. of Connecticut, on a bay of same name in Long Island Sound, 72 m. N. E. New York, on the railway to Boston lat. 41° 18' 33" N. lon. 72° 56' 45" W. It occupies a large and beautiful plain, sloping gently toward the shore, and surrounded, on three sides, by spurs of the Green Mountain range. It is very regularly built, has spacious streets, a central square, almost all lined with noble elms, and a beautiful public park, finely planted. Among its public buildings are 23 churches, many of them handsome; a Jewish synagogue, a large and imposing statehouse. Yale college, occupying a large range of buildings, with a handsome front towards the park, attended by about 422 students in theology, law, medicine, and science, and possessed of a library of 51,000 volumes, a valuable museum, picture gallery, and other collections; two lyceums and various other superior seminaries of education; a state hospital and a beautiful cemetery. The manufactures consist chiefly of carriages, clocks, leather hardware, and cutlery machinery, &c. and the trade, both coasting and foreign, is very extensive. Unfortunately the harbour, though spacious, is shallow, and gradually filling up, but the evil has been so far remedied by the construction of a long wharf, which, to obtain deep water has been carried out nearly 1 m. In 1850 the total tonnage of the district was 15,781 tons. Above two-thirds of the vessels are coasters. Pop. (1850) 16,180 (1850), 22,589.

NEW HOLLAND See AUSTRALIA.

NEW JERSEY, U. States See JERSEY (New).
NEW LISBON, a vil. U. States, Ohio, N. side of the Middle Fork of the Little Beaver and on the Steady and Beaver canal, lat. 40° 45' N. lon. 80° 40' W. It has a courthouse, N. jail and six churches, and near it are various mills, and other factories. Pop. 8000.

NEW LONDON, a city, U. States, Connecticut, on the Thames, 8 m. from its entrance into Long Island Sound 42 m. E. N. E. New Haven, lat. 41° 22' N. lon. 73° 6' W. It is situated on a declivity; is in general, very indifferently built; but some of the recently-erected houses are sufficiently handsome. It contains the county buildings, several places of public worship, and is connected with New York by a daily line of steamers. The harbour, which is the best in the state, and one of the best in the Union, has a depth of 30 ft., and is safe and commodious, it is defended by two forts; and there is a lighthouse, on a projecting point of land, which divides the harbour from Long Island Sound, 3 m. below the city. The foreign trade of New London is chiefly with the W. Indies, and its coasting trade with the S. States. The fisheries, and especially the whale fishery employ a great number of the inhabitants. Pop. (1840) 5619; (1850) 9006.

NEW MEXICO, U. States. See MEXICO (New).

NEW MEXICO, a vil. and township, England, co. Dorset, on bank Grey, 8 m. E. S. E. of Bokerly. It consists principally of a cluster of houses and factories, which rise, even the brink of the river, to the height of several hundred feet, and extend along the crags and the turnpike road, and has a handsome district church, in the pointed style. Primitive and Wesleyan Methodist, Independent, and E. Catholic chapels, several schools; manufacturers of glass and printed cotton goods; blacking-work coal and lead mines. Pop. 4868.

NEW MOAT par. Wake, Farnborough 5161 m. P. 232.

NEW ORLEANS, a city and port, U. States, Louisiana, L. bank and delta of the Mississippi, 190 m. above its mouth, in the Gulf of Mexico, 5 m. S. Lake Pontchartrain, with which it communicates both by water and railway and 980 m. S. W. Washington lat. 29° 57' 30" N.; lon. 90° W. Its position giving it the command of the traffic of one of the largest and most fertile river basins in the world, naturally marks it out as a great commercial emporium, but in several other respects subjects it to serious disadvantages. The alluvial flat on which it stands is a mere swamp, so low that it is never more than 9 ft. above, and is usually several feet below the level of the river, from the inundations of which it is only saved by a strong embankment, which follows the windings of the stream for a distance of about 163 m. This embankment, known by the name of the levee, has an average width of about 100 ft. where it fronts the town, which stretches parallel to it for about 5 m., and extends from 1 m. to 3 m. behind it, chiefly in the direction of the lake. The river immediately opposite has a width of 3 m. and a depth of 100 ft. to 160 ft., and sweeping round from the W. first in a N. and then in a N. E. direction, forms a large crescent-shaped curve. The original nucleus of the town situated near the centre of the crescent, is built in the form of a parallelogram, and consists for the most part of narrow streets, lined by houses partly of wood and partly of brick, stuccoed over and ornamented with corbelled balustrades, and balconies, indicating the French and Spanish origin of the settlers who constructed them. St. Charles, in which no regular plan appears to have been observed extend around this nucleus, but in some of the more modern quarters a better style of building has been adopted, and many of the streets are spacious, regular and handsome. The public squares six in number, constitute one of the most attractive features of the town, affording, in their well planted and tastefully laid-out interior fine shady walks. The shelter which, elsewhere a luxury is here justly considered one of the necessities of life, is not confined to the squares. Several of the streets have planted avenues, and many of the houses have courts or garden plots attached to them, tastefully adorned with trees, shrubs, and flowers.

The public buildings are neither numerous nor very remarkable, and the churches in particular are said to fall far short of the wants of the community. Those of the E. Catholics, who form the great bulk of the population, are 19 in number. The only one particularly deserving of notice, is the cathedral, a large and imposing structure, situated on one side of the Place d'Armes, near the centre of the levee. The Protestant Episcopal churches, three in number, are substantial edifices. Of the churches of other denominations, notice is due to the Methodist church, on the square of Poydras and Carondelet Streets, modelled after the temple of Theseus, at Athens, with the somewhat incongruous addition of a steeple 170 ft. high; and the Second Presbyterian church in Lafayette Square, a handsome structure, with a fine Doric portico. The educational establishments are said to be simple, but are understood to be neither so extensive nor so efficient as those of the larger towns of New England. Besides the public schools and academies, there are several collegiate institutions, and, more especially a university, which was founded in 1849, occupies an extensive central edifice, with two detached wings; and has a complete equipment of professors, medical, legal and academic. Other important public buildings and establishments are a branch U. States' mint, which has extensive buildings on the esplanade, and in 1851 costed gold to the amount of \$6,964,000 (\$1,798,800, almost all from California); the custom-house, which is (1855) in course of erection, from Quincy granite, and proposed to be, when completed, a principal ornament of the city as it will certainly be one of the most expensive buildings in the

Union, being intended, in addition to the use to which it is specially appropriated, to provide apartments for the U. S. State courts, and other accommodations for the general government; the old Spanish government-house, in an elegant style, of which the U. States seldom afford a specimen; the oblique hospital, for which the rather curious pro-cum-ness is claimed of being the greatest fever hospital in the world; the old and new arsenals, the courthouse and jail. Other buildings, not usually classed as public, though well deserving of notice, are the banks and hotels; the latter especially which are on a scale of almost unparalleled magnificence. The St. Charles, the most splendid of these establishments, whose lofty dome formed one of the most conspicuous objects of the town, and was the station from which the best panoramic view of it could be obtained, having been burned down in 1850, is again rising in renewed splendour, at an estimated cost of \$150,000. The cemeteries, too, both from their extent and peculiarity of structure must not be left unnoticed. The soil being completely saturated with moisture, burial underground is never attempted except in the Potter's Field, appropriated as the final resting place of poor and friendless strangers, whose remains, after being there deposited in a pool of water are not infrequently swollen by it, so as to be forced out of their narrow cells, and left to moulder on the surface under the open sky. To avoid similar destruction, the Protestant and St. Catharine cemeteries consist of vaults, with arched openings, in which the bodies are arranged above each other, tier upon tier, to the height of 13 ft. like the bins of a miller. The ground enclosed is divided into plots, intersected by gravel walks, and densely covered with tombs. It thus forms a true city of the dead, but the lesson of mortality which it is so well fitted to impress, seems almost lost on the living masses around, and there is no city of the Union where pleasure is pursued so eagerly and in more questionable forms. Besides the amusements afforded by the theatres—the St. Charles, the Orleans or French, and the American, which furnish accommodation to 4500 persons, and are nightly filled to suffocation—werea cavetto abound in every quarter, the gaming-table is in constant request, and much of the Sunday is devoted to bear-fights and bull baiting.

The manufacturing establishments of New Orleans are of limited extent, and may be summed up under the heads of furnaces and foundries, machine-shops, distilleries, sugar-refineries, saw-mills, and tobacco-factories. The trade, though it can hardly be said to have passed its infancy is already vast and is advancing with a rapidity to which it is impossible to assign any limits, as it must evidently keep pace with the development of the resources of the Mississippi basin. The chief obstacle to its increased prosperity are the ravages of fever which recur annually during the months of July, August, and September, when all who have the means leave the city causing an almost complete interruption of business during those three months the want of an adequate system of railways, and the bar at the mouth of the river which had 25 ft. water in 1773, and has now not more than 13 ft. The first obstacle, perhaps the most formidable of all, may be, and indeed has been, considerably modified by drainage, the second has been manfully grappled with, and the railway system, carried out with the spirit with which it has been commenced, promises to bring back much of the trade which had begun to find its way, by longer but easier routes to the ports of the Atlantic, the third has only begun to attract attention, having, in fact, proved less prejudicial than might have been anticipated, in consequence of the general introduction of steam navigation. The immense extent of the trade becomes visible by a single glance at the *Levee*, where forests of masts, often three tiers deep, are seen lining the wharf for more than 2 m., and crowds of flat bottomed boats are seen lying along the sliver banks or *batture*, after having covered the quay, or filled the warehouses with the produce of twenty 30,000 m. of navigation. In the year ending Sept. 1852, the total value of products received from the interior was \$108,651,708 (\$21,610,343), against \$108,924,088 (\$21,384,817) of the previous year. In 1853-4 it was \$79,235,585, and consisted chiefly of

Cotton	bales	181,644	Onion	smoke	82,569

Vol. II.

From 2,255 448 bales in 1859-60, the receipts of cotton at New Orleans sank to 23 078 bales in 1862-3 and the price rose from 3c per lb in 1855-6 to 85c. in 1868-4.

New Orleans was founded by the French in 1717, and named after the duke, then regent of France. It was shortly after abandoned, but having been again settled in 1722, began to prosper. By treaty in 1763, it was ceded to Spain, along with all Louisiana W. of the Mississippi and, notwithstanding the change, and considerable opposition to it manifested by the inhabitants, continued to make good progress. In 1801, Bonaparte, among the other concessions extracted from Spain insisted on that of Louisiana, but had no sooner obtained it than he was satisfied that he could not retain the possession, and endeavoured to make the most of the acquisition by selling it to the U. States. At this time (1803) its population was 8000. In 1804, it was made a port of entry, and in 1805, was incorporated. It afterwards became the capital of Louisiana, but was deprived of that honour in 1849. The most important event in its more recent history is the attempt made upon it, in 1815, by the British, under Sir E. Pakenham, and their defeat by the American troops, under General Jackson. Pop (1850) 119 461 (1860) 188 676

NEW PHILIPPINES. See CAROLINE ISLANDS.
NEW PLYMOUTH, a settlement, New Zealand. See PLYMOUTH (New)

NEW PROVIDENCE, the most important of the Bahamas, between Eleuthera and Andros, lat. 25° 58' N., lon. 77° 51' 15" W. (a). It is 17 m. long, E to W, greatest breadth which is in the middle, 7 m. It is mostly flat, and covered with brushwood and extensive lagoons. A range of hilly rocks runs along part of the island, at a very short distance from the sea, E. and W. Another ridge, called the Blue Hills, runs in a direction nearly parallel with the former, and about 2½ m. distance. On the N. side of the island is the harbour and town of Nassau, the former nearly land locked, fit for vessels drawing 12 ft. or 15 ft. water, and sheltered on the S. by Hog Island. The town, which extends over a rather steep acclivity, is well laid out, the streets spacious and airy and the houses handsome. It is the seat of government of the Bahamas and has a considerable trade; the principal exports being cotton, pimento, and salt, for which it receives lumber from New Brunswick, and British manufactures from England. The Americans bring lumber and provisions, and the Spaniards dollars. The British take off the cotton and dye-woods of the island, and the Spanish money the Americans, salt and wreck goods and the Spaniards, British manufactures. Up to, 5000 New Providence was colonized by the English in 1629, but they were expelled by the Spaniards in 1641. It subsequently fell again into the hands of the English, and was again taken by the Spaniards, but was eventually restored to the former at the peace of 1763.

NEW QUAY, a small export, Wales, co. and on the Bay of Cardigan 15 m. W. N. W. Lampeter. It is inhabited chiefly by seafaring persons and has a harbour which affords good anchorage to small, and might easily be improved so as to admit large vessels, a valuable property, and an annual fair. About 100 vessels, of 40 to 50 tons, belong to the port.

NEW SOUTH SHETLAND. See SHETLAND (New South)

NEW SOUTH WALES, a colony of Great Britain, forming the whole of the S. E. part of Australia, stretching along the S. Pacific Ocean, from Hervey Bay in lat. 26°, to Cape Howe, lat. 37° 51' S. and W. with varying breadth to lat. 146° E. length, N to S above 1000 m. breadth, above 500 m. area, roughly estimated, 500 000 sq. m. This immense territory is at present divided into 48 counties, and sundry unincorporated districts. The latter are scarcely to be said to be at all occupied, and even of the former not more than 20, extending from lat. 32° to 36° S., and lon. 146° 38' E., can be considered regularly settled. The surface is much diversified, and presents in its general features, a succession of hills and valleys, mountains and plains. A mountain range, varying in height from 3000 ft. to 6000 ft., extends from N. to S. nearly parallel to the coast, at the distance of from 80 m. to 50 m. inland, and takes, in the N., the name of Liverpool Range, in the centre, that of the Blue Mountains; and in the S. that of the Australian Alps. The intervening spaces between the mountains and the sea is partly broken by spurs and reman-

ations, but descends from the W with more or less rapidity, and has a generally undulating surface, intersected by water-courses. In some places well wooded, and in others covered with dense brushwood.

The coast-line proceeds, in general bold perpendicular cliffs of sandstone, in horizontal strata. Occasionally the cliffs are interrupted by low sandy beaches, some of which stretch to a considerable distance inland and appear to have been covered by the sea at no very remote period. The indentations of the coast are more remarkable for their number, and the excellent harbours which they form, than for the space which they occupy. Harvey Bay in the N, the far largest, is scarcely within the limits of the colony. Next to it is Norwest Bay formed between the mainland and Moreton and Stradbroke, the two largest islands of the colony. Five degrees latitude, proceeding from N to S, are now passed over without meeting with any remarkable opening; but immediately thereafter, beginning at Port Stephens, a succession of noble natural harbours occurs, some of them already forming and the greater part of them destined sooner or later to become great commercial emporiums. The most conspicuous are Port Hunter, Port Macquarie, Broken Bay, Port Jackson, Botany Bay, Jervis Bay, Bassett Harbour, and Tirohiti Bay. The mountain ranges already described form the great water-shed of the colony, but the ground on the W., instead of descending rapidly, continues rugged and mountainous for a considerable width, and at last assumes the form of an elevated plateau, the greater part of which remains unexplored. Several considerable rivers, taking their rise in the W side of the mountains, are seen flowing westward, but having only the early part of their course in the colony of New South Wales do not properly belong to it. From S. to N. the most important are the Macintyre and its tributary, the Lachlan, which both join the Murray; the Bogan, Macquarie, and Peel, apparently affluents of the Darling and the Condamine, which, though at first seen flowing N. afterwards winds round to the W. and probably belongs also to the Darling. The comparatively narrow space intervening between the mountains and the Pacific, leaves little room for the development of large rivers. Many of them are, for a great part of the year, either altogether dry or form in fact, rather a succession of deep pools or water-holes than continuous streams. The most deserving notice for their length or their locality are the Hunter, which falls into the sea part of that name at Newcastle, and is navigable for 50 m. above its mouth by small craft of 80 to 40 tons; the Hawkesbury, which falls into Broken Bay and is navigable by vessels of 100 tons, as far as Windsor a distance of 140 m., the Parramatta, important only as giving a navigable communication into Sydney Cove, the George, which has its mouth in Botany Bay and is navigable by small vessels to Liverpool, a distance of 24 m.; the Shoalhaven navigable for 20 m. for vessels of 70 to 80 tons; the Clyde, which falls into Macquarie Bay; the 25° 45' S., and is described as a fine, clear, open-water river with 9 ft. water on the bar, and a depth within of 7 fathoms; and in the N., the Hastings, which falls into Port Macquarie after a course of about 100 m., and the Clarence, which falls into Shoal Bay lat. 29° 30' S., a remarkable for its great breadth and large volume of water compared with most Australian streams, and navigable for large steamers for a considerable distance, and by small craft for nearly 90 m.

Geology and Minerals.—As a general rule, the prevailing rock on the E. side of the mountain is sandstone, and on the W. granite. Above the granite, quartz and gneiss are seen forming their way to the surface and outcropping them; greenstone and porphyry often form lofty summits. Hence on Mount Kosciuszko in the S.W. granite forms a base 3000 ft. above sea-level while quartzite and quartz stain an additional height of 4500 ft., making the whole elevation of this mountain, which seems to be the culminating point of the chain, 6500 ft. On the same mountain, mica schist, and chlorite and argillaceous slates are seen heaved up into a position almost vertical, while in other places the strata, though evidently upheaved, remain nearly horizontal. In the N., where the whole follows the name of the Liverpool Range, greenstone is seen rising itself in here and there peaks to the height of 4700 ft. Further S., at Cullumbullin, lat. 28° 20' S., the chain becomes granite, but slopes off towards the E. a very remarkable break in the

which has thrown the sedimentary rocks into the wildest confusion, and produced frightful rents and gorges; through one of which, forming a perpendicular wall of sandstone nearly 1500 ft. in height, the Ganges flows its way. It is remarkable, that, notwithstanding the numerous indications of tremendous volcanic agency in almost every mountain district, no active volcano is known to exist in New South Wales, unless we are to give the name to the very extraordinary phenomena exhibited by Mount Wigan, situated near the sources of Hunter's river. It consists of a mass of sandstone, from 1400 ft. to 1500 ft. high, and since 1816, when it was first discovered, and probably from a much earlier period, has been in a state of active ignition, kept up by the spontaneous combustion of some unaccounted quantity of fuel within. In connection with the granite, limestone, both granular and foliated, occurs in abundance, and besides being often hollowed out into stalactitical caverns, sometimes passes into a beautiful close-grained marble, as white as that of Carrara. This Horn stone is most extensively developed on the Upper and Lower Hunter and between Wellington and Mount Canobolas. In some places it becomes of a jet-black colour, traversed by white veins and at others, becomes finely variegated. Much of the sandstone belongs to the carboniferous system, and is accompanied with workable seams of excellent coal. One field, to which the name of Newcastle has been appropriately given, is said to vie in quality with that which has made the English Newcastle so famous, and contains no fewer than five seams—two of 5 ft. and three of 3 ft. in thickness. This field is actually worked to some extent by the Australian Agricultural Company. Other fields, equally valuable, are known or believed on good grounds to exist and moreover, give indications of containing abundance of iron-ore, which may yet be turned to good account. Copper-ore of the richest quality has been found in such abundance, that the veins are believed to extend in every direction over many miles of the Wellington districts, and one high hill presents indications of being one solid mass of metal. Numerous varieties of fine pebbles are found in many districts, and are so abundant in Hunter's river that it is said to flow for a considerable distance over rocks of jasper, beautiful agates, opal, and chalcidony. All these minerals, however, though valuable, have recently been thrown into the shade by the discovery (May, 1851) of extensive deposits, which from the great number of places in which gold has already been discovered, indicate its existence, in greater or less quantities, over the whole colony—in the S. the centre, and the N. In the S. not far from the frontiers of Victoria, a cluster of localities occurs, particularly in the Wollstone and Wallace, including among those of the latter, that of the E. base of Mount Kosciuszko. Proceeding N. we meet with it in the Beresford Damper, St. Vincent Argyle, King, Murray and Cawley towards the centre, it occurs in the Georgiana and Ashburton, and more especially over a tract which appears to stretch almost continuously from the N. of the latter to the south of Wellington, where it is found chiefly along the banks of the Macquarie and its tributary, Macao. A considerable blank now occurs, owing perhaps not so much to the non-existence of the metal as to the imperfection of the search which has been made for it, but on reaching the sources of the Peel River, on the frontiers of Brisbane, a large surface tract occurs, chiefly along the banks of that river and its tributaries, in the Parry and Vermont, whilst isolated spots are seen as far as the N. limits of the colony extend. The actual quantity of gold hitherto found within the proper limits of the colony cannot be accurately ascertained, but the amount of gold exported from Sydney chiefly, is to be presumed, from New South Wales, though partly also from Victoria, was, up to Jan. 30, 1853 estimated at £2,570,106.

Climate.—The position of New South Wales makes its seasons the very reverse of those of Britain, the month of January being its summer, and that of July its dead of winter. The average annual temperature is 64°, that of spring being 65° 5' of summer, 73° of autumn, 66°, and of winter, 56°. It thus appears that the annual average range of the thermometer does not exceed 17°. It is obvious, however, that by ascending from the centre to the lofty mountain summits, almost every variety of climate may be obtained. The air in general is remarkably elastic and soft, and instances of great longevity are not uncommon

At Sydney, no fewer than 241 days are fine, and only 48 are rainy. It would seem, however, that when rain does fall it descends in almost continuous torrents, and that hence, while the annual fall is only 25.19 inches at London, it exceeds 88 inches at Port Jackson, and 62 inches at Port Macquarie. The prevailing winds at Sydney are N.E. S.W. and W. Of these, the most annoying are the southerly or hot W. winds, which are supposed to originate in the central deserts, and raise the temperature to such an intensity that the thermometer in the shade stands at 117° or 120°. When continuing for any length of time, their scorching influence is soon made apparent. The grass leaves turn yellow, the grass becomes dry like hay, the red and blue grapes shrivel up and lose their colour, and the most promising harvest is frequently ruined. It is said, however, that these hot winds, being free from deleterious gases, have no injurious effect on human health.

Vegetation, &c.—For the peculiar productions of the vegetable and animal kingdom see AUSTRALIA. The soil, where the substratum is sandstone, has more or less of a clayey texture, where the substratum is whinstone, it is invariably a light black mould. Of the natural fertility of both varieties of soil there cannot be a doubt. Many crops have been taken in succession without manure, and without any apparent diminution of productiveness, and though this must obviously be the exception rather than the rule, it is stated, on good authority, that when a proper system of husbandry is pursued, the average produce of wheat per acre, on good soils, is from 20 to 80 bushels, each weighing from 60 to 65 lb., and in some districts, 40 to 50 bushels, that of maize, from 40 to 70 bushels; and that of potatoes, not only equally abundant, but doubled, by two crops being obtained in a year. The fruits of native growth are neither numerous nor valuable, but the best of these of Europe have long been acclimated, and are everywhere seen in abundance. So well does the peach thrive, that farmers sometimes feed their pigs with the windfalls of their orchards and even the fatigue and thirst of the traveller through the forest has often been relieved by the produce of peach-trees grown from stones, probably dropped by birds. In the more southern parts of the colony, the fruits include apples, pears, peaches, apricots, nectarines, cherries, plums, oranges, figs, grapes, melons, mulberries, gooseberries, currants, &c. and, in the more northern parts, it is actually abundant. Some of these fruits are evidently capable of being turned to good account, and accordingly the rearing of silk-worms on the mulberry, which might be carried to an almost indefinite extent, has attracted attention, and the vine, in 1849, was actually under culture on 887 acres, the produce from which was 97,800 gals. of wine of good quality strongly resembling Bannockburn, Barossa, Moscat, Clare, &c., and 1163 gals. brandy. This culture, which is yet in its infancy, is rapidly extended, and promises to become one of the most important features of the colony. But at present, the principal revenue is obtained from the pastures, chiefly in the form of wool and tallow. The almost unprecedented increase of live stock appears from the fact, that the number of horses, horned cattle, and sheep, which, in 1825, were respectively 6142, 184,616, and 337,822, had so increased, in 1848, as to be respectively 118,895, 1,759,559, and 11,660,519. In the same year, the number of swine was 70,876. The great increase of horses is partly owing to a demand for cavalry and horse artillery in the East Indies, where the horses of the colony are found well suited for the trying climate. Horned cattle also are largely exported, and considerable attention has recently been paid to the curing of animal food. The quantity of wool exported from New South Wales, in 1828, was 534,348 lb.; and in 1848, 22,969,711 lb., valued at £1,940,144. In 1848, the tallow, obtained chiefly by what is called the boiling down system, was 5680 cwts., valued at £2659; and in 1848, 98,218 cwt., valued at £140,579. Cotton has already been grown to a limited extent, and there cannot be a doubt but that both it and tobacco might be cultivated in many districts. The only manufacture which has as yet made worth progress is that of leather, which, in 1848, employed 83 tanners, and woolens, of which 175,088 yards were woven in 1847. The whale and seal fisheries, though somewhat diminished of late years, still form one of the great features of the colony, and in 1848 amounted in value to £26,926.

Government, &c.—By the Act 13 and 14 Vict. c. 59, passed in 1850, Port Phillip, which formerly depended on New South Wales, was created into a separate colony, under the name of Victoria, and independent legislatures established in both. This Act in regard to New South Wales provides, that the Legislative Council shall consist of such a number of members, as the governor and council shall determine, of which members, one-third shall be nominated by the Crown, and two-thirds by the male inhabitants, natural born or naturalised British subjects, 21 years of age, and qualified by residence, for at least six months within the several districts in which they vote, and either the possession of a freehold of the clear value of £100, or of a leasehold estate of which three years are unexpired, worth £10, or the occupancy of a dwelling house of the same value. A House to pasture within the district also gives a vote. The governor and legislative council are empowered to make laws within the colony, not repugnant to the laws of Great Britain and to appropriate the whole of the revenues arising from taxes, duties, rates, &c., but are not to interfere with the lands belonging to the Crown, nor their revenues, nor to appropriate any sums of money to the public service, unless previously recommended by the governor. The constitution thus established may be regarded more as an experimental than as a permanent arrangement; inasmuch as a clause in the Act empowers the governor and legislative council, with the assent of the Crown, not merely to change the qualifications of members and electors, but to suppress the legislative council and transfer its powers to a council and a house of representatives or other legislative houses.

People.—Since the first establishment of the colony in 1787, the number of convicts sent into it from Great Britain up to 1840 when the imported ceased, was 64,898. This number appears to include Vanuatu as well as New South Wales. In 1848 the whole population was 165,541. Assuming that, at this period, one-half of the convicts had died, their number would be 32,190 or about one-sixth of the whole. Since 1845 it may be assumed that one-third of the convicts then existing had died and that at present the actual number does not exceed 19,000, while the estimated population of the two colonies is at least 250,000; in other words, the number of actual convicts at present is only one-fourteenth of the whole population. In this way the evil will gradually work itself out, and society become purged of a very noxious ingredient. It must still, however, be admitted, that a large proportion of the population, though not convicts, are descendants of convicts, and it is not to be presumed, that persons so unfavourably situated can have enjoyed the benefit of that moral and religious training, in the absence of which good men and subjects cannot reasonably be expected. It is pleasing, however, to see that contracting causes are obviously at work, and that with a rapidly increasing population, both the number and the atrocity of crimes are diminishing. In 1839, capital punishment was inflicted in 52, and in 1848, only 9 instances. In 1839, the convicted felonies amounted to 768, and in 1848 to only 458. Much of the improvement is probably due to more physical causes, the abundant supply of the necessities of life extinguishing many of the strongest incentives to crime in older and more densely peopled countries; but much of it is also due to the enlightened efforts which have been made to communicate instruction, and awaken or strengthen religious impressions. The number of public or free schools, in 1848, was 161, attended by 11,968 scholars, and of private schools in the Sydney district alone 728, attended by 5718 scholars. It appears, however, that additional educational efforts are urgently demanded, as, in 1844, the number of persons between the ages of 6 and 21 who could not read, was 56,603, and above 21, 21,405, making a total of 88,008, or nearly one-fifth of the then existing population. According to the census of 1851, New South Wales contained 106,730 males, and 81,014 females making a total of 187,744, or, classified according to religious belief—

Church of England	98,187	5 Catholics	18,898
Church of Scotland	18,156	—	587
Wesleyan Methodists	10,008	Methodists and Pagans	583
Other Protestants	6,075	Other protestants	740
	177,778		56,670

History.—In 1770, Captain Cook, after sailing round the E coast of Australia, landed on a low swampy point to which, from the number of plants found in it, he gave the

names of Botany Bay while to the whole coast along which he had sailed, he gave the name of New South Wales, from a fancied resemblance in its physical features to that part of Britain. The name thus given continued to be applied vaguely, but has now been accurately defined by recent Acts. In 1788, Capt. Arthur Phillip, the first governor, arrived and met another in Botany Bay, having with him 757 convicts. The colony at first suffered much from scarcity of provisions, and afterwards, more from mismanagement, more especially from the tyrannical conduct of Governor Bligh, who proved himself still more unfit for his new office than for the command of the *Bounty*; and at last to expatriate the colonists, that in 1808 they rose in insurrection, deposed him from his office, and placed him under arrest. He was fortunately succeeded by Governor Macquarie, a man of a very different stamp, during whose active and enlightened administration of 12 years, the colony made rapid progress. The most important events in its history since, are the introduction of convicts in 1840, the establishment of representative institutions in 1843, the creation of Victoria into a separate colony and an improved legislative act for both colonies in 1850, the important discovery in May 1851 of extensive auriferous tracts, by which a new era in the history of the colony has commenced and both its wealth and population promise to be indefinitely increased and the establishment of direct steam communication with Great Britain, in 1862.

NEW YEARS ISLAND—1° N coast, Australia lat. 10° 55' S. lon. 133° 3' E. (a) 4 m or 5 m. in extent. —2° Two small isles, S. coast Australia lat. 13° 40' S lon. 143° 48' E. (a)

NEW YORK, one of the U. States of N. America lat. 30° 30' to 43° N. lon. 71° 56' to 79° 56' W., bounded, N. by Canada, the St. Lawrence, and Lake Ontario, W. Canada and Lake Erie, E. Pennsylvania, New Jersey, and the Atlantic, and S. Connecticut, Massachusetts, and Vermont. Exclusive of Long Island, it is 280 m. long, by 212 m. broad and has, including it, an area of 46 085 sq. m. The surface, in the N. E. is traversed by several mountain ranges from New Jersey, one of which crossing the Hudson, presents a bold and dry front on both banks, and forms magnificent scenery. The Catskill mountains have the greatest average height, and in Round Top attain 3084 ft. but the culminating point is Mount Marcy which belongs to the Adirondack range, and has a height of 5467 ft. This range, situated in the N. E. of the state is the watershed between Lake Champlain and the St. Lawrence and Lake Ontario. In the W. the large tract extending between Lake Ontario on the N. and Pennsylvania on the S., is generally level. Few states can boast of being better watered. In addition to the St. Lawrence and the Niagara, which it shares with Canada and the Delaware which it shares with Pennsylvania, it has exclusive possession of the Hudson, which pursues its whole course of above 300 m. within the state, and for at least half this distance is available for navigation. The lakes are developed still more magnificently than the rivers, but belong, in common, to other states and territories. Besides these, however, numerous minor lakes are diffused over the interior, and not only enhance the beauties of the scenery, but often form a kind of chain easily connected by canals and railways so as to afford regular facilities for transport. Among these are Lake George, communicating with Lake Champlain, 37 m. long, from 1 to 7 m. broad, and studded with above 300 beautiful islets—Cayuga and Seneca each 40, Oneida and Crooked each 23, Chautauque 18, Skaneateles 15, and Canandaigua 14 m. in length. To these water-thoroughfares of the interior, must be added the not less important communications with the Atlantic along the coasts of Long Island, which forms a dependency of the state and the noble bay and harbours of New York. The climate, much modified by local circumstances, is somewhat variable, but, with some local exceptions, very healthy. In Albany, the annual range of the thermometer is 118° in Rochester, 96°, and in New York city, 88°. The soil is, in general, of only indifferent fertility, and notwithstanding the skill and industry with which it is cultivated, does not yield very productive returns. Deficiency of quality, however, is partially compensated by freedom of quality. The largest crops are oats, Indian corn, and wheat. Potatoes and flax are grown to some extent and much attention is

paid to the rearing of stock, both for feeding and for dairy purposes. The minerals are more numerous than valuable. Iron, lead, copper, and slate, are mined to a limited extent, and quarries of marble, granite, freestone, and gypsum, have been opened in many districts. The mineral springs of Saratoga and Ballston are the most celebrated in America. Manufactures have made great progress, and give constant employment to numerous establishments, which absorb all the articles of domestic, comfort, and luxury, known to civilization, are made. Among the more important are flour, leather, spirits, agricultural implements, engines and machines, woollen, cotton, and silk goods, &c. The foreign trade is so extensive as to amount to rather more than a third of the whole carried on by the U. States. The progress of the trade of the state since 1846 is shown in the following Table—

TOTAL VALUE OF THE EXPORTS AND IMPORTS OF THE STATE OF NEW YORK in each of the following Years

Year.	Value of Exports.	Value of Imports.	Year.	Value of Exports.	Value of Imports.
1846	7,699,477	15,446,613	1850	10,981,861	21,164,784
1847	10,894,343	17,554,899	1851	17,916,136	29,680,808
1848	11,114,436	18,993,787	1852	20,645,096	40,000,000
1849	9,744,615	19,304,608	1853	23,137,897	38,393,508

The shipping employed in this vast traffic amounted in 1861 to 5115 vessels (2,509 749 tons) entered, and 4767 vessels (2,434 534 tons) cleared. The American vessels numbering 2744 (1,532 176 tons) and 2702 (1,370 415 tons) respectively. The internal trade is also of great importance, though its amount cannot be ascertained with any approach to accuracy. It is carried on chiefly by canals and railroads in conjunction with the Hudson, and may be said to embrace the whole valley of the Mississippi. The great trunk canal at that of Erie, between Albany and Buffalo and connected with so many lateral branches, that the whole length cannot be estimated at less than 1000 m. The principal railroads are the Hudson River railroad, and the New York, Harlem, and Albany railroad. Both of these communicate between the Atlantic and the town of Albany, from which branch lines diverge N. to E. into Massachusetts and Vermont, W. to Buffalo, with branches to the St. Lawrence and Lake Ontario, and S. to the New York and Erie railroad. Amidst all these means of transit that of common turnpikes has not been forgotten. These are so numerous, so judiciously laid out, and so carefully kept, that no state in the Union can boast of being better supplied. Among religious denominations, the Protestant Episcopal church, previous to the revolution, was the established church, still continues to be the wealthiest and most influential, though in respect of adherents it is outnumbered by several other bodies. Of these, the largest are the E. Catholics, who claim about one-tenth of the whole population, the Episcopal Methodists, Baptists, Presbyterians (O. S.), Presbyterianes (N. S.) Universalists, Quakers, Unitarians, Dutch and German churches, &c. For the higher branches of education provision has been made, chiefly by Union college, Schenectady, New York university and Columbia college, New York, Madison university, Hamilton, Hamilton college, Clinton, and St. John's college, Fortrose. Common education is provided by dividing the whole state into organized public school districts, which, in 1860, amounted to 11 897 and were supported at an expense of \$233,538. In connection with these schools, in many of which education is free, are two normal schools and a teacher's institute for each county and in addition to them are 1697 private schools, attended by 70,008 pupils. The legislature consists of a Senate and Assembly—the former, 33 in number, elected for two years, and the latter 126 in number, elected annually. The suffrage belongs to every white male citizen of 21 years of age, and may also be exercised by coloured citizens possessing a freehold of £50 value and resident for three years. Albany is the capital, though New York is the most important. It will in the great extent of the foreign trade, New York is believed to have been first discovered by Hendrick Hudson, an English navigator in the service of the Dutch West India Company. A Dutch colony was settled at Fort Orange, now Albany, in 1614; and the following year, on the E. point of the island of Manhattan, some fortifications, the original nucleus of New York, were erected, and called New Amsterdam. The whole territory claimed by the

Dutch, was of great and indefinite extent and received the name of New Netherlands. The English dispossessed the Dutch in 1674. During the war with the French the country was laid almost desolate by the ravages of war and the incursions of Indians; but the peace of Paris, which gave Canada to the British, enabled the inhabitants to repair their disasters. New York took a distinguished part in the revolution, and was the scene of some of its severest struggles. Pop (1850) 8,027,384 of whom 47,987 were coloured persons, (1860) 8,860,785.

NEW YORK is a famous seaport, U. States America, and, in respect both of population and commerce, the first city on the American Continent. Lat. (City Hall) 40° 43' 48" N., and lon. 74° 1' 5" W. 205 m. N. W. Washington, and

which lie Ellis, Governor's, Bedloe's, and Oyster Islands. This bay, forming what is called the inner harbour, has water deep enough to admit the largest vessels in the city rivers, and excellent anchorage, in which the united navies of the world might ride in safety. It is approached from the sea in two directions—the N.E., through Long Island Sound and East River, already mentioned; and the S.E., at the point called Sandy Hook. The latter, about 15 m. distant from the city, is the great ocean thoroughfare. It has a bar across it on which the water is only 21 ft. at ebb, and 27 ft. at full tide, but within it attains a much greater depth and widens suddenly out into the fine expanse of Harlem Bay, which, affording both complete shelter and good anchorage, is regarded as an outer harbour. Between the

two harbours lies Staten Island completely blocking up the communication, except at its W. and E. sides, along each of which there is a navigable channel. The former leading along the coast of New Jersey is not very much frequented, the latter, being the opening left between the extremities of Staten Island and Long Island, is the main entrance, and having a width which nowhere exceeds two-thirds of a mile it is appropriately distinguished by the name of the Narrows. The admirable facilities which it affords for defending the inner harbour and city from hostile approach by sea have not been overlooked. It is completely commanded by strong forts, two on either island, and even after it is passed, other equally formidable works have to be encountered. There have been constructed on islets of the bay, known by the names of Governor's Bedloe's and Ellis Islands. On Governor's Island, in particular, situated only about 1000 yards from the city, are three powerful batteries—one called Fort Columbus, a regular fortification in the form of a star occupying its centre a second called Castle William, situated on its N.W. shore and consisting of a round tower, 800 ft. in diameter, and 80 ft. high, with three tiers of guns; and the third, on the N.E. shore, where it commands the narrow passage, called Buttermilk Channel, which separates it from Long Island.

157 m. S.W. Boston. It occupies a somewhat low but most advantageous position on the S. part of Manhattan Island, which is about 14 m. long by 2 m. broad, narrowing to 3 m. broad for about 4 m. at its N. end, the island is separated from the mainland by an arm of the Hudson, called Harlem River which joins the East River or Long Island Sound at Hell Gate. The strait of the Hudson separates Manhattan Island and the city of New York, on the W., from the state of New Jersey and the almost suburban Jersey city and the channel called the East River, communicating with Long Island Sound, separates them, on the E., from the important and seaport towns of Brooklyn and Williamsburg both situated on Long Island, while, on the S., there stretches out a magnificent bay, 8 m. long and 25 m. in diameter, in

and The sea defences are completed by Fort Schuyler on Throg's Neck, where the East River is entered from Long Island Sound.

Manhattan Island narrows towards its S. extremity, and finally terminates in a kind of parabolic curve, rounded at the Battery and thence continued N. along the Hudson, and N.E. along East River. This curve encloses the original nucleus of the city and is still its densest and best locality. Having been allowed to grow up as necessary, convulsions, or caprice might dictate, it is irregularly, and, on the whole, indifferently built, consisting, for the most part, of narrow winding streets, though by no means destitute of others, which, from their spaciousness and the magnificence of their structures, would do honour to any capital. At Houston

Street, about 12 m. N. of the Battery, the adoption of a regular plan becomes visible, but is at first confined to the E. part of the island where a number of spacious streets, called Avenues, each 100 ft. wide, proceed in parallel lines from S. to N., and are crossed at right angles by a series of smaller streets, sometimes also 100 but in general only 50 ft. wide. Both the Avenues and the transverse streets are designated, not by names but by numbers, as First Avenue, Second Avenue, First Street, Second Street, &c. At 14th Street, the regularity of the plan becomes completely developed, and the whole island beyond it to its N. termination at Harlem River has been marked off in avenues, pointing out, with almost mathematical exactness, the form which the city will assume when it shall have spread over the whole length and breadth of Manhattan Island. This period, notwithstanding the large area still remaining unoccupied, is not very distant; for assuming the rate of increase during the last 30 years as a standard, it has been calculated that the whole island will be completely built over in 1880 and contain a population of 1,500,000. At present (April, 1865), the buildings extend to the 42d Street, a distance of 4 m. from the Battery and particularly in the upper part, are nearly to be regarded as suburbs composed, for the most part, of the residences of those who have their places of business within the city proper but, as soon as the work of the day is finished, avail themselves of the facility afforded by railway and omnibus conveyance to escape from its bustle. The main thoroughfare and great boast of New York is its Broadway which, commencing at the Battery proceeds N N E for 2½ m. nearly in a straight line, along the centre and highest ridge of the island, to 10th Street and then, turning nearly due N, terminates at 14th Street, at the entrance to Union Place. It is 80 ft. wide, and with its public buildings, magnificent hotels, elegant mansions, and splendid shops, the carriages moving along its centre, and the gay and busy crowds thronging its side walks, presents at all times a most imposing and animated scene. The other streets particularly deserving of notice are the Bowery situated to the E. and nearly following the direction of Broadway. Wall Street, opening from

Jobbing and importing business, Water and Front Streets, occupied chiefly by wholesale grocers and commission-merchants.

The squares and other open spaces available to the citizens for amusement and exercise, are perhaps less numerous and attractive than might be wished, though the general spaciousness of the streets may make them not so indispensable as in most other towns. The most deserving of notice is the Battery, consisting of 11 acres, situated on the S. extremity of Manhattan Island, planted with trees, laid out in gravelled walks, and commanding fine views of the harbour with its shipping, and the adjacent shores of New Jersey Staten Island, and Long Island. On the W. side of the Battery, and connected with it by a bridge, is Castle Garden used for public meetings and exhibitions, and capable of containing 10,000 persons, and in immediate connection with the Battery on the N., is the Bowling-Green, an oval enclosure, surrounded by an iron railing, and adorned in its centre with a fountain and several jets. The Bowling-Green forms an appropriate termination to Broadway. The Park, a triangular enclosure, situated near the centre of the city, and laid out in well planned walks, is surrounded with some of the finest public buildings, and contains a fountain, the water of which, when thrown in a single jet, ascends 70 ft. To these may be added as distinguished more or less by their buildings shady walks, or fountains, St. John's Park in Hudson Square, which, though comparatively small is not surpassed by any other in point of ornament, Washington Square or Parado ground in the N., and Tompkins in the N E. Union Square near the N. termination of Broadway, and Gramercy Park in the same locality. Other squares as the city continues to extend, are in course of formation. Among them, those of Madison and Hamilton are pre-eminent.

Public Buildings.—The City Hall, occupying a commanding situation in the centre of the Park, presents a combination of the Ionic, Corinthian, and composite orders. Plinths of each, rising in regular gradation on its front, and presenting, notwithstanding some appearance of overloading, a very imposing aspect. The rear is of freestone, but the rest of white marble. The access is by a flight of 12 marble steps, from which a double staircase leads to a circular gallery flanked with marble, and above the whole rises a cupola, on the top of which a colossal statue of Justice has been placed. The extent of the building, 216 ft. long by 105 ft. wide affords ample space for numerous public offices and several fine halls. The finest is the governor's room, the walls of which are hung with the portraits of distinguished patriots. The common council room, also very handsome, possesses an interesting relic in the chair in which Washington sat as president of the first American Congress. Merchants' Exchange, erected on the site of another destroyed by fire in 1835, is a large and massive fire-proof structure of Quincy granite, 300 ft. long 111 ft. to 144 ft. wide, 77 ft. high to the top of the cornice, and 154 ft. to the top of the dome. In front is a recessed portico of 18 Ionic columns, each a single solid block, 38 ft. high, and weighing 43 tons, and among the numerous rooms is the Rotunda 80 ft. in diameter, and crowned by a dome, supported in part by 8 Corinthian columns of Italian marble. The Custom-house, built on the site of the old Federal Hall, is a splendid Doric structure of white marble, modelled on the Parthenon at Athens, 200 ft. long, 90 ft. wide, and 80 ft. high. The principal front presents a fine Doric portico, to which access is given by a flight of 18 marble steps, and the principal room forming a circle of 60 ft. diameter, is lighted by a dome resting on 16 beautiful Corinthian columns. The Post-Office is an old Dutch church occupied by the Government on loan, and only altered so far as to make it suitable for its present use. The Hall of Justice form a structure intended to be built in the Egyptian style, but which has only succeeded so far in imitating it as to merit the surname of the Egyptian tomb; it is constructed of a light-coloured granite, and approached by 8 steps leading to a portico of massive columns. Within the enclosure of the edifice, is a house of detention, a prison with 146 cells for different classes of prisoners. The City Penitentiary, situated on the S. extremity of Blackwell's Island, in East River, about 5 m. N.E. of the City Hall, is a large stone building, 4 stories high, consisting of a centre surmounted by a square tower, and of two wings, and presenting a very conspicuous and imposing

WALL STREET AND TRINITY CHURCH, NEW YORK.
From Putnam's Magazine.

On E. into Broadway, containing some of the finest public offices and still better known as the centre of stock and money operations; South Street, along East River, occupied by the principal shipping-houses and packet-offices; West Street, along the Hudson similarly occupied; Pearl, Pine, and Cedar Streets, the principal localities for the dry goods,

object, particularly to vessels passing through East River. The Lunatic Asylum, Alms-house, and Work-house, all likewise situated on Blackwell's Island, are more remarkable for their magnitude than their architecture. The new State

THE CUSTOM-HOUSE, NEW YORK.—From Folsom's Magazine.

Arsenal situated on Fifth Avenue, between 32d and 34th Streets, 4½ m N of the City Hall is a massive Gothic structure, in the castellated style, surmounted by 8 towers, 69 ft. high, 4 in front and 1 at each angle.

Churches.—The total number of these is about 250, of which 46 are Presbyterian, 45 Episcopal, 40 Methodist, 31 Baptist, 21 R. Catholic, 20 Dutch Reformed, 10 Congregational, 5 Lutheran Universalists Friends, and Primitive Christians 4 each, Unitarian and New Jerusalem 2 each and 1 Moravian. The Jews have 12 synagogues. Many of the churches are costly and magnificent structures. Those of the Episcopalians, who had the privilege of an Establishment before the revolution, and still form the wealthiest religious body in the State, are particularly distinguished. To them belong among others Trinity Church a small but beautiful structure of pure Gothic, situated on Broadway, at the head of Water Street, built of brown sandstone, at an expense of about \$200,000, though not capable of accommodating more than 900 persons, and surmounted by a noble spire, 264 ft. high. Grace Church, on the N of Broadway corner of 10th Street, an elaborate Gothic structure, of white marble, which cost about \$240,000, St. Thomas Church, with a fine front, partly occupied by an immense Gothic window, and flanked by two octagonal towers. St. John's Chapel, with a splendid Corinthian portico, and a spire 218 ft. high, and the Church of the Holy Communion, built of red granite, and much admired for the elegance and security of its proportions. Of the churches belonging to other bodies, notice is due to the R. Catholic churches of St. Patrick and St. Peter—the former a huge Gothic edifice, with an imposing interior and the latter a massive granite structure, with an Ionic portico. The First Presbyterian Church, a majestic Gothic building of reddish brown stone, with large buttresses, pinnacles, and a tower terminating in a spire 180 ft. high, the Congregational Church of the Furman, splendidly built of white marble, the First Baptist Church, Bevoise Street, built in the Gothic style, of blue limestone, and adorned with octagonal towers; the French Protestant Church, of white marble, with a fine Ionic portico, and the Dutch Reformed Church, Washington Square, justly admired for the elegance of its Gothic architecture.

Literary and Educational Establishments.—The oldest is Columbia College, founded by charter of George II. in 1754, under the name of King's College. It occupies a handsome building, with two projecting wings; and has 10 professors,

an average attendance of 120 students, a library of 17,000 volumes, a museum and extensive philosophical and chemical apparatus. Preparatory for the college, and attached to it, is a grammar-school with from 200 to 300 scholars. The

University of the city of New York occupies a fine marble structure, in the English collegiate style; and has a chapel lighted by a window of stained glass, 34 ft. wide and 50 ft. high. It was founded in 1831, and has 11 professors, a library of 4000 volumes, extensive apparatus and on an average 145 students. The medical department has 5 professors, and about 600 students. The College of Physicians and Surgeons occupies a handsome building, and has 6 professors and about 220 students. Among the numerous theological seminaries, Union Theological Seminary, in University Place, with 6 professors, 100 students, a library of more than 18,000 volumes, and that of the Protestant Episcopal church, are distinguished. The Free Academy opened in 1849, for the purpose of extending additional gratuitous education to the former pupils of the common school of the city and county, occupies a handsome Gothic structure built on the model of some of the Belgian townhalls, at an expense of about \$14,000, exclusive of \$2000 expended on furniture and apparatus. It owes its existence to the popular vol. of the citizens, in 1848, and is now one of the most important high schools of the city. It has 11 teachers, and its pupils, which at the opening were only 53, now amount to several hundreds. The schools for a common and more elementary education included, according to the Report of the Board of Education for 1850-51, 114 public, 73 ward and 21 corporate schools, at which 107,368 children receive instruction though the average attendance was only 40,000. The sum

expended on these schools, in that year was about \$25,000, and 17 of the schools were for coloured children. The more important libraries, in addition to those of the educational establishments already mentioned, are the New York Society Library of 45,000 volumes; the Mercantile Library Association, 50,000 volumes and the Argonauts Library, 13,000 volumes—affording facilities for mutual cultivation of which a great number of apprentices avail themselves. Societies for purposes literary scientific or economical include the American Institute, incorporated in 1829, for the encouragement of agriculture, commerce, manufactures and the arts; the Lyceum of Natural History which has extensive collections, and has published several volumes of transactions; the American Art Union the International Art Union the Ethnological Society the Historical Society with a library of 15,000 volumes, and a collection of coins and medals; and the American Geographical and Statistical Society, instituted in 1852.

Benevolent and Charitable Institutions.—These include among others the New York hospital with extensive buildings on Broadway, the Lunatic Asylum, at Hooningdale, on an elevated site overlooking the Hudson and surrounded by 40 acres of land, laid out in gardens and pleasure-grounds; the Deaf and Dumb Asylum, the Institution for the Blind, the Coloured Home, for the aged and indigent; the Magdalen Female Benevolent Asylum the Commission of Emigration the duty of which is to provide for the sick and destitute immigrant, and supported by a capitation tax on the hmi; graces themselves the Sailors' Benevolent Harbor, situated on Staten Island, and well endowed for the support of aged and infirm seamen, the Seamen's Fund and Retreat, supported chiefly by a tax on the masters of vessels and seamen arriving at the port, the Prison Association for the improvement of prison discipline, &c., the Mariners' Female Industrial Society, the Anti Slavery Society the Temperance Union; the Sunday-school Union, and various Bible, missionary, and tract societies.

Amusements.—If from these we exclude the more rational recreations of public lectures on subjects literary, scientific, moral, &c., and the public meetings in which various topics, municipal and political, are discussed, the number of amusements, properly so called, forms a somewhat sorry list. The largest theatre is the Broadway which is chiefly devoted to the regular drama. To it may be added Niblo's, one of the

most popular resorts, famous for the gorgeousness with which male-dramatic spectacles are exhibited. Burton's, the Bowery, and National Theatre, Christy's Opera, the American Museum, which, besides containing a collection of figures, caricatures, &c. furnishes dramatic and comic representations; the Metropolitan Hall much used for concerts; the Amphitheatre, several panoramas, and the various exhibitions which take place in Castle Garden. Theatrical exhibitions find many enthusiastic admirers and frequently occasion bursts of extravagance which are seldom witnessed elsewhere but the great body of the citizens easily decline to seek relaxation from the cares and toils of business in places where both the physical and moral atmosphere are too often tainted, and find amusement of a better kind by withdrawing, whenever a holiday permits them, from the crowded city to breathe the bracing air which mingles inland, or the neighbouring mainland, affords them. For this purpose, they possess unrivalled facilities. Omnibuses, fitted up in the best style, are perpetually plying in all directions, at rates which none can find burdensome; steamers are constantly leaving the wharves either for short trips across the numerous farms, or for longer excursions along the coast, or up the noble stream of the Hudson and railway towns, starting from the very heart of the city soon leave all its din, and dust and smoke, far behind.

Manufactures and Trade.—The manufactures of New York, though usually regarded as only a secondary interest, are compared with its foreign and domestic trade, already above a capital of nearly 7 millions sterling produce articles of three that value and employ nearly a sixth of the whole population. A large proportion of the manufacturing industry is doubtless devoted to the ordinary handicrafts which produce articles of daily and domestic use, to be consumed within the precincts of the city itself and other most important items, as ship-building, and the heavy machinings and machinery required by marine engines, are so intimately connected with commerce, and so obviously produced by the demand which commerce creates that they may almost be considered as integral parts of it. Still after making due allowance for these considerations it is impossible to deny that the progress which New York has made in its manufactures is only less than that of its commerce, and that in respect even of them it outstrips every other city of the Union. As already hinted several of the leading articles produced are the necessary offsprings of commercial prosperity. In 1851 the vessels built within the district of New York were 208, carrying 71,214 tons or nearly 3 of the whole tonnage built during that year within the Union. Of these vessels 33 were ships, 1 a brig of schooner, 81 sloops and small boats, and 47 steamers. Of the last, 11 were great ocean steam-ships. These naturally suggest the great manufacturing establishments which rank next in order the iron foundries and machine shops two of which, the Mottet and Morgan Works, employ each about 500 men. After these come sugar-refineries 10 in number, and all on a very extensive scale, and numerous large breweries and distilleries. Other important articles are iron shaft, brass, and tinware, plated goods, fire-arms, cottonwood and muscovee leather, millinery and harness trunks, coaches and carriages, blocks and pumps, cordage, sail, rope and cordage, white lead, vermilion, gold and steel pens, musical instruments, oleum, cigars, types and books, &c.

The trade of New York, when both its extent and its rapid increase are taken into view, must be admitted to surpass that of which any maritime city ancient or modern, can boast. The admirable facilities which it enjoys have already been referred to. Rows of wharves and piers, the latter about 60 in number averaging from 300 ft. to 500 ft. long and from 50 ft. to 60 ft. wide, are continued along the Hudson and East River almost without interruption for an aggregate distance of 7 m. and afford at once accommodation and security to the crowds of vessels of all sizes and descriptions which are continually arriving or departing, delivering or receiving their cargoes. The wharves of East River which, owing to the strength of the current, very rarely suffer any destruction from ice, are principally resorted to by foreign shipping, to which such an obstruction might prove more detrimental, while those of the Hudson, which regularly freeze, are used chiefly by domestic. The means of internal communication are equally complete. Within the proper navigation of the Hudson ceases, the Erie Canal continues it to the large

inland lakes, and, both by means of these and branch toilers, enables the produce of immense tracts of land, covered with valuable timber, or graced by immense herds of cattle, or productive of luxuriant crops, or rich in minerals, to reach the harbour of New York. The service is convenient, to which this trade was exposed by the freezing of the waters, has in recent times been almost overcome by the introduction of the railway system which, not contented with remedying this temporary evil, has extended itself in all directions, and opened up most important communications which were previously impracticable. Continuous lines of railway now form a great network of several thousand miles, diverging from New York in all directions, and bring it into immediate communication with the great lakes, the Mississippi and the towns of Philadelphia, Boston, &c. In addition to this foreign and internal trade, another branch of scarcely less importance is carried on by coasters, both steam and sailing vessels, of which the average number actually in the harbour at one time is estimated at 2000. It is impossible here to give details of a trade so vast in extent, and so endlessly ramified, and therefore a few general statements must suffice. In the year ending June 30 1853 the exports were, of domestic produce \$38,868,767 (\$7,770,735); foreign, dutiable, \$5,933,572 (\$1,068,713) specie, \$37,778,705 (\$7,454,741) making a total of \$61,466,833 (\$12,233,905) of which the exports were, of dry goods, \$48,900,938 (\$9,780,187), other dutiable goods, \$53,444,896 (\$7,086,979), One goods \$11,926,913 (\$2,885,828) specie, \$3,226,391 (\$506,678) giving a total of \$98,601,124 (\$19,760,226) The duties collected at the port, during the same year, amounted to \$75,678,910 (\$2,735,787), being considerably more than one-half (exactly 60-6 per cent.) of all the duties levied at all the ports of the Union the aggregate amount in the same year having been only \$47,320,316 (\$9,484,665). In 1851 the tonnage belonging to the port was 531,159 tons, or about one-fourth of the whole tonnage of the Union. The tonnage which entered the port was 1,448,768 and cleared 1,280,082 tons, giving a total of 2,678,850 of which 1,700,106 were American and the total number of vessels which arrived at the port was 1888, of which 2381 were American, and British 966 Bremen, the next highest in order had only 135. Since 1846 when the great ocean steam-ships were first brought into existence up to the present year, the number of steamers built and fitted-out at New York is 59. At present (1853) the total number is 76, carrying 123,010 tons. Of the immense domestic trade of New York, it is impossible to form an accurate estimate, but by the Erie canal alone the total tonnage which arrived at tide water in 1852 was 1,644,699 tons. Of these, 576,772 tons were wheat and flour valued at \$32,564,256 (\$4,512,831). Of the coasting trade, the leading articles which arrived in 1851 were—cotton, 456,637 bales, hemp 19,478 do wool 10,662 do hides 208,628 in number lead, 176,538 pigs coffee, 62,381 bags tobacco, 14,837 hhds. and 428 bales, &c. molasses 13,850 hhds, 1247 ctns. and 39,797 brls and sugar, 21,448 hhds, 58 tns 36,368 brls, 8559 boxes and 16,753 bags. A good idea of the absolute force and resources of the city given by the fact that in 1853 the real and personal estate assessed within the city and county, the latter being identical with Manhattan Island was valued respectively at \$258,188,758 (\$50,417,851) and \$98,520,642 (\$19,704,090) giving a total of \$70,141,431. Of this total, the city proper 8 of 42d Street furnished \$67,617,804.

Miscellaneous.—Under this head may be introduced some topics for which a proper place has not been found in the previous part of this article, but without reference to which the description of the city would be incomplete. One of these is the hotels. In the cities of the Old World these are for the most part frequented only by passing visitors, and of course are only provided on a scale adequate to meet such a casual demand. In New York, on the contrary, hotels are much used as domestic establishments, in which great numbers of persons, single and married, take up their permanent residence, and, paying according to fixed rates, find it easy without the trouble of housekeeping, to regulate their expenditure according to their means. It may well be doubted whether this mode of life procures any advantages which are not far more than counterbalanced, but the preference which it has had the effect of causing hotels, on scales of almost un-

rivalled extent and magnificence, to rise up in all parts of the city, and more especially in the lines of its greatest thoroughfares. Among others, it may be sufficient here to specify the Astor House in Broadway. It forms a massive and imposing structure of Quincy granite, 6 stories high, with a front of 201 ft., and contains above 800 rooms, among which the dining-room is 108 ft. by 49 ft. In this splendid establishment, erected at an expense of more than \$2,000,000, the price of board per day is only 2 dollars, or about 8s. 6d. sterling. The ladies' ordinary in this establishment is ornamented with one of the finest frescoes in the world. The Metropolitan, St. Nicholas, New York, Irving's, and others are on an equally magnificent scale. In regard to police and sanitary regulations—as the paving, cleaning, and lighting of the streets—New York has nothing to boast of, or rather contrasts unfavorably with most other cities, but, in regard to one, and that perhaps the most important of all, an abundant supply of excellent water, she has recently by a gigantic effort, made herself pre-eminent. The want of a proper supply of water had long been felt, and, during the destructive fires which repeatedly took place had proved peculiarly disastrous, by leaving the devouring element to rage, almost unchecked, without the means of extinguishing it. In 1835, it was resolved to remedy the evil and the Croton Water-Works were commenced on a scale of magnificence not surpassed by the most celebrated hydraulic achievements of ancient or modern times. The aqueduct commences 5 m. from the Hudson, and about 40 m. from the City Hall. An embankment of stone and cement, 250 ft. long, and 40 ft. high forms a pond covering an area of 400 acres, and containing 500,000,000 of gallons of water. From this pond the aqueduct built of stone and brick in the form of a double arch, 8 ft. 6 inches high and at the bottom 8 ft. 8 inches wide, is carried through solid rocks, and across valleys and streams, till it reaches Haerlem River, which separates the N. part of Manhattan Island from the city. Here the aqueduct assumes a more gigantic form, and a magnificent stone bridge, 1450 ft. long, and 114 ft. above the tide-way, spans the river by 14 arches. The water thus conveyed is carried forward first to the Hoovering Reservoir, covering 80 ac. and containing 15,000,000 of gallons, and thence to the Distributing Reservoir about 2 m. N. of the City Hall. The supply of pure and wholesome water thus obtained is at the minimum rate of 27,000,000 of gallons in 24 hours, and would amply suffice for a population of a million and a half. The expense, originally estimated at \$500,000 or 6,000,000 of dollars (about \$1,800,000) has increased to nearly three times that amount, and is raised by a property tax of 5 per cent. But the benefits obtained are strikingly illustrated by the fact that the rate of insurance against fire which from the imperfect means of extinguishing it, was very high, have since been so much reduced, that many proprietors pay the whole amount of the water tax out of the saving on that one item. In the immediate neighbourhood of the Distributing Reservoir the Crystal Palace, recently completed, in imitation of that of London and for a similar purpose, deserves a passing notice. It is in the form of a Greek cross, with a dome rising from the intersection, and, with the exception of the floor is entirely constructed of iron and glass. It occupies the greater part of Reservoir Square having an extreme length of 455 ft., an extreme width of 445 ft. and an area of 111,000 sq. ft. Including the additional 63,000 sq. ft. furnished by the galleries, the total area available for the purposes of the Exhibition is 175,000 sq. ft.

Hatteras—Manhattan Island, on which New York stands was first discovered in 1609, by Hudson, a celebrated English navigator, who found it inhabited by a brave Indian tribe but the first settlement was made by the Dutch in 1610. They built a fort near the S. extremity of Broadway, and, gradually forming a town around it, continued in possession till 1664, when they were driven out by the English. In 1673 the Dutch regained possession but lost it finally in the following year. Its first charter, granted by James II. in 1686, was confirmed by Queen Anne in 1708 and again confirmed with modifications by George II. in 1783. The charter still forms the basis of the municipal government, almost all the royal grants having been retained, subject to such changes as were rendered necessary by the transition from colonial subjection to national independence. The pre-

Vol. II.

gress of New York has been rapid almost beyond example, though its prosperity has repeatedly suffered both from external and internal causes. During the revolutionary war it remained in the hands of the British, and was not finally evacuated by them till 1783, between 1812 and 1815, the war with Britain almost extinguished its foreign commerce, and on different occasions speculative mania has prevailed to such an extent as to bring on revolutions, by which the thousands of individuals have been involved in ruin, and the general progress most seriously retarded. The population only 33,131 in 1790 was in 1830 123,706, in 1840 212,710, and in 1850, 515,547.

NEW ZEALAND A group of islands belonging to Great Britain, S. Pacific Ocean lat. 34° 30' to 47° 30' S. lon. 168° to 177° E. and consisting chiefly of two principal islands—the one called North Island, New Ulster or Ekekonamu; and the other Middle Island, New Munster, or Teva-Poon amoo and of a much smaller island, called New Leinster Stewart, or South Island, length of the whole group, N. to S. measured on a line curving nearly through their centres about 1200 m. area estimated at about 97,000 sq. m.

New Ulster the most N. of the group, and separated from New Munster by Walker or Cook's Strait, which, where narrowest, is about 25 m. wide is so very irregular in shape and so much broken by deep bays and projecting headlands, that it is scarcely possible to give any distinct idea of its dimensions by tracing straight lines upon its surface. Without allowing for curvature its greatest length, N. N. W. to S. S. E., between Cape Otter or North Cape, and Cape Kawakawa or Palliser is 400 m. its greatest breadth W. S. W. to E. N. E. between Cape Egmont and Cape Wai Apou or East Cape, is 275 m. area estimated at 21,174 400 ac. or 48,710 sq. m. A tolerably accurate idea of its shape will be obtained by considering it as composed of a nucleus or main body and four great horns or peninsulas. By far the longest of these commencing between Pungu Taranaki, in the Bay of Plenty on the E. and Port Aradia on the W. coast, stretches N. N. E. for 280 m. in a deeply serrated projection which has a width at its base of not more than 55 m. and near its extremity of not more than 6 m. This remarkable peninsula is usually out through by Hauraki Gulf or the Firth of the Thames on the P., and Manukau or Symonds Harbour on the W. the only land which saves its continuity being the narrow isthmus on which, like that of ancient Carthage the town of Auckland has been built. Its W. coast, with exception of the indentations formed by the harbours of Manukau already mentioned, and of Kaipara, is almost a continuous straight line whereas the whole of the E. coast is a constant succession of bays and promontories including the Bay of Islands, Wanganui Bay, Wanganui Harbour Doubtless Bay &c. The second of the four peninsulas stretches E. N. E. between the Bay of Plenty on the N. and Hawke Bay on the E. It is much more compact than the former having both a shorter length and a greater width and beside Hawke Bay itself, has no marked indentation except that of Poverty Bay on the E. The third peninsula forms the S. extremity of the island and stretches for 130 m. between Hawke Bay and the W. part of Cook's Strait to its termination at Cape Palliser. The fourth peninsula, which projects less than any of the other three, is in some respects the most conspicuous of all, in consequence of containing the lofty volcanic mountain of Egmont or Taranaki and being partly composed of the streams of lava which at some remote period have flowed from its sides. The main body of the island, as well as its peninsulas has for the most part, a very rugged and mountainous surface and besides being traversed from S. to N. by a great chain which takes successively the names of the Rangitikei, the Rauahine, and the Taranaki mountains, and throws off several transverse branches, presents a number of lofty isolated peaks, among which the most conspicuous are Mount Edgecombe, which towers above the Bay of Plenty to the height of 10,040 ft. and Mount Egmont, which has a height of 8340 ft. Sedimentary rocks, chiefly of gray sandstone, are often seen, both among the ridges of the interior and on the coast, where they frequently form precipitous cliffs, but the far greater part of the rocks are crystalline, and so evidently volcanic, that their sides have all the appearance of continuous lava streams while the intervening valleys and plains are in many instances literally covered with the pumice

stones which their craters must have ejected when in a state of activity. The streams which descend from the mountains are extremely numerous and several of them have much greater lengths than might be expected, from the extent of the island and the configuration of its surface. In general, however, they are more mountain torrents, totally unfit for any navigable purpose, both in consequence of the rapidity of their current and the rugged nature of their channel, and still more of the immense deposits of shingle, which they have brought down in their course, and deposited at their mouths, and in which they are not infrequently altogether lost before reaching the ocean. The largest of the rivers are the Waikato, augmented by the Waipa, and the Manawatu. The former rises in the snows and glaciers of Mount Ruapehu (3000 ft. high) one of the loftiest summits of the central chain flows easterly N. N. W. and, after a course of about 250 m. discharges itself on the W. coast, into what is called Waikato harbour. Through much interrupted by hills and rapids, it is navigable from its mouth for 160 m. by vessels of 80 tons. The Manawatu, rising in the same central chain, and at no great distance from the Waikato, takes an opposite direction, and after flowing nearly due S., along the base of the Kua Wahine mountains, turns W. and forcing its way across a depression of the central chain, falls into Cook's Strait. At its mouth, it has a width of 300 yards at half-tide, but is encumbered by a bar which, at ebb, has not more than 7 ft. water. Within the channel deepens, and is navigable by small vessels for 50 m. The only other considerable streams are the Wanganui, which flows to the S. W. coast, the Pukaruru or Hutt, which flows S. into Port Nicholson in Cook's Strait, the Waitemata, which falls into Hawke Bay, the Rangitiki and Waikare, which fall into the Bay of Plenty and the Waipo or Thames, which flows N. W. into the Firth of Thames. Most of the streams have their sources in lakes, many of them obviously filling the craters of extinct volcanoes, and though often not of great extent, so embosomed among mountains and magnificent forests as to present scenery of extraordinary grandeur and beauty. The largest of all the lakes is Taupo, situated near the centre of the main body of the island, of an irregular triangular shape, about 26 m. long by 25 m. broad. About 36 m. N. E. from it is Lake Roto-Rua, which forms a perfect circle of 8 m. in diameter, and is remarkable for the number of hot springs which rise close to its banks. Waitemata, and several other lakes near the S. extremity of the island, cover an area of about 50,000 ac. In the same locality is one of the most extensive plains of the island, occupying an area of about 600 sq. m.

New Munster, or Middle Island, is of a much more compact and regular form, and though bulging out somewhat towards the S. may be considered as a parallelogram stretching about 500 m. from N. E. to S. W. with a medium breadth of about 180 m. area about 60,000 sq. m. In the N., where it is separated from New Ulster by Cook's Strait, it is very much rugged and broken, and so much corresponds with the opposite coast, both in its general structure and the direction of its headlands and submerged reef, as to suggest and furnish good ground for the opinion that the two islands were at one time contiguous. But with exception of the N. coast, and a remarkable spur on the E. coast, called Banks Peninsula, the coast-line is very continuous, presenting no indentations deserving of notice except Queen Charlotte's Sound, Admiralty Bay and Blind Bay with its branch Manakau Bay in the S. Milford Haven, Doubtful Sound, Radesdale Sound, Usky Bay and Chalky Bay, a number of narrow sea-arms, penetrating the land for several miles, in the S. W. Tertiary Bay and Howell part, on Forster Strait, in the S. and Port Otago or Otago Akaro harbour in Banks Peninsula and Pegasus Bay on the E. Its interior has not been much explored, but it presents physical features similar to those of New Ulster, and in particular is traversed from N. to S. by a lofty central chain, which is evidently a continuation of that which terminates on the opposite coast of the northern island. This chain has an average height of about 3000 ft., but Mount Cook, near the W. coast, is but 43° 30' N. has two peaks, the one 12,900 ft., and the other 13,300 ft. high. Both in the interior, and along the coast, several extensive plains have been found. The drainage is effected by numerous streams, which, instead of skirting the mountains by flowing N. or S., and thus acquiring

length sufficient for their development into rivers, flow directly E. or W. to the sea, and seldom lose the character of impetuous mountain torrents.

New Ulster, Banksia, or Stewart Island, the third largest island of the group, but far inferior in dimensions to the other two, lies S. of New Munster, and separated from it by Forster Strait, about 15 m. wide. It is of a triangular, or rather heart-shaped form, about 46 m. long from N. to S., with an extreme breadth of about 36 m., and an area estimated at 1400 sq. m. Its shores have a very pleasing appearance, woods extending down to the water's edge, while numerous bays, separated by rocky headlands covered with brushwood, indent the coast, which is fringed, more especially towards the S., with numerous islands. The largest of these indentations are Paterson's inlet, on the N. E. a noble harbour, and the fine harbour of Pegasus Bay in the S. E. Like the other two principal islands, the interior is mountainous, but the elevation is less, none of the summits exceeding 3500 ft.

A great number of smaller islands belong to the New Zealand group, and for the most part are situated at a short distance from the shores of the North and Middle Islands, though many surround the S. Island. The largest of these are Otia or Great Barrier Island and Shoutourou, in the mouth and Waikato reef, in the interior of the Firth of Thames, Kapiti or Entry Island in Cook's Strait, D'Urville at the N. E. entrance of Blind Bay, Resolution on the S. W. coast of the Middle Island, and the Scores on the parallel of 43° S. W. of New Ulster.

Geology.—As yet a considerable portion of the two principal islands remains unexplored and of course any attempt yet made to describe the geological structure must be very imperfect. The general prevalence of volcanic rocks has already been adverted to. Almost all the loftier summits bear obvious indications of having been either volcanoes or craters, and in the truncated cone of Taranaki situated in the central chain of the N. Island considerably E. of the settlement of New Plymouth, at the height of 6200 ft. the volcanic force is still active. Many other parts bear manifest signs of frequent upheavements and violent convulsions, and since 1840 numerous shocks of earthquakes have been felt, particularly at Wellington where, in October 1848 the shocks were so violent as to shatter most of the houses and public buildings, and spread general terror. Shaking, causing damage to an amount estimated at £15,000. The prevailing rock of the mountain chains in which the volcanic peaks are situated are metamorphic schists, gneiss, clay slate, porphyry and basalt. Granite seems to be of rare occurrence, but isolated masses of quartz occur in various places. On the W. side of the N. peninsula of New Ulster near the mouth of the Hokianga, transition slate is abundant in the vicinity of Auckland the strata form cliffs of a soft pepper-colored sandstone, or sandstone conglomerates, with occasional seams of lignite. On the E. coast, near the Bay of Islands, some of these occur, consisting of half-carbonized wood overlaid with a thick bed of decomposed porphyrostone, are 4 ft. thick. Still farther N. at Wanganui harbour a coarse-grained limestone, more or less crystallized with varieties of fossil shells, composes picturesque cliffs 60 ft. high. New Munster has been still less imperfectly explored than New Ulster but the geological structure appears to be almost identical. The igneous rocks composing the greater part of Banks Peninsula are seen passing a lofty range of metamorphic rocks dipping both E. and W. at a high angle. In the low country to the S. and W. the surface, consisting of rich loam, has immediately beneath it a thick substratum of slightly coarsened gravel. To the W. of Timaru a mass of lignite 10 ft. thick is said to be seen cropping out on a bank. Continuing S. along the coast, strata of yellow and brown colored limestone of a friable, porous texture, and filled with caverns, occur. Many of the limestones, particularly in the vicinity of Otago, resemble the chalk of Europe in the general nature of their fossils. A tertiary bed of blue clay also occurs, containing numerous shells of species existing in the neighbouring ocean. New Zealand appears to be rich in remarkable fossils of birds. The most extraordinary of them is the Gigantic Moa (*Dinornis Giganticus*) whose species of which many have been from 10 to 16 ft. high. The natives affirm that it is not extinct, and that living specimens of it still exist in the almost inaccessible forests of the interior.

It is not probable, from the geological structure of New Zealand, that minerals of much value will be discovered. Numerous of rich auriferous deposits have repeatedly been found, but hitherto it has not been found in sufficient quantity to render its extraction profitable. Copper-mines have been opened in the vicinity of Auckland with satisfactory results; sulphur also is very abundant, and titaniferous iron is found in various places. There are also indications of tin, lead, silver blinanth and nickel.

Climate.—This is a country stretching through 13 of latitude, covered by mountain ranges, several of them clothed with perpetual snow, and exposed along an E coast of above 1500 m to the tempestuous winds and dense clouds which are carried from the antitropic circle to the warm regions of the N, is necessarily very much diversified. The characteristic feature in the climates of both principal islands is humidity. At Auckland the annual quantity of rain is 51.84, whereas in London it is only 20.05. Throughout the N island, the mean annual temperature calculated on observations made at the Bay of Islands, Auckland, and Wellington, is rather more than 60°, and the range of the thermometer is very limited. At the Bay of Islands it is only 20° varying from 65° in the coldest, to 75° in the warmest months; and at Wellington 22°, ranging between 48 and 70°, whereas in London the range is 38° varying between 86° and 62°. The prevailing winds are from the NW and the SE and are accompanied with frequent hurricanes, particularly in Cook's Strait, which acts as an immense funnel through which the deepest rages almost without intermission, and at all seasons. From Cook's Strait southward, along the E coast of Middle Island, the climate becomes deteriorated the wind increases both in quantity and violence, and the winter cold is much aggravated by icy blasts and southern dust. The climate of New Zealand is remarkably healthy and although at Auckland the number of days in which rain falls annually is 179, yet other parts of the islands enjoy a larger number of dry days, even if the total quantity of rain that falls be not any less. The summer months of December and January and the autumn months of February, March, and April are the driest.

Vegetation.—New Zealand, with the adjoining groups of Chatham Auckland, Macquarie, forms a balanced centre from which a peculiar class of vegetation forms is supposed to have issued. The species at present known are 623, nearly equally divided between the monocotyledonous, the cellular, and the dicotyledonous plants. To the cellular belong numerous varieties of algae, lichens, fungi, and more especially ferns, which replacing the grasses of other countries, form almost the only vegetation over immense districts. Some of them are more than 30 ft. high, and remarkable for the elegance of their forms. One of the most common is the *Phoridium aculeatum*, the root of which is used as food by the natives, and greedily devoured by pigs, which, in consequence of its abundance are now running wild in great numbers. Another remarkable plant of great economical value is the flax plant (*Phormium tenax*), which seems so natural to the climate that it is found in almost all situations, on the driest hills, in swamps, and on the sea-shore, within reach of the spray. One species of the *Phormium* has leaves 12 ft. and flower-stalks 20 ft. long. The finest flax is obtained from a cultivated variety. Among the dicotyledonous plants the most remarkable belong to the *Compositae* and *Tanacetum*, and furnish valuable descriptions of timber. Among others is the *Kauri*, *Kauri*, or *Dispersa Australis*, with a smooth grey columnar trunk, from 30 to 40 ft. in diameter, and nearly of the same girth through its whole height of from 60 to 90 ft. One remarkable fact connected with it is, that it is confined to a comparatively small part of the North Island and to land which seems specially rugged and underlie. The animal kingdom is extremely limited. Captain Cook found no trace of any quadrupeds except a sort of fox dog and a few rats, and no others have since been discovered. Of the animals which have been introduced, the hog thrives best and multiplies prodigiously finding abundance of food in the fern roots, and consequently varying it with the oysters and European cockles strewn upon the shore. All the other common European quadrupeds appear to be easily acclimated. Birds are not remarkable either for variety, song, or plumage, but exhibit in the *Alcedo*, so called from having no wings, one of the most curious and gigantic class of birds in existence.

Several varieties of whales and seals were as abundant on the coasts when first visited, that great hopes were entertained of establishing productive fisheries of them; but the capture of them was pursued so ruthlessly without sparing the breeding whale and her young, that a most important source of revenue has been almost destroyed. The coast still teems with whale fish, among which one of the best is the *Hopkins*, resembling the cod, but superior to it both in nutritive properties and flavor, and weighing from 10 to 70 lbs., and occasionally 100 lbs.

The natives of New Zealand, supposed to belong to the Malay family, furnish perhaps the finest specimens of savage

NATIVES OF NEW ZEALAND.—From Anger's New Zealand Illustrated.

man. The men are tall strong, and active the women often handsome, and both sexes almost uniformly well shaped; and dressed in mats of various kinds made of the native flax braided by the hand, some of them very coarse, and worn by the women, and others finer than any carpeting. Fluffy in their habits, they seldom bathe themselves, or wash their clothes, which are usually worn till they drop off from age. Their intellectual and moral qualities keep pace with their physical and with the exception of cannibalism and infanticide, both of which though once common have been almost exterminated they have either never been addicted to or have ceased to practice, the vices common among savage tribes.

They practice tattooing and form designs over their bodies of remarkable elegance as is evidenced by the markings on the face of the accompanying figure, being a portrait of the chief Ku-tuwa-tuwa. They usually live in villages, or huts situated frequently on an eminence, and generally surrounded by a palisade, sometimes strengthened so as to form a tolerably strong defence against infantry. But, though esteemed intelligent, they are, in respect

PORTRAIT OF KU-TUWA-TUWA
From William C. Smith's *Topographical Description*

of the construction of their houses much behind other islanders of the S Pacific. Their houses are small low haggard with roof, beamed with greaves, and filled with fluff. Those of the chiefs are larger than those of the people generally, and are often ornamented in front with rude and grotesque carvings; that of Pomare measures about 20 ft. long by 12 ft. broad, and from 5 ft. to 6 ft. high. Owing partly to their own excellent capacities, and the exertions of the missionaries who have long laboured among them, the natives have made

great progress in civilization—have exchanged their repatriation for Christianity and, when admitted to the privilege of the constitution which the British Parliament has sanctioned,

PHOENIX ISLAND, NEW ZEALAND. From Walter C. Mackay's 'Exploring Expedition.'

will be able to maintain their place in the legislature without suffering by comparison with their European colleagues.

New Zealand was first discovered by Tasmann in 1642 but little was known of it till the visit of Cook, in 1769 and 1774. Its coasts were afterwards repeatedly visited by whalers and others, but the first permanent settlement was made in 1815 when a missionary station was established in the Bay of Islands. It had been long recognized as a British possession but no regular authority was established by Government till 1838 when a resident was appointed, with very limited powers, and subordinate to the government of New South Wales. In 1840 it was ceded into a colony and in 1841 was formally separated from New South Wales and placed under its own independent governor. The principal settlements yet made are those of Auckland (the capital), New Plymouth and Wellington in New Ulster, and of Nelson, Canterbury and Otago in New Munster. Owing partly to gross mismanagement on the part of the New Zealand Company to hostilities wantonly provoked with the natives and other difficulties more or less incident to all new colonial settlements their prosperity has not been very rapid, but now that the most serious obstacles have been either removed or greatly modified, there is little reason to doubt that New Zealand will soon become one of the most valuable, as it is already one of the most interesting of the British colonial possessions. Pop. about 140,000, of whom not more than 70,000 are white colonists, and at least 120,000 Maories or natives of whom not more than 2000 reside on the Middle Island.

NEWAHY is in Hindostan, prov. Ajuamer 37 m. E. by P. Dypoor lat. 28° 55' N. lon. 75° 44' E., at the base of an abrupt rock on the verge of a plain. On the summit of the former is the stone fort of Nimbargh.

NEWARDPUKE, a tn. Hindostan, kingdom of Oude, about 70 m. S.W. Lucknow. Pop. 8000.

NEWARK, a city, United States, New Jersey, on bank Passaic, 3 m. from its entrance into Newark Bay 12 m. W. New York, lat. 40° 45' N. lon. about 74° W. The city is regularly laid-out and has generally, broad and straight streets, many elegant houses, and two large public promenades, bordered by lofty trees, numerous churches, several of which are handsome, a commodious an expensive library, a circulating library, a mechanics institute, for scientific and literary improvement, and a young men's literary association. It has numerous printing-offices, academies, and schools, and is a place of great and increasing commerce. Pop. (1840), 28,392; (1850), 38,885.

NEWARK-UPON-TYNE a port and municipal bor., and market in England, co. Nottingham, on E. bank of

of the Trent, here crossed by a handsome bridge of seven arches, 18 m. N.E. Nottingham, at the junction of the Great Northern and Nottingham and Lincoln railways. It is pretty well built, streets paved, and lighted with gas, with a spacious market-place in the centre and has a respectable townhall, containing some public offices, and an assembly-room, a large and elegant cruciform church, with a light handsome tower, and lofty spire, place of worship for General and Particular Baptists, Independents, Calvinists, Primitive and Wesleyan Methodists, and R. Catholics; a free grammar-school, several sets of almshouses, and various other charities, a considerable trade in corn, coal, cattle, wool, and other commodities, but particularly in salt and from 50,000 quarters of the latter being annually sent to Manchester, Liverpool, and London, and a large linen manufactory. The Trent navigation has been rendered convenient, by the construction of warehouses and wharfs. On the N.W. of the town are the ruins of an ancient castle, rebuilt in the reign of Stephen, and hence called the New-work, whence the name of the town. It returns two members to Parliament. Constituency (1851) 807. Area, 1899 ac. Pop. 11,921.

NEWBALD par. Eng. York (E. Riding), 5450 ac. Pop. 806.

NEWBATTLE a vil. and par. Scotland, co. Edinburgh, in the romantic valley of the E. Esk, about 1 m. S. Dalkeith. It owed its origin to a

Cistercian monastery, the site of which is now occupied by the modern mansion of the Marquis of Lothian, and has a plain parish church, a chapel of ease at Stobhill, a parochial and other schools, and extensive collieries. Archbishop Leighton was some time minister of this parish. Area of par., 44 m. by 3 m. Pop. 2518.

NEWBAVN par. Ind. Wexford 7537 ac. P. 1802.

NEWBEEN a vil. and par. of county U. States, Carolina, on bank Neuse, at its junction with the Trent; lat. 35° 5' N. lon. 77° W. It is pleasantly situated well built, and more healthy than most other places in the state; has a courthouse, jail, theatre, music-hall and three churches, several academies and schools, and a considerable trade in its port, mainly in pork, lumber and naval stores. P. (1850) 4732.

NEWBIGGA par. Eng. W. Somerset 1164 ac. P. 114.

NEWBLISS, a market in Ireland, co. Monaghan, 4 m. E.S.E. Clones with a parish and a Presbyterian church, two schools, a commodious market-house, a well frequented corn-market, and monthly fairs. Near it are several ancient round towers. Pop. 481.

NEWBOLD, two pars. Eng. 1. (Pacey, Warwick 1824 ac. P. 813.—2. (Verdon) Leicestershire 2400 ac. P. 712.

NEWBOLD a vil. and township, England, co. Derby near Chesterfield, with a Methodist chapel, an endowed school, an almshouse, manufactures of earthen and stone ware, and extensive coal and iron mines. Pop. 2085.

NEWBOLD UPON AVON a hamlet and par. England, co. Warwick on the Oxford Canal and the London and Birmingham, and the Midland railways, 2 m. N.W. Rugby, with a handsome church, a chapel of ease, and limestone quarries. Area of par. 4020 ac. Pop. 1178.

NEWBOURN par. Eng. Suffol., 897 ac. Pop. 521.

NEWBRIDGE, a vil. Wales, co. Glamorgan on both sides of the Tŷf, here crossed by a celebrated bridge, called Pont-y-Ffŷd 12 m. S.E. Merthyr-Tydfil. It is a large place, about 1 m. long which has recently sprung up, and attained some importance, in consequence of the mineral resources in its vicinity. It has a church, several dissenting chapels, a school, manufactures of chain cables and similar articles, and of railway plates, and tin-mills, said to be the largest in the world.

NEWBRIDGE, a market tn. Ireland, co. and 5 m. E.N.E. Kildare, 1 bank Liffey, with a handsome R. Catholic chapel, a national school, and large sawy barracks. P. 484.

NEWBURGH, a tn., U States, state and 64 m. N New York, on an acclivity which rises to the height of 800 ft. above r bank Hudson. It has a courthouse and jail, numerous churches and schools, the theological seminary of the Amosites Reformed church; manufactures of carriages, machinery, chains, cordage, candles, &c. several foundries, breweries, canneries, stone and lumber yards, and an extensive trade in agricultural produce in the transporting of which, from the interior, and forwarding to the New York market, many barges, sloops and steam-boats are employed. Pop. (1830) 6424. (1850) 11 415

NEWBURGH, a tn. and par Scotland, co. and 9 m E S E Fife, beautifully situated on a narrow neck of land, r bank Tay which is here divided into two channels, by the island of Mugdrum. It has a spacious and handsome parish church, two U Presbyterian churches, one of them a handsome Gothic structure, places of worship for the Baptists and Independents, a parish, and three other schools, a large and substantial townhall, manufactures of linen, chiefly involving sheeting a good harbour admitting vessels of 500 tons to its quay and a trade in coal, corn timber and the above manufactures, chiefly exported to the W Indies and S America. Near it are some interesting ruins of the celebrated Abbey of Lindores. Area of par 1145 ac. Pop 2988 of tn 2688

NEWBLDEN, a vil and par England, co. Northumberland on the Tyne, 6 m. W N W Newcastle. It has a neat, well-furnished parish church with some ancient monuments a national school, manufactures of crock-glass and chemical products, iron foundries, brick and tile works, a paper-mill and extensive collieries. Area of par, 11,586 ac. P 4816

NEWBURN, par Scot. Fife, 8½ m by 3 m. Pop 870
NEWBURN, a municipal cor. and market tn. England co. Berks, 1 bank Kennet, crossed here by a stone bridge, 18 m. W by S Reading, and on a branch of the Great Western railway. It has wide and well paved streets, lighted with gas, a spacious market-place, substantial townhall or mansion-house a church erected in the time of Henry VII., places of worship for Baptists, Independents, Wesleyans, Society of Friends, and Unitarians, a blue-coat, doocoon and several Sunday schools, some almshouses and numerous charities, and a literary institution with a library attached. The principal trade of the town is in malt and flour for the latter of which there are many large mills on the river. Near it, also, are a small paper-mill and a mill for throwing silk. This town was formerly noted for its woolen manufactures but little cloth excepting serges and shalloons, is now made here. Newbury is a very ancient town, and is celebrated for two severe actions which took place in its neighbourhood, in 1643 and 1644, between King Charles I and his parliament. Area, 1722 ac. P cor 6610

NEWBURYPORT, a tn U States, Massachusetts, on a slope above r bank Merrimac which is here crossed by a suspension-bridge, and about 8 m below falls into a bay of the Atlantic, and on the Eastern railway 30 m N by E Boston. It occupies an area of about 1 sq m is regularly built in spacious streets, several of which rise in terraces, parallel to the river, and has a substantial mass of granite, with a Doric portico, free court-house, ten churches one of which contains the remains of the celebrated preacher, Whitfield who died here, September 30, 1770 a fine academy a lyceum, a high school and several other superior scholastic establishments, a jail, &c. paper filling flour, and saw mills and a considerable coasting and foreign trade, for which a spacious and safe harbour though somewhat obstructed at its entrance by a sandbank, affords great facilities. In 1850, the total tonnage of the district was 23 262 tons, of which a considerable proportion was employed in the coal and merchantable fisheries. P (1830) 6275 (1850) 9573

NEWBYTH, a vil. Scotland, co. and 81 m N N W Aberdeen. It is well built has a chapel of ease, a school, manufactures of dowels, a distillery, and an annual cattle fair Pop. 1898

NEWCASTLE, five pars. Ire. — 1 Dublin, 4398 ac. Pop 963 — 2 Tipperary 10 855 ac. Pop 3429 — 3, Waterford; 9863 ac. Pop 846. — 4 (Lower), Wicklow 4780 ac. Pop. 984 — 5 (Upper), Wicklow, 7026 ac. Pop. 3214

NEWCASTLE. — 1, A small seaport, Ireland co. Down, at the S. extremity of the Mourne mountains, and the W point of Dundrum Bay 11 m S S W Downpatrick, with a parish Presbyterian, and Wesleyan churches an infant and two other schools, and a good pier at which some trade is carried on. Newcastle is much frequented for sea-bathing. P 879.

— 2, A tn and par Ireland co. and 24 m S W Limerick; with a neat parish church, a large R. Catholic chapel, a free school a spacious market-house, military barracks, a union workhouse an hospital, and the remains of an old castle, which belonged to the Templars, manufactures of coarse woollen, dye-works, and a bleachfield. Pop. 5600. — 3 Formerly Kingston, a seaport tn. New S. Wales, at the mouth of the Hunter lat. 33° 56' S., lon 151° 44' E. 70 m N E Sydney. It is a free port, and is fast rising into eminence, in consequence of its position, and the coal-mines near it, which are actively worked. The harbour is difficult of access but will admit vessels of any size; which, when once in, are quite safe — good anchorages in sand or mud. Pop. 1471. — 4, A tn U States, Delaware, r bank Delaware 5 m S S W Wilmington, with a Presbyterian, Episcopal R. Catholic, and two Methodist churches an academy a townhouse court-house jail and arsenal, and an extensive establishment belonging to the Newcastle and Frenchtown railroad company for the manufacture of steam-engines, castings, &c. P 3737

NEWCASTLE, par Australia, N. E. coast, N end of Cape York Peninsula, 13 m in width, and about 8 m. in depth inland, lat. 10° 50' S. lon 142° 35' E. The shores are low and sandy

NEWCASTLE-EMERY, a market tn. Wales co. and 14 m N N W Carmarthen, r bank Towy, here crossed by a handsome bridge, with a spacious church Independent, Baptist, Calvinistic, and Wesleyan Methodist chapels, and the remains of an ancient castle. Area, 6429 ac. Pop. 1080.

NEWCASTLE-UPON-TYNE, or **TYNEM-LE-TOUR**, a par. and municipal cor. England, co. and 14 m N Stafford on the slopes of two hills on the Staffordshire railway. The houses are mostly of brick, and these show the principal thoroughfares generally well built, many of them large and handsome, and the streets are lighted with gas. It has a handsome townhall savings bank, public baths, a theatre; two Established churches one of which has an ancient tower of red sandstone, chapels for Wesleyan New Connexion, Primitive, and Calvinistic Methodists, Independents, Baptists, and R. Catholics a free grammar and several other schools, almshouses and a literary and scientific institution with a good library attached, two extensive full mills, and one large cotton manufactory clock and paper making are also carried on to some extent, and some lace is made. Near it are several considerable collieries, and iron-works. It sends two members to Parliament. Consistency (1851) 1090 Pop. cor (1851) 10,569

NEWCASTLE UPON TYNE, and **POSS ELSA** 1 bank in, and river port, England, co. Northumberland 1 bank Tyne, and about 8 m above its mouth in the German Ocean, and on the Newcastle and Carlisle the Newcastle and North Shields the York Newcastle, and Berwick sections of the North Eastern railway (added to which is the Blyth and Tyne railway, lat (bridge N end) 55° 58' 42" N, lon 1° 55' 30" W (N) It occupies the sides and summits of three acclivities which rise steeply from the river and extends about two miles along its bank. It was once surrounded by a wall and a deep fosse—the former 8 ft. thick and 12 ft. high and flanked by numerous towers. The fosse has been completely filled but fragments of the walls and towers are still to be seen. In the older portions of the town the streets are narrow and winding, and the houses of an irregular and often very antique appearance, but owing to the very extensive improvements which have been effected in recent years, many streets in the same locality have been completely modernised, and rendered both spacious and handsome. In the newer parts of the town many streets and squares, lined with elegant mansions not often equalled out of the metropolis, have risen up, while whole suburbs of villas have spread in all directions, and more especially in the W. A powerful stimulus to efforts in this direction was rapidly supplied by the late Mr. R. Grainger, and so extensive and rapidly executed were the works undertaken by that gentleman that he is said to have planned and constructed in the space of five years, streets and buildings

at a cost of nearly a million sterling. One of these streets, called *Grey Street*, both from its width and the style of its architecture, is very imposing, and would do honour to any capital. The whole town is well paved and lighted, but the sewerage remains somewhat imperfect. The water-supply, both as to quality and quantity, has also from time to time been a subject of complaint, but active measures are (1887) being taken to remedy these defects, and thus to improve the sanitary condition of the town.

The most important public buildings are the church of St. Nicholas, an ancient, spacious, and handsome structure, chiefly in the decorated English style, with a tower, crowned by octagonal turrets from which four battresses rise, and terminate in a small crocketed spire, the whole 198 ft. high, and almost unequalled for its light and beautiful proportions; the church of All-Saints, a handsome Grecian structure with a Doric portico, a circular interior and a tower terminating in an elegant spire 202 ft. high; the church of St. Andrew a very ancient structure, partly Norman, with a large but low embattled tower; the church of St. John of ancient date

and large dimensions, with some interesting monuments; the church of St. Peter, an elegant modern building, with two fine windows of stained glass; the church of St. Thomas, built in the early English style, with a lofty embattled tower and graceful minaret; the R. Catholic church and cathedral of St. Mary, a magnificent modern building in the early English style; numerous other Dissenting chapels, several of them handsome; the Town hall a handsome and substantial modern edifice; the Central Exchange and News-room, forming a spacious semicircular Ionic building; the Guildhall or original Exchange, the Merchants Court, the Corn Exchange, the Assembly-rooms, the Music Hall in which the sessions for the county of Northumberland are held, a handsome range of buildings situated within the precincts of the ancient castle, and erected at an expense of £32,000; the Castle itself, one of the finest specimens of castellated Norman in England, and recently restored in many parts to its original style and character; the Jail and House of Correction completed on the most improved principles and enclosed with an area of 3 ac. by a stone wall 25 ft. high; a large savings bank; an

NEWCASTLE, FROM GATEHEAD, WITH THE HIGH LEVEL BRIDGE.—Drawn and Engraved by J. L. Willsons.

elegant theatre &c. public baths, and particularly handsome and commodious butcher, grocer, fish and cattle markets. Another structure, for which Newcastle has recently become celebrated is the High Level Bridge, one of the grandest engineering achievements of the late Mr. R. Stephenson. It consists of six arches, each having a span of 125 ft., with two curved approaches, 66 ft. in length, the whole being formed of cast-iron pillars and arches. Above is a viaduct for the railway while underneath is a passage for foot passengers and goods traffic, the total cost of the great work including land and compensation, having been £491,183. By this means ready access is obtained to the sister borough of Gateshead. On the low level, communication between the two towns is at present (1887) conducted by a temporary wooden bridge, the old stone section being in course of removal to give place to a more modern structure, in which provision will be made for the inlet and outlet of vessels. Another imposing public building is the Central Railway station, one of the most magnificent structures of the kind in the kingdom, its proportions having been recently greatly enlarged by the addition of a handsome portico. The more important libraries and other institutions are the Free Grammar-school, the Royal Jubilee, national, infant, and many other schools; the Northern Counties Institution for the Deaf and Dumb; the College of Medicine and Surgery, the lecturer of which qualify for the diploma of the London College of Surgeons; and the House of the Apothecaries Company; the Literary and Philosophical Society occupying a handsome Dove building, in which a museum and library are included, the Natural History and Antiquarian Societies, both with valuable collections; the Botanical and Horticultural Society; the Institution for the

promotion of the Fine Arts; the Mechanics Institution, the Infirmary occupying a large and handsome building; the Victoria Blind Asylum; the Hospital of St. Mary Magdalene, the Keelson, Jesus and several other hospitals and charitable endowments.

The manufactures are very extensive, and possess an wonted facilities both from the means of transport by the improvements lately effected in the navigation of the river under the direction of the Tyne Commissioners, and from the unlimited supplies of excellent and cheap coal obtained from the neighbouring collieries. Within the town or in its immediate vicinity, are numerous blast-furnaces, and important mailable and other ironworks. Iron goods, also, including hardware and large castings, are made at numerous extensive establishments. The other most important staples are locomotive and other machinery, earthenware, glass, chemical products, sheet and pipe lead, cordage and cables, painters' colours, soap, railway and other carriages, brassware, patent shot, brinks and tiles, paper millcloth, &c., while the extensive works of Sir W. G. Armstrong and Co. at Elswick, for the manufacture of ordnance, afford employment to a large number of men. There are, also large flax and spinning mills; flour, bone, oil and saw mills; and extensive building-yards, at which great numbers of sailing vessels and steamers, both in wood and iron, are constructed. The coasting and export trade, including both the above articles of manufacture, and grindstones (for which Newcastle has long been celebrated) salt, and more especially coal and coke, is most important. The following, according to *Brown's Export List*, edited by Mr. J. B. Bates, are the quantities shipped coastwise and over sea for the last three

years ending 31st December 1886, independent of an insurance quantity sent by railway:—

COAL.		CORK.	
Counters.	Oversea.	Counters.	Oversea.
Tons.	Tons.	Tons.	Tons.
1884 3,285,662	1884 9,616,993	1884 16,705	1884 152,054
1885 3,613,654	1885 9,277,653	1885 12,451	1885 155,489
1886 3,620,447	1886 9,808,512	1886 9,454	1886 174,591

The total value of goods, exclusive of coal and coke, exported from Newcastle to foreign parts was in 1884, £776,472 in 1885 £1,147,301 and in 1886, £1,844,946. The total number of ships which entered harbour from foreign and colonial ports during 1886, was 2358. Of these the Channel Islands contributed 3; France, 100; Holland, 344; Belgium, 110; Norway 887; Sweden, 247; Denmark, 176; Germany 133; Prussia, 506; Russia 123; Portugal, 130; Spain 263; Italy 14; British America, 33; South America, 11. The number of vessels shows an increase of 887 over those of the previous year. The more important imports are corn, spelt, gram, clover and other seeds, fax, hemp oak-bark, fruit wine spirits, colonial produce tallow hides tar and pitch oil brimstone, bones, bristles, rags, timber and cabinet-wood, pig-iron &c. The island trade is also very important, and has in recent times been greatly augmented by the different railways. Steamers ply regularly to St. John's, Leith, and other places in N. and S. of Tyne-mouth. Besides the regular weekly markets for provisions, there are large corn and cattle markets and among the general horse and cattle fairs, one held in October lasts for eight days.

Newcastle appears to have been a Roman station and to have derived its name of Pons Ælii from a bridge erected over the Tyne by the emperor Hadrian. The Roman wall, also (according to its historian Dr. Bruce) built by Hadrian passed through it and terminated at Wallend about 8 m. E. In after times it became so famous for its monastic establishments that it took the name of Monkchester and was the resort of numerous pilgrims, who came to visit the holy well of Jesus Mount, near Jedwood, about 1 m. N. E. It owes its name of Newcastle to a fortress built by Robert eldest son of William the Conqueror. It was first surrounded by walls in the reign of Edward I. During the reign of Charles I. it was surprised and taken by the Scottish army under Leslie. Among its eminent natives are Denis Scotus Almonde the poet, Hutton the mathematician, the Earl of Eldon, the celebrated English chancellor and his scarcely less celebrated brother Baron Stowell judge of the admiralty court. Admiral Collingwood George and Robert Stephenson father and son the eminent engineers, and the celebrated wood-engraver Bewick, were also born in the immediate vicinity. Newcastle returns two members to the House of Commons. The borough is divided into nine wards; and the municipal government is vested in a mayor, 14 aldermen, and 40 councillors. Three daily and three weekly newspapers are published in the town. Pop. of borough in 1861, 109,281.

NEWCHAPEL, par. Irish, Tipperary 4873 an. P. 1065. NEWENT a market in par. England so and 8 m N W Gloucester. The town once more important than at present, on the Hereford and Gloucester Canal consists of three irregular streets and has a spacious and handsome parish church, with a tower terminating in a lofty spire two dissenting chapels, and a good national school. Area of par, 7308 ac. Pop. 2302.

NEWFOUNDLAND (Latin *Terra Nova*, French, *Terre Neuve*, German, *Neu-Fundland*) a large ill. British A. America, Atlantic Ocean, at the mouth of the Gulf of St. Lawrence, and nearer to Britain than any other part of America—the distance from the port of St. John to the harbour of Valence, in Ireland, being only about 1918 m. Its N. part is separated from the coast of Labrador by the Strait of Belle Isle, and its S. W. extremity from Cape Breton and Nova Scotia by the great entrance into the Gulf lat. 46° 37' to 51° 40' N.; lon. 53° 45' to 69° 31' W.; greatest length, N. to S., 250 m.; average width, 180 m.; area, 57,000 sq. m. It is of extremely irregular form, with a coast-line, peculiarly so, of the S.E. and S., broken up in a remarkable manner

by broad and deep bays, harbours, coves, inlets, and lagoons. The most remarkable of these indentations are Hare, White, and Notre Dame Bays, Bay of Exploits, Bonaville, Trinity, and Conception Bays, on the E. coast, St. Mary's Bay, Fortune and Placentia Bay, on the S. coast, and St. George's Bay, old Bay of Islands, on the W. There are, besides these, hundreds of smaller bays and harbours. Many of these are extensive, commodious and well sheltered with numerous rivulets running into them. While most of the harbours have complete anchorage, with clear and good channels. The interior of the island, of which little was known previous to 1822 appears to be rocky with numerous tracts of moss, much intersected by rivers and lakes, and but thinly wooded except on the banks of the rivers. Great boulders, or loose rocks scattered over the country increase the general roughness of its appearance and character. Hills and valleys continually succeed each other the former never rising into mountains (the highest not exceeding 1500 ft.) and the latter rarely expanding into plains. The sea-cliffs are, for the most part, bold and lofty with deep water close to. Rivers and lakes are numerous, and some of them of considerable size. The largest of the former are Humber river and the river Exploits, both issuing, like all the other streams in the island, from lakes or ponds in the interior some of which are of great extent the largest called Grand Pond being from 50 to 60 m. long, and 5 m. broad while the next in dimensions, Indian Lake, is 30 m. long and from 3 to 5 m. broad. The prevalent formation of the island is granite and in some parts porphyry quartz gneiss, mica and clay slate, with secondary formations. The minerals of the island comprise coal gypsum copper lead, and it is said, iron. Salt springs are reported near the W. coast. The whole of the land in and about the neighbourhood of Conception Bay—very probably the whole island—is rising out of the ocean at a rate which threatens at no very distant day, materially to affect many of the best harbours on the coast. At Pointe-de-Grave, in Conception Bay several large flat rocks, over which schoolboys might pass some 30 or 40 years ago with the greatest facility are now approaching the surface, the water being scarcely navigable for a skiff. The climate, though severe is healthful, the mortality among the inhabitants being on a lower scale than in any portion of the American continent—the deaths, according to the population returns, being only 1 in 78—while in no other country is old age attended with greater bodily vigour and mental animation. Winter usually consists of a series of storms of wind, rain, and snow lasts from the beginning of December until the middle of April. January and February are the coldest months. Snow does not lie long on the ground, and the frost is less intense than in W. Canada, though the thermometer frequently falls 30 below the freezing point. The summer is short and warm. In May and the beginning of June, dense fogs prevail on the banks and neighbouring shores, but they do not appear to be in the least prejudicial to health. The principal trees are spruce larch larch, willow, and mountain ash. Rubus and trailing evergreens are met with in great variety, and the berry-bearing shrubs clothe every swamp and open tract. European and American groves of various kinds, as well as also natural oak and white alder and birch. Agriculture employs a large portion of the inhabitants. The crops generally are abundant, particularly potatoes. Grain crops also thrive well, wheat having been known to yield 50 bushels per acre, but both climate and soil are perhaps fully more favourable to pasturage and green crops than to grain. The wild animals are the deer bear wolf, hare, beaver martlet, dog wild cat, rat, and mouse. The pure breed of Newfoundland dogs, so much celebrated for their sagacity and fidelity, is rarely to be met with, those generally seen in the island being crosses of every conceivable variety. Birds are numerous, both land and aquatic. On the coasts, the moose or sea-horse formerly abundant, but has been nearly annihilated. Seals are numerous on the coasts as are also whales, grampuses, and porpoises and the famous banks of Newfoundland swarm with almost every variety of fish, particularly cod. These banks form the most extensive submarine elevation on the globe, in their full extent, they occupy 16° of lon. and nearly 10° of lat. and are between 600 and 700 m. in length, with a depth of water varying from 4 to 160 fathoms, 40 being supposed the mean depth. The shores of Newfoundland, however, equally abound with cod as the banks, and are pre-

fished by the English as fishing ground, being more convenient for drying and drying their fish, and less exposed to the fog, rain, and sleet so frequent on the banks. The cod fishery opens at the beginning of June, and lasts till about the middle of October and may be said to form the staple occupation of the inhabitants of this colony. In 1846, the number of persons engaged in that fishery was 35,499, and the number of their boats 10,089. The value of the dried cod fish exported, in 1846, was £265,482 and of cod oil 257,672. The herring fishery has been almost wholly neglected, though the shores of Newfoundland swarm with that valuable fish, and the salmon fishery is not more energetically prosecuted. The seal fishery is next in importance to the cod fishery; the number of vessels engaged in it, in 1847, was 340—tonnage, 29,984—men employed, 11,000—number of seals caught, 455,130—estimated value, £214,175. The total exports of Newfoundland amounted, in 1849 to £276,567, and the imports to £270,190; of the former sum, the fishery exports alone amounted to £253,004. Shipping—towards 125,166 tons outwards, 127,365 tons.

The aboriginal inhabitants of Newfoundland, supposed not to be numerous, are remarkably shy of intercourse with Europeans, confining themselves wholly to the interior of the island with their settlers have little or no communication. A large proportion of the settlers are natives of Ireland, and of the islands of Guernsey and Jersey and their descendants but many of the inhabitants are also from other parts of the United Kingdom. The population has retained the habits of their old country to a greater degree than in other N. American settlements.

The government of Newfoundland is administered under a constitution granted in 1832 by a governor, an executive council consisting of 9 members, who also compose the legislative council, and a house of assembly consisting of 15 representatives. Justice is dispensed by a chief justice and an assistant judge, and the police is under the management of one chief and two junior magistrates. The most perfect toleration is here extended towards all religious sects. The R. Catholics are the most numerous, amounting to 45,725 persons; the Church of England next, 34,381, and the Wesleyans third 14,289. The educational institutions consist of a male orphan asylum with 470 children, 8 grammar-schools and academies, under the control of the local government, 40 schools established by the Newfoundland and British North American School Society on the Madras system with about 2784 male and female pupils in 1848. 8 schools under the Wesleyan Methodists, and a convent school, with 400 female children. Elementary schools have, besides, been established in every district in the island by the local legislature.

Newfoundland is supposed to have been discovered by the Norwegians, or Northmen, about the year 1000 but, if so, it was re-discovered by John Cabot on the 24th June, 1497, when he took formal possession of the island in which a settlement was subsequently formed by some Portuguese adventurers, who were in turn expelled by Sir Francis Drake in the reign of Elizabeth. After this period numerous English colonies were established from time to time along the E. coast, and several French along the S., in the Bay of Placentia. But, in 1713, Newfoundland and its dependencies were declared, by the treaty of Utrecht, to belong wholly to Great Britain the French reserving a right to fish and cure on certain parts of the coast. The only noteworthy town on the island is St. John's (which see) Pop. (1850) estimated at upwards of 100,000.

NEWHAVEN, a tn. and par. England, co. Sussex, near the mouth of the Ouse, here crossed by a draw bridge, 8 m. E.S.E. Brighton and on a branch of the Brighton and South Coast railway. It has a parish church, a Dissenting chapel, a national school, and a harbour which, from the important improvements recently made upon it, is considered the best tidal harbour between the Downs and the Isle of Wight, and from which steam-packets sail to France. Ship-building is carried on to some extent. Area, 1217 ac. Pop. 1356.

NEWHAVEN a vil. Scotland, co. and 2 m. N. Edinburgh on the S. shore of the Forth of Forth. It consists of an original village, composed, for the most part, of mean huts, occupied by fishermen, and a more modern portion, containing a great number of good houses and villas, occupied chiefly as lodging-houses and sea-bathing quarters; and has an Exten-

sion and a Free church and valuable oyster and other fisheries. A little W from the village are the excellent harbour of Granton, and a terminus of the Edinburgh, Leith, and Granton railway. Pop. 2108.

NEWHILL, a vil. and par. Scotland co. and 6 m. W. N. Aberdeen near the Dorn with a handsome parish church, a parochial school, a worsted 2w snuff and numerous flour mills, a brewery, extensive manufactures of paper and valuable granite quarries. Area of par. 6 m. by 6 m. Pop. 3335.

NEWICK par. Eng. Sussex 1966 ac. Pop. 966. NEWINGTON several par. Eng.—1 Kent 2108 ac. Pop. 781.—2 Oxford 871 ac. Pop. 408.—3, (Lagpack) Gloucester; 2181 ac. Pop. 289.—4 (near 2750); Kent 8794 ac. Pop. 459.—4, (St. Mary; Surrey; 634 ac. Pop. 64,016.—6, (South) Oxford; 1450 ac. Pop. 419.

Cork, on the Dublin with a handsome Protestant and a R. Catholic church, national and several other schools, a good market house, and a corn mill. J. Philpot Curran was born here. Pop. 1265.

NEWMARKET, a market town, Flint, 1031 ac. P. 642. NEWMARKET, a market town, England, partly in co. Cambridge and partly in co. Suffolk 56 m. N.E. London, on a gentle declivity on the Eastern Counties railway. It has a handsome church, an Independent chapel, a library institution, public assembly-rooms, several schools, a lottery club, and corn market and malt making and brewing are carried on. But Newmarket derives nearly its whole importance from its celebrated race-course, and horse-training establishments. The former which is about 8 m. W from the town, is between 4 m. and 5 m. long, and is considered the finest in the kingdom. The races are held seven times in the year. The training of horses, for which there are no fewer than 15 establishments, is the chief business of the place, and is a source of large emolument. The training ground admirably adapted to its purpose is 14 m. long. Area, 3200 ac. P. 3856.

NEWMAKETH-TOWN, a tn. in Ireland to Clare near the N. E. shore of Lough Fergus, 6 m. S. S. E. Kinsale. It has an Established church, a R. Catholic chapel, two schools and a dispensary. Inhabitants chiefly agricultural, but many young women sew muslin. Pop. 1111.

NEW MILLS, a vil. Scotland Ayrshire, 7 m. S. Irvine Water, and on a branch of the Glasgow and South Western railway, 7 m. E. Kilmarnock. It is tolerably well built, has an Established, a Free and a U. Presbyterian church—all handsome modern buildings several schools, a charitable endowment, manufactures of fine cotton fabrics and Jacquard machines and a worsted-mill. Pop. 2211.

NEWNHAM, several par. Eng.—1 Hants 1008 ac. Pop. 580.—2 Hants 561 ac. Pop. 150.—3, Kent 1298 ac. Pop. 451.—4, Northampton 1940 ac. Pop. 679.—6 (Hertford) Oxford 1830 ac. Pop. 227.—8, (Essex) Warwick 1418 ac. Pop. 119.

NEWNHAM, a market in par. par. England to and 10 m. W. S. W. Gloucester, 1 bank Severn, with a church, Independent and Wesleyan chapels, a good school, and a harbour admitting vessels of 150 tons; some trade and ship-building. Coal and iron are extensively worked in the vicinity. Area of par. 2105 ac. Pop. 1268.

NEWNTON two par. Eng. Wilt.—1, (Long), 2289 ac. Pop. 994.—2 (North), 1831 ac. Pop. 964.

NEWPORT several places, England.—1, A municipal and par. bur. and market in par. and par. of Wight, 15 m. S. S. E. Southampton, on a gentle ascent, 1 bank Medina, which is navigable to the town for small craft. It consists of five principal parallel, E. to W. streets, and three or four others intersecting them at right angles, all kept in excellent order well paved and lighted with gas houses of brick, mostly well built. It has a handsome cornhall, comprising public offices, and an excellent market-place beneath; a small theatre, jail, and house of correction, two churches, one a spacious, modern structure, with an embattled tower the other a ruinous old edifice, built in 1173, place of worship for Baptists, Independents, Wesleyans, Unitarians, R. Catholics, and others; a royal national a royal British, a blue-coat,

and several Sunday-schools, a set of almshouses, a mechanics institute, a library and philosophical institution, a literary and scientific institute, and four friendly societies. Looe is made here, employing about 800 hands, also agricultural implements, for which Newport has a wide reputation. There is likewise, a considerable trade in coals, wheat, and flour. But the principal business of the place arises from its being the market town of the agricultural and grazing districts around. About 1 m. S.W. from the town are the ruins of Carnabrook castle.

The borough sends two members to Parliament, constituency (1851), 707. Area of par., 60 sq. Pop. 5094. Pop. bor., 5047.—(Local Correspondent).—A seaport and market tn. and par. bor., on 20 m. S.W. Monmouth. A bank, the harbor, here crossed by an elegant stone bridge about 5 m. from its mouth, in the estuary of the Severn, and on the Monmouth and Cardiff railway. It is very irregularly built except in the more modern parts which are elegant and has a parochial and a handsome district church, a maritime church, and places of worship for Baptists, Independents, Wesleyans Society of Friends, and Catholics, a good haven and a considerable trade. Chief exports iron, coal, and tin-plate, imports, provisions, timber from America, and general goods. The dock is spacious, and capable of all masting vessels of any dimensions and burden, at all states of the tides. Ship-building is carried on to a great extent. There are also here several iron foundries, an extensive nail factory, several saw mills, and large anchor and chain-cable manufactories, &c. It unites with Monmouth &c., in sending a member to Parliament. Pop. 18,323.—A market tn. and par. Shropshire 16 m. N.E. Shrewsbury, with a church, an Independent chapel, two free schools and two sets of almshouses. Area of par. 567 ac. Pop. 2908.—A vil. Corn wall separated by a rivulet from Looe, of which it may now be considered a suburb, having been incorporated with it by the Reform Act. It was previously an independent borough, and had returned two members to Parliament from the time of Edward I. Pop. 1088.—A seaport and par. Wales, on Pembroke, on an acclivity, at the mouth of the Nevers, in St. George's Channel. It has small, irregular streets neither lighted nor paved, an ancient church, Baptist, Independent, and Calvinistic Methodist chapels, several schools, the remains of an old castle, extensive slate quarries, a small harbour which affords good shelter for coasting vessels, and at which a considerable trade is carried on in exporting iron, butter, and slate, and importing coal, oil, and limestone. Area, 4711 ac. Pop. 1716.—A (Popcorn) market tn. and par. on Buckingham on the Ouse 43 m. N.W. London. It has a noble-looking church, places of worship for Baptists, Independents, and Wesleyans, several schools, a few almshouses, a circulating library, savings-bank, and a society for promoting Christian knowledge. Area of par., 8720 ac. Pop. 8651.—A par. Essex 1714 ac. Pop. 896.

NEWPORT two places, Ireland.—1 (or Newport-Pratt) A market tn. and seaport co. Mayo at the head of Clew Bay at the mouth of a river of same name, here crossed by a good stone bridge. It has a most modern church, a spacious R. Catholic and a Methodist chapel, a national school, a courthouse, a union workhouse, a spacious harbour, admitting vessels of 400 tons, and a considerable trade in grain. The old castle of Carrickmaddy is in the vicinity. Pop. 864.—2 (or Newport-Tip) A market tn. co. Tipperary 11 m. N.N.E. Limerick, with a neat parish church, a R. Catholic chapel, a national school, and small industry hereabout. Pop. 1112.

NEWPORT, a seaport in U. States, once cap. of Rhode Island, finely situated on its S.W. shore, at the mouth entrance of Narragansett Bay, 84 m. S. by E. Providence. It is defended by two forts, and has 12 churches, a Jews synagogue, a shaloshah, custom-house, market-house, school, and library, and a curious old tower, which has yielded forth much learned but fruitless disquisition. The manufacturing establishments include some large cotton and woollen factories; and the trade is extensive, having the benefit of one of the largest, safest, and most accessible harbours in the Union. In 1850 the tonnage of the district, chiefly coasting, and partly employed in the whale, cod, and mackerel fisheries, was 10,578 tons. Newport is one of the few places which have not increased since the revolution. It was then about 10,000, and, in 1850 only 9568. Vol. II.

NEWRY, a tn. river-port, par. bor., and par. Ireland, partly co. Down, and partly co. Armagh, finely situated in a valley, on the Dublin and Belfast Junction Railway, and on the Newry canal and Newry river, which a little below forms the estuary of Carrlingford Bay and is crossed by several bridges 29 m. S.S.W. Belfast. It consists of a handsome square, and a number of generally straight and well-kept streets, lined with substantial brick houses, and has two Episcopal churches, one of them with a spire 100 ft. high, three Presbyterian, two Methodist, and two R. Catholic chapels, a handsome courthouse, several superior schools, a summary, a savings bank, assembly and reading rooms, a mechanics institute, several religious societies, manufactories of them, an extensive iron and brass foundry, and several corn-mills. By means of the river and canal it is accessible by vessels of 600 tons and carries on a considerable trade, exporting grain, cattle, and butter and importing coals, iron, hardware &c. It returns a member to Parliament, constituency (1851) 517. Area of par. 5470 ac. Pop. 24,509. Pop. tn., 18,475. Pop. bor. 13,237.

NEWRY, par. Irel. Armagh 968 ac. Pop. 804. NEWTIMBER par. Eng. Essex, 1693 ac. Pop. 161. NEWTON par. Scot. Edinburgh 3 ag m. Pop. 1780. NEWTON several places, England.—1 A vil. Longendale Cheshire, on a declivity 8 m. E. by S. Manchester and a station on the Manchester and Sheffield railway, with a parish church, in the Norman style, two Methodist chapels, a national and other schools, and several cotton mills, in which the inhabitants are chiefly employed. Pop. 1558.—2 (Aldon) A market in Devon, 14 m. S.S.W. Exeter, with an Established church, places of worship for Baptists and Independents, tanning and shoemaking are carried on and large quantities of shoes are exported to Newfoundland. Pop. 2147.—3, (or Newton-Heath) A chapelry Lancashire about 8 m. N.E., and in the bor. of Manchester with an Episcopal and a Wesleyan chapel and two schools. Inhabitants chiefly engaged in the extensive cotton manufactures of the district. There are also here steel-works, fly-works and a very large manufactory of insulator machines. Area, 1280 ac. Pop. 10,801.—4, (or Newbyfield) A market in Lancashire, 15 m. E. by N. Liverpool on the railway to Manchester; consisting chiefly of one broad street, with some good houses in the vicinity are several extensive works, including iron, brass, alkali works, and crown-glass making. It has a neat stone church with a conspicuous spire, an Independent chapel and several schools. Races take place annually in July on a large common within a short distance of the town. Pop. 8719.—5, (Pettit) A vil. See Forrester-Newton.—6, (or New-Cow) A vil. and par. co. and 8 m. N.W. York L. bank Ouse, on the York and Newcastle railway built with a church a Wesleyan chapel and a charitable endowment. Area of par. 4690 ac. Pop. 947.

NEWTON, numerous places Ireland.—1. A par. Meath 1108 ac. P. 157.—2. A par. Westmeath, 10,249 ac. P. 2489.—3. (Derry), A. vil. co. and 23 m. N. W. Wexford, at the junction of the Clody with the Blaney, which is here crossed by a handsome stone bridge. It has a parish church, several schools, an hospital barracks, manufactures of linen and flax, and a slate quarry. Area of par., 5284 ac. Pop. par. 3123, vil. 1307.—4. (Sawney), A. market tn. co. Ty. runs 9 m. N. by W. Omagh. It has a parish church, a R. Catholic, two Presbyterian, and two Wesleyan Methodist chapels, a national school and a dispensary. The ruins of an old castle occupy the summit of a hill, and there are several interesting antiquities and fine seats in the vicinity. P. 1403.

—5. (Mount-Kennedy), A. vil. co. and 8 m. N. by W. Wicklow with a handsome chapel, surrounded by a pinnacled tower, a parsonage, school, hospital, and dispensary. P. 717.

—6. (Bally), A. tn., co. Fermanagh 154 m. S. S. E. Kesh, united with a neat parish church, R. Catholic, Methodist and Wesleyan chapels, a school, and court-house, and manufactures of tobacco and snuff. Pop. 677.—7. (Forkes), A. vil. co. and nearly 3 m. N. W. Longford with a Protestant Episcopal church, and a R. Catholic chapel. Pop. 821.—8. (Hornsea), A. tn. and par. co. and 11 m. S. S. E. Armagh, in a valley, inclosed by steep hills. It consists of four streets, badly built, and worse kept, and has a parish church, about 1 m. distant from the town. Presbyterian and R. Catholic chapels, a national and two other schools, and some trade in flax. A considerable number of the young women are employed in sewing muslin. Area of par., 12,406 ac. Pop. 6285.

—9. (Clontarf), A. par. and par. 566 ac. Pop. 227.—10. (Crommelin), A. par. and tn. Antrim, 3446 ac. Pop. 878.—11. (Clonsilla), A. tn. co. CONNEMARA.—12. (Lennan), A. par. Tipperary 5774 ac. Pop. 1428.

NEWTONMILLMADY, a market tn. Ireland, co. and 16 m. S. S. E. Londonderry r bank Roe, here crossed by a stone bridge. It has a large parish church, three Presbyterian, a R. Catholic, Unitarian, Independent, and two Wesleyan Methodist chapels, three national, and several other schools, a savings-bank, dispensary, union workhouse, and bric-a-brac manufactures of linen and a considerable

trade in flax and grain. Along the banks of the Roe, which, being preeminent and well wooded, are very picturesque, is the Lemanahy or Dog's Leap, the ancient castle of the O'Connors, from which the town takes its name. Pop. 3204.

NEWTON, a vil. and par. Scotland co. Farber on a branch of the Scottish Midland Junction railway. It has a parish and a U. Presbyterian church, a school, manufactures of smoking, shothing, Osnaburghs, &c. two saw and two flour mills. Area of par., 2 m. by 2 m. Pop. 1141.

NEXOL, a seaport tn. Denmark, lat. Bornholm. Besides tolerably secure roads, it has a harbour admitting vessels drawing 5½ ft.; manufactures of woollens, several distilleries and breweries, and some slugging and general trade. Near it are sandstone and millstone quarries. Pop. 1400.

NEYBER, or Narva, a river lat. Heyu, which descends from the mountains of China, near the N. W. side of the peak of Lanki, flows S. W. through a valley of some some passing the town of St. John and falls into the Bay of Nkybe, after a course of about 80 m. Its navigation is obstructed by a bar across its mouth.

NEYKAWAH, a tn. Hindooistan, prov. Ajmer, a large and strong place, enclosed by an irregular stone wall and nearly inaccessible from the extensive nurseries by which it is surrounded. Numerous temples, images, and sculptured monuments, are dispersed about the neighbourhood.

NEYTA, or Narva, a co. New Guinea, cap. dist., on the Magdalen, at the confluence of the Nerya, 180 m. S. W. Biogata. It suffered severely from an earthquake in 1827, but is still a place of some importance, and carries on a considerable trade in cacao of excellent quality.

NGAMI, a lake in the interior of S. Africa, about lat. 20° 30' S. lon. 25° E. It has been known vaguely from report ever since the establishment of intercourse between the Cape Colony and the Bechuanaland tribes, N. of the river Orange. In 1816, it was described in the missionary "Nabell" under the name of Mumpuri, that is, the country of lions, and the fact, that it is navigated, was not omitted. It is also well known to the Zulus, N. of Natal, who name it Ulika, and consider it as three months distant. The Bechuanas generally call it, from its name, Makufa. A navigable lake so clearly indicated in the heart of the continent, was an attractive object for travellers, but the difficulties awaiting the attempt to reach Lake Ngami, seemed at first insurmountable. The chief of these consisted in the desert of soft sand extending from W. to E., with a width of 100 m., N. of the country of the Bamangwato in lat. 23° S. The depth of the sand and the scarcity of water, render the attempt to cross this desert extremely hazardous. At length in June 1849, this dangerous tract was crossed by Mr. Cotton Oswell and the Rev. David Livingstone, and they came upon the Zonga, a river which flows from the lake about 250 m., irregularly E. and S. E., until it spreads out into a lagoon, and is wasted in the sands. Following this river upwards, they arrived at the village of the Batetani a branch of the Bamangwato tribe, who are settled on the lake in lat. 20° 25' S. lon. 23° 30' E. From the shore of the lake, S. W. of the village no land could be described over it in the W. and N. W. Towards the W. end, the width seemed to be 16 m. The natives stated that it was a three days' journey quick travelling, 75 m., along its S. and W. shore, to the point where a river enters it from the N. W. This river (the Tso) flows so rapidly, that once cannot ascend it by paddling. The Zonga, issuing from the lake, is at first a fine river from 300 to 500 yards wide, lower down, it becomes narrower with high banks, there it spreads out again, divides into rivulets, and disappears in the plain.

The banks of the Zonga are generally of a calcareous soil, and are lined with trees of stately growth; some of these appear to be varieties of the Baobab (*Adansonia*), with which are also baobabs, like those of India; and Palmyra palms. Some of the native tribes make cloth of two kinds of cotton, the produce of a tree and bush, and dye it with the indigo that grows wild everywhere.

The Batetani, a branch of the Bamangwato, a tribe of Bechuanas, are settled, as already stated, on the S. shore of the lake, where the Zonga issues from it. The lower part of this river is inhabited by the remnants of the Bechuanaland nation. But the bottom of the lake, who chiefly inhabit its banks and islands, are of Hottentot race, apparently from the W. coast, and are called *Bachibos* (see), and also *Bachibos* at

Bastfeld, evidently a Bechuana attempt to utter the Hotentot sucking sound, *edge [m]*. These Bechuana are described as superior to the Bechuana in vigor and intelligence. They are not confined to the lake, but navigate and fish in the numerous and great rivers further N. Their canoes are rudely hollowed out of a single tree and are often quite crooked. The people about the lake and further N live, to a great extent, on fish, which are brought down in abundance by the floods. The Bechuana possess well made mats, their fine cordage being spun of wild flax. The root of a kind of flag pounded, yields a farinaceous substance, not much inferior to wheaten flour. The tubercous root of a water-lily is among the articles of food. Besides garden produce, wild fruits, and fish, the natives have also game in plenty (chiefly antelope, hippopotamus, and elephants) taken in pits-falls along the river.

The sight of this African lake was interesting, but still more so was the information afforded by the natives, for they stated that Ngami is merely a reservoir for the surplus waters of a periodically inundated country about 300 m. further on, which country they designate by the name of *Likobaka* or *rivers on rivers*. In consequence of this intelligence, the same enterprising travellers, starting from Klobong, a mission station on one of the sources of the Limpopo, directed their course N. In 1861 and, crossing extensive salt-pans, in which the Zonga seems to terminate, arrived, after great labours, at the banks of the Chobe, in lat. 18° 20' S., lon. 26° E. This river, about 13 or 15 ft. deep is connected with Lake Ngami by a canal or transverse stream, named *Tamankha*. The spot they reached by the waggon on the banks of the Chobe, is above 3000 m. from Cape Town. The travellers went down the river about 80 m. in a canoe to visit Sibetani, the paramount chief of this country. They afterwards proceeded on horseback N. E. from the Chobe about 400 m., to *Seheke*, which is situated in lat. 17° 28' S., on a large river, from 300 to 500 yards wide, and with a great volume of water. Fifty miles higher up this river stands *Barots*, Sibetani's capital. Below *Sulobek* (that is, *Sandhenke*) the river is joined by the Chobe and at the distance of 80 m. forcing its way through hills, it is precipitated over rocks the falls being named *Mosi wa thusya* (or *Kooring Vapours*). It afterwards receives another river, the *Masumha*, from the N., and then takes the name of *Zababa* or *Shababa*. All these rivers, namely the *Masumha*, *Seheke*, *Chobe*, with the *Togwa* and *Tso* flowing into Lake Ngami are represented as being connected together by transverse canals, which form of them one system of waters of immense extent, the breadth of the region intersected by them being at least 400 m. This region may in fact, be described as an immense marsh, embracing some tracts of elevated land, like islands, extremely fertile, and clothed with large timber. It can hardly be doubted that these waters all sink in the sands, and are distributed on the surface of the underlying limestone rock, throughout the riverless, but by no means unproductive desert, which extends from the N. back of the Limpopo W. over some thousand miles of square miles. The banks of the river, wherever there are reeds and trees, are infested by the Tsetse, a fly, the bite of which is fatal to cattle. Malaria fever also, is prevalent at the first rise, and at the fall of the waters. Very little rain falls in the country near Lake Ngami, and the rivers are never affected by it. Here as in Egypt, the floods descend in the dry season. The waters begin to rise in June, and reach their greatest height in the beginning of August. The source of the *Seheke*, according to the natives, is in *Lelala*, the same country from which the *Leiba*, the main branch of the *Kauru*, descends in the opposite direction. The country beyond *Likobaka*, is reported to be well peopled by industrious tribes, who make good pottery, and work in iron.

In 1852, Lake Ngami was again visited by a trading party. The oxen, 87 in number, and waggon of Mr Campbell, one of the party, were conveyed in canoes, along the river Zonga, 300 m., to the lake. This party walked round the lake, and found it to be 60 m. in length, and 14 m. broad. The river *Togwa*, one of its affluents, was also ascended for about 150 m., when the ravages of the Tsetse fly among the cattle compelled a return. Everywhere traces of Portuguese traders were found, but slave-dealers from the W. coast, who had promised these regions a visit, were deterred from coming by the report of English traders being on the lake. Mr

Campbell says, 'A lucrative trade has been opened up, and this may be indefinitely extended though not without risk, and the endurance of great privation.'

NGANATI, or *SPAN MARR*, a coral lagoon, uninhabited Isl. S. Pacific, Low Archipelago lat. 19° 40' 22" S.; lon. 188° 22' 28" W. 32 m. in diameter. Discovered, in 1826, by Captain Beechey.

NGANHOEI, an island prov. China, enclosed by provs. Chekiang, Kiangsoo, Hoonan, Houpe, and Kiangse, lat. 29° 5' to 34° 18' N. lon. 114° 50' to 119° 17' E.; area, 45,461 sq. m. In the S. and W. sections, it is agreeably diversified with ranges of low hills, but the surface is, for the most part, level and traversed by the Yang-tse-kiang and the Hooi ho, with their numerous tributaries. Near the Yang-tse-kiang are several small lakes, and the Chao hu or *hoat* Lake, between the two main rivers, is the largest sheet of water in the province. The vegetable productions comprise fruit, vegetables, and every kind of grain and green tea is extensively cultivated, particularly in the N. E. portion, which is the chief green tea district in China. Silk, cotton, and hemp are also raised; and gold, silver, copper and other metals are obtained from the mines. Ink and boracianum are extensively manufactured. Provincial cap., Ngon kang-foo. Pop. 84,168,059.

NGOUÇA, a small tn. Algarve Sahara, oasis and 19 m. N. E. Ouargla lat. 32° 32' N. lon. 4° 36' E., defended by a wall, crowned by 25 or 30 small square forts, and entered by five gates. It has a well fortified diadem and two mosques, with schools attached. It carries on a considerable commerce with Timgouct. Pop. about 1000.

NGUNDAVAM, a tn. on Yiti Lava, one of the Faeje Islands, near lat. 18° S., lon. 178° W. The seems to it is most fertile, being studded with reefs and shoals, and the inhabitants have had their full share in the atrocities which have been committed on trading vessels in that locality. In 1849 it was visited by Captain Worth, of H.M.S. *Chelonia*, to demand the delivery of the murderers of two Europeans, which being refused, the town was bombarded and burned down.

NIA TRAXO or *NIATZATZE* a tn. Anam, cap. prov. and 5 m. above the mouth of a river of same name lat. 12° 20' N.; lon. 108° 10' E. It is a place of considerable importance, defended by a fort, built in the European manner and has manufactures of silk and other goods, and a harbour, which admits vessels drawing 7 or 8 ft. water and at which a trade with different parts of the coast is carried on.

NHO or *NOU*, a tn. Hindoustan, prov. and N. W. Agre lat. 27° 51' N. lon. 77° 81' E., long celebrated for the manufacture of a culinary salt, distinguished by the name of *salubra*, and procured, by crystallization, from the water of saline springs in the neighbourhood.

NIAGARA, a river N. America, separating Upper Canada from the State of New York, and conveying the waters of Lake Erie into Lake Ontario. It is 33½ m. long and varies in breadth from 1 to 4 m., being about the former where it issues from Lake Erie. Total descent, 331 ft. It is occasionally interrupted with low wooded islands—the largest of which, Grand Island has an area of 17,000 ac. About 15 m. from Lake Erie, it is precipitated over a ledge of alluvial and limestone, and forms the celebrated falls of Niagara, having been previously divided into two cataracts by a central island, called Goat Island, about 500 ft. in width, and discharges it is computed, a hundred millions of tons of water each hour. The cataract on the S. side of the island, called the American Fall, is 163 ft. high, with 1195 ft. that on the Canadian side, called the Great or Horseshoe Fall, is 149 ft. high, with 9100 ft. Below the falls, the river rushes with great velocity down the sloping bottom of a narrow channel, for a distance of 7 m. This ravine varies from 200 to 400 yards in width from cliff to cliff, and its walls rise almost perpendicularly to a height of from 250 to 800 ft. About ½ m. below the Horseshoe Fall, the river, there about 1200 ft. wide, has so far resumed its tranquillity as to admit of the establishment of a regular ferry service. A short distance below the falls, a wire suspension-bridge has been erected across the river. It is 900 ft. in span and 230 ft. high.

NIAGARA, formerly *KAWAKE*, a tn. Upper Canada, at the mouth of the Niagara, in the S. W. extremity of Lake Ontario, a little below it is Niagara Falls. It is one of the oldest towns in Canada; was once the capital of the country,

since others, at the foot of the Maritime Alps. The western end of the Mediterranean wash its walls on the S., on the N and the E. the mountains enclose it round, in the form of an amphitheatre; and on the W it is bounded by the Paglion. It is divided into the old and new town. The streets of the former are narrow and mass-like compared with those of the latter, in which the houses look handsome being more airy and painted white. The streets of the latter are wide, straight and well paved, and are surrounded with porches, and adjacent to the other is a raised terrace, which serves as a defence for the town against the sea, and affords a delightful promenade. There are no remarkable public buildings in the city. The cathedral or church is in the ordinary Italian style nor have any of the other churches any peculiar architectural merit. There are also a theatre, hospital, public library, and a school of arts, the latter is a grossly large building, containing some manuscripts. Nice sells oil, cotton, silk, paper, mill paper, mill, and small manufactures of cotton, to be used, leather, soap, and paper. Ingenua, muscos, and perfumery are also made. The harbour or port lies E in the Paglion. It is small and open to the SE. Between the piers are only 15 f. water and the anchorage before the town is unsafe. The exports consist principally of oil, wine, and silk. The population of the city in 1846 was 26,000. The city entered the port in 1848 was 2600 tons (157,764); increased in the same year 2563 tons 158,685. Nice is much resorted to by winter by foreigners, particularly English, whose numbers have been estimated at 50,000 to 60,000, besides French, Germans, Russians and Poles and for whom special accommodation is provided. Provisions are moderate, and vegetables of various kinds abundant, but the water is indifferent. Though the climate is generally good, it is not so healthy as is now ascertained to be very prejudicial to those labouring under pulmonary and bronchial complaints. From 20,000

NICE a to Asiatic Turkey 844 JANU.

NICHOLAS (St. Nicholas), the most pleasant of the Cape Verde Islands. Lat (Nbr): 16° 41' N. Lon 24° 20' 50" W (N.). It is of very irregular shape, and high, having two remarkable mountains on it, visible at a distance of 45 m. one in the shape of a sugar-loaf, called the Peak of Trade, in the centre of the island; the other on the W. and called Monte do Gordo. St. Nicholas is fertile, and refreshments can be procured at a low price, but wood and water are difficult to be obtained. On the S. side the mountains are covered in thick forest, and the S. side is the best anchorage, but there are two different anchorages. Grand St. George Bay, on the N. side, the trade of the island is carried on, is on the W. side of the large bay formed by the E. and S. points of the island. Little bay anchorage is 7 fathoms clear ground, close to the shore.

NICHOLSON RIVER, N Australia flows into the
Gulf of Carpentaria W of the Albert river Discovered by
Dr Leichhardt.

NICKERLIE, a flat Dutch Gulana, forming the W portion of Surinam, on the banks of the Corentyn and the shores of the Atlantic. It is divided into Upper and Lower Nickerlie, and traversed by a river of its name, which flows W N W, and falls into the estuary of the Corentyn. It consists of low clay land, impregnated with saltpetre, and is chiefly inhabited by English and Scotch settlers.

NICKOLAI, a tn Prussia, prov Silesia, gov and 61 m S.E. Oppeln; with two churches, an hospital, manufactures of spoons, a brewery, several mills, and a trade in cattle. Pop. 8294.

NICOBAR, or NIKOBAR ISLANDS, a cluster of isls, Bay of Bengal, belonging to Denmark. They lie NW of Sumatra, and S. of the Andaman Islands, and extend from lat. $8^{\circ} 45'$ to $9^{\circ} 15' N$; lon. $92^{\circ} 45'$ to $94^{\circ} E$. They form two groups—a S., composed of the islands Great and Little Nicobar or Sankhalong; the former about 80 m. long, by 12 m.

brood, and the latter 16 m. long, by 18 m. broad, separated by St. George's Channel, about 1 m. broad; and several smaller islets;—and a N group, separated from the S by Bombarre Channel, about 88 m broad, and composed of the islands Katoah, Nemoovery Channel, Trinkat, Terroon, Bompoaka, Tillanchoo, Chowry Bati Malva, and the distant and most N island of the group, Carnaroe. All the islands of the N group are smaller than Great Nicobar, Camorta (which was being the largest) 25 miles long and all fringed with a narrow reef, but possess at least two good harbours—Camorta and Chowry Bati Malva. The islands of the S group have a larger area, and Chowry Bati Malva, the S group harbour between the islands of Nemoovery, Camorta, and Trinkat, which are separated from each other only by narrow channels not exceeding 2 m broad. The S group, and Katoah of the N are formed of stratified rocks, sandstones and clay-slate; while the N group is composed of plutonic rocks including porphyry diorite, syenite, etc., but no basalt, though the small island of Bompoaka appears to be an extinct volcano and the whole cluster evidently forms the connecting link in the volcanic series passing from the Nicobars to the Andamans. The S islands are covered to the highest summits with dense forest, including 70 species of dicotyledonous trees or shrubs but the N islands, excepting Carnaroe, are only wooded on the lower slopes of the hills and towards the sea-board the rounded hill tops hang covered with grass. Timber suitable for either house or ship building, is plentiful. The ocean nut palm supplying the chief food of the inhabitants, is almost the only tree raised for by the natives. It grows abundantly on all, but more especially the southern islands, and the natives of the latter are the most successful in the export trade in it. About four mallans are exported. The mammals are few in number, birds are very numerous, about 14 kinds of reptiles have been met with, and a few crocodiles and turtle are found on the coasts. Both the sea and the streams are rich in fish, trapping is fished on the reefs, and the *Bombus aculeatus* builds her oblique nests in the caves. The natives are by no means a noble race they appear to be closely allied to the Malays, and are lazier in the complexion than the Hindoos but darker than the Chinese. They are savage, but, friendly, lying and treacherous. They are always ready for a fight, and have killed and massacred the crews of ships that touched on their coasts. Pop. about 8000.—(Sizen Bill's *Bericht über die Reise der Corvette Galathea von Wlad. in 1845-7*, Königsberg, 1862.)

NICOLA (Nat), several places, Naples:—1, (*dell'Alto*) A tn prov Calabria-Ultra II \NW Lotrone with four churches Pop. 1000.—2, (*della Strada*) A vil., prov Lavoro, S S.E. Caserta. Pop. 2447.—3, (*de Strafaces*) A tn., prov Calabria-Citra, ENE Casirovillari 1 op. 1563.—4, (*la Bonoma*), A tn., prov Principato Ultra, dusk and 10 m S-S.E. Arzuna. Pop. 1351.

NICOLA (Str) an id Naples belonging to the Tremati group, prov Capitanata, 19 m N \ W Nisandre. A volcano burst out in this island, May 16 1816, and continued for seven hours to throw out stones and lava.

NICOLAIEV, or *Rosla*, goes up 86 m N.W. Kherson at the confluence of the Ingul and Rosl. It is fortified enclaves a large space, and is remarkably well built, with wide streets and a well planned boulevard. It has a coarsely richly decorated internally, townhouse with two fine colonnades, and the admiralty a very complete establishment, in the form of a square extensive dock yards, provided with machinery, which is almost all British; its harbour is one of the largest ones in Russia, vessels of the largest size are built, and there is an excellent hydrographical school in which naval cadets are trained. Nicolaiev was founded in 1791, and made the seat of an admiralty and the principal station of the Russian navy in the Black Sea. The progress it made at first was very rapid, but it soon became stationary, and but for the support which it receives from Government, would soon decline. The chief causes of their decay, the neighbourhood of Kherson, the small number of ships stationed here, the want of industry and scarcity of fuel had by 1840, then cleared 324 vessels, with cargoes valued at £61,382. Pop. (1850) 39,438.

NICOLAO (Rio) a vil Brazil, prov. Sao Pedro-do-Rio-Grande, r bank Flutim; founded in 1631. The inhabitants are mostly engaged in cultivation, and the rearing of cattle, and also prepare woad for exportation.

NICOLAS-D'ALIERMONT, a tn. and com. France, dep. Seine-Inférieure, 8 m. S.E. Dieppe. It has long been celebrated for a manufactory of cloths, in which 800 hands are employed. Pop. 1946.

NICOLAS (St.), several tns. France, particularly—1, *(de-Ford)* A. m. dep. Manche 6 m. S.E. Caen, on the Meris, with a large and magnificent Gothic church; manufactures of linen and embroidery worked and cotton mulls, tanneries, distilleries, breweries, and plaster-kilns. Pop. 3187. 2, *(de-Groville)*, a tn. dep. Manche, 16 m. N.W. Avranches. Pop. 1028. 3, *(de-la-Grève)*, dep. Tarn-et-Garonne, 8 m. N.W. Castel-Bernard, in a fertile district. Pop. 1807.

NICOLAS (St.), a tn. Belgium, prov. E. Flanders, on the railway to Antwerp, 19 m. E.N.E. Ghent. It is situated in the Pays de Waes, one of the most populous and best-cultivated districts in Europe and is well built. The streets are generally spacious and straight, and the market-places one of the largest in the kingdom. It has three churches, that of St. Nicholas being a handsome edifice two chapels, a townhouse, episcopal curia, a court and chamber of commerce, a conseil de prud'hommes, an agricultural and a musical society, an academy of design, a prison, an hospital, two orphan asylums, and several primary schools. Flourishing manufactures of cotton, woolen and silk stuffs, ribbons, thread, pins, carpets, hats, lace, soap, oil, glass, papers, tobacco, chocolate, carmen and copper ware, tobacco-pipes, playing-cards, &c. breweries, various works, distilleries, salt-refineries, tanneries, dye-works, printfields, and a train in corn, flax, hemp, hops, linen, &c. Pop. 18,942.

NICOLAS (St.), a vil. and com. Belgium, prov. and 3 m. W. Laige near the railway from Lodge to Tournai. It has a distillery brick and tile works, and a trade in agricultural produce. Coal is worked in the vicinity. P. 1545.

NICOLA (St.)—1. A small seaport, E. coast, Grecian isl. of Corfu. 2. A small tn. France, isl. of Paxos, opposite which there is anchorage in 20 to 16 fathoms, or further in, and near the shore 9 or 8 fathoms. 3. A cape, W. coast, Sardinia lat 39° 30' N. lon 8° 28' E. 4. A port, Grecian isl. Samos, below the town of Kymomena. It is a fine harbour, of the shape of a half-moon, but too deep for anchoring in.

NICOLONI, a tn. Sicily prov. and 7 m. N.W. Catania, on the S. slope of Etna. It is the highest town on the mountain, and suffered much from a torrent of lava in 1553. Pop. 3559.

NICOMÉDIE, a tn. Asiatic Turkey. See **ISMI**.

NICOPOLIS, a tn. European Turkey. See **NIKOPOL**.

NICOSIA (anc. *Archie*), a tn. Sicily prov. and 29 m. W. N.W. Catania, on a hill, washed by the Salento and Capaci. It has several churches and convents scarcely any manufactures, but carries on some trade in corn, wine, oil, and cattle. Year it are beds of alum-salt, a rich mine of rock-salt, and springs of petroleum and sulphur. P. 12,064.

NICOSIA, or *Larnakia*, the cap. of the island of Cyprus, on a fine plain, 8 m. E. of Larnak, nearly in the centre of the island. It was formerly a beautiful town and although much decayed, has still a handsome appearance externally the walls and bastions giving it an air of grandeur. It is about 9 m. in circumference, but was at one time of much greater extent. Its ancient church of St. Sophia, a fine Gothic building has been converted into a mosque. There is a spacious bazaar, a khán or enclosed court surrounded by apartments for travellers, the ancient palace of the governor, and several churches and mosques. Pop. 12,000.

NICOTERA, a tn. Naples, prov. Calabria-Ultra II., 16 m. S.W. Montecorone, a little E. of the Gulf of Gioja with an episcopal palace and college. Pop. 3500.

NICUYA, —1. A gulf, Central America, state Costa Rica, W. coast, having at its entrance N.W. Cape Blanco, lat. 9° 54' N.; lon. 80° 7' W. (n.). and S.E. Herradura Point, lat. 9° 30' N. lon. 84° 40' W. It is about 35 m. wide at the mouth, and 50 m. in length, E.E. to N.W., enclosed on the N.E. by an offset of the table-land of Costa Rica, and contains a good harbour (Punta Arenas), and several islands, none which pearls are fished, and a shell-fish is found which yields a bright red dye.—2. A tn. on the peninsula by which the gulf is formed, where weaving, ship-building, &c., are carried on, besides a considerable trade in sugar. Pop. 5000.

NICUMAN, or *Nimán*, a river, China, prov. Manchouria, which rises in a branch of the Stanovoi mountains, near lat. 53° N., flows S.S.W. and joins L. bank Amour, after a course of about 220 m. Its chief affluent is the Tcholanski, which joins it on the right.

NIKKOTDORF, or *RIKSTADVA*, a vil. Hungary, Thuring. Thales co. Tennau, about 13 m. from Zeelitz, with a R. Catholic church. Pop. 1218.

NID-EAY, a river Norway which rises in prov. Christiansand, hall, Brødshagen, flows S.W., and after a course of about 70 m., falls into the Skagerak opposite to lat. Tromsø.

NIDA, a river, Russian Poland, which, flowing S.S.E. past Plescos, joins L. bank Vistula, a little below Neurecht or Nowomasto total course 76 m., partly navigable.

NIDAU, or *NYDAU*, a vil. and par. Switzerland, can. and 15 m. N.W. Bern, at the N. extremity of Lake Biem, where the Zelt Lense flows from it. It is well built, and has a parish church, and the ancient castle of the counts of Nidau, built on an island. Pop. 1238.

NIDDI par Eng. York (W. Riding), 1016 ac. Pop. 114.

NIDDA, a vil. in Hesse-Darmstadt, prov. Oberhessen, on river of the same, 28 m. N.E. Frankfurt. It has a castle, tower church chapel and hospital, manufactures of iron, hosiery and leather, and a trade in corn and wood. P. 1871.

—The river rises in the Vogelsberg, in Oberhessen, flows S.W., and joins L. bank Main 6 m. W. S.W. Frankfurt, total course 60 m. Principal affluents, on the right, the Wetter, on the left, the Hader.

NIDDER, a river Germany which rises in the Vogelsberg, Hesse-Darmstadt flows S.W., enters Hesse-Cassel and joins L. bank Nidda, 7 m. N.E. Frankfurt; total course, 45 m.

NIDDRY, a vil. Scotland, co. Linlithgow, 2 m. W. Kirkcaldy on the Union canal and the Edinburgh and Glasgow railway with the ruins of an old castle.

NIDRETT an agricultural vil. Holland, prov. and 10 m. W. S.W. Gouda, with a church. Pop. 174.

NIED, a river, France formed by the junction of the Nord Franconie and the Nied Altmühl, which unite in dep. Moselle, 11 m. N.E. Metz. The united stream flows N.N.E. enters Rhénan Prussia, and joins L. bank Sarre, about 7 m. below Sarrelouis, total course, 45 m.

NIEDE-THORLESEN, a market tn. Hesse-Darmstadt, Rhénan-Hesse circle Rungen, 7 m. W. S.W. Mainz, with two churches. Pop. 2008.

NIEDE-LAUMETZ, a vil. Germany. See **LAUMETZ**.

NIEDERBAU, a market tn. Hesse-Cassel, prov. Fulda, circle Hanfeld, with a church and three mills. Pop. 1811.

NIEDERBRUCHEN, a vil. Nassau bail. Lemberg, with a church and a mill. Pop. 1044.

NIEDERBORN, a tn. France, dep. Bas-Rhin, 8 m. W. Wissembourg, with two mineral springs, which have been known from a very early period, and are still pretty much frequented. Year it are blast-furnaces, and other iron-works. Pop. 2707.

NIEDERGRAND, a vil. Bohemia, circle Leitmeritz, about 61 m. N. Prague, with a church and a school, three saw and four other mills. Pop. 1518.

NIEDERHALL, a tn. Württemberg, circle Jaxt, bail. Kitzingen, on the Kocher, with a church, a paper mill, and a tolerably productive saline spring. Pop. 1863.

NIEDERHOF, a vil. Bohemia, circle Eidenbow, with a church school blackfield, and two flour-mills. Pop. 1117.

NIEDERFINKBACH AM HOCWALDE, a tn. Saxony, circle Bautzen, dist. Oberlautitz. Pop. 1909.

NIEDEROLM, a vil. Hesse-Darmstadt, circle Rheinfelden, with a justice-of-peace court, a castle, a church, and four mills. Pop. 1280.

NIEDERRIED, a vil. belonging to the free town of Frankfurt-on-the-Main, with a church. Pop. 1604.

NIEDERSTETTEN, a tn. Württemberg, circle Jaxt, on the Vorbach, 8 m. S.E. Mergentheim, with a court of justice, a church, two castles, and a trade in corn and wine. P. 1609.

NIEDERSTOTZINGEN, a vil. Württemberg, circle Dornbach, between the Danube and Brau, on the road to Launigen with a church and a castle. Pop. 1370.

NIEDERZWEHREN, a vil. Hesse-Cassel, Niederhessen, circle Cassel, with a church and a mill. Pop. 1872.

NIEDERZWONITZ, a vil. Saxony, circle Zwickau, so near the town of Zwickau as to be almost its suburb. It

has two churches, and manufactures of cotton goods, paper, articles in horn, and paper saw, and oil mills. Pop. 3045

NIEFERN a vil. Baden, arrde Middle Rhine, bad. Forstheim, 1 bank Ren, 21 m. E S E Carlsruhe with a church, manufactures of excellent paper and a flour-mill Pop. 1579

NIEHEIM a to Prussia, prov Westphalia, gov and 25 m. S S E. Minden It has a church, a synagogue and a trade in cattle. Pop. 1473

NIEHL, a vil. Elsenhain Prussia, gov and not far from Cologne on the Rhine. It has a church, a mill, and several hat and shoe markets. Pop. 938

NIEL, a vil and com. Belgium prov and 10 m S by W Antwerp, r bank Rhine It has a great number of brick-works, several breweries a ship-building yard, a corn and two oil mills, inhabits chiefly employed in weaving; and a considerable trade in raw linen and linen thread. P 2667

NIELI A two places, Italy, Piedmont—1 (Tanaro) A vil and com. div. Coal prov and 16 m. N E Mondovì 1 bank Tanaro with a church an old castle in ruins, a charitable endowment and a trade in corn, maize, wine, and chestnuts. Pop. 2010—2 (Zello) A vil and com. div. Cant, prov Alba on the Po, here crossed by a wooden bridge, with a church, and a trade in vegetables Pop. 777

NIEMEGK, a to Prussia, gov and 25 m. S S W Potsdam, on the Adelsbach with a church, manufactures of linen, breweries and distilleries, and some trade in flax wool, and cattle. Pop. 1929

NIEMEN, or **MEMEL**, a river Europe It rises in Russia, gov Minsk, and is formed by the union of several small streams First proceeding N, and then W through gov Minsk, it enters the gov, and reaches the town of Wilna, when it bends round and follows a N W direction to Skornitz Its source now becomes a rapid descent, but in the vicinity, due W After entering Prussia Poland, and passing, it falls it turns N W and falls into the Curische-Haff Its whole course is about 450 m and, for a considerable portion of it it is a broad and deep river, navigable at all seasons, and of vast commercial importance to the districts through which it flows Almost all the trade of Volhynia and Lithuania is conveyed by it. Its principal affluents are, on the r bank, the Bureana, Maresotanka, Villa, Pajeleja, Douchina, and Jours, and on the l, the Ushiana, Zolva, and Keschuppo

NIEMLIN, a to Prussia, arrde Danzig, 45 m. N N E Pragna with a church, school, fine chateau townhouses manufactures of ordinary woollens and woolen hosiery, and two mills Pop. 8336

NIEMTSCHITZ, two places, Austria, Moravia—1 A market to circle Posen and 8 S E Olmitz, with a church 1 op. 1400—2, (Grosz) A market to circle and 16 m. S S L Brunn with a church castle, and mill Pop. 1364

NIEUNBOEG, a to Rhineland Prussia, gov and 27 m N W Munster, on the Dinkel with an old castle, once a place of great strength a church and a trade in cattle. P 694

NIEUNBURG, a to Hanover, arrde Lüneburg, 29 m N W Hanover, with two churches, an hospital, manufactures of linen, cloth, and vinegar, some ship-building and a trade in wood and chertory Pop. 4100

NIEUNBURG (Münster or Klosterg), a walled to Anhalt Köthen at the confluence of the Bode with the Saale, 18 m S. by E Magdeburg; with two churches, a castle, hospital, synagogues, a brewery, distillery, tile-works, and some ship-building Pop. 1800

NIEUN, or **NEMEN**, a river which rises in Rhineland Prussia, 6 m E. Krefeld, gov Aix-la-Chapelle, flows N N W into Limburg, and, about 1 m. below Germany, joins r bank Moselle, after a winding course of about 70 m., of which nearly 25 m. are navigable. It abounds with eels and perch

NIEUNSTEIN, a vil. Hesse-Darmstadt, 1 bank Rhine, 9 m. Mainz. It has two churches, numerous mills, and a trade in excellent wine grown in the vicinity Pop. 2201

NIEUNSKY, a colony of the Moravian Brethren, Prussia prov Posen, gov and 69 m. E. Legnica, close on the great Olschitz Forest. It is built in the form of a square surrounded by four planted alleys, and has a church, a brother, a school, and a well-stocked library; a gymnasium, with several interesting collections; furnished chiefly by the foreign wife superiors; several elementary schools, manufactures of bed and table linen, embroidery, lace, &c., and two mills. P 640

NIEUNKIRK, or **NEUNKIRCHEN** a vil. Rhineland Prussia, gov Düsseldorf circle and 4 m S E. Geldern, with a church, manufactures of woollen and linen cloth, hats, and other articles Pop. 1090

NIEUNPORT (Flemish, *Nieuwpoort* Latin, *Nova portus*), a to and port Belgium, prov W Flanders 21 m. W by S. Bruges, on the Yser near its mouth in the N Sea. It is well fortified, surrounded by walls and defended seaward by several batteries, has regular streets, and lined with substantially-built houses a townhall a handsome church-chapel civil and military hospitals, a prison, orphan asylum, several schools, and an arsenal Brewing, distilling grinding corn, the manufacture of gunpowder, tobacco, ropes, and sails, ship-building, and fishing are carried on Pop. 2580

NIEUNW. RHOEN, or **NIEUNWONEN**, a vil and com. Belgium, prov Brabant, on the Molenbeek 22 m. N E Brussels with a flour-mill and a trade in agricultural produce Pop. 1065

NIEUNW. DE DIER (Heri), a vil. Holland, prov N Holland about 1 m. E Helder with which it is connected by a row of houses. It lies at the entrance to the great Amsterdam ship canal and possesses a safe harbour Pop. 8186

NIEUNW. V. D. AM, a vil. Holland prov N Holland, 8 S W Boorn with three churches, a school, an extensive ship-building yard a tannery and several mills. Pop. 823

NIEUNW. V. D. HOORN, a vil. Holland prov S Holland, 8 m. S. Brielle with a church, school, and townhouse Pop. 1019

NIEUNW. V. D. KEEK, two vils. Holland—1 (op. de Jaal), Prov S. Holland, 6 m N E. Rotterdam with a church, district house, and school some boat-building brick-making, and rope-spinning Pop. 1170—2, (in Dordrecht), Prov Zeeland, 3 m E. Vlissingen, with a church and townhouse Pop. (agricultural) 963

NIEUNW. V. D. KIRK, a vil and com. Belgium, prov E. Flanders, 15 m S E. Ghent with distillery, flour and oil mills and some linen weaving Pop. 2484

NIEUNW. KOOP, a vil. Holland prov S. Holland, 12 m. E Leyden with four churches Pop. (agricultural) 1463

NIEUNW. K. L. J. K., a vil. Holland, prov N Brabant, 6 m W Hertogenbosch with a church. Pop. (agricultural) 978

NIEUNW. O. L. D. E., a vil. Holland, prov and 17 m E. Groningen a scattered place, with a church and school. Pop. (agricultural) 1515

NIEUNW. P. O. O. T., a fortified to Holland, prov S. Holland, 15 m. S. Leek, 17 m. E. Rotterdam with a townhouse, prison, church, and school, some fishing and hoop-making Pop. 610

NIEUNW. ST. A. D., a vil. Holland, prov Lamburg 11 m N E Maastricht, with a church and school. Pop. (agricultural) 799

NIEVRE, a central dep. France, bounded, N by Yonne, W Cher, S. Allier S. E. and E Saône-et-Loire, and N Côte-d'Or greatest length $\frac{1}{2}$ W to S. E., 76 m., breadth 60 m., area, 2595 sq m. It is intersected, S. E. to N W by a mountain chain (Jura), Mount 1000 1813 ft., forming the water-shed of the dep., dividing its drainage between the basin of the Seine, which receives the waters of the $\frac{1}{2}$ above chiefly by its affluent the Yonne, and the basin of the Loire, which forms the S. W. boundary and drains the far larger portion of the surface in part directly, and in part by its affluent the Allier and Nièvre the latter a stream with a S. W. course of 80 m., which joins the Loire at Nevers The soil is generally of indifferent fertility, nearly one-half of the whole surface is arable, and considerably more than one-third is in wood only one-fourth is absolutely waste. In addition to the ordinary cereals, a good deal of hemp and flax is grown. The vine also is successfully cultivated some of the white wines ranking high, though, on the whole, the quality is indifferent. The pastures are extensive and great numbers, both of cattle and horses are reared but the chief sources of revenue in the department is timber derived from its extensive forests, consisting chiefly of oak, elm, and beech Game is very abundant. Iron and coal, of excellent quality, are worked extensively and furnish the principal sources of industrial employment, both of yellow ochre, and quarries of granite, marble and grinding-stones are also worked in several districts. The only other manufactures deserving of notice are some coarse woollen cloths, and other woollen stuffs, hosiery, cutlery, works in enamel, common pottery, and porcelain. The trade in the different products already mentioned is in

portant. For administrative purposes, Kibira is divided into four arrondissements—Neyera, the capital Chaima-Chinon Chamoery and Goma subdivided into 25 cantons, and 315 communes. Pop. (1885), 237,161.

NIEKDYORF or **NIEKDYALVA**, a vil Hungary, Thurber Thosa, co. Temevar, 12 m. from Zeeboly; with a church. Pop. 1914.

NIEZVOTSHCHIN, or **NIESTET**, a tn. Bessara, gov and 60 m. S.S.W. Nizhny, cap. of a principality, on the Lipa. It has a college, and a Benedictine monastery. The principality belongs to Prince Rulavill. Pop. 1600.

NIGDEH, or **NIDEN** (anc. *Gadyan*) a tn. Asiatic Turkey, Karamanli, cap. and a coastal height, 70 m. S.S.W. Karamanli, partly surrounded by ancient walls, and defended by three castles; has several mosques, a celebrated Mahometan college, and some interesting antiquities. Pop. about 5000.

NIGER, the name now commonly given to the great river of Western Africa, or Gambia, which, rising in the mountains of the Mandingoes, and flowing N and N.E. towards the desert, afterwards turns S.E. and S. and enters the sea through many mouths in the Right of Benue. The source of this great river is, according to Major Taling at Mount Lome in about lat. 9° 45' W. lat. 9° 25' N., and 1600 feet above sea-level, but there is good reason for believing that it may be sought much further to the S. and E. in the Kong, or mountains, for *long* is a general term, and not a proper name. At its source it is called Tonibia, that is, water in the Kono language, but lower down in Bambara, it is called Baha great river or Joliba that is, the river of the Joli or Red Men who are the inhabitants of Joliba-nadu (Red Man's Land) the Jaloukandoo of Park. These Red Men are Sura, or Mandinga. It becomes navigable at Bambaroo, 100 m. above Sego in Bambara and at the latter place it is as wide as the Thames at Westminster. Lower down it enters a level country and divides into several arms, enclosing extensive islands, on one of which stands Jenne, or Gasse (properly Ginkwa) the great emporium of Negroland and from which the whole country has derived its commercial name (*Jenne*). The river then enters on a territory in which the Fula, Fulahs or Fellehahs are the rulers, while the indigenous population are called Songay and speak the Songay or Kaseor (Nikud) language, within the domain of which the river is called Ima. In its course down to Gasse, the Fulah receives several accessions from the S. Further on, it turns northwards, in a very winding course between low banks, crossing Debu or Blackwater Lake, and receiving on the right numerous streams from the mountainous country of the Songay. At Kessa, the port of Timbuktu it probably reaches its highest latitude (about 17° N.) it then runs E. along the desert for 6 days, and S.E. for about 15 days to the frontiers of Hausa. From Gasse to Sali, opposite to Hausa, a distance of 600 or 1000 miles, the Songay language is spoken on the bank of the river, and from Sali also it extends on the bank eastwards to Asben, or Agades, on the borders of the desert.

In the Hausa country the great river is known as the Galla *nikwara*, that is, the river Kowira, or Kwara (Quorra) and further S. in Nya, where it is often a league wide or more, it is called the sea or lake of Koye, or Kwaia. This name, first written in the first instance, and subsequently misread, explains the Lake Kura of Arab geographers. The very active commerce which here abounds in the heart of Africa the broad waters of the Kwara or Quorra, fully justifies the celebrity of its name. Through Hausa and Kyfflow several streams from the heights which divide those countries from Bornoe, while on the western side, through Gasse and Bargoo, the Kwara receives the small rivers which descend from the mountains of the Songay, which will probably be found to arise from S.W. to N.E. but it is at the northern extremity of Kyff (lat. 7° 45' N.), that it unites with its eldest tributary, the Tekedda, descending with a navigable stream from Adama, where it is called the Baro. The united stream then flows S. by W. between Yoruba on its E. bank, and Iddah on the W. and here with a changed language, it is called Ujimbai Fata, or White Water the Tekedda being styled Ujimbai Dula, or Black Water. The Delta commences near Abok, about 90 m. above the sea. It is little known, the only channel

through it hitherto explored by Europeans, being that of the Nun, which, with an ordinary 1½ m. wide, narrows a little way up to 130 yards. The bar, on which there is a violent surf, presents a great difficulty to sailing vessels. It is supposed that the Kwara (Quorra) or Niger is connected with the Oulabar by Cross River and it is certain that on the W. there are navigable channels from it to Warrius and Benin. The whole course of the great river from its source to the mouth of the Nun, without regard to sinuities, is about 2000 m., if traced from the mountains further S.E. and through all the details of its windings, it would fill little short of 5000 m. It was descended by Mungo Park from Sego to Boma, a distance, on the river probably of from 1500 m. to 1800 m. But the fruits of that remarkable voyage were unfortunately lost to science. On the other hand, it has been ascended from the sea by Mr. Beccoff, in a steamer as far as Lever, about 40 m. or 50 m. from Boma, the intervening distance is said to be difficult at all seasons, owing to rocks and rapids.—(Park's Travels, Cailli's Journey, Landers' Narrative, Laird and Oldfield, Allen and Thompson.)

NIGGE, two parts. Sect. 1.—Kincardine; 3537 sq. A. P. 1841.—2. Ross 5000 ac. P. 1457.

NIGHT ISLAND Australia, N.E. coast, Caps York, B. Cape Durston, lat. 13° 10' S. lon. 145° 23' E. 2 m. long by ½ in broad, surrounded by a narrow reef of dead coral and mud, and nearly covered with mangroves. Some *Conchus* or cotton trees also occur, from 20 to 30 ft. in height.—(Voyage of the Endeavour.)

NIQUARDA, a vil and com. Italy Lombardy, prov. and 8 m. N. Milan: with a church three altars, and a clear table endowment. P. 1701.

NIGUELAS, a hamlet, Spain, Andalus, prov. and 16 m. from Granada; with narrow, irregular streets, several oil and flour mills, and a trade in corn, wine, and fruit. P. 1572.

NIHAU, or **ONAHOU** one of the Sandwich Islands; lat. 22° 0' N. lon. 169° 35' W. (n.), about 16 m. long, and 8 m. broad. The E. side is rocky and unfit for cultivation, on the W. shore there is an anchorage, but no harbour. It is celebrated for its yams, which, besides being excellent, attain an enormous size. The soil is too dry to produce rice. The women make beautiful mats, and some set is also manufactured but the people generally are very poor. Pop. 1000.

NIJAR, a tn. Spain, Andalus, prov. and 14 m. N.E. Almeria, with mean houses, a church two primary schools manufactures of woollens, and earthenware several dye-works, and a trade in woollens, corn, barley, and cattle. Pop. 5090.

NIJEBASSE, a vil Holland, prov. Friesland, 4 m. W. Heerensveen, with a church and school. Turf-cutting boat building, lime-burning, and boat-trade, are the chief occupations. P. 1105.

NIJKEK, a tn. Holland, prov. Gelderland 24 m. N.W. Arnhem with a townhouse, two churches, two synagogues, several schools, an orphan hospital, a convenient harbour, connected with the Zeider Zee a trade in grazing, exporting grain, tobacco, &c. Pop. 4077.

NIJMEGEN, or **NIJMEGEN** [ana. *Noctemagus*, German, *Nijmegen*, French, *Nimègue*] a fortified in Holland, prov. Gelderland, 10 m. S.W. Arnhem, 1 bank Waas, and another 4 m. from the Prussian frontier. It lies along the river in the form of a crescent, the lower part much exposed to inundation, and is entered by 10 gates, and surrounded with numerous towers. It has a townhouse, decorated in the Renaissance style, the remains of an old castle, called Valkhof, a prison, watch-house, barracks, arsenal, magazine, military watch-house, hospital, theatre, and the Grootemarkt—a spacious market-place, surrounded with fine houses, six churches, an hospital for old men and old women, infirmary, orphan hospital, Bible and tract societies, and Latin and numerous other schools. It has a harbour, protected by a wall from the river floods and landing (see) numerous breweries and flour-mills; manufactures of hardware, stoves, fire-engines, cabinet-work, excellent painted glass, bell, gold and silver work, some soap and salt boiling and book-binding. Pop. (1850), 31,773.

NIJNEI LOMOV, a tn. Russia, gov. and 64 m. N.W. Fiuma, on the Lomova. It has four churches a monastery, a general trade, and an annual fair which lasts about six weeks, at which leather, furs, wax, and colonial produce are sold. P. 8750.

NIJNEI NOVGOROD, or LOWRA NOVGOROD, an E. gov Russia; lat. $54^{\circ} 30'$ to $57^{\circ} 5' N$; lon. $41^{\circ} 50'$ to $48^{\circ} 20' E$, bounded N by gov. Kostroma and Yalta, E. Kasan and Simbirsk, S. Rens and Tambov, and W Vladimir. Length, N to S. 185 m. greatest breadth, 188 m., area, 15,568 sq. m. The surface forms an extensive plain occasionally broken and diversified by low, undulating hills, which nowhere attain a height exceeding 500 ft., and chiefly occur along the banks of the larger streams. These hills are almost invariably composed of limestone, which is largely developed over the whole government. The only metal found is iron. gypsum prevails in every quarter. The active government belongs to the lazar of the Volga, which, entering it on the N W, and traversing it in one vast curve to the E drains a considerable portion of it directly, all the other drainage being brought to it by the Oka and its tributaries on the W, the Bura and its tributaries on the E, and the Sena and Volga on the N. The porous nature of the subsoil, consisting generally of deep beds of sand, which easily absorb all superfluous moisture, accounts for the general mildness of the temperature and salubrity of the climate, while the sandy subsoil having generally a deep covering of alluvial earth or vegetable mould renders this government the granary of Russia. Immense crops of corn are raised at comparatively little expense, and after satisfying the home consumption, leave large supplies for export. The cultivators are alike distinguished by skill and industry and much of the land is farmed in a style of which Russia is not able to furnish many other examples. The principal crops, in addition to corn, are hemp and flax. Much attention also is paid to the raising of fruit: pears and plums, apples and cherries, particularly the last two, are everywhere abundant and of excellent quality. The extent of forest is at least equal to that of arable land and few governments can boast of larger tracts of excellent timber. The trees are of all the ordinary varieties, but the most prevalent appear to be oak and larch. Both manufactures and trade have made great progress. Several governments possess much larger establishments, but in none is the spirit of activity and enterprise more universal. The principal manufactures are coarse cloth, canvas, cord age, glass, soap, and leather. The same articles form important branches of trade, which includes, besides corn, flax, hemp and flax, iron and ironmongery, &c. In carrying on this trade, vast advantages are given, both by the central position of the government, and its large navigable streams.

Pop. (1850) 1,209,000. NIJNEI NOVGOROD is a Russian, cap above gov. r bank Volga, where it is joined by the Oka, 205 m. E. Moscow. It is divided into two parts—the high town occupying a steep triangular promontory about 400 ft. high, the apex of which is formed by the confluence, and the adjoining sides by the channels of the rivers, and the low town, probably a suburb, consisting of a long street on the bank of the Volga. The high town, forming the far larger portion of the whole, is chiefly composed of three handsome streets, which converge towards an irregular, open space. Beyond this space runs the Kremlin or citadel, finely situated on the highest point of the triangle, and immediately overhanging the bed of the Volga. It is surrounded by a wall of 80 ft. in height, flanked with thirteen towers, partly round, partly square, and contains the principal edifices of the town, particularly two cathedrals, those of Archangel and Our Lady, built in imitation of those of Moscow a handsome Protestant church, a seminary, and the governor's palace. With exception of these, and a few other public edifices, including the elegant Church of the Holy Women, the whole town is built of wood, and contains little to attract attention or gratify curiosity.

Nijnei Novgorod, however, is chiefly noted for the great annual fair held in July and August and which collects dealers and loungers from the most distant quarters to the number of about 800,000. It is held on a triangular space, formed by the junction of 1 bank Oka with r bank Volga, and as low as to be often completely inundated. This danger is avoided by holding the fair between July and August, the driest season of the year. At all other times the space remains unoccupied, and is as silent and lifeless as if it were in the heart of a steppe but, as the period for the fair

approaches, an immense town suddenly starts up as if by magic—no more booths, where merchandises may be advantageously displayed, but a regular town, with churches, hospitals, barracks, and theatres, built of course of wood, but in a substantial manner. So important is the business of the fair held to be that a handsome building is erected in the centre, in which during its continuance, the governor of the town with a numerous train of officials, resides. The only access from the town is by a long and wide bridge of boats across the Oka, and the scene on the river, as seen from this bridge, is of the most curious and amusing description. So numerous are the vessels of every description, engaged in delivering or securing cargoes, that scarcely any part of the water can be seen, while in other parts regular towns of boats are formed, and occupied by a most heterogeneous aquatic community to the number of about 40,000 souls. The fair is laid out in regular quarters, each allotted to a particular species of goods. In one quarter, tea, in another, costly shawls, carpets and silk goods, and in others skins and furs, from almost every animal that lives within the arctic circle, are sold. A large quarter is set apart for the sale of Siberian furs, and contains long streets lined on either side with that metal in every variety of form, raw and manufactured. In 1839 the business done is stated to have amounted to nearly six and a half millions of pounds sterling, of which above four millions were Russian products, and nearly one million Asiatic. This sum, immense as it is, only includes the trade of the town during its two busiest months. At all seasons, an internal commerce of almost unparalleled extent is in active operation, including every article which the different quarters of the world interchange with each other.

NIJNEI-NOVGOROD CHURCH OF THE HOLY WOMEN

From Daniloff's Voyage Pittoresque du Donetz.

Pop. (1846), 89,710. NIKARIA, an Isl. Grecian Archipelago. See NIGARIA. NIKOLSDORF, a vil. Hungary, Thuer Danube, co. Wieselburg 15 m. S. Frauburg, with a porchouse. P. 1230. NIKOLAI ISLANDS. See NIKOLAI. NIKOLAI or NIKOLAI, a to Prussia, gov and 51 m. S. P. Oppeln, with two churches, an hospital, manufactures of spoons, a brewery, several mills, and a trade in cattle. Pop. 6794. NIKOLAIYEV, a to Russia. See NIKOLAIYEV. NIKOLAIYEV, a to Prussia, prov. E. Prussia, gov and 59 m. S. S. W. Gumbinnen with a trade in linen, horses, and cattle. Pop. 1841. NIKOLINCE, a vil. Hungary Thuer Thales, co. Krasova, 43 m. S. E. E. Temeswar, with a church. Pop. 1540. NIKOLSBURG, or NIKOLSBURG (Moravia, Silesia), a to Austria, Moravia, circle and 27 m. S. Betta. It is a very disagreeable place, with narrow, uneven, ill-paved, and

dirty streets. It has a castle, finely situated on a rock near the centre of the town and flanked with lofty towers a handsome church, a philosophical establishment for the education of Fellows, with a good library and physical cabinet, a Flaxist college, and two synagogues, and manufacture of woolen and linen cloth. Pop. 8000.

NIKOLSKAYA STANTITZA, or NOVAJA KAMENKA, a town, Russia, gov. and K.A.E. Orelburg, on the Ural; well-situated for trade, which it carries on to a considerable extent with Persia and Bokhara. Pop. (1849), 2567.

NIKOPOI. (anc. *Nikeopolis ad Istrum*) an ill-built European Turkish, Bulgarian, emp. manyk. 55 m W by S. Iusternak, lat. 43° 45' N, lon. 24° 8' E, r. bank Danube. It is surrounded by ramparts, on which are large cannon. has an ancient castle, several handsome mosques, baths and some trade. It was the scene of a battle gained by the Turks over the Christians, in 1598.

NIKSAR, a town, Asiatic Turkey, path. Sivas, 35 m N E Tokat. It is surrounded by a forest of fruit-trees almost warm. There are here the remains of an old Roman town wall, and of a castle of the same period. Pop. about 5000.

NILBY VINCENT-DE-MARIE a vil and com. Belgium, prov. Brabant, on the Nil 21 m. S.E. Brussels. It has a brewery and two mills, but almost all the inhabitants are employed in agriculture. Pop. 1548.

NILAB, a small town, Punjab, 1 bank Indus, a short distance below Attock, and close to the confluence of the Harroo river. lat. 33° 45' N, lon. 73° 17' E.

NILAB, the river of Egypt, and the most celebrated river of the ancient world. It owed its fame not more to its magnitude than to its fertilizing agency the productiveness of Egypt, the seat of early industry, art and civilization depending entirely upon it. The name, *Nile*, seems to be of *Ægyptic* origin, and was probably learned by the Greeks from the Phœnicians. It is found in use at the present day wherever the Arabs have penetrated—in its application being confined to rivers that periodically overflow and irrigate their banks, or even to the inundation itself. The Nile is formed by two head-sources—the Bah-el-Azrek (or Blue River) and the Bah-el-Ahmed (or White River)—which unite at Khartoum, lat. 10° 57' N. For each of these streams has been claimed the honor of being the main source of the river, and the True Nile, or the upper course of the Nile, according to the ancient controversy into the discussion of which our space forbids us to enter. The Nile, however, resolves its last tributary—the Atbara, in lat. 17° 42' N, at the N. extremity of the peninsula tract, presently called the island of Marou, and thence flows N. in single stream, without the least accession through 12° of latitude, or following its winding course at least 1500 m. to the sea. This portion of the river's course, from Marou downwards, has never been subject to doubt or controversy and may therefore, with advantage, be considered separately. From its junction with the Atbara, the Nile flows N., having on the W or l. bank, the desert of Bahigda on the E. Makhyra, which is commonly called Barber. Lower down, it forms several islands one of which bears the name of Kandake (Candace), and also one or more catenets; it then bends W. by S. and passes by Jebel Barkal where stand the remains of a temple, repaired by Thothmes (700 B.C.), but probably 1000 years older. Resuming its N. course, it enters the plains of Dongola, and forms several islands of great extent. Quitting these places by a catenet, the river flows through the districts of Malak, Sukhot, Wadi Kenia, and Bahr-el-Hayr (or the Glen of Rocks) at the head of which is the second or great catenet, and, entering Egypt at Philoe—the P-takh or lunk of the Egyptians, it descends the lowest (as ascending, the first catenet to Hyene or As-soma, which is in lat. 24° 8' N.

From Philoe, lat. 24° 8' N, the Nile flows through Egypt in a single stream, far as Bah-el-Bekara, the ancient Gen. catenet, at the head of the Delta, in lat. 30° 15', where it divides into two branches, leading down respectively to Kandil (Rosetta), and Ibrimys (Demia), and entering the sea in about lat. 31° 30' N. Thus the Nile has a course through Egypt of about 7° 30' or, following the sinuities of the stream, of about 700 m. The two arms of the Nile, which remain still navigable to the sea, are supposed to coincide with the two ancient branches of the Nile, namely, the Bahigda and Phœnicia. The other ancient arms, where not

wholly offered by time, are but partially traceable in the various canals of irrigation which intersect the Delta. The ordinary width of the Nile in Egypt, above the Delta, is about 700 yards. The branches through the Delta are much narrower and so shallow in the dry season that vessels exceed 40 tons burden, cannot pass through them. During the flood, armed bridges can ascend to Cairo.

As Nile scarcely ever falls in the Valley of the Nile from the 18th nearly to the 30th parallel, and very sensibly even lower down the river over its supplies wholly to the copious rains of the countries wherein it rises. It begins to increase in June, attains its greatest height about the vernal equinox, and then subsides as gradually as it rose. The ordinary rise, at Cairo, is about 40 ft. During the flood, a great portion of the Delta and of the Valley of Egypt, higher up is inundated. In Sennar, also, and Dongola extensive tracts are watered immediately by the river, but in general, the banks of the Nile above Egypt, are irrigated by means of the water-wheel.

The Bah-el-Azrek or Blue River, unites with the Bah-el-Ahmed or White River in lat. 15° 57' N. Its sources are in lat. 10° 58' N, lon. 36° 50' E, but its spiral course, traced downwards through all its windings, will probably exceed 800 m. In the distance, it descends with immense rapidity from an elevation of 9000 ft., to one of 1500 ft. that is, it has a fall of 7500 ft., and collects the waters of a basin, the elevated margin of which has an extent of at least 1000 m. The Blue River is navigable up to Fagoga, under the 12th parallel, 1500 m. at least from Hosi.

The sources of the Bah-el-Azrek or White River are not yet ascertained. Reports place them in the mountains of Gomerat, under the equator about 250 or 300 m. S. E. of Chamer, a point on the river in the country of Berry state, according to Armand's observations, in lat. 4° 42' N, lon. 31° 40' E. From Berry, the river flows through the countries of the Kyhs Nougat, and some other pastoral tribes, in a very winding and divided channel, inclining N. W. by N. and gradually becoming more slow and tortuous till, in the 9th parallel, it suddenly bends to the E. At this time, it expands to a width of 5 or 6 m., forming an open basin, which has been called Lake Nu. A river or drain, entering this lake from the N. W., has been raised into importance by speculative geographers, and named the Kasak. Further E., and just as the river resumes its N. course, between the Dinka on the E., and the Shilluks on the W., it is joined by the Sobat, a considerable river, which is said to have its sources at no great distance from those of the White River itself. On the W., also, a stream not navigable, named by different tribes the Lool or the Min is reported to rise in the Gombert mountains and to join the main stream in lat. 7° Lower down, about the 18th parallel it increases much in width often resembling a great lake and here as well as between the 5th and 8th parallels, it has no perceptible current except during the floods.

The White River has been navigated to some distance above Chamer, 1000 m. at least above its confluence with the Blue River, and its whole course, from Gomerat to the sea, probably does not fall short of 3000 m. For some hundreds of miles of its upper course, it seems to be only the chief drain of innumerable marshes, overgrown with tall reeds. The tributaries, already mentioned, the Sobat and the Lool, flow nearly parallel to the main stream, cut it off from access on both sides. As to the river (the Kasak) supposed to enter it in lat. 9° there is, in reality, no evidence of its existence. In this part, as well as lower down towards its junction with the Blue River, it stagnates in the dry season, and becomes offensively fetid. The great magnitude of this river therefore, is but apparent, for velocity of current, which, in rivers, is equivalent to breadth and depth, is here wanting; and in comparison with the Blue River, which is in numerous torrens, the White River resembles a great standing water. Its floods reach Khartoum, at the junction of the rivers, usually a month or three weeks later than those of the Blue River; yet it sometimes happens that they precede the latter, and the narratives of Cailland and Mr. Engel relate to one of those exceptional years.

It seems quite manifest that the Nile of the ancients, above Marou, the banks of which were covered with towns, was the Nile River, which has therefore, a prerogative right to be entitled the True Nile. But in tracing rivers, the appropriation of names is wisely master of usage; magnitude avails

nothing; for rivers are named before they are measured and, as heretofore, the Blue River is the Nile of the natives. But let it be observed, that, at the actual junction of the two rivers, the mouth of the White River is narrower than the Blue and here two competent observers (M. Linant, and Capt. Feil, B. V.), measuring breadth, depth, and current, at different seasons of the year, have both assigned the superiority to the Blue River, which is a copious stream at all times.

The sources of the Nile (Blue River) in the country of the Agows, were heard of by Comas Indolepoustas early in the 6th century and they were represented, with many correct particulars, by Fra Mauro, in the middle of the 15th. The companions of Alvarus visited them early in the 16th century, and about a century later, they were viewed by Pedro Paez, whose account of them is copied by Teiker with little change. Then came Bruce, who tracing in the steps of the Jesuit father boasted of having discovered the fountain of the Nile. The White River expired in 1837 by M. Linant, as far as El Ais, was discovered in 1889 by a Turco-Egyptian expedition up to lat. 6° 30' N, and in the following year to Chumker in the country of the Berry, whether trading expeditions are now despatched annually. A fort or factory has been there erected by European traders and St. Catholic missionaries are located in the neighbourhood.

NILKANTHA, a town of Afghanistan, Nepal, lat. 28° 22' N lon. 85° 4' E. It is visited by pilgrims about the end of July and beginning of August, although even then the road is scarcely passable with snow. During this short season a fair is held, and many temporary shops opened.

NILTEEN GRANGE, par. Ire. Ant. 18788 as P 1009.

NIMAR, or **NIMARU**, an ancient Hindoo temple forming part of prov. Candahar, and bounded N. by the Vindhya chain, W. Ghoreh, S. the Satpura hills and E. Hinduia, length, 180 m., mean breadth, about 40 m. It is situated in the valley of the Narmada, and consists chiefly of an immoderate plain, naturally fertile, and once highly cultivated, though now a wilderness of brambles and jungle, owing partly to the ravages of the Pandavas.

NIMBURG or **Landsburg**, a town in Bohemia, 28 m E by N. Prague, on the Elbe. It has a public square, adorned with a pyramid in honour of Maria Theresa, a handsome church, and an ancient townhouse and hospital. Pop. 2700.

NIMBOUEN a town in Holland. See **NIMBOUEN**.

NIMR, a town in France. See **NIMR**.

NIMF, a town in Asia Minor, near Antioch, 28 m. E. by N. Smyrna, near which the very remarkable monument of Sesostris was discovered. This monument consists of a gigantic human figure, sculptured in relief, and sunk in a panel out into the flat surface of the rock.

NIMPTSCH a walled town, prov. and 27 m S by W. Breslau, cap. circle, 1 bank Lobe. It has two churches, a castle, townhouse, and hospital, provincial and town courts and offices, manufactures of linen, leather and dyes, a walk and several other mills, and a trade in cattle. Pop. 1979.

NIMROUD an ancient town in Asia. See **NIMROUD**.

NIMWEGEN, a town in Holland. See **NIMWEGEN**.

NIMY MANICORE, a villa and com. Belgium, prov. Hainaut, 2 m. N. Mons, 1 bank Haine with manufactures of earthenware, best-root sugar pipes, and glass; a salt refinery, two breweries, three tanneries, two quarries of paving-stones, and a limekiln. Pop. 2205.

NINKEH a celebrated ancient and ruined city, capital of the Assyrian empire, in Asiatic Turkey, par. Mosul 1 bank Tigris, along which, and opposite to the town of Mosul, it appears to have stretched for a distance of about 18 m., with an average breadth of 12 m. in the form of a parallelogram, enclosing an area of not less than 216 sq. m. The first recorded notice of Nineveh is in Gen. x. where, after an enumeration of the descendants of Ham, including Nimrod, 'who began to be a mighty one in the earth,' and had the beginning of his kingdom at Babel, 'in the land of Shinar,' it is added, v. 11. 'Out of that land went forth Asshur and builded Nineveh.' The date of its foundation, as first fixed, is, according to the usual chronology, 2347 B.C. From this date there is a perfect blank in its history for nearly 1000 years, but it is obvious that it must have continued to flourish and make vast progress, for about 685 B.C., when it is brought prominently forward as the

book of Jonah, it is described as a 'great city,' 'an exceeding great city, of three days' journey; a 'great city, wherein are more than sixscore thousand persons that cannot discern between their right hand and their left hand.' At this time it had provoked the wrath of Heaven and its doom, which Jonah had been commissioned to preach, was within three days of its accomplishment, when it was saved by a temporary reprieve. The repentance, however, proved only temporary, and the kings and princes who occupied its palace have renewed their evil course, made themselves the terror of surrounding nations by a series of unprovoked and exterminating wars. About 740 B.C. Tiglath-pileser is seen carrying off the inhabitants of Galilee and Naphtali into captivity. Fifteen years later his successor Shalmaneser after making Moab, king of Israel first his tributary and then his prisoner subjected the inhabitants of Samaria to the same cruel treatment; and about 718 Sennacherib, invading Judea, made himself master of Lachish and its then fortified citadel, and obliged king Hezekiah to gratify his rapacity by pillaging the temple of its treasures. These aggressions, and more especially the last, which was probably witnessed by Nahum, appear to have been in the prophet's view when referring to 'Methelah, he saith, Woe to the bloody city, and at the same time gives a high idea of its extent, commerce, and magnificence, saying that its inhabitants were 'many as the locusts' and its merchants 'multiplied above the stars of heaven, and that there was 'no end of the store and glory out of all the pleasant furniture.' The woe denounced was cruelly executed personally on Sennacherib when he fell in the house of Nisroch his god by the hands of two of his own sons, but a respite was given to the city for nearly another 100 years. At length 620 B.C. the vengeance which, provoked by its iniquities and cruelties, had long been impending was accomplished by the instrumentality of the Babylonian Nabopolassar and the Median Cyaxares. About 600 years after the destruction of Nineveh, the Assyrian empire was the ruin of its Eastern imagery portrays its desolation and brings it out in bold relief, by contrasting it with its former splendour. 'The Assyrian was a cedar in Lebanon, with fair branches 'all the trees of Eden that were in the garden of God, moved him but strangers, the terrible of the nations, have cut him off.' 'Upon the mountains and in all the valleys his branches are fallen and his boughs are broken by all the rivers of the land, and all the people of the earth are gone down from his shadow and have left him. The destruction indeed was so complete, and the information furnished by profane historians so scanty and defective, that several writers, without venturing directly to impugn the testimony of the sacred volume on the subject, were disposed to consider it highly overcharged. It was known that, opposite to Mosul and both along the left bank of the Tigris and to a considerable distance inland on what was usually supposed to be the site of Nineveh, a series of vast mounds existed and probably occupied the site, if they did not actually contain the remains of its ancient structures, but no serious attempt was made to ascertain the fact till 1841 when M. Botta, shortly after his appointment as French consul at Mosul, commenced operations on Konyuk, immediately opposite to that town. He had only obtained a few fragments of brick and alabaster when, on information which promised a richer harvest he removed to Khorsabad about 12 m. to the N.E. and was soon rewarded by the discovery of the first Assyrian edifice which had been exposed to the view of man since the fall of the Assyrian empire. The attention of Mr. Layard, who had travelled much in the East and was ardently devoted to the study of its antiquities, had previously been attracted by the mound, and he had resolved to take the first opportunity of exploring them thoroughly, but his resolution was still slumbering when the discovery of M. Botta aroused him. After surmounting many obstacles, and obtaining the necessary requisites he resolved to make the lofty mounds of Nimrod situated about 18 m. S.E. Mosul, in the angle formed by the Tigris and the confluence of the Greater Zab, the scene of his first operations. His success was immediate and complete. 'The excavations of the very first day put him in possession of a chamber lined with slabs, in good preservation, and covered with cuneiform or arrow-headed inscriptions, and his treasures continued ever to multiply upon him.

As *Maintenance* was born, public baths, barracks, theatre, prefecture, civil and military hospital, courthouses, courts of first resort and commerce, a consulting chamber of arts and manufactures, *conseil de gouvernement*, agricultural society, schism of sciences and art, philanthropic society, and commercial college. The great simple manufactures are leather and gloves, the latter particularly of doekins, which are made annually to the number of 80,000 dozen, nearly two-thirds of which are exported to the U States; the other manufactures consist of woollen stuffs, straps, middle-bows, hats and other trunks, &c., and it has important paper, cotton, and worsted mills, oil and vinegar works, and distilleries and a trade in the above articles, and horses, mules, and cattle, flour, timber, both for coopers and carpentry and particularly the claret of the surrounding country, for which this town is the entrepot. It was 14 times besieged. Pop. (1852), 17,177.

NIPIS (Bar of), Cuba, N. E. coast, S. E. Nancayo; lat. 20° 45' N. lon. 75° 30' W., easy of entrance, and capable of holding all the fleets of Europe.

NIPHON, the largest and most important of the Japanese islands, lat. 32° 45' to 41° 30' N., lon. 130° 45' to 142° 30' E. It is of a long, narrow, and curved form, lying N. W. and S. E., the convex side being towards the S. E. about 800 m. N. to S. by 250 m. in breadth at the broadest part. The coasts, indented with a great number of bays, especially on the S. side, are very difficult of access, not only on account of the numerous rocks and islands by which they are fringed, but from the extreme shallowness of the sea. A ridge of mountains, many of them active volcanoes, passes through its entire length, generally of moderate elevation but First the principal peak, is 12,000 ft. high. The island is superabundantly supplied with hot, sulphurous springs and there are some remarkable lakes, the principal of which are that of Misao (which see), and Fokoue, near the city of Yedo. Earthquakes are of frequent occurrence. The rivers are numerous, but necessarily of very limited extent. The difference of temperature in the extreme of summer and winter, is excessive and storms of rain and thunder are both frequent and terrible, still the island is generally healthy. The soil has been rendered very productive by the untiring industry of the inhabitants. The palm, the banana, the myrtle, &c. are found in Niphon. In some parts the sugar cane is brought to considerable perfection and two crops of rice are gathered annually. Near Sendai, a town lying in lat. 38° 16' N.; lon. 140° 50' E. rice is produced in such abundance that the locality is termed the granary of Yedo. Wheat and barley also are grown, the latter mainly for feeding the cattle, the wheat is chiefly used for cakes and soy beans are cultivated with great care, as also the mulberry, for feeding the silk-worm. The principal object of cultivation, however, is the tea-plant, which was introduced from China in the beginning of the 9th century. Misao and Yedo are the capitals of the island and the empire, besides which Osaka, Simonsaki, and Mura are important places.

NIPISING, a lake, Upper Canada, about midway between Georgian Bay, N. E. part of Lake Huron, and the Ottawa or Grand River. It is 750 ft. above the sea, and its waters flow into the N. part of Georgian Bay by French River, in which several rapids occur. It is of very irregular form, greatest length, about 45 m., greatest breadth, 25 m. It contains several islands inhabited by Indians (about 200), and is noted for its immense flocks of wild geese.

NISAO, a river, Isl. Hayti, which issues from a lake, 20 m. S. E., and falls into the sea near a headland of same name, after a course of about 55 m.

NISAKI, or NISAKO an Isl. Grecian Archipelago, lat. 36° 35' 30" N. lon. 27° 11' E. of a square form, and about 4 m. each way, mountains, rocky, and generally barren. The chief occupation of the inhabitants is diving for sponges, at which they are very expert.

NISAPPOOR, an anc. city, Persia, prov. Khosrovan, 50 m. W. by S. of Shiraz. In the middle of the 12th century it was destroyed by the Tartars, and has never recovered since. Its ruins are said to cover a circuit of 25 m. Mines

producing the finest turquoise in the world, have long been worked in the vicinity. Pop. about 15,000.

NISHNII Novosonon. See NIKRA-Novosonon.

NISHOWRA, a large vil. Punjab, 40 m. N. W. Lahore. NISHIN (anc. Nisab) a N. Asiatic Turkey, on a tributary of the Khazar, push and 615 m. N. W. Bagdad, containing a city of 100 well-built houses, a strong castle or palace, which is a large structure, and still in sufficient repair to be garrisoned an ancient church, and several interesting ruins. It has manufactures of coarse cotton and woollen goods, which, as well as wheat, pulse, and tobacco, extensively grown in the vicinity, are bartered for dried figs and raisins.

NISITIA (anc. Neos), a small Isl. Gulf of Naples, 8 m. S. E. Fusunoli and not 1 m. from the coast. It is about 1 m. in circuit, high, and surrounded with trees, and on its loftiest eminence is a large fortification. In port, Favona, is a quarantine station for vessels bound to Naples.

NIRMES, or NIRMIS (Latin, *Agrocinus*) a N. France, cap. dep. Gard, in a rich and fertile plain, 62 m. N. W. Marseilles, the older part poorly built and irregular the modern well laid-out in straight and spacious streets. Almost the only modern building worthy of notice is the cathedral founded at a very early period but which suffered so much during the religious wars, and has, in consequence, undergone so many repairs, often in bad taste, that its original form is almost lost. No town in France can compare with Nirmes for its ancient Roman edifices. The line of Roman walls can easily be traced and many parts of them still exist in good preservation, but the most remarkable structure is the amphitheatre, which is almost entire and with the exception of that of Verona, is the most perfect specimen in existence. Another edifice from its position and altitude the most conspicuous in the town is the *Tower of the Virgin*, it crowns a hill planted with trees, and is of an octagonal shape externally, but concealed within, consisting of several stories, the diameter of which gradually diminishes in the ascent. The circumference of the base being about 250 ft., and at the top only 105 ft. The Romans had included it as part of their fortifications, but it is supposed to have existed before them, and to have been a mausoleum of the Gauls. Another edifice of remarkable elegance, is what is vulgarly called, from its shape, the *Maison Carrée*, but is in fact, a beautiful Corinthian temple, once grand, according to some, in the reign of Augustus, and

LA MAISON CARRÉE, NÎMES.—From French Monuments at Nîmes.

according to others in that of Antonius Pius; afterwards used as a Christian church, then as the Hotel de Ville, subsequently degraded into a stable, and now used as a museum, in which many interesting remains of ancient art have been collected. It is surrounded by 80 Corinthian fluted columns.

It was at one time supposed that this temple stood isolated, but recent excavations have proved that it was only the centre of an extensive edifice or series of edifices, supposed to have been connected with the *Juvens*. The only other objects particularly deserving of notice, are an ancient fountain, called the Fountain of the Nymphs, situated in fine public gardens,

where it bursts forth with great copiousness at the foot of a hill and is received into a large reservoir which was originally a Roman bath; and two ancient gates, the one called *Porte d'Auguste*, founded in the reign of that emperor, and consisting of four porticoes, formed by a double arch and two side passages; and the other, called *Porte de France*, consisting of a single arch flanked by two circular towers. Nismes is the seat of a bishop, and possesses an appeal court for *depa*. Gard, Lozère, and Vaucluse; courts of first resort and commerce, chamber of commerce and exchange, *consent de prud'hommes*, atheism nursery academy, college, diocesan seminary and secondary ecclesiastical school; schools of design and medicine, medical society agricultural society, &c.

The manufactures consist principally of silk and cotton goods, finer and mixed such as satins, shawls, cravats, scarfs, hosiery, &c. Cotton handkerchiefs, also, are made to such an extent as almost enable them to be regarded as the staple. There are likewise numerous tanneries, dye-works, silk, lace-thread, and other spinning mills, and a trade in raw silk, for which this town is the great entrepot of the *de* France wine, vinegar, olaginous seeds, medicinal and dye plants, &c. The foundation of the town is attributed to the Phœnians, or a colony of Phœnians from Marseilles; but, notwithstanding the importance and number of the ancient buildings which attest it is an old town mentioned by classical writers, and its early history is very imperfectly known. In more modern times, it became distinguished by the zeal with which its inhabitants embraced the doctrines of the Reformation. They were, in consequence, subjected to much persecution—a persecution which, on the return of the Bourbons in 1815, was savagely renewed, and only terminated by the threatened descent of 30,000 Protestant mountaineers from the Cévennes. Since the restoration, it is a native of Nismes. Pop. (1832) 47,365.

NISMES, a vil. and com. Belgium, prov. and 86 m. S.E. W. Namur on the Kan. N. with a blast-furnace, two breweries, two mills, and quarries of building stone. Pop. 1028.

NISBA [anc. *Nisus*], a fortified city European Turkey, prov. Servia, and once a cap. 130 m. S.E. Belgrade, on a plain, 1 bank *Nisava*. Pop. 4000.

NISBAVA, a river Turkey in Europe, which rises on the W. side of Mount Idjebowit, near the W. frontiers of Bulgaria, flows W. N. W. into Servia, passes Nissa, and about 12 m. below Jolas' bank Morava, after a course of 85 m.

NISSEL M. FROSA, a sea-arm, Denmark, W. coast Zealand. It communicates with the sea by a narrow opening and is separated from it by a narrow belt of land, over or through which the waves often force their way. Its length is about 9 m. area, 22 sq. m. depth in general, not more than 4 ft. to 6 ft. and both it and the Strøme, which falls into it, are navigable only by boats.

NISTELLODE, a scattered vil. Holland, prov. N. Brabant, 12 m. E. Hertogenbosch, in an extensive barren heath, with a church and chapel, a brewery and tannery. Pop. (agricultural), 1899.

NITH, river, Scotland, which rises on the confines of cos. Kirkcubright and Ayr, to the E. of Dalmeilington, flows S.E. past New Cumnock, across cos. Dumfries, and, about 8 m. below the town of Dumfries, falls into the Solway, total course about 46 m. Like most streams of the Solway it has a bore. Its salmon fisheries are valuable.

NITHEBOHI, or *PRIMA GRANDE* a tn. Brazil, cap. prov. and 5 m. E. Rio-de-Janeiro, E. side of the bay to which the names of Nithebohi and Rio-de-Janeiro are indiscriminately given. It has spacious streets, and generally well built houses, many of them provided with gardens and orchards. Along the shore are well-constructed wharfs, lined with houses of an imposing appearance, and within are numerous elegant edifices, usually occupying well-chosen sites, so that few places present a more attractive appearance, particularly when approached from the sea. The principal buildings are two churches; a theatre, a townhouse, with prison attached, a palace, where the emperor occasionally resides, and another palace, occupied by the provincial governor. It is the seat of the provincial assembly, and of several important courts and offices, and the head-quarters of a legion of the national guard, and possesses a school of architecture and agriculture, a school of arts, &c. There is an immense sugar-house and distilleries, lunatic, and brick and tile works. The principal

objects of culture are coffee and fruit. Pop. dist., 7500 free persons, and 32 000 slaves.

NITI, or *NIYAN GUAR PAM*, a lofty pass in the Himalayas, lat. 30° 50' N., lon. 78° 13' E. height, 18,814 ft.

The mountains on either side are generally composed of rocks steeped perpendicularly, the sides of the chasms in some parts, approaching so close as to admit of their being crossed on wooden scaffolding, supported from crag to crag. There is a village of Niti a few miles from the pass, on the Hindustani side. In the beginning of June the thermometer ranges from 40° to 50° in the morning and from 70° to 80° in the middle of the day with rain and slight snow at night.

NILIAAT or *BARBETLEY BORDA* an extensive inlet filled with islands, N. America, W. coast Vancouver's island, lat. 48° 50' N. lon. 125° 24' W. It is about 12 m. wide at its entrance, between Taron Point on the N. and Contraco Point on the S.E. and has nearly the same distance inland.

NITON par Eng. Hanis 1397 as. Pop. 684.

NITSHILL, a vil. Scotland, co. and 4 m. S.E. Renfrew, near the Levern with bleach and print-falls, and extensive mineral and other works. Pop. 623.

NITENAU, a market tn. Bavaria, Upper Palatinate, on the Regen, here crossed by a bridge, 18 m. N. E. Ratisbon with a court of justice, a church, and a pearl fishery. Pop. 1100.

NITTRITZ a vil. Prussia, prov. Sillesia, gov. Liegnitz, circle Grünberg, with a church, an oil, and several other mills. Pop. 1008.

NIYL (La) a river France, which rises in dep. Basses-Pyrénées, near the Spanish frontiers flows N. N. W., and joins 1 bank Adour a little below Bayonne, total course, about 80 m. of which 16 m. are tidal and navigable.

NIYELLE, or *NIYONNE*, a river, which rises in Spain, in the Pyrenees enters the French dep. Basses-Pyrénées, flows easterly to N. W., and after a course of about 24 m., falls into the Bay of Biscay at St. Jean-de-Luz.

NIVELLE, a tn. Belgium, prov. Brabant, 17 m. S. Brussels. It is not well built, has contains two large squares and a fine promenade three churches, one of which, St. Gertrude, is large and handsome, and is said to possess the finest crypt in Belgium. a court of first resort, a college, an academy of design and architecture, one of the two state normal schools, a convent, a hospital, a *mont-de-piété*, and several other benevolent institutions. It has manufactures of woollen and cotton stuffs, hats, common lace, oil, and tobacco, steel, brass, distilleries, and tanneries, and an important trade in corn, horded cattle, and swine. Pop. 7644.

NIVERNAIS (Latin, *Nidra Nivernensis*) an arr. prov. France, now forming the far greater part of dep. Yèvre. **NIWNITZ**, or *NIWNON*, a market in Austria, Moravia, circle and 16 m. from Hradisch, with a church, and a mill. Pop. 1800.

NIXDORF (Gnosse) a tn. Bohemia circle and 84 m. N. E. Leitmeritz, close on the frontiers of Saxony. It has important manufactures of cotton and various articles of hardware, which are sent into all the different parts of Germany and also manufactures of linen and hosiery, and numerous mills. Near it is a chalybeate spring, over which a bathing establishment has been erected. Pop. 5696.

NIZA a tn. Portugal, prov. Alentejo, 21 m. S. Castello-Branco. It sends a deputy to the Cortes, and has an annual fair. Pop. 2160.

NIZAM'S DOMINIONS, or *HYDERABAD*, the largest native state in Hindoostan subsidiary to the British, and occupying the centre of the Deccan. lat. 18° to 31° 30' N., lon. 72° to 81° 30' E. including the old provs. of Hyderabad and Bander, with part of Aurangabad, Candelah, and Bampur bounded on the N. by portions of the territories on the Nerbuddah, belonging to the British and to Sindhia, together with the British dist. of Candelah, W. by the presidency of Bombay, S. and S.E. by that of Madras. On the E. and N. E. it is partly separated from Barar or Nagpore by the rivers Wardah and Godavary. Length, N. to S., about 380 m., greatest breadth, E. to W. 320 m.; area, 96,337 sq. m. It is chiefly a table-land 1800 ft. to 2000 ft. above the sea, with a surface hilly and undulating, rather than mountainous. Some granite ranges, rising occasionally to 2500 ft., run N. W. to S. E.; and abrupt rocky heights, or also diluvial and ravines of greenstone, are interspersed through-

out this region. Horablende, felspar, limestone, sandstone, and, in some places, columnar basalt, are conspicuous geological formations. The Godavary rises from easterly through the centre of the country, and the Krishna similarly winds through its S. part; other principal streams are the Payyanga, Manjira, Bernali, and the Tocobudda, forming a part of the S. boundary. All the rivers hold an E. direction. The climate is, on the whole, temperate, and in some parts even cool near Hyderabad, in the S., the thermometer often descends as low as 40° or 85° Fah. at Secunderabad, the annual mean is 81° at Janabai, in the hot season, from March to June, the heat ascends to 90° or 100° Fah. though that district is admirably adapted for the culture of most European fruits and vegetables. The soil is in most parts, very rich and fertile, and, except where the tanks have been allowed to decay the country is very well watered; much of it, however, is waste. Tanks are formed in the granitic and sandstone tracts by uniting with causeways or roads, two projecting points of low hills, by which means sheets of water from three to ten miles in circumference, are procured for irrigation of the rice grounds. At least eight varieties of rice are grown, and two crops are often raised on the same field in a year, but this grain is cultivated only in limited tracts, and it is chiefly sent to the capital for consumption, or elsewhere for exportation. Rice and wheat are consumed only by the upper classes, and the surplus of the wheat produced is mostly sent to the E. coast of India, to be exchanged for salt. Bazley, chenna, oil plants, cucumbers, gourds, lamp, cotton, sugar-cane, some beet tobacco, sweet potatoes, and other culinary vegetables, fruits, and aromatic woods, are the principal articles of culture together with jewelry (Indian mules) and bays or bayri (*Salvia speciosa*) which grows from the chief sources of the labouring classes. Much of the surplus is well adapted to the culture of cotton, and this would probably become the main cotton-growing country in India, if good roads or railways existed to facilitate the transport of cotton to the ports of the W. coast. The territory is not abundantly wooded except along some of the hill ranges, there are no extensive jungles and large forest-trees scarcely exist, except in the N. though date and palmyra groves are common. The export of opium, formerly extensive, has ceased since the British have possessed the coast district in the Deccan. The lands are mostly held in jaghirs, or by military tenure, and no great loss has been the oppression of the jaghirdars, or holders of the fief, as is favoured by the weakness of the sovereign power that in no part of the peninsula are the peasantry so impoverished. The best horses in the Deccan were formerly reared in this territory; the numbers have now greatly decreased, but some are bred in the districts on the Deccan and an annual fair for their sale is held at Mallong in the Nandard district. Sheep are pretty numerous. The cattle are generally small the export of their hides has lately ceased, a circumstance held to be a favourable index of the spread of agriculture as leather is used in the construction of nearly every farm implement. The tiger, leopard, panther, bear, antelope, and wild boar are numerous, wild buffaloes are met with in the N. Deer and buffalo forms, and the *myristicifera*, an insect with blurring qualities reported to be superior to those of camellias, are animal products of some mercantile importance. Iron-ore is plentiful, and in the Nirmal hills it is magnetite. Coal is found near the junction of the rivers Godavary and Wardha. Near the Godavary also, are some mines of garnet, at Puratol near Condispally, an diamond mine from which the treasury of Golconda was formerly supplied; they are mere pits, from 10 to 12 feet deep, and their working is now discontinued. The Nizam possesses a celebrated diamond weighing 1105 grains. At Aurangabad, nearly 1000 looms are employed in the manufacture of silks and brocades at Warangal about 200 looms are engaged in carpet-weaving at Kluzumun, in the S.E., calico-printing is carried on by means of wooden blocks, as at Masulipatan, &c., in the Madras presidency. Hand-loom and boys are amongst the manufactures not of prime necessity. Imports from the E. I. Company's territories are copper beads, cloths, velvets, silks, muslins, chintz, calicoes, cottonised fabrics, sugar, opium, sandalwood, and salt; from Oudhware, shawls, from Malwa, opium, from Marwar, camels and blankets. Chief exports:—steel weapons, excellent teak timber, which grows near the Go-

davary, and is conveyed down that river to Coringa, and agricultural produce. Although the reigning dynasty is Mahomedan, not more than one-sixth of the people are Mahomedan except in the capital, where they predominate, the majority of the population are Mahomedan and Telugu, with Bheels in the W., Gonds in the E., and some other wild races. Justice is very often contravened by force or favour, and the territory generally is in a deplorable state of anarchy. After the capital (Hyderabad) the chief towns are Filleshpur, Aurangabad, Beider, Warangal, Janabai, Nandard, Kurnool, Golconda, and Secunderabad, the place of a British subsidiary force. The famous sculptured caves of Elora are in the N.W. part of the Nizam's Dominions.

This region formed one of the great soubas or viceroys under the Mogul empire. During the decline of that power, after the irruption of Nadir Shah, the soubadar Ismael-Malik erected it into an independent sovereignty, which at his death in 1748, extended from the Nerbudda to Trichinopoly and from Masulipatan to Bayapur. In 1768, after a hostile invasion of the Carnatic by the Nizam the British obtained from him the cession of the Northern Circars and about 1800 the first subsidiary alliance between the E. I. Company and any Indian state was concluded with the Nizam. In 1808, it was stipulated by treaty that, while the Nizam nominated his own vizier or premier the British resident at Hyderabad should appoint the effective minister, a divided responsibility which has never worked well. The perpetual opposition of the Nizam to the measures suggested by the British resident, has perpetually neutralized the efforts of the latter to promote the well being of the country and the embarrassment and disorganization of the state are such that its ultimate annexation to the Anglo-Indian territories seems inevitable. In addition to the British force, the Nizam is bound to support a subsidiary army of 8750 cavalry, 6700 infantry, and other troops, in all amounting to 9400 men offered from the several British presidencies and costing annually 80 lacs of rupees (£300,000). In further addition, he maintains an irregular army of Rohillas, Arabs, Patans, &c. comprising from 30,000 to 35,000 men, at a cost of about 64 lacs, or £640,000 annually and who are frequently turbulent and clamorous for arrears of pay. The expense of the soldiery is supposed to absorb nearly two-thirds of the royal revenue, which has been estimated at £1,600,000 annually. His pop. has been recently estimated the *Oriz* on the *True Survey of India*, it is given at 10,668,080 (*Asiatic Jour. of Bengal, Jour. of the 1st of Geo. Soc. xii. Jour. of the Bombay Geo. Soc. xli. Rep. on the Mch. and Statist. Topog. of the Madras Presid. 1844*).

NIZNOW a vil Austrian Galicia, 77 n. S.E. Lomberg r. bank Diester with two churches, several mills, a manufacture of gun flint, and an active river trade.

NIZZA a city and seaport, Italy. See NICK.

NIZZA MORE GERATO or NISSA DELLA PAGLIA, a town to kingdom of Italy. Eudrom. d. div. and 10 n. S.W. and on the delta, at the junction of the Nizza with a silk mill and a trade in good wine. Pop. 4376.

NIZUWAH a town Arabia. See OUK.

NJURUNDA the name given to the lower part of the Ljungar, a river, Sweden which issues from a small lake L. side the Kiolen mountains, in Osterund in Bergsladen, flows E.S.E. expanding into lake Stor-Jonen, and, after a course of about 180 m., falls into the Gulf of Bothnia, 9 m. S.E. Sundvall.

NOAILLES, a town and com. France, dep. Oise, 9 m. S.E. Beauvais with manufactures of ribbons and linen and cotton goods, brick and tile works, lincolns and a trade in hemp, horses, and cattle. Pop. 1022.

NOAKOTI or NOACOTE a town Nepal, 17 m. N. by W. Khatmandoo lat. 27° 58' N. lon. 85° 50' E., in the valley of its name, I. bank Trisoolganga. It has some of the largest and best-looking houses in Nepal and a celebrated Hindu temple and it commands the only entrance into this quarter from Upper and Lower Tibet.

NOAILLE, a town Italy, Venetia, gov. and 18 m. N.W. Venice with a church, silk manufactures, two carriage factories, and two mills. Pop. 2500.

NOALJO, a town Spain, Andalusia, prov. and 22 m. from Jaen, with narrow, but mostly paved streets, a townhouse, two schools, and a church. Pop. (agricultural), 2865.

NOANAGUR, a walled tn., W Hindostan prov Gu-
jrat, about 7 m. S. Gulf of Cutch; lat. 23° 55' N; lon. 70° 14' E; isolated chiefly by waters, who make a considerable
quantity of coarse and fine cloth.

NOBBE, a vil. and par. Ireland, co. Meath, about 12 m.
from Narrag, with a small parish church, a R. Catholic chapel
and the remains of a priory. Carleton, the celebrated Irish
barber was born here. Area of par. 10,468 ac. Pop. 2185.

NOBLEJAS, a tn. in Spain, New Castile, prov and E.N.E.
Toledo with a church, townhouse, prison, and primary school
manufactures of articles in copper, a flour and several oil mills,
and a trivial trade in wine and brandy. Pop. 1608.

NOBRA or **NUMBA**, a wild and elevated tract of Latak
or Middle Tibet, in the E. part of the Hleedoo Koonch and on
the S. side of the Karakorum mountains, enclosed on the N. E.,
and S. sides by the river Sily-Yak. The lowest part of the
tract has an elevation of not less than 11,000 ft. above sea-
level, but notwithstanding its height, is under tolerable cul-
ture, and well peopled. The only place of any consequence
is the fort and village of Nobra on the Sily Yak.

NORRENSAAR a vil. and com. Belgium, prov Luxem-
burg, 6 m. N.W. Arlon. P. (agricultural), 1329.

NOCEDA *don-Vinosa*, a vil. Spain, prov and 50 m.
from Leon with a church, commonhouse primary school, and
a trade in lin. cattle, corn, and fruit. Pop. 1206.

NOCI *RA*, several tns. Italy—1 (*des Pesone*), [tna.
Nocera Alfaterna] a vil. and com. Campania, prov Salerno,
21 m. E.S.E. Naples consisting of detached groups of houses,
interwoven with trees and gardens. It has a church, built
in the style of the Pantheon at Rome good cavalry barracks,
several schools and some manufactures of linen and other
textures. Pop. 6800—2 A tn. Naples, prov Calabria-Ultra-
li, dist. and 13 m. W. Nicastro. Pop. 2808.—3, *San-
ta Lucia Conventuale*, a tn. Papal States deleg. and 22 m.
E. Perugia, in a plain at the foot of the Apennines. It is
celebrated by Strabo for its manufacture of wooden bowls,
but has dwindled down almost to a village. It has some
mineral springs, which enjoy great local repute. Pop. 1114.

NOCTET, a tn. and com. Italy, ducky and 6 m. W.
Parma, r. bank Ronchio, with a large church, a dilapidated
castle, a primary school, and a trade in corn, wine, dairy pro-
duce, and cattle. Pop. 5753.

NOCI a tn. Naples, prov and 28 m. S.E. Bari. P. 8000.

NOCTON par. Eng. Lincoln 5340 ac. 1 op. 510.

NOUDUWÉ-LANOUWAP a vil. and com. Belgium, prov

S. Brabant 80 m. S.E.E. Brussels with a brewery a flour-
mill and a trade in agricultural produce. Pop. 1451.

NOLLUNGHE a tn. N. Hindostan, prov Oude, 15 m.
W. S.W. Lucknow, lat. 26° 47' N, lon. 80° 23' E with an
extensive manufacture of the different kinds of brass, domestic
and culinary vessels.

NOESSA LATT, a small isl. Indian Archipelago, one of
the Moluccas, S. from Ceram lat. 8° 40' S, lon. 128° 50' E.
The clove culture is actively carried on and the inhabitants
all profess Christianity.

NOFEL a vil. Austria, Tyrol Vorarlberg, on the fron-
tiers of the principality of Liechtenstein, about 2 m. from Feld-
kirch. It has a church and mineral springs with a large and
handsome bathing establishment, which is much frequented.

NOGAISE, or **ONOROTSKA**, a tn. Russia, gov. Taurida,
cruel and 70 m. S.E.E. Orlikow, on the Obukimul, 5 m.
above its mouth in the Sea of Azov, in the midst of a steppe,
and the residence of a Russian commandant. P. (1849) 1159.

NOGARE, a tn. France, dep. Gers, near the Midou
23 m. W. W. Auch, founded in the 11th century, and for
some time the residence of the counts of Armagnac. P. 1599.

NOGAT an arm of the Vistula, which quits the main
stream in prov W. Prussia, 12 m. N.W. Marienburg,
and, proceeding N. E., past Marienburg, falls into the Frische-
Haff by several mouths, 4 m. N.W. Elbing; total course,
about 50 m.

NOGENT, several places, France, particularly—1 (*le-
No*) [Latin, *Nogentium*], A. tn. and com. dep. Eure-et-Loir,
1 bank Eure, about 11 m. S.E. Evreux; with a considerable
trade in corn and flour. Pop. 1886—2, (*le-No*), A. tn., dep.
Haute-Marne, r. bank Trère, about 12 m. S.E.E. Châtenay-
de-Bassey. It is the central locality for the manufactures
of Langres cutlery, in which also it carries on a considerable
trade. Pop. 2654—3, (*le-No*), A. tn., dep. Eure-et-Loir,

23 m. W. S.W. Chartres, at the foot of a steep hill, on the
slope of which is an old Gothic castle, formerly the residence
of Henri IV's celebrated minister Bailly. It has three
churches and an hospital, near which is the tomb of Bailly
manufactures of serge, druggist, and bombazine; cotton
and bark mills, numerous tanneries and dye-works, and a trade
in linen, lamp, hay, clover-seed, cattle, &c. Pop. 5680.—
4, (*le-No*), [Latin, *Nogentium de Segnonum*], A. tn., dep.
Aube, on l. bank Seine, where it becomes navigable, 81 m.
N.W. Troyes, a clean, thriving place, well, and in general
regularly built. It has a handsome Gothic church of the 15th
century manufactures of hosiery and cordage, and a consider-
able trade in corn and flour, charcoal, staves salt, hemp, tur-
nery and timber. Nogent suffered much in 1814, when after
a valiant defence, it was stormed by the Allies. Pop. 8467.

NOGRAD co. Hungary. See *NOGRAD*.

NOGUEIRA, several small places, Portugal. The largest
is *Nogueira do Oure*, a tn. and par. Beira-Baixa, about 40 m.
from Coimbra. Pop. 650.

NOGUEIRA two rivers, Spain both rising in the Pyre-
nees near the Val d'Aran, equals about 25 m. apart—
1, (*rrugormar*) flows S., forms for a considerable part of its
course the boundary between Aragon and Catalonia and falls
into the Segre, 16 m. S. Lerida, total course, 80 m.—2,
(*galleres*), in Catalonia, flows S. W., and joins the Segre,
30 m. N. E. Lerida, total course, about 80 m.

NOGAY *VAI* par. Bel. Lat. 2560 ac. Pop. 709.

2, Kerry 8204 ac. Pop. 623—(*Nokowaldy*) Cork
and Kerry 17773 ac. 1 op. 3086.

NOHACAB a vil. Mexico, Tuxtepec lat. 20° 30' N
lon. 86° 25' W in an extensive plain, with a large church,
a townhouse, and a large schoolhouse. Near it are remains of
an ancient city of some name. Pop. about 6000.

NOIA, two tns. Naples. See *NOIA*.

NOIR, as ml. S. America, off S.W. coast, Terra del Fuogo
lat. 54° 30' S, lon. 73° 5' 40' W, about 600 ft. in height.
In the S.W. it terminates in a low rock, like a tower of
steep, which bears the name of Cape Noir. On the E. is an
excellent roadstead, with a clean sandy bottom and safe from
all winds between N. and S. by W., but the channel between
the island and the mainland is obstructed by numerous rocks,
and very dangerous.

NOIRE-FONTAINE, a vil. and com. Belgium, prov Luxem-
burg, on the Moselle, 33 m. W. W. Arlon. It has planta-
works, a brewery, a rulling an oil, and flour mill. P. 1159.

NOIRMONT or **BOUWHEEREN**, a vil. and par. Swit-
zerland, can. and 10 m. S.W. Bern; with a handsome
church, and consisting chiefly of a well built castle, lining
the public road. Pop. 1121.

NOIRMOUTIERS [Latin *Horus Juvoni*], an isl. France,
N.W. of dep. Vendée, from which it is separated by a narrow
channel almost dry at low water, lat. 47° 0' N, lon.
1° 24' W. It is of a very irregular shape greatest length,
N.W. to S.E., about 10 m., breadth, varying from 1 to 8 m.
Only about one-fifth of the surface is under the plough, but
this portion is of great fertility. The rest of the island is
occupied partly by meadows and pastures, on which numbers
of cattle are reared, and partly by salt marshes, and partly by
mere waste. Noirmoutiers became a station of considerable
importance during the war of La Vendée. Pop. 7011.

NOIRMOUTIERS [Latin *Novus Montemur*], a tn.
France, dep. Vendée, cap. above isl., remarkably clean, and
built with considerable regularity. It has a harbour, in
which the water rises about 18 ft., admitting vessels of 50 to 60
tons, the roads outside have good anchorages for large ships
trade chiefly in corn, beans, salt, and soda. Oyster-fishing
is extensively carried on. Pop. 2239.

NOISY several places France, particularly—1, (*le-So*),
A. tn., dep. Seine 8 m. S.E. St. Denis surrounded by kitchen
gardens. Pop. 1844—2, (*le-Grand*) [Latin, *Noisium*],
r. bank Marne, about 9 m. from Paris. Pop. 1078.

NOJA or **NOIA**, two tns. Naples—1, Prov. and 10 m.
S.E.E. Bari, was a place of some importance till 1816, when
it lost nearly a fifth of its inhabitants by the plague—2, Prov.
Basilicata, dist. and 23 m. E. Lagugugro. Pop. 1444.

NOKER, par. Eng. Oxford, 794 ac. Pop. 140.

NOKERE, a vil. and com. Belgium, prov N. Flanders,
on the Randbeek, 16 m. S.W. Ghent. It has manufactures
of linen and yarn, and a flour mill. Pop. 1723.

NOKUNDA, or *Kokundun*, a tn. Persia, prov. and about 80 m. W. Astrabad, in the bay of that name, on the S.E. shore of the Caspian. It is a struggling place, consisting chiefly of wooden cottages covered with thatch and surrounded among magnificent trees.

NOLLA, a tn. Naples, prov. Lavore 14 m. E.N. Naples. It is ill built and ill cleaned, the see of a bishop, and has 16 churches, a college, a seminary hospital and barracks. General Brimo, who, on a charge of heresy and atheism, was burned alive in 1600, was born here. Pop. 8850.

NOLLA (Latin, *Nollaw*) a tn. France, dep. Côte-d'Or, in a fertile district, celebrated for its white wines, 88 m. S.S.W. Dijon. It has a large and handsome church, fine fountain, and ancient tower; manufactures of hats and leather, and a trade in wool, wine, corn and leather, oaks, timber &c. Carnot was born here. Pop. 3046.

NOLI (anc. *Nasium*) a tn. Italy Piedmont, div. and 80 m. S.W. Genoa, in a small bay on the Gulf of Genoa with a court of justice, a large Gothic church, once a cathedral, an Episcopal seminary, and an hospital; inhabitants chiefly employed in fishing and the coasting trade. P. 545.

NOLINSK, a tn. Russia, gov. and 65 m. S. Viatka, esp. strale, on the Volzha and Dniebrovka. It has some general trade, but is mostly agricultural. Pop. (1860) 1961. The climate is flat surface, a soil mostly of strong clay not very fertile, but well cultivated. Pop. 150,000.

NOLTON, par. W. Mass., Falmouth 1564 ac. Pop. 245.

NOLYE a tn. Hindostan, prov. Malwa lat. 23° 5' N lon. 75° 27' E. 29 m. S.W. Oogun.

NOMBELA a tn. Spain New Castile prov. Toledo, near the Alberca, S.E. Madrid with clean streets, a parish church, townhouse, prison, and primary school an oil and several flour mills, and a trade in cattle, wine, and silk. Pop. 1233.

NOMBRE DE DIO (*Name of God*)—1. A tn. Mexico dep. and 46 m. S.E. Durango. Near it are several silver mines. Pop. 7000—3. A port, New Granada, dep. Isthmus, on the Caribbean Sea, 12 m. from Panama.

NOMO, or *Nomozaki*, a remarkable headland, Japan, on W. of Id. Kiumu, and of great importance in making the Bay of Nangasaki, of which it forms the S. side, lat. 32° 55' N lon. 129° 41' E. It is the termination of a rocky peninsula, which stretches S.S.W. for about 90 m., between the bays of Nagasaki and Kiumu, and has a height of 1800 ft. above the sea. Near this cape are the small island of Kawasaki and, on a small lake, 37 m. N.E. the rocks called by the Japanese Mitau-ao, and by the Dutch, *De Eten met de Kuisen* [The Hen and Chickens].

NOMA (anc. *Nosow*), a tn. Austria, Dalmatia, circle and 8 m. N.W. Zara, on the S.E. side of a peninsula of same name, at the mouth of the Rialma, in the middle of an unhealthy swamp. It was once a place of importance, and the see of a bishop, and has a church, which formerly ranked as a cathedral; and a haven, which is nearly filled up. P. 500.

NONGOWRY, one of the Nicobar Is. See *NANOWRY*.

NONE, a tn. Italy Piedmont, div. and 12 m. S.W. Turin, in a fertile plain between the Grappa and the Lessa. It has two churches, a charitable dispensary, several public schools, and a trade in corn, wool, and silk. Pop. 8000.

NONINGTON, par. Eng. Kent, 4081 ac. Pop. 876.

NONNENWEIER, a vil. Baden, circle Middle Rhine, on the Rhine, with a church and a mill. P. 1060.

NOTRON, a tn. France, dep. Dordogne, on the Dordogne, 26 m. N.W. Périgueux. It is irregularly built, consisting of mean houses and ill-laid-out streets; has a well managed hospital, manufactures of cutlery, extensive tanneries, and a trade in iron and steel. Manganese and iron are extensively mined; and there are blast-furnaces and other iron-works in the neighbourhood. Pop. 5561.

NOOHEEVA, one of the Marquesas. See *NOKA KIVA*.

NOORONDY, a tn. Hindostan prov. and S.S.W. Bengal, overlooking by an elevated rock, crowned by a rude stone fort, with lofty, circular bastions.

NOORBOEK, a vil. Holland, prov. and 13 m. E. by S. Groningen, with two churches, two schools, a brewery, rope-works, coarse weaving, hush-making several chisels, needles, and corn, walt, and book-binding mills. Pop. 1551.

NOORBOER, a vil. Holland, prov. and 6 m. W. N. W. Groningen, with a church and school; inhabitants engaged in agriculture and cattle-rearing. Pop. 888.

NOORDWIJK, two contiguous vils. Holland, prov. S. Holland, about 1 m. apart—1. (near No. 7) m. N.W. Leyden on the North Sea, with a church, school, and hospital for 12 poor people. Inhabitants, engaged in the coast and herring fishing, generally poor. Pop. 700—2. (Dijssel), 6 m. N.W. Leyden, with two churches, several schools, a townhouse, and a curious old edifice, called St. Janskerke, where archery games are held annually. Inhabitants engaged in agriculture, horticulture, raising large quantities of beautiful flowers and excellent vegetables. Pop. 1964.

NOORDWIJKERHOUT, a vil. Holland, prov. S. Holland 8 m. N.W. Leyden, on the sand dunes with two churches and a school. Pop. (agricultural), 832.

NOORDWOLDE, a vil. Holland, prov. Friesland, 12 m. S.E. Heerenveen, with a dye-works and corn-mill, but inhabitants chiefly engaged in turf-cutting. Pop. 1782.

NOORDZEE (Dr. See *NOORD* Sea).

NOORJA, a considerable vil. Sindh, 14 m. N. Sehwan, and 8 m. W. from the Indus, lat. 26° 22' N; lon. 67° 53' E.

NOOTKA-SOUND, a bay or inlet, British N. America, W. coast, Vancouver Island, lat. 49° 35' N lon. 123° 55' 30' W (N.). It extends N.N.E. about 10 m. inland, and has a wooded island in its middle. It branches off into several smaller bays and coves one of which—where Captain Cook remained some time on his last voyage, and which was called Friendly Cove—has a narrow entrance, but makes a safe harbour, and is bounded on all sides by high and wooded land. Nootka-Sound would seem, however, to have been raised into modern importance. Captain Sir E. Belcher says that, on first entering it, he doubted his senses, that so small a space could have contained so much nature, and that, until he had examined it himself in his boat, he did not think it could afford shelter to two vessels. The greatest distance, he says, between any two points does not exceed a quarter of a mile, and mostly rocky.

NORA, a mining tn. Sweden, lkn and 17 m. N.W. Örebro, on a lake. It is surrounded on W. and S. sides by the river Hagby, and is regularly built. Near it is a mineral spring and it carries on a trade in iron. Pop. 730.

NORBERG, a vil. Sweden, lkn and 33 m. N.W. Westera, esp. dist. It is well built, has a church, and valuable iron mines, which are extensively worked. Near it is the large smelting-furnace of Nordanj.

NORBURG, a vil. Denmark on S. side of Als, on a small lake, 37 m. N.E. Schleswig, with a church. P. 1900.

NORBURY three pars Eng.—1. (and *Easton*) Derby 2543 ac. Pop. 470—2. Salop, 4584 ac. Pop. 878—3. Stafford 3318 ac. Pop. 268.

NORCIA (anc. *Nurnia*) a tn. Italy Umbria, circle and 17 m. E.N.E. Spoleto, with a trade in wine, oil and swine. St. Benedict was born here. Pop. 4000.

NORD a dep. France, bounded, N.W. by the North Sea, N.N.E. and E. by Belgium, S. dep. Aisne, S.W. and W. Pas-de-Calais, greatest length, N.W. to S.E. 117 m. breadth, varying from 4 m. to 89 m. area, 3170 sq. m.

The coast, which furnishes the two harbours of Dunkirk and Calais, is also marked by a long chain of sandy hills. With this exception the whole department may be regarded as one vast, monotonous flat, intersected by sluggish streams, flowing generally N.E. to the N. Sea, and numerous canals. These rivers are the Sambre, the Scheldt, which here receives the Scarpe, the Lys, another affluent of the Scheldt, and the Yser. All these rivers are navigable. The Aa, forming part of the boundary between this department and that of Pas-de-Calais, takes a N.W. direction. The low position of the surface, and the large extent of it occupied by still water are unfavourable to health, and the climate must be regarded as on the whole not salubrious. The greater part of the soil is a rich alluvium, which, under proper drainage, never fails to yield the richest crops, and the culture partakes a good deal of the nature of that for which Flanders has so long been celebrated. The principal crops are the ordinary cereals and legumes, flax, hemp, tobacco, oilseeds, dyestuffs, plants and roots, hops, &c. The meadows are remarkably luxuriant, and rear large numbers of horses, oxen, and cows, almost all of the Flemish breeds. Coal extends over a considerable portion of the surface, and is wrought at Aves, Balaire, Fresnes, Vieux Condé, and St. Salvat, supplying a great

variety of manufacturing establishments. The manufactures include all the ordinary classes, particularly ordinary linen, raw and bleached, table-linen, molasses, canvas, lace, broad cloth, and woollen stuffs, sailcloths, cottons, &c. Other articles are soap, woads, blackened, tannery and to these may be added distilleries, breweries, bleachworks, dye-works, machine-works, oil, paper, cotton, hemp, and flax mills, blast-furnaces, iron-works, and all kinds of ironware, cast and malleable, marble saw-works, glass-works, tanneries, potteries, brick and tile works, &c. For administration, it is divided into 7 arrondissements—Lille, the capital, Avesnes, Osmes, Douai, Dunkirk, Haubourch, and Valenciennes subdivided into 60 cantons and 667 communes. Pop (1857), 1,158,385.

NORDEN a town in Hanover gov. Aurich, 16 m N Emden, on a canal which, at a short distance, communicates with the sea. It is an old place, but tolerably well built, has an ancient church, R. Catholic chapel, synagogue, Latin school, and hospital; manufactures of soap, cheese, and tobacco and a considerable shipping trade. Pop 5661.

NORDENBURG a town in Prussia, gov and 49 m S E Königsberg on a small stream, where it falls into Lake Anshewitz with a church and some trade in linen, horses, and cattle. Pop. 2299.

NORDERNY, an vil. in Hanover, in the N Sea, 25 m N Emden, about 4 m long, by nearly 3 m in breadth, low, and as sandy as to be in a great measure barren. The principal village, which bears the same name, is a neat and remarkably clean place, with a church, and is much frequented for sea-bathing. Pop. 700.

NORDHOOG an vil. in Denmark, in the N Sea, off the coast of Schleswig and a little W of all Falworm. It is little more than 1 m. in length and is frequented by immense numbers of sea-fowls for whose eggs it is often visited by the inhabitants of the adjacent islands.

NORDHOVEN a vil. and com. Belgium, prov. and 10 m. E. B. Antwerp, on a small stream, with a brewery two brick works, and a trade in agricultural produce. P. 1188.

NORDHALBEN, a market in Bavaria, Upper Franconia, 80 m N Bamberg with a chapel several flax and cotton mills, and a trade in dried fruit, millet, and wooden articles. Pop. 1864.

NORDHOLMB a vil. in Prussia Saxony gov and 88 m N W Erfurt, on the Elbe and the Golden Aue, at the foot of the Sauerberg, belonging to the Harz. It is surrounded by walls flanked with towers, and entered by seven gates contains seven churches, one of them with two fine paintings by Lucas Cranach, a townhouse, gymnasium and orphan hospital; and has manufactures of woollen and linen cloth, lacquerware, and chemical products extensive breweries and distilleries, and a considerable trade in corn and cattle. Pop (1846) 12,881.

NORDHIM several places, Germany, particularly—1 A vil. Bavaria, Lower Franconia, dist. Volkach, on the Main, with a church. P. 1058.—2 A vil. Hesse-Darmstadt, prov. Starkenburg, near Heppenheim with a church. P. 1050.—3 A vil. Württemberg, circle Neckar ball Brackenheim, with a church, and a saw and a flour mill. P. 1243.

NORDHORN, a town in Hanover gov and 42 m N W Osnabrück, on the Vechte with two churches, some shipping, and a considerable trade in wood and stone. P. 1411.

NORDKÖPING, a town in Sweden. See NORDKÖPING.

NORDKYN, a cape, Norway forming the most northerly point of the section of coast, the N Sea, about 4° W, before situated on an island, lat. 71 10' N, lon. 17 50' E.

NORDLAND, a land, Norway, prov. Tromsø, bounded, N by Finnmark, E. Sweden, S. Tromsø and W the Atlantic and Arctic oceans, greatest length, N to S, nearly 300 m. mean breadth, not more than 60 m., area, 1108 sq. m. The coast is much indented by deep bays and fjords, and lined by numerous islands, of which the Lofoten group in the N W, is the most important. The surface is very mountainous, being covered almost throughout by the Koster Mountains, which stretch throughout its whole length, S. E. to N. W., and end not least between, which are continued into the land of Lofoten. The easternmost point, Skellefne, has a height of 6643 ft. Both the climate and soil combine arguments which very narrow limits; but some butter and cheese are exported, and the fisheries are very productive. Pop. (1855), 77,855.

NORDLÄNGEN, a town in Bavaria, Swabia, on the Goldbach and Elbe, 39 m N W Augsburg. It is surrounded by walls, flanked with towers, and is entered by five gates; has several courts and offices; four churches, one of them a handsome Gothic cathedral, surmounted by a remarkable tower, 845 ft. high; a townhouse, an hospital, Latin school, agricultural and industrial school, manufactures of carpets, woollen and linen goods, Coriarian leather, and glass, and a considerable trade in corn, grain, and feathers. P. 6464.

NORDSTRAND an vil. in Denmark, separated from the N. W. coast of Slesvig by a narrow channel, as one part not more than a mile across. Its present area does not exceed 17 sq. m. but, previously to the 11th October, 1834, its area was ten times greater. On that day a tremendous flood from the N Sea swept across it, carrying destruction to the W coast of Slesvig and drowning 15,000 persons. Of these, 5400 belonged to Nordstrand alone. It besides lost 50,000 head of cattle, more than 1800 horses, and almost all its churches. The far larger part of its surface was buried for ever under the waters. Less than a half of the remainder now belongs to itself, the rest forms the separate islands of Falworm and Halligen. Its situation is extremely low but it has a good deal of rich marsh land, held by such precarious tenure as dikes can give against the encroachments of a raging sea. Pop. 2000.

NORE—1 A part of the estuary of the Thames, England, about 60 m below London, and E of Sheerness. It is surrounded with mudbanks, on one of which there is a floating light.—2, A river Ireland which rises in the Glenties mountains, on the borders of Tipperary and Queen's co. flows S. E. through Kilkenny Thomastown, and Inistioge, and joins the Barrow about 2 m. above New Ross. Its rapid current makes navigation difficult, but it admits vessels of considerable size as far as Inistioge, and thence to Thomastown.

NOREÑA (SANTA MARÍA) a town in Spain, Asturias prov. and about 7 m. from Oviedo, near the Noreña, an affluent of the Nora. It has a church, townhouse, primary school, and hospital, manufactures of leather and shoes, and a trade in them, and in cattle and fruit. Pop. 1995.

NORFOLK a vil. and com. Belgium, prov. and 40 m E. Stettin, on Lake Erug, and surrounded by four other lakes. It has a church, an hospital, and a trade in cattle and horses. P. 1543.

NORFOLK, a maritime co. England, bounded, N. and N E by the N Sea, S. and S. E. by Suffolk, W. and N W by Cambridge and Lincoln, and the Wash Area, 1,388 890 sq., of which about 1,300,000 ac. are supposed to be arable, meadow, and pasture. The surface is generally flat, with some slight swells and depressions in the N part. The coast consists principally of cliffs, partly chalk, and partly alternate strata of clay gravel, loam, and sand. These are gradually undermined by the sea, which is everywhere making inroads on the land. Several villages have been at various periods swept away the sites they occupied now forming part of the bed of the German Ocean. These encroachments of the sea are still in progress. The general appearance of the country in Norfolk is extremely uninteresting; the undulations of the surface not being sufficient to relieve the eye, while the insistent effect of rich woodland is not always to be met with. But these deficiencies are compensated by the evidences of careful cultivation, and the pleasing tokens of human industry so frequently and prominently brought before the eye of the traveller. The climate on the E. coast is dry throughout the year, and cold, heavy mists prevail during the winter and early in spring. This county has perhaps a higher reputation than any other district in England for its progress in agriculture (although numerous instances of very indifferent husbandry present themselves), yet it has nothing indigenous which commands a first-rate price in the market. The Norfolk sheep are almost introduced in their own district by the Southdown, and the fine cattle which are sent to Southdown from this county are merely fattened here—the native breed, the Norfolk or 'Hamshire', being held in little estimation. In the E and W districts the soil is light and sandy, in the central and E. parts generally heavy, varying in quality, being here and there stiff and difficult to manage, but mostly light, and innumerable on a sandy clay. Here also extensive marshes occur, some of which are peculiarly favorable for the growth of corn; but their liability

to legislation has induced the inhabitants to prefer the dairy system, and in consequence large quantities of butter are made and exported under the name of "Cambridge." The quantity of upland meadow and pasturage has been estimated at nearly 197,000 ac., and that of marsh land at upwards of 65,000 ac. The crop raised in greatest perfection in Norfolk is barley, which, indeed, may be considered as the most important portion of the agricultural produce. Most of it is made into malt, and then shipped. Vast numbers of turkeys are reared, pheasants, partridges, and rabbits abound. The manufacture, except for home consumption, consists chiefly of woven goods, which, in a variety of branches, still constitute the staple trade. Norfolk has extensive fisheries of both herrings and mackerel; the former, however, being by far the most important. It returns 12 members to Parliament, namely four for the county, two for the city of Norwich, and two each for the boroughs of King's Lynn, Thetford, and Yarmouth. Pop. (1851), 442,714.

NORFOLK, a tn. and port, U States, Virginia, on bank Elizabeth, just below the confluence of its two branches 3 m below its entrance into Hampton roads, and 32 m from the ocean lat. 36° 55' N. lon. 76° 8' W. It lies low, has irregular and crooked streets, a courthouse, jail, market-house, theatre, academy, orphan asylum, infirmary, with a respectable library, and, in the vicinity a marine hospital and a navy-yard, with a dry-dock, constructed of hewn granite, and eight churches. The harbour is safe and commodious, having 18 ft water and its entrance which is fully 1 m wide, is defended by forts Monroe and Calhoun. It has a greater foreign commerce than any other place in the state. The Dismal Swamp canal, which connects Chesapeake Bay with Albemarle's Sound, opens an extensive water communication between Norfolk and the S. P. (1850) 14,390.

NORFOLK BAY a spacious bay Van Diemen's Land, Tasmania's Peninsula, off Storm Bay, about 8 m long, N. to S., and 3 m to 5 m broad E. to W. It was first entered by the French navigator D'Entrecasteaux.

NORFOLK ISLAND, N. Pacific lat. 28° 58' S. lon. 167° 46' E. It is about 400 m N.W. New Zealand about 6 m long N. to S.E., and nearly 4 m in breadth circumference, 15 m. It is a beautiful and valuable island, but is difficult of approach, on account of the heavy sea which constantly beats on its rocky shores, it is also without a harbor or roadstead. The climate is generally delightful and salubrious, being of a medium temperature but brightening S.E. winds sometimes prevail which are injurious to vegetation. The soil is extremely fertile, and the whole surface of the island covered with a luxuriant verdure. Trees and plants abound, but the pine is the most numerous. Some of the best species (*Arctostaphylos*) attain a height of 225 ft. and are 18 ft to 20 ft. in circumference. Wheat and maize are produced in great abundance. The also grows in great quantity spontaneously in many parts of the island. Birds of various kinds are numerous, including pigeons, parrots, rails, and a variety of small birds. Norfolk Island was discovered by Captain Cook in 1774, when it was uninhabited. In 1789 a British settlement was formed here from Sydney, but was subsequently abandoned. It has since been made a penal settlement for the worst description of convicts.

NORRE, Norwegian river, in Norway (see see); **NORHAM** or **NORHAMPTON** par. Eng. Northamptonshire, 18,849 ac. Pop. 4289.

NORIC ALPS See Alps vol. L, p. 102. **NORMAN**, or **NORMAN'S ISLAND** one of the Virgin Isles, W. Indies, N.E. St. John, 2 m. long and under 1 m broad lat. 18° 19' N. lon. 64° 39' W. (n.) Its shores are irregular and much indented with coves on its W. side it is Man-of-War Bay, where vessels may ride in 18 to 8 fathoms. **NORMAN ISLES**, a name given to the Channel Islands (which see).

NORMANBY three par. Eng.—1, Lincoln, 1420 ac. Pop. 514.—2, York (N. Riding) 2568 ac. Pop. 198—3 (On-the-Wolds) Lincoln 1966 ac. Pop. 149.

NORMANDY [Latin *Neustria* or *Normannia*] an ancient prov. France, which was divided into Upper and Lower Normandy, and was bounded, N. and W. by the English Channel, E. by Maine and Brittany and E. by Flanders and the Isle of France; greatest length, about 150 m; breadth, 75 m.; area, 10,684 sq. m. On the decline of the Roman

empire, it was seized by the Franks and afterwards, in the 9th century, wrested from them by the Normans, from whom it has derived its name. When William the Conqueror mounted the English throne, it was incorporated with, and long continued to form an important part of the English monarchy. It became finally united to France under Charles VII. in 1455; and now forms dep. Seine Inférieure, Eure, Calvados, Manche, and also dep. Orne, with the exception of several Mortgages.

NORMANTON five par. Eng.—1, Derby 1882 ac. Pop. 985.—2, Lincoln, 1540 ac. Pop. 179.—3, Rutland 2440 ac. Pop. 65.—4, (Upper-Southern) Notts 1800 ac. Pop. 989.—5, (Upper-Trent) Notts 1110 ac. Pop. 160.

NORMANTON a vil. and par. England, on York, at the junction of the Manchester and Leeds with the Midland railway 5 m. N.E. Wakefield. It has a neat church with a tower and since the opening of the railways has acquired much additional importance more especially by the erection of a magnificent hotel, to accommodate the numerous passengers by the York, Sheffield Manchester and Leeds trains. Area of par. 2974 ac. Pop. 1384.

NORMANTON (Socorro) a vil. and par. England on Derby 2 m. N.E. Alfreton with an ancient church, Priory, and Wesleyan Methodist chapel, two schools, collieries, and manufactures of hosiery. Jedediah Strutt, who invented the machine for making ribbed stockings, was born here. Area of par. 1780 ac. Pop. 1340.

ROHN a market tn. Russia, gov. and circle Jaroslavl on the Volga with numerous forges, and manufactures of sails, and other articles in iron, which are sent to Moscow and St. Petersburg. Pop. 1500.

NORRIDGEWOLK a tn. U States, Maine, on both sides of the Kennebec, here crossed by a handsome bridge 32 m. N. Augusta with a church, courthouse, jail, academy, two tanneries and a considerable trade. P. 1855.

NORRISBOWN, a tn. U States, Pennsylvania, on the Schuylkill here crossed by a bridge, 800 ft. long 38 m. E.S.E. Harrisburg. It has spacious well-formed streets, a Gothic Episcopal, and a Presbyterian church, an assembly of literary society, with a cabinet of natural history, three cotton, and four, tannery, two mills, and a trade in lumber. P. 2987.

NORRÖPPING, a tn. Sweden, Jan. and 34 m. N. Linköping, at the mouth of the Motala Elf in the Bravik, a gulf of the Baltic. The environs are beautiful and the site of the town is one of the finest in the kingdom. The Motala Elf flows through the town, making several falls within it, and forming two islands and is crossed by a foot and three other bridges, two of which are handsome, more especially one constructed of iron. It is well and regularly built, has spacious and well paved streets, and presents a cheerful and substantial appearance. It contains three churches, a synagogue, town-hall, and hospital, and has important manufactures of linen, hosiery, starch, lacquerware, soap, and tobacco oil paper and other mills sugar-refineries, and building-wards, at which a number of handsome steamers have been fitted out, a considerable trade in the above articles of manufacture, and a valuable salmon fishery in the river. Pop. 10,148.

NORRLAND a bell Norway. See **NORLAND**. **NORRKA FIKLEV**, or **NORRKAVAL RAGGE**, a name sometimes employed by geographers to the mountain mass which commencing near the Dovre Field mountains, occupies more than three-fourths of the S. part of Norway. It thus includes the ranges known by the names of Langfjell, Bogensdell, Fillefjell, Bygdafjell, and Yokesfjell. Its loftiest summits are in the N. where Rissa River is 7000 ft. The average height does not exceed 4500 ft. or perhaps 5000 ft.

NORRTHOLM, a support tn. Sweden, lat. and 37 m. N.E. Stockholm, on the Telle Sound, and having on its W. side the Lake of Lommar. It has manufactures of woollen and linen cloth, and firearms, a fishery and some land traffic. P. 1000.

NORT, a tn. France, dep. Loire Inférieure, on bank Erice, 16 m. N.E. Nantes, with manufactures of leather, and a small harbour, which is the great entrepot for the wood and charcoal used at Nantes, the iron of Moleston and Bléville, and coal from the mines of Languin. Pop. 1665.

NORTE (Para das) a tn. U States, New Mexico, on bank Rio-Grande-del-Norte, 3800 ft. above sea-level, 275 m. S. by 2. Santa Fe. It stands at the head of a valley, and can

side of a long line of *salix* houses, with plots of garden and vineyard. The settlement is the oldest in New Mexico, and is fertile, producing abundance of wheat, maize, and other grain, and is particularly adapted for the vine, which is extensively cultivated, and yields a wine of excellent flavor. Wool also forms an important article of trade. Population about 5000, chiefly Indians.

NORTH *See* *para* Eng. —1 (*Chapel*) Essex 3864 ac. Pop. 864.—2, (*Rail or Ousehale*) Suffolk; 1553 ac. Pop. 195.—3, (*Wend-Sussex*) Essex; 8577 ac. Pop. 842.—4, (*Wootton*) Dorset. 618 ac. Pop. 76.

NORTH BERWICK, a burgh, seaport, and par., Scot. *See* **BRANK** (North).

NORTH CAPE, a celebrated promontory, forming the most N. point of Europe, and situated on the N. of the island of Magdalen, which is separated from the mainland by a narrow channel lat. 71° 10' 15" N lon 35° 48' E. It consists of a long row of grassy rocks jutting out into the sea, and terminating above partly in pyramidal peaks and partly in a kind of table-land, at the height of about 1900 ft. It is about three-fourths of a mile across and consists of granite quartz, and other primary rocks. The quartz, in particular lies scattered about in all directions, and wherever there is a flat spot, reflects its dazzling whiteness but the face of the precipitous exposed to the dashing of the storm are of a dark

THE NORTH CAPE.—From *Voyage de Circumnavigation Scientifique du Nord*.

colour according better with the general whiteness of the snow. On the W and N side, the rocks of the cape are so precipitous that no boat can land, but on the E. side, a small bay hollowed out of the bosom of the rock, gives easy access to the shore. Here, amid the surrounding sterility, marks of vegetation suddenly appear, and the forget-me-not, wild pansy, anemone, angelica, and several other plants, are seen blooming.

NORTH FOLDE, a fard, Norway of N W coast Nordland, opening from the West Fjord. Its mouth is about 13 m. wide, and a little beyond it divides into two large branches, called respectively the N and the S. Folds. The former, communicating by some small passages with the Holm-fjord, includes a large tract of Nordland.

NORTH SEA or **GERMAN OCEAN** [anc. *Mare Germanicum*]. German, *Nord See* or *Deutsches Meer*, Dutch, *Nord Zee*, a large branch of the Atlantic Ocean, lying between Great Britain and the continent of Europe, having the former, and Orkney and Shetland Islands, W. Denmark, and part of Norway E. Skagerrak, part of Friesland, Belgium, Holland, and Hanover S.; and Northern Ocean, N. lat. 51° to 61° N lon. 2° 30' W to 2° 30' E. Extreme length, from the Strait of Dover to Uus, the most N. of the Shetland Isles, about 700 m., greatest breadth, between the coast of Haddingburgh, Scotland, and the W. coast of Denmark about 420 m. The shores of all the countries that surround the North Sea are deeply indented with bays, firths, inlets, and large estuaries, but its most remarkable arm is the Skagerrak, between Denmark and Norway,

which communicates, through the Kattegat, with the Baltic Sea. The North Sea is deepest on the Norwegian side, where the soundings give 100 fathoms; but the mean depth of the whole basin may be stated at no more than 81 fathoms. The bed of this sea is traversed by several enormous banks one of which, occupying a central position, trends from the Firth of Forth, Scotland, in a N.E. direction, to a distance of 110 m., others run from Denmark and inland up to a distance of 100 m. to the N.W.; while the greatest of all, the Dogger Bank, occupies the centre of the sea, from lat. 54° 10' to 57° 34' N., and lon. 1° to 6° 7' E. The great oceanic tidal wave, which originates in the Atlantic, after having swept the W. coasts of Great Britain and Ireland, enters the N. extremity of the North Sea, giving high water nearly simultaneously to the opposite shores of Scotland and Norway. Pursuing its course along the coasts of the former and of England, on which it strikes very directly and with great force, it raises the tides as far S. as the Thames, making the low of Great Britain in 18 hours. It determines also the tides of Belgium, from Ostend to Dunkirk, and does not cease to affect, though it does not raise, the tides of the Continent through the Channel. On entering the North Sea, on the N. of Scotland, the tidal wave does not exceed 12 ft., but gradually increases to 14, 16, 18, and on the Humber to 20 ft. a difference of height depending on the figure of the shore, the form of the bottom, and the direction of incidence of the wave.

The fisheries in this sea are extensive, as well on the Dogger Bank celebrated for its cod fishery as on all the shores that bound it, they are still greater at its N. extremity, in the direction of the Orkney and Shetland Isles.—(Johnston's *Physical Atlas* Lyell's *Geology*, Mrs. Somerville's *Physical Geography*, &c.)

NORTHALLERTON a bor., market tn. and par., England co. York, cap. N. Riding 82 m. N.N.E. York, on the railway to Newcastle. It consists of one long and spacious street, with a few smaller back ones, kept in pretty good order, and has a seminary-house, *conventual* prison, constructed on the plan of Howard regulator's office, a plain cruciform church, places of worship for Baptists, Independents, Wesleyans, Primitive Methodists, and Society of Friends two schools several charities, including an hospital called the *Mason Disp.* founded in 1478. The inhabitants are chiefly engaged in agriculture, and some tanning and tanning are carried on though to a less extent than formerly. The borough sends a member to Parliament constituency (1831) 281 Arms of par., 18 650 ac. Pop. 5338 Pop. bor. 4996

NORTHAM par. Eng. Devon 4190 ac. Pop. 5680

NORTHAMPTON or **NORTHAMPTONSHIRE**, an island co. England, bounded, N and N.W. by the Lincoln, Rutland, and Leicestershire, W. Warwick, and Oxford, and S. by the E. Oxford, Bucks, Bedford, Hertford, and Cambridge. Area, 550 880 ac., of which about 195,000 are under crop 80,000 fallow and 415,000 grass land and meadow. The general aspect of the county is pleasing, being finely diversified by waving hills, gentle slopes, and beautiful valleys, copiously watered by numerous streams and rivulets. The highest eminences are in the S.W. part of the county, on the borders of Warwick, but here the most elevated summit is only about 800 ft. The E. border is occupied by the Oxford gray the rest of the county chiefly by the uppermost formations of the lowest division of coal. Fine beds of the finest marble lime, and brick clay occur in various places. The soil is various, but mostly rich and fertile, consisting principally of various descriptions of loam. The pastures are excellent, and the cattle grazed on them in summer yield a profitable return. The principal crop is wheat, barley, and oats, the first in largest proportion. Beans and turnips are also extensively cultivated, and hemp is grown to some extent in the E. district, on the borders of Leicestershire and Cambridgeshire. The rearing of sheep is a principal object with the Northamptonshire farmers, 100,000 sheep and lambs being usually sent to London, and 15,000 head

of the cattle. Woodlands, principally the remains of ancient forests, are very extensive in this county. The chief articles of manufacture are shoes, horse lace, and woollen stuffs. Of sheep, about 7000 or 8000 pairs are made weekly, mostly for the army and navy. Northamptonshire returns eight members to Parliament—four for the county, two for the city of Peterborough, and two for Northampton. P (1851) 817,860.

NORTHAMPTON a pari municipal bor and in Eng-land, cap. above co., 60 m. N.W. London, on a slope, rising from a bank near, here crossed by two stone bridges, on a branch canal, connecting the River with the Grand Junction and on the Peterborough branch of the London and North-Western railway. It is built of a reddish stone, obtained in the vicinity; and consists of four principal streets, meeting in a large open market-place, one of the finest in England and of a number of minor streets, of very irregular formation. In the immediate vicinity is the Victoria promenade, about 1 m. long, with an avenue of lime-trees. The environs, covered with woods and meadows, and studded with villas, present a very cheerful and attractive appearance. The town is of very ancient date; and immediately after the Norman conquest was surrounded by massive walls, with four gates, and defended by a castle. The walls and gates have altogether disappeared, and of the castle, which possessed considerable historical interest, only a few vestiges remain.

The ecclesiastical edifices include eight churches, and numerous Dissenting chapels, of which the Baptists have five, the Independents three the Wesleyan Methodists three, and the Friends Primitive Methodists, R. Catholics, and Unitarians, one each. The churches are All Saints, rebuilt in 1880 after the designs of Sir Christopher Wren, forming a large and handsome, though somewhat incongruous structure, with a porch of 12 lofty Ionic pillars, supporting a cornice and entablature in the centre of which a statue of Charles II. has been placed a central spire, and an ancient embattled tower which escaped when the original building was burned down. St. Katharine's, a neat edifice, in the Gothic style, St. Peter's, built about the same time as the castle, recently restored, and admired as one of the purest and most beautiful specimens of decorated Norman; St. Giles, with a fine Norman porch St. Stephen's, supposed to have been built by the Templars, on the site of the Church of the Holy Sepulchre at Jerusalem, and consisting of a cruciform body with a central spire resting on eight round Norman columns, St. Andrew's, St. Edmund's, and the South Quarter or Ragged School church. Among the Dissenting chapels, that of the Independents on Castle Hill deserves notice, as having been, for 20 years, the scene of the labours of the celebrated Dr. Doddridge, who also presided over a theological seminary in the town, and that of the R. Catholics, though small, is remarkable for the sanctness and purity of its early English style, and the beauty of its stained glass. The other more important buildings are the townhall, the shire or county hall, the county and borough jails, corn exchange, barracks, infirmary, theatre, &c. The principal literary and educational institutions are the free grammar, blue-coat, green, national, British, infant, and other schools; the mechanics institute, which possesses a library of 10,000 vols., the religious and useful knowledge society with a library of 4000 vols. an Athenaeum, an archaeological and an architectural society. The benevolent institutions include, in addition to the infirmary a general and insane asylum, the Royal Victoria dispensary, St. John's, and Thomas-Besant hospitals, &c.

The staple manufacture is boots and shoes, which are made very extensively for the supply of the army, and of the London and other markets, and also for export. The number of hands employed is about 8000 nearly one-third of the whole inhabitants. The tanning of leather is also carried on on a large scale. Hoosery and lace, once important branches of industry, have greatly declined—the lace especially, since machinery was introduced. The only other important industrial establishments are iron and brass foundries, breweries, and paper and corn mills. The races held on a race-course N. of the town, attract great numbers of visitors. Besides two weekly markets, there are eleven annual fairs.

Northampton existed from a very early period, and in the time of Edward the Elder was in possession of the Danes, who made it their headquarters in 921, and, after being expelled, returned, and burned it down in 1010. It had been

rebuilt, and was becoming prosperous, when it was again nearly destroyed by the Northumbrian insurgents in 1066. Immediately after the Norman conquest it was destroyed, as part of the action of Northampton, on Simon de St. Liz, who built his castle and its walls, and, by other improvements, contributed greatly to its progress. In 1286, owing to quarrels between the professors of Oxford and their students, an attempt to make Northampton the seat of a civil university obtained the sanction of the king, but was ultimately abandoned. Several synods and parliaments were afterwards held in it. In one of the latter a treaty was made, by which Edward II. formally renounced his pretensions to the sovereignty of Scotland. The other most remarkable events in the history are the battle between the Romans in 1460 in which Henry VI. was taken prisoner, a destructive flood in 1668, and a still more destructive fire in 1678, causing a damage estimated at £150,000. The borough, originally constituted by prescription, is governed by a mayor, five aldermen, and sixteen councillors, and sends two members to Parliament. Constituency (1852) 1850 Pop. bor. 26,657.

NORTHUMBERLAND a S. maritime co. England, bounded S. and E. W. by co. Durham and Cumberland, E. by the North Sea, and N. and N.W. by Scotland, and a detached portion of Durham. Area, 1,251,990 ac. of which about 800,000 ac. are arable meadow and pasture. In some places it is rugged and mountainous, and in others, particularly along the coast, it is level. The highest hills are on the W. border towards Scotland commonly called the Cheviot hills; clothed in a beautiful green verdure, admirably suited for pasture lands, as which they are extensively used for feeding the well-known excellent breed of sheep to which they

part, of bold precipitous cliffs; and is remarkable, both for the innumerable islands by which it is lined, and the bays or fjords, which cut deeply into it in all directions, but far most frequently from W to E., in the direction in which the great ocean-wave is dashed upon it. The number of islands makes the navigation dangerous; but that of the fjords gives it unusual facilities—not only making it easy to penetrate into the interior, but also furnishing an almost interminable series of excellent natural harbors of refuge.

The surface is very mountainous, particularly in the W and N where the summits are often lofty and rise very abruptly from the surrounding levels but even there mountain chains, properly so called have no existence, and the true character of the surface is that of a series of elevated plateaux, from which mountain masses rise with the greatest irregularity and so isolated from each other, that it is impossible to point out any central axis of which the other mountains in their vicinity can be considered as ramifications. The plateaux referred to seem to admit of being reduced to six.—1. The plateau of Finnmark. Its most elevated summits are situated in the vicinity of the lake of Tornetræsk, near the gulf of Lyngen and Quvernangen. 2. The plateau of Nordland and Trondhjem, extending to the Gulf of Trondhjem and Lake Storsjön. Its loftiest summits are in the vicinity of the very mountain of Balakma, the top of which is 6342 ft. Though not one of the loftiest, yet one of the most remarkable-looking mountains in this plateau is that of Kilhorn, shooting up in a pyramidal form, with a bare, jagged, and sharp peak at about three-fourths of its height occurs a large

extremity of the island of Brønnøysund which lies at the entrance to Vaage Fjord, in lat. $61^{\circ} 45' N$ 5 . The plateau of

MOUNTAIN OF THE HORDKILLEN, NORWAY

Fillefjeld, situated between the Sogne Fjord the valley of Valdres, the fjords of Rand Tyri and Chræmne, the Skager Rack, and the German Ocean. This plateau is much less elevated than the others already mentioned the whole country gradually sloping from the N where it is highest, towards the E. and S E., and ultimately subsiding so much as often to assume the appearance of moderately elevated plains. Its loftiest summits—the Skoghorn Haglofving and Goussa—are all about 6000 ft. and several others exceed 5000 ft. but the average height is very much lower. This which may be called the E plateau, lying still more in the direction of the general slope, is the lowest of all, and is continued into Sweden, where its direction may be traced by the chain of lakes which stretch across that country, and by several wide valleys with so little declivity as to make the streams which water them comparatively sluggish. In general however the face of the country is rugged, the valleys are short and abrupt, and the streams, dashing down impetuously through rocky gorges, form numerous cascades while the fjords, overhung by lofty precipices or towering forests, and the deep and extensive lakes, embosomed among the mountains furnish alpine scenes of the wildest magnificence.

The short distance at which the W slope of the above plateau lies from the W coast, leaves little room for the development of large rivers, but gives rise to an immense number of minor streams, which proceed directly to the shore, or the numerous fiords which penetrate in. On the E slope, again, the rivers do little more than commence their course in Norway and do not properly assume the character of rivers till they have run a considerable part of their course in Sweden. To this it is owing that Norway cannot elude any large river as exclusively her own, and that the few of them which are of importance have a S. direction, in accordance with the general slope already referred to, and discharge themselves into the Skager Rack; of these, the most deserving of notice are the Glommen, and its affluent the Lofoten; the Røss, Leiven, Skien-Elv, and Tvedestrand. The most important rivers in the N are the Tanen, which forms part of the boundary between Russia and Norway and falls into the Arctic Ocean; and the Kamen, which falls into the Atlantic. The same causes which prevent Norway from having large rivers

perforation, producing a very extraordinary effect when the sun is seen streaming through it. 3. The Dovre Field plateau, with its lofty peaks of Snæhesten (8115 ft.), Skramkollen, Storkollen, and Nussfeldt, the lowest of which is nearly 7000 ft. 4. The plateau of Langfeldt, from which the loftiest summits of Norway rise, and truncated the limits of perpetual snow. Among these summits are the Skagastind (8590 ft.), generally considered the loftiest in the country but, according to Dr. La Roquette, considerably exceeded by the Galdhøpiggen, in the parish of Lom, Galdhøpiggen, to which he assigns the height of 9685 metres about 9785 ft.). The mountain of Hemsedal, 3705 ft. high, in N Bergenhus, in this plateau, a various isolated mass, is quite characteristic of many of the peaks to be seen in Norway; it forms the E.

are favorable to the formation of lakes the isolated bases of the mountains forming numerous and extensive reservoirs, in which the waters are, in the first instance accumulated; accordingly they are scattered over every part of the country. A complete enumeration, even of those whose magnitude might entitle them to notice, is impossible, and it is only therefore, suffice to mention the Rye Fjord, Smaasen Fjord, and Mjøsene Fjord.

The prevailing rocks of Norway are gneiss and mica-schist, of which the latter constitutes the mass. Gneiss is of comparatively rare occurrence. On some of the plateaus, blocks of conglomerate occupy a large part of the surface. Porphyry, argillaceous schist, and limestone occur but in very limited quantities and rocks of volcanic formation are so rare that their existence was at one time altogether denied. It would seem, however, that trap, apparently formed out of ancient lava, does occur, and some geologists have even thought that they have discovered visible traces of volcanoes.

That the climate of Norway must, on the whole, be severe, seems necessarily to follow, both from its high latitude and the elevation of its mountains. Nearly one-third of the whole country is situated within the frozen zone, and one-third, again within the region of perpetual snow. Various causes, however, contribute to modify the temperature, and make it milder than might have been anticipated in the circumstances. One of these is the great extent of sea-coast, and the large extent of surface occupied by water, and more especially by the fjords which are in immediate communication with the ocean, the temperature of which naturally higher than that of the land during the season of winter is further increased by the gulf stream, the influence of which is sensibly felt on the W coast. Then, in consequence, the harbours are never blocked up with ice while in places more inland, though much farther S. as at Christiania, this regularly happens. The following Table gives the mean temperature at several places in Norway, in different latitudes, for the year, for the winter and for the summer—

	North Lat.	Year	Winter.	Summer.
København	59°	50°	32°	61°
Stockholm	59° 30'	50°	32°	61°
Oslo	59° 45'	50°	32°	61°
Christiania	59° 55'	50°	32°	61°

The large portion of the country situated within the limits of perpetual snow, and the sterile and rugged nature of a still larger portion, greatly limits the range of vegetation and of regular culture. In general, however, the mountain slopes up to a certain height, are clothed with magnificent pine forests, and at lower elevations, the oak and the birch are by no means uncommon. Where, from the combined causes of a high latitude and great elevation the ordinary pasture grasses become scanty meadows supply their place, and furnish a valuable source of subsistence, and even of wealth, in the numerous herds of reindeer which they maintain. Among the crops cultivated for food, the first place is due to barley which ripens at 70° of latitude, rye is successfully cultivated up to 60°, oats to 68°, but wheat not beyond 64°, and that only in the most favorable seasons. Another most valuable crop is potatoes, grown with success even in Finnmark. Flax and fax, particularly the latter are generally cultivated, and in the S. part of the country, some tobacco is grown. Fruit, too—particularly the apple, pear, and cherry—is raised generally in all the lower localities of the S. and the centre. The quantity of land capable of being brought under culture has been roughly estimated at one-sixth of the whole yet, in 1845 according to the evidence of official documents, the actual cultivation did not exceed 1/10th of the whole. Most of the land thus cultivated is of a light, sandy nature, which even under good management, could not yield heavy crops, and under the cultivated routes which the Norwegians generally pursue, often fails to return much more than the seed. The grain raised accordingly, falls very far short of the consumption; and the quantity which requires to be regularly imported has nearly doubled since 1799. One of the most extensive and profitable branches of rural economy is the raising of cattle, for which many parts of the country are well adapted. The breeds, however, have not undergone much improvement, and are, consequently very inferior. The milk of the cows is said to be very rich, and enters largely into the food of

the inhabitants, but the produce must be deficient, as both butter and cheese, as well as beef, form large and increasing articles of import. Sheep are less numerous than goats, and yield a coarse, though abundant and warm wool, which appears not to be valued with much favor. The horses are vigorous and sure-footed, but of a diminutive size, the ponies, in which large size is of less consequence, or is rather considered a drawback, are among the best of their kind, and are often exported to other countries. Another domestic animal of great value is the reindeer, which forms the principal stock of the N. provinces. The whole number in the country, in 1845 was 90,378; of which Finnmark possessed 74,469. This, however, must necessarily be understood only of those domesticated, many still exist in a wild state, whose numbers, of course, cannot be known. Among other wild animals are the wolf and bear which exist in such numbers as often to cause great destruction among the flocks, deer once abundant, have become comparatively rare game of the smaller kinds, exist in great variety, and include vast numbers of water-fowl among birds of prey, the eagle occupies the first place.

The fisheries of Norway are of very great value. Whales still occasionally appear, but are too few to be of much commercial importance. A far more valuable source of revenue is furnished by the cod and herring, which frequent the coast in vast numbers, and have been estimated to yield a gross amount of nearly £1,000,000 sterling. The cod fishery is carried on chiefly in the N. the herring fishery from the point of Skag, lat. 68° 10' N., and all along the coast to the S. The rivers and lakes abound with salmon and salmon trout, and make Norway one of the best angling countries in the world.

The minerals are both numerous and abundant, and where the means of transport exist can generally be worked to great advantage, both from the facilities which the nature of the ground affords for draining mines, without expensive engines, and the inexhaustible supplies of fuel furnished by the forests, the very refuse of which, after the kind similar has been carried away thus forms at times of no small value. The most important metals are iron, copper, silver, and cobalt; all of which are worked to a limited extent. The only other minerals worthy of notice are chrome, alum, and marble.

Manufactures have made very little progress. Cotton, woolen, flax, and silk tissues, are made to some extent, but only for home use and without any idea of competing with the cheaper and better products of manufacturing nations. Distilleries, brew houses, saw and flour mills, are numerous, and there are several large tobacco factories and sugar-refineries. The export trade is necessarily confined to raw produce, either in its original state, or with such slight preparation as may be necessary to fit it for the market. The principal items are fish, smoked and dry, timber, whale and seal oil, metals, skins of wild animals, furs, &c. The chief imports are grain, butter, beef, various kinds of wool, cotton, flax, and silk; raw wool, hemp and flax, salt, sugar, tobacco, wine, brandy, and vinegar. This trade is chiefly concentrated in the towns of Bergen, Christiania, and Trondheim, though Drammen, Christiansund, and Arendal, likewise have a considerable share, and employed in 1845, in addition to foreign shipping, about 3790 Norwegian vessels of all sizes, carrying about 100,000 tons. The number of vessels in 1816 was only 1640 and the increase has ever since continued without interruption, until in 1864 the number of Norwegian merchant vessels had risen to 5878 of 884,910 tons. Besides the shipping trade, an internal trade of great importance is carried on with Sweden. The following Table gives the number and tonnage of vessels which entered and cleared at ports in Norway in each of the following years

Years.	NORWAY.		SWEDEN.	
	Vessels.	Tons.	Vessels.	Tons.
1847	6,990	804,982	6,699	805,099
1848	7,744	1,045,499	7,747	1,045,499
1849	7,900	1,175,000	8,000	1,175,000
1850	12,094	1,162,378	11,000	1,137,200
1851	12,963	1,205,990	11,190	1,190,600

Norway being only a portion of the Swedish monarchy, the commerce, army, and navy, do not require to be separately con-

altered; but as it still retains the name, and many of the qualities of an independent kingdom, just as Scotland does in the British Empire, it will be necessary to attend to its peculiar form of constitution. This, in all its leading features, was fixed at Eidsvold, May 17, 1814, and subsequently, on the union of the two crowns, was adopted, with some necessary modifications, in an extraordinary diet or *storting*, held on the evening 7th November at Christiania. By this constitution, Norway is a limited hereditary monarchy united with Sweden as a free, independent, indivisible kingdom under one common male sovereign of the Lutheran, or as it called, Evangelical Lutheran religion, declared to be the religion of the state. The king possesses the usual executive powers. His person is sacred and he is responsible only through his ministry; but as he resides in Sweden during the greater part of the year, though bound to a periodical residence in Norway, he can place at the head of the government a viceroys and stateholder, one or both subject to the somewhat unusual regulation, that they must be foreigners. The ministry is composed of seven councillors, each at the head of a separate department; and of a president or minister of state. The latter, together with two councillors who are annually changed reside with the king in Sweden the remaining five, with the viceroys or stateholder, reside in Norway.

On a new session the sovereign must be crowned king of Norway at Trondheim. The legislative assembly, or, as it is called, *Storting* (from *stor* [great], and *ting* [court]), is elected by the citizens possessing a certain qualification, and exists for three years, when a new election must take place. It subdivides itself into two chambers—one, consisting of one-fourth of the members, and called the *Lagthing*, and the other, of the remaining three-fourths and called the *Odelsting*. These chambers meet separately, and each nominates its own president and secretary. Every bill must originate in the *Storting*, but may be proposed either by the members or by the government. When carried in that court, it is sent to the *lagthing*, and thence to the king, whose assent makes it a law. If the *lagthing* disapproves of the bill, they must return it, with their reasons of disapproval, to the *odelsting*. If carried there again with or without modification, it comes as before, to the *lagthing*. If the *lagthing* rejects the measure a second time, the whole *storting* meet in one chamber, and the final adoption or rejection is determined by a majority of two-thirds. The veto of the king is subject to a very important limitation, for it becomes ineffectual against any measure which has been adopted without modification by three successive *stortings* or parliaments.

The Lutheran is as already observed, the religion of the state, and is professed by the great body of the people. Unhappily the principles of religious toleration are not well understood, and though no express law prohibited other religious bodies from meeting for public worship, the popular feeling was so decidedly opposed to it, that a law permitting them so to meet, and form regular congregations under their own pastors, was passed for the first time in 1845. Even yet government offices are open only to members of the Established church. The country is divided into five bishoprics (dioceses), corresponding, in name and extent, with the administrative provinces, and into 318 parishes. With exception of the cathedral of Trondheim, founded a. d. 1180 or 1183, and a few other churches which are stone edifices, the churches in Norway are generally built of wood. Many of them are very ancient structures, dating as far back as the 11th and 12th centuries, evidencing a wonderful degree of durability in the Norwegian pine, of which they are constructed. Generally built in the form of a cross, with a tower in the centre terminating in a cupola or spire, with high-pitched roofs, often covered with cone-shaped shingles, and of large proportions, the general effect is massive in a degree which one would not expect from the material employed. (—Forester.) That of Rikerdal in Telemarken is one of the finest specimens of timber-building in the country. Education is very generally diffused, and is conducted on a national system, according to which gratuitous instruction, of an excellent kind, is placed within the reach of all capable of receiving it; and all children, of seven years of age, in towns, and eight years in the country, are required to be in attendance at school till confirmation, which usually

Vol. II.

takes place between the ages of 14 and 17. The schools, designated by the name of *common school*, or *people's schools*, are scattered in all towns and parishes. In towns, the instruction is not only elementary, but, in certain degrees, varying

NATIONAL CHURCH, NORWAY
From A. Smith's Sketches in Norway and Sweden

according to circumstances superior also. In the country, the instruction is only elementary, but in the schools themselves, an important distinction is made, some being what is called *fast skoler*, or *stationary schools*, and others *engangs skoler* or *ambulatory schools*. The latter, as their name implies, which about at certain periods of the year from place to place, in the more thinly peopled and isolated districts, and thus have the effect of bringing education to those who but for this wise and benevolent arrangement, would be doomed to live without it. Towns possess, in addition to these people's schools, what are called middle schools, middle and royal schools, brazier schools, Latin or learned schools, in all of which superior instruction is given. There are also four cathedral schools, one each in the towns of Christiania, Bergen, Trondheim, and Christianand. At the head of all the educational establishments is the university of Christiania, at which complete courses of lectures are delivered, to qualify for the different learned professions and the higher grades of official employment. The complete machinery thus established has produced the happiest results and Norway ranks high among educated nations.

The population of Norway amounting to 1,539,271 is divided as follows—Norwegians Proper or Normans, 1,309,562; Finns or Lapons, 14,404 and Quays, 4425. The Norwegians Proper are generally tall and vigorous, and distinguished by the lightness of their hair particularly in childhood. They show a strong passion for a sea-life, and make excellent sailors; in this respect proving themselves the descendants of those who, under their sea-kings, equipped powerful fleets, and spread the terror of their name over all the shores of N. Europe. Their most marked national virtues are, respect for the laws, love of liberty and respect for religion, unalloyed by degrading superstition. The Finns or Lapons dwell in Nordland, and more especially in Finmark, and bear little resemblance to the Norwegians Proper (see LAPLAND). Quays, though dwelling in the same localities with the Finns, are very easily distinguished from them both by physical features and habits, being generally tall and well-proportioned, and remarkable for their cleanliness. A vice, common to all these classes, is an excessive fondness for ardent spirits. The Norwegian language, which has sometimes been represented as nearly

66

a Danish dialect, justly taken for itself a more venerable origin and is radically identical with the Icelandic, which still bears so much affinity with it, that, in some districts of Norway the inhabitants have no difficulty in reading and understanding Icelandic books. In other districts, where Danish or Swedish influence has prevailed, the language has become so deteriorated as almost to lose its original character. No works of very high reputation have appeared in it, unless it be allowed to claim the writers of Iceland, which having been originally settled from Norway, must also have derived its language from it.

The early history of the Norwegians is enveloped in fable; but many circumstances, strengthened by tradition of language, occur in proving that they came from Asia. The historic period commences with the reign of Harald, Harter, or Hastinger, who died in 933, and was succeeded by his son, Eirik, surnamed Blåtann (Bloody Aase), because of his cruelties to his own brothers, and his losses in wars. He was ultimately driven from the throne; and, having found no asylum with Athelstan of England, died in possession of the seat of Northumbria. His throne was seized by his brother, Hako I., who was brought up in England with Athelstan, and had embraced Christianity. He governed wisely, and, for the most part, successfully, settling many valuable laws, and, though he failed in a direct attempt to make his subjects renounce paganism, considerably paved the way for his final overthrow. The first distinguished name which occurs among his successors, is that of Magnus I., surnamed Den Gode (the Good), the son of St. Olaf and Alfhild an English lady of distinguished birth. He was called to the throne, by election, in 1066 and having, in 1042, succeeded also to the throne of Denmark, united both under one monarchy. He possessed great talents, military and civil; studied the interests of his subjects, and died, universally regretted, of a wound which he had received in hunting. The crowns of Norway and Denmark now passed to different individuals but so close a connection was maintained between them that their history often becomes blended. Harald III., the successor of Magnus, is known, in English history, as the leader of the expedition which landed on the coast, and, after pillaging the town of York, was defeated by Harold, son of Godwin, shortly before his own more signal defeat at Hastings. Norway had now embraced Christianity and with it many of the abuses which the Papacy had introduced, and, accordingly in several of the subsequent reigns, we find the clergy playing a conspicuous part, and not infrequently taking the lead in intestine dissensions. In the 13th century, the Norwegians had earned the terror of their arms to distant lands and islands and swayed the sceptre not over Norway merely but over many parts of the coasts of Britain and the adjacent islands, more especially the Orkneys, on the N., and the Hebrides, on the NW of Scotland. They not only paid frequent visits to the E. shores, but sailed round to W. coast, and up the Clyde as far as Largs, where, in 1263, an invasion, headed by Hako IV. one of their most celebrated kings, was valiantly repulsed. Hako IV. died shortly after in the Bay of Kirkcubright, after a storming reign of 46 years; and was succeeded by his son Magnus IV., surnamed Lagabæter (the Lawgiver), in consequence of the many beneficial laws which he introduced, though, during his reign, the foreign dominions of the Norwegians were considerably abridged by the sale of the Hebrides and the Isle of Man to the Scottish king Alexander and their commerce crippled by an injudicious treaty with the Hanse towns. During the reign of Magnus IV. the clergy had been permitted to make numerous encroachments, but his successor, Eirik II., who came to the throne in 1299, was a man of a different stamp, and from the determination with which he opposed their encroachments, bears the surname of Priest-buster or Priest-biter. He married first a daughter of Alexander III. of Scotland, in whose right he afterwards laid claim to the Scottish crown, and secondly Isabella, sister of King Edward the Bruce. In 1319, the crowns of Norway and Sweden became, for a short time, united in the person of Magnus V.—a feeble prince, who had favorable opportunities of establishing a powerful dynasty, but failed to improve them, and the crown of the north was thus divided, and some of its members during the sovereignty of Norway in that of Britain, Sweden, and

Denmark, and, in 1397, was formally crowned king of the three kingdoms of the North. The union was never very complete; each State retaining the right to act independently, and accept or refuse the sovereign who might have been elected by the others. Sweden again became a separate kingdom; but the union between Denmark and Norway was drawn closer and closer, very much to the disadvantage of the latter, which was robbed of its rights, and ultimately degraded into a mere dependency of the former. In a diet held at Copenhagen, in 1557, during the reign of Christian III., a formal Act was passed, declaring that Norway had forfeited its independence. This act was not permitted to remain a dead letter; and the subsequent history of Norway becomes merely a part of that of Denmark. During the wars consequent on the French revolution, the Danes, having leagued themselves with the oppressor, the Norwegians were obliged to follow in their train. They were thus brought into collision with Great Britain, which blockaded their ports, and almost annihilated their trade. When the great coalition to free Europe from French domination was formed, Denmark kept aloof, and refused to join it. Sweden pursued a wiser policy, and stipulated that, in the event of success attending the arms of the Allies, Norway should be united with her under one monarchy. After the battle of Leipzig, when the success of the Allies was no longer doubtful, effect was given to the stipulation, in 1814 by the treaty of Kiel. The summary manner in which Norway was thus hurried away, could not but be extremely galling to its inhabitants, who, under the most untoward circumstances, had never ceased to cherish a love of freedom, and a determination to resist was soon manifested. At a diet held at Eidsvold, and attended by deputies from all the districts, a limited monarchy, with a strong infusion of the democratic principle, was almost unanimously adopted as the form of government and Christian Frederick, who had previously been the regent, and was presumptive heir to the throne of Denmark, accepted the crown. His obvious want of ability soon became manifest to a circle, and the Swedish king who had used his military success with great moderation, having offered to accept the constitution of Eidsvold, with such slight modifications as the change of dynasty rendered necessary all resistance to him ceased. His foreign origin, and inability to speak the language of Norway, notwithstanding the general ability, justice, and success of his measures, were serious obstacles to his popularity, but these have disappeared in the person of his son, Oscar I., who succeeded in 1844, and, having acted as viceroy since 1834, had proved himself not unworthy to govern. (See *De la Esquive, in Esq. Moderne Forester, Norway, in 1840-49*. Furell, *Statistik von Schweden, Skillingburg, Beschreibung über Skandinavien* Hef. No.)

NORWELL, par Eng. Kottu; 5736 sq. Pop. 957

NORWICH (anc. Venta Norwiche) a city, municipal and port. bor. and Mahop's seat, England, cap. co. Norfolk, agreeably situated on the sloping banks of the Wensum, which is here crossed by nine bridges, and immediately below joins the Yare, and on the Eastern Counties and the Eastern Union Railway, 18 m. N. E. of London. It was formerly renowned by walls, fragments of which still exist, flanked with numerous towers, and entered by 13 gates. Owing to the quantity of ground occupied by gardens and orchards, the town has much more of a rural appearance than would be in place of the same magnitude, and covers a much larger area than might suffice if it were closely built upon to accommodate its population. Advantage has been taken of this in the numerous improvements which have been effected recently, and many new streets and handsome rows of houses have thus in different quarters, particularly in the suburbs beyond the precincts of the ancient walls; but much remains to be effected, and Norwich, taken as a whole, is still very half-forgotten built. Not a few of the streets are narrow, winding, and either unkept or paved badly; and the houses, generally of brick, which line them, or rather overhang them, with their rude pointed gables, are the more remarkable for their antiquity than for the merits of their architecture. An exception, however, should be made in favour of the mansion place, which is a question, that it ranks as one of the noblest in the kingdom, and presents, particularly on week-days, a picturesque and unusual appearance. Many of the public buildings are well deserving of notice.

on account both of their intrinsic merits, and of the interesting associations connected with them. The cathedral, founded in 1094, and originally Norman, though now exhibiting a somewhat incongruous mixture of styles, is a cruciform structure, with a lofty tower and spire, rising from the intersection of the nave and transepts to the height of 315 ft. The interior is the largest in the kingdom, and is the most remarkable in the province of its roof, divided by 14 semicircular arches, and rendered almost unique by the 828 figures of sculptural subjects, elaborately sculptured upon it, and in the embellishments and dimensions of its cloisters. Besides the cathedral, Norwich possesses 40 churches, and about 22 Dissenting chapels. Of the churches, the most remarkable are St. Peter's, Mancroft, a large and handsome cruciform structure of the 15th century, with a noble tower, 98 ft. high, containing a peal of 12 bells, considered one of the finest in the kingdom; St. Andrew's, a large edifice in the later pointed style, completed in 1806; St. Clement's, remarkable chiefly for its antiquity, St. George's, Colgate, with a lofty tower, built about 1450; St. Giles' one of the finest churches of the town, wholly rebuilt in the reign of Edward II., in the later pointed style, with a tower surmounted by a battlement and cupola 118 ft. high; St. Michael's, Costsey, a large and handsome building, with a lofty tower and a chapel; St. Gregory's, St. John's, Muldersons, St. Lawrence's, an ancient, large, and handsome structure, in the pointed style, and St. Stephen's, the only city church completed after the Reformation. Among the Dissenting chapels, the most deserving of notice are those of the Independent Friends Street, a handsome edifice with a well-proportioned Doric portico, Parliamentary Baptists, Boatgate and Colgate, the Swedenborgian, formerly the French Church, having been used by the French Protestants, called the Walloon company a small edifice, with a square tower the Friends, in Gost Lane, a handsome structure of white brick, with a Doric portico; the R. Catholics, in Willow Lane, a handsome edifice, built in the Corinthian classical style, with a elegantly fitted up interior, and the Unitarians, a spacious and elegant octagonal edifice, crowned with a dome resting on eight Corinthian columns. Among the other public buildings and establishments are the castle, a noble feudal relic, apparently of Norman origin, finely situated near the centre of the city on a lofty eminence with precipitous sides, and still surrounded by its massive donjon tower but otherwise so altered, to adapt it to its present use as a jail that little idea can be formed of its original appearance; the Sheriff's hall, on the lower vallum of the castle; the bishop's palace, and the faculty, large irregular piles adjoining the cathedral, and like it, approached through what is called the Eplingham Gate, a remarkable structure, consisting of a lofty pointed arch, flanked with semi-elliptical buttresses, and enriched with columns, mouldings, and 88 male and female statues in sculptured niches, the Guildhall a large building at the N.W. corner of the market, partly fitted up as a courthouse, where the assizes and quarter sessions are held, St. Andrew's Hall a noble fabric, originally the nave of the church of the Black Friars' Convent, but now fitted up so as to form one of the largest and most splendid halls for municipal purposes in this country, and adorned with a large and interesting collection of olive portraits, the training college of schoolmasters, and the diocesan training institution; the grammar-school, situated within the precincts of the cathedral, and occupying what was formerly the church house, the Government school for modelling and design the children's hospital, Norman's charity, city charity, British and foreign, national, infant, and various other schools, St. Giles', Donnybrook, Costsey, and the Norfolk and Norwich hospitals, the last occupying a spacious structure of red brick, well fitted up for the convenience and comfort of patients; the lunatic and blind asylums, the infirmary; the new jail and house of correction, presenting a massive front, supported by rusticated Tuscan columns; the workhouse, originally the choir of the Black Friars church the corn exchange, a large building in the Grecian style, the cavalry barracks, the theatre, assembly-rooms, several public gardens and bowling-grounds, &c. In addition to the benevolent endowments already mentioned, are numerous parishes, voluntary, and other charities; the Bannister scientific institutions include a public library of about 18,000 vols., a library institution, with a well-stocked library of about 11,000 vols.; a mechanical in-

stitute, a young men's institute, a people's college, and a museum, occupying a handsome modern building, and possessed of several valuable collections.

Manufactures are very extensive, and employ the six larger part of the population. Worsted goods, of which a coarse description appears to have been made even before the Norman conquest, were greatly improved by the arrival of Dutch and Flemish settlers at different times, and have ever since continued to form the most important staple of the town, though they have assumed a vast variety of forms, and become greatly intermixed with other materials, as cotton and silk. The leading articles at present are shawls, crapes and bombazines, and to these may be added mousselines de laine and other imitations of French fabrics, light cotton goods, demasks, comets, Goss de Naples, and Bandana handkerchiefs, and Parasol cloth, by which businesses have been greatly superseded. The looms employed in the town and neighbourhood are estimated at upwards of 14,000. The other industrial establishments include extensive worsted factories, silk mills, dye-works, corn-mills, vinegar-works, breweries, iron-foundries, &c. The trade, in addition to the large export furnished by the above manufactures, and by agricultural produce, consists of considerable imports, chiefly of wine and oil from the Continent, and of yarn from Ireland. In carrying on this trade, facilities are afforded both by the railways already mentioned, by the river, navigated chiefly by wherries of from 15 to 40 tons, and by regular steamers to Yarmouth, and by the Norwich and Lowestoft navigation, by means of which vessels of small tonnage have direct access to the town from the sea. Besides two weekly markets—of which that held on Saturday for corn and cattle is very important, being for cattle the largest in the kingdom, with the single exception of that of London—there are two annual fairs.

The site of Norwich has undergone a remarkable change since the 15th century. It has gradually been raised by a large area of the sea, the bed of which may still be distinctly traced, but at that period the waters began to recede, and by the middle of the 17th century left only the channel of the river in the form which it now presents. The foundation of the modern town cannot be fixed earlier than 448. On the departure of the Romans it was seized by the Saxons, and by 575, had risen to be the capital of the kingdom of East Angles. Its castle, originally founded by Uffa, at the date last mentioned, was greatly improved, first in 642, by Anna, and afterwards in 875 by Alfred the Great. By the middle of the 10th century it had become a large and wealthy town and been divided into several distinct parishes, but in 1003 it was attacked by the Danish fleet, commanded by Sweyn their king, captured, and laid in ashes. It was shortly after rebuilt by the Danes themselves, who having conquered the country, made it one of their settlements. It increased rapidly, but was chiefly distinguished as a great fishing town. In the 11th century, in the reign of Edward the Confessor, it had become a large and affluent borough and contained 25 parochial churches. It had hitherto owed its chief importance to its castle, which was then deemed impregnable, but in 1294, it acquired new importance by the building of its walls, and in 1296 it began to send representatives to Parliament. In 1298, the foundation of its prosperity was laid by Edward III., who made it a staple town for the counties of Norfolk and Suffolk, conferred upon it other important privileges, and induced great numbers of Flemings to settle in it. A still greater number arrived at a later period during the reign of Elizabeth, and the inhabitants, not only profiting by the lessons thus taught them, but improving upon them, ultimately surpassed their masters, and made their manufactures famous throughout the world. In the more modern history of Norwich, there is no event of much interest, but it has given birth to several distinguished individuals—among others, Dr. Matthew Parker, Archbishop of Canterbury; and Dr. Samuel Clarke the celebrated divine. It sends two members to Parliament, necessaries (1691), 5890. Pop. 68,190.

NORWICH is a city, U. States, Connecticut, at the head of navigation on the Thames, 40 m. E.S.E. Hartford lat. 41° 32' N.; lon. 72° 5' W. Norwich city or Olden Landing as it is sometimes called, is built on a steep locality of a high hill, between the Abenaki and the Kenta, where

these rivers unite to form the Thames. It contains a court-house, jail, a townhall, a high school, a female academy, and seven churches. Steam-boats ply between New York and Norwich and it is connected with Worcester and Boston in Massachusetts by railway. Pop. 4500.

NORWOOD, a vil. and dist. England, co. Surrey, beautifully situated in an elevated and salubrious district, studded with elegant villas, 6 m. S. London. It has two district churches, two chapels of ease, an independent chapel, several industrial and other schools; manufactures of earthenware, and a mineral spring, a fine cemetery and pleasure grounds, elegantly laid-out, which attract numerous visitors. Pop. 6044.

NOR-BAY, *Norvæ-Bæ*, or *VANDØ Bæ*, an isl. N.W. coast Madagascar, belonging to France, forming the N. entrance of the Bay of Passadeva, lat. 15° 20' S. lon. 48° 30' E. It is the largest island on this part of the coast; has a finely diversified surface, and is evidently of volcanic formation. The culminating point, situated near the S., about 1700 ft. high, is clothed to the summit with magnificent timber. Its coast-line is much indented, and at several points affords good anchorages. The best cultivated spots are along the shore, and produce rice, wheat, potatoes, bananas, and manioc far beyond the wants of the inhabitants. Pop. (1849), 15 178.

NORCHEMROD, a vil. Prussia, Saxony gov. Magdeburg circle, and so near Weisgrotte as to be properly its suburb. It has a church. Pop. 1068.

NORSEHEAD, a lofty promontory Scotland, E. coast Caithness, forming the S. entrance of Sinclair Bay, lat. 56° 26' N. lon. 3° 4' W. It rises 377 ft. above the sea, and has a revolving light.

NORSE-LEADS a small isl. Scotland, Shetland group, E. of Isl. Burray from which it is separated by a narrow and dangerous strait, greatest length, N. to S. about 2 m. breadth rather more than 1 m. It slopes gradually W. to E., where it terminates in a remarkable headland called *Norse Voe*, or *Hang Cliff*, which has a height of 577 ft., and is in lat. 60° 8' 16" N. lon. 1° 0' 35" W. The greater part of the surface is fit only for pasture.

NORSEIN, a in Saxony circle and 45 m. S.E. Leipzig 1 bank Mulde, here crossed by two bridges. It has a castle, on hospital, manufactures of ribbons, leather and shoes; a trade in these articles, and in wool, and cattle. Pop. 2141.

NORSELOP, a vil. Hungary, Thaurer District, co. Veszprim with two churches, and some trade in corn and cattle. Pop. 1298.

NORZVAJ, a vil. Hungary co. Borsod, with a church, a castle, and a trade in corn, wool and timber. Pop. 1928.

NOTARESCO a vil. Naples, prov. Abruzzo-Ulteriore I. 10 m. S.E.E. Teramo. Pop. 1680.

NOTGROVE, par. Eng. Gloucester, 1830 ac. P. 195.

NOTLEY, two pars. Eng. Essex — 1 (Black) 1836 ac. Pop. 527 — 2 (White) 2228 ac. Pop. 513.

NOTO [anc. *Notion*] a in Sicily prov. and 14 m. S.W. Syracuse, on a height above 1 bank Noto, near its mouth in the Ionian Sea. It is one of the most agreeably situated and best built towns in the island, and contains several churches and convents, an hospital, college, and museum, rock in rare Greek, Roman, and Moorish coins; and some trade in corn, wine, and oil. Its site is said to be unhealthy. Pop. 11,065.

NOTO (VAL DE), an ancient division, Sicily, now forming the whole of prov. Syracuse, and parts of those of Catanzaro and Caltanissetta.

NOTRE-DAME, a bay N.E. coast, Newfoundland, formed by Cape St. John on the N.W., and the N. Headland on the S.E. a width at entrance nearly 80 m., it penetrates deeply into the land by numerous coves and indentations, and is studded with islands.

NOTRE-DAME numerous places, France, particularly — 1 (*de Bondeville*) a in dep. Seine-Inférieure, about 3 m. N. Rouen with manufactures of calico, machine-works, dyeworks, and cotton-mills. P. 1918 — 2, (*de Camilly*), a in and com. dep. Manche 9 m. S.E.E. Coutances. P. 1087 — 3, (*de Mont*) a in and com. dep. Vendée, 43 m. N.W. Les Sables. P. 2768 — 4, (*de Lamoignon*) a in and com. dep. Aisne, 8 m. E.N.E. Laon, 1 bank Aisne with a church of the 12th century and manufactures of numerous articles of jewellery as crucifixes, beads, rings, &c., for pilgrims,

attracted here by an image of the Virgin. P. 1854 — 5, (*de Vannes*), a vil. *See AIGRENTYLLERS*.

NOTRE-DAME-DE-MILLERIE, a vil. and com. France, dep. Savoie, 1 bank Isère, 5 m. E. Evian with a church, a trade in corn, hemp, and chestnuts. A considerable number of the inhabitants are monks. Pop. 1890.

NOTTEBOE, an isl., S.E. coast, Norway, on W side entrance of the Bay of Christiania, opposite the town of Tonsberg, from which it is separated by a very narrow channel, greatest length, N. to S., 7 m., breadth, about 8 m. It forms a single parish. Pop. 3245.

NOTTING-HILL, a suburb to the W. of London, par. Kensington, about 4 m. from St. Paul's. It consists of a number of handsome terraces and detached villas.

NOTTINGHAM, or *NOTTONHAMSTON* an inland co. England, bounded N. by York and Lincoln, E. Lincoln, S. Leicester and W. Derby and York. Area, 535,680 ac, of which about 500,000 are arable, meadow and pasture. The general surface, with exception of the Vale of Trent, is, for the most part, hilly and uneven, but some of the eminences reach any great elevation. The highest grounds are Beacon Hill, the Wolds, and Sherwood Forest. The E. and S.W. border is chiefly occupied by the line rocks, the Vale of Trent and the Uplands to the W. of it are, for the most part, composed of rocks of the red sand or new red sandstone group. The chief minerals are coal, gypsum, and stone of various kinds. The soil consists of three different kinds — sand and gravel, sandy loam, and clayey loam. The last, which forms the soil of the Vale of Belvoir is extremely fertile. The ancient forest of Sherwood, which extended about 25 m. with a breadth varying from 5 to 9 m., the principal scene of the adventures of Robin Hood and his companions, covered the greater part of the sandy and gravelly soil on the W. side of the county, which is still called the forest district. The crops usually cultivated are wheat, rye, barley, oats, beans and peas, and an inferior species of malt called *clings*, almost peculiar to the county. *Hops* also form a considerable article of produce in the clay districts. There is a considerable breadth of excellent grass land and meadows on the banks of the Trent and the Soar, employed partly for feeding and partly for the dairy. The cattle are now mostly short horns, and the sheep, Leicester and other improved varieties. Cotton and silk stockings are manufactured in this county to a very large amount, particularly in the town of Nottingham and neighbourhood. Nottingham is famous also for hobbins and. The bleaching trades and mauling business are likewise carried on to a great extent. The county returns four members to Parliament, and two each for the boroughs — Nottingham, Newark and E. Retford. Pop. 270,427.

NOTTINGHAM, a in. Eng. esp. above on, on the Leen, near its junction with the Trent, which is crossed by an ancient bridge of 17 arches, and also on the Nottingham canal and the Midland railway 108 m. N.W. London. It occupies a picturesque site on the broken declivities and considerably abrupt precipices of a sandstone rock overlooking the green meadows and vale of Trent, and from whatever quarter it is approached, but more especially on ascending Radcliff hill from the London side, presents a striking and attractive appearance, its castle, which is rich in historical associations, always forming a prominent object to the view. The town, however, is on the whole very indifferently built, consisting of houses almost all of brick, huddled together more especially in the central and more ancient quarters, without any order in narrow streets, and often placed back to back, without any interval between them, as if the greatest want felt in their construction had been a want of space. New streets and handsome villas have, however, recently risen up in all quarters, and are still continuing to spread with wonderful rapidity. It is worthy of notice that the burgess-land, which formed a belt round the town of about 1000 ac., has been recently inclosed, under the General Inclosure Act, and part of it sold for building-grounds; a large portion has, however, been reserved for pleasure-grounds, promenades, &c., and carefully planted; and, in addition, 16 ac. have been turned into an arboretum for the use of his highness, to whom it is open three days each week free of charge. Considerable progress has already (1856) been made in supplying the Arboretum with plants, which are arranged

alphabetically. The inhabitants have also the free use of a park of 180 acres, belonging to the Duke of Newcastle, which is much resorted to as a promenade by all classes of the community. Another open space much frequented as a public resort, is the market-place, which, covering a triangular area of nearly six acres, surrounded by lofty houses and arched shops, strikingly contrasts with the confined streets in its vicinity, and almost deserves the description given of it by Leland in the reign of Henry VIII., that 'it is the fairest without exception in all England.'

Among the remarkable buildings the castle is conspicuous. It crowns the summit of a precipitous rock rising 135 ft. above the level of the meadows, which stretch from its base

and highly decorated structure, with numerous windows of richly-stained glass, and a central tower terminating in a spire 150 ft. high. Immediately adjoining the chapel is a large convent, built in 1844. Other buildings deserving of notice are the Exchange, a large building fronting the market-place, and consisting partly of a large and elegant hall, much used for public meetings and exhibitions; the County Hall with county gaol attached; the Guildhall, built of brick faced with stone; the House of Correction, a large edifice built on the site of a convent of the Knights of St. John, and though well suited for its purpose devoid of outward decoration; the Union workhouse; Corn Exchange; the Barns; Assembly-rooms, forming a large and commodious structure of the Corinthian order, partly occupied as a hotel; Mechanics' Hall, a handsome stone-roofed building and a very pretty theatre. In the vicinity of the town, on Lion Hill, is a general cemetery, containing 12 ac., was formed in 1836.

The principal educational and literary institutions are the free grammar-school well endowed, and occupying a large and handsome building, with a Gothic front the Blue-coat School, which clothes and educates 80 boys and 50 girls, the people's college, founded by subscription in 1846, to afford superior instruction to the working-classes and occupying a large brick building of Gothic architecture the Unitarian free school the British, national infant and ragged schools the Government school of design, the mechanics institute, the Bromley House subscription, law, arithmetic and other libraries. Among charitable institutions are the general hospital, the dispensary the general infirmary with accommodation for 160 patients the Midland institute for the blind, Plumpton's Cottages, and Lambey's hospital, and Wiloughby's, Handley's, and various other almshouses and benevolent foundations.

The staple manufactures to which the town owes its prosperity and rapid increase are hosiery and lace. The former first began to assume importance about the middle of the 18th century, and the latter about 30 years after in 1778, when the point-net machine was invented. The bobbin-net machine was invented about 1799 but having been patented in consequence of subsequent improvements, did not come into general use till 1833. These manufactures were long carried on exclusively in the homes of the workmen, but large factories, employing steam-power, have recently been erected, and will soon apparently almost entirely supersede domestic labour. In addition to the textile manufactures, including the machine shops, and other industrial establishments more immediately dependent on them, a considerable number of hands is employed in the cotton and woolen manufactures in silk, worsted, and cotton spinning mills, and in making articles of malleable and cast iron, wire, brass fenders, &c. The trade in corn and cattle is very important, the maling business is extensively prosecuted and the breweries have long been famous for their ale. The two weekly markets are abundantly supplied with all kinds of provisions; and of four annual fairs—chiefly for horses, cattle, cheese, swine, and other agricultural produce—two take place three days. One of them held on the 2d, 24, and 4th October and called the Goose Fair is celebrated, and forms even an era, that a large portion of the inhabitants date all the events of the year from it.

Nottingham was in early times a great resort of the Druids, and is thought to have afterwards become a Roman station. Under the Saxon Heptarchy it belonged to the kingdom of Mercia, and after its dissolution ranked as a Danish borough. It was walled by Edward the elder, and acquired a great addition to its importance on the erection of its castle by William the Conqueror. Its part in the civil war has already been referred to in the history of its castle. In more modern times, it has acquired a rather unenviable notoriety by the frequency and violence of its riots. The most memorable of these were the so-called Luddite riots, which were so skillfully organized, so successful in sweeping the vigilance of the law,

NOTTINGHAM.—From the Elizabethan House.

to the banks of the Trent, and perforated by numerous holes and vaults supposed to have been made by the Druids. Its naturally strong position appears to have marked it out for a first in the time of the Danes, but it first assumed its form of a castle in the time of William the Conqueror, who erected it as a means of overruling and repressing the bold outlaws frequenting the recesses of the old forest. In the great civil war it was selected by Charles I. to erect his standard, after he had decided on an open contest with the Parliamentary forces, and not long after when he had evacuated it it stood a memorable siege, and effectually resisted all the attempts of the Royalists to regain possession. It was dismantled during the Protectorate, and subsequently became the property of the Duke of Newcastle, who covered its site with a large mansion, erected in 1674, having nothing of a castle but the name. Even this is now a ruin, having been destroyed by a body of rioters during the excitement connected with the Reform Bill, and nothing remains of the ancient castle but a few vestiges which it requires the skill of an antiquary to trace. The plan of the castle includes 8 churches, and about 28 dissenting chapels; of which 7 are Baptist, 6 Methodist, 4 Independent, and Friends, Unitarian, 2 Catholic, Irvingite, and Swedenborgian, 1 each. The Jews also have a synagogue, and the Lesser Day School, or Macclesfield, hold meetings in an old Methodist chapel. Among the churches are St. Mary's, an ancient and venerable structure, supposed to have been erected in the 7th century, originally pure Gothic though now defaced by a modern alteration, in which the Doric has been incongruously introduced, so large as to be capable of accommodating 3000 persons, and rendered conspicuous above all the other buildings of the town, both by the eminence on which it stands, and a lofty, massive, and majestic square tower; St. Nicholas, a plain brick building; St. Peter's, an ancient Gothic edifice, surrounded by a cloister tower, terminating in a plain spire; St. James's, with a square pinnacled tower; St. Paul's, in the Doric style, with a handsome portico, Trinity, and St. John's, both handsome modern structures, in the early English style. Among dissenting chapels, the most conspicuous is that of the 2. Catholics, a spacious, cruciform,

and so religiously and piously persisted in for a period of years, that Parliament was obliged to pass an act, making it death to break a stocking or lose a sheep. The riots of 1681, for which the rejection of the Harewood Bill by the House of Lords, was made the pretext, destroyed property above the value of £50,000. Colonel Hume, the patient defender of the cause in the civil war and Henry Kirk White, were natives of Nottoway. The borough is governed by a mayor, 14 aldermen, and 43 councillors, and sends 2 members to Parliament. Pop. of par. loc. (1851) 57,407, pop., including suburbs of Bedford, Enfield, Histon Green, &c., upwards of 100,000.

NOTTOWAY, a river U States, which rises in the S. of Virginia, near the village of Nottoway, flows S.E., enters R. Carolina, and after a course of about 110 m., unites at Winton with the Chowan in forming the Meherrin.

NOTTULN, a vil. Rhinisch Prussia, gov. and circle Münster, with a church, a post-office, an iron-mill, stone quarries, and a trade in cattle. Pop. 1140.

NOTTWEIL, a vil. and par. Switzerland. can. and 10 m. N W Luzern, with a church. Pop. 1123.

NOUCELO, a river, Italy Veneto, which rises in prov. Friuli, about 3 m. N.E. of Fontanafredda, passes that town, where it becomes navigable, receives the Madonna and several small streams, and joins 1 bank Lamma at Treviso.

NOUGHAVAL, two pars. Ind. — 1, Longford and Westmeath; 12,723 ac. P. 2778. — 2, Clare, 4661 ac. P. 248. **NOUKO**, or NOUKO, an isl. Russia, S W entrance Gulf of Finland between the mainland of gov. Esthonia and isl. Wargaa; about 9 m. long, by 3 m. wide. Pop. 450.

NOURIAGMO, a cape, forming the N.E. extremity of Lawrence Bay N.E. coast of Asia, near the point where it approaches nearest to the coast of America, about lat. 65° 30' N., lon. 171° W. At the mouth of a river about 2 m. from the cape is the village of Nourmag, occupied by stationery Tchukchis.

NOURA, or NURA, a river, Siberia, which rises among the mountains near the R.W. frontier of gov. Omsk, flows N.W., and unites with the Little Noura from Lake Kurgaldin, and with the Kuznetich in forming the Irtys, after a course of about 220 m.

NOUSHERA — 1 A vil. and fort, Punjab, 30 m. S.E. of Multan. lat. 34° 7' N., lon. 75° 7' E. — 2, A vil. Afghanistan, Peshawar territory, on the Cabul, 15 m. N. of Attock, lat. 34° 5' N., lon. 72° 7' E. — 3 A vil. Sindh, division Khyber, lat. 27° 45' N., lon. 68° 30' E.

NOUVIONS (Lx.), a tn. France, dep. Aisne, 15 m. N.W. Verrieron, on the Meuse with manufactures of lace used in the making of lace, a glass-work, and cotton mills. Pop. 2071.

NOUZON, a tn. France, dep. Ardennes, on the Meuse, here crossed by a suspension-bridge, 30 m. E.S.E. Mézières. It has manufactures of ironmongery, and there are blast-furnaces and other iron-works in the neighbourhood. P. 2575.

NOVA FRANCIA, a tn. Brazil, prov. and 120 m. N.E. Rio-de-Janeiro with a townhouse, a superior English academy, a primary school, and a trade in butter and cheese. The S. part of the district being mountainous, persons suffering from ague, in other parts of the country, often resort to it with good effect.

NOVA SCOTIA [French, Acadie], a colonial prov. British N. America, forming a peninsula connected with the mainland by an isthmus only 3 m. broad, having the Bay of Fundy on the sea side, and Northumberland Strait on the other. It lies between lat. 43° and 49° N.; and lon. 61° and 67° W., and is bounded N. by Northumberland Strait, which separates it from Prince Edward's Isle; N.E. by the Gulf of Canada, flowing between it and the island of Cape Breton (now a county of Nova Scotia), S. and S.E. by the Atlantic Ocean, W. by the Bay of Fundy, and N.W. by New Brunswick. Greatest length, S.W. to N.E., 280 m.; greatest breadth, about 120 m.; area, 15,617 sq. m., or 9,994,890 ac.; chief town, Halifax. Its N.E. coast is remarkable for the number and capacity of its harbours, there being no fewer than 11 ports capable of receiving ships of the line, and 14 of sufficient depth for merchantmen, between Halifax and Cape Cansu, a distance of not more than 110 m. There are no mountains of great magnitude or remarkable elevations in this province; ranges of high lands, seldom exceeding 500 ft.

above sea-level, run through the country, generally N. & W., and, with less prominent hills and undulations, give a pleasing variety to the scenery. There are few large lakes or rivers; the largest of the former is Lake Restigouche, about 3 m. in length, and of the latter, the Miramichi, about 3 m. wide at its mouth, draining into Minas Bay, off the head of the Bay of Fundy, an extensive chain of small lakes, of which nearly 100 occur within a space of 20 miles square.

The mines and minerals of Nova Scotia, though but slightly explored, are known to be valuable. Granite, trap, and gneiss rocks predominate, the most abundant variety is the gray granite, which prevails along the shore, and is well adapted for mill-stones. Clay-slate, of fine quality, is of extensive formation in the E. section of the colony, and gray-wacke slates along both shores of Chedabucto Bay several extensive and beautiful groves are to be found on different parts of the coast and graptolites much esteemed in the U States are obtained from a stratum of sandstone, found between the coal and limestone. Coal, and iron in combination with it, abounds in many places. Copper-ore also exists, but the attempts to work it have been hitherto unsuccessful; gypsum is plentiful and furnishes an active and profitable trade. The soils of Nova Scotia are various along the S. shore, the granite forms the base, extending, in many places, 20 m. into the interior. This region is high and fertile, and being that which strangers first see, is apt to create an unfavourable impression; but there are elsewhere extensive alluvial tracts, producing the most abundant crops. Many fine fertile districts also are met with on the N. coast, along the banks of rivers and the heads of bays. The climate of Nova Scotia is affected by its almost insular position, and is characterized by a remarkable salubrity. The springs are tedious, but the summer heats being for a brief season assuaged, vegetation is singularly rapid, and the autumn is delightful. In winter there is sometimes a severe and hard frost for weeks before Christmas, and perhaps in the following year the plough may be seen in the fields as late as the 10th of January. The thermometer ranges from 18° to 70° F. It is estimated that about 9,000,000 ac. are still covered with primeval forests, and that the land under cultivation does not much exceed 400,000 ac. Wheat, potatoes, and oats, are the most important crops but buckwheat, rye, barley, Indian corn, and field peas, are extensively cultivated, and in seasons when the wheat and potatoes fail, are of great value. Nova Scotia, however, does not yet supply her population with bread even in good seasons, large importations of fine flour being yearly made from the U States. The apple orchards of the N. counties are very productive, and extend along the roadsides in an unbroken line for 30 m. Apples and older are annually exported and the domestic supply is cheap and abundant. Cattle and sheep are raised in considerable numbers and are exported both to New Brunswick and Newfoundland, but the breeds are inferior, and little attention is paid to their improvement. The cod and haddock fisheries are actively prosecuted all along the S. coast. Mackerel and herrings are also taken in great quantities, but the salmon fishing has greatly fallen off, from the erection of grist and saw mills on the streams. The total value of fish exported, in 1848, was \$244,056, above a half of which was cod. Several attempts have been made to prosecute the whale and seal fisheries, but hitherto with no great success. The manufactures of Nova Scotia are yet but very limited. Coarse cloths, called 'homespun,' are made by the peasantry, and are generally worn by that class. Coarse flannels, bed-linen, blankets, and carpets, are also manufactured. Tanning is carried on to some extent, and in the towns and villages, boots, shoes, saddlery, harness, household furniture, and agricultural implements, are made in large quantities. Stocks of bleached grass, and hats of straw are made in many of the rural districts; and in the neighbourhood of Halifax, tobacco, confectionary, printing and wrapping paper, hats, and some other articles, are manufactured. There are several distilleries there also. The houses of Nova Scotia are mostly constructed of timber, excepting in Halifax and the larger towns, where some good stone and brick houses are to be seen. Not more than 1000 persons reside in the province, and the soil is of no great quality on the S. coast. Grasses are all along the N. shore, and excellent alone in the capital region.

The foreign trade of Nova Scotia was very limited previous
